Do you See 6-year old Peggy?
No! I see a Girl Planning her Trousseau.

Will she be a Charming Bride?
Yes, Beautiful—her Smile's so Lovely!

To what does She owe this Lovely Smile?
Perhaps to a Habit she learned as a Child—Ipana and Massage!

Protect your smile! Keep your gums healthier, your teeth brighter . . . with the help of Ipana and Massage.

SHE STILL PLAYS with dolls and she goes to bed by seven. But Peggy is a beauty specialist when it comes to her own bright smile . . . for, far better than her parents, Peggy understands the modern care of teeth and gums.

Indeed today, thousands of youngsters know what their parents still have to learn . . . that *gums* as well as teeth must have regular daily care. They are taught in their classrooms that the soft, creamy foods we moderns enjoy so much, provide little exercise for gums . . . deny gums the exercise and stimulation they often need for health. No wonder then that gums tend to become weak and tender . . . and signal their condition with that warning tinge of "pink"!

Be Warned By "Pink Tooth Brush"!

"Pink tooth brush" may not mean serious trouble . . . but it's a warning just the same. And the minute you see it . . . *see your dentist!* He may merely tell you that your gums are underworked . . . that they need exercise and stimulation. And like so many dentists these days, he may suggest "the healthful stimulation of Ipana and massage"!

For Ipana Tooth Paste does more than clean teeth thoroughly. Used with massage, Ipana is specially designed to aid the gums to health. So, each time you brush your teeth, massage a little extra Ipana onto your gums. That invigorating "tang" you notice is exclusive with Ipana and massage. It means that stimulation is awakening in the gum tissues . . . helping the gums to become firmer and stronger.

Get a tube of economical Ipana today. And begin now the healthful dental habit of Ipana and massage . . . for sounder gums, brighter teeth, a more attractive smile!

Ipana Tooth Paste

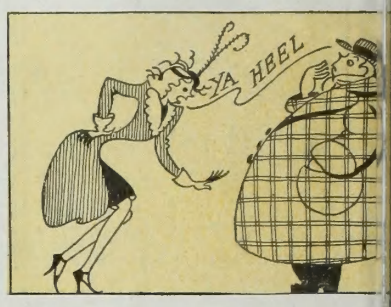
COVER EARL OLIVER HURST

ANY WEEK

SOMETHING always happens to Mrs. Sheila McBankeel of San Francisco, California, when she hears of Reds fomenting strikes in armament factories. Does to us too. But it happened so hard to Mrs. McBankeel recently that she threw an apologist for Communist agitators out of her house. When accused at the door of being a Red baiter, Mrs. McBankeel's reply was: "You're darn' tootin' I am. That's the first time you've been right since you dropped in." Whereupon she wrote us a five-page letter on the subject, adding a postscript inviting us to call and listen to what she really thinks. But we get the idea. These psychopaths that cause things to happen to her are obviously eager to see that famous lover of mankind, Adolf Hitler, win the war in Europe and then, at his leisure, conquer the Americas. This would be a great help to his friend, that even more ardent lover of humanity, Joe Stalin. Thereafter, instead of grinding his soul to powder toiling in American industry for a dollar an hour, the Red would know the deep satisfaction of working in German and Russian factories for glory and a few ersatz sandwiches, while the military police stood by just to make sure that none of the devoted workers made silly mistakes such as sabotage and subversive activity. There's practically nothing we can add to Mrs. McBankeel's views except, perhaps, that if we had our way we'd— But there; we'd better stop before we make a few un-American observations. We were merely going to say that these ruddy lads don't make us sore. But they do make us scratch.



IN THE meantime an energetically patriotic gentleman we know is licking his wounds. Armed with a thirty-eight page prospectus, he called upon the National Defense Committee offering, for an adequate fee, to establish in our Army training centers moral guardianship of our fledgling soldiers. He would begin with a survey of the surrounding territory and ferret out immorality. He would not go so far as to decorate suspicious ladies with scarlet letters, but he would have a good talk with them, warning them that any funny moves by them would be sufficient reason to quarantine them or even shoo them off into less sacred precincts. A patriotic system of espionage would be set up inside the camps, and intelligence agents, personable young women of known moral soundness, would be maintained in near-by towns. We regret to tell you that our moral censor was all but manhandled. He told us some of the things they said to him. No wonder his feelings were hurt. But he was pulling himself together courageously—enough anyway, to tell us that in two or three of our camps free dancing lessons are being given soldiers by young women dancing instructors. And that alone should end any doubt you may have that things are not coming to a pretty pass.

OUR latest information from Hollywood indicates no lack of willingness of the movies to serve humbly. At a recent dinner party attended by a large number of famous names, one of the latter, a director, arose unassisted to make a few remarks. "Ladies and gentlemen," said he, "as an Englishman I congratulate you on your high patriotism. I have learned that there is not a star, male or female, in Hollywood who has not stepped forward and offered himself for the leading role in any Grade A picture of Army, Navy or aviation life which would inspire the young men of America to enlist in the battle for democracy and humanity."

THE first snowfall did more than make traffic a little more difficult in Hartford, Connecticut. It destroyed at least one man's faith. A friend tells us that it was pretty difficult to get snow shovelers in Hartford, but finally a considerable number of men were plucked from the WPA rolls. Among them was the poor fellow who was about to be disillusioned. After shoveling for several minutes he confided to a fellow shoveler that this, in his opinion, was pretty shabby treatment of a man who merely happened to be out of a job. Besides the whole thing was unreasonable and unseasonal. His pal listened for a while and then, "Well," sighed he, "you would vote for him."

FOR SOME reason we haven't been able to locate, Mr. Jules LaB. Touvenot of Three Rivers, Quebec, wishes us to deny that he ever said that France surrendered to Hitler rather than take the responsibility of prolonging the war and once more be trampled beyond recognition by an AEF. Mr. Touvenot was never quoted in this magazine. Nor does he say that he was. However, he is sending his denial to all the principal magazines and newspapers because he was told that such words were attributed to him in a publication which his informant could not recall. "I have never said a word about the damage the American Army did in France while saving her from the Germans in the first World War," writes Mr. Touvenot. "I have never been in France and know of the scandal only by hearsay. Besides, I feel sure it couldn't be helped."

AND WE regret to hear from Mr. E Boken of Louisville, Kentucky, certain base elements of our popu tion have taken to racketeering ag Mr. Boken was accosted as he left office by a girl who told him that was an English child refugee who been mistreated by the Amer family in whose bosom she had t takenly taken refuge. But Mr. Bo wasn't convinced. When he offere take the child to proper authorities lost her British accent: "You wo ya heel." Later, says Mr. Boken, was heard to remark to a friend it was a "lousy racket anyway."

WE HAVE forwarded Mrs. Henr Creamer's letter to General H Johnson. From Savannah, Geo Mrs. Creamer advises us that she just read the general for the first and was pretty well shocked. "Can be the same Hugh Johnson who to write about rock gardens in a magazine?" inquires Mrs. Crea "He not only gave the best ac about rock gardens but he wrote fectly lovely columns about veget dyes for household uses and wa authority on holiday parties. name was the same except that not remember that he called hir general, although I will say for that he wrote like a major."

BUT again we hear from Mr. Chu, Imparter of Unassailable dom, upon whom we lean in the cr From San Francisco, California, Ming advises us that China has about abandoned hope that the J nese will ever develop true wisdom great many of my countrymen," w Mr. Ming, "have returned to the ness that was ever their pleasan profitless occupation between What, say they, is the virtue in fig a foe who persists in not winning? W fighting the modern governmen China, Japan enjoyed advertisable cesses, but our concave-witted en has proved himself wholly incap of competing with our provincial riors whose guile and stratagem legacies from their ancient Lor Warlike Deeds and Arrangem which teach, in part, that it is fo to seize a tiger by its ears while it is still available. Japan is lamen in need of sound advice."

KEEP UP WITH THE WORLD

By Freling Foster

The "Mickey Finn," a term designating knockout drinks, is named after its originator, Mickey Finn, a famous crook who made a specialty of drugging and robbing drunks, through the use of chloral hydrate in his notorious Lone Star Saloon in Chicago between 1898 and 1903.

A strange form of lightning flashes every few minutes throughout each day and night in the region of the Catatumbo River at the southern end of Lake Maracaibo in Venezuela. Known as the "Catatumbo Lightning," this electrical discharge is so bright that it can be seen at a distance of two hundred miles at night.—*By Jessie Faritree, Atoka, Oklahoma.*

The word "set" has more meanings and more possible uses than any other term in the English language. In defining and describing it, the Oxford Dictionary, for example, employs thirty thousand words.

In the past century, the science of mathematics has so advanced and become so specialized that few men attempt to understand and employ more than five per cent of this knowledge.—*By Gene Foster, Tomahawk, Wisconsin.*

Only two men have been vice presidents of the United States under two different presidents—George Clinton, who served under Jefferson and Madison, and John C. Calhoun, who served under John Quincy Adams and Jackson. Neither completed the two full terms, however, as Clinton died in office and Calhoun resigned, the only man to leave this position voluntarily in the history of this country.

Among cases in which inbreeding has proved to be unharmful was that of an experiment made on a number of albino rats. Mating brothers and sisters for fifty generations, in fact, actually increased their average weight, fertility and life span.

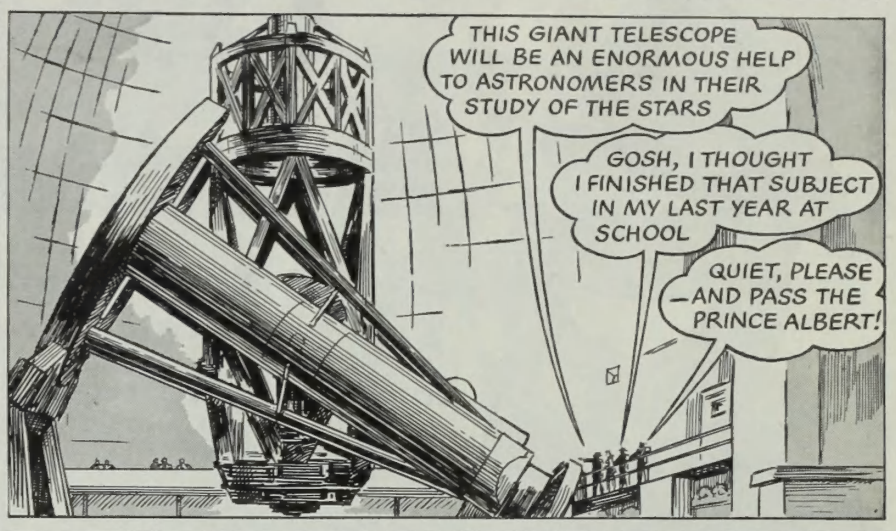
To this day, a large number of women, particularly those among the Arab tribes of Arabia, still follow the ancient custom of perfuming themselves and their garments by sitting in the smoke of burning aromatic spices.

As the tiny island of Saba in the Dutch West Indies consists almost wholly of an extinct volcano, its town lies at the bottom of the crater. As virtually no traveling is done on level ground, this community of 1,600 people possesses no vehicles.

Before December 25th was uniformly adopted as the date for the observance of Christmas, in the fourth century, it had been celebrated, by various peoples at one time or another, on 135 different days of the year.

The densest matter known is the substance of the stars called Wolf 457 and Wolf 219. A cubic inch of it on the surface of the earth would weigh about nine thousand pounds. —*By Don Julien, Shaker Heights, Ohio.*

In one recent issue of the London Daily Mail, a certain British prize fighter appeared in eleven testimonial advertisements, endorsing the merits of a breakfast food, a fabric, a brand of kippers, a razor, a sausage, shirt, shoe, soap, toffee, tobacco and a nerve tonic.



The only persons whose remains have laid in state in the rotunda of the Capitol in Washington have been Abraham Lincoln, Thaddeus Stevens, Charles Sumner, James A. Garfield, John A. Logan, William McKinley, P. C. L'Enfant, George Dewey, the Unknown Soldier, Warren G. Harding and William Howard Taft.

Troubled Heart

By Roland Pertwee

ILLUSTRATED BY HARRY BECKHOFF

Romance complicated by the perils of war and the schemes of a selfish woman

The development of their interest in each other was achieved in the provision department of Barker's

WHEN Robert passed into the I.C.C. and went to India, Carol was left to look after their mother. Delia, a realist who would have been herself damned rather than take on that task, escaped from the danger by marrying a subaltern in her late father's regiment. The family mansion was sold and a pale house rented in Victoria Road, W.8., where an acacia drooped in the front garden and Mrs. Vellaby behind half-lowered blinds, drooped and anguished within.

Desertion by her son and younger daughter was a source of poignant distress to Mrs. Vellaby, who battened upon her offspring and may be accused of having brought them into the world to gratify predatory maternal instincts. Being destitute of wings, she modeled herself upon that wingless insect the spider, weaving a web around her victims and draining their youth with death-dealing embraces. Two out of three had escaped the web and she was resolved to prevent Carol from doing likewise.

There was reason to suppose that she would succeed, for Carol had a sense of duty and, unlike Delia, thought the best, rather than the worst of people. Somebody had to look after her mother, and the obvious person was herself. In accepting the duty, she was sustained by more than fatalism. There was in her nature a streak of the martyr and an inexhaustible capacity for affection. Since no chance was offered to bestow it outside the family her mother came in for the lot and Carol, subduing a desire to create a life of her own, fell into the role of nurse-housekeeper-companion without complaint.

Mrs. Vellaby did all that she could to keep her up to the scratch, and looked to it that the girl's time was wholly occupied in ministrations to herself. Apart from visits to the provision department at Barkers, she seldom allowed Carol out of her sight, and was careful never to introduce to the house any person who might prove a disturbing influence.

"How you spoil me!" she would say. "But I know you would be wretched if I didn't let you. Dear Carol, I have come to depend on you for everything."

But when discussing Carol she took the opposite line: "The dear child is utterly dependent upon me. But for her I would gladly slip away and join my husband on the other side."

Had the gallant but departed major heard those words, he would have turned in his grave, the occupation of which had lost its sting in the comforting insulation it afforded against her society.

It was not until deprived of her other children that Mrs. Vellaby adopted chronic invalidism as a means of getting her own way. To color up her physical frailty, she consulted Dr. Fergusson of Wimpole Street, an irritating creature who congratulated her on the excellent state of her health and whose diagnosis had to be entirely revised for Carol's consumption.

The erosion of wave after wave of mythical complaints dissolved the last of Carol's identity and, at the end of a year, Mrs. Vellaby was assured that she had become a willing slave.

But as so often happens with complacency, something turns up to shatter its fabric. A wire announced that Delia had been delivered of twin boys.

Carol plunged into the room with the news and her cheeks blazing.

"Isn't it heaven? I must go and see them, Mummie. May I?"

Mrs. Vellaby did an invalid's best to exhibit joy; but Kettering was such a long way off; and visitors were bad for nursing mothers; and, although she would try not to mind being left alone, wouldn't it be wiser to wait until the children were brought to town for the christening?

Thus was the damaged web repaired,

but after three days Carol rang up Delia asking this and that and saying how the nurse and babies could have her room and she would sleep on the sofa and . . .

Delia cut her short:

"Terribly sorry, pet, but Alan and I will be staying with his people."

"Delia! Why?"

"Because the brats are mine, and I won't have mother getting her hooks into them."

As Carol dejectedly hung up the receiver Mrs. Vellaby came in and asked to whom she had been talking.

"Delia. She's fixed the fifteenth for the christening."

Mrs. Vellaby flinched.

"You didn't suggest their staying here?"

"I did, but they can't. Don't you want them to?"

"It's not that. I just doubt if I would be up to the strain."

As she went from the room she detected a hint of reproach in Carol's expression and that evening she staged a mild heart attack to divert her thoughts from the risk of straying.

It was characteristic of Delia to name the infants Lewis and Bren for no better reason than that their father was a machine gunner. Mrs. Vellaby was shocked, but a greater shock awaited her when she saw Carol's eyes as she stood beside the font holding the five-week-old Bren to her small, immature breast. There was a look in them that artists down the ages have striven, and generally in vain, to reproduce: the mother look with the soft, tender glory of love and of creation in it.

Fear clutched at Mrs. Vellaby's heart and she was heard to gasp. "Carol . . . quickly . . . give the child to the nurse and take me out. I'm going to faint."

Carol conducted her to the porch and dutifully waited there, what time her soul drifted down from hitherto unvisited heights to a plain, gray, ordinary world.

When the party of babes and grown-ups appeared, Delia said dryly: "Trust Mother to try and steal the show."

SOME weeks later she sent Carol a photograph of the twins in their bath and, witnessing how much of the time that Carol normally spent doing her accounts was devoted to looking at it, Mrs. Vellaby cunningly contrived to spill a bottle of ink over the photograph.

Carol came in as she was finishing off the job with a sheet of blotting paper.

"My dress! It's all over my dress!" she lamented.

But Carol's concern was for the babies, and her cry of, "Mother, how could you?" was unpardonable.

"I do think you might try to be a little more sympathetic," said Mrs. Vellaby, and went to lie down.

She did not reappear until the Misses Pincent arrived for their Thursday afternoon bridge. The Misses Pincent lived a few doors away and were referred to by Mrs. Vellaby as, "Those poor dears! It makes such a change for them to come here once a week." The Misses Pincent were similarly convinced that their visits were an errand of mercy, from which it will be seen that the arrangement was a source of mutual satisfaction.

"Oh, my dear," said the elder, whose name was Agnes, "such a to-do! Our nephew and niece have turned up and it was only to avoid disappointing you that we insisted on coming."

Mrs. Vellaby did not relish the phrase, which savored of patronage. She explained that she was feeling far from well and had seriously considered canceling the game. She added: "I only refrained for Carol's sake."

Carol said nothing, for the incident of the photograph was rankling. For the first time in a long while she felt out of sympathy with her little Mummie.

Maud Pincent came to the rescue:

"Well, as nobody wants to play, let's drop it. Conway has tickets for the first house at the Palladium and we would only have had time for a couple of rubbers."

Mrs. Vellaby was deeply offended. She had been counting on her bridge and did not know how people could be so selfish.

"As nobody consults my wishes," she said, "I shall go to bed and have a little whitefish on a tray."

Agnes Pincent touched Carol's arm.

"In that case why not join us? There's an extra ticket for a friend of Conway's who can't turn up."

"I don't expect she would care to leave me," Mrs. Vellaby interposed.

But Carol missed her cue and announced that she would be glad to come.

"Splendid. Then be around for a glass of sherry at six."

Mrs. Vellaby had an impression that the Misses Pincent wore an air of triumphant conspiracy as they took their leave. She did not reproach Carol for her unfilial acceptance of the invitation, but when, at five minutes to six, Carol came to kiss her goodnight, she subtly conveyed to the embrace the character of a final parting.

Carol did not seem to notice.

MAKING her own way into Miss Pincent's drawing room, Carol was greeted by the spectacle of a pair of long legs extruded beneath a newspaper. She wished the legs good evening and Conway Borden rustled into view, coming to his feet, clicking his heels and pulling an imaginary forelock.

"It's Carol Vellaby, isn't it?" he demanded, and grinned welcomingly.

He stood a bit over six feet, was broad-shouldered, had eyes of merry blue, and a face and hands tanned by the sun to the color of a walnut. After the pale tints which colored the life and person of her mother, so much physical health and well-being held Carol in silence.

"Here and now, I deny it," said he.

"Deny what?"

"Any touch of the tar brush. The oriental chromatic effects were produced by China Station and life on the ocean wave."

"Oh," said Carol, "then you're a sailor?"

"Yes, ma'am, Commander Conway Borden, R.N., at your and His Majesty's service. What's it going to be? Pink gin, or a pale and timid sherry?"

Carol said, "I'll leave myself in your hands."

He thought it a fair answer and addressed himself to the bottles. Over his shoulder he remarked: "Things look sticky, don't they?"

"What things?"

"Adolf."

"Then you think there'll be war?"

"I'm afraid it's a cinch." He gave her a glass and raised his own. "Well, bottoms up! And let's hope it doesn't apply to any craft I find myself aboard."

"I hope it doesn't," said she, and drank to that.

Then he said, "I met your broth in Calcutta, and what a nice guy! He old me about you."

"Did he?"

"Yep. 'Salt of the earth' was ho he described you. Alice-sit-by-the ire and Florence Nightingale rolled ate one. That's why I determined we sh ld meet, and bought an extra ticket o the off chance."

Carol eyed him warily.

"Miss Pincent said you had a f nd who couldn't turn up."

He grinned and shook his head.

"Strategy. Put that way it sou led less pointed. I approached my o es- tive from behind a smoke screen. I'm tremendously glad to find you in ra e

He was refilling their glasses as h his- ter, whose name was Pat, and who ha a three-cornered hat and a three or nered smile, came into the room and id "You guzzling beasts, where's mine

"Meet the Girl Pat," said Co ay and fixed her a drink.

DURING the antics of the Crazy an in the first house at the Palla m Conway displayed an unrivaled cap it for enjoyment. He shouted with l gh ter and so rolled about in his stall, nch was next to Carol's, as nearly to u ea her. His mirth was infectious, and re the Misses Pincent succumbed t The Girl Pat, moreover, proved a un- dle of fun, and when, at about the thirty, they trooped out in search of a taxi, declared that an evening so we and truly launched must not be al we to founder.

He proved to be a Captain Beaver of the Blues. His proposal was a late flicker and supper at Bimbo's

Conway seconded the motion and proposed "hot groceries at the Ritz." With thoughts of her mother, Carol demurred, but he cut her short:

"For once Alice will be forbidden to sit by the fire. Too soon the safety and welfare of this sovereign state will depend upon the navy, and the least she can do is to supply one glorious memory of a night ashore."

So Carol stopped demurring. The Misses Pincent returned home to some cold lamb and something which, if not eaten, would displeasure the staff, and Carol, Conway and the Girl Pat squeezed into a taxi.

As it turned into Regent Street, Conway announced that the Girl Pat would have to push off after dinner.

"She's taking a basket of new-laid eggs to our nurse, who's celebrating her hundredth birthday, no less."

THE Girl Pat gave him a shrewd and dirty look, but having a heart of gold, replied, "All right, all right. Perhaps I'll pick up something at the Ritz."

The words were prophetic for, as they passed through the bar en route to the grillroom, a man, drowning loneliness with a dry Martini, launched a yell of "Patacake!" and plunged toward them.

He proved to be a Captain Beaver of the Blues, known to his intimates as Plum. He joined them at dinner and discoursed on the international situation, Clumber spaniels, and what they would do next. His proposal was a late flicker and supper at Bimbo's, but Conway stood out for a spin in the country and scrambled eggs at a roadhouse. The rival proposals ended in Plum's lending Conway his car, and Conway's lending Plum a fiver, with the proviso that he brought Pat home no later than the milk.

CAROL took no part in the discussion but may be said to have basked on its fringes. She felt she had been asleep for a century and had waked up in a world humming and teeming with life. Caught in the slipstream of Conway's enthusiasm, she followed him to where Plum's car was parked and, together, they drove off in the direction of a better understanding.

By the pond on Hampstead Heath, he stopped the car and they looked south across the dark window-spangled bowl which is London. And presently he said: "Makes you think, doesn't it? This wide-open city of peace-loving people tucking in for the night."

"You mean of what might happen if . . ."

He nodded.

"You may argue that I am, by trade, a man of war, and that a few millions should perish to let me practice my calling is a minor consideration. But the truth is that I love this funny old country even more than I hate blood." She was looking at him strangely, and he added: "Sorry to go serious all of a sudden, but being with you gets me that way."

"Why being with me?"

"I don't exactly know. Perhaps because you sort of embody my idea of England. No, no, don't take cover, I mean it. You're resolute and calm and gentle to look at. You're like her too in that under an air of . . . what's the word? . . . tranquillity, you've a suggestion of tremendous forces lying in wait."

She said, "I don't suppose I'm like any of those things."

"But you are, Carol, if you'll forgive me for not using your Christian name before. Believe me you are."

She looked at him squarely. "Do you make a habit of talking like a palmist?"

"I make a habit of speaking my mind."

"Even when you know nothing of the person you're talking to?"

"How d'you mean, nothing? I can read, can't I?"

She thought it was such a nice reply.

IT WAS unusual for Mrs. Vellaby to apply for spiritual aid, but before going to sleep she breathed an urgent prayer that Carol was not enjoying herself. That it was unanswered was evident when, next morning, Carol, looking shamelessly happy, came in with her grapefruit on a tray. With forced cheerfulness, she expressed the hope that the evening had been pleasant.

"It was, very," Carol nodded.

"And what time did you get home?"

"About three. Commander Borden drove me to a place on the Great North Road where we danced and had a swim."

Under the bed covers Mrs. Vellaby gripped her lean thighs. "But, darling, wasn't that rather an extraordinary thing to have done?"

"I don't see why. Scores of other people were doing it. Besides, he turned out to be a friend of Robert's." And she blew her nose with an air of defiance.

In the week that followed, Carol and Conway had numerous accidental meetings, attributable to the fact that Conway had made an observation post of the bay window of his aunt's drawing room and pursued Carol whenever she emerged from the house. The development of their interest in each other was achieved in the provision department of Barker's, before a changing background of canned goods, groceries, sides of mutton and beef, in the Rembrandt style, guinea fowls and grouse, and pyramids of fruit and vegetables. As their intimacy advanced, he persuaded her to adventure to the comparative seclusion of the waiting room, where he asked her to be his wife.

"I've another month's leave which'll give us nice time to publish the banns, buy orange blossoms and have a week to ourselves for honeymooning. I've applied for a shore job at Gosport, which with you would be paradise and without you pretty awful. We could—what are you crying about?"

CAROL wasn't very sure herself, but happiness affects some people that way. Then he took her hand, which was comforting.

"Come on, let's have the answer before somebody mistakes us for the information bureau and asks the date of the Norman Conquest."

"You . . . you haven't much doubt about your own?" said she.

"Well, I know you like me."

"Like? How can you be so stupid? I adore you."

"Then everything's settled."

Carol shook her head.

"Mother isn't settled."

He had been afraid of that.

"Don't you believe it. She must want you to be happy."

"Of course, but who's to look after her?"

Conway was reminded of a remark of Robert's during one of their talks in Calcutta: "The old girl's fit as a flea, but as long as there's a chance of fastening on to one of us she'll never let go."

"How would it be to let me talk to her?" he suggested. "With the world in its present state, love like ours can't afford to waste time."

He called that afternoon while Carol was absent leaving flowers for a friend who had had the flu.

The chivalry of his bearing did not deceive Mrs. Vellaby as to the object of his visit. He lost no time in coming to the point.

"Carol's happiness is my greatest concern in life," she said, "and if I were sure it was to be found in marriage I would allow nothing to stand in her way. But, unfortunately, obstacles exist which I am powerless to remove."

"For instance?"

She hesitated. "Well . . . myself, for instance."

Chivalrously refraining from inviting her to jump in a lake, he begged her to be more specific.

"The child's devotion to me is far too great to allow her seriously to consider leaving me."

"I can well understand that," said he, "but there's a world of difference between falling in love and loving one's parents. The one inevitably means a readjustment of the other."

Mrs. Vellaby gave him a tolerant smile. "You can hardly believe, in the short time you have known Carol, that her love for you has become greater than for me."

"Of course, I do," he replied "Things

The King's Woman

By Archduke Franz Josef

ILLUSTRATED BY GEORGE DE ZAYAS

The brother-in-law of the former King Carol of Romania gives an intimate picture of palace intrigue: the rise and fall of Carol and of Magda Lupescu. It would, he says, make a play

WILLIAM SHAKESPEARE, Esq.,
Stratford-on-Avon,
Warwickshire, England.

Dear Will:

By now you've become quite an authority on kings, pretenders, and the rivalries and jealousies of courts, so I just wonder if you'd care to have a fling at a plot I have run into.

The theme seems to me to be worthy of your genius, and I wouldn't know how to wind it all up at the end of the fifth act, and, anyway, I couldn't write it even if I were able to—I am related to all the fellows in the play, and it just wouldn't seem right if I did. My brother is married to the hero's sister, and it's the same blood that rushes through my veins as through theirs—the same mixture of Hapsburg, Lothringen, Stuart, Bourbon, Coburg blood, even if mixed in different proportions. . . . So you see I wouldn't be the right man to write it.

I'll just give you the characters and sketch in some of the background.

THE SCENE is a country on the outskirts of Europe—oil fields, wheat, Black Sea ports and all. A backward country, yet not as backward as you might think, called ROMANIA.

As to the characters, there is a king to start with—

FERDINAND by name. Yes, the same as the bull—a king who sports a goatee, who stutters a bit, and isn't any too bright. You probably won't have to put him into the play at all, for he is really of little consequence, and it might be just as well to let him be dead already when you have the curtain rise on the first act.

There are also:

MARIA, the queen, and she will have to go into the play, for she starts all the mess, unintentionally maybe, and is such a fascinating, clever and beautiful lady—a queen right after your own heart, beguiling, dominating, full of ambition, terribly loved and terribly hated. It is she who really runs the country—she and a

PRINCE STIRBEY, a lover of repute, and a couple of

BRATIANU BROTHERS, who have turned the country into a family concern and run it on an extremely profitable basis.

And then there is:

CAROL, Maria's son, headstrong and ambitious as she, a ruthless fellow with a will of his own, stubborn, unbalanced and self-centered, yet very capable, a chap who ought to have done miraculously well in the days of your Virgin Queen. He is rather out of place in our prosaic century. Having married and divorced a commoner, just to spite his parents, he has eventually gotten hitched to a Greek princess—

HELEN, who presents him with a son.

MIHAI by name.

Somewhere in the first act, Carol bumps into a woman called

LUPESCU, and falls in love with her madly, the way great lovers do.

You will have to mention that Carol gets so steamed up about the girl that he renounces his succession to the throne for her, deserts his Greek princess and the boy and goes to live in self-imposed exile.

A year after he's gone and done it, Ferdinand his father, the goateed king, dies, and Carol would have been his successor had he not, meanwhile, given up his claim to the gilded chair.

As it is, it is Mihai, his boy, who becomes king at the age of six.

As they assume that a six-year-old can't make a king, they set up a regency to rule in his name, but it does so in name only, for in fact the country goes on being ruled by Maria, Stirbey and the Bratianus, exactly as before.

Only the puppets have been changed—instead of the man with the goatee, they now have a flabby, pampered little boy at the end of their strings. Enter:

THE PEOPLE. They, for some reason, resent being sucked dry by the Bratianus, and object to Maria and Stirbey regarding their country as a lovers' playground.

It's a tricky business to introduce "the people" in a play, but then, you've done it before in Rome—as you're sure to remember, and you might have Romania's countrymen worked into it here by using a fellow to represent them on the stage—a fellow by the name of

MANIU, a peasant leader, and one of those men so rarely found anywhere, and practically never in Romania: an honest, unselfish, straightforward politician.

The restlessness and dissatisfaction of the people carry Maniu to the top, and he crashes into Romania's prime ministership and starts in reforming the country from the top down, but that's as far as he gets, for the top simply r fuses to be reformed.

Maria hangs onto Stirbey, and t Bratianus hang onto the fleshpots.

And it is then that Maniu remembe that somewhere on the playgrounds Switzerland and the French Rivie there romps that self-exiled king w has renounced the succession to t throne for the possession of the wom he loves.

MANIU conceives the plan of bringi him back and making of him t broom with which to sweep the pig clean. Everything might yet he r right if only Carol can be made to set down with Helen and be a respectal bourgeois king.

But Maniu doesn't know that Ca has gotten married to Magda Lupescu married at a registry in your own, yc dearly beloved London. No one kno it at that time except the registrar couple of witnesses, and the cou themselves. Not even Maria, the que

Maniu knows nothing of the power love. He believes Carol to be a man the world, and men of the world dc love, they have infatuations. Of th they can be cured.

So Maniu's envoys get busy and Ca whisked back to Bucharest by airpla is given a thundering welcome by army and the people.

But at this point Maniu makes a gr mistake. To get Carol back he has fan the people's enthusiasm, and afraid he overdoes it a bit, for wl Carol arrives he is hailed as the co try's savior, and all Romanians, g and true, go mad with joy, and it imr diately becomes impossible to s Carol back or to control him.

Last Race

By Harry Sylvester

ILLUSTRATED BY RONALD McLEOD

The story of a great runner whose toughest foe was his own colorful imagination

In the mist gathering at the edges of his sight he could see only the thin, white tape

HE great Louis Cobett would run alone this fine spring day. Jiggs Hanrahan, who coached them, wanted him to go a hard three quarters alone; all other activity on the quarter-mile track ;ed. The sprinters stopped taking starts; the mid- and long-distance men stopped their warm-up ging; and the javelin throwers in the infield ped and stood watching, the light spears in their ds.

John Morgan, watching now with the others, could k of the word "great" applied to Cobett almost rely without irony. John Morgan had run too long self, known the pain and bitterness of this game well, not to know a great runner when he saw . What there was of irony in his own attitude nmed almost entirely from the curious fact that for Cobett's having his existence so very close at d, John Morgan himself might have been called at.

With a few of the other runners, John Morgan t into the empty wooden stands and sat on the wooden seats. The early June sun had warmed wood and the heat felt good through the heavy l of his sweat suit.

Cobett would run a hard three quarters; the first e quarters of a hard mile. John watched Jiggs rahan give Cobett a start, watched for a moment cocked hand in which Hanrahan held the stop ch; then let his eyes, as though regretfully, return where Louis Cobett's slender, rhythmically strid- form was leaning into the first turn.

Cobett ran freely, seemingly without effort, like animal. He swept around three laps of the track, ed up the pace slightly coming into the last stretch, did not sprint and finished in perfect form.

"Very nice," John Morgan said to himself. "About 5."

He went out on the track. Hanrahan still stood, king at the watch. He had a way of doing this after ood performance, as though the position of the ds on the stop watch was a symbol, had even crys- ized the fine running he had just seen.

John Morgan came to the start and took the top is jumper off. "3:06?" he asked.

"3:07.1," Hanrahan said, without looking at John. rahan kept looking at the watch.

"What do you want us to do?" John said.

Hanrahan looked up, almost with a start. His eyes l the look of distance in them. He had run a long e ago, in the days when there were professional ners, and the deeply seamed face still testified to But the eyes were good eyes. They seemed to nge focus, finally to recognize the other runners ting near by.

To himself, John Morgan chanted cynically:

"I wish I were a bigshot
To with the bigshots stand;
A row of medals on my chest,
My clippings in my hand."

It was pretty foolish, he decided one more time, l made himself stop thinking of the rhyme. Jiggs nrahan stopped scratching his gray head as though were an effort to have to think about these other ners. "Take them out for a good mile and a quar- " he said, talking to John but not looking at him. n about a 4:30 mile and then finish steadily the t quarter. Nobody pushing themselves but every- getting a good workout."

WITH the others John Morgan alternated in set- ting the pace and was doing so when they swung o the fifth, last lap. Something like anger, almost realized, came up in him and unconsciously he be- to pile on the pace. When he finished he didn't w he was fifty yards ahead of the others.

"I didn't want you to go that fast," Jiggs Hanrahan d, almost absently. His eyes avoided John Mor- 's and John wondered why. He didn't ask Jiggs at the time had been. If Jiggs didn't want to tell, t was all right. Sometimes Jiggs didn't tell them time, and, running being the ascetic thing it was, ne of them minded this added small discipline.

Walking slowly back to the field house, the sweat ring out of him under the heavy wool jumper he d resumed, John thought that here he was twenty- ee and about to be graduated from a university. —any of them—should not be this intense about ame. Intensity resided more peculiarly in this ne than in any other, he suddenly realized, and ndered why he had never thought of this before, d never read it in their own lean faces, in the taut- tched skin of their bodies, in the mouths drawn ight and the hollowed eyes.

You gave up a lot of things for it, too, he thought. t this year he had gone with a girl, Jane Murfree. He had been cynical about it at first, perhaps because he distrusted his own judgment after the long abstinence. But she had been nice to kiss and somehow he had become less cynical.

Louis Cobett was in the showers when John Morgan went into the long, tiled shower room, but neither of them spoke. There was no readily apparent enmity between them; it was just that after four years of competing against each other as well as other men, they were not friendly.

John stood under a shower a moment, then went over to the barrel of salt that stood in one corner of the room, and rubbed handfuls of the rough salt over his legs and torso. It stung more than usual. He realized now what he had suspected from his dropping weight, from the growing tenseness in him—that he was approaching a fine edge of physical condition. His skin was dry, lacking in oil, that was why the salt stung so. After years of running, if you were even a little smart, you got to know the physical subtleties of your own body.

So that, John thought, made Jiggs a good coach. The Nationals were this week in Chicago and Jiggs had them at the peak and ready, with their hardly knowing it. The warm shower washed the salt away and the stinging went with it. He let the cold water play along his spine. It made him feel fresh again and he thought he might see Jane tonight. Tuesday night—it was about the last night he could see her, with the meet Saturday.

HE COULDN'T make up his mind about it while he dressed, and his thoughts slipped away and he wondered one more time why he had never been able to beat Louis Cobett. Some said it was psychological but neither John himself nor Jiggs, when he had asked him one day, thought so.

"Some horses run faster than others," Jiggs said. "That's the way God made them. You should have gone to another school maybe. You wouldn't have felt so bad anyhow, even if he might have whipped you just as much in meets. Sometime you might beat him, though. Sometimes a man can find it in himself to beat a better man." And Jiggs had walked away that time, the lined face worried, the eyes wrinkling as they stared into the sun.

Jiggs was a good man, John thought; he was grateful suddenly that Jiggs had helped to make him even as good as he was. John thought one more time that both he and Cobett would have their hands full in the Nationals. California had a good distance man for a change, Eddie Leto, a Finn. And there was Wishy Gordon, from the East, who had run third to them last year.

The feeling of well-being that the salt rub, the hot and cold shower, had brought to him did not last long. The irritation that rose slowly in him he knew was probably caused by the fine edge of his condition. But the nameless anger that had come to him during the workout was still in him, too, and he tried to find the reason for it.

HIS date that evening had the shadow of the race over it as, it now seemed to him in a continuation of the long retrospection he had begun today, his whole recent life had had the shadow of other races over it. Somehow, it had become easy to picture things accurately and vividly tonight. He had only to close his eyes to see bright-shirted runners rounding a turn. He could hear the sound of their feet slogging on a cinder track; one of them was even himself.

"You're rather preoccupied tonight," Jane was saying.

He turned to her. She had shoulder-length, ash-blond hair. The eyes were long and light colored; the mouth full; the skin smooth and fresh. Last week he had kissed her passionately and next week he would again, but now something that was like weariness but was not that had made him almost passive. It was as though everything vital in him had gone, for a time, into a reserve that was going to be used in one sustained and bitter outpouring in a race.

"Year's end," John said. "School year's end. End of a lot of things." His voice almost trailed off.

"It couldn't be that you were going moody or temperamental on me?" she said.

"Hanrahan has all of us at a peak," he said. It explained almost everything to himself; it should explain it to others. . . .

"Saint Hanrahan," she said. "He'd make monks out of all of you so that more plaques can hang in the trophy case."

John thought that he laughed pleasantly at this, but he only smiled. . . . He reached for her and she came to him, all but willingly, and it was good to be kissing that soft mouth again.

"I suppose," Jane said, *(Continued on page 36)*

The Fabulous Rubio

By Daniel Fuchs

The arresting dilemma of an amateur magician who was unable to deceive anybody but himself

ILLUSTRATED BY WALTER BAUMHOFER

I HADN'T wanted to come along with Rubio but now I was sitting in a corner of J. J. Abner's theatrical office in Radio City and I kept on swallowing miserably and waited for the broker to laugh out loud and throw the two of us out of his place.

"They don't want magicians, sonny," Abner said. He had a round face with a suspicious expression on it, but maybe that was because of Rubio's majestic manner, the cane in his hands and the black cape he wore. "That hoke with the chains and locks and barred doors—you can't hold them with it nowadays because everybody knows it's fake—"

"It's not fake," Rubio said. He said it with simple, aristocratic dignity and I winced.

"What?" Abner said, not understanding but going right ahead. "It's fake, why argue? Listen, sonny, why don't you work up a smooth, smart patter at least? Why don't you kid your act along? See, that's charm. These days, in this lousy racket, that's what you got to give them—charm!"

"I take my art seriously," Rubio said stiffly. "I take myself seriously."

"What?" Abner said again. This time he had to pause. "Listen, the trouble with you is you walk around too much with that black cape and the cane. No wonder you get a screwy outlook on life. You must think you're Bela Lugosi or something."

"Were this Budapest," Rubio said, "were this any Continental city, I should send my seconds and meet you on the field of honor. As it is, I am obliged to overlook your insults."

ABNER'S mouth opened and hung loose, as though somebody had hit him. He turned to me. "Is he kidding?" he said. "Does he talk like that normal?"

I looked down at the carpet. I didn't answer.

During the pause Rubio c with the flat statement that he to be booked into the open date vention Hall in Atlantic City.

"Go away, you're crazy!" yelled. "Leave me alone. I'm guy!"

Rubio talked fast but he nev instant lost his air of imp Actually, he said, he was doi a favor. The troupe originall for the spot had run out at minute and the broker would yank one of his other combina of some night club or hotel. Ru on to the list of his triumph

He had torn away from her and dodged past the cop. "Wait!" Mary wept. "This is no stage lock. It's a real door, not a prop. You're not a magician!"

wasn't well known in America, but *penhagen,* he said and his eyes hed. Stockholm, London, Melbourne, lney! My head shot up and I stared him as I heard the lies. He went on on.

UBIO, the bull thrower. Rubio, the baloney artist. We called him those nes ever since he first hit our block e or four years ago, a strange skinny mp who had come to live with his t and uncle. At school he used to us he was an international spy. He d to say he always carried two sticks dynamite on him so that he could blow himself up at the right time. He said anything. Once he wound a turban around his head and went up Fifth Avenue, smiling innocently and having a great time as he tried to make people believe he might be the son of some Indian raja.

His own folks had been small-time vaudeville actors, and I suppose he had picked up his fancy ideas in those years he trouped with them before they died. That was also how he must have picked up the bag of escape tricks he knew. His aunt had a back yard, and pretty soon he made Mary Byron and me help him practice his act there. He told us we'd be famous, have fortunes and travel all over the world, and we believed him then more than we didn't.

He spent every cent he or I had on specially made handcuffs, locks and chains. He even saved up enough to buy three collapsible chromium cages, but all the work we could ever get amounted to a dingy odd job at ten or five dollars at some neighborhood movie house or broken-down night club. He kept us going on wild promises until Mary Byron suddenly decided she had had enough. That very morning she told him it was all crazy. She said she had waked up at last. She was through with his homemade act, with magic, the stage and all his other high-blown nonsense. She called him a show-off, a kid who had never grown up, and she wondered how she had ever listened to his stories in the first place.

THAT was why we were here now to see Abner. The Atlantic City date was a hopeless, impossible chance for us, but Rubio faced the broker with complete confidence. Even as he kept on talking and arguing, he looked downright noble, cold and masterful. You had to hand it to him. No matter what you wanted to say about Rubio, he had something inside of him and you had to respect it.

And Abner was weakening under that bombardment, I could tell. He was thinking of Orson Welles, I suppose. These boy geniuses, he was probably thinking—when you first saw them, you always thought they were just some screwy kids with a lot of wild energy in them, and then you found out you had lost a rich property, that some other agent was reaping fortunes that belonged to you by right.

"You don't fit in here at all," he said, his voice all hollow as he tried to make up his mind. "I need a big show out there—not a single magician's act. This is a national convention. Five thousand guys are going to be there. They want music, singers, comedians, girls. This is a big job."

"That is exactly the point," Rubio said. He didn't flinch. "I am building a new troupe—something like my company abroad before the war broke out and my people were all called back to their native countries. Do you think," he said and sneered, "do you think I should be normally obliged to stand here before you?"

I was coughing in a fit, but Rubio went on to describe the acts he had—dancers, a band, novelties, all artists of the highest distinction. Abner wouldn't listen any longer. He stood up at his desk.

"All right!" he said. "I'll come out and look you over but it's strictly on speculation. You deliver your geniuses at Convention Hall tomorrow night. If a miracle happens and you're okay, you can go on Thursday night—but I doubt it."

Downstairs Rubio walked out of the elevator, his cape billowing behind him.

"This is nuts," I said. "This whole crazy thing—"

"We're good. The act's good. I'll click with a bang, won't I? All I need is a chance."

"Yes, maybe, sure, but—"

He didn't listen to me. He didn't mind the people in the lobby who stopped and stared at him and laughed. He was all wrapped up in himself. Rubio had a dark-putty face with a wide mouth and deep, intense eyes just like a French poodle's. Even though he was near twenty, he weighed just about a hundred and twenty pounds and was five feet five, but when he felt like it he could be three hundred pounds in weight and seven feet tall. When he felt like it he could float off the ground and this was one of those times.

"How are you going to deliver a whole troupe in Atlantic City by tomorrow night?" I asked, going after him down in the arcade. "What was the good of lying? You can't deliver. You know that."

As we came to the telegraph office, he dug out copies of Variety and Billboard from under his cape and rapidly ran through the pages. In Philadelphia an orchestra called George Vaughn's Trumpeteers (10) was at liberty. In Passaic, Rubio found a dance team billed as Waterloo & Dobbs. Francine Dove, a singer, was waiting in New Haven. The Delmar Steppers (8) in Bridgeport needed a job, and in Hartford the Frasetto Brothers (3), a comedy-dance act, were available and ready.

"There's the show," Rubio said, and reached for the pad of blanks.

I just looked at him. "You actually going to send wires to them?" I said. "Nobody in his right mind is going to come down to Atlantic City just for a tryout for a three-day job."

"It doesn't have to be a try-out," Rubio said quietly. "It doesn't have to be a three-day job."

With my own eyes, as if in a trance, I saw what Rubio was printing on the forms: he was guaranteeing each act eighteen weeks' solid booking and wanted an immediate wire in reply addressed to him at the Hotel Martinack in Atlantic City.

"Hey, Rubio!" I said. "You'll go to jail for this! You'll go to the hospital. What's going to happen when all those people find out the whole thing's a dreamed-up fake from start to finish?"

He ignored me. He paid for the telegrams and then started out again. "Now we pick up Mary, pack and get going." he said.

You couldn't reason with him. "Mary isn't coming with the act," I said, half shouting at him. "She quit. She told you this morning."

"She didn't mean it. She just lost her temper. Everything'll be all right again when she finds out we've got the job."

"The job?" At first I didn't even know what he meant. "Rubio," I wailed out loud, "what job?"

WE WENT to the West Side rooming house Mary lived in but when we got there the landlady told us Mary wouldn't be home until late at night.

"She finally got some sense into her head," the woman told Rubio. She had always disapproved of him. "Mary found a job, a real job, in a beauty shop. Magic," she said. "Acting on a stage. You and your fluky talk." She closed the door on us.

"See, Mary really meant it," I said quickly. "Without her you can't put the act on. All right. The whole crazy idea is finished."

"No," he said. If he was in any way stumped, he certainly didn't show it. "She'll be in Atlantic City tomorrow. She'll come."

I began arguing again but twenty minutes later we were on the bus bound for Atlantic City and with us we had the two chests full of locks and chains and the collapsible cages.

The Hotel Martinack turned out to be a pretty, five-story wooden building, some blocks off the boardwalk. It was run by a worried-looking little man named Frisbee who began to fret the minute he saw Rubio and his cape.

"No offense intended," the hotel man said. "But in this business you have to deal with all sorts of people. They come and go and once they're gone, they're gone, you see." He wanted payment in advance, he was telling us.

Rubio drew himself up to his full height. He took a card out of his pocket and threw it on the desk top. "I am outraged," he said. "I have never been

treated like this before in my life."

Blinking his eyes, Frisbee read the name on the card and promptly started apologizing. He reached behind him and brought out the five return wires. "For you, Mr. Rubio," he said. "Naturally I didn't know who you were. I didn't realize. Now, please, no offense. We must be careful. The convention and all. . . ." He was expecting trouble. The prospect of the next few days had him all upset. Rubio took the telegrams out of his hand, snapped out that he'd be needing fourteen rooms for his company the next day and turned to go up.

"The boxes," the hotel man called after him. He meant the stage properties. "You don't have to bother with them. Let me keep them down in the storeroom for you."

He insisted and Rubio was anxious to read those wires. We went up to the two-room suite Frisbee had given us and, once inside, Rubio let out a whoop as he saw that each of the acts had accepted and would be down in time.

"We're all set," he said. "Abner's managing us. I've got a company of twenty-seven and I'm booked solid for eighteen weeks!"

"What?" I said. "Oh, gee whiz. Oh, gee whiz." I said it over and over again. That was the way he was. First he made it all up out of his own imagination, then he believed it himself!

THE acts started coming in the next afternoon but Mary Byron didn't appear. Rubio had me check the performers into their rooms and then take them down to Convention Hall to wait for him and get ready for the rehearsal. We were sitting on a barrel of dynamite. That was how I felt and any minute I expected it to explode on us, but Rubio wouldn't leave his room as he waited for Mary. I had to keep making trips between the hotel and the auditorium, and as I ran, a kind of panic began to grow in me.

"Look," I said to Rubio when it was past four o'clock. "We got fourteen rooms to pay for. The actors are waiting. Abner's coming down tonight to see the tryout, and without Mary you can't even put the act on!"

"She'll come," Rubio said.

"When? How? She—"

I had to stop. The door had opened and I saw Mary herself standing there. She took one look at Rubio and then her face went suddenly tired and hopeless.

"I should have known it was just another crazy lie," she said. "I should have known you weren't sick and that no doctor had sent you to an Atlantic City sanitarium. All day I told myself it was a lie but it worried me and worried me until I had to come, like a fool. . . ." She turned on me. "Why did you send that telegram? Why did you tell me to meet you here? If it hadn't been you, I'd have never believed it at all."

"Me?" I said. "I sent you a—"

I stopped but it was too late. She sat down in a chair and held her head in her hand as she realized Rubio had faked the wire.

"You're making me lose my job," she said to him, almost crying. "It's not just a harmless story."

"You don't need a job," Rubio said. "We're opening tomorrow night. We're all set."

"Lies," she said. She didn't even look at him. "Dumb, ridiculous lies. Do you think I'll always believe them? I'm going right back to New York."

He rose slowly. He moved around the room like a broken man and stopped to rest a moment on every chair he passed.

"So I am a liar," he said, "a dreamer, a fellow who can't tell the truth, whose whole life is full of fake and fraud. All right, Mary. Go back to New York. Leave me."

"Oh, go ahead and be tragic," she said. "Put on an act all over the place. It won't work."

He bit his lip and started all over again: "I've trained you for months. I've worked day and night until our act's the best in its class, and now," he said, "now, when everything lies stretched out at last before us, you decide to leave. Mary, J. J. Abner's booked us solid for six months!"

"You're booked for six months?" she said, not believing a word of it. "J. J. Abner's managing you . . ."

"I don't tell lies all the time," he said. "Abner called me in yesterday. He needs me. He sent me out to head the bill he's opening here. Listen to reason, Mary. That's the only thing that brings me out here. What else could there be?"

He went close to her and held her face up to him, and right then I knew she'd stay. I knew it and Rubio knew it, and I think Mary knew it herself even while she held out against him. She'd stay along at least once more. She liked him too much, and I was too relieved to wait until he finished persuading her. I still had to call a cab and get the two boxes of props down to the hall for the run-through performance that night. I went down to see Frisbee about the keys to the storeroom but two minutes later I was back.

Sooner or later I knew the whole lunatic thing would blow up and now it had happened. I opened the door and yelled, "Hey, Rubio!" but he stopped me fast.

"Tell Abner to wait," he barked out to me. "I'll see him when I'm ready."

"It's not Abner—"

"Well, if he can wait, the others certainly can, can't they? Let them go ahead without me."

"It's not them. It's not that—"

He grabbed me to make me shut up and then turned to Mary. "You see," he pleaded. "I'm holding them all up. I'm late . . ." He waited.

"All right," she said finally. "I'm crazy. I'll stay but you're not fooling me. If they held a gun to your head, Rubio, you know you couldn't tell a straight story."

He pushed me outside and then I told him: "Frisbee wasn't doing you any favor when he stored the boxes of junk in the cellar for you. He's holding them for security. He won't give me the keys unless you pay something in advance."

Rubio rushed down to the hotel man and for the next half-hour I watched him talk. He threatened, argued and begged, but the trouble was Frisbee wasn't Mary, and besides it was hard to talk with Henriette growling away at him. That dog cramped Rubio's style, and finally he had to give it up.

"Well, what about J. J. Abner?" I said. "He's coming tonight."

"I'll hold him off," Rubio said, and went into the telephone booth.

HE CALLED the broker long distance and started protesting indignantly that the lighting equipment at the hall had broken down. The stage wouldn't be available until the next morning and it was an outrage. He was impatient. All his artists were impatient.

"Hah!" Abner chortled over the phone. "You're not fooling me! Your little scheme won't work!" I could hear his cracked voice distinctly from where I stood: "Stall. Take your time. You won't rush me into taking on your bunch just because it's the last minute or anything. I got a combination in Philadelphia I can switch into the hall at three hours' notice." He chuckled away and said he was perfectly willing to postpone the tryout until eleven o'clock the next morning. He was coming down on the ten-thirty train. Rubio hung up.

We still had the actors to handle and as soon as we reached the hall I saw there'd be trouble. Everyone was muttering and getting blacker and more suspicious by the minute.

"Listen," I told Rubio. "They don't know you. You stay out of this."

"No," he said.

"Let me talk to them. They look terrible. They'll kill you."

"No," he said, but I pushed him back and went into the thick of them. I told them the run-through performance was postponed, but they were all on top of me before I got the words out of my mouth. They started asking questions and they wanted answers. One of them, a bruiser with a beard on him an inch thick, picked me off the floor with one hand on my collar and started ba
me around with the other.

I didn't know how it was going t
until suddenly I found the floor u
my feet again. Rubio had come

"He's fifteen minutes fast!" FRITZ WILKINSON

Shortly After Dusk

By Frank Condon

A SHORT SHORT STORY COMPLETE ON THIS PAGE

HARDIE GRAMATKY

YOU might as well be out in the street when dusk came upon the city. It was as safe as indoors, so Mr. and Mrs. Shipton were walking. He was a little, plump, fussy man and wore a cap. He came up to his wife's shoulder, and they sauntered, their manner showing neither alarm, excitement nor any great interest.

"I don't hear any planes," she remarked. "Time for them, if they're coming."

"Don't worry. They're coming," he grunted. "Ain't dusk yet. You wait till seven o'clock and you'll have your big parade."

They came to the fringe of a street crowd and paused to look about. The street lights were off and the crowd had a shadowy look. It was coming toward seven and the Shiptons knew what that meant, having been through it often. Dusk and seven arrived together and soon the planes would be overhead.

"You know," said Shipton, as though nothing were going on or about to go on, "I sort of fixed in my mind to have a bit of beefsteak for breakfast. Beefsteak and toast, with some jam and tea. Tired of eggs."

"Well, you won't," she replied. "You'll have your eggs as usual."

They were in the crowd now, part of it, slowly pushing through, glancing at the faces, some eager, some stolid, some excited, and taking care not to slide off the curb in the dim light. Sometimes the people stood perfectly still and then the police moved in and chivvied them along.

The greater number paused in front of a rambling building that might have been a storehouse, with great doors mounted to slide back and forth, but the building was inky dark, with never a sign of life. It was a story and a half in height and seemed to glower down at the populace. Mrs. Shipton glanced upward and said:

"They're sort of beautiful, ain't they?"

She referred to the searchlights, which were already roving back and forth across a murky sky, sweeping long pencils of light and sometimes pausing overhead. There were twenty or thirty of the huge lamps, operated by men long familiar with the job. These men worked languidly, like men waiting for their task to begin.

"There they come," Shipton said casually. "I told you. Seven o'clock."

SURE enough, they could now hear the distant growling of planes, flying far to the north, the murmur fading out while they listened.

"I hear machine guns," Mrs. Shipton said.

"You do not. They're building a plane factory over yonder, three shifts. What you hear is riveters."

Next time, the planes were nearer and the rumblings louder, but again they faded into silence, as though the hour had not yet struck. It was almost seven and the police renewed their efforts to hustle the citizens along, but they preferred to idle on the broad sidewalk before the building with the great dark doors.

"You know," said Shipton, "it's sort of silly for us to be jammed in here. They step on your feet. We ought to move down the road."

"I think it's interesting. Some of these people look pretty excited. See that man. He'll fall off the curb in a minute."

The man, who had his neck strained and his head tipped back at a painful angle, was examining the sky. A policeman nudged him before he could get a crick and he moved silently away. A little boy began yelling and was hushed.

"Seven o'clock," said Shipton. "On the second. They're going to be late."

Presently the sky was filled with planes, some of them enormous bombers with four motors, others smaller and faster, and the men at the searchlights moved into more vigorous action. The searchlights danced briskly now. As the noise overhead increased in volume, the citizens seemed to feel a quickening of interest.

They paid no attention to the police, but stood still and gawked. Not a single bomb had as yet fallen.

There was no noise of explosion, either at a distance or near at hand. All about the crowd lay a great, expectant silence, but the uproar overhead was deafening.

The queer part was that nobody sought shelter or seemed afraid.

"Let's go down farther," Shipton said. "We can see better."

"I can count twenty of them," she said. "Which are the bombers?"

"Dunno. They got a good night for it. Clear as a bell."

SOME of the younger ones were laughing and pointing excitedly to the planes, which were flying unusually low, and then all of a sudden, with a clangor that turned the crowd about, an enormous gong began to bang away and at the same time a bellowing whistle roared, increasing its power until it hurt the eardrums of the standing people. The police shouted vague commands. Citizens shoved one another aside and pushed forward, moving steadily toward the dark building with the high doors. You could hear men running about inside the structure, shouting at one another. Locks were noisily removed from the doors and they rolled slowly back in oiled grooves. The men pushing them seemed to be foreigners, and dark in their features, like Japanese.

Then the interior of the building was revealed, for ten thousand electric lamps lighted up, blinding the onlookers. They were all colors—red, green, blue, purple, orange, white and pink. The crowd began to cheer. On the roof of the structure, a neon sign lighted suddenly, a sign one hundred feet long, a hundred feet high. It was, indeed, a colorful and dramatic spectacle, and while the buzzing planes swooped lower than ever and blimps lighted up signs on their sides, the crowd yelled happily and rushed the great doors, carrying money in their hands, for it was just seven o'clock, hour appointed for the official and formal opening of the very newest food and meat bazaar, the Associated Farmers' & Butchers' No. 2 Store on Fairfax Avenue in Hollywood, California.

The smiling throng circulated, betraying curiosity, buying apples, celery, carrots, avocados, lemons, oranges, spinach, beets, veal cutlets, pork sausages, grapefruit, lettuce, hamburg, green onions, figs and all the lovely gifts of a gracious Nature.

"By George," said Shipton to his wife, "I'll just dash in and get beefsteak for breakfast."

"And I'll buy a Hubbard squash from Maine," said his wife and they hurried inside.

In the sky, the planes zoomed about aimlessly and at eight o'clock, they all went home, leaving the night to the searchlight men. The proprietors stood in the doorway, smiling at one another, for this was really a much larger crowd than at their No. 1 opening.

Evil Under the Sun

By Agatha Christie

ILLUSTRATED BY MARIO COOPER

The Story Thus Far:

IN NEED of a rest, Hercule Poirot, noted Belgian detective goes to the Jolly Roger, a quiet old hotel on an English south-coast island. He finds the hotel well-managed; he likes the beach, to which one must climb from the old building; and he finds his fellow guests charming. But, observing those around him, he soon learns that all is not well at the Jolly Roger.

Among the guests whom the little Belgian meets are: Miss Emily Brewster, an amiable old maid; the Reverend Stephen Lane; two Americans—Mrs. Odell Gardener and her husband; Major Barry, a well-intentioned bore; Arlena Marshall; her husband, Kenneth ("Ken"); and Ken's daughter by a former marriage, Linda; Patrick ("Pat") Redfern and his wife, Christine; Rosamund Darnley, a well-known London dressmaker; and Horace Blatt, an inveterate gossip.

Watching them, chatting with them, Poirot gathers that Arlena Marshall and Pat Redfern are having a none-too-secret "affair"; and that the other guests—notably Ken Marshall and Christine Redfern—disapprove strongly of the way they are meeting, slipping off together, at every opportunity.

Not far from the hotel—and, according to legend, connected with it by secret passages—is a cavern. Known as "Pixy's Cave," it is supposed—again according to legend—to be guarded by pixies, "moor spirits." Few know where its entrance is to be found. . . .

One warm August morning, Christine Redfern, accompanied by Linda Marshall, goes to near-by Gull Cove, where Christine plans to do some sketching. . . . Wanting to be alone, Arlena Marshall paddles away from the beach on a small "float." Some time later, Pat Redfern and Miss Brewster, out for a jaunt in a rowboat, reach Pixy Cove. Seeing a woman lying on the beach, and feeling sure that she is Arlena, they row in to her. She does not move when Pat approaches her, kneels down beside her. *She is dead!*

Leaving Pat with the body, Miss Brewster rows back to the hotel. And soon Inspector Colgate, a physician, a police surgeon, Chief Constable—Colonel Weston, and Poirot arrive on the scene, examine the corpse. The verdict is: *Strangled to death by someone with powerful hands!* . . . Poirot tells Weston all that he knows about Arlena and Redfern. "But Marshall," the constable says, "did he know about it? What did he feel?" Poirot says: "He is a man who does not display his emotions." Weston hesitates. Then: "But he might have 'em, all the same." The detective nods. "Oh, yes," he replies, slowly, "he might have them."

IV

THE chief constable was being as tactful as it was in his nature to be with Mrs. Castle.

Mrs. Castle was the owner and proprietress of the Jolly Roger Hotel. She was a woman of forty-odd with a large bust, rather violent henna-red hair, and an almost offensively refined manner of speech. She was saying:

"That such a thing should happen in my hotel! Ay am sure it has always been the quayettest place imaginable! The people who come here are such naice people. No *rowdiness*—if you know what ay mean. Not like the big hotels in St. Loo."

"Quite so, Mrs. Castle," said Colonel Weston. "But accidents happen in the best-regulated—er households."

"Ay'm sure Inspector Colgate will bear me out," said Mrs. Castle, sending an appealing glance toward the inspector who was sitting looking very official. "As to the laycensing laws, ay am *most* particular. There has never been *any* irregularity!"

"Quite, quite," said Weston. "We're not blaming you in any way, Mrs. Castle."

"But it does so reflect upon my establishment," said Mrs. Castle, her large bust heaving. "When ay think of the noisy, gaping crowds. Of course, no one but hotel guests are allowed upon the island—but all the same they will no doubt come and *point* from the shore."

She shuddered.

Inspector Colgate saw his chance to turn the conversation to good account. He said:

"In regard to that point you've just raised—access to the island—how do you keep people off?"

"Ay am *most* particular about it."

"Yes, but what measures do you take? *What* keeps 'em off? Holiday crowds in summertime swarm everywhere like flies."

Mrs. Castle shuddered slightly again. "That is the fault of the charabancs. Ay have seen eighteen at one time parked by the quay at Leathercombe Bay."

"Just so. How do you stop them coming here?"

"There are notices. And then, of course, at high tide, we are cut off."

"Yes, but at low tide?"

MRS. CASTLE explained. At the island end of the causeway there was a gate. This said: Jolly Roger Hotel. Private. No entry except to Hotel. The rocks rose sheer out of the sea on either side there and could not be climbed.

"Anyone could take a boat, though, I suppose, and row around and land on one of the coves? You couldn't stop them doing that. There's a right of access to the foreshore. You can't stop people being on the beach between low and high watermark."

But this, it seemed, very seldom happened. Boats could be obtained at Leathercombe Bay harbor but from there it was a long row to the island and there was also a strong current just outside Leathercombe Bay harbor.

There were notices, too, on both Gull Cove and Pixy Cove by the ladder. She added that George or William was always on the lookout at the bathing beach proper which was the nearest to the mainland.

"Who are George and William?"

"George attends to the bathing beach. He sees to the costumes and the floats. William is the gardener. He keeps the paths and marks the tennis courts and all that."

Colonel Weston said impatiently, "Well, that seems clear enough. That's not to say that nobody could have come from outside, but anyone who did so took a risk—the risk of being noticed. We'll have a word with George and William presently."

Mrs. Castle said, "Ay do not care for trippers. A very noisy crowd and they frequently leave orange peels and cigarette boxes on the causeway and down by the rocks, but all the same ay never thought one of them would turn out to be a murderer. Oh, dear! It really is too terrible for words. A lady like Mrs. Marshall murdered and what's so horrible, actually—er—strangled. . . ."

Mrs. Castle could hardly bring herself to say the word. She brought it out with the utmost reluctance.

Inspector Colgate said soothingly, "Yes, it's a nasty business."

"And the newspapers. *My* hotel in the newspapers!"

"Listen, my friend! Last night I had been talking with Mrs. Redfern on Sunny Ledge. On my way down to the hotel I saw those two together —Mrs. Marshall and Patrick Redfern"

Colgate said, with a faint grin, "Oh, well, it's advertisement, in a way."

Mrs. Castle drew herself up. Her bust heaved and whalebone creaked. She said icily, "That is not the kind of advertisement ay care about, Mr. Colgate."

Colonel Weston broke in. He said, "Now then, Mrs. Castle, you've got a list of the guests staying here, as I asked you?"

"Yes, sir."

Colonel Weston pored over the hotel register. He looked over to Poirot, who made the fourth member of the group assembled in the manageress' office.

"This is where you'll probabl be able to help us presently."

He read down the names. " ia about servants?"

Mrs. Castle produced a seconc st "There are four chambermaids th head waiter and three under him nc Henry in the bar. William doe he boots and shoes. Then there's the ok and two under her."

"What about the waiters?"

"Well, sir, Albert, the Mater te came to me from the Vincent at F n- outh. He was there for some y rs The three under him have been he fo three years—one of them four. ey are very naice lads and most resp n-

Henry has been here since the hotel
ned. He is quite an institution."
Veston nodded. He said to Colgate,
ems all right. You'll check up on
m, of course. Thank you, Mrs.
tle."
That will be all you require?"
For the moment, yes."
Mrs. Castle creaked out of the room.
First thing to do is to talk with Cap-
n Marshall," Weston said.

ENNETH MARSHALL sat quietly answering the questions put to him. art from a slight hardening of his fea-es he was quite calm. Seen here, with sunlight falling on him from the window, you realized that he was a handsome man. Those straight features, the steady blue eyes, the firm mouth. His voice was low and pleasant.

Colonel Weston was saying: "I quite understand, Captain Marshall, what a terrible shock this must be to you. But you realize that I am anxious to get the fullest information as soon as possible."

Marshall nodded. He said, "I quite understand. Carry on."

"Mrs. Marshall was your second wife?"

"Yes."

"And you have been married, how long?"

"Just over four years."

"And her name before she was married?"

"Helen Stuart. Her acting name was Arlena Stuart."

"She was an actress?"

"She appeared in Revue and musical shows."

"Did she give up the stage on her marriage?"

"No. She continued to appear. She actually retired only about a year and a half ago."

"Was there any special reason for her retirement?"

Kenneth Marshall appeared to consider.

"No," he said. "She simply said that she was tired of it all."

"It was not—er—in obedience to your special wish?"

Marshall raised his eyebrows.

"Oh, no."

"You were quite content for her to continue acting after your marriage?"

Marshall smiled very faintly. "I should have preferred her to give it up—that, yes. But I made no fuss about it."

"It caused no point of dissension between you?"

"Certainly not. My wife was free to please herself."

"And—the marriage was a happy one?"

Kenneth Marshall said coldly, "Certainly."

Colonel Weston paused a minute. Then he said, "Captain Marshall, have you any idea who could possibly have killed your wife?"

The answer came without the least hesitation:

"None whatever."

"Had she any enemies?"

"Possibly."

"Ah?"

THE other went on quickly: "Don't misunderstand me, sir. My wife was an actress. She was also a very good-looking woman. In both capacities she aroused a certain amount of envy and jealousy. There were fusses over parts—there was rivalry from other women—there was a good deal, shall we say, of general envy, hatred, malice, and all uncharitableness! But that is not to say that there was anyone who was capable of deliberating murdering her."

Hercule Poirot spoke for the first time. He said, "What you really mean, Monsieur, is that her enemies were mostly or entirely *women?*"

Kenneth Marshall looked across at him.

"Yes," he said. "That is so."

The chief constable said, "You know of no man who had a grudge against her?"

"No."

"Was she previously acquainted with anyone in this hotel?"

"I believe she had met Mr. Redfern before—at some cocktail party. Nobody else to my knowledge."

Weston paused. He seemed to deliberate as to whether to pursue the subject. Then he decided against that course.

"We now come to this morning," he said. "When was the last time you saw your wife?"

Marshall paused a minute, then he said, "I looked in on my way down to breakfast—"

"Excuse me, you occupied separate rooms?"

"Yes."

"And what time was that?"

"It must have been about nine o'clock."

"What was she doing?"

"She was opening her letters."

"Did she say anything?"

"Nothing of any particular interest. Just good morning—and that it was a nice day—that sort of thing."

"What was her manner? Unusual at all?"

"No, perfectly normal."

"She did not seem excited, or depressed, or upset in any way?"

"I certainly didn't notice it."

Hercule Poirot said: "Did she mention at all what were the contents of her letters?"

Again a faint smile appeared on Marshall's lips. "As far as I can remember, she said they were all bills."

"Your wife breakfasted in bed?"

"Yes."

"Did she always do that?"

"Invariably."

"What time did she usually come

How to Keep Football Stars in College

By William Bradford Huie

Jimmie Moss, star high-school tackle, entered U. of Alabama in 1929 on a football scholarship. Three months later he was home, for good, with a wrenched knee. Today he is a steel-fabricating helper, living near Decatur, Alabama. With him here are his wife and two daughters

A football scholarship brought Neil Rogers, above, to Alabama in He was varsity halfback from 1927 to 1929. Alabama finished ele in its conference in 1929 and Coach Wade moved to Duke next Rogers is today a WPA interviewer in Culbert County, Ala

PHOTOGRAPHS FOR COLLIER'S BY HANS GROENHOFF

Don Campbell came to Alabama from a Cleveland high school. A buckled knee ended his career in football after he had made the varsity. He got his degree and now announces at a small radio station in Selma, Ala.

FOR fifteen years I've been a football fan-atic. Perhaps we've met somewhere. At the Rose Bowl? I've been there five times. Or at the Polo Grounds? Or in New Orleans? Or Birmingham? I'm the little guy with the cane who always wears that big red-and-white Alabama button and seems to be having such a hell-raising time.

If you've ever seen 'Bama's Crimson Tide surge into action you've either seen me or heard that Comanche war whoop of mine. That whoop is something to remember. It's a direct blood descendant of the Rebel Yell and never fails to leave me whispering hoarse for two days after a game. Except for a season when I was out of the country—and the Clippers weren't flying then—I haven't missed an Alabama game since New Year's Day, 1925, when Pooley Hubert and Johnny Mack Brown racked up our first Rose Bowl victory.

I'm strictly a one-team fan. Alabama's my alma mater—class of '29—and the Tide's my team. I've never seen a college game in which Alabama wasn't a contestant. No other team matters to me. Take Notre Dame. Sure, the Irish are okay. So are Stanford and Fordham and Texas A. & M. But you take them. I'll take Alabama year in and year out. And I'll bet you my standard wager—one dollar, no odds.

I've felt all the great thrills of the Tide's modern history. I used th whoop four times in '34 during th minutes it took Dixie Howell anc Hutson to score 24 points on the ford "vow" boys. And I wallow our deepest slough of despair whe California Golden Bears horse-co us with our only Bowl defeat in '

As a hobby it's been exciting fellows in the alumni association had a lot of fun. We've drunk a good corn whisky and told a lot of stories. Our haven't-missed-a-records have been as precious a politics. And, yes, you've guess We're guilty of all the sins in the We've recruited players from all of the compass. We can quote yo rent on-the-hoof prices for tack tailbacks. We've helped build a organization that's bigger than the York Yankee farm system, and fought our big-time competitors nation-wide front.

But now I'm quitting. I'm not at anybody. I'm just walking c good faith and good humor. Duri season just ended I've seen the play some great games. In the bes bama tradition they were fought final whistle. But I've seen m game. The fellows thought I was when I didn't show up at the last sn But I'm not. I've just quit.

The reasons? Well, maybe I'm soft. Maybe I'm getting old. M I'm developing a conscience. Or r I'm Hannibal looking back dow road to Rome and wondering if th tories were worth the price we've But I guess I'm just fed up. I gue tired ducking out the back door these All Americans I've recruited around looking for jobs. I guess I' up seeing a lot of fine kids waste best years on something that's p

Recruiting is only half the story. Here's the half you've never heard before, told by an insider who for 15 years labored to ease football material through his alma mater. It's the story of what football farms, ambitious coaches and obliging profs are doing to boys who think football and education can be mixed

Big John Miller, 'Bama's All-Southern guard who played against Washington in the Rose Bowl in 1931, is today doing better than most of the great stars. He's the best snuff salesman in four TVA counties in Alabama and above is taking snuff orders in a store

Back in 1920 Pug Deal was a big man on the Alabama campus, hailed as the toughest blocking back in the school's history. Pug stopped playing football, however, shortly after Alabama lost to Tennessee, and is now making his living as a farmer in Tuscaloosa County

That look in their eyes when they realize it's phony isn't pleasant. And I guess I'm trying to kid myself into believing there is more good than bad in the collegiate football system.

It's not a spur-of-the-moment decision. It's a cumulative decision which had its beginning back in 1927-30 when I worked as a tutor for the Alabama athletic department and watched the building of a football machine.

In those days Hank Crisp, the real genius behind all the Alabama teams, was building the far-flung organization that today has become the standard for all the big-time schools. High-school coaches and alumni, concentrated in Alabama, Mississippi and Arkansas but scattered throughout the country, were the outposts, and between the outposts Crisp and his corps of scouts shuttled constantly.

Crisp occupied the same position in this system that Ed Barrow occupies in the Yankee baseball empire. He directed the task of producing two hundred prospective All Americans every year. Wallace Wade, who was head coach then, simply managed the varsity, as Joe McCarthy manages the Yankees. The same plan is in effect today except that Frank Thomas has replaced Wade in the line-up.

I was director of the brain-trust division for Crisp. The scholastic welfare of all the various squads was my responsibility. These squads included the Tuscaloosa High School squad, the freshman squad, the Red Shirt squad, the varsity squad and the postgrad squad.

Now don't tell me you've been under the naïve impression that the modern football organization has only two squads—the freshman and the varsity?

The Tuscaloosa High School squad was a most important incubator in the Tide hatchery. During the years I was at the university it was coached by Paul Burnum, who is noted for his thoroughness in teaching those twin fundamentals, blocking and tackling. It was generally understood that at least a part of his salary was paid by the university. He has since been promoted to freshman coach, and his rivals will tell you he is one of the cleverest recruiting agents in the business.

As proof of the esteem in which Burnum is held, he was selected to head the delegation that submitted Alabama's bid for Bill DeCorrevont, the much-publicized high-school halfback who finally chose Northwestern. Burnum returned empty-handed.

"Hell, we could have gotten him," Burnum still explains. "But we didn't want him. He would never have fitted into the Alabama system."

But Burnum couldn't take full credit for his great high-school squads which usually won the state championship. For he was assisted by other Alabama scouts. Suppose a scout found a good prospect who could play another year or two in high school. And suppose the prospect had a poor coach who didn't teach the Alabama system and who might try to recruit the prospect for a competitor. The scout simply picked up the prospect and brought him to Tusca-

Roy "The Ripper" White understudied Dixie Howell on the Alabama 1934 squad. He was dropped from football and from school after a knee injury. Today he is unemployed. His brother died as a result of football injuries

N. A. Nap Powell, above, joined up on a football scholarship at Alabama in 1930 as a promising tackle but was dropped out in 1931 after Coach Wade transferred to Duke. Nap now drives a soft-drink truck for a living in Selma, Ala. Below is Tony Holm, who was an All-America fullback in 1929, and who played six years of pro football after leaving Alabama. A knee injury ended his football career and he is now a furniture salesman in a Birmingham store. Note Collier's All-America football on his vest

loosa High School, where he could play on a championship team and where Burnum could start teaching him the Alabama system.

My task began with keeping these recruited players on Burnum's squad on speaking terms with their high-school teachers and getting them graduated so they could become college freshmen.

Hence this passing tip to Mr. Average Fan. Looking at your official program at the big game, you've probably wondered how the high school where your college is located happens to produce so many fine players. Don't be fooled any longer. Most of those players were transplanted from Podunk or Ishkooda during their high-school careers and are now calling the college town "home." If you are a Tennessee fan you may have noted that about ■ third of the 1940 varsity squad hails from Knoxville.

Cripple Courses are Safest

But back to the brain trust. The big push for us came in September when the freshmen brainless beef rolled in. Here were two hundred huskies who had been "eased through" high school on football and now we had to ease the best of them through college. In registering them we used our marked list of freshman professors. We placed the beef in classes where they would receive "sympathetic treatment" and steered them clear of those old sour apples who still insisted on flunking a guy just because he didn't know anything. But we had other limitations to consider, too. All science courses except the most elementary were out, for they would have long laboratory periods for which no beefer could find time. Courses leading to any form of higher mathematics were impossible. So commerce, law, medicine or any form of engineering were blacklisted from the start. This left us only the School of Arts and Sciences and the School of Education through which to route the beefers.

Our most successful plan was to enroll the beefer in the School of Education and point him toward a possible bachelor of science degree in physical education. One of the factors which may have caused us to prefer the education school was that Dr. James J. Doster, dean of this school, was a faculty adviser to the athletic department, and was usually selected to represent the faculty on the long football trips.

Accordingly, the typical course with which we loaded down the freshman beefer consisted of classes in Bible, Psychology I, Astronomy, and Music Appreciation. All were "cripples" of the purest ray. Bible was taught by a lovable old gentleman who delivered lofty lectures and never bothered his sleeping class with details like questions or examinations. I once heard of a beefer about to flunk this course who was given a special examination by the professor. The professor asked him two questions: Who created the world? and How long did it take? The beefer answered only the first question correctly for a grade of fifty, but the kindly professor gave him an additional ten points for having tried the second to bring his grade to the sixty necessary for passing.

Astronomy, Psychology I and Music Appreciation were all taught by "fellowship" students and not by regular professors, so we had little difficulty here.

After registering the frosh we turned to the progressively harder task of making class schedules for the Red Shirts, the varsity and the postgrads. After all, you do eventually run out of "crip" courses and hit ■ bottleneck guarded by some unfriendly prof.

The Red Shirts composed the "suspension" squad. They were the fifty or more prospects who had already served their time on the freshman squad but had not yet been chosen for the varsity. You see, under the five-year eligibility rule in the Southeastern Conference a boy can play a year on the freshma squad, a year on some intermediat squad, and still play out his full three year varsity career. Thus in the sprin the coaches look over the varsity an see what is needed to fill the holes re sulting from what the sports writers po litely call "graduation." They look ove the Red Shirts first since they are olde and better developed. Then they pic up a few from the freshman squad. Nex they consign the rest of the freshmen t the Red Shirt pool to grow and develo another year. The chaff portion of th Red Shirt squad is then fired off the pa roll, and the brain trust promptly al lows them to flunk and fall out of schoo This fate will already have caught u with more than a hundred freshmen be fore the end of the first semester.

Thus, because of the Red Shirt poo it often develops that a Tide "sopho more sensation" is some lad who ha already had four years of training unde the Alabama coaching staff—two year at Tuscaloosa High School, a year wit the frosh and a year with the Red Shirts

When you understand this, you ca perhaps more easily understand how th great senior squad of '30 could scor twenty-one points on Washington Stat in eight minutes, and how the next grea senior squad of '33 could score twenty four points on Stanford in six minutes Flash Suther, the halfback star of th '30 game, had been playing under th Alabama coaching staff for eight years and Hillman Holley, the sophomor sensation of the same game, had ha five years, counting their years at Tus caloosa High. Captain Foots Clement and others of the same team came fro the Arkansas farms which have pro duced fellows like Don Hutson, Sand Sanford and the Moseleys.

The squad of '37 lost to Californi when Thomas gambled with a sopho more tailback—Herky Moseley—wh had only had two years on one of th junior-college farms in Arkansas. Bu the team had reached the Bowl only be cause of two last-minute field goals fro Sandy Sanford's $100,000 toe. And sinc Sanford was from the same farm a Moseley, the farm's record did not suf fer.

Here's another tip. Watch the '41 edi tion go back to the Rose Bowl. Anothe great senior squad is in the making, an the sophomore sensations will be Do Hutson's twin brothers. Imagine, if yo can, twin Hutsons on the same field, on throwing and the other receiving passes

Great Heroes Deserve Degrees

But back to classes again. After w had found all the "crip" courses w could for the Red Shirts and the varsity men, we turned to our problem children These were the postgrads.

This squad was composed exclusively of Great Heroes—the fellows who ha played out all their years of eligibility and now had returned from the wars t rest on their laurels while we poor brain trusters sweated to get them some kin of degree. Hank Crisp, it seems, has sense of honor. He doesn't mind firin off the inept by the hundreds, but whe a guy has fought and bled for the alm mater for five or ten years, he not only deserves an all-something-or-other bu he also deserves a college degree. An Crisp was one to see that he got it. O rather Crisp was one to see that I sav that he got it.

We called these great heroes th postgrad squad for two reasons. First because the sports writers had already mournfully announced the Tide was los ing them through "graduation," and sec ond, there was the morale to think of, a Dr. Goebbels might say. After all, whe a worshipful freshman got inquisitive at the frat house, these great heroes had to have some explanation for thei continued presence around the campus

"Oh, I'm hanging around doing a little

Kid Tinsel

By Octavus Roy Cohen

ILLUSTRATED BY GILBERT DARLING

The Story Thus Far:

WHILE managing Eddie Gordon, a young middleweight fighter, old Pop Mallory dies in Birmingham, Alabama. Whereupon, Max Ellison, a well-known New York fight manager, sends Joe Barton (who is in love with Ellison's daughter "Babs") to Birmingham, to sign Eddie up.

A few days later, Barton, back in New York, reports to Ellison. He says that, because of a curious contract Gordon had signed, *he must work for a girl*: "Pat" Mallory, Pop's daughter! He does not refer to a murder he, Joe Barton, had committed near Birmingham, one night—and his flight from a possible witness, *Billie Gordon*, who had not seen his face in the darkness but who had gained possession of his revolver. . . .

Eddie Gordon goes to New York City. There, taking orders from Pat Mallory (who is secretly in love with him), he goes into training. He meets Max Ellison. He meets Ellison's young daughter, Babs. He fights his first fight, and wins. Babs, overjoyed, does not try to hide her admiration for him. And Billie has a bitter enemy: Joe Barton. Jealous of the fighter, Joe Barton orders Morrie Oakes, a professional killer, to "eliminate" the newcomer; but not until the missing revolver (which Eddie has given to Cliff Halliday, a sports writer, for safekeeping) has been recovered. The weapon, it appears, is registered in the name of Joseph Barton—Oakes must steal it, before he kills Eddie. . . .

Labeled "Kid Tinsel" by Halliday, Eddie wins a number of fights. Then, in poor condition because of Babs Ellison's gay, late parties, he is knocked out by Tommy Gateley. . . . The following day Pat receives a letter from a betting firm—a letter that makes it appear that she had won a large sum betting against Eddie! While she is wondering what the letter means, Ellison calls on her. He tells her, calmly, that she is to be accused of engaging in a crooked fight deal. Then, professing to be sorry for her, he offers to buy Eddie's contract for fifteen thousand dollars.

Pat asks for twenty-four hours, to think the matter over. Halliday "tells all" (omitting names) in his column; and Ellison drops his plan for tricking the girl into selling a fighter who, he feels sure, is a coming champion.

Eddie fights Gateley again, knocks him out. After which (while Oakes is trying, unsuccessfully, to find Barton's revolver), he steals away to the Adirondacks, for a much-needed rest.

VIII

TO THE left of the gravel road was an ancient stone gateway, but no gate. Propped against one of the columns was a simple sign, designed for effectiveness rather than beauty. It said simply:

TRAINING QUARTERS
EDDIE GORDON
NO ADMITTANCE

Leading in from the gateway was a narrow, curving dirt road bordered by lavish shade trees. The undergrowth was heavy and had once been well-tended and beautiful. There were the relics of flower gardens, and patches of green, velvety lawn.

Framed by birch and oak and elm and maple, a big, rambling building looked down upon what had once been a lovely lawn. It was a benign old house, mellow with age, valiantly withstanding years of abuse and neglect. Today it was spic and span, but sadly in need of paint and repair. To restore to this place any more than a semblance of its pristine loveliness was no simple job, and it had proved much too much for Patricia Mallory.

Set against a background of lush Jersey woodland, bordered by hedges, miles off the main highway and close to a mild little river, it was still a lovely spot. For years its new owners had waited patiently for a purchaser with money and an appreciation of sylvan beauty. But that purchaser had never come, and so the place was rented for brief periods to those who might have use for it. It had housed—briefly—gay summer parties seeking rest and seclusion, it had served as training camp for two famous champions, and it did duty now as headquarters for Eddie Gordon.

"You wouldn't by any chance be jealous, would you?" he asked. "Of course not," she said. Her cheeks flushed. "That's silly"

For all its lack of fresh paint, for all its obvious need of repair, the main building—which was referred to simply as "The House"—retained a mellow dignity. It was as though it had reconciled itself to the use that was being made of it, and therefore gave tolerant approval.

Out beyond the broad, spacious veranda was a shady grove, bordered by flowers that had survived years of neglect. In the middle of that grove some former pugilistic tenant had built a ring, which had been refurbished for Eddie.

It was a good ring, stanchly built, twenty-four feet square inside the ropes and covered today with new padded canvas. There were benches and chairs around the ring and a shiny new gong for whoever happened to be acting as timekeeper.

This afternoon a dozen men lounged about the ring in definitely informal attire. There was a burly heavyweight, two lithe middleweights and a speedy lightweight who were themselves training and also acting as sparring partners. Feets Johnson crouched in one corner, hand on the gong rope, his eyes alternately on the stop watch he held and on Eddie Gordon, who was sparring with a fast, rangy boy.

It would have been difficult for a casual acquaintance to have recognized Eddie in his training regalia. His pleasant, homely face was partially concealed by a padded leather contraption which covered forehead, nose and eyebrows as protection against the sudden, dangerous head contacts of the training routine. He wore a dingy-gray sweat shirt and black, full-length trunks. He moved warily about the ring, sparring easily and lightly—brown eyes intent behind the odd armor which protected him, knotty fists encased in twelve-ounce sparring gloves.

From the ringside you could hear the twittering of birds, the clucking of hens out somewhere behind the house, the chatter of trainers and sparring partners, and the steady crunch of fighting shoes on the resin-covered canvas and the thud of padded leather on human flesh. It was an incongruous picture against this gracious background. It didn't seem to fit—yet the unanimous verdict of the training retinue had been, "Gee! what a swell dump."

FEETS JOHNSON'S big black hand yanked the gong rope and it clanged out on the quiet afternoon air. The rangy youth with whom Eddie had been boxing waved with his right glove and climbed gratefully down out of the ring, his sparring chore completed. Eddie moved into a corner and leaned against the ropes, looking down at the canvas floor on which the sunlight—filtering through the leaves of the trees overhead—traced a delicate, lacy pattern.

Through the doorway of the house came a girl: a young and slender girl whose firm, young figure was revealed, rather than concealed, by slacks. Pat Mallory's eyes looked tired; her manner betrayed weariness and worry. There had been so infinitely many things to do—the daily tasks seemed never-ending. There were things to remember, details to be arranged, catering to be supervised, Eddie to be watched. . . .

She moved from the house toward the training ring. She conjured up a picture of this place as it must have been originally, and she sighed. She saw the loveliness which once had been, rather than the drabness to which it had fallen. By training-camp standards, it was beautiful; by artistic standards, its decay was heartbreaking.

But it was still lovely, still gentle, still relaxing. It was just the thing for Eddie. Nothing to divert his mind, nothing to worry or annoy him. A tranquil, routine, healthy existence. Daily road work along twisting, leafy paths, a bit of horseback riding, tennis on a scraggly court which had once been good, daily swims in the river, boxing in the reconditioned ring; plenty of good food at regular hours; early sleep and early rising. Yes, they all were enjoying themselves . . . all except Pat Mallory.

She banished the strained expression from her face as she approached the ring, and forced herself to smile as she looked up at Eddie. She asked, "How are things going?"

"About as usual."

"You seem to be drawn a little fine."

"I'm not overtrained."

"Well, don't be. It's no good. Now . . ." She beckoned to a keen-eyed young boxer who was slightly taller than Eddie. "Ready, Tim?" she asked.

"Yeah—I'm ready."

He came forward and joined her. Pat gave him a smile, but turned her attention to Eddie Gordon.

"Listen, Eddie—because this is important. I've been studying the movies of Dixie Grogan's recent fights. He's got the fastest straight left in the game. I want you and Tim to step three fast rounds. All you've got to do, Tim—is to keep throwing lefts at Eddie. And Eddie, I want you to keep your hands at your sides. Don't block a punch. Slip everything."

Eddie frowned. He said, "I can get away from a left, all right."

"Maybe. But you've never been up against one like Dixie Grogan's. I engaged Tim because he's got the next thing to it. If you can learn to avoid Tim's left with your hands down, you shouldn't have any trouble with Dixie." She turned toward the taller youth. "Go ahead, Tim."

Tim climbed into the ring and took the corner opposite Eddie. At a signal from Pat, Feets sounded the gong and they moved out to face each other.

THE boxers followed Pat's instructions. Tim's left was fast and accurate. During the first round Eddie experienced difficulty in avoiding it. Occasionally he shook his head and grunted with annoyance, but Pat held him to routine. "Take it easy. Eddie . . . watch his shoulder. . . ." She turned to Feets and asked, "What do you think?"

The big Negro beamed approval. "It's just what Pop would've done," he said. "You sho learnt plenty fum him."

In the second round Eddie had less difficulty in eluding Tim's rapierlike jabs. In the third round he did exceedingly well, although there were many that he did not succeed in evading. And then the third round ended, and Pat said, "That's enough for today, boys."

Eddie clambered down out of the ring and Feets slipped a robe around his shoulders. He was breathing evenly and his lean, lithe body was relaxed. Pat said, "That was pretty good, Eddie. Ten more days of that and you won't even have to think about a left."

Eddie looked doubtful and so Feets hastened to interject his opinion: "Miss Patricia sho is right, Mistuh Eddie. Faces wasn't created to stop no punches with."

Eddie turned away and Pat said, "Take a good rubdown and shower and rest for a while before dinner. . . ." He walked toward the house without answering and Feets looked down solicitously at the young girl. "It sho ain't fitten," he stated positively.

"Oh! Oh! I wouldn't care to be in the devil's shoes this morning!"

IRVING ROIR

"What isn't, Feets?"

"You havin' all this grief an' mis'ry an' wastin' yo'se'f aroun' a bunch of prize fighters."

She smiled wanly. "I don't enjoy it much, you know."

"Yassum, I know. Ten millium things goin' wrong all the time, an' nobody depreciatin' what you is doin'. Time Mistuh Eddie wins that title, we'll be takin' you off to a hawspital."

"It won't be long now. . . ." She looked up, seeking encouragement. "Eddie seems to be doing all right, doesn't he?"

"Yassum . . . on'y . . ."

"Only what?"

"On'y he's gittin' edgy. Like a thoroughbred hawss befo' a big race. Seems like you cain't tell just when he'll bust out."

"Not much chance here . . ." She smiled at Feets, and compelled herself to speak gaily: "Guess what we're having for dinner tonight."

Feets said, "It don't matter what it is, Miss Patricia—so long as it's eatments."

"What would you say to some re Southern fried chicken and a batch the lightest, flakiest biscuits you ev tasted?"

A reverent look came into his eye "I reckon I'd say Hot Dam!"

"Well, say it then. I got rid of t cook we had and hired a new one. Fre up from the South. You'll find her the kitchen. If you want some advan samples, you'd better hurry."

"Hurry?" Mr. Johnson turned aw eagerly. "Gimme just one feather each hand, Miss Patricia—an' I'll fly."

His countenance was a study in co centrated ecstasy as he circled the hou and approached the kitchen door. Re ginuwine fried chicken! Good ol' bi cuits! With lots of butter and fre honey. Mm-m-mmmmm! He flu open the door . . . and the smile va ished. In its place came an expressi of abysmal woe. He gulped, choked a wavered uncertainly. The voice of t new cook was sweet as saccharine. S said, "Good evenin', Mistuh Johnson

"Magenta!" It was more a groan th a greeting.

"Uh-huh. It's me—sho nuff. Ai you glad?"

His head shook slowly and aut matically. "Ise aghast," he declar miserably. "Absotively an' posolute aghast!" He leaned against the iceb and passed a shaking hand across a su denly perspiring forehead. "Miz Joh son," he inquired in bewilderment, "h come it that with all the woods in t United States you could git lost in—y had to find this heah place?"

"It wa'n't no accident," explain Magenta. "I searched it out."

"Nineteen forty is sho an unluc yeah fo' me."

"Miss Patricia figgered you'd s'prised . . ."

"Uh-huh. Ise s'prised, all right."

"Ain't you gwine exten' me no we come?"

"No ma'am." Feets was very positi on that point. "I ain't gwine extend y nothin'," he stated firmly. "Commenc right now."

HE TURNED his broad back to h and pushed through the screen do He was wallowing in the netherm depths of despair. "Fried chicken!" muttered miserably. "Hot Southern b cuits! Magenta! Tha's what I call hash

It was difficult for Mr. Johnson to re oncile himself to this latest and most u timate disaster. He helped Magenta s the table, and conducted himself wi frigid aloofness. He went out on the v randa, rang the dinner bell and watch the helpers and sparring partners tro in and seat themselves about the hu training table. He made ready to ser them, meanwhile maintaining an at tude of injured dignity.

Pat Mallory appeared in the dini room doorway. Somebody looked and whistled in admiration. Somebo else said, "Well, I'll be . . ."

Pat Mallory had given in to an ov powering urge to be feminine for o evening; to insulate herself against t grim masculine business of fighting.

The dress she had selected was t daintiest in the limited wardrobe s had brought with her. It was white a it was frilly and it was cut just a wee low at the throat. It made her feel b ter to wear that dress; made her feel l incongruous—less sexless. Feets said, he held her chair, "You sho look beau cious, Miss Patricia. . . ."

They all looked at her with approv For the briefest fraction of an insta she thought Eddie might join in t chorus of compliments . . . but afte brief scrutiny, he returned his attenti to his plate.

All through dinner Pat was unna rally gay. Her eyes were bright, l

The Secret Four

By William Hillman

CABLE FROM LONDON

Anyone can listen to Hitler's words, but here is a band of radio sleuths who can tell the British what he thinks. They predicted the time of Italy's war declaration and the recent peace feelers. We give you the first low-down on a brand-new weapon of military intelligence

AS YOU read this the Nazi Propaganda Ministry, from radio stations in Berlin and in German-conquered lands, is pouring out torrents of words—purposeful words.

The British government considers the word offensive of the Nazis as important as the war on land, at sea, in the skies. In some ways it believes it more important. A true analysis of the verbal TNT in the propaganda shells gives a good idea of what's being planned in actual combat.

Operating on this theory, the British have introduced a method of trapping the strategists behind this Nazi word offensive. They have put four brilliant psychologists on the job as propaganda analysts. Their official function is to analyze the enemy's word shells as scientifically as British munitions experts examine fragments of bombs dropped on London by enemy planes.

Great Britain's propaganda lab in which psychoanalysts determine the true chemistry of Hitler's verbal artillery fire has been kept a secret. It still is a secret to millions of Britons. I stumbled onto the fact of its existence. The matter had to be taken up with high government officials before I was allowed to write anything about them

When dictators bellow their threats into their radios, Miss Anne Outwaithe lends a knowing feminine ear and up pops the hidden motive. In short, diplomacy's herdish

Above is Sociologist Mark Abrams, one of the four official mind readers whose job is warning the British government—in advance—of any imminent enemy skulduggery

Only modern science, total war, and the use of radio as a weapon could have produced them. They believe that Hitler said a mouthful when he declared in Mein Kampf that "in war, words are acts." They consider this the key to the feuhrer's mental processes. Perhaps the only thing Hitler has ever said that they believe, it is the "theme song" of the psychiatric four.

They meet daily around a coffee table, they frame a weekly report which goes to the cabinet, the foreign office and the war, navy and air ministries. They scan the millions of words that pour from the microphones of Europe. Close to three hundred alert listeners and translators under supervision of the British Broadcasting Corporation take down the broadcasts of every radio station on the Continent day and night. The four study especially what is said on the ether waves from Berlin and Rome. Words are cigarette ashes, fingerprints, footsteps in the snow to these sleuths.

The broadcast words are their only clues. They refuse to listen to inside information. They won't look at secret reports. They study only the news stories and propaganda from German and Italian radio stations. For the first time in the history of military intelligence the methods of Professor Sigmund Freud are applied.

The secret four are not concerned about the truth or falsity of what is said; that is the job of the ministry of information. Words betray what is in the minds of those who speak. Words reveal intentions and plans. The text and not the facts is the important thing.

Why, for instance, does the German sender, after broadcasting comments in English, omit certain details when the same talks are made in Gaelic or Hindustani? Why are special items, presumably of general interest, stressed in news to the German public but omitted in talks to Russia or South America or to England? Why are Italian stations telling North America in Esperanto what is contradictory to broadcasts they make in Arabic or Magyar? What is the meaning of German and Italian and Russian broadcasters simultaneously touching on certain subjects in what seems to be the same language yet which on examination gives conflicting impressions?

The answers to these questions come close to letting the Axis cats out of the bag. Even when the *Deutsche Stimme* or the *Vox Romano* dissimulate they can't hide the truth from these astounding sleuths of the mike.

The secret four were the first to realize the Nazis were to launch their blitzkrieg against the Low Countries in May. They foresaw something like the magnetic mine. They predicted preparatory activity on the French coast for the invasion of Britain and certain activities in the Mediterranean. They had no doubt Italy was coming into the war. They warned of Hitler's intention regarding the French navy. They guessed the Germans would stage a peace offensive in July.

I can now reveal that the four psychologists did not believe the Nazis would invade Britain this past summer or fall. Their diagnosis—and they

MUSIC WITH A MESSAGE

By Richard English

ILLUSTRATED BY ROBERT O. REID

The two loves of Prof Bennett. America's loudest player recovers his upbeat

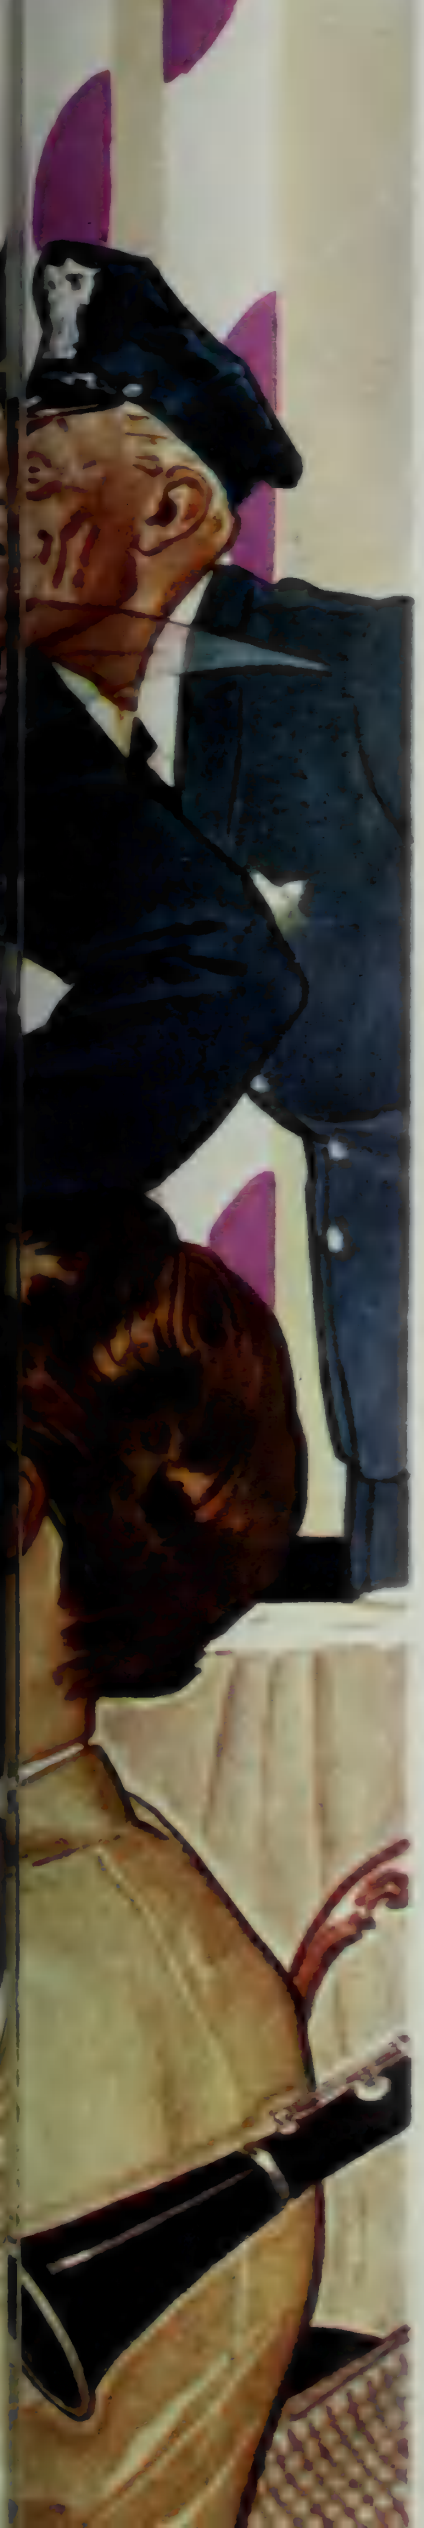
ON a certain fall day Miss Lovey La Marr, the celebrated bubble dancer, sent off wires that resulted in some very odd characters suddenly appearing in Chicago. Lovey was well and favorably known as a very pretty lady buff who liked her bands hot and low-down, and the news that she had discovered a fifth column in the very heart of the swing industry was something to send the nation's outstanding jive masters scurrying to the Windy City.

On arrival the batons hurried to Miss La Marr's hotel. They were just going into session when Mr. Fats Harrison, the dean of hot trombones, came puffing into the scene. He was a large, portly party, fresh from Seattle, and had made the last lap by car, his plane having been forced down in Minneapolis.

He nodded to the assembled brethren and shook hands with Miss La Marr. Lovey had very nice red hair and Irish blue eyes and came equipped with those curves that lend so much charm to a bubble-dance recital. She was very much the artiste and, as such, she had that quiet dignity of a young lady who has always kept her art on a high plane. Today, however, she was greatly upset and Mr. Harrison dispensed with the formalities.

"What goes on?" he demanded. "What's this about our being with crisis?"

Lovey gazed at him one long moment and then went over and bolted the door. The boys exchanged apprehensive looks. Mr. Frosty Moore, that small and successful clarinet, who had come by cab from Detroit, glanced nervously over his shoulder.



"Look, Lovey," he said fretfully, "let's skip this G-man stuff. I'm upset enough just being in Chicago. I once laid an egg here."

"You're upset already?" said Lovey. "Wait till you hear the lyrics!"

There was a very loud silence.

"It's Prof," she said finally. "He—he's getting married Saturday."

THE party mentioned, Mr. Prof Bennett, had long been a legend in the profession. His small, solid combo was a landmark in the swing business and Prof's horn-rimmed glasses framed a solemn, scholarly face that was greatly revered among the jitterbugs. He had such a hot lip that when he was really in the groove even his glasses steamed up. The trade's respect for his ability as a ride trumpet was only exceeded by its awe at his being with brains. He was always reading newspapers and things,

and he had that brooding look that comes of being ■ thinker.

Even so, the glances the boys exchanged were exceedingly cold.

"Look, baby," said Mr. Fats Harrison, "if you think I came all the way from Seattle just to hold your hand while Prof's getting married—"

Color flared in Lovey's cheeks. It was a well-known fact that for several seasons Miss La Marr and Prof Bennett had been right on the verge of taking that trip down the aisle themselves. Then something had happened and they were doing a single again. It had been remarked that some of Prof's heaviest thinking dated from that day. Where he had been content with just magazines before, he had taken to carrying large, ominous books dealing with capitalism and the sorry fate of the masses.

Lovey was every inch the lady. "I wouldn't have Prof on toast," she said quietly. "It's—it's just that I don't want to see him making a fool of himself. Not when he'll kill off the whole swing business at the same time!"

The boys stared at her, suddenly apprehensive. It was Frosty Moore who bespoke their growing uneasiness: "You mean Prof's taking ■ powder?"

"But good!" she said bitterly. "He's already given up his band. He's going in for that music-with-a-message stuff."

There was a stunned silence. Finally Fats Harrison shook his head. "That don't add up to me," he said slowly. "Not unless he has suddenly become ■ closet drinker."

IT WAS far worse than that, said Lovey. Since Prof had been back in Chi he had met up with an intellectual cello, a Miss Vera Block. Pretty soon he was engaged to her and meeting all her friends who took him to lectures and study groups and things. Anyone but ■ ride trumpet could have told they were strictly pink on first sight.

But not Prof. He had always been ■ soft touch for the uplift trade, and the first thing you knew he was breaking up his old band and forming a salon combo. He had become convinced that swing was on its way out. It seemed it didn't have any significance.

For a moment the boys were speechless. To find that Prof Bennett, the idol of the jitterbugs, was about to do a Benedict Arnold was just too much. If he were to start giving out to the press that you didn't have to swing because it didn't mean a thing—

"Why, he's ■ menace to the whole band business!" Mr. Fats Harrison said bitterly. "That kind of publicity would put us all out of work!"

"I know," said Lovey, trying to keep her voice very steady. "If he wasn't marrying this lady cello he might get over it, Fats. But as it is—"

Mr. Miff Dowdey, the prominent tenor-sax man, nodded. From bitter experience he knew that once ■ man succumbed to that Lohengrin lockstep he would remain ■ dead duck. "We had better check into this at once," he said. "Where do we find Prof?"

She listlessly indicated a newspaper on her bed. According to an item therein, Mr. Bennett and his charming bride-to-be were to be guested at a garden party given by the Musicians Cultural League the following afternoon. A feature of the party would be the unveiling of ■ new salon group, an event that the local musical world awaited with rapt interest.

Mr. Fats Harrison glanced at his colleagues. "This makes it very simple, boys," he said. "We will just happen by and see what gives."

The lieutenant gave one horrified look at Lovey's art, then bellowed: "You can't get away with that! Call out the wagon, boys!"

ONE of the long-hairs had donated the garden of his home as the setting for the prenuptial clam bake where the boys showed the next afternoon. There was an artistic party at the door who regarded these strange callers with their checked suits and derbies very coldly indeed.

"I'm afraid there's been some mistake," he said distantly. "This affair is by invitation only."

Mr. Fats Harrison shook his head. "Not for us, sweetheart," he said. "We're Mr. Bennett's ushers. Which way do we go?"

A sudden swell of music from the garden supplied their cue. It was strictly salon stuff and they finally recognized it as the Flight of the Bumble Bee. Then Prof's trumpet was in there, lightly and politely, and as one man they surged through the door.

A hallway led through the house to the sun porch and garden. One look at that crowd on the lawn and the boys knew that Lovey's darkest suspicions about Prof's new chums were only too true. The lawn was entirely overrun with that high-forehead trade that was always eager and willing to divide anything you might have. To have a prominent colleague fall into such low company was ■ blow from which the band business might never recover.

"I knew this would happen," Frosty Moore said glumly; "Prof ought to have known this deep thinking is strictly for oboe players."

Mr. Fats Harrison had spotted the combo and was already shouldering his way through the mob. In a moment they were beside the impromptu stand that had been erected under an arbor. Then, for the first time, they could actually see the depths to which Prof had fallen.

There were eighteen pieces in his new combo and not a familiar face among them. Instead, there were sundry bushy-haired parties giving out on flutes and things. There were six strings and a lady cello who would have to be Prof's intended. She was a small, dark girl with braided hair and a very intense look.

"Well," said Mr. Miff Dowdey, "All I can say is that she plays a very determined cello."

PROF was leading them into the last chorus. He was a tall, grave young man with neatly parted brown hair and serious blue eyes that he closed as he reached for the high ones. He was playing ■ fancy trumpet with occasional fluttering touches and it wasn't Prof Bennett at all. His glasses weren't steamed up and his lip was just another lip. Nothing gave.

"It's a good thing no Variety mug is here," Fats said morbidly. "If they ever caught this act Prof would already be minus ■ career."

And then, hitting that last high one, Prof's eyes opened. To his horror, he found himself staring into the grim faces of five of his closest friends and associates in the gut-bucket trade. He cracked completely, achieving ■ small *peep* that would have sounded much better emanating from a flute. His long-hairs floundered to a halt.

Prof wet his lips and finally managed a weak smile. "I—I didn't know you boys were in town," he said. "This—this is a real surprise, fellows."

"It sure is," said Frosty Moore, still darkly eying a harpist. "One more surprise like this and I'm going to quit drinking that stuff."

Mr. Bennett had never been slow on the uptake. He caught the melody and after a minute asked warily, "You just happened by?"

"Why, Prof," Fats said reproachfully, "you should know better than that. You didn't think your old pals would let you make that trip down the aisle all alone, did you?"

Mr. Bennett shook his head slowly. "No," he said, certain now that they were waltzing him, "no, I might have known better than that."

Fats was watching the music lovers clustered around the punch bowls. On close sight they were even more offensive. The women ran to faint mustaches and the men were either too dark and determined or too pale and languid.

"These are very strange jitterbugs," he said finally. "I guess they come with the music, hunh, Prof?"

Prof knew the chips were down then. "Wait a minute," he said soberly. "I wasn't trying to pull a fast one, Fats. I was only keeping this quiet until we get back from our honeymoon." Their carefully blank faces didn't help any, and his eyes were suddenly dark and troubled. "It's—it's just that I saw we weren't accomplishing anything with that old clam-bake stuff. You know what Vera says? What we lacked was significance!"

"Significance?" said Mr. Frosty Moore.

"Sure. Civilization crumbles and what do we do? We go on rug-cutting!"

The boys glanced at one another. "We get your idea," Fats said with quiet dignity. "But naturally, we were quite upset to hear you have decided swing was dying a dog's death. When Lovey—"

Mr. Bennett froze behind his glasses. "Lovey?" he said frigidly. "I doubt that Miss La Marr could understand the actual reasons for my decision. With us, there was never a meeting of minds."

"So we heard," said Mr. Miff Dowdey. "What gave, anyhow?"

"We had ■ misunderstanding. I did not like her continuing as ■ bubble dancer and she took it as a reflection on her work. She was under the impression I did not consider it ■ true art."

Mr. Bennett's fiancée had been watching his callers and, sensing possible recruits for the cause, she came up now and slipped her arm through the prominent trumpet's. "I haven't met your friends, Edgar," she said reprovingly, giving them what passed for a warm smile.

Prof hurriedly made the introductions. None of them had ever met a lady cello before and only Mr. Fats Harrison could come up with a little speech. "How do you do?" he said politely. "We are always happy to meet one of Prof's fiancées."

Vera gave him a very cold stare. Prof hurriedly picked up the chorus. The boys, he explained, had come all the way across the country just to witness his wedding. Perhaps once they had met her friends and understood how much a musician could do in these troubled times—

All was instantly forgiven. "They must meet Igor!" she exclaimed. "No one can explain our mission better than he!"

AFTER she had gone off to look for him Prof, somewhat embarrassed, glanced at the boys. "I know these people seem sort of strange at first," he said, "but once you know them—"

Mr. Frosty Moore shook his head. "We don't want any of this Moscow swing, Prof. We hear that over there they do it on lampposts."

Prof was hurt. "You've got them wrong," he said. "You can be a liberal and an advanced thinker without being ■ Red. I wouldn't have any part of those Communists!"

"We know," Fats said soothingly. "It's simply that after a long trip we're not up to meeting with these heavy thinkers."

The salon group was already drifting back to the stand and the boys pr[illegible]red

to blow. "We'll be seeing you, Prof," said Mr. Harrison. "As a matter of fact, we would like to toss you a little dinner the night before you get married."

Prof was obviously moved at this gesture that they were still chums. "That's mighty swell of you," he began, and then his face fell. "I'm afraid Vera—"

"Look, pal," Mr. Frosty Moore said coldly, "even a bridegroom's got some rights. We'll see you at the stag."

A faraway look crept into Prof's eyes. After all, it would be a farewell to all the things that had once been close and dear to him. Even his fiancée could understand that.

"I'll be there," he said. "That's a promise, fellows."

The boys were just making their escape when Vera bore down on them with a slender, tousle-haired party known as Igor. Igor, it seemed, was the head of the Musicians Cultural League. He immediately turned on so much charm that it spilled all over the lawn and in a moment was lapping around their ankles.

He was just getting well into his song-and-dance when Mr. Fats Harrison tapped him on the shoulder. "That's mighty fine, chum," he said, "and I am only sorry we will have to skip it right now. It just happens that we are en route to a heavy conference with a bubble dancer."

MISS LA MARR'S celebrated bubble dance took place thrice nightly at the Paradise Club, and it was after the second show there that she received the steering committee, the Messrs. Harrison and Moore, in her dressing room. The other boys, they explained, had been so upset by their contact with the intelligentsia that they had adjourned to various bars and things.

Lovey had slipped on a dressing robe and somehow her eyes seemed large and tired. She had always been on the upbeat side, five feet five with eyes of jive, and Fats found her present quietness very disturbing. It looked more and more as if Lovey was with torch.

"What did Prof say?" she asked.

Fats shrugged. "He said plenty but none of it made any sense. We didn't even make a dent, Lovey."

She nodded, trying to keep the disappointment from her face.

Frosty Moore was frowning. "For a bridegroom," he said, "he did not seem to have a lot of that old I-love-you-truly. This deep thinking has caused him to meet up with a lot of pinks, and this cello is just another one of the same. So there he is—right in the middle."

"But good!" said Fats. "This music today was only a warm-up. Before he gets hep they'll have him singing The Internationale."

"I know," said Lovey. "It's no good."

"Personally," said Frosty, "I think Prof getting married is a very sound idea but is being used with the wrong parties. Once a guy has a little lady around the house he has very little time for fretting. They are always wanting a new fur benny or something and there is more talk about that than the state of the nation."

Lovey's lip trembled and Mr. Harrison gave Frosty a cold look that said certain clarinets would do well to avoid such delicate subjects.

"All I can figure," he said, "is that Prof is a gone goose unless he should happen to backslide. If that lady cello were to learn he still liked to rip it out she would certainly take it the hard way."

"So?"

Fats shrugged his massive shoulders. "So we are giving Prof a little stag before he takes the veil. Maybe something will give."

Lovey stared at him. The stag was all very good but nothing would come of it unless it reached the ears of his intended. If, however, it should become the talk of the town. . . .

Fats noticed the slow-kindling light in her eyes.

AT NINE-THIRTY on the evening before Prof was to be raffled off, the distinguished ride-men and their guest of honor assembled in a private supper room of a Loop hotel. Facing one another across the banquet table, there was only a glum silence.

It wasn't until the dinner was finished and they were on their second lap of liquid refreshment that things brightened up a bit. It was then that with a suitable, inarticulate speech, Fats presented Prof with the boys' wedding gift. It was in a large black case, and after Mr. Bennett had opened it he was so choked up that he could not speak.

It was a beautiful silver trumpet, appropriately engraved with the names of the donors. The card accompanying it said simply, "Good luck, Gate."

"We won't be billed till February on him" GEORGE SHELLHASE

"Thanks a lot, fellas," Prof said finally. "It—it makes me feel like old times just to look at it."

Mr. Fats Harrison slipped the boys the look. He had promised Lovey that at least there would be one last groove session. The boys had sent over their instruments just in case of a tie and now Fats rose to the occasion.

"Well, Prof," he said sadly, "this is it. This is where we get off. Maybe we ought to take just one chorus for old times' sake."

Prof wavered, trying to fight off the nostalgic weakness that swept over him at the sight of their eager, wistful faces. Never again would such a ride-combo be assembled in one town at one time. For the moment, Vera was forgotten.

"Well," he said weakly, "I suppose we *could* take one crack at Bugle Call Rag."

In another ten seconds they were ready for action. Prof reverently lifted the new silver trumpet to his lips. He gave them the one-two and they were off, taking it lightly and politely until they got the feel of the acoustics. Past masters of the jive, they were sitting solid at the end of the first reading. Then, ready for the onslaught, they looked up.

Prof held up one finger, indicating Mr. Fats Harrison. That ample party was immediately on his feet, taking his chorus as it came to him. He played a strictly Texas trombone, each husky inflection a little more torrid than the last. Each note was fraught with the poignancy of final parting, a last salute to a departing great. The others, filled with the same surging emotion, were in there behind him, building it.

Finally spent, Fats shot-the-likker to Frosty Moore. That eminent licorice stick seized it on the upbeat and was away, riding it higher and higher. His bitterness at certain parties who were fifth-columning Prof right out of the swing business gave his reed a fine, wild cry that had never been heard before by any of those present.

One after another, all the boys were in there speaking their pieces loud and hot. After each had taken his chorus they paid tribute to the guest of honor, leaving him the last passage for his very own.

A faint mist already spreading over his glasses, Prof sent it away. Never had the Bugle Call Rag had such a powerhouse reading; never had it been sent so high and so far in so short a time. Prof could never stop when he was really in the groove and so he went right on into Ja Da. In another four bars they were all in there, beating it right down to the bricks.

TWENTY choruses later, his glasses completely steamed up and, conscious only that it was flowing full and fast within him, Prof's trumpet swept them into I Wish I Could Shimmy Like My Sister Kate. Completely out-of-the-world, achieving heights that all of them knew no trumpet would ever again attain, he tore it down. The boys were still trying for a tie when they became din aware that a mirage was taking place the room.

After a moment Mr. Fats Harris vaguely realized that this visitation w not a mirage after all but, instead, w a warm and undulating fact. A few cl ruses before a mysterious young wom wearing a dark veil and a full-len coat had slipped into the room. Hav discarded the disguise, she was now g ing her all.

Lovey, wrapped only in gossan chiffon, was giving out in the best La Fatima tradition. Her hands held fore her eyes, palms outward, she sli ered across the room. It was the fi time she had ever worked without bubble but no spectator would ha complained. Even in this pagan rout Lovey was an artiste to the last mus and kept her art on a high plane. S swirled about the room, giving w more and more abandon, the compl buff.

While even the boys regarded this a somewhat odd tribute to pay an love, it was still a most inspiring way say adieu to life's more tender emotio Touched by such delicate sentimer they strove to match her tribute.

Their increasing tempo finally reach such alarming proportions that P gradually became aware someth must be taking place. He was peering Lovey through his misty lenses, vai trying to reconcile his sight and his r soning, when the arrival of a riot squ brought the evening to a fitting clim

The beefy lieutenant gave one ho fied look at Lovey's art. And, then, professional sense of virtue outraged such goings-on, he bellowed: "You ca get away with that in Chicago! Call the wagon, boys! We'll take them down to the station!"

TO THEIR horror, the boys fou themselves with a public when t arrived at the bastille. Cameramen reporters were waiting at the desk at the sight of them Prof's darkest s picions were confirmed. When he recognized his erstwhile love be shoved into the wagon with them he given her one cold look and relapsed i grim silence. Lovey, wrapped in overcoat, had to fight back the tears.

With great glee the cameramen w into action at the sight of this ne worthy haul. Bulbs flashed, the da defendants were pushed this way that, and found themselves giving coherent statements to the press. that is, except Prof. He was cro examining a reporter.

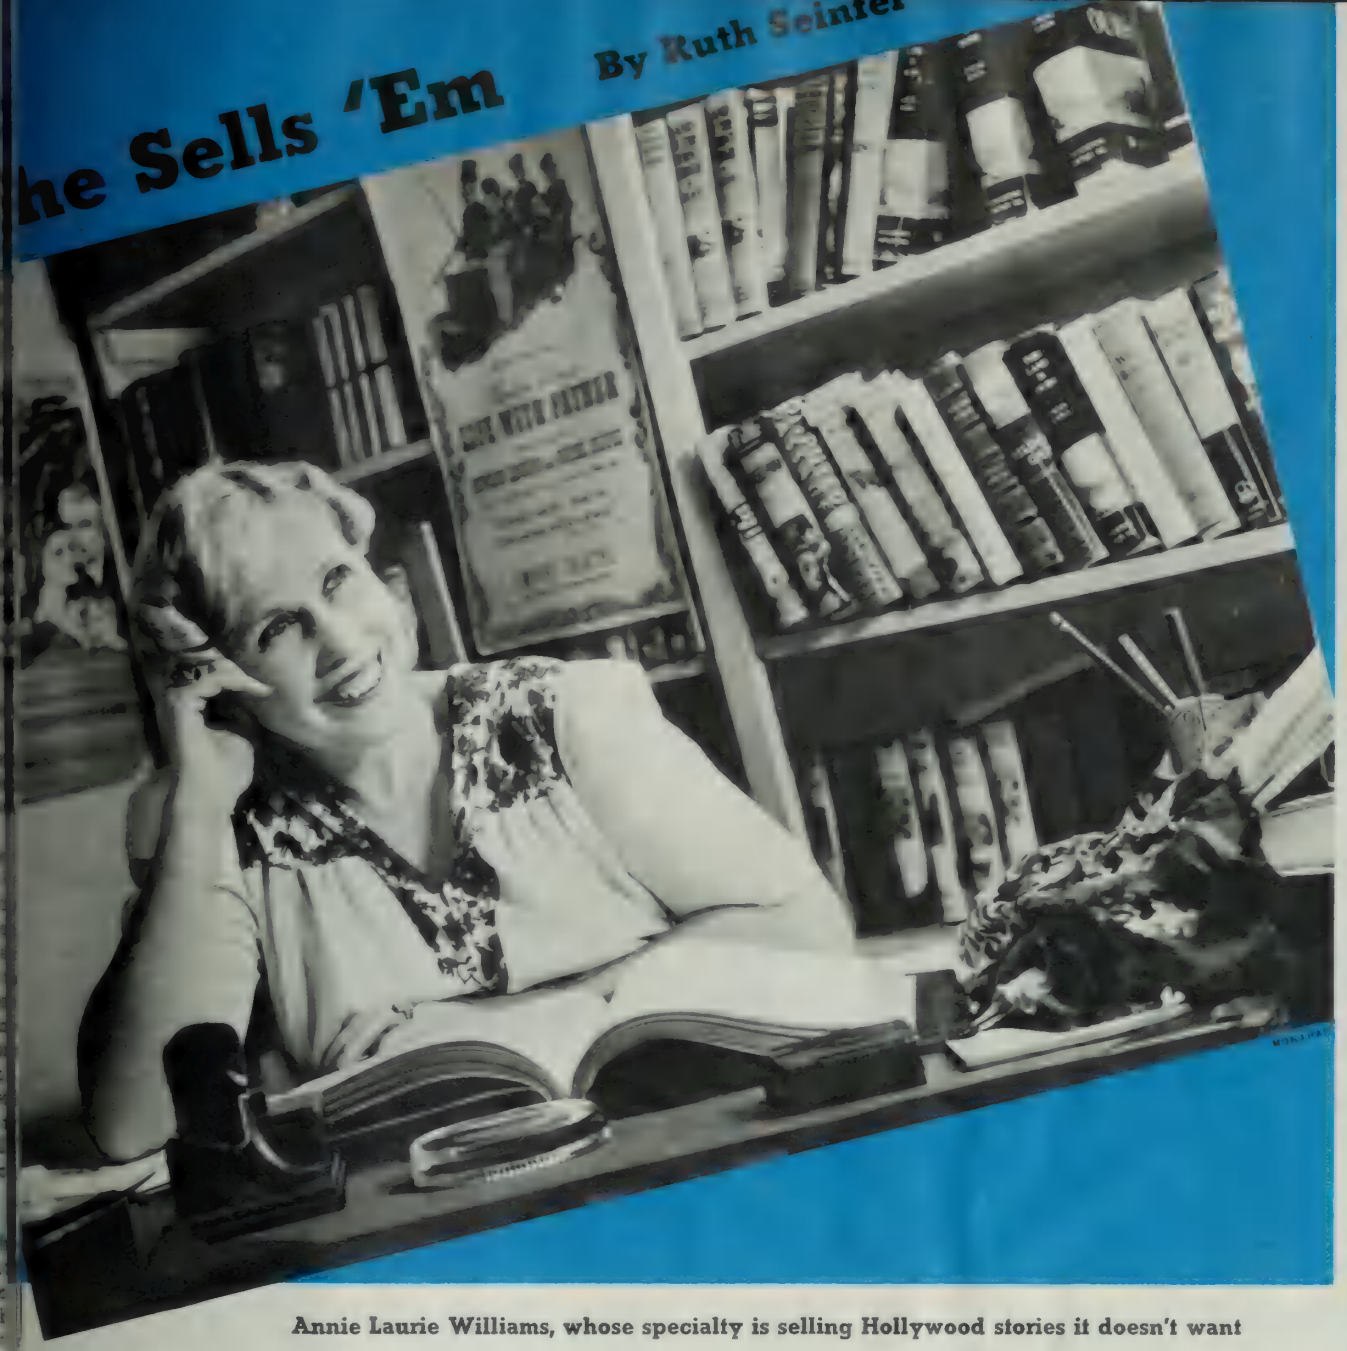
"Isn't this a rather large recept committee?" he asked coldly.

"It sure is," the man said happ "The minute we got the tip we bea down here. Brother, you'll make all front pages! It's a swell tie-in with y wedding!"

It appeared that the police, too, received a tip on the proceedings. desk sergeant said dryly that some da had called in and reported that at m night some very strange happeni could be observed at a certain hotel. they were really interested in the pu morals, she said, they would do wel look into the matter.

Prof whirled on Lovey. "I knew he cried. "This was your idea of fix me up with Vera! Well, you'll find it won't make any difference to her! and your muscle art!"

Lovey froze at that. "Muscle a she raged. "Listen here, Prof Bennett



A matron hustled her away to her The boys, still vainly protesting at indignity of being tossed into the clin Chicago, of all places, were led tow the men's tank.

Only Fats Harrison maintained philosophic view on the matter. "L

he Sells 'Em

By Ruth Seinfe

Annie Laurie Williams, whose specialty is selling Hollywood stories it doesn't want

'exas-born Annie Laurie Williams is the bridge be-ween the book you read nd the movie you see

WHEN Annie Laurie Williams was a kid in pigtails on her father's Texas ranch she used to dream, etween roundups, of how some day he would see her name in lights on roadway. It was a dream that failed distinguish her in any way from housands of other kids in pigtails. Vhat makes Annie Laurie different is he way in which her dream came true. She hasn't yet seen her name in lights n Broadway, and probably she never ill. But she has had the thrill of walk-g down Broadway and seeing on the-ter marquees the names of plays and lms that might never have got into ghts except for her.

Perhaps you happened to be walking own Broadway not so very long ago, hopping for an evening's entertain-ent. On one side of the street a daz-ing sign invited you to enjoy the film, f Mice and Men. Farther up electric-ght bulbs announced The Grapes of rath. Almost directly across the reet a couple of acres of incandescence eclared that Gone With the Wind was urveying crinoline romance in two heaters simultaneously. And down-own, in one of the legitimate theaters, ou came upon Life With Father with s box office sold out two months ahead and the treasurers inside peacefully counting up stacks of dollar bills.

Annie Laurie, it is true, did not write any of these nor produce, direct or act in them. In only one of their programs was her name mentioned at all—the legitimate theater still sentimentally clings to tradition and gives credit where credit is due. In the house program of the stage comedy Miss Williams is down, along with the business manager, press representative and other useful folk, as the producer's "Literary Representative."

Another name for her, the one usually mentioned at penthouse cocktail parties, is "author's representative." In a knock-down and drag-out business conference with contracts on the table, she is that thorn in a producer's side, the agent, who knows more about the author's rights than the author does himself. But in terms that you and I understand, she is a plain and simple saleswoman.

Among the numerous ten-percenters who have their offices just east of Broadway in New York, she has probably sold Hollywood more stories Hollywood didn't think it wanted than any other agent. She has a weakness for the hard ones, and she is the only one who is not surprised when they turn out well, which they do a remarkable number of times.

She tackled Alice Hobart's Oil for the Lamps of China when her friends in the business shook their heads over its thrusts at the big oil companies; you remember the film, with Pat O'Brien. Once she picked up a novel written by a preacher and printed by a modest Chicago publisher of religious books, and it became The Magnificent Obsession. With The Green Light and other successes. Lloyd Douglas has been one of her most solvent authors, and the movies are at present angling for his newest book, Invitation to Live. She has just sold John Steinbeck's The Red Pony to Lewis Milestone, and his Flight has been bought by Pare Lorenz. In addition to these, she has sold Paramount a book by a comparative unknown, Nelson Hayes, from which Dildo Cay is being made.

You Can't Budge Annie

But her greatest achievement was convincing Hollywood that a story about the Civil War and another story about migratory workers in California would make box-office successes as movies. Both these projects were regarded as highly improbable, to say the least. But, since Annie Laurie was promoting them, the picture people listened carefully. Picture people look upon Annie Laurie with affection and respect. The respect becomes positive awe when it comes to talking price. You can't budge Annie Laurie on price.

Thus primed, you meet the Texas girl with the sentimental name—and the meeting is guaranteed to startle you out of a year's growth. There she stands, not very tall, pleasingly plump, golden-haired and blue-eyed. She doesn't call you honey chile or you-all—she paid good money to dramatic coaches to have all that ironed out of her speech when she came to New York. But she is wearing her favorite color, baby blue, and a baby-blue bonnet to match is demurely tied under her rounded chin. In this innocent array she is on her way, like as not, to close a deal for a hundred grand and not a penny less.

You might jump to the conclusion that the baby-blue effect is put on with a purpose. But Broadway and Hollywood know well that Annie Laurie is no babe in the mazda-lighted woods. And you wouldn't catch her wasting time on a role that deceived no one.

No, she wears her pretties because she likes them, just as she likes vegetables and doesn't like meat. She hasn't tasted meat since the age of eight, when Papa insisted she try a mouthful of Texas longhorn. Papa said she wouldn't grow strong on just vegetables. To which Annie Laurie retorted that the herd bull out in the pasture didn't care for meat either, and he was doing all right.

Papa gave up after that, and he wasn't the last man to bow to Annie Laurie. One picture executive confessed that bucking her was like bucking a stone wall with rambler roses sweetly twining. Nor are the roses without thorns, he said. Twentieth Century-Fox—not his own company, naturally—could back him up on that.

Texans Never Surrender

The Zanuck outfit is said to have nursed pricked fingers for quite a while after Annie Laurie sold them The Grapes of Wrath. The trade had already warned her she would never sell Steinbeck's novel—a warning which is practically a guarantee of success to Annie Laurie by now—and that if she did sell it it would never be the story Steinbeck wrote. She fixed that by knocking $5,000 off the asking price of $75,000 in return for a clause giving the author supervision over the filming, and she also asked for Nunnally Johnson to write the screen play and John Ford to direct it, and got them.

The ink on Zanuck's signature was barely dry when she was back in the Fox office. There was an unpleasant rumor, she murmured, that Zanuck never meant to produce this film which had the California farmers already embattled. It was being said that the bank that pays Zanuck's bills would never permit the money to be used for such a picture. Could such a thing be true? she asked, opening her eyes wide. No, no, a thousand times no, vowed the Fox office. The story went into production.

Throughout the filming she carried on her campaign of gentle but relentless heckling. She carried every rumor back to home base—it wouldn't be released, it would be released but not in California, and so on and on. If Mr. Zanuck ever suffered the doubts ascribed to him by gossip—and there is no sworn evidence that he did—Annie Laurie wasn't taking any chances on his succumbing to them. Texans didn't surrender the Alamo, either.

The whispers were that the picture wouldn't be a box-office success, anyway. So Annie Laurie made a little trip to the coast and found out what she wanted to know about grosses, including California. She nods with secretive complacency now when the subject of box office is mentioned.

The stone-wall-with-rambler-roses aspect of her character is one reason for her success, no doubt. But she isn't particularly conscious of that part of it, herself. It just comes naturally to a Texan. She has two rules, however, which could be as useful in selling cars and vacuum cleaners as literary creations.

Number One is: Sell only what you believe in. Number Two: Be careful how you brag about your salesmanship.

(Continued on page 45)

Mendenhall Glacier, near Juneau, Alaska, like most Alaskan glaciers is a nearly stagnant ice sheet. It is over a mile wide and 1,000 feet deep. It is a hangover from the Glacial Epoch, in which ice spread over most of the Northern Hemisphere approximately a million years ago. Its rate of recession is now about 40 feet per year. About 10,000 years ago it was a tidal glacier, emptying into Gastineau Bay, which is now 3 miles away. Growth of trees at the foot of the glacier indicates its recession, with young trees nearest the ice and older ones farther back. Mendenhall is heavily crevassed, but its surface is free of glacial debris

Uncle Sam's Icebox

By Corey Ford and Alastair MacBain

The threatened invasion that Alaska fears most is a peaceful one. Well-meaning lawmakers want to colonize the territory with European refugees, and the Alaskans ask: "Who is going to feed them? Where are the jobs for them? Why raid the icebox?"

CHILKOOT SAM summed the whole thing up. He crumpled his copy of the Fairbanks News-Miner—it happened to contain a lengthy account of the proposed International Highway from The States to Alaska—and wadded it indignantly into a tight ball: "Highways! Farm colonies! Resettlement plans!" He stuffed the newspaper into the stove, and touched a match. "Trouble is," he grumbled, replacing the rusty stove lid with a bang, "people in The States got no more idea what Alaska's like than the back of their own neck. . . ."

It has taken the threat of a war with Japan to open our eyes to Alaska. After half a century of neglect—the late General Billy Mitchell warned that Alaska was "the Achilles' heel of American defense"—we have finally awakened to the danger that threatens this forgotten possession of ours in the Arctic, seventy miles from Russia and seven hundred from Japan. Day and night the Navy is rushing to complete new bases along the coast; the Army is constructing big airdromes and emergency landing fields in the interior; troops and planes are being sent north posthaste to augment Alaska's regular garrison of three hundred soldiers and one antique brass cannon, planted with geraniums. Today we are spending fifty million dollars to defend our most vulnerable territory, which experts say may be the springboard some day for an enemy invasion of our entire northwestern United States.

And yet, for all our sudden concern about Alaskan defense, not one American in a hundred could give a good description of the place to a policeman if he were ever lost. The popular conception of the territory, based on a hazy memory of grammar-school geographies, is of a land of perpetual ice and snow, populated by grinning Eskimos who live in geometrical igloos and hunt polar bears and walruses all night beneath the Midnight Sun. It is going on toward a century since we bought Alaska from Russia, and still the average American has only the vaguest idea of what we got for our money.

When Secretary Seward laid his $7,200,000 on the line, he acquired a vast Arctic empire some 600,000 square miles in area, one fifth the size of the whole United States. Alaska is a land so large that if it were superimposed on The States it would lap over into both the Atlantic and Pacific oceans, and extend from Mexico to Canada; so expansive that its coast line is actually several thousand miles longer than the coast line of the United States itself; so near that today, thanks to Pan American's new Alaska Clipper, you can dine in New York one night and in Juneau the next.

Despite the fact that almost a third of Alaska is north of the Arctic Circle, the bulk of it is very temperate. The southern panhandle enjoys a milder year-round climate than Oregon and Washington with a temperature rarely dropping to zero. Fairbanks, near the Circle, ranges in a year from summer readings of 100 degrees above, hotter than Chicago or New York, to winter temperatures as extreme as seventy degrees below. On the other hand, Alaska's northernmost settlement, Point Barrow, actually does not get as cold in winter as Butte, Montana. Incredible as it seems, the snowfall along the Arctic Ocean is not as heavy as that of Virginia.

Alaska has almost fabulous natural richness. In addition to fish and fur and timber and gold, its mineral resources include iron, oil, copper, tin, nickel, tungsten, zinc—most of the vital materials, as Tokyo is doubtless aware, to supply a nation at war. To date, the value of Alaska's exports has exceeded a billion and a quarter—a nice turnover on Mr. Seward's investment. And yet, for all its intrinsic wealth, it is still almost virgin territory; you fly from Whitehorse to Fairbanks, a distance of 560 miles, and you sight just one dwelling on the way. The entire population of Alaska, native and white, would not fill the Yale Bowl on a Saturday afternoon.

"Well," certain interests in Washington say promptly, "let's get some more people up there, quick. If Alaska can support seventy thousand, why not seventy million? Here's a territory as big as Finland and Sweden and Norway combined; it ought to have a population as big. Let's increase its residents, expand its industries, make use of its vast natural resources. Not only would public colonization of Alaska develop the country, but," they are always careful to add, "it is vital from the standpoint of defense."

You see, the word defense these days has become a sort of political armor. Just cross your fingers and holler "national emergency," and nobody will dare touch you. And so, using the convenient label of Alaskan Defense, private promoters and racial groups in Washington are taking advantage of our strained Far East relations to push forward a dozen pet schemes of their own—such projects as the King-Havenner Bill, for example, which would colonize Alaska overnight by admitting a million alien refugees from Europe, or the proposed International Highway from The States, which would throw Alaska open to all the itinerant Okies and Arkies without jobs at home.

How do Alaskans themselves feel about such plans? What do the businessmen of the territory think of those projects to develop Alaska by public colonization?

We talked with a lot of them this summer. We asked merchants in Fairbanks and Nome, traders along the Yukon and the Kuskokwim, trappers in the Kenai, commercial fishermen in Bristol Bay, storekeepers in Anchorage and Cordova and Juneau; and everywhere we heard the same answer: "The best way to develop Alaska is to let it

Matanuska Valley, above, is a good example of the difficulties of colonizing in Alaska. Founded in 1935 by the U. S. government and colonized by selected farmers, it is still far from being a success. Its produce cannot compete with that brought in by boat despite $8,000,000 in government subsidies. Of the original 146 farms only about 25 are actively operated, with many colonists working as laborers on the new Army air bases

Alaskans who know Alaska frown on colonization schemes like that of Joseph Hefter, center, former Austrian army officer shown here with some of the "tough young Jews" he is organizing in New York City as soldier-colonists

develop itself. Don't burden us with government farm colonies like Matanuska that will have no possible market for the stuff they raise. Don't mortgage our future by building an International Highway that will straddle us with a migrant population we can't possibly absorb.

"Don't unload a million aliens on us and upset our entire economic system, as well as create a fertile field for subversive activity that would threaten our very security in these troubled times. Alaska's future lies in a slow and normal growth from within. We'll develop naturally, prosperously, permanently, if they'll just give us time. Please, Mr. Ickes, leave Alaska alone."

As for defense, Chilkoot Sam was brief and to the point: "They say we ought to have as many people here as Finland and Sweden and Norway. They say it'll protect the country. Well, all I got to say," ramming another stick of wood into the stove, "look what happened to Finland and Sweden and Norway. . . ."

For, of all the popular misconceptions of Alaska, the most popular is this idea that the territory is a land of dreams come true, a paradise of milk and honey and slippered ease, an Eldorado where you can shoot moose and duck from your back porch and turn over solid-gold nuggets whenever you hoe your potatoes.

"In fact," says the Juneau Chamber of Commerce plaintively, "our most important problem in Alaska today is to find employment for some of the thousands of men and women who have been lured here from The States by just such publicity representing the territory as a land of easy wealth and ready for immediate settlement. Such publicity has been very harmful for them and for us."

Alaska Needs No Okies

The chambers of commerce in the territory, the businessmen, the residents want to develop Alaska, of course; but they know the dangers of planned colonization, the disastrous effect on the whole future of the territory should it ever become a mere public dumping ground. "We do not believe," warns the Juneau Chamber, "that any bona fide development can ever be accomplished by settlement of immigrants in advance of industry."

Already there is an unemployment problem in Alaska; there are more unskilled laborers in the territory right now than there are jobs; the situation will be worse as soon as the present air-base construction is finished.

"What will happen," Alaskans wonder, "if they build this International Highway and a whole migrant army starts arriving from The States in battered jaloppies, with mattresses tied on top and a sign on back: 'Alaska—AND Bust!' Who'll feed 'em when the cold weather sets in?"

Let's look at this much-ballyhooed highway a little closer for a moment. For some years one Donald MacDonald, a Fairbanks engineer, has constituted himself a sort of one-man lobby to boost this idea of building a 2,300-mile dirt road from The States to Alaska—five sixths of it over Canadian soil. The cost, he claims, would be only thirteen million dollars. Other and less enthusiastic Alaskan engineers disagree with this figure violently. They point out, for example, that the cost of a sin gle mile of road in the territory may ru as high as $50,000; that Mr. MacDon ald's highway would cross pretty diffi cult terrain; that trestles five miles lon might be needed to span some treacher ous glacial valleys. "The bridges alone, they told us, "would come to more tha his entire original estimate."

Recently, Washington sent forme Assistant Secretary of War Louis John son to make a tour of inspection of th proposed route; and as a result M Johnson reported to the President tha the cost of the highway would run to a least seventy-eight million dollars—si times Mr. MacDonald's figure, and ha again as much as the total current ap propriation for Alaskan defense.

Nor would the original cost alone b prohibitive. Landslides, spring freshet blizzards and ice would be perenni problems. Although the snowfall ov parts of the route is comparatively ligh drifts are so high elsewhere that th Richardson Highway (with which th proposed International Highway wou connect at Big Delta) can be kept ope only four months out of a year. Truck ing costs would be so steep that wat freight would automatically be chose Even the average tourist, contemplatin a vacation trip to Alaska, would thin twice before essaying a journey of 4,0 miles over a hazardous dirt road, wi gas running up to a dollar a gallon.

The Road Nobody Wants

Doubtless the whole project wou have died of natural causes and be dismissed long since as just another pr moter's pipe dream, had it not been f (cross your fingers) the war. Arm officials in Anchorage told us flatly th summer that such a highway from T States, open to traffic only a part of ea year but open the year round to possib sabotage, would come well down at t bottom of any list of defense requir ments. You can sink a boat witho destroying a waterway, they said, but single well-placed stick of dynam would put a mountain highway out commission for many months.

Even Canada, through which t lion's share of the highway would pa seemed curiously apathetic at the pro pect of receiving this handsome gi when we mentioned it in Ottawa th smiled and shrugged it off as a W Coast politicians' catnip mouse. T only military approval that we bea was voiced by the Air Corps, which to us that a number of much-needed em gency landing strips could be built intervals along its right of way; b they did not tell us why the same nu ber of emergency fields could not built without the highway, at a fracti of the cost.

Progressive businessmen in June have an alternate suggestion. "If mor is to be spent on Alaska roads," they urging Washington by letter and pe tion, "why not a good arterial system better highways in the interior, conne ing important settlements and milit bases not only with one another but w coastal ports?

"Why not a swap with Canada, off ing them a thirteen-mile right of w and dock site at Skagway, in excha for a right of way for ourselves from coastal port of Haines across Yuk Territory to the present Nebesna ext sion of the Richardson Highway? S a trunk line to Fairbanks, with its n work of connecting lines, would be m important to the territory than a do International Highways—and, with terminus in Alaska, we could deve our industries normally without hav our economic balance upset by a sud jobless migration from The States."

Not that Alaskans are inhospita

(Continued on page 40)

"Tobacco's my bread and butter," says Connor Aycock, tobacco warehouse owner of Durham, N. C.

"I have to know good leaf – that's why I smoke Luckies!"

LUCKIES pay the price to get the better tobaccos . . . tobaccos that are worth the money because they're *milder.*

Independent tobacco experts like Connor Aycock will tell you that in buying tobacco, as in buying most things—you get what you pay for.

Before the auctions open, Lucky Strike analyzes tobacco samples—finds out just where and how much of this finer, naturally milder leaf is going up for sale—then pays the price to get it.

That's worth remembering, especially if you're smoking more today. For the more you smoke, the more you want such a genuinely mild cigarette.

Among independent tobacco experts—auctioneers, buyers and warehousemen—Luckies are the 2 to 1 favorite. Next time, ask for Lucky Strike.

With men who know tobacco best—It's Luckies 2 to 1

Kid Tinsel

Continued from page 22

laughter frequent, her wit ready. She had them all laughing . . . all except Feets, who looked at her occasionally and shook his head as though he saw something that worried him.

Dinner ended. The men shoved back from the table and barged outside. In the twilight Pat could hear the clink of horseshoes as Eddie renewed the daily rivalry. She walked out on the veranda, unaware of Eddie's gaze as he looked after her.

He remained at the table for a while, then rose and started for the door. The veranda was empty when he reached it. The boys were having a fine time with their horseshoe-pitching. The evening was cool and pleasant. Somewhere from the back of the house came Feets' rich basso:

"Look down, look down
That lonesome road . . .
Befo' you travel on. . . ."

The mood of it seemed right. It sort of got under Eddie's skin: did things to him emotionally. His eyes quested into the distance and in the half-light of the woods he caught a glimpse of something moving. Something white moving slowly toward the river. Patricia's bravely gay little white dress.

He followed—not knowing why. The woods whispered to him and soothed him. In the gathering shadows they looked great and formidable, and Pat seemed infinitesimal. He walked faster . . . and found her standing by the river, looking down at the tranquil stream. Instinctively, he was gentle. He said, "What's the matter, kid?"

Pat dared not look at him. She dared not face his gentleness. She said, "Nothing. . . ."

"Don't give me that." Eddie was trying to snap her out of whatever was on her mind. "You've had the jitters for three days. Why?"

"Don't . . ." She choked the words back. She wanted to say, "Don't be nice to me, Eddie. I can't stand it." She forced herself to face him, compelled herself to smile. "You're crazy, Eddie," she said with simulated gaiety. "I'm not jittery. I'm not worried. I never felt better in my life. I'm happy and contented and . . ."

Suddenly her eyes filled with tears. She seemed tiny and helpless and utterly feminine at that moment. She didn't know that she swayed toward him, nor did she hear her own voice break as she said, "Oh, Eddie . . ."

In Eddie Gordon's eyes there was a light of uncertainty. Awkwardly he took one step toward her. Awkwardly he put his arms about her trembling body. And then her defenses crumbled completely. She clung to him . . . clung to him and sobbed.

"Eddie . . ." she said. "I—I need Pop so *terribly* much . . ."

For a moment he let her cry; unaware of the fact that he was holding her close against him; unaware of everything except that here was a girl who was hurt and frightened and utterly tired.

"Take it easy, kid," he counseled. "Take it easy. You're doing all right."

She pulled away a little and tried to control the quivering of her lips. "You couldn't understand, Eddie. It's being up here—alone, trying to do everything right . . . staying awake nights remembering how important it is . . . and every once in a while when things go wrong, I find myself thinking 'I'll ask Pop what to do . . .' and that's when I go to pieces."

Eddie was shaken. Here was a Pat he'd never seen before; a Pat he'd never suspected. He, too, felt all choked up inside. And so he put one big, powerful hand under her chin and compelled her to look up at him.

"Snap out of it!" he ordered in a voice which he thought was gruff. "Snap out of it, Pat." He groped for words with which to explain things. "You've got to," he pleaded. "This is the one thing in the world I'm not man enough to take."

JOE BARTON raged past the protesting secretary and shoved open the door of Max Ellison's private office. His hard young eyes bored into the kindly ones of the older man and he said sharply, "I want to talk to you."

Max ignored the metallic tone of the other's voice, and pointed with a pink finger to a chair next to the desk. "Sit down, Joe," he murmured. "Who put salt in your coffee this morning?"

Barton leaned across the desk and fired a question: "Where's Babs?"

"Don't *you* know?"

"Listen, Mr. Ellison—if I knew, would I be here asking you?" He made an angry gesture. "I've been getting the run-around for a week. Every time I call the house, they tell me she's out. Well, she ain't out all the time."

Max rubbed pudgy palms together. "It wasn't a run-around, Joe. Babs has been away."

"Where?"

"Some hotel in New Jersey called the Graymont. She's been there for a week."

"Graymont! That's right near Eddie Gordon's training camp."

"So I understand."

"Why the hell didn't somebody tell me that was there?"

"It didn't seem awful important, Joe."

"Important!" Barton said something very profane. "I'm gonna see that guy. I'm gonna talk to Babs . . ." He whirled and walked swiftly out of the room. Once on the street he called a taxi and gave the address of the garage where he kept his car. Twenty minutes later he was zigzagging through traffic, headed for the Holland Tunnel—and New Jersey. . . .

Meanwhile, at the training camp, Eddie had finished his daily grind and was seated on a bench under the trees. For ten minutes Feets Johnson hovered over him, suggesting that this was the right time for a rubdown and shower, but Eddie had sent him away so that he could devote his undivided attention to the girl at his side.

Babs was sitting very close to him. Her hand rested on his forearm, as though by accident and she said, "Every time I drift over, Eddie—the place looks prettier."

"Yeah. It's pretty enough."

Her eyes were intent. "I'm having a good time," she stated. "Even if I do look like poison ivy to some folks."

He glanced at her sharply. "What's eating on you?"

"It isn't me. I'm okay with myself. But your gal friend doesn't like me for little green apples."

"Pat?" He laughed shortly. "You're nuts."

"No, I'm not." Babs' hard, pretty little face was serious. "She thinks I'm bad for what ails you. She thinks I'm leading you down the primrose path."

"Primrose path!" Eddie was amused. "You!"

"She's been reading my mind," stat Miss Ellison. "I would if I could, y know."

"I don't know anything of the ki You talk a swell game, Babs—but think it's all breeze. If anybody mad pass at you, you'd jump over the t of that pine tree yonder."

"Try it," she invited. "I'm really a good jumper." She shook her he and smiled. "I'm asking you, Eddie am I better for you here or somewh else?"

"That's a goofy question."

"Not so screwy. We've been steppi out nights. You've been dancing at t Graymont four times in the last we That means late bedtime . . . bad little boys who want to fight. You meeting Grogan in exactly one week-

HE LOOKED at her steadily. ". right, Babs—you asked for it, a I'll hand it to you. Pat has been getti in my hair. She doesn't like you. what? I do. I take orders from l about my training. When I finish t daily grind, I'm my own boss."

"Spoken like a gent . . . or a foo Babs looked directly at him. "You're edge, Eddie. Maybe you don't know but you are."

"Everybody's on edge around he Snarling and growling—"

"You're doing your share."

"So I'm doing my share. I don't l being treated like a baby. I don't l someone watching every mouthful I e every step I take. I don't like Pat M lory telling me whether I can leave ca at night, or sitting up to see what ti I come in."

"I thought you and she were gett along pretty well."

"We did—for a while. I tried darnedest to be nice, and so did she but it didn't last."

"Why?"

"You know the answer to that one suppose she's all right in her own w and maybe I am too, but we simply do gee."

Babs said, "You're a dumb bun Eddie."

"Meaning what?"

"Nothing . . . Which brings us ba to where we came in. I have a hun that Miss Mallory is boiling inside a that the lid is going to blow off pre soon. When it does, what's my act? I scram—or stay?"

"You do whatever you prefer."

"Do you like having me around?"

"Sure I do." He smiled thinly. " a break . . . yeah, I like you around. Y aren't so bad."

She veiled her eyes so that he mi see neither the happiness nor the hur had caused. "Women aren't awfu popular with you, are they, Eddie?"

"I like 'em. When they act like males." He made a gesture of im tience. "I wish the fight was over. getting sick and tired of this gri Maybe I'm not in the best of shape. H could I be, with things eating on me l they're doing?" He took her arm a turned her so that she was looking him. "You stick where you are, Babs like having you around."

She asked, "Does that mean that y like me or that you are sore at Pat M lory?"

"Forget Pat. I don't pay any att tion to her, one way or the other. D that satisfy you?"

"It'll do," she said quietly. "U something better can be fixed up."

They looked up as a long, sleek c vertible ground to a stop just bey the entrance gate. A slim, wiry yo

A Metropolitan policyholder gets married.

There is a birth in the family of a policyholder.

A son begins to support himself.

When Circumstances Alter Cases

WHEN YOU BUY a life insurance policy, just as when you buy anything else, you want to spend your dollars in the wisest possible manner.

Metropolitan also wants you to do this. That is why agents are given continuous training in how to help you select the kind of life insurance that best fits your needs. Moreover, through the agent you have access to the counsel and advice of Home Office experts.

But the insurance program that fits your needs today may not fit your needs tomorrow. Changes in your income, or in your family obligations, make it advisable for you to review your life insurance program from time to time.

Suppose, for example, a policyholder gets married, or there is a birth in a policyholder's family. Each may call for a change of beneficiary in present policies, and perhaps the addition of new policies.

Or again, a policyholder gets an increase in salary. This may mean that he should expand his life insurance program.

Another policyholder's income may be reduced, due to unemployment, a business reversal, extended illness, or new and unexpected expenditures. In some cases, his insurance may be rearranged on a more modest basis. In other cases, it may be possible to help him keep his present insurance program by changing his premium payments to more convenient intervals.

Decreases in responsibilities sometimes suggest changes, too. Daughters marry, a beneficiary dies, a son begins to support himself, or an older policyholder decides to retire. In almost every case, it is advisable to review the manner in which the insurance money is to be paid.

These are only a few of the countless problems that develop in the families of Metropolitan's 29,000,000 policyholders.

As such problems arise, your Metropolitan agent is always ready to help you solve them, and to give you the benefit of special training and experience. In fact, Metropolitan maintains, at the Home Office, a number of departments especially equipped to assist the agent in keeping your insurance program fitted to your needs.

In just one of these departments, a group of experts is kept busy, day in and day out, considering more than 4,000 proposed changes each week in Ordinary policies alone. In another department, more than 4,200 proposals affecting Industrial policies are considered each week. Metropolitan makes more than 11,000 changes of beneficiary each week, and more than 75,000 so-called transfers, occasioned by changes of address and other causes.

These are only a few of the many types of changes which Metropolitan is called upon to consider. If you are a Metropolitan policyholder, we urge you to keep the Company informed of any changes which may arise in your insurance needs. It is especially important to inform the Company promptly of changes in your address, so that your Metropolitan agent may keep in touch with you and give you the benefit of his services.

For, as a Metropolitan policyholder, you are entitled at all times to the advice and help of your agent, without obligation.

A business promotion or salary increase.

An older policyholder decides to retire.

Metropolitan Life Insurance Company

(A MUTUAL COMPANY)

Frederick H. Ecker, CHAIRMAN OF THE BOARD

Leroy A. Lincoln, PRESIDENT

1 MADISON AVENUE, NEW YORK, N.Y.

So he's promised to love, honor... and throw away his flute!

1. I no sooner rented a room to this handsome young fellow than he turned out to be a flute player! About midnight he started tooting a big silver flute, and the other tenants started banging on the water pipes!

Copyright, 1940, General Foods Corp.

2. He had paid in advance, so I couldn't throw him out. But after two hours of torment, the other tenants served notice that it was him or them! So I made an effort to reason with this flute addict before calling the cops.

3. "Nobody can sleep!" I pointed out. "Neither can I!" he replied. "I drank coffee at dinner! I seldom touch it—it keeps me awake! But tonight I couldn't resist—so I can't sleep. Playing the flute quiets my nerves!"

4. "Drink Sanka Coffee!" I told him. "Delicious coffee... but it's 97% caffein-free and can't keep you awake!" "You're a pretty wakin, and I like you," he replied, "but I know that any coffee will keep *me* awake!"

5. "Try Sanka!" I said. "The Council on Foods of the American Medical Association says: 'Sanka Coffee is free from caffein effect and can be used when other coffee has been forbidden.'" "I *might* try it," he said, "for *you*."

6. We didn't hear the flute the next night. The following morning he came downstairs, crying: "It worked! I switched to Sanka and I slept fine." (P. S.—Now he's proposing to me! How you going to figure these flute players, anyway?)

SANKA COFFEE

REAL COFFEE...97% CAFFEIN-FREE...DRIP IT AND SLEEP

TUNE IN "WE, THE PEOPLE"... laughs, pathos, thrills, drama, as real people tell true experiences!—Tuesday evening—*Columbia* network—see your local paper for time and station.

man leaped out and strode into the grounds and Babs said, "This is all we needed . . ."

Joe Barton strode up to them and spoke to Babs without giving so much as a nod to Eddie.

"What's the idea of giving me the brush-off?" he asked furiously.

She looked up at him with infuriating indifference. She said, "Quite a dramatic entrance, Joe."

"I've taken all I'm gonna take. You fixed it so I wouldn't know where you were. I've been burning for a week . . ."

Eddie Gordon rose and looked down on the pallid face of the smaller man. He said quietly, "Why all the excitement, Joe?"

BARTON was too angry to be cautious. He snapped. "That's none of your damned business."

Eddie shrugged. "If you want to get nasty . . ."

Babs had risen, too, and there was disgust in her voice. "Don't pay any attention, Eddie. He's a runt with a big-man complex. Let's go."

But Eddie did not move away. He said, "Joe doesn't bother me. I simply can't figure where I get in on this."

Barton looked at Babs and then at Eddie. He was silent for a moment and then said surlily, "I'm sorry I popped off, Eddie."

The young fighter smiled. "Okay, Joe. Forget it."

Barton turned his attention once more to Babs. "I suppose," he said caustically, "that you've been helping Eddie train."

"I've done my best . . ."

A figure appeared from behind a hedge and moved forward. None of the trio noticed Pat Mallory until her quiet, pleasant voice broke in on the harshness of the scene. Pat said, "Hello. What goes on?"

Babs said, "The little fellow's been putting on a mad act."

"Lay off, Babs," growled Eddie. "That sort of stuff's not going to get you anywhere."

But Pat was not listening. She had moved into the circle and was gazing intently at the cold, angry face of the newcomer.

She said, "Aren't you Joe Barton?"

Barton looked up. A red light of warning flashed in his brain. He became cold, cautious, on guard. He said, "Yes."

Eddie glanced from Pat to Joe Barton and back to Pat again. "You two know each other?"

Pat smiled and nodded. "Slightly. Mr. Barton paid me a visit in Birmingham."

Barton said carefully, "I just happened to be driving through . . ."

But now Eddie was showing interest. He was staring at Barton as though trying to piece things together in his own mind. He asked, "When were you in Birmingham, Joe?"

Barton shrugged. "Hell—I don't remember."

Pat broke in. "I do," she said. "It was the day after Pop's funeral."

"Hmmm!" Eddie was still wrestling with an idea. "Maybe *that* explains it."

"Explains what?" asked Barton.

"This funny feeling I've had that I'd seen you somewhere. Maybe it was in Birmingham."

"That's nuts." Barton dared not look straight at the other man. He felt tight and cold inside. He said, "You didn't see me in Birmingham."

But Eddie wasn't convinced. "I'm not so sure about that, Joe. Somewhere in the back of my mind is a picture of you. I can't quite groove it. . . ."

"What difference does it make?" Barton turned away and spoke to Babs: "Can you spare me a half-hour?"

She said, "It all depends on whether you try to act like a sane person."

"I will. Come along."

They walked off together, and Pat sai to Eddie, "There's something about Bar ton that I don't like."

Eddie shrugged. "Just a terrier tryin to bark like a Great Dane."

"Maybe. But his eyes . . ." She trie to smile. "I didn't know I was steppin into something. I've been wanting t speak to you for a half-hour."

"What prevented?"

"I figured it wouldn't be awfully smar to break in on your scene with Mis Ellison. When Barton showed up—tha seemed to be my entrance cue."

Eddie was instantly on the defensive "What about Babs?"

"Nothing about her. But you shoul have gone in long ago for your rubdown Cooling off out here . . . that's not s good."

"I can take care of myself."

He turned abruptly and walked t ward the entrance gate, his fighting sho scuffing up little clouds of dust with eac step.

He stood leaning against the ancie stone pillar. Barton and Babs we climbing into Joe's car. And then, for moment, Eddie forgot Pat Mallory, fo got his own edginess, forgot the figh that was just one week away.

Once again a thought—a picture—w trying to force itself into his consciou ness. He had the feeling that he'd se that car somewhere. He couldn't pla it, but somehow . . . that car . . . Joe Ba ton . . .

The car whirled off in a cloud of du Babs turned to the young man at h side.

"Funny," she commented.

"What's funny?"

"The way Eddie Gordon was stari at your car. He seemed fascinated it."

But Joe Barton did not answer. I kept his hard, gray eyes focused on t road ahead.

Joe Barton was thinking. He w thinking, "Something's got to happen that guy—and soon."

IT WAS pleasant there in the hamm under the big oak. Pat relaxed phy cally and tried to relax mentally, but h efforts were only partially successful.

The hammock swayed gently and t day itself was gentle, but Pat's thoug were not. Nor, for that matter, w they coherent. They went off at cra angles, and they'd been doing that days . . . which was why she had te phoned Cliff Halliday and why she w alert to the sound of every passing m tor.

Feets Johnson appeared from the n of the house and hovered uncertai in the vicinity of the hammock. Th was genuine affection reflected in dark face as he looked down at Pa half-closed eyes. Once or twice he sho his head, and then he spoke in a vo scarcely above a whisper. He ask "Is you wakin' or sleepin', Miss Pa cia?"

She stirred, opened her eyes smiled. "I'm wide awake—and waitin

"Yassum. Fo' which?"

"Mr. Halliday is due here any m ute."

Feets smiled with approval. "H quality folks, Miss Patricia. He s nuff is."

She sat up straight and asked question he had known she would a "How's Eddie?"

Feets hesitated. "Not so good an' so bad," he stated doubtfully. "Ise k of worried, Miss Patricia. Mistuh Ed should be in real fust-class shape that fight—an' tha's somethin' he air

She said, "That's the very thing I w to discuss with Mr. Halliday."

"Yassum. He's the good-adviser gemmun I know."

"And you?" Pat made an effort

change the subject: "You aren't lookin' so fit yourself, Feets."

"No'm. What I got is misery."

"Why?"

"Me an' Magenta has acquired too dawggone much proximity."

"Was I wrong to hire her?"

"No'm, Miss Patricia, not if you was cravin' a good cook. But as a wife . . ." Feets' woebegone expression brought a smile to her lips. "An' somewhere she's been hearin' 'bout Marvel Geech which wuks fo' Miss Barbara. Magenta has been snoopin', an' when she snoops I git ready to flee."

Pat said, "But she *is* a grand cook . . ." A car whirled in from the road. "Here's Cliff," she said. "Be seeing you later, Feets."

"Yassum." Feets waved at Cliff Halliday and ambled off, his brain filled with acute personal problems.

CLIFF took both of Pat's hands in his and smiled down at her. "Not so good," he commented.

"Who's not?"

"You. You look peaky, Miss Mallory. Definitely on the nervous-strain side. Shall we sit together in the hammock or would that be too delightfully intimate?"

"We shall sit."

It *was* intimate. He was keenly aware of her body pressing against his. He said lightly, "You sent fo' me, an' I come a-runnin'. I diagnose an acute case of things on your mind. So, in my best highfalutin vernacular. Spill it, kid."

Pat hesitated. Then she met his eyes squarely and said, "Babs Ellison."

"I might have guessed. What's she been doing?"

"I wouldn't be knowing the whole answer to that one," Pat conceded. "But whatever it is, she's been playing hob with Eddie."

Cliff laughed, but without mirth. "Not so good—with Eddie stepping fifteen rounds for the title next week."

Pat said, "I've done my best. I've tried to be tactful. But there's an element in this thing . . ."

"What sort of an element?"

She spoke swiftly: "You know the answers, Cliff. You know how a fighter is—*any* good fighter—when he's training for an important fight. When he's just right, he's nervous. He can't help it. High-strung, jumpy—hard to handle. Well, Eddie's that way. Up to a certain point it's understandable, and I was all set for it. Only he's more so. Maybe Babs has a lot to do with it and maybe she hasn't. I think Yes. But whatever the cause, Eddie's taking it out on me and making my job twice as hard. He resents everything I do, and bites my head off every time I say anything."

"I see . . . and so we come back to where we started. Babs Ellison has been getting in your hair."

"Not *my* hair," she corrected. "In Eddie's."

"You wouldn't by any chance be jealous, would you?"

"Of course not." Her cheeks flushed. "That's a silly remark."

"Yeah . . ." He was looking straight at her. "I see it is."

She turned to him defensively. Her eyes were bright—too bright—and her words came fast: "I don't care what happens after this fight. But I want Eddie to win. I'll do anything in the world to help him win. And he's going to need everything he's got. He mustn't be upset. He mustn't be worried. He mustn't be . . ."

". . . under the spell of a siren. Is that what you're driving at?"

"Yes." Some of the tension left her eyes and a brief smile appeared. "Maybe I didn't really want your advice, after all, Cliff. What I *really* wanted was your endorsement."

"A cinch." He grinned at her and struck a pose. "To whom it may concern: This is to certify that I have tried Miss Patricia Mallory and found her satisfactory in every respect inclusive . . ."

Pat said, "Thanks for keeping it light, Cliff. So I will promptly change the tone. It isn't easy to diagram what Babs has been doing to Eddie. It doesn't even sound important. He goes dancing with her until one or two o'clock every morning—which wouldn't mean a thing under normal circumstances. But as matters are—it takes his edge off. Makes him nervous and irritable. He's not boxing well—and he can't see what he's doing to himself. So here's what I've decided to do unless you think it's a bad idea. I've made up my mind to bar Babs Ellison from the training camp."

Halliday said, "Wow! That's a hot one."

"You're telling me. It'll be lots of no fun, Cliff. If it's a dumb play—say so, and save me a nasty few hours."

He considered the matter and then nodded. "I'm afraid it's the only answer, Pat. Dixie Grogan is nobody's setup. So, with the blessing of Uncle Cliff, go strut your stuff. And may somebody have mercy on your soul."

"They won't." She was worried, uncertain, unhappy . . . and more than a trifle afraid. "Run on inside, Cliff. You've earned a shower."

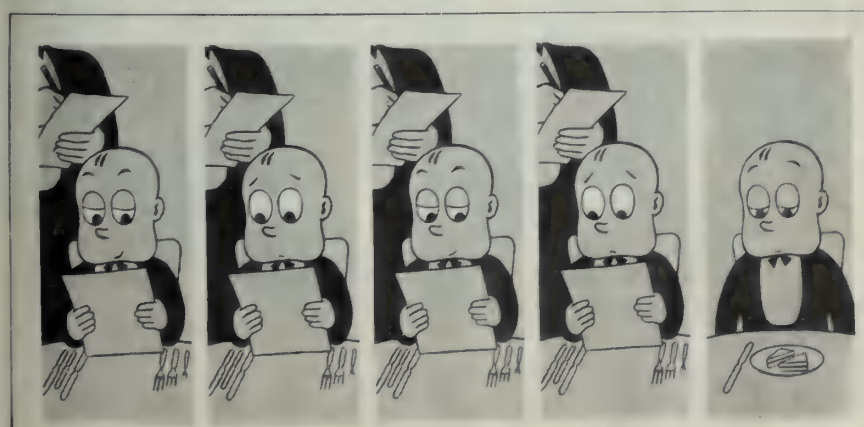
"What'll you be doing?"

"Training for Babs. She usually shows up about this time."

"Where's Eddie?"

"Went for a swim in the river. I'll waylay her before he gets back."

Cliff rose and looked down at her. "You're splendid, Miss Mallory—"



"—and mighty punch-drunk."

"I was about to offer to take this job off your hands."

"No-o." She shook her head. "It's one of those things, Cliff. All the coward in me yells for me to accept your offer. The common-sense side of Pat Mallory says No Soap."

"So that's the way it is." Cliff started toward the house. He looked back once and waved. "I'll be seein' you," he called. "With your shield or on it."

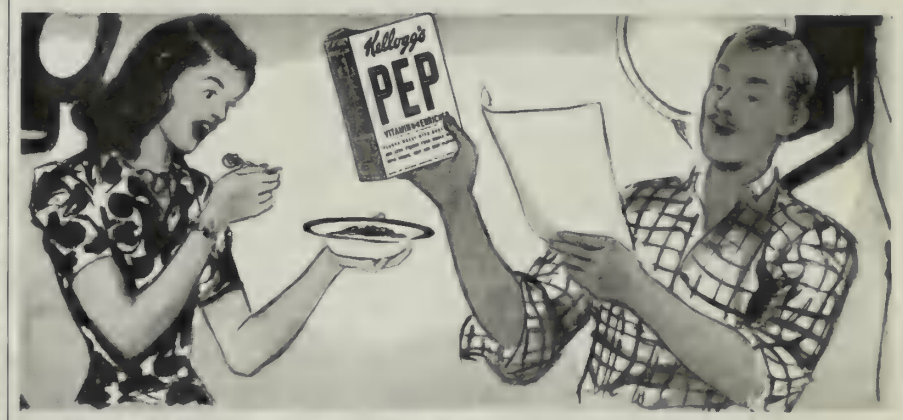
CROCKETT JOHNSON



How's your "Pep Appeal"? —by Bundy

The photographer: Say! You'll never do for a PEP ad. Where's that old "oomph"? You know—that *pep appeal!*

The photographer: There! There! It's nothing personal. Maybe you just haven't been *feeling* right lately. And—that reminds me. Why don't we *try* a little KELLOGG'S PEP?

The photographer: It says in the ad here: "None of us can have pep unless we get all our vitamins. And right in this crisp nut-sweet cereal—KELLOGG'S PEP—are extra-rich sources of two of the *most important* vitamins, B_1 and D."

The model: *Wait a minute!* This is the most delicious cereal I ever tasted.

The model: If getting started on vitamins can be *this* much fun, just watch me become the "pep appeal" girl of 1941!

The photographer: Hold it, baby, hold it! There's a picture that will really tell America what we want to say.

Vitamins for pep! Kellogg's Pep for vitamins!

Pep contains per serving: 4/5 to 1/5 the minimum daily need of vitamin B_1, according to age; 1/2 the daily need of vitamin D. For sources of other vitamins, see the Pep package.

This Way to
CALIFORNIA

the UNION PACIFIC Challenger

There's a three-way saving when you ride the Challenger between Chicago and California First, there's the saving on rail fare; second, a wholesome breakfast, luncheon and dinner served in the Challenger Diner cost a total of only ninety cents; third, the Challenger Sleeping Car berth charge is about half the charge for a Standard Pullman berth. In fact, you can even save the cost of a berth by riding in a modern Challenger Coach. Tilt-back seats, deeply cushioned, provide day and night comfort. Pillows are free.

There's a smart Lounge Car for Sleeping Car passengers . . . and Registered Nurse-Stewardess service is available to all passengers. The Challengers are in daily service between Chicago, Los Angeles and San Francisco.

Last Race

Continued from page 11

after a while, "that you'll have to go back to the dorm early?"

"Saturday," he said. "we run. Probably for the last time. I have to beat them, beat Louis Cobett, beat them all." He realized he was standing and that his head was just the least bit light.

"You know," she said, looking at him, "what you need is applause. You need it bad. Even if only once."

John looked at her, wanting to smile, but not quite able to. "Childish, isn't it?"

"I suppose it is," she said, "but some things we have to have before we can reject them. . . ."

"Don't go profound on me," he said. "I've never thought of you that way."

"You'd better get some sleep," she said. "I've heard of distance runners going punchy like fighters. I'm almost ready to believe it."

HANRAHAN worked them lightly on Wednesday, and Thursday not at all. Friday they went into Chicago.

John slept well, an unusual thing the night before a race. In the morning he felt better than ever in his life. Eating the usual breakfast steak, he refrained carefully from looking at the sports pages. A manager brought him a letter from Jane. It read:

"This is the last time to get that applause. And I'm hoping you get it today. If you like, I'll meet you after the race. JANE."

Something about the note annoyed him obscurely; set working in him the subtle ferment of irritation he had known all this week. He was old enough to know better, not to have to depend on applause for any happiness or wholeness. He was old enough for this, he realized, but he still needed the applause. This knowledge was in him, recognized but not admitted. Well, it was good of her to remind him of it. And he did want to see her after the meet; perhaps to see her for a long time afterward. . . .

A manager said Hanrahan wanted to see John.

"What for?"

"I wouldn't know. He's in his room—316."

Hanrahan was alone, pacing the floor. "What are you worried about?" John said. "You'd think you were going to do the work today." With the end so near, John could be flippant.

"Sit down." Hanrahan said. John deliberately sat in a chair with his back to the window.

"I was figuring," Hanrahan said. "Maybe we win this meet. But we got to have the mile."

"Then what are you worrying about?"

"This: You know what this Finn, this Leto, runs to win that big Coast meet. He runs 4:09.3. That's a full second better than Louis Cobett runs any time this year. And this Wishy Gordon when he wins the IC-4A in the East he runs 4:11. Hell, a 4:12 mile isn't anything any more. When I was running it was the record."

"It was pretty good when I was a boy, myself," John said.

Hanrahan didn't notice the crack. "Now, don't think for a minute," he went on, "that I don't think Louis can't beat these guys. I just want to be sure he does." Hanrahan was being very devious over something, John knew, and it was not Hanrahan's way.

"If I see any of them catching him in the stretch," John said, "I'll throw a block into them. Can't let good old Louis lose."

Finally, Hanrahan noticed. "You're in great shape, aren't you? What's bothering you?"

"Not a thing. Just on edge."

"I think I might have brought you down a little too fine," Hanrahan said. "I'm sorry, but I'm not sure you can stand a long drive starting on the backstretch—and all these guys are finishers. If I even thought you were sure of finishing in the first five, I wouldn't worry so much about Louis Cobett winning. If he even could get second and you fourth. But I don't figure that. I figure Louis has to win. You passed your edge."

"Glad to know it," John said. "Is that why you brought me to Chicago?"

"What I want you to do is this," Hanrahan said, taking a deep breath. "It'll help the school and you'll be remembered for it."

"The good old school," John said.

"What I'd like you to do is to go out this afternoon, and set a pace that'll kill Leto and Gordon off and anyone else that'll follow. Louis has never been a strong finisher. If we can kill these other birds off with a fast early pace, they'll come right back to Louis and he won't have any trouble with them in the stretch."

"Let our motto be, then: 'No trouble for Louis in the stretch,'" John said.

He saw that Hanrahan was uncomfortable. He thought of a lot of cracks he could make if he prolonged the conversation and how uncomfortable he could make Hanrahan feel. He thought, too, of how Hanrahan had gotten him a scholarship in a school where it was hard to get anyone but football players scholarships. . . .

John got up. His head felt light as it had a few days before. The anger kept coming up in him and he wouldn't let it out.

"Okay, Jiggs," he said. He was surprised at the softness in his voice. "I'll do it."

IN THE locker room beneath the concrete stands of Soldier Field, John took a long time dressing. People spoke to him as he went out but he didn't answer. He heard someone say they had an early lead and that both sprinters had qualified for the finals. That was the way Hanrahan had figured it. Hanrahan was a great coach; John had seen him figure a meet score to within a point. This thought gave him some consolation.

He warmed up on the grass along the backstretch. Between events, he swept once around the track to finish his warm-up. Moving smoothly down the homestretch, he felt good, felt the even flow of strength in his body. He could wonder briefly if Hanrahan were right about his having passed his peak. At the end of the homestretch, going into the turn again, he slowed down. Someone was calling his name. He looked up to see Jane in a box at the end of the stands with some people he didn't know. He didn't answer her wave, but turned away and went toward the dressing room. He couldn't go to her now; not now with the knowledge of what he had to do sick in him.

He lay on the slanted rubbing table and let a rubber work lightly on his calves. Then he lay on a bench, the heavy sweat clothes on him again and tried not to think. . . .

SOMEONE was calling: "First call for the mile. All starters on the track." John put on the new chamois pushers, the soft leather feeling good under the spiked shoes of kangaroo, mustard-yellow on the inside.

On the track, the great milers had begun to gather, champions or near-champions all of them. Wishy Gordon, a tall, rawboned man with a shock of red hair and the H of Harvard on his crimson jersey. Eddie Leto, a stocky blond Finn, his face homely and expressionless, his chest like a barrel. Geffing from Illinois, powerful and heavy, more like a boxer than a runner. And Louis Cobett, slender, arrogant, assured; split high and with square shoulders. Built more like a runner but lacking the powerful finish of the others.

When John looked at Cobett, he turned away. It was a small triumph and John felt better. They drew for

"'Should auld acquaintance be forgot . . .'" LAURENCE REYNOLDS

sition and John got second from the le, a lanky Texan on the pole. Leto the No. 3 position on John's right. The arter gave his instructions but no one ard him. . . . The tight ball of nerves at had been in their bellies all that y had now become unbearable. It as hard to breathe. They leaned forard. John and some of the others ouching in a sprinter's start. He had get out in front. . . .

OHN broke like a sprinter and was first at the turn. He moved easily, like animal or bird. On the backstretch, e smooth, gray track seemed to fly ckward under his reaching feet. Going to the far turn he risked a half-glance er his shoulder. He had fifteen yards the nearest runners, a bunch of three four jockeying for position as they oved into the turn.

John thought he'd maybe gone out too st and made the others suspicious. He sed off the pace a little coming into e homestretch of the first lap but he ard someone yell: "60 flat" as he assed the start. It had been a good st quarter, he thought.

They were at his heels as he turned to the backstretch. His strategy had orked in letting them come up to himlf. Once having reconciled himself doing this thing, he could lend all his ilities to it. Someone—the edge of hn's eyes thought it was Leto—came en with him, and then John piled on e pace again, not in an energy-taking sh, but smoothly, a mere lengthening the stride. He heard their breathing de as he leaned into the far turn.

That turn was the last part of the race go by without effort. Coming down e stretch of the second lap, John be- n to feel it in his lungs but his legs and ms were still fine. Someone yelled: :03" and he thought that anyhow they ould have something to remember him . Those that finished would know ey had followed one hell of a pace.

It began in the third quarter, always e tough one in a fast mile. You have consciousness that the race is nearly er, as you have on the fourth lap: nd the pain has begun. John gave em no rest. When the pace did acken, none of them knew it, not even hn. He could hear them, but none of em were coming up to challenge. The easure that gave him was a sardonic ne.

The lungs were better going into the r turn, but the pain had begun to me in his body, subtle at the joints, st a hint of it in the long muscles of g and arm.

They were coming down to the start gain for the end of the third quarter nd there was a note of agony in their eathing. None of them heard someone yell: "3:07" as John went past, least f all himself.

He had picked up the pace, whether r Louis Cobett to win, or for reasons ore obscure, he might never know. He ought one more time that he was oing to pull their corks for them, to reak their hearts. He could do it to e middle of the backstretch and then e knew he'd be finished and Louis uld have his race.

It was bad as he turned into the backtretch. There was a slaver of foam on is lower lip. His throat was raw, his ungs touched with a rhythmic fire. Curiously, the pain that was coming in is legs held off from his arms.

Whether he had slowed down purposely or not, he didn't know. But he eard, finally, the sound of feet overaking him, one man's feet, others following it. It had to be Louis Cobett, John knew. He, John, had set the perect pace for Cobett to win the race: breaking the hearts of the others so that hey couldn't sprint, letting Cobett with his long stride come up at the end, moving smoothly while the others floundered back to him.

John kept his bargain all the way. He even swung wide, so that Cobett wouldn't have to go around him to pass. . . . They were almost to the turn when the feet caught him . . . and they weren't Cobett's. It was Leto on the inside, his face a contorted mask, his form flawless, though; and Wishy Gordon was passing on the outside, his form sloppy as ever, but his great power bringing him up and along.

Now the anger in John was solid and choking. To give all that you had to give and then to have the person you gave it for fail to come through. He thought, too, a little of Hanrahan and the championship Hanrahan wanted—Hanrahan whose whole life had been given to the game . . . and somehow Leto had not passed John . . . and the three of them, Leto and John and Gordon, were coming into the far turn like a team.

Then, just before they hit the turn, Wishy Gordon broke. John heard a curse choke in the big man's throat. Leto had the pole but John couldn't drop back to save ground. He was afraid that if he eased off even a little he could never come up again.

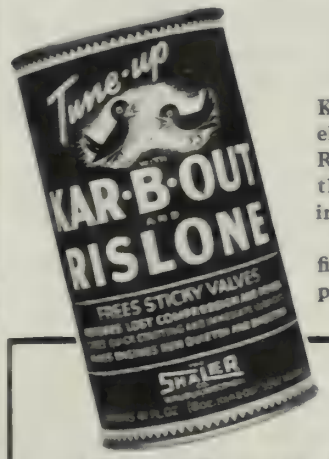
The anger was in him and he wanted to win. He lost only a yard on the turn and then they were in the homestretch and arms, legs and lungs were a long pain. It seemed to him that his arms and not his legs pulled him up to Leto . . . but he couldn't pass the little man. Something that might have been his consciousness was slipping away from John Morgan but anger bore him on. He could hear the sound of their feet coming behind him and he sensed, because he could not see, Leto at his side.

The thing he had promised to do for Hanrahan, and the long memory of the defeats . . . made the anger a rage. He leaned forward, so that his head wouldn't come up, so that he could get all the pull of his arms. In the mist gathering at the edges of his sight he could see only the thin, white tape. That the last ten yards were a long stumble none of them knew, but as he fell, John Morgan knew only that the thinness of the tape across his chest had been taut and not slack. . . . And lying on the cinders he felt the weight of one body fall across his legs and the sound of others dropping near him.

THEY were picking him up and the tide of sound was almost tangible. They wanted to walk him, as for centuries now they had walked runners after a hard race. On rubber legs John braced himself slowly and fought them until finally they turned him toward the stand and held him up, facing the stands. And John stood there and listened to them yell. . . . It came down on him like rain, and what rain would have been to his body right then, the sound was to his spirit . . . so that he was a little frightened and could wonder, looking into a future that had once been possible, that the lack of this thing could have been so important. It had not perhaps been a good thing for that need to have become so important; but anyway the need was taken care of now. . . .

Finally, John could hear Hanrahan, near him but until now unnoticed. "If this was the way it had to be," Hanrahan was saying, "I'm glad it was you."

John nodded, not looking at Hanrahan. He would see Jiggs later and there would be some kidding. . . .



Right now, now that he could walk again, there was someone else to see. Now, in this moment. He moved free of the managers holding him and, alone and slowly, the applause still around him like a kind of glory, moved toward the end box.

• A pleasant evening spoiled . . . everyone else gone and YOUR *car won't start*. Instead of getting home at twelve o'clock you have the problem of looking vainly for help. Temperature still dropping . . . what a night.

Winter Starting Trouble Easily Avoided

If you had taken the Shaler "Preventive Service" Treatment, this couldn't happen *to you* . . . Thousands and thousands more motorists every year prepare for winter driving this way and avoid difficult starting, and run-down batteries.

Get a Shaler Karbout and Rislone Winter "Tune-up"

Karbout gives your motor a quick clean-out, eliminates carbon and gum formations . . . and Rislone then added to the crankcase oil *keeps* the engine clean, and the *oil free-flowing* even in sub-zero weather.

"Sticky" lagging valves are "freed" to close firmly, resulting in restored compression and power. Because the oil remains free-flowing, you can start quickly, save wear on batteries and starting motors, and get full lubrication of all engine parts immediately . . . so vital in winter. Don't take a chance on a stalled car tonight . . . Your car dealer, service station or garage will give you a Karbout and Rislone Motor Clean-out and Tune-up without laying up your car.

Look for the Shaler name on the Karbout-Rislone Can. Shaler products are distributed by good dealers in every state in the U.S.A.

A Winter "Tune-up" with Karbout and Rislone NOW will

- **Make starting easy always**
- **Save delays**
- **Save batteries and strains on starting motor**
- **Save your motor by insuring full lubrication**
- **Increase acceleration**
- **Prolong the life of all moving parts**

KARBOUT and RISLONE are the only products of their kind having car factory and engine builder acceptance and approval.

Made by the makers of world-famous Shaler "Hot Patches"—the Safest Tube Repairs Known. Write for Shaler Winter Preventive Service Booklet, "Engine Performance"... THE SHALER COMPANY, Waupun, Wisconsin. In Canada, the Canadian Shaler Products Company, Ltd., Toronto, Ontario.

KARBOUT AND RISLONE

The Fabulous Rubio

Continued from page 14

"What about the boxes of junk?" I said.

"They're all right," he said. He was out of breath and panting hard. "They're down at the hall."

"How—?" I began, but he cut me short impatiently.

"Never mind the boxes now. Go down to the railroad station and catch Abner when he gets off the train. I don't want him to see any of the actors and talk until the tryout's over. Get going or you will miss him!"

He shoved me out into the bright sunshine and I rushed down to the depot. I was there in time when the train came in but I didn't see Abner. Men kept piling out for the convention and the broker could have slipped past me in that mob even though I hunted for him carefully. I waited on as the station grew empty and I hoped Rubio had him at the hall, but ten minutes later Rubio himself came up.

"He didn't come?"

"No!" I said. "Holy smoke!"

Rubio stood there thinking, a blank look on his face, and for the first time it occurred to me that maybe Abner hadn't meant to come at all. Maybe this had just been his way of getting rid of us. I said as much to Rubio. "No use waiting any more," I said.

"No," he said, still refusing to give up. "Let's go back to the hotel and see what's happening there."

But as we walked back through the crowds, I noticed that the old bounce had gone out of him. He was down to earth.

Two or three blocks from the hotel, he suddenly stopped.

"All right," he said. "I told my lies. I put up my wacky front. Now what? What the devil did I want to go and do all those dopey things for anyway?" He was talking to himself, not to me.

"This is a fine time to wake up," I said.

"No," he said and began to get really unhappy. "It was one thing when I was a kid but I'm not a kid any more. It's not funny or cute. It's not harmless."

"This is a fine time!" I said.

"I never stopped to think. I just—"

HE DIDN'T finish. I looked up and saw Mary standing there, her suitcase in her hand.

"What?" Rubio said, but it took one glance to see that it was all over now. She had tears in her eyes.

"You and your lies," she said. "So J. J. Abner wants you to head his bill. You have a company of your own. You're booked solid for eighteen weeks, six months, a year!" She paused. "Abner took an earlier train," she said. She blurted it all out now. "It didn't work out the way you thought, you see. He didn't find you at the hall, so he came up to the hotel to look for you. He told us everything. He's wiring a Philadelphia combination to come down tonight. He told everybody to go home!"

Rubio's skinny body seemed to droop. He didn't speak. Far off, I heard the sirens of fire engines and I wondered for a moment what the convention boys had done now.

"I ought to go back to the hotel," Rubio said dully. "You were right in everything you ever said about me, Mary. I ought to go back and take what's coming to me—"

"You go back there," she broke in, "and you'll get killed. I'd have been gone long ago but I wanted to find you and warn you. Don't try to put on another act with them. You won't fool them this time."

"No, no," he said. He was miserable. "It's no act now. I'm not acting any more . . ."

He stopped. The smell of smoke had become thick. Men were rushing past us and when we looked up the street, we saw it was the Hotel Martinack that was on fire. Rubio shook himself wide awake. His eyes opened big. He was alert, quick, bubbling all over again.

"I've got to get up there!" he cried and he started running even as he spoke. "Mary, I've got to!"

Helplessly, she watched him go, unwilling to let herself be taken in by him again. "He's faking again," she said. "I know him. It's just another act."

"Sure," I said, "but there's no telling what he'll do." Somebody had to look after him and when I started up the street, Mary, of course, was alongside of me.

AT THE hotel the sidewalks were packed with people watching the fire. We went around looking for Rubio until we heard him arguing fiercely with the cop in the center of the line. It was right in front of the hotel entrance and that idiot was trying to go in. Frisbee was there too. The cop held Rubio off with one hand and at the same time had to struggle with the hotel man. Frisbee was crying about Henriette. Tears rolled down his cheeks. The dog was trapped inside the building and was going to be burned to death.

"That's just it," Rubio begged the cop. "See, I can get the dog out—"

"Get out!" the policeman shouted. "You're out of your head. That dog's locked up in the cellar, and Frisbee couldn't find the key."

"But I can open that lock! I can do it. I'm the only one who can get inside that door!"

I felt like bawling as I heard him. It was the old Rubio, full of himself, eager and sure, willing to try anything just to make a sensation.

"You fool!" Mary yelled.

He had torn away from her and dodged past the cop and now he went running for the hotel entrance. "Wait," Mary wept. "This is no stage lock. It's a real door, not a prop. You're not a magician now!" The crowd let out a heavy roar when they saw him go up the lawn by himself, his black cape flying out behind him. Two firemen came racing to cut him off, but he sprinted and reached the door ahead of them. He plunged inside and the crowd grew hushed.

"Oh, the poor little nut," the cop near us said. He spoke in a whisper. He couldn't understand it. "There's smoke in there to poison him. He'll be a goner before he works on that lock five minutes."

Mary was crying brokenheartedly. That had always been the trouble with Rubio. He told lies but no matter how wild or ridiculous they were, both of us knew he had always been the first to believe them. When he went into the building, we knew he actually believed that he could open the door, hopeless as it seemed.

I kept staring at the hotel entrance as though that might be enough to pull him out. And then a sharp, shrill cry went up. It was unbelievable. We saw Henriette come bouncing through the smoke and flames, looking almost indignant as she trotted across the lawn into Frisbee's arms. A few moments later Rubio himself came out, choking and blinded, and everybody was too excited to do anything but yell his head off.

I couldn't figure it out, but Mary didn't stop to wonder about it. As she saw men beginning to cluster around Rubio, a cold wave of rage seemed to go through her.

"I don't care what he did or how he did it," she said grimly. "All I know is that he pulled another one of his stunts and managed to get away with it. I'm through with him forever."

"Now, wait a while," I said, but even as Rubio tried to get away from the crowd to her, she turned and hurried down the street again.

I pried Rubio loose, and we reached the bus station just as she was ready to buy her ticket for New York.

"Oh, go away from me," she cried. "You're no marvel to me. You're no brave hero. You're just a faker, a liar and you'll never change."

"No, Mary, believe me," he began but she wouldn't listen to him.

"You'll say anything. You'll do anything. There's something in you that's always pushing you on. You'll ever run into a burning building and risk your life just to give them something to talk about . . ."

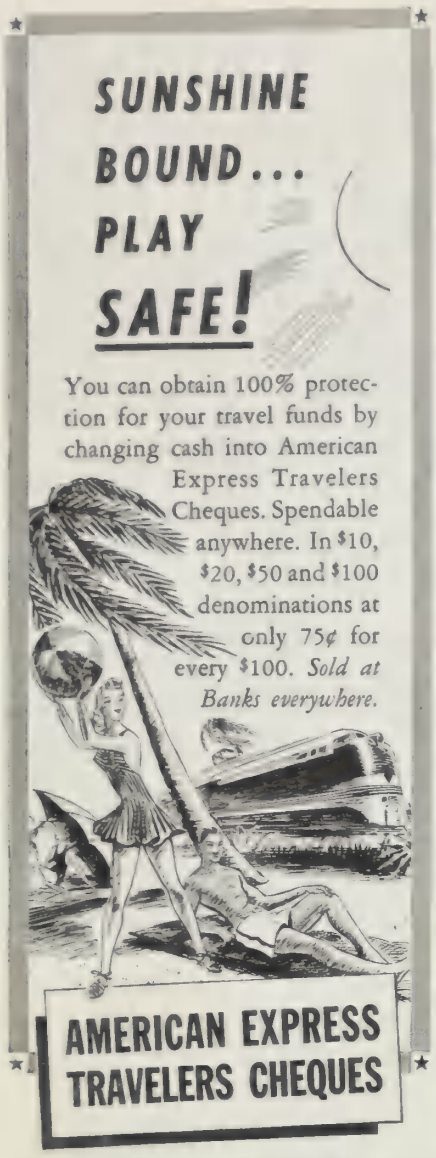
"No, I didn't do it for that." He forced her to listen. "You're right. I've told lies. I was crazy. But this was no fake. This was real."

He told her about the chests of prop down in the cellar, and I began to understand then how he had worked the lock.

"I went down early this morning to get the stuff out," he said. "Frisbee was too upset to know what was happening, but that dog went after me and kept following me from the minute I swiped the keys off the desk. I had a cab driver all ready and waiting at the service entrance in the back, and the only way I could get those boxes to him was to lock the dog up in the storeroom. I still had the key. Mary, I had to go back into the hotel and get her out. It's about the only decent, honest thing I've done in months. I—"

HE HAD to stop. J. J. Abner had finally come up, wheezing hard, and was pulling on his sleeve.

"All right," Rubio said. "I'll go with you. I'll face them. You can do anything you want with me."



"Do?" the broker gasped. "I'll do everything in the book for you. I'll sew you out for a half year's solid booking. They'll all want you—every theater, night spot, club and hotel . . .". Rubio looked at him while he struggled to get his breath. "Everybody in town's talking about you. It's going out on the A. P. wire. You'll be plastered on the front page!"

"What?" Rubio said. "Hey, listen, what is this?"

"Just think of it!" Abner cried, carried away by the wonder of it. "It's a physical impossibility and yet hundreds of real people witnessed it. A real magician, a genuine escape artist, a guy who runs into a burning building, gets through a bona fide door with a bona fide lock on it and saves a dog—man, what a sensation!"

Rubio looked dazed. His eyes were wide and blank. He couldn't believe this was happening to him. I think it was the first time in his life he had trouble believing anything about himself, but when he looked at Mary and saw her happy smile, his own dark putty face creased into a broad, joyful grin. It was true. I was smiling too. The only one of us who wasn't was J. J. Abner. He looked helpless.

"Confidentially," the broker said, "between you and me, Rubio, did you really do it? Can you actually get through locked doors?"

lof," he said reprovingly, "you oughtta
l proud a little lady like Lovey thought
ough of you to get tossed in the can
th us. You never heard of Lovey La
arr being arrested for anybody else,
d you?"

"What's that got to do with it?" Prof
manded bitterly. "Just when—"

"Pipe down," said the turnkey.

They had halted before the last tank.
e dimmed lights revealed a number
shadowy figures already occupying
e cell. "Just some Communists," the
ler said cheerfully. "They were stag-
g demonstrations all over town to-
ght. Hope you don't catch any lice,
ys."

The door slammed behind them. The
ures in the cell stirred and one of
em, a slender, tousle-haired party,
ddenly stepped forward, peering at
lof. Then he seized his hand and
ung it with violent enthusiasm. "So
ey got you, too!" he cried. "Welcome,
mrade!"

Prof stared at him. Then, slowly
rdling inside, he saw that it was that
minent thinker, Igor, who was wringing
hand. Other comrades were pressing
around him, warmly congratulating
n on his martyrdom for the cause.
ere were three members of his new
on combo and most of the others were
ominent in the Musicians Cultural
ague. All of them were among Vera's
arest friends and master thinkers.

Mr. Bennett's colleagues had also
cognized their cellmates. "So?"
osty began indignantly and then Fats
g a warning thumb in his ribs. He had
ticed the mist that was creeping over
lof's glasses.

"Listen, Igor," Prof said coldly, "I
nt you to understand—"

Igor was still pumping his hand.
"Nothing will please Vera more!" he
bbled. "There were times when she
rried whether you would make the
rifices the party requires. Congratu-
lions, Comrade!"

Prof was suddenly numb from the
s down. This was the final blow. On
wedding eve he was not only jailed
t had to learn that his betrothed was
other of the revolt-and-rule trade.
ra, whom he had so often told exactly
at he thought of the Reds. . . .

A pale youth was saying eagerly,
"What demonstration were you in? We
re passing out our pamphlets when
me rowdies came along and—"

By then Mr. Bennett was slowly com-
g out of the fog. "It seems I have
ade a slight mistake here and there,"
said. "I think I had better make a few
ngs clear to these parties."

"Let me!" Frosty Moore said eagerly.
Bistling, he turned on the assembled
mrades. "*We*," he announced, "got
ched for having a little jam session
th a lady dancer. Don't count us in
that Moscow stuff!"

"That's right!" said Prof, his glasses
mpletely steamed up. "You and that
pony uplift stuff!" His voice was rising
w. "And, comes the revolution, Igor,
let you in on a secret: I want you
mine!"

Igor recoiled. "Reactionary!" he
issed.

"Vulgarians!" said the pale youth.
"ories!"

THERE was a capacity house when the
defendants appeared for their hearing
the morning. Outsized matrons whose
petites had been whetted by the news-
per accounts struggled for seats with
val jitterbugs who were there to see
at justice was done. Only Miss Vera
ock was conspicuously absent. She had coldly informed the press that the wedding would take place as soon as Prof was released on bail.

Lovey was already before the bar when her codefendants were led into court. When Prof had caught onto the lyrics the night before, she had known, once and for all, that she had dropped the decision. But even in defeat her profile was as haughty as ever.

She gave Mr. Bennett one cold look and then her face whitened. Prof's hand was bandaged and there was a cut on his nose. All the boys were taped here and there and Mr. Frosty Moore was peeping at His Honor through a magnificent shiner.

The judge, a large, white-haired man, held a whispered consultation with the bailiff as the charges were read off. His face was so grim that the most optimistic buffs were convinced that their idols would be very fortunate to get off with anything less than ninety days.

"Why, this is outrageous!" said His Honor. "I have never heard of such things taking place in Cook County!"

The boys glanced helplessly at Prof, whom they had agreed upon as their legal mind. Mr. Bennett was no help whatsoever. He had passed a very bad night and this morning could think of nothing but Lovey. Too late had he found out she was right all around. Now there was nothing they could do but go to jail together.

"Speak up, Prof!" Frosty implored. "Don't just stand there!"

It was evident, however, that the judge was not yet finished. He had, it seemed, just been informed of certain incidents that had transpired in their cell last night. There were no words to express his horror, his shock. The boys grew more and more upset, visualizing themselves giving out in striped uniforms.

THE judge's bushy brows were contracted. "To learn," he thundered, "that you poor boys were set upon by Communists is not only outrageous but terrifying!" The poor boys stared at one another and the judge prompted them gruffly: "You *were* set upon, weren't you? Outnumbered and attacked from all sides?"

Lovey's eyes widened at this startling information and, for that matter, so did the defendants'. There was a murmur in the court, and the bailiff rapped sharply for order. Only Prof was equal to the emergency.

"That's right, Your Honor," he said. "They sprang at us from behind."

The judge shook his head. "Just as I surmised," he said darkly. He was looking at Mr. Harrison's taped forehead. "What did they do to you?"

Fats was no fool. "Me?" he said. "I was lying on the floor when one of them kicked me. When I rolled over, he kicked me again. Hard."

"To have this happen to American citizens is horrifying!" said the judge. "I cannot believe—"

Mr. Frosty Moore sought to reassure him. "It's all right, Your Honor," he said. "They had to take *them* to the receiving hospital!"

The judge coughed hurriedly, ignoring Mr. Moore's contribution. He was there, he said, only to see that justice was rendered. That was the sole purpose of the courts.

The young lady standing before him, he said, had already been punished by some most unfortunate publicity.

He looked down into their eager faces. "I have little choice left to me," he said gravely. "Under the circumstances, I feel that all of you have already suffered enough. I have no alternative but to dismiss the charges!"

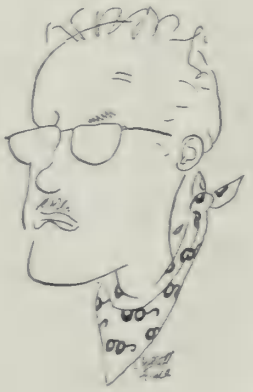
There was a wild burst of applause. Impromptu rug-cutting immediately broke out in the aisles.

The law was still striving to cope with it as the joyous defendants clustered around Prof and Lovey. She was staring at him.

"Communists?" she said faintly. "Communists, Prof?"

"We met up with some of Vera's chums from the uplift circles," he said gravely. There was a look in his eyes that hurriedly brought the color to her face. "And—and, Lovey, I found out I was wrong in more ways than one. I was thinking that after I got my old band back together I could use a bubble dancer in the act."

Her lip quivered. "It's too late now, Prof," she said brokenly. "After all this publicity I could never face a public again. I—I'm going to retire."



Mr. Bennett showed then that a deep thinker is always quick on the uptake. He stared at her, suddenly took her in his arms and kissed her, then turned and sped up the aisle. Frosty Moore stared after him.

"Where's he going?" he demanded.

"Offhand," said Mr. Fats Harrison, "I would say he is about to call a certain lady cello and tell her that she would do well to find herself a new bridegroom. It seems he has other plans."

FUNNY-BUSINESS MEN

Self-Portraits of Collier's Cartoonists
No. 20

When he was a year old Garrett Price and family left Kansas City, Kansas, to travel between western trading posts where Dr. Price doctored mangled cowboys until Garrett was old enough to attend the University of Wyoming. After two years of college our subject headed for Chicago, attended the Art Institute, worked on the Tribune and eventually reached New York where he now turns out cartoons (see page 40) and advertising illustrations. His sketching trips to Alaska, Europe and Mexico have been extremely unenjoyable, he says, but he likes to talk about them. Headquarters: Mystic, Conn.

Modern air-conditioned New York Central trains make travel comfortable, safe and certain, regardless of weather. Make your plans with confidence . . . you can *depend* on New York Central to get you there in comfort and economy. The smooth Water Level Route is open 365 days a year.

You'll enjoy the luxury of leisure in the spacious club cars. Take your choice of comfortable accommodations—from roomy reclining chairs in de luxe coaches, to luxurious Pullman drawing rooms. There's a modern New York Central train to suit your plans, time, and budget.

The Water Level Route... You Can Sleep

Uncle Sam's Icebox

Continued from page 30

Their vigorous opposition to bringing an army of indigents into the territory, whether European refugees or homeless wanderers from our own stricken dust bowls, is not because they fail to sympathize with these unfortunates; it is because they know it would be safer and cheaper, as well as kinder to the refugees themselves, to care for them in a less severe and exacting country.

For Alaska is tough; you have to be tough to make the grade up there. The average Alaskan you meet is an individual, self-sufficient, independent, proud; he made it the hard way and he made it without help. He is one out of a thousand who tried to stick it out—the final color remaining at the bottom of the pan after the dirt is washed away. No wonder that he looks askance at governmental economic planning, at subsidized farm colonies like the painful experiment at Matanuska. No wonder that he shudders at the current suggestion of wasting more millions in a similar effort to colonize the Kenai Peninsula and the whole Tanana Valley.

You have heard of these Matanuska colonists, of course. Five years ago, you remember, they set forth to settle in America's last frontier, amid bands playing "Oh, Susannah" and overwrought references in the daily press to covered wagons and the pioneer spirit of our forefathers. Well, today these same hardy pioneers are into an indulgent government for some eight million dollars, of which Uncle Sam can hope to get back perhaps twenty per cent if he's lucky. Last spring the colony borrowed another $300,000 from the Farm Security Administration on a three-year loan at three per cent; already they have spent over two thirds of this latest handout, and since three per cent means $9,000 a year, and in its best year—1938—the colony yielded only $8,000, the prospect of collecting even the interest seems a little dim. And the prospect of a successful farm colony in Alaska seems even dimmer.

Matanuska Can't Make It

Out of the hundred and forty-six farms in the Valley, we found, only about twenty-five were in active operation; all the rest of the farmers had gone into town to get jobs on the new air base. Those that remained were disillusioned and dispirited. Lack of any market in Alaska, they said, was ruinous.

The Alaska railroad's high freight rates didn't help much, either. Good soil in the Valley was spotty and subject to rapid erosion, and the growing season was so short that last fall they harvested their grain in two feet of snow. "Potatoes freeze before they can mature," one farmer told us, "and get watery. Corn doesn't grow an average of more'n two feet tall. Cutworms and root borers spoil our root crops."

Furthermore, despite the government subsidy, Matanuska cannot yet meet the landed prices of produce shipped fifteen hundred miles from The States. This summer in Anchorage, fifty miles from Matanuska, Seattle potatoes were selling for three and one fourth cents a pound as against four cents for Valley potatoes, Seattle peas for seven as against eight cents, Seattle eggs for thirty-five as against forty cents. Even the Army, the colony's best hope for a customer, was growing disgusted. "Either the colony meets existing competition," said Army officials sternly, "or we will have to conclude that it is a total failure."

Most devastating of all, the experimental station men the Department of Agriculture has maintained at Matanuska for five years told us that in their opinion the future of the colony did not lie in farming at all. "The best hope for Matanuska," they said, "would be its development as a dairy community."

But of all the screwball schemes which are being foisted on Alaska under the smoke screen of defense, the one that Alaskans dread and detest most is the proposed large-scale colonization of the territory by European refugees. Fantastic as it sounds, the idea nevertheless has gained considerable foothold in The States; and powerful racial groups are seeking to rescind our immigration laws and allow European aliens to reside in Alaska for five years—after which time, it is assumed, it would be too late to do anything about it.

Private capital is being raised to transplant these aliens to Alaska, should the King-Havenner Bill become a law, and private citizens are volunteering to finance a so-called "Alaska Development Corporation" to pick out jobs for them—inevitably in competition with the residents of the territory.

Chilkoot Sam shakes his head glumly. "After the gov'ment gets through bringing them European refugees up here," he says, "they'll have to solve the problem of taking care of all us refugee Americans that will be driven out."

For the moment, of course, the plan is being urged as a military necessity. Its sponsors claim that an unpopulated country is more liable to capture by an enemy (evidently ignoring the evidence to the contrary in Europe today), and a subsidiary organization, calling itself "The Great West Colonization Company," has actually started enlisting "tough young Jews" (we quote from its prospectus) to form an American Jewish border regiment to protect Alaska.

One Joseph Hefter, a former Austrian army officer who is acting head of this organization, has gone so far as to publish a blue-bound brochure illustrated with pictures of these tough young Jewish boys and girls, dressed in khaki riding pants with red bandannas around their necks, looking for all the world like Sunday-afternoon hikers along the Palisades. He has even started drilling them each night in his apartment on West 46th Street, New York, to get them ready for the Kenai. This winter, he says, he is going to take them up to suburban Livingston Manor to practice maneuvers in the snow.

Unsavory Restrictions

It is the "alien" part of the King-Havenner Bill that burns Alaskans most. Not that they oppose any settlement of aliens in Alaska merely because they are aliens. What they resent is the creation in Alaska of a class restricted to residence in the territory, their occupations prescribed by law, their residence in The States forbidden. Alaskans feel rightly that such discrimination would set the territory off from the rest of the United States, and thus work irreparable harm.

"Beaver Fork went Democratic 9 to 7. I guess it's in the bag"

GARRETT PRICE

As for its value to territorial defense, American Legionnaires in Alaska grow purple and inarticulate at the very thought of populating our most vulnerable frontier with an army of European aliens, impossible to keep in check and almost certain to include agitators and Communist sympathizers, a potential fifth column that would be a grave peril in the event of war in the Pacific.

"It is in the guise of refugees," says Colonel John Taylor of the American Legion, "that secret agents of the dictators have been sent into England, France, the Scandinavian countries and the Balkans. In view of world conditions, it would seem of the utmost strategic importance to our national defense that all aliens should be kept out of Alaska at the present time."

But the businessmen in the territory have the one irrefutable argument. What would the aliens do if they got to Alaska? they ask. What industries would be able to support them? How could they make a living?

Farming, for example? Alaskans point to the failure of Matanuska as expe sive proof that Alaska as a whole is n an agricultural country. "We know no single instance," says the Chamb of Commerce in Juneau, "where a man has ever been able to make a livi from farming in the extensive coas region which contains most of the pr ent population."

Fishing, then? Already Alaska fish has had to be drastically curtailed order to conserve the diminishing s mon run; only a third of the canner were operating this season in Bris Bay. Territorial Tax Collector Gre states that twenty per cent too ma people are trying to make a living fr fisheries in Alaska today.

Trapping? Already it has been nec sary to prohibit trapping of certain sp cies in southeastern Alaska, in order give the dwindling fur bearers a cha to recover. The Kenai is likewise c tailed for an extended period. Sta the Alaska Game Commission: "Pres regulations require that newcom must reside in the territory three ye before they can buy a resident trapp license." Generally speaking, Alask fur catch has remained at the two-m lion-dollar mark for twenty years.

Fur farming? Even in the Arctic, farms are losing money today; here in The States, it has never shown a r profit at any time. Charles Goldste leading Juneau fur dealer and a resid of Alaska for fifty-five years, says: this country, the inexperienced farmer hasn't got a chance."

It's Just Mistaken Kindness

Timber? Perhaps some day an ext sive papermaking industry may be tablished in the coastal regions; that day is still far off. Says Fra Heintzelman, chief of the Forestry Se ice in Alaska: "Our forests, prima valuable for pulp and paper, are so from any big markets that their ope tion would require enormous inve ments, far too great to be financed individual groups interested in refu projects."

Reindeer? Efforts to raise these co mercially have proven costly failu

Mining? Here, if anywhere, exp sion and growth may be expected time; but at present the great need is experienced prospectors, trained en neers, geologists—not the unskilled bor of the average refugee. No lon is there a chance for the individual pr pector to "strike it rich"; mining Alaska today is on a big scale, involv an outlay of millions of dollars.

"The whole refugee plan," conclu Ex-Governor John Troy, one of the m widely respected and beloved men the territory, "is an example of mista kindness, and if attempted it would the worst possible thing for the re gees themselves. Inevitably it wo work untold hardships not only on th but also on the residents of the te tory, who would be forced to sacri in order to take care of these suffe aliens dumped on them over their t tests. Living in Alaska is not chi play, even today. A man must be pe iarly adapted to this kind of life order to make good up here. The sp sors of this plan are letting their he run away with their heads."

Alaska has been called Uncle Sa Icebox. It is rich in resources for the ture. Keep it rich, Alaskans plead. velop it gradually. Don't exploit it artificial colonization. Don't ruin overnight, on a pretext of National fense. Don't raid the Icebox.

Evil Under the Sun

Continued from page 17

ownstairs?" Hercule Poirot asked.

"Oh! between ten and eleven—usually nearer eleven."

Poirot went on: "If she were to escend at ten o'clock exactly, that ould be rather surprising?"

"Yes. She wasn't often down as early s that."

"But she was this morning. Why do ou think that was, Captain Marshall?"

Marshall said unemotionally, Haven't the least idea. Might have een the weather—extra-fine day and ll that."

"You missed her?"

Kenneth Marshall shifted a little in is chair. He said, "Looked in on her gain after breakfast. Room was empty. was a bit surprised."

"And then you came down on the each and asked me if I had seen her?"

"Er—yes." He added with a faint mphasis in his voice: "And you said ou hadn't. . . ."

The innocent eyes of Hercule Poirot id not falter. Gently, he caressed his arge and flamboyant mustache.

Weston asked, "Had you any special eason for wanting to find your wife this norning?"

MARSHALL shifted his glance amiably to the chief constable. "No, just ondered where she was, that's all," he eplied.

Weston paused. He moved his chair lightly. His voice fell into a different ey:

"Just now, Captain Marshall, you nentioned that your wife had a previus acquaintance with Mr. Patrick Redern. How well did your wife know Mr. Redfern?"

"Mind if I smoke?" Kenneth Marshall sked. He felt through his pockets. Dash! I've mislaid my pipe somehere."

Poirot offered him a cigarette which e accepted. "You were asking about Redfern. My wife told me she had come across him at some cocktail party or ther."

"He was, then, just a casual acquaintnce?"

"I believe so."

"Since then—" the chief constable aused. "I understand that that cquaintanceship had ripened into omething rather closer."

Marshall said sharply, "You understand that, do you? Who told you so?"

"It is the common gossip of the hoel."

For a moment Marshall's eyes went o Hercule Poirot. They dwelt on him vith a kind of cold anger.

"Hotel gossip is usually a tissue of ies!"

"Possibly. But I gather that Mr. Redern and your wife gave some grounds or the gossip."

"What grounds?"

"They were constantly in each other's ompany."

"Is that all?"

"You do not deny that that was so?"

"May have been. I really didn't noice."

"You did not—excuse me, Captain Marshall—object to your wife's friendhip with Mr. Redfern?"

"I wasn't in the habit of criticizing my wife's conduct."

"You did not protest or object in any vay?"

"Certainly not."

"Not even though it was becoming a ubject of scandal and an estrangement vas growing up between Mr. Redfern nd his wife?"

Kenneth Marshall said, "I mind my own business and I expect other people to mind theirs. I don't listen to gossip and tittle-tattle."

"You won't deny that Mr. Redfern admired your wife?"

"He probably did. Most men did. She was a very beautiful woman."

"But you yourself were persuaded that there was nothing serious in the affair?"

"I never thought about it, I tell you."

"And suppose we have a witness who can testify that they were on terms of the greatest intimacy?"

Again those blue eyes went to Hercule Poirot. Again an expression of dislike showed on that usually impassive face.

"If you want to listen to these tales, listen to 'em," Marshall said. "My wife's dead and can't defend herself."

"You mean that you, personally, don't believe them?"

For the first time a faint dew of sweat was observable on Marshall's brow. He said, "I don't propose to believe anything of the kind." He went on: "Aren't you getting a good way from the essentials of this business? What I believe or don't believe is surely not relevant to the plain fact of murder."

Hercule Poirot answered before either of the others could speak:

"You do not comprehend, Captain Marshall. There is no such thing as a plain fact of murder. Murder springs, nine times out of ten, out of the character and circumstances of the murdered person. *Because* the victim was the kind of person he or she was, *therefore* was he or she murdered! Until we can understand fully and completely *exactly what kind of a person Arlena Marshall was,* we shall not be able to see clearly exactly *the kind of person who murdered her.* From that springs the necessity of our questions."

Marshall turned to the chief constable: "That your view, too?"

Weston boggled a little: "Well, up to a point—that is to say—"

Marshall gave a short laugh. "Thought you wouldn't agree. This character stuff is M. Poirot's specialty, I believe."

Poirot said, smiling, "You can at least congratulate yourself on having done nothing to assist me!"

"What do you mean?"

"What have you told us about your wife? Exactly nothing at all. You have told us only what everyone could see for themselves. That she was beautiful and admired. Nothing more."

Kenneth Marshall shrugged his shoulders. He said, simply, "You're crazy."

He looked toward the chief constable and said with emphasis:

"Anything else, sir, that *you'd* like me to tell you?"

"Yes, Captain Marshall, your own movements this morning, please."

Kenneth Marshall nodded. He had clearly expected this. "I breakfasted downstairs about nine o'clock as usual and read the paper. As I told you I went up to my wife's room afterward and found she had gone out. I came down to the beach, saw M. Poirot and asked if he had seen her. Then I had a quick bathe and went up to the hotel again. It was then, let me see, about twenty to eleven—yes, just about that. I saw the clock in the lounge. It was just after twenty minutes to. I went up to my room, but the chambermaid hadn't quite finished it. I asked her to finish as quickly as she could. I had some letters to type which I wanted to get off by the post. I went downstairs again and had a word or two with Henry in the bar. I went up again to my room at ten minutes to eleven. There I typed my letters. I typed until ten minutes to twelve. I then changed into tennis kit as I had a date to play tennis at twelve. We'd booked the court the day before."

"Who was we?"

"Mrs. Redfern, Miss Darnley, Mr. Gardener and myself. I came down at twelve o'clock and went up to the court. Miss Darnley was there and Mr. Gardener. Mrs. Redfern arrived a few minutes later. We played tennis for an hour. Just as we came into the hotel afterward I—I—got the news."

"Thank you, Captain Marshall. Just as a matter of form, is there anyone who can corroborate the fact that you were typing in your room between—er—ten minutes to eleven and ten minutes to twelve?"

MARSHALL said, with a faint smile, "Have you got some idea that I killed my own wife? Let me see now. The chambermaid was about doing the rooms. She must have heard the typewriter going. And then there are the letters themselves. With all this upset I haven't posted them. I should imagine they are as good evidence as anything."

He took three letters from his pocket. They were addressed, but not stamped.

"Their contents, by the way, are strictly confidential. But when it's a case of murder, one is forced to trust in the discretion of the police. They contain lists of figures and various financial statements. I think you will find that if you put one of your men on to type them out, he won't do it in much under an hour."

He paused. "Satisfied, I hope?"

Weston said smoothly, "It is no question of suspicion. Everyone on the island will be asked to account for his or her movements between a quarter to eleven and twenty minutes to twelve this morning."

"Quite."

"One more thing, Captain Marshall. Do you know anything about the way your wife was likely to have disposed of any property she had?"

"You mean ■ will? I don't think she ever made a will."

"But you are not sure?"

"Her solicitors are Barkett, Markett & Applegood, Bedford Square. They saw to all her contracts, etc. But I'm fairly certain she never made a will. She said once that doing a thing like that would give her the shivers."

"In that case, if she has died intestate, you, as her husband, succeed to her property."

"Yes, I suppose I do."

"Had she any near relatives?"

The always-refreshing

BACARDI COCKTAIL

It's tart... it's smart... the incomparable Bacardi Cocktail... always correct... and always welcome... at every season... and for every occasion. Be sure to make it correctly:

The Famous Recipe in Rhyme:

A LITTLE SOUR,
(Juice of half a lime)
A LITTLE SWEET,
(½ teaspoonful of sugar)
THE TROPIC SUN,
(A jigger of BACARDI RUM)
(White or Silver Label)
WITHOUT THE HEAT!
(Ice and shake well)

When grenadine is used instead of sugar, it's a Bacardi Grenadine Cocktail, and it comes out pink!

CAUTION: When you order a BACARDI Cocktail remember it MUST be made with BACARDI RUM. (N. Y. Supreme Court, April 28, 1936)

Use BACARDI White Label, from Cuba, world's finest rum . . . or BACARDI Silver Label, Puerto Rico's finest, at a popular price.

RUM 80 PROOF—
Schenley Imp. Corp., N. Y.
Copr. 1940

THERE'S A DIFFERENCE WORTH KNOWING!

NOW MORE NECESSARY THAN EVER BEFORE

THE NATIONAL ENCYCLOPEDIA AT LOWEST PRICE EVER OFFERED

Never before has an Encyclopedia of such authority and value been offered at a cost so low!

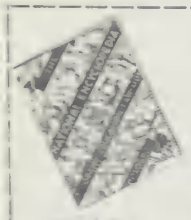
Never before has it been so necessary to be *armed with knowledge!* In these tumultous times the only chance of world salvation, the only assurance of future security can come through understanding, through knowledge! Yet much of what you learned no more than a decade ago is *obsolete!* The need for new, up-to-date knowledge shouts from the housetops. But where can you find the answer?

HERE IS THE ANSWER

Thousands upon thousands of men and women have discovered that there *is* a key to the solution of the confusion and disturbing mysteries of this frightening world! They have found it in the great National Encyclopedia, which places at your fingertips a library of living, vital facts . . . literally gives you the answers to the maze of questions aroused in your mind by current events.

SUPREMELY USEFUL

Here is a work so modern and up-to-date that it covers all late world events and political changes, so comprehensive and thorough that it surveys the entire range of human knowledge, so useful that it is found in business offices, radio stations, newspaper offices and in the principal public university and school libraries throughout the country.



It is so universally accepted that its thousands of owners represent a complete cross-section of the American public.

SYMBOL OF OUR AGE

The National Encyclopedia is a symbol of our age, fresh, alive and supremely useful. It has sold with the rapidity of the best-seller contemporary novel, so perfectly is it in tune with what people want in a reference work. The National Encyclopedia is the ideal work for the American family, for every home with children of school age, and for every man and woman who can ill afford to be satisfied with anything other than the best in reference material.

Send TODAY for the full description of this superbly new Encyclopedia, with details of prices, terms, and types of bindings. This information will be sent you *free* and you will be placed under no obligation to purchase.

SEND FOR BEAUTIFUL BOOKLET FREE

250 Park Avenue, New York

Send me without cost or obligation your beautiful booklet, describing the new National Encyclopedia, and including "Quiz." Also, please advise how I may secure the Encyclopedia by small monthly payments, at lowest price offered since publication.

NEA 536

Name { Mr. / Mrs. / Miss } .....

Address .....

"I don't think so. If she had, she never mentioned them. I know that her father and mother died when she was a child and she had no brothers or sisters."

"In any case, I suppose, she had nothing very much to leave?"

"On the contrary. Only two years ago, Sir Robert Erskine, who was an old friend of hers, died and left her a good deal of his fortune. It amounted, I think, to about fifty thousand pounds."

Inspector Colgate looked up. An alertness came into his glance. Up to now he had been silent. Now he asked, "Then actually, Captain Marshall, your wife was a rich woman?"

Kenneth Marshall shrugged his shoulders. "I suppose she was really."

"And you still say she did not make a will?"

"You can ask her solicitors. But I'm pretty certain she didn't. As I tell you, she thought it unlucky."

There was a pause, then Marshall asked, "Is there anything further?"

WESTON shook his head. "Don't think so—eh, Colgate? No. Once more, Captain Marshall, let me offer you all my sympathy in your loss."

Marshall blinked. He said jerkily, "Oh—thanks."

He went out.

The three men looked at one another.

"Cool customer," Weston said. "Not giving anything away, is he? What do you make of him, Colgate?"

The inspector shook his head: "It's difficult to tell. He's not the kind that shows anything. That sort makes a bad impression in the witness box, and yet it's a bit unfair on them really. Sometimes they're as cut up as anything and yet can't show it. That kind of manner made the jury bring in a verdict of guilty against Wallace. It wasn't the evidence. They just couldn't believe that a man could lose his wife and talk and act so coolly about it."

Weston turned to Poirot: "What do you think, Poirot?"

Hercule Poirot raised his hands.

"What can one say? He is the closed box—the fastened oyster. He has chosen his role. He has heard nothing, he has seen nothing, he knows nothing!"

"We've got a choice of motives," said Colgate. "There's jealousy and there's the money motive. Of course, in a way, a husband's the obvious suspect. One naturally thinks of him first. If he knew his missus was carrying on with the other chap—"

Poirot interrupted:

"I think he knew that."

"Why do you say so?"

"Listen, my friend. Last night I had been talking with Mrs. Redfern on Sunny Ledge. I came down from there to the hotel and on my way I saw those two together—Mrs. Marshall and Patrick Redfern. And a moment or two after, I met Captain Marshall. His face was very stiff. It says nothing—but nothing at all! It is almost *too* blank, if you understand me. Oh! he knew all right."

Colgate grunted doubtfully. "Oh well, if you think so—"

"I am sure of it! But even then, what does that tell us? What did Kenneth Marshall *feel* about his wife?"

"Takes her death coolly enough," Colonel Weston said.

Poirot shook his head in a dissatisfied manner.

Inspector Colgate said, "Sometimes these quiet ones are the most violent underneath, so to speak. It's all bottled up. He may have been madly fond of her—and madly jealous. But he's not the kind to show it."

"That is possible—yes. He is a very interesting character this Captain Marshall. I interest myself in him greatly. And in his *alibi*."

"Alibi by typewriter," said Weston with a short bark of a laugh. "What have you got to say about that, Colgate?"

Inspector Colgate screwed up his eyes. "Well, you know, sir, I rather fancy that alibi. It's not too good, if you know what I mean. It's—well, it's *natural*. And if we find the chambermaid was about, and did hear the typewriter going, well, then, it seems to me that it's all right and that we'll have to look elsewhere."

"H'm," said Colonel Weston. "Where are you going to look?"

FOR a minute or two the three men pondered the question. Inspector Colgate spoke first: "It boils down to this—was it an outsider, or a guest at the hotel? I'm not eliminating the servants entirely, mind, but I don't expect for a minute that we'll find any of them had a hand in it. No, it's a hotel guest, or it's someone from right outside. We've got to look at it this

"So Papa doesn't like fish for dinner!" WILLIAM STEIG

First of all—motive. There's gain. only person to gain by her death the lady's husband, it seems. What r motives are there? First and fore- t—jealousy. It seems to me—just ing at it—that if ever you've got a *e passionel*"—he bowed to Poirot— is one."

oirot murmured, as he looked up at ceiling, "There are so many pas- s."

spector Colgate went on: "Her hus- l wouldn't allow that she had any nies—real enemies, that is, but I t believe for a minute that that's I should say that a lady like her ld—well, would make some pretty enemies—eh, sir, what do you "

oirot responded: "*Mais oui,* that is Arlena Marshall would make ene- s. But in my opinion, the enemy ry is not tenable, for you see, In- tor, Arlena Marshall's enemies ld, I think, as I said just now, always *omen.*"

olonel Weston grunted: "Something at. It's the women who've got their e into her here all right."

oirot went on: "It seems to be hardly ible that this crime was committed a woman. What does the medical ence say?"

'eston grunted again. "Neasdon's ty confident that she was strangled a man. Big hands—powerful grip. just possible, of course, that an un- ally athletic woman might have e it—but it's very unlikely."

oirot nodded. "Exactly. Arsenic in p of tea—a box of poisoned choco- s—a knife—even a pistol—but ngulation—no! It is a man we have ook for."

Colonel Weston was poring over the hotel register.

He read aloud:

"Major and Mrs. Cowan, Miss Pamela Cowan, Master Robert Cowan, Master Evan Cowan, Rydal's Mount, Leatherhead. Mr. and Mrs. Masterman, Mr. Edward Masterman, Miss Jennifer Masterman, Mr. Roy Masterman, Master Frederick Masterman, 5 Marlborough Avenue, London, N. W. Mr. and Mrs. Gardener, New York. Mr. and Mrs. Redfern, Crossgates, Seldon, Princes Risborough. Major Barry, 18 Cardon Street, St. James, London, S. W. 1. Mr. Horace Blatt, 5 Pickersgill Street, London, E. C. 2. M. Hercule Poirot, Whitehaven Mansions, London, W. 1. Miss Rosamund Darnley, 8 Cardigan Court, W. 1. Miss Emily Brewster, Southgates, Sunbury-on-Thames. Rev. Stephen Lane, London. Captain and Mrs. Marshall, Miss Linda Marshall, 73 Upcott Mansions, London, S. W. 7."

He stopped.

"I think, sir," Inspector Colgate said, "that we can wash out the first two entries. Mrs. Castle tells me that the Mastermans and the Cowans come here regularly every summer with their children. This morning they went off on an all-day excursion sailing, taking lunch with them. They left just after nine o'clock. A man called Andrew Baston took them. We can check up from him, but I think we can put them right out of it."

WESTON nodded. "I agree. Let's eliminate everyone we can. Can you give us a pointer on any of the rest of them, Poirot?"

"Superficially, that is easy. The Gardeners are a middle-aged married couple, pleasant, traveled. All the talking is done by the lady. The husband is acquiescent. He plays tennis and golf and has a form of dry humor that is attractive when one gets him to oneself."

"Sounds quite okay."

"Next—the Redferns. Mr. Redfern is young, attractive to women, a magnificent swimmer, a good tennis player and accomplished dancer. His wife I have already spoken of to you. She is quiet, pretty in a washed-out way. She is, I think, devoted to her husband. She has something that Arlena Marshall did not have."

"What is that?"

"Brains."

Inspector Colgate sighed. "Brains don't count for much when it comes to an infatuation, sir."

"Perhaps not. And yet I do truly believe that in spite of his infatuation for Mrs. Marshall, Patrick Redfern really cares for his wife."

"That may be, sir. It wouldn't be the first time that's happened."

"That is the pity of it!" Poirot murmured. "It is always the thing women find it hardest to believe. Major Barry," he went on, "retired Indian army. An admirer of women. A teller of long and boring stories."

Inspector Colgate sighed. "You needn't go on. I've met a few, sir."

"Mr. Horace Blatt. He is, apparently, a rich man. He talks a good deal—about Mr. Blatt. He wants to be everybody's friend. It is sad. For nobody likes him very much. And there is something else. Mr. Blatt last night asked me a good many questions. Mr. Blatt was uneasy *Yes, there is something not quite right about Mr. Blatt.*"

(To be continued next week)

The King's Woman

Continued from page 10

stead of being dictated to by Maniu, ol finds himself in a position to dic- . Maniu thought he had it all worked beautifully beforehand. Not until ol had denounced his tie with "that man," not until he had remarried len, not until he had given ample of that he was going to be a good, elheaded, balanced, trustworthy and stitutional chap forever after, was he e proclaimed king.

ut now that Carol is back, and the wds are yelling themselves hoarse, ol can and does demand immediate unconditional proclamation as king, Maniu, tied up in his own propa- da, has to give in.

ihai steps down from the throne becomes heir to his father.

he regency is dismissed with half (registers resentment), Carol is in- ed with the royal regalia and things perfectly wonderful from the out- e.

ut a couple of days later Maniu dis- ers that "that woman" has come k again at Carol's command, and been installed in a villa just a stone's ow away from the royal palace.

hite with fury at being thus double- sed, Maniu goes into retirement, the king thenceforth does his own ng, having decided to be sweeper in- d of broom.

irst of all he sweeps out Stirbey, s that gentleman's face and pulls n the wall the telephone which pri- ely connects the prince with Maria, ol's mother.

laria gets terribly upset and goes a huff, languidly gazes upon the k Sea from Balcic, the castle so far oved from the turmoil of a bad, un- eful world, and in her leisure mo- ts writes witty memoirs.

Carol informs her that she has acquired a new daughter-in-law, and Maria, who always has been most particular about all her in-laws, never gets over the shock. The secret is well hidden, for she would never dare talk to anybody about her boy's "disgrace."

All this, I suppose, Will, is background, just background, for the hero, or villain, for the victim of your play is going to be Mihai, the boy.

IT IS he around whom the plot centers, he who faces the "tragic conflict."

In the days when he is king, and his grandmother does the ruling, he is not an attractive kid. She loves and adores him to the extent of a cream cake a day and as many Rolls-Royces as he can possibly use.

She is too busy with her private life to do much beyond just loving him, and it is cringing, tightly corseted aides-de-camp who are his constant companions in that hothouse atmosphere of his grandmother's court. Good old Uncle Stirbey occasionally slips him a Romanian penny and pats him on the cheek. To all the others it's "His Majesty this" and "His Majesty that," until the seven-year-old really thinks he's something special.

No draft ever gets anywhere near him and it's a disgustingly pampered, soft and flabby little creature that goes by the name of king.

All this changes when Carol comes back. He is furious when he sees what they've done to his boy, and gets right down to making a man of him. No more Rolls-Royces and aides-de-camp!

Hefty peasant boys are gathered from all over the country to be his companions, boys that bully him and make him fight to hold his own.

Soldiers' rations take the place of cream cakes when he is sent out to share the hardships and the joys of Romania's Carpathian troops.

For months he lives in Boy Scout camps, for months he treks the country and roasts his potatoes with the rest of them.

Skiing, riding and photography become his hobbies and an endless stream of tutors cram all the languages of Romania into his head, besides the English, German and French which it is nowadays every king's duty to speak.

By the time he is sixteen, he has become quite a fellow, good-looking, keen as mustard, tough as leather (you'll find better similes than those, I hope, Will), and the idol of Romanian youth —just the sort of fellow they would adore to have as king.

Being the idol of your country is rather a dangerous thing when the chap in power turns out to be a disappointment, and Carol just has. Although he has done his best to pull the country together and put through many helpful reforms, there is still a lot that is bad, a great deal that is rotten, and all of it blamed on him and "that woman" of his.

She, in fact, turns out to be quite a stone around his neck, for whenever anything goes wrong it is she the people blame, it is she the people hate and it is she the people want to be rid of. And as he won't give her up, he has to stick out his chin and take it.

The world marvels at what he will take on the chin for that mistress of his. That mistress, though, is his wife, one of the unhappiest women, probably, that ever lived. She is intelligent enough to know what a stone around Carol's neck she is. She knows that Carol could immeasurably strengthen his hand if he

GIVE YOUR LAZY LIVER THIS GENTLE "NUDGE"

Follow Noted Ohio Doctor's Advice To Feel "Tip-Top" In Morning!

If liver bile doesn't flow freely *every day* into your intestines—constipation with its headaches and that "half-alive" feeling often result. So step up that liver bile and see how much better you should feel! Just try Dr. Edwards' Olive Tablets used so successfully for years by Dr. F. M. Edwards for his patients with constipation and sluggish liver bile.

Olive Tablets being *purely vegetable*, are wonderful! They not only stimulate bile flow to help digest fatty foods but also help elimination. Get a box TODAY. 15¢, 30¢ and 60¢.

Don't Neglect Slipping
FALSE TEETH

Do your false teeth drop, slip or wabble when you eat, talk or laugh? Don't be annoyed and embarrassed by such handicaps. FASTEETH, a pleasant **alkaline** (non-acid) denture powder, sprinkled upon a dental plate, holds it firmer and gives a confident feeling of security and added comfort. No gooey, pasty taste or feeling. Mildly **alkaline,** FASTEETH also checks gum soreness due to chafing of a loose plate or to excessive acid mouth. Get original **alkaline** FASTEETH at your druggist. Accept no substitute.

Plates loosen when gums shrink. Have your dentist re-adapt your plates to the changed gums. Until this is done you can get valuable aid in holding the plate more securely by using FASTEETH daily.

ALKALINE DENTAL PLATE POWDER

broke with her—yet on the other hand she knows that Carol will never let her go. Time and again she offers to go. Time and again even Carol, when things become too hot, accepts that offer and lets her go. But after short weeks his cry goes out to her to come back, for she will always remain the woman without whom he cannot live.

In the dark hours of her tribulations she flees into the comfort of her fathers' faith. A golden torah roll, which Carol gives her, accompanies her wherever she goes, out of the country, and back into it again, and yet even that consolation turns out to be another reason for hate to pile up at her door. Jews are becoming more and more unpopular in that part of Europe, and to stick to one's Jewish faith openly is almost like courting suicide.

JUST then Fascism begins to rise up all around the country. (It's just a newfangled word for the old "or-else" doctrine of governing people, so don't trouble to look it up in any dictionary.)

Dictators spring up to the right and left of Romania, and all the discontented people pin their hope on the revolution that Fascism dangles before their noses.

Romania is no exception, for there are a great number of discontents about, and Mihai suddenly—with little of his own doing—finds himself the hero of a movement which is his father's deadliest enemy.

You can believe that Mihai doesn't like being idolized at his dad's expense, for he has grown very fond of his father, who put him through such a hard time of training, and a real fellowship has grown up between the two of them, and they have become perfect pals who glory in each other and whose greatest pleasure is their companionship.

That is another aspect which I cannot tackle.

It was hard work at first for Carol to win over Mihai, the boy who is so devoted to his mother, who resents his father's behavior toward her, who hates Lupescu—that woman who came between his parents, that woman who prevents him from enjoying his mother's love and his father's companionship at the same time.

But Helen has gone to Florence, and Mihai sees her only once or twice a year, and slowly but steadily Carol draws the boy toward him.

As Mihai grows up, he becomes less resentful about "that woman" and eventually he even meets Lupescu, and they get on extremely well together.

BUT meanwhile, the unrest in the country grows.

Dictators need that oil, that wheat and those Black Sea ports. Carol repeatedly tells them that he isn't going to let them have them, in fact, he dares scream back when screamed at by Europe's up-and-coming dictator.

Now that seems to be just about the worst thing one can do. If dictators slash back at you for it, your people will accuse you of having provoked them. If dictators sit back and are intimidated, everyone will believe that they didn't have any designs in the first place, and yours will never be the glory if things go well, yours will be only the blame if things go wrong.

But Carol does not see it that way, he is sure he is a match for any of those dictators.

As ruthless as they, as determined as they, he hits back with all the might he has at his disposal.

The Iron Guard, Romania's Fascist movement, supplied with funds, ammunition and propaganda from abroad, is violently suppressed.

The streets of Bucharest are littered with corpses of the insurgents.

But no suppression is of any avail. Every step taken against them only makes new, more violent fanatics, every move to appease them is taken as a sign of weakness, and makes them howl for total victory.

Disunity is at its height when Russia steps in and grabs the province which, twenty years earlier, Maria had gained with her smiles and wiles at the green tables of Versailles.

Prodded by the dictator, others follow suit, and the hungry Hungarians snatch up provinces which they lost two decades ago, and Bulgaria bulges out into a few square miles of Romanian soil, which include Balcic, the castle—that love nest of Maria, the queen, and the silver urn which contains that disillusioned queen's heart.

Instead of being angry with themselves for having stirred up all the unrest that made the grabs so easy, the Iron Guards turn all their fury on Carol and "that woman" who, they pretend to feel, ought to have prevented the country's humiliation.

NOW that the fat is thus in the fire, there is nothing to be done but to appease the great dictator, and the only way to do that is to put a government in power willing to take its orders from "Him," and the Iron Guard stands ready to take over—the Iron Guard to which most of the peasant youth of Romania belongs, that peasant youth that saw Maria and Stirbey succeeded by Carol and Lupescu, that peasant youth whose idol and hope is Mihai, clean-living, straightforward, one-of-their-own, Mihai.

For days and weeks Carol hangs on by the skin of his teeth, and not until a howling crowd sweeps down the Calea Victorie to the palace, and not before stones come crashing through the French windows and roll before his feet, does Carol realize that his time is really up.

At four o'clock in the morning, after a twenty-eight-hour conference with Antonescu, Iron Guard leader and the dictator's deputy, Carol slowly walks across to his boy's bedroom, shakes him out of his sleep and tells him that once again—for the second time in his life—he is to be king.

Half awake, Mihai accepts his father's homage, sleepy-eyed, his throat dry as parchment, he bids his best pal goodby.

Shivering in the early dawn, he takes the oath upon a new constitution which has just been drawn up and which he has never read.

Five hours later, while his father's train—the train that contains Magda Lupescu too, wild-eyed and tearful, clutching the golden roll to her heart, that golden roll which was a love token from her husband and which contained the consolation of centuries—while his father's train is riddled by vengeful Guard bullets as it speeds across frontier, Mihai walks down the str of Bucharest through cheering cro pressing hands right and left, those s hands that threw the stones that rolled at his father's feet.

A month later the dictator's arm columns pour into Romania to se that oil, to get that wheat, to occ those Black Sea ports.

Foreign airplanes drone over town, and the dictator's officers lean the windows of their headquarter the Hotel Athenee Palace just acros street from the home of Mihai, the k King in name only, as once before, only to do a dictator's bidding or to low his father into exile.

PRINCESS HELEN is back agai Bucharest, having skipped b queen to be queen-mother again share with her son the burden which been put on his broad young shoul

Scapegoats are the most impo props in a dictator's outfit, and ' woman" is an ideal scapegoat if t ever was one. The dictator's pr ganda builds her up into the evil p behind the throne, the string-pu Jewess who has ensnared the sim minded king, the redheaded witch ought to go to the stake. But she s out of reach.

Out of reach of the Iron Guard, haps, but not of the great dictator has her and "her man" arrested in S and who orders Romania to ask fo extradition so that she may be trie corruption and for the murder o those "martyred heroes" of the Guard.

Carol is free to go, but "that wom his mistress, must stay to face the geance of the dictators. She is t thrown to the wolves, she is to be r the scapegoat.

It is now that Carol springs the prise upon the world, that "that wo is his legal wife, that they belon gether, for better or for worse. As were in good times, so they will re in bad—inseparable.

THERE'S your story, Will. If only you can handle it, there's a bit of drama in it somewhere, I

There are those two, sitting in S clinging to each other, ready to anything together, nothing apart.

There is Helen, the queen-mo who hates "that woman" with all heart, who believes that she was th and only cause of her husband's d fall and who still jealously loves fellow who once was a husband of

And then there is Mihai, who have to sign whatever sentence ma pronounced—sentence imposed his father and pal as well as sent upon the woman his father mar He's the center of our story, I sup and here's his tragic conflict:

Will he surrender his heritage, t away everything his father brought up to preserve? Or will he hang or condemn his father's wife, his f even, or at least his father's mem

There is really quite a wonderful there, rightly handled.

Maybe you don't care to tackle all, Will. I know it's all so fresh, real, and unnatural.

I suppose those kingly tragedies got to grow old and musty first, acquire the patina of centuries b they look beautiful on the stage.

Don't trouble to let me know if can't do anything with the idea, wouldn't know anyone else who c

I hope I haven't bored you, b seemed to me that there was a plo that you were just the chap to something of it.

Yours sincerely,
ARCHDUKE FRANZ JO

The Winner!

COLLIER'S CAR CARTOON GAG CONTEST

Heartiest congratulations to Catherine A. Edmonston of 4306 North Pershing Drive, Arlington, Virginia, winner of Collier's car cartoon gag contest! Here's the caption for which she receives a certificate worth $500 to apply against the purchase price of any 1941-model automobile sold by the dealer named in her entry:

"We was going to seed in that bloomin' flowerpot."

A total of 20,738 contestants submitted 35,800 gags—an average of nearly two apiece. Some of the most frequently submitted captions were: "Gee, Sarge," "Well?" and the idea, in various words, that times like these might make it necessary to "scuttle" the car (about 500 of these). A jury of Collier's editors judged the entries. To contestants, Collier's says, "Thanks—and better luck next time!"

She Sells 'Em

Continued from page 27

'h first part is not hard to follow
en you have a choice. Annie Laurie
a ays insisted on taking her choice.
: e has steadily believed that the
e an picture audience has an appe-
: stronger stuff than it has been
w d to enjoy, by and large. Not one
th big hits has been of the sugar-
te variety—even that long-winded
n e of the Old South relied for its
e terest on a pair of characters un-
e ned except for the fact that Miss
g and Mr. Gable played them.
'h second rule betrays a feminine
n ess about human nature, espe-
ly in the male department. A pro-
e who has struck an unexpected hit
o thinking he had a little some-
n o do with picking it. And if he
flop on his hands he won't thank
p ty who lets it get around that he
sucker for a slick salesman.
o he shrewd head inside the baby-
e onnet recommends tact both be-
e nd after signing on the dotted
e. But she is proud of one selling
th l strictly her own. That is her
e tation."
M t agents follow about the same
c ure in offering a book or play to
fi ns. The Eastern story editors of
fi n companies go to all the plays,
t ey receive the first copies off the
ss of any books with picture possi-
ti , which they send on to the coast
h heir recommendations.
A e Laurie adds to the package
t ning a new book a batch of closely
e itten sheets, under a heading
t uaintly recalls compositions you
d o hand in, with a fine tremor in
l ees, to your English teacher in
o "Why I Think One and One Are
T Would Make a Good Motion Pic-
e the title reads.
I n there on, you can bet your boots
in Laurie tells them. She spades up
r angle of the film possibilities of

k of ideas for the production has
n planted. Even picture people ad-
m at a fair number of her notions
w come to flower on the screen.
n Laurie coyly doesn't tell. She is
in on Rule Number Two.

It Pays to Be a Texan

B g a Texan, Annie Laurie believes
fo owing rules, but only if they're
o n. Papa Williams came to Den-
ve from Mississippi, and Mother
fr Idaho, combining the South and
s into the something special that
s utes a Texas family.
'h Williams family had a lot of pride
l money. It also had seven daugh-
s. Of the seven, Annie Laurie seems
h e had most of the Texas gump-
a ight from the start. She wasn't
f the prospect of sitting on Papa's
v ry large and not very prosperous
lo until a local swain married her.
S arried a Texan in the end anyway
M rice Crain, the writer—but she
t im at the Texas Club in New
Yk

Sh didn't know anything about the
a r except from books, but the
eg girl graduate snatched her high-
o diploma on the wing and made
fo amatic school in Dallas. From
fr to New York, while Papa fretted
ov the impropriety of a young girl
al in the big city. She yielded to him on one point and lived at the circumspect Three Arts Club for aspiring young ladies while she made the rounds of the producers' offices looking for a part.

Her patience wore out along with the soles of her shoes. Her love for the theater couldn't survive that humiliating daily pilgrimage, and she took a temporary job in the advertising office of the Morning Telegraph. She still thinks the stage lost a fine actress that day. At the end of six years she was reviewing movies for the paper, at the time one of the lowest-paid assignments, and that's when her ideas about books and pictures began to take form.

She quit the newspaper and opened a literary office with Mavis McIntosh. But before the firm of Mac-Williams had fairly opened for business she was off on her own again, with desk space and telephone in a book-publishing firm, studying her source of supply and living on whatever ten-per-cent tidbits she could gather in.

Miss McIntosh and her present partner, a red-haired Vassar girl named Otis, are now the literary link in Annie Laurie's chain from manuscript to movie, an independent but corresponding firm. Elizabeth Otis, indeed, is still the girl who signs John Steinbeck's name to the contracts.

Mr. Steinbeck Learns

The way Of Mice and Men was made into a play is a story Annie Laurie likes to remember. When she read the short novel her instinct for the theater, long dormant, raised its eager head. She thought it fell into play form almost naturally, and she got Sam Harris and his particular wizard, George S. Kaufman, to read it. Kaufman agreed that Steinbeck ought to write the script, and Annie Laurie wrote the suggestions of this supercraftsman in full to Steinbeck out on his Los Gatos ranch.

Weeks later Steinbeck and his wife turned up in New York en route to a vacation in Scandinavia. Where, asked Annie Laurie, was the play? Steinbeck hung his head.

"I didn't write it," he confessed hollowly. "I don't know how."

It turned out that he was almost completely innocent of the theater, didn't know stage right from stage door. There were four days until the boat sailed, and Annie Laurie packed both the Steinbecks up to her stone house in the Litchfield hills of Connecticut, dusted off the typewriter, and plied the novelist with nourishing food, encouragement and stage mechanics for the ensuing ninety-six hours.

Then she handed the weary Steinbecks up the gangplank and jubilantly bounded off to Kaufman with the script.

When the Steinbecks came back she had the electric joy of bringing these two talented gentlemen together for the first time and watching them strike sparks off each other. Steinbeck went home to Los Gatos to embody Kaufman's recommendations in the final draft. The next season the play won the New York Critics' Circle award, more coveted by many theater people than the Pulitzer Prize.

When we said Annie Laurie doesn't budge on price, we neglected to mention a historic exception. She once cut her price exactly in half, from $100,000 to $50,000.

The story—you've guessed it—was Gone With the Wind. Very few people now remember that until Selznick bid for it there were no takers at any price. But Annie Laurie remembers.

Troubled Heart

Continued from page 9

happen that way, besides Carol's heart is big enough to care for both of us."

"In that case there would be no harm in letting things remain as they are for a year and judging, at the end of that time, whether you are right."

Conway's social graces gave place to an air of disturbing realism:

"At the end of a year I may be dead, we may both be dead. What the future holds nobody can say. That's why we've a right to live, and live fully, while we have the chance."

Mrs. Vellaby rose and went to the window and clutched at the curtains, what time she strove to marshal her faculties and press the fight. At long last she spoke in a low, tremulous voice:

"You will think, perhaps, I am a selfish old woman, but when you know the reason you may be less disposed to blame me. I admit that the thought of losing Carol is torture, but youth must have its fling even though age pays the price."

Conway said: "But is it such a high price? Marrying me won't prevent you seeing each other, and I've an idea you won't feel half so badly about it when you've said 'Yes.'"

"I do say 'Yes'—with all my heart—but, in return, there is something you must promise to do."

"Very well."

"You must tell Carol I have less than a year to live."

He stiffened, got up, and stared incredulously.

"I consulted a doctor some while ago—a Dr. Fergusson of Wimpole Street. He sentenced me to death."

He did not doubt her sincerity, for there was no mistaking the fear in her voice.

"I . . . I'm most terribly sorry."

"I hadn't the courage to tell Carol myself, for until now I was the only person she had to love. But I feel that before you take her away she has a right to know. For if, later on, she learned that you had kept the knowledge from her I doubt if she would ever forgive you."

His expression hardened.

"You know, of course, that when I've told her, she'll stay here?"

"That is something she must decide for herself."

He was not deaf to a hint of triumph in her voice. With it doubt stirred.

"Very well," he said, bowed and went out.

Through the half-open window she saw him hail a cruising taxi.

"Wimpole Street," he said.

Two blocks away he stopped the taxi at a telephone booth to look up the number of Dr. Fergusson's house.

THE manservant who answered the doorbell informed him that the doctor had given up private practice to serve with the navy. Turning away, frustrated, Conway saw on the poster of an evening paper the words "BRITISH AND FRENCH FLEETS MOBILIZE." In no other circumstances would he have regarded it as good news.

When he got home the Misses Pincent were in a flutter and the Girl Pat rushed off to have a huddle with Plum. Conway rang up to ask Carol to come around and help him pack.

Some buttons were missing from his shirts and while she was sewing them on he kept his promise to Mrs. Vellaby. Carol turned white but went on sewing. When he had finished, she said: "Her bravery in never speaking a word!" From the way she said it, he knew that she was dedicated.

Then she got up, put her arms around his neck, kissed him, and said: "Be careful, for our futures' sake."

She did not wait to see him off. That would have been more than she could bear.

"Besides, Mother will be expecting me."

He stood at his observation post watching her for what well might be the last time.

That evening Mrs. Vellaby, speaking through tears, made Carol promise that no one, not even Delia, should be told the truth. The promise given, she added: "My dearest, I didn't want you to sacrifice your happiness for me. I can only pray that it won't be for long."

After that she went upstairs and slept like a top.

CONWAY wrote that he had been given command of H.M.S. Mine-Sweeper Derring-do, based at an east-coast port, and missed her like the devil and all his demons.

The war went wearily on, and Mrs. Vellaby and Carol settled down to a pleasant jog trot that even the B.B.C. was powerless to upset.

"Porter, should there be a man in here playing a ukulele and cracking jokes?" RICHARD TAYLOR

It was Carol who had installed a radio and, overcoming her initial dislike for the thing, Mrs. Vellaby came to regard it as a soporific to which she was indebted for many an after-dinner nap. But one evening, just as she was dropping off, she heard a phrase which the times had turned to a cliché: "The secretary of the admiralty regrets to announce the loss of His Majesty's Mine-Sweeper Derring-do . . ."

She did not hear the name of her commander, her tonnage and complement, nor that it was feared that she had been lost with all hands, because Carol had sprung to her feet and, with hands pressed to her mouth, was making dreadful, strangled cries in her throat. Before Mrs. Vellaby could ask the reason, Carol ran from the room and out of the house. Not until then did she realize that the Derring-do was Conway's ship.

It would be vain to suppose that she reproached herself, nor was there any reason to do so. For what had happened she was innocent of blame. It was just one of those things that do happen in war. But while listening anxiously for Carol's return, she wondered how Conway's death would affect their future. She did not doubt that Carol would be prostrated with grief and a genuine desire to soften it was responsible for her sudden determination to emerge from the valley of death. It was an affair that would have to be handled with delicacy and timed in such a way as to do the most good. Carol's despair at the loss of her lover must be obliterated in the happy tidings that her beloved mother was to be spared for many years to come.

Mrs. Vellaby waited until nearly midnight before tiptoeing into Carol's room. A voice addressed her out of the dark: "Go to bed, Mummie, you ought to have been in bed ages ago."

Mrs. Vellaby crossed the room, sat down on the bed and found one of Carol's hands.

"I shall stay here until you're asleep."

"No, please. You'll only make yourself ill."

This was the cue she needed.

"I won't, dear. Out of your grief I seem to have found a new strength. After this *I* must look after *you*."

Carol said: "You're very sweet."

"I was thinking, dear, there's a specialist in Devonshire Place about whom everybody's talking. I shall try and make an appointment with him tomorrow. If he thinks I'm up to it, we might go to the Pyrenees for a little while and find a sun shining."

Carol did not answer at once and when she did it seemed that she had not been listening:

"If I could only have been his wife—even for a few days. Yes, Mummie? What were you saying?"

There was a letter from Conway next morning, written before he went to sea. Carol did not open it until after her mother had left the house, for Mrs. Vellaby would not hear of Carol's accompanying her to the doctor.

In the letter Conway wrote: "I suppose pretty well any thing at all is excusable when one loves a person. I know, if you were mine, I'd never let you go. I might even lie to keep you—as your mother did. By a sheer fluke, I knocked up against a Dr. Fergusson in port last night. He's acting as consultant at a naval hospital. I remembered the name as that of a doctor who tended your mother, and I asked if he remembered her. You know what doctors are when it comes to discussing a professional secret—but something in the way he grinned struck me as q

"I asked what was so funny and shrugged his shoulders. His manner my goat and perhaps I had had a or two, so I out and said that it did strike me as being a hundred per to laugh about somebody you've tenced to death. 'I *what?*' he 'You're raving. I haven't seen Vellaby for eighteen months and from a chronic tendency to hypoc dria she's as strong as a horse.' So you are, Carol, and I've no comm but you and I are getting marrie soon as I can lay hands on a license

Carol sat staring at the letter, a coldness she had never before ex enced gathered around her heart.

Meanwhile, at Devonshire Place, Vellaby was explaining to Doctor S that she was seeking his advice in absence on active service of her consultant.

"Who was that?" he asked.

"As a matter of fact I would r not say."

"Why?"

"Because I believe he frightene unnecessarily."

"Humph! What seems to be the ble?"

She searched her mind for a plau answer, and nature supplied it:

"I had been suffering from a ce amount of pain around the heart rheumatism in the left arm."

"And what did he tell you?"

"That I was dying."

"Let's have a look at you," sai

The examination was thorough. V he had finished she confidently a for the verdict.

"Well, I wouldn't say you were dy he said. "With luck and reasonable you may have several years before

Her hand flew to her heart and cried: "What do you mean?"

"It's angina pectoris."

She never knew how she got hom managed to struggle upstairs to C. room where she flung herself on th in a gale of weeping. Carol was st at a letter as if nobody were in room. Then, in broken words, Vellaby sobbed:

"Where are you? Come to me. frightened. The doctor . . . the d . . . he told me I was a dying wom

"Again?" said Carol, stonily. "Y wasting your tears, Mother."

She got up, dropped Conway's on the bed, picked up a hat and coa left the house.

THIS would have been a horrible but for the sequel, contained in a gram forwarded to Carol and give as she lay in bed at Delia's house a twin on either side of her. The gram said: "Picked up by a dest no flowers by request Trinity ch Lowestoft next Tuesday at two emma and don't be late Love Con

Resolved to be early rather than Carol got up and possessed hers the last of Delia's petrol coupon gether with a loan of the car. Five was striking when she located the where Conway was sleeping off th fects of prolonged immersion in North Sea. He was wakened su ingly by her arms slipping aroun neck and her mouth being press his and tears running down her onto his unshaven cheek.

The Secret Four

Continued from page 23

ned the British government—was Nazi invasion preparations were in t a trap to divert large-scale British al tonnage from convoy duty and to ten the collapse of the French colo- empire. Germany was broadcasting asion stories to Britain, the French nies and the outside world. Nazi io stations were saying little of inva- to the German people.

he four psychologists foresaw, too, pite friendly Russian comment on London could take it and how the F. was punishing the *Luftwaffe*, the Russian-German collaboration ld grow even closer.

low do these radio sleuths predict my action? Here is the story in the ds of Professor Ernst Kris as he told o me and as okayed by the British sor after I had secured official help eleasing the facts.

Kris, chief of the four, and for fifteen rs an associate of Freud, does his t talking while pacing up and down. ot many weeks before he took the nge it was still believed in high cir- here that Mussolini intended to p out of the war," said the ambula- prof, simultaneously getting under as a propaganda analyst and an in- ffice pedestrian.

The Italian people were too anti- man, and Italy was too vulnerable the Duce openly to risk joining Hitler onflict against the Allies, according he most accurate information avail- e. To us who had been hearing the ian broadcasts it was clear that if e Mussolini could convince the Ital- people that battleships were at the cy of airplanes, then he would dare them there was nothing to fear from British navy."

How Mussolini was Anticipated

he professor sat down for a second, emembered that he did his most effec- talking on his feet, jumped up and med as follows:

"At a crucial moment in Anglo-Italian tions, when Britain and Italy quar- d over stopping coal shipments from many to Italy and Allied naval re- rcements had arrived in the Medi- anean, the German wireless made a piciously opportune announcement: thirty-thousand-ton British battle- p,' German radio stations broadcast, s been sunk in just over thirty sec- ds by one bomb from a German bing plane.' The Rome radio seized this announcement and repeated it h enthusiastic embellishments. The tish navy, the official Italian station mated, was as good as finished.

"That the German claim was pure ention was evident, apart from Brit- official denial. The battleship was er given a name, the pilot who ught off the feat was never named, h less feted and decorated in cus- mary Nazi style. The German radio tions remained completely silent on fabulous achievement following the t announcement. It seemed signifi- nt, therefore, that the Italian radio tions should continue to elaborate on sinking. Italian broadcasts to Tur- in particular emphasized the failure the British navy."

Broadcasts from Rome to Turkey and Arabia, Kris pointed out, began to stress what was termed "official" American re- ion to German bombings of the Brit- fleet. To these two Mediterranean as, as well as to the Italian people, was stated that the then "Ameri- Secretary of the Navy Edison has ised the American government to shelve further plans for construction of battleships and to concentrate on the construction of aircraft, because aircraft has proved superior to the warship."

"This misstatement of Edison's recommendation even went beyond the German broadcast versions of Edison's report," Kris explained. "The Germans claimed only that Edison had advised additional strengthening of battleship armor. We noted this difference and the Italian reiteration of the failure of the battleship began to assume the proportions of an intensified propaganda campaign. We realized this campaign had one purpose—to prepare the Italian people for Italy's entrance into the war. The conquest of the battleship was patently wish-fulfillment for the Italians who feared war unless they were certain the British fleet could be knocked out.

"We subjected all current Italian broadcasts to a special analysis, noting this strain of wish-fulfillment. There was no escaping the one conclusion. We drew up a concrete report. We stated Italy would soon declare war. It was now approaching the middle of May. Mussolini declared war June tenth."

Let's take another example: Let Mark Abrams, another of the secret four, explain: "During the first two or three days of July, Axis broadcasts, at least superficially, ran along routine lines," Abrams pointed out to me. "Britain was attacked as perfidious for crippling or seizing the French fleet. There were normal accounts of German and Italian successes in the air and at sea. Axis broadcasts in English, intended for British listeners, carried the usual general threats that 'the victorious German forces are ready for the final attack.'

"Over the week end, however, occasional nondescript radio items began to appear in German programs suggesting something else was in the air. There were two cautiously reported quotations from obscure news sources broadcast in Hungarian hinting that a political surprise was possible and that there were rumors of a Reichstag meeting to be summoned.

"Simultaneously a Rome broadcast in Italian suggested that even the English people might soon be casting aside their old statesmen and decadent principles of liberalism. There followed a German broadcast to North America surprisingly declaring destruction of the British empire was not a German war aim, and that such destruction was not necessary under certain conditions. Finally, one of the German stations broadcasting in English stated that the annihilation of Britain was not inevitable and there were hopes of a more sensible solution.

"Remember, these broadcasts were isolated amidst the usual attacks against Britain. Noting these few inconsistent items out of thousands running in a contrary sense, we began combing the world's daily radio output for further material. By the end of the first week of July there seemed to be sufficient evidence for us to conclude that ground was being prepared for a peace feeler. We reported to the cabinet ministers that a 'peace ultimatum is imminent.'

"During the next ten days hints of peace disappeared from all broadcasts from German or Italian stations. Radio propagandists and news bulletins stressed preparation and talk of the invasion of Britain and the certainty of annihilation. To quote Shakespeare, 'We thought the lady did protest too much.' We felt certain a peace ultimatum would be made. On July 19th came Hitler's speech and peace ultimatum."

Psyching the Air Waves

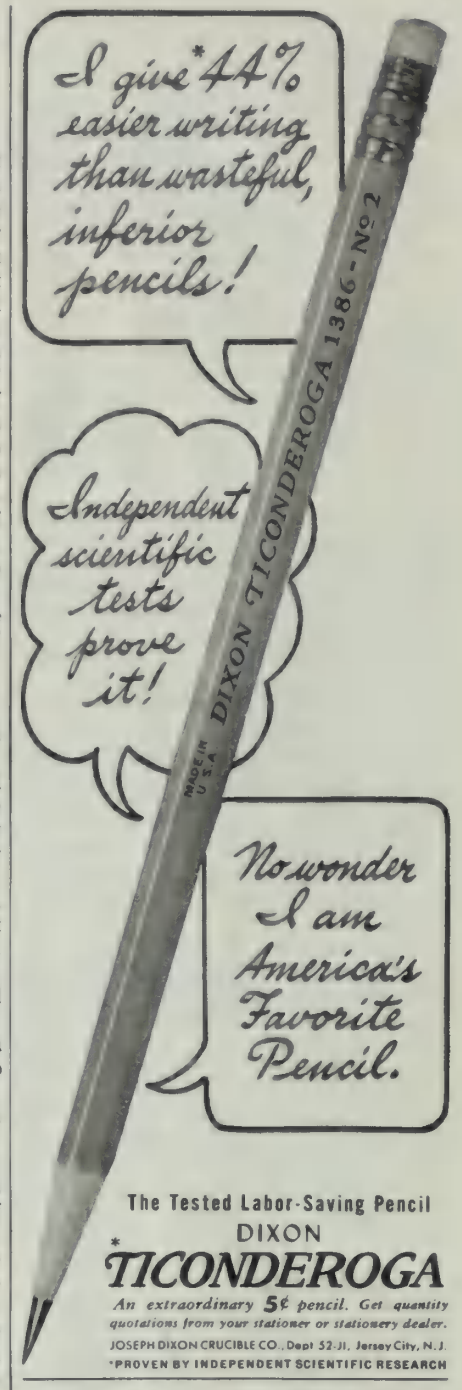
All detective stories in London begin with a fog.

Let me take you to a tobacco-fogged room. John Scarlett Alexander Salt, late of the Royal Engineers, stirs restlessly at his desk. Mark Abrams reaches for another cigar. Anne Outwaithe, an English version of Dorothy Thompson, studies again the large charts in front of her and makes some additional notes. All three watch the square-set, forward-tilting figure of Professor Kris pace and repace the floor.

"It is quite evident," he says, then pauses and asks Miss Outwaithe to check the charts again.

These charts are the exhibits from which deductions are made. They contain significant passages from broadcasts of the week selected at previous meetings as indicative of the trend of the enemies' thoughts.

"Yes, there can be no mistake," the professor continues, "the Nazis are feinting. We must look for action elsewhere. Their broadcasts in Portuguese to Brazil and the Italian broadcasts in Italian to the South Pacific are significant."



Discussion follows, conclusions are tabulated by the hard-working Miss Outwaithe, reconstruction of motives are rechecked by Doctor Abrams and the learned professor, and final instructions are issued by John Scarlett Alexander Salt.

It is Tuesday night. Wednesday morning a mimeographed report, slugged "secret" in minatory red-ink capitals, is circulated to the government. Since this is your first glimpse of these four who have hitherto remained anonymous and who are bound to become famous, let us take a closer look at them.

Salt, a tall, oval-faced, 34-year-old ex-lieutenant of the Royal Engineers, organized the secret four. A Yorkshireman, whose family dates back to the thirteenth century, he gave up a career in the army nine years after graduating from the Woolwich Military Academy to become a BBC program director.

Several weeks after the war started, he organized the Monitoring Service. The service keeps its eye and ear on radio broadcasts throughout the world for the information of official circles. Interesting comments by American broadcasters may grace a cabinet minister's desk several hours later.

Salt has installed for the BBC the Telediphone system. About 350 records of broadcast talks are made every twenty-four hours and three quarters of a million words are caught daily in wax and rubber. Somewhere in the heart of England there is a strange earphoned

LASALLE EXTENSION UNIVERSITY

A Correspondence Institution

DEPT. 140-R CHICAGO

army of men living in huts. They know every language including Maltese and Kurdish. They translate as the broadcasts are taken down.

The vast report is turned over to an editorial staff of about seventy-five men and women who condense it to about forty thousand words. These represent an essential summary of what the wild, but not so impulsive, radio waves have been saying. They are mimeographed and distributed to all government departments.

But it was soon realized that it is still pretty much of a jigsaw puzzle to read with understanding even forty thousand words daily. The governments from whose controlled radio stations news and propaganda pour are striving toward objectives not always plainly indicated.

Certain definite patterns were apparent in the talks picked up. For example, there seemed to be some connection between what the Russians were telling the Rumanians and what the Germans were telling the Hungarians. The Russians were talking about Hungarian claims on Rumania. The Germans were telling Hungarians about Russia's interest in the Bessarabian area of Rumania. What were the Nazis and the Russians up to? Salt asked. It was evident that the Russians and Germans were preparing for a carve-up of Rumania.

Germany and Italy both broadcast in a dozen languages—but it is significant that the Germans do not broadcast in Russian.

Nazi propaganda is not air-fed to the Russian people. There is complete understanding between Berlin and Moscow on this score. If a clue were needed as to the co-operation between Nazi Germany and Bolshevik Russia, none more realistic could be cited.

Well, try putting all this on your phonograph and see if it gets you anywhere except a padded cell.

"Can't some sense be gotten out of all this?" asked Salt, and this is where Professor Kris came in.

The professor is an annoying fellow. Despite his mild looks he likes to probe minds. He suggested that a comparison and study and analysis of the different broadcasts might help not only to put the jigsaw together but reveal what the Continentals were aiming to do. Kris is going to teach in New York before long, having been granted temporary leave. But the professor has outlined the procedure for his colleagues to probe Nazi and Fascist minds and to guess their secrets.

Listen to what the erudite professor tells me:

"The basic assumption underlying our work is that radio propaganda, whether in the form of news bulletins or talks, is planned and purposive, either consciously or unconsciously.

"Where the planning is conscious, and certainly the Nazi broadcasts are deliberate, we start with Hitler's contention that in war words are acts. The speaker of propaganda is in action. Our job is to solve what his real objectives are.

"We have to unravel the real meaning of his words. It is like anagram-solving or a study of tactics. In addition to planned motives in propaganda there is also an unconscious purpose. It is this hidden motive and objective that it is the job of the psychologist to discover. We can often read the minds of propagandists in a way that would astonish them."

In other words, it isn't only what you say, but what you don't say that is going to get you into trouble. And the way you say it and the times you repeat certain details furnishes clues to Professor Kris.

Salt and Kris got to work to study German and Italian broadcasts. T called in two others to help.

The first was Mark Abrams, Ph 34-year-old graduate of the Lon School of Economics. Bespectac whimsical, soft-voiced sociologist, Abrams spent over a year at the Bro ings Institution in Washington, hav won an Eastman Fellowship. American experience and a spell in advertising business swept away a demic cobwebs. Like the professor little doctor is full of ideas about re ing the enemy's mind.

"In a certain sense," he says, Kris frequently points out, our worl like that done by the Institution of thropology on Magic. There is a cl parallel between the primitive tribal the anthropologists study and Gerr nationalism."

Now meet Miss Anne Outwaithe, last, but not least, of the four. Sh the daughter of a former Labor mem of Parliament. In 1918 she went to C many on relief work, then drifted writing. She joined an adverti agency connected with an Ameri bank especially anxious to loan g American dollars to German mur palities. You probably remember th days. For a number of years she hel edit a magazine, World Review.

Brilliant, studious, quietly dres tight-lipped. Miss Outwaithe knows byways and dead-end streets of E pean diplomacy. She has a special kr for putting ideas into coherent form that cabinet ministers may underst At first the ministers didn't pay any tention to what the secret four to say: now their weekly repor eagerly awaited. Very few people e in the BBC know of the work of th four.

When the war is over there wil books by and about the secret f In the meantime, I've told you all ab them as blandly as possible, witi being "too dramatic."

How to Keep Football Stars in College

Continued from page 20

postgrad work," they would remark loftily.

They couldn't afford to tell the frosh they still hadn't passed freshman English. It would have been bad for the morale.

For the most part these postgrads were the fellows who abused the privilege of being dumb. The most affable, probably without degrees, would have already left the campus to sell bonds or insurance. Those who had been given degrees would be teaching and coaching in high schools and developing new prospects for the machine.

I could give you many amusing stories of my labors with these boys. From the day they had left elementary school they had been passed through their classes because of football. Consequently, they had the formal education of the average kid in the sixth grade. Algebra was a required subject for a degree at Alabama. Can you picture one of these big fellows trying to solve the simplest algebraic equation? Or scanning a line from Browning? There was usually nothing for me to do but find the right prof and make a deal.

I remember in particular one great hero who was an All-America guard. He had been on the campus for seven years, and we had labored and dragged him through everything but elementary English. I would sit and read to him and point out and define the various parts of speech. "Here, Spike," I would say, "is a noun. And here is a verb."

He would nod his head, and I would read on. After six lines I would point back to the two words and ask him what they were. He would give me a blank stare, and the session would be ended.

I got Spike his pass in English, however, and the night he marched up and received his degree his professor and I sat in Tuscaloosa's most respectable bar and drank a toast to the great American system of public education.

A Triumph for Education

The classic story of the Alabama campus is the one about the football player in the history class. Having failed all his exams, the professor consented to give him one last special exam.

"I'm going to give you one question," he said. "If you can answer it, I will pass you. The question is: What is the capital of Alabama?"

The beefer studied for a long moment and answered: "Wetumpka."

"All right," replied the professor. "Had you answered 'Montgomery,' your grade would have been 100. Since Wetumpka is 18 miles from Montgomery, I'll subtract 18 from 100 and your grade will be 82 for the course. I congratulate you."

Seriously, however, most of the passing was done through the system of fellowship students at the university. These students teach some of the elementary classes, and they grade virtually all the examination papers. They know that the football team is an asset to the school, and they know what must be done to keep many of the players eligible. They are the ones who furnish most of the elastic consciences.

But the colossal injustice only begins when the great hero gets his degree. He now becomes a favored applicant for a coaching position in some high school. But high schools in the South can't afford full-time coaches. The coach has to be a member of the faculty and spend part of his time teaching history or math or chemistry. And I had to sell those great heroes to school boards as teachers as well as coaches.

When I think of some of the scenes that must have transpired in Alabama schoolrooms during the past ten years, I wonder if I can ever atone for the sins I have committed against the rising generation.

Having been connected with the machine, I naturally dropped into the ranks of "active alumni" when I left the university. I choked back my cynicism with all the usual arguments about the value of team play and high ideals and die-for-dear-old-Siwash. And think of those fellows who would never get an "education" if it weren't for football! Besides, I enjoyed the spectacle, the business rivalry, and, as one ambitious for my school, I couldn't deny that football was our most negotiable asset.

Alabama is now the largest state university in the South, and its growth parallels exactly the growth of its football team in national prestige. Its huge stadium was paid for out of the half-million derived from Rose Bowl games.

But as the Great Dane would here's the rub for me now. I know as my son grows up I'm going to do erything in my power to keep him being sucked into the football mi was saved myself by being too l Then how can I honestly go on rec ing other men's sons for a syste which I know the cards are sta against them?

Boys are Only Human

Take the average American boy t in first or second year high school. day he goes out and makes the foo squad he takes a dangerous step. he soon begins to neglect his classv He learns that he belongs to a fav group—that he doesn't have to stu that if he's good at football he's to be passed anyway. Human na being what it is, most of them tak easy way. From the day a boy s playing football until he falls out s where up the ladder, his chief inter going to be football. It has to be. system demands it. And the day he out—whether it's on the freshman s or whether he goes on to join the heroes—he is going to discover th knows how to do just one thing— football. He is going to find out during the years in which he might been fitting himself to earn a livin has been occupied with mouse and cross-bucks.

Some weeks ago, with Collier's eraman Hans Groenhoff, I examine

ds of a hundred or more products e Alabama machine. We traveled y miles and interviewed boys all the from the Tennessee Valley to the k Belt farms in southern Alabama. y of them were coaching and "teach- in small-town high schools—manu- uring new prospects for the Tide—at ies of $900 to $1,350 a year. The ranged from complete unemploy- t with "no prospect of work" up to John Miller, All-Southern guard in , who, as premier snuff salesman in TVA counties, seemed to be faring of all.

e found Roy "The Ripper" White g in the teacherage at a D.A.R. high ol on Sand Mountain. His wife es home economics at the school, The Ripper, unemployed, hunts rrels and helps around the house. A shed knee has given him a deep . His younger brother died a few s ago after lying paralyzed for a th as a result of injuries received in gh-school football scrimmage.

played two years of freshman and Shirt ball," The Ripper said, "and 33 I was third man behind Dixie ell at left half. I got in the Stan- game for two minutes. But in '34 hurt and crossed up with Thomas, they threw me to the 'automatics.' nsferred to a smaller school and l to carry on with my education, but as no use." (By being "thrown to automatics," The Ripper was refer- to the university rule which auto- cally expels any student who fails ass eight semester hours of work. n a football-scholarship player is ped from any of the various squads, automatics" usually catch him, e he no longer receives tutoring or ential aid.)

ny Holm, All-America fullback in played pro football for six seasons, when "five freight trains" hit him a kickoff in Pittsburgh, a knee led the wrong way and his playing s were over. He has worked as a cer in a gambling house outside ningham, a clerk in a state whisky e and now has a commission job in rmingham furniture store.

mmie Moss was playing with his two hren the night we called at his four- n farmhouse in Morgan County. mie and I were kids together. In entary school he was smart enough. in high school he learned he was a tackle. He went to Alabama the r I did, on a football scholarship.

remember the day he left the univer- . It was three months after he had ered. His knee had been wrenched first week out and he had had no nce to make himself seen among those es of striving freshmen. His scholar- o had soon played out. He was a pic- e of dejection. He was heading back he small town we came from, and re'd be no band to meet him.

"How can I go on?" he asked me. "If I studied in high school and planned education, I wouldn't mind working way through. There's nothing for me do now but go back home and try to a job."

Jimmie is now working as a helper in a Decatur steel-fabricating plant, try- at thirty-three to learn a trade he ght have learned in high school. I've n told that when the rest of his crew cocking their ears toward the foot- l broadcasts on Saturday afternoon, Jimie hammers doggedly on and dsn't bother to listen.

n 1928 Dwight "Pug" Deal, a sopho- re at the university, was hailed as t toughest blocking back in the ool's history, but he was fired off the uad by Coach Wade after Alabama t to Tennessee.

We found Deal working on a farm in Tuscaloosa County.

"It's been tough since those days," he said. "But I've gotten over my bitterness. Wade knew I wasn't any more guilty of taking a drink than the other fellows, but he had to make an example of somebody."

N. A. "Nap" Powell now drives a soft-drink truck in Selma, Alabama, after spending several years "taking in washing" for a laundry. Alumni from Thomasville, Alabama, recruited him from Selma for their high-school team, and then sent him to Alabama. He fell out of the Red Shirts.

Neil Rogers is a WPA interviewer in Florence. Don Campbell has fought back to become the announcer for a tiny radio station in Selma after buckling a knee with the Red Shirts.

Three thousand hopeful young men have entered the University of Alabama to play football during the fifteen years I have been close to that machine. Fifteen hundred fell out by the end of the first semester. All of these initial casualties had played football in high school and had learned little else. When the athletic department dropped them, what could they do? Even if their parents could afford to send them to classes, they were not prepared. They had come to college prepared only to play football. Had football not robbed them of their opportunities in high school some of them might have worked out successful college careers.

Yet the 1,500 who fell out first were more fortunate than most of those who stuck. They got their jolts sooner and have had more time to recover.

Why Football's Lost a Fan

Of all the 3,000 I don't know a single one today, outside coaching or professional football, who could be pointed out as an eminent success. I have known only one who was unusually intelligent. He was Freddie Sington, All-America tackle in 1930. Sington, a Phi Beta Kappa student, wanted to study law but found it impossible with his football activities. He played professional baseball for a while and is now selling automobiles in Decatur, Georgia.

We fellows who have helped make football what it is today may as well face the facts. We've come a cropper. In the name of sportsmanship we've built a rah-rah empire that's phony to its roots. We've taken a fine game and converted it into a monster which takes from a boy his formative years and leaves him nothing but a letter to wear on his chest, a spavined knee and a false sense of values.

What's happening at my alma mater is only typical of what is happening in all sections of the country. And I said *all* sections. We who have recruited Alabama's players know who our competitors have been. And we've offered no higher prices than were necessary to compete in the open market.

Millions of my fellow fanatics will have seen some great grid shows when this season with its bowl games is over. But I won't be there any more. I'm going to be down on my farm using the war whoop to call my hogs.

On those days when I'm riding around over the state, instead of recruiting a couple of blocking backs, I'm going to stop at the playgrounds and chat with the boys. They'll ask me about the Tide. And I'm going to say:

"Sure, the Tide's all right. But say, did you fellows ever play badminton. Now there's a real man's game."

I know. Next time I go around most of them will still be playing football. But ten years from now when they come to see me wearing those All-America pins, I won't have to duck out the back door or squirm guiltily in my chair. I can look them in the eye and say:

"Old friend, you remember I told you badminton was a swell game."

Men are drafted by CHANCE

They're promoted on ABILITY!

UNCLE SAM may call you to defend America — that's a matter of chance.

But your boss won't "call" you to give you more money or a higher position — unless he knows you've *earned* it! In Business and Industry, men are "drafted" to higher positions on one consideration only: *Ability!*

And one of the biggest factors in ability is TRAINING — *knowing more* about the job—*being prepared* to step into a bigger one!

How do YOU stack up on these counts?

If you don't have the training you need to succeed — *get it!* By spending an hour or two of your spare time each day studying an I. C. S. Course along the line of the work you are doing — at a cost of only a few dollars a week — you can fit yourself for a bigger, better-paying job in a few months! That's been proved by hundreds of thousands of I. C. S. graduates, now *leaders* in their fields!

Mail this coupon — it will bring you complete details on how I. C. S. can help *you!*

CLOTHESPIN NOSE

Sensational *extra* help for colds—with Luden's! These famous cough drops not only help soothe throat, but release a menthol vapor—which, with every breath, helps penetrate clogged nasal passages, helps relieve "clothespin nose!"

Copr. 1940, Luden's, Inc.

Strikes in Wartime

WE USE the word "wartime" advisedly in the above title. The United States is putting forth a double-barreled war effort. We are building a huge and multiplex fighting machine for ourselves, and we are producing war supplies for embattled Britain as fast as we can.

If this effort is to succeed, we've got to produce, tremendously and steadily and with the least possible friction, for the duration of the hostilities.

Hence, one of the biggest questions now leering at us is: What to do about strikes in plants working on war orders? That question has to be solved, and solved right.

The Vultee airplane-factory strike in California touched off a lot of hair-trigger proposals. Tops in this line, so far as we know, is a suggestion that such strikes be made treason by Act of Congress. There is considerable talk about a compulsory arbitration law; some talk about some kind of flat *verboten* to be clapped on war-plant strikes. And so on.

We believe that in a democratic country any thou-shalt-not law aimed at strikes is a futile law, and one that will defeat itself.

France's Daladier government tried such a decree November 30, 1938. It broke the 24-hour general protest strike called for that day by putting the railroad workers under military orders and practically drafting other essential services. But the longer-range consequence of this Hitlerish act was that the French government lost the confidence of French labor. This was one big reason, as we read the record, why France came unglued so fast when Hitler tore into it.

We think the democratic and the workable solution for the United States is to be found by approaching the wartime strike problem from the democratic angle.

A working model for such a solution, indeed, already exists. We refer to the Railway Labor Act.

Under this law, a 60-day waiting period is required after a strike vote is taken by any railroad union or unions. During this period, there is all manner of time-killing, fact-finding, shilly-shallying and fooling around. The idea is (1) to adjust the trouble peaceably, and (2) to give passions and prejudices on both sides time to cool off.

Extremists on both sides hate the Railway Labor Act. There is always a lot of wild talk when its velvet-gloved fingers clamp down on tempers and old hates. But the net gain from the R.L.A. has been that railroads in this country have lost no operating time because of strikes since the act was first put into effect b in 1926.

Which is as it should be. Railroads, tho privately operated, are what the lawyers affected with a public interest—meaning the public's interest in their steady functio is paramount over the interests of either owners or the railway workers.

If the railroads are affected with public terest, then even more so, at a time like thi any industry or plant producing directly or directly for war purposes. The ultimate st in our defense effort, and perhaps in our l for Britain, is our very independence a nation. If that isn't a public interest we d know what a public interest means.

If the railroads, with the help of broad sioned, unhysterical legislation, have been to cut their strike problem to the bone, then problem can be cut to the bone in the arms dustries, too. And it can be done in the de cratic way, without recourse to iron-fist meth

We believe American labor will prove as ing to co-operate in this matter as any o part of the population. No group or class h monopoly on patriotism in this country. offer labor a fair method of detouring wart strikes, and we expect labor will break a speed records to accept it.

Repeal the Johnson Act

DURING the Johnson and Neutrality Act debates in Congress before the war began, it was often said that these were proposals to tie ourselves up for a future which nobody could foresee. That is a mistake, because the future has an ornery way of bringing to pass the lone eventuality that didn't occur to you when you were trying to outguess it.

The Johnson Act forbids loans in this country to nations in default to the United States. It sounded very righteous when it was passed.

Now, however, we find the great majority of Americans, according to all the indicators of public opinion, convinced that Great Britain is fighting the battle of democracy vs. dictatorship, and that it is our duty to rally around with every conceivable aid for Britain short of war.

Time has passed the Johnson Act by. All aid short of war includes credits or loans or outright gifts to Great Britain when it begins to have trouble paying cash for the war supplies we are selling to it.

As long as the Johnson Act stays on the books, we are unable to extend that class of aid to Britain. The dead hand of the past keeps us from doing something which the majority of us want to do and think we ought to do. (We use the phrase "dead hand" only figuratively, because Senator Hiram Johnson of Californ very much alive, and will probably put u wildcat fight to keep his law on the active l

Let's just repeal the Johnson Act. Also, portions of the Neutrality Act as hamper extension of aid to Britain in accord with wishes of the majority of us. Let's start again on the job of adjusting ourselves world which, wicked though it may be, sh no signs of abandoning war.

And hadn't Congress better give up t attempts to clamp dead hands on the fut When it becomes the present, the future ways breaks the dead hand's grip, anyway

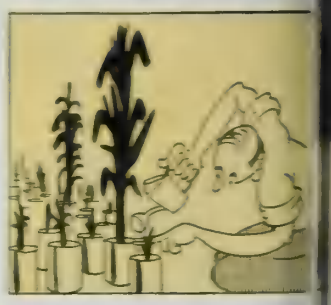
COVER VERNON GRANT

ANY WEEK

WE'VE just been visited by a Western politician who told us that this was his first trip East in fifteen years. "I've come in to tell you," said he, "that you're a ——" We became interested. "Ten years ago," he went on, "you came to my state and wrote a piece about a group of us who were trying to run the state. You said that we were thirteen crooks. When I read that I resolved that you were a —— and that I would tell you so as soon as I met you again. And now that I've called you a —— I hope you'll do me the honor of having a drink with me." It was while we were having the drink that he said: "About us thirteen being crooks. My dear sir, you were twelve-thirteenths right."

BUT it was in Washington, D. C., at lunch that the menu told us that we could have a General Hugh Johnson salad. We asked the waitress what it was. She said that it was just the chef's salad plus a couple of hard-boiled eggs. "Fresh?" we asked. "Well, what would you say?" demanded the waitress.



QUITE a number of our correspondents have worked up a warm interest in those military bases we're establishing on British land. They've become quite agitated, too, that our Navy is casting longing eyes at Martinique, which is still French. "Things are coming to a pass where it wouldn't surprise me," says Mr. Joshua Billneat of Eastport, Maine, "if we finally established a few bases in the United States." And Miss Cora Yote of Brunswick, Georgia, is a little apprehensive lest we run out of swapping material. She's a bit fearful that we'll wind up owning acreage in all parts of the British empire. "By that time we'll be all out of navy, planes and ships. We'll have all the bases and England will have all the navy. Then we'll either have to lease the bases back to Britain for money to build a new navy or lack a navy to defend the bases. Anyway, we'll wind up calling on the British empire to defend the bases we acquired for a navy we won't have." But Mr. John J. McAlarney of Toronto, Canada, has heard rumors that Eire, cold to England's longing for defense bases on her southwestern coast, will soon ask the United States to establish a few naval and air strong points on her land that, "should anything disconcerting happen to England, Ireland will be safe from Hitler." Mr. McAlarney has a letter from a member of Eire's parliament, the Dail. "It would be a great shame," writes this statesman, "for Eire to be saved from an irreparable calamity by the British crown. The true Irishman would never again be able to raise his head. Eire would be proud to defend her shores by permitting the United States, to whom we have ever been friendly, to guarantee our freedom."

HOWEVER, there are too many columns devoted to solving the world's major problems. Not that we're complaining. It leaves it to us, feeble fellow that we are, to wrestle with the small perplexities that are ignored by our betters. For example, we find in the Crisp County News, Cordele, Georgia, that one of that journal's editors would like someone to do something about our country's transportation situation. "We feel bad," writes he in his own columns. "Just completed a 150-mile trip in a day coach on a midnight train where we slept with eight strange women and two men and not one had a piece of cover."

ONE of America's largest corporations recently hired an expert in Human Relations. His job was to set up a system of Efficient Friendliness, a slogan of his own invention. He was horrified, a week later, by seeing a dozen employees gather at the desk of a fellow worker and sing Happy Birthday to You. But he put a stop to that. He made a list of impending birthdays and, at the first opportunity, handled it with Efficient Friendliness. The person whose anniversary was thus to become a model received the following on interdepartmental stationery: "Interoffice Correspondence Only. Form C-277-BG. From Department of Human Relations. To George W. Hix. Subject: Happy Birthday. May good health, loyalty, industry and happiness be yours for years to come. Reply within twelve hours to Human Relations—Desk A-1. Signed: Your Fellow Workers."

AND from our Number One agent in Hollywood, Richard English, we learn that the results of the Draft Act are not breeding the happiness its sponsors promised. For example, writes Mr. English, several of Hollywood's most talented musicians were told by a fellow, who they think should be investigated by the Dies Committee, that they'd be immune from the draft and permitted to continue their celluloid careers if they'd enlist in the Marine Band in San Pedro. Several of them did, including one of the best trumpets in the country. "So these guys laughed at all the others in the union who were worrying about being drafted," reports Mr. English. "So what happens? The band leaves for Panama with the rest of the Marines for a two-year stretch. And trumpet is petitioning Washi a discharge from the service, was lured in under false prete I wouldn't have you think merely because he's now get dollars a month instead of dred and fifty a week. It's ciple of the thing."

AND, while we hadn't int make this a Hollywood col cumstances seem to have got of us. From the New Packa Mr. M. M. Dukehart, Jr., of City, sends us a clipping caption Another Use for T "On the first of April, the manager of Metro-Goldw phoned Mr. Jacobs of the Hardware Company for ten of our good No. 2 Plain C Sanitary Cans. They were but Mr. Jacobs was curious what use a movie studio ha cans. Mr. Jacobs investig found that M-G-M planted c cans and after it had grow ficient size would use it for filr fields. They would use the in one area in the morning fer the field to another ar afternoon." We did a bit of tion on our own hook and go tion from an assistant movie who added to the general in with: "And that, my fine dope, is how we get corny."

WE have a complaint from Nebel of Wilkes-Barre, Pen As far as Miss Nebel has be find out the entire country of bottlenecks and crossr doesn't like it. Our troubl come to believe, is that ought either to fight its wa bottlenecks or stand perple crossroads but shouldn't try at the same time. It is not can way of life. We agree Nebel, a woman of action sent the Defense Commiss framed slogan. The printing ing cost her $3.60. It rea Necking and Let's Go to T

AND another from Mr. Fleider of Trenton, New have just read your magazi accept my resignation."

BUT he'll be back. . . .

'N a troubled world he retains his freedom. He .. can own property, send his children to school, worship as he chooses, express his opinions, get his news through a free press and radio. *He* is the typical American father.

Across his path, recent years have placed many obstacles—depression, unemployment, floods, droughts, disasters, and now, the shadow of wars abroad.

And yet, inspired by his unrestricted right and burning desire to provide for his family's welfare to the utmost limits of his ability, *he has conquered every hardship.*

His home, with its modern Heating and Plumbing, has been a vital source of comfort and strength to him—an object of envy to the rest of the world. Heating safeguards against dampness and cold upon which illness thrives. Plumbing supplies the fresh, pure water so essential to well-being and carries away waste so dangerous to health.

And we are proud of the part we have played, through Heating and Plumbing Contractors, in providing this comfort and health protection for millions of Americans in every walk of life.

Wing Talk

OF COURSE there are others—but pursuits and bombers are the war planes you hear most about in news from the Battle of Britain and from the Battle of Washington.

There's something about a bomber—a naïve tangibility, a big-dog forthrightness, a ham actor bass-voice and posturing that keeps it from scaring you (after you are raid-broken, as the Chinese say) as much as it really should.

But the pursuit is no show-off. It is the snake of the clouds. One American builder recognizes this characteristic by naming his ship after the reptile that means lurking sudden death to the natives of India—cobra. A young flugjaeger, or flying hunter as the Germans call a pursuit skipper, who had been to the University of Chicago and remembered Midway levity, told me: "I think my pursuit is like an accident hurrying someplace to happen—to someone else."

The pursuit is boiled down and skinned to the last fraction of an ounce for deadly efficiency. A lot of motor, a little body: a lot of brainy guts, a little gasoline. It is lean, pure killer: pound for pound the slickest one man has yet devised. Perhaps you never realized what a precise instrument it is. So take this X-ray look at the confidential (to United States citizens only) figures of a typical American pursuit:

The whole ship weighs little more than a single naval torpedo. And the engine with its adjuncts weighs practically as much as the plane itself: 2,300 pounds more or less for each. Odds and ends such as instruments and controls add 630 for a total "empty" weight of about 5,200 pounds. This includes 60 pounds for the 70,000 or so rivets you can find in the ship; a partial answer to why planes can't be ground out as fast as automobiles.

To reach the gross or fighting weight you add 2,000 pounds of "useful" load. Here you come upon a heart-wrenching reminder that the pursuit, modern war's outstanding defensive weapon, is a slim and young lad's vehicle—in the coldly poignant calculation of only 160 pounds for pilot and parachute. The parachute alone comes to 20 pounds. Machine guns and cannon, plus ammunition, make up 850 pounds; the gun sights, 8. Brimful gas and oil, about 700 pounds. Armor plate and bulletproof glass, 155. The balance of the useful pounds includes radio and oxygen apparatus.

When you put "business paint," o camouflage, on this pursuit you add 1 pounds and spoil its complexion, whic becomes minutely pebbled, so tha about 8 miles per hour is knocked off th speed at which the original eel-slee body could fly through the air. Camou flage nowadays is mostly flat black fo the undersides, green and olive dra above. The paint used by our Air Corp was developed over years of research a Wright Field and I hope the F.B.I. won' be sore if I whisper you could buy th makin's for a few pennies at your corne store. It can be sprayed on in a jiffy b portable means right at the field; whic is a good thing, because the pain washes off if the pursuit gets caught i rain or passes through a wet cloud.

Compute everything, you find jus over 7,000 pounds. American pursuit cost from $65,000 to $100,000, ready t go. The propeller will cost $3,000 t $5,000 of this; the engine, $12,000 to per haps $18,000. The pilot's flight trainin and subsequent experience cost the gov ernment about $40,000. His parent probably shelled out $5,000 or more fc his college education. Altogether there an actual dollar investment of aroun $17 per fighting pound, which, based o latest European reckonings, might la a minimum of 2 minutes or a maximu of 5 weeks on a blitzed front.

Not counting the gasoline, insuranc —or pension.

THOMAS R. MARSHALL, who calle himself Woodrow Wilson's only vic would have to find another adjective he were alive to repeat in this fligh minded day his famous crack that "wha this country needs is a good five-cen cigar!" You have been puzzled by th rule that permits only cigarette smokin in air liners. It's because cigars ar pipes are dangerous—not to the safet of the plane, but to the stability of you fellow travelers' stomachs.

THE plane introduces a new possibi ity into sports: truly "nationa leagues. Major baseball structures gre on railroad netting of important popu lation centers, each no farther than on night's journey from any other. Citi mushrooming on the Pacific Coast we cut by distances from the National an American leagues. Now the air lin fetches the entire continental Unite

SAID THE ELECTRICAL MOUTH TO THE ELECTRICAL EAR...

. . . "*Joe took father's shoe bench out. . . . She was waiting at my lawn.*"

If you were passing through the Bell Telephone Laboratories today you might hear an electrical mouth speaking this odd talk, or whistling a series of musical notes, to a telephone transmitter.

This mouth can be made to repeat these sounds without variation. Every new telephone transmitter is tested by this mouth before it receives a laboratory or manufacturing O.K. for your use.

This is only one of the many tests to which telephone equipment is subjected in the Bell Telephone Laboratories. And there is a reason for the selection of those particular words.

It happens that the sentence, "Joe took father's shoe bench out," and its more lyrical companion, "She was waiting at my lawn," contain all the fundamental sounds of the English language that contribute to the intensity of sound in speech.

Busily at work in the interest of every one who uses the telephone is one of the largest research laboratories in the world. T standing development of the telephone country is proof of the value of this re In times like these, the work of the Be phone Laboratories becomes incre important and necessary.

e conqueror, power—and oom of endless loneliness

HEN the curfew sounds at night in Warsaw and Paris and Rotterdam and Copenhagen, people go silently. The only sound left in ce life-filled streets is the loud, arching of police who hear their ootsteps resound along prome- with unfamiliar names. Some- ne greets another in triumphant hat ring hollowly on the silent, air. "Good evening, Herr Lieu- All is well?" "All is well, Herr hant. Everything is quiet."

use, of course, there is no longer olt left anywhere: it has all been out of the people who happen to in that country. Sometimes one han, talking to another over his cheeses and beer, or his ver- cassis (what bilge these people A degenerate race!) says, "They orn to be slaves! Look at them eaten to the ground!"

g Captain Roth Klemperer was could find nothing to complain in the behavior of the quiet It would have been hard for him ere been rioting and trouble be- e had such happy memories of aceful country. He knew many well, especially one family Haunstrup. They had a big, ht farm an hour or two out of agen, and Roth had often spent rs there since first he had come mark in 1915, as a war refugee. Haunstrups had taken him in then. n he arrived at the farm in sum- nton, strong as a young tree, rush out to greet him, and they nstantly begin to make plans for d talk about the farm prospects. was interested in scientific farm- l Roth was interested in science. greet him was Aunt Mathea, the and gentle mother who was so ul that everyone loved her. She ught school until her eyesight and after that she was still able age the household and give it

come, Roth," she would say,

had no right!" she said, and icksilver behind her eyes had l black. "I had!" he shouted

kissing him on both cheeks. "You are taller again, I see."

He would say, "Just half an inch," and think that her face felt like rose petals.

Margreta, the shy youngest of the family—three other sons and daughters were working in America—would one day be as beautiful as her mother. Quicksilver shone behind her eyes and made it impossible for her ever to be quite motionless. She always had boys clustering around her, as if, her brother told her, she were no more than a lump of honey on a plate. She would wrinkle her nose and say, "They think I'm sweet until I sting them—like this!" She laughed and flicked him sharply with her fingernails. One of these boys was Holger Lunoe, who lived on the next farm. He was tall and dark-eyed with a hidden streak of wild energy and humor that pleased Margreta. Holger and Anton used to discuss farmers' co-operatives until Roth and Margreta were bored and wandered away from them.

There was so much to do in occupied Copenhagen that Roth hadn't yet been able to get out to the Haunstrups' farm. He would not admit to himself that he hesitated to go there in his new role.

He remembered Margreta as he had last seen her three summers before. He had appeared, in his new uniform, at the gate of the thatched white house with a pear tree trained to grow flat against the sunny wall, and a tall, beautiful girl had met him. Her eyes were as gray as the harbor at dusk and there was a gracefulness in her movements.

"Margreta?" he said, astonished. "Why, you've grown up and got beautiful!"

She laughed aloud. "Or is it that your eyes have merely learned to see?" she asked mockingly, turning to Holger who was pruning a small tree on the lawn. "Holger thought I was beautiful even when I didn't have my front teeth."

Roth bowed stiffly from the waist. "You were," he said, and felt himself flush to the roots of his sand-colored hair, cut in the military way this summer. He looked at Holger, in faded corduroys, and felt quite scornful until that dark, mocking face turned to him and that deep voice said, "Hello, Boy Scout." Roth recovered his dignity slowly.

"Hello," he said. "When I left last fall you were fixing up trees, too."

Holger looked at him calmly. "It's not a bad thing to do."

THAT was almost the only exchange of civilities between them that whole summer, for they had both changed as much as Margreta, and she stood between them. Holger was stubborn and adult, the respected head of a local co-operative. Older farmers, even such successful ones as her father, respected Holger's judgment.

Sometimes Roth wondered if there was an understanding between Margreta and Holger. There was a way they had of looking at each other. But he would not think there was because he wanted Margreta himself.

"So you're going to be a soldier," she said. "I thought you wanted to be a chemist once."

"Once," he said impatiently. "When I was an unambitious boy."

Margreta said, "Here we leave the army to those who want fine uniforms. The rest of us have too much to do building Denmark's future to dream of conquest. We are a small country and content to stay that way."

Roth said earnestly, "Some day there will be no small states in Europe. It is uneconomic. There will be one or two big states instead."

Margreta raised her eyebrows. "Gobble, gobble, like a Strasbourg goose," she said irreverently. "Perhaps instead there will be many small states all in one federation, such as Holger dreams of."

Roth grew angry and shouted, "That's nonsense, I tell you! You are co-operation-mad in this country! You *will* not realize that one country must rule the rest!"

Margreta looked at him and suddenly she was so remote and yet so desirable that he rushed at her and held her against the trunk of the tree that Holger had kept alive. He was full of an angry passion, determined to make her respond. At last she did and then she wrenched herself away.

"You had no right!" she said, and the quicksilver behind her eyes had turned black.

"I had!" he shouted. "I am a man and you a woman, that's all the right I need!"

And then he kissed her again and she flung her head sideways so hard it cracked against the tree trunk.

"I choose my own man," she "Let me go!"

"No!" he said.

Holger's voice was very dee quiet. "Margreta wishes to go," h and knocked Roth flat with one sw his enormous hand. Roth glared as he instantly sprang to his feet.

"You wish to duel?" he asked, ing out the words between his tee

Holger laughed aloud, throwi head back.

"Oh, for God's sake, Roth," h "You're not the Student Princ know. You were bothering Ma that was all." He slouched off t Anton, who was going around the with the cattle inspector. The strups bred prize cattle.

THERE was a feeling of strain b Margreta and Roth during the remaining weeks of summer; som she could not seem to meet his ey sometimes when he looked up sud he knew she had been watchin thinking about him. The troubl he didn't know what she was thi until the last evening.

"Roth," she said, and she had p hand gently in his. "You are so s compared to the quiet boy who u come here—maybe it is the un maybe something else. I am att to you—I would not deny that. have a feeling of distrust about yo and I always feel those things toge I cannot seem to separate them. telling you this so you will kno things are with me."

Roth said, "Let us leave thing way. I will come back during the —Anton and I are going skiing i way at Christmas time—and perh then you will know whether you l or not." He had thought then ho erous he was to give her time, w could force her to his will if he to. He went on with words tha prised him: "You are all the t may never have again if you w love me."

There was silence before Ma said in a muffled voice, "I hope love you, then, but I must be sure. you come in winter I will know."

HE HADN'T gone back that He was sent into Austria an that into Czechoslovakia. He be a captain, known for his devo the ideals of state and leader an he thought of Margreta it was wonderingly. Now that he was Copenhagen, he could not stop t of her.

Sometimes Roth wondered wh ple thought when they looked Raadhus and saw the swastika f over it. Naturally they did not s

"It's a different city," Lieu Herring said enthusiastically to perior, reporting progress. "It wi be all in order."

"No doubt," Roth answered for it had suddenly come to him these few months the old Cope had put on a disguise. This Cope was much like Vienna occupi Prague, or even Paris, and he had den dizzy feeling that if all the were the same, if all custom turne man, and all conversation beca polite, submissive talk of beaten it would not be pleasant.

He looked out of the windo saw many things that he remer from an old dream—flower-t

Two beacons in the life of a lonely man—the girl he had intended to win, and the girl who won him

TOM BURDOCK left the group of men around Earl Stone's bunk and the talk of the New Year's Eve under they planned in town that night. They were kids, most of them, and talked big. He didn't laugh at them, for his ideas were not strangers to theirs. There was just this difference: He found no need to shout about it.

Burdock went to the door of the bunkhouse and stood there looking out across the winter-still valley toward town. There was a girl who lived in that town on Maple Street in a neat white house. She belonged to one of the respectable families there whose lives were so far removed from his. He had seen her last two years ago. Each time since then that he had come near that town as the work in the woods shifted, he had thought of going to see her, but each time things turned out differently.

From where he stood in the door he could see the woods road dropping down through the timbered section, paralleling the frozen river, then striking straight over the snow-covered barrens to the first of the remote homes on the edge of the wilderness. A light was already on in this first house—or it might have been the reflection of the early setting winter sun. Burdock looked a long time until he saw that it was a light. That house and the people in it were strangers to him—but the warmth and the security they represented to a man without a home were deep. Seeing him standing there, a big, slow-moving man, muscle heavy and scarred from work and what he called good times, those behind him in the bunkhouse would never have guessed his thoughts—so strong is a man's reputation, his outward way of living. And even to the man, himself, certain wants lay fallow until a seed grows. The lamp in that unknown window brought stirring life to this seed. The growing hurt.

Burdock walked back into the hot room. There was a way of soothing this hurt, and he knew the formula well. He went to his bunk, kicked off the wool slippers, and put on the high oiled-leather boots he wore into town. He dressed without hurry, but there was little care in his choice of clothes. His dark, deep-set eyes moved over his things indifferently.

He saw Earl Stone, Chet Loving and Cort Gregory watching him.

Stone said in a quiet, instructive voice, "Now there, boys, is the only gent in this camp who knows *all* the ways of raising hell."

Burdock regarded Stone soberly.

"You know this town, Tom?" Chet Loving asked. "Didn't you drive logs on this river before?"

"I was here two years ago."

"Town's open, isn't she?"

"Wide open."

"Attaboy!" Stone said. He rubbed his hands together. A gleam brought light into his eyes.

Cort Gregory left the group and strolled over to Burdock's bunk. He sat down on the bench beside Burdock and lit a cigarette. He looked at Burdock through the mist of smoke. He, of all the men in the bunkhouse, knew Burdock best. Burdock had found him in a free-for-all brawl in a saloon in Eastport, and had saved him from a serious beating. They had peeled pulpwood together three summers ago near Westerly on the Air Line road, and had been in the big drive on the Machias last spring. But Burdock knew that even Gregory never guessed the thoughts that stirred his mind.

Gregory said, "The boys are going to be hard to handle tonight."

"Don't try," Burdock said, "this is New Year's Eve."

HE SAT on the outside of the company truck's cab seat—his right arm against the wall of zero air. Across the roar of the engine, and the talk of the crew in the body of the truck, Burdock let his mind play with the memory of this road leading to town—of the town—of the girl in the town.

The thought came to him then that he could go to see her, that there was nothing to keep him from going but himself. If she wasn't home he would go down to Water Street. If she was home . . . ? His mind stopped there. "I'll get the boys started at Lunk's," he said to himself. "Then I'll go out to Maple Street. I won't even have a drink until I get back later. . . ."

The men were feeling good with company checks warm in their hip pockets.

"Which way do we go, Tom?" the driver asked.

Burdock saw the divided road ahead in the white of the truck lights and said, "Go left." This road led to the East side—to the mills, the row of saloons on Water Street. The other road led to the neat white houses on Walnut and Maple—to the homes of the people of the town.

He looked down the darkness of that road and saw in the distance the faint glow of the lights and saw in his mind's eye the last house on Maple Street. He said, "It's two more miles, boys—to Lunk's."

The driver was fussy about parking; he wanted the truck headed right—facing the road out of town—with nothing to hinder him when he got behind the wheel to start back for camp. Earl Stone kidded him. Tom Burdock stood on the snow-packed sidewalk, his back to the truck, his eyes on the bar inside

(Continued on page 51)

She beat her fists against the wood and shouted: "Cowards! You ought to be ashamed. Five against two! Get out of here"

Key to our defensive sewing-up of the Caribbean is France's Martinique, with its excellent harbor at Fort-de-France (see inset map) which would make an ideal base for the U. S. Navy. Air-line distances to Panama Canal from San Juan and projected Trinidad bases are indicated

Our Designs on Martinique

By Frank Gervasi

A stinking pearl on our doorstep, Martinique has the best harbor in the Lesser Antilles. We need that harbor to complete our Caribbean defense line, says the Navy. The rest of the island is sheer liability. Collier's rushed Frank Gervasi there by air. Here is his report on this disheartened fragment of the French empire; its ships, its planes and its bewildered inhabitants

MARTINIQUE, which until June 13th last, the day France fell, was merely a smelly stopover on a Caribbean cruise where you could buy Rue de la Paix perfumes at Woolworth prices, has become an international bombshell with a slow-burning fuse. It is an island of bewildered men, of lies, propaganda and censorship, and that's not all. Lies, propaganda and censorship are the flora and fauna of a correspondent's habitat. On Martinique he encounters something new, incredible—unless he knows France and the pride of Frenchmen and their shame and hurt in defeat.

Confusion begins, for the correspondent, the moment he sets his feet onto the mucky dock of Fort-de-France. Right under the noses of censors, customs inspectors and policemen, a stringy individual with a mouthful of secondhand gold teeth and a coffee-cream complexion wobbles up and gives the correspondent the low-down.

The island, he tells you, is 90 per cent American. The natives in the hills, who are now Frenchmen, want to change their citizenship right away. For further details please see Monsieur So and So and at that point Coffee-Cream's voice drops to an indecipherable series of sibilants.

You arrive at the shuttered warren they call a hotel and, after a shower and a change from the gluey clothes that became soaked in perspiration while listening to Coffee-Cream on the sun-soaked dock, you go and sit down in a spavined chair in the Bar Normandie of the Hotel de la Paix. You order a rum punch and listen to the rain. It descends with the sound and weight of surf.

The Harbor's the Thing

The water gorges the gutters—there are no sewers in Fort-de-France—and the filth of a city of some 50,000 blacks and 3,000 whites and quasiwhites slices through the narrow street, past the sidewalk-level door of the bar, to foul the Caribbean a few hundred yards away. Fort-de-France was built on a swamp. As you watch the rain turn stately palms into bedraggled harridans with unkempt hair and as you listen to it you wonder more than ever why anybody would want Martinique.

Then the sun; again its light is pale yellow, almost white. The city steams. The air is thick in the nostrils and heavy with a thousand stenches. You have a walk around. First, the harbor.

The harbor of Fort-de-France, which was Fort Royal when the ships of the line of Admiral de Grasse were bosomed there, is deep, wide, long. It is sheltered from the tireless trade winds by high, green hills. It is, even a layman can see, the best harbor in the Lesser Antilles, from Port-of-Spain to San Juan.

Gold-braided men of the American Navy, hard-boiled men who think in terms of 16-inch guns and national security instead of in political terms, told me candidly that the United States ought to have that harbor. We don't, they added, want to own the island, or own any Frenchmen, nor inherit their rum-and-ruin economics. We merely want that harbor as a base, as another tooth in Uncle Sam's Caribbean denture. Right now there's an ugly gap in it between Puerto Rico and Trinidad.

Martinique would make the best base in the Lower Antilles. Dynamite and steam shovels and millions couldn't improve very much the naval and flying-boat base nature made at Fort-de-France. There's little dredging t done, for one thing. Dredging, s costly business—and the multimill dollar machines that do the dred will have to be brought down from United States—will account for muc the time and money to be spent on West Indies defense system.

We talked about the island with men who fly the PBY patrol boats on neutrality vigil that extends from N foundland to Georgetown and the c of Venezuela. Two hundred miles to sea they fly, and they cover Caribbean, night and day, with a ometry of intersecting routes. T are the guardians of America's M Nostrum, of the Panama Canal, Suez of our Mediterranean.

They like Martinique. There ar

ROLF KLEP

ns under her keel. The
an lay their ships down on
ort-de-France as easily as
roke a basin of water with

e, geographically, lies
way between San Juan and
, Trinidad. It is the ex-
end of a diagonal drawn from the Panama Canal, 1,330 flying miles away. From San Juan or Port-of-Spain it's about three and ■ half flying hours to Fort-de-France.

Critics are shocked by what they consider an expression of American imperialism in murmuring covetous words about Martinique. We've got bases in the English islands, they say. We acquired those bases from the British in exchange for 50 destroyers. To this the hard-boiled Navy man replies:

"No, Citizen Jones. We haven't any bases in the English islands. What we acquired was the right to build bases on land leased for a period of 99 years. Those bases must yet be built. This will take at least 18 months and many millions of dollars of the money you pay in taxes. In most cases the work has not yet begun. And anything may happen in Europe before they are finished."

If the world were organized as it was in the days when the New World was an imperial grab bag, the problem of Martinique would be simple. The United States would pre-empt the island in self-defense. That's the way the French got it in 1635. They just grabbed it when England, France and Spain fought a succession of wars for control of the Caribbean and their New World possessions.

Things aren't done that way now except by the Axis powers, and America must seek ■ diplomatic and political solution of the Martinique question. That's why President Franklin Roosevelt appointed as ambassador to Vichy Admiral William Daniel Leahy, governor of Puerto Rico, former chief of naval operations and ■ sailor who knows the Caribbean as you know the geography of your bathtub.

Out there in the harbor, asleep on her irons, is the clumsy French aircraft carrier Bearn. The flag of France droops at her stern pole. Alongside lies the "auxiliary cruiser" Quercy. Much has been made of the menace of these converted merchantmen. The Quercy was being stripped of her guns by the winches of the Bearn. She'll go back to the banana business after being refitted with refrigerating machinery at Casablanca.

Tied up at a dock were the banana boats Esterel and Barfleur. These too figured in the "Martinique Crisis" generated back home. Both have been disarmed, their guns deposited in the arsenal. Some of these guns, four-inch affairs, will be mounted on the island.

At another dock on the inner curve of the harbor lay the light cruiser Emile Bertin. Three small freighters boxed her in, bows to sea as though in case of alarm they could swing around and protect the cruiser. Martinique fears attack, maybe German, maybe American.

The funnels of all ships were dead. Only on the warships was there ■ stir of life. The sailors' washing hung on lines, and half-naked men scrubbed decks, polished brass. Life stopped in the harbor of Fort-de-France on June 13.

It is sad to see the warships of ■ defeated nation when that nation is a

(Continued on page 41)

American planes, en route to France on the aircraft carrier Bearn, were unloaded at Fort-de-France when France collapsed. The Bearn, with the light cruiser Emile Bertin (below) provide Martinique with its only real defense

BLACK STAR

Evil Under the Sun

By Agatha Christie

ILLUSTRATED BY MARIO COOPER

The Story Thus Far:

HERCULE POIROT, brilliant Belgian criminal investigator, is enjoying a vacation at the Jolly Roger, an unpretentious hotel on an English south-coast island, when it dawns on him that everyone around him is nervous, apprehensive. And presently he learns what is wrong:

Two of the guests—Kenneth Marshall's wife, Arlena (a man hunter) and Christine Redfern's handsome husband, Patrick—are deep in a none-too-secret "affair"; and the other guests are in a dither for fear that, sooner or later, there will be serious trouble, perhaps even a shocking tragedy of some sort.

Poirot sees much of the Marshalls and the Redferns. He meets the other guests, among them: Miss Emily Brewster, an amiable old maid; the Reverend Stephen Lane; two Americans—Mrs. Odell Gardener and her husband; Major Barry, a bore from India; Rosamund Darnley, a well-known London dressmaker; and Horace Blatt, a man of means—and many words.

It is Blatt who tells Poirot of "Pixy's Cave," a near-by cavern which, according to legend, is connected with the hotel by secret passages and guarded by pixies ("moor spirits"). . . . One warm August morning, Arlena Marshall goes to the little beach below the Jolly Roger. She climbs on a small "float" and paddles away. Some time later, "Pat" Redfern and Miss Brewster, out for a jaunt in a rowboat, find her body on the beach at Pixy Cove—she has been murdered, strangled to death!

The tragedy jerks Poirot out of his restful mood; and, with Inspector Colgate and Chief Constable Weston, he goes to work—searching for clues, interviewing everyone who may contribute some item of value.

Kenneth Marshall is, naturally, the most obvious suspect. But he could not have killed his wife—at the time of the murder he had been in his room, busily engaged in typing letters. Who, then, killed Arlena Marshall? *Some man*—because Arlena had been strangled *by someone with powerful hands*. But what man?

Colgate, Weston and Poirot have no theories—yet. Minds open, they inspect the hotel's register. They make a list of the men whom they should interrogate. They come to the name of Horace Blatt. Poirot makes a rapid analysis of Blatt's personality. Then—while Colgate and Weston listen: "*There is something not quite right about Mr. Blatt,*" he says slowly.

V

POIROT paused and went on, with a change of voice:

"Next comes Miss Rosamund Darnley. Her business name is Rose Mond Ltd. She is a celebrated dressmaker. What can I say of her? She has brains and charm and chic. She is very pleasing to look at." He paused and added: "And she is a very old friend of Captain Marshall's."

Weston sat up in his chair.

"Oh, she is, is she?"

"Yes. They had not met for some years."

"Did she know he was going to be down here?"

"She says not."

Poirot paused and then went on: "Who comes next? Miss Brewster. I find her just a little alarming." He shook his head. "She has a voice like a man's. She is gruff and what you call hearty. She rows boats and has a handicap of four at golf." He paused. "I think, though, that she has a good heart."

"That leaves only the Reverend Stephen Lane," Weston said. "Who's the Reverend Stephen Lane?"

"I can only tell you one thing: He is a man who is in a condition of great nervous tension. Also he is, I think, a fanatic."

"Oh, that kind of person," Inspector Colgate said.

"And that's the lot!" said Weston. He looked at Poirot. "You seem very lost in thought, my friend?"

"Yes," Poirot said. "Because, you see, when Mrs. Marshall went off this morning and asked me not to tell anyone I had seen her, I jumped at once in my own mind to a certain conclusion. I thought that her friendship with Patrick Redfern had made trouble between her and her husband. I thought that she was going to meet Patrick Redfern somewhere and that she did not want her husband to know where she was."

POIROT paused. "But that, you see, was where I was wrong. Because, although her husband appeared almost immediately on the beach and asked if I had seen her, Patrick Redfern arrived also—and was most patently and obviously looking for her! And therefore, my friends, I am asking myself, *who was it that Arlena Marshall went off to meet?*"

"That fits in with *my* idea," Inspector Colgate said. "A man from London or somewhere."

Hercule Poirot shook his head. "But, my friend, according to your theory, Arlena Marshall had broken with mythical man. Why, then, should take such trouble and pains to him?"

"Who do *you* think it was?" Inspector Colgate asked.

"That is just what I cannot im: We have just read through the l hotel guests. They are all middle —dull. Which of them would A Marshall prefer to Patrick Rec No, that is impossible. And yet, a same, she *did* go to meet some and that someone was not Patrick fern."

Weston murmured, "You don't she just went off by herself?"

Poirot shook his head posit

…lled myself and sun-bathed and Mrs. …dfern sketched. Then, a little bit …r, I went into the sea for a swim"

…lon cher," he said. "It is very evi… that you never met the dead …an. Somebody once wrote a learned …ise on the difference that solitary …nement would mean to Beau …mel or to a man like Newton. Ar… Marshall, my dear friend, would …ically not exist in solitude. She …l lived in the light of a man's ad…ition. No, Arlena Marshall went …eet *someone* that morning. *Who …a it?*"

COLONEL WESTON sighed, shook …is head and said: "Well, we can go …theories later. Got to get through …interviews now. Got to get it down …lack and white where everyone was. I suppose we'd better see the Marshall girl now. She might be able to tell us something useful."

Linda Marshall came into the room clumsily, knocking against the doorpost. She was breathing quickly and the pupils of her eyes were dilated. She looked like a startled young colt. Colonel Weston felt a kindly impulse toward her.

"Poor kid," he thought, "she's nothing but a kid after all. This must have been a pretty bad shock to her."

He drew up a chair and said, in a reassuring voice, "Sorry to put you through this, Miss—Linda, isn't it?"

"Yes, Linda."

Her voice had that indrawn, breathy quality that is often characteristic of schoolgirls. Her hands rested helplessly on the table in front of him—pathetic hands, big and red, with large bones and long wrists. "A kid oughtn't to be mixed up in this sort of thing," Weston thought.

He said reassuringly:

"There's nothing very alarming about all this. We just want you to tell us anything you know that might be useful, that's all."

"You mean—about Arlena?" she asked.

"Yes. Did you see her this morning at all?"

The girl shook her head. "No. Arlena always gets down rather late. She has breakfast in bed."

Hercule Poirot said, "And you, Mademoiselle?"

"Oh, I get up. Breakfast in bed's so *stuffy*."

"Will you tell us just what you did this morning?" Weston asked.

"Well, I had a bath first and then breakfast and then I went with Mrs. Redfern to Gull Cove."

"What time did you and Mrs. Redfern start?" Weston asked.

"She said she'd be waiting for me in the hall at half past ten. I was afraid I was going to be late, but it was all right. We started off at about three minutes to the half-hour."

"And what did you do at Gull Cove?" Poirot asked.

"Oh, I oiled myself and sun-bathed and Mrs. Redfern sketched. Then, a little bit later, I went into the sea for a swim and Christine went back to the hotel to get changed for tennis."

WESTON said, keeping his voice quite casual, "Do you remember what time that was?"

"When Mrs. Redfern went back to the hotel? Quarter to twelve."

"Sure of that time—quarter to twelve?"

Linda, opening her eyes wide, said, "Oh, *yes*. I looked at my watch."

"The watch you have on now?"

Linda glanced down at her wrist.

"Yes."

"Mind if I see?"

She held out her wrist. He compared the watch with his own and with the hotel clock on the wall.

"Correct to a second," he said, smiling. "And after that you bathed?"

"Yes."

"And you got back to the hotel—when?"

"Just about one o'clock. And—and then—I heard—about Arlena. . . ."

Her voice changed.

"Did you—er—get on with your stepmother all right?" Weston asked.

She looked at him for a minute without replying. Then she said, "Oh, yes."

"Did you like her, Mademoiselle?" Poirot asked.

"Oh, yes. Arlena was quite kind to me."

Weston said, with rather uneasy facetiousness, "Not the cruel stepmother, eh?"

Linda shook her head without smiling.

"That's good," remarked Weston. "That's good. Sometimes, you know, there's a bit of difficulty in families—jealousy—all that. Girl and her father great pals and then she resents it a bit when he's all wrapped up in the new wife. You didn't feel like that, eh?"

Linda stared at him. She said, with obvious sincerity, "Oh, no."

"I suppose your father was—er—very wrapped up in her?"

Linda said, simply, "I don't know."

Weston went on: "All sorts of difficulties, as I say, arise in families. Quarrels—rows—that sort of thing. If husband and wife get ratty with each other, that's a bit awkward for a daughter, too. Anything of that sort?"

"Do you mean, did Father and Arlena quarrel?"

"Well—yes."

"Rotten business, questioning a child about her father," Weston thought to himself. "Why is one a policeman? Damn it all, it's got to be done, though."

Linda said positively, "Oh, no." She added: "Father doesn't quarrel with people. He's not like that at all."

"Now, Miss Linda, I want you to think very carefully. Have you any idea at all who might have killed your stepmother?"

Linda was silent a moment. She seemed to be giving the question a serious, unhurried consideration.

"No, I don't know who could [illegible]

wanted to kill Arlena" She added: "Except, of course, Mrs. Redfern."

"You think Mrs. Redfern wanted to kill her? Why?"

"Because her husband was in love with Arlena. But I don't think she would really want to *kill* her. I mean she'd just feel that she wished she was dead—and that isn't the same thing at all, is it?"

Poirot said gently, "No, it is not at all the same."

Linda nodded. A queer sort of spasm passed across her face. She said, "And anyway, Mrs. Redfern could never do a thing like that—kill anybody. She isn't—she isn't *violent*, if you know what I mean."

Weston and Poirot nodded. The latter said, "I know exactly what you mean, my child, and I agree with you. Mrs. Redfern is not of those who, as your saying goes, 'sees red.' She would not be—" he leaned back, half closing his eyes, picking his words with care—"shaken by a storm of feeling—seeing life narrowing in front of her—seeing a hated face—a hated white neck—feeling her hands clench—longing to feel them press into flesh—"

Linda moved jerkily back from the table. She said, in a trembling voice, "Can I go now? Is that all?"

"Yes, yes, that's all. Thank you, Miss Linda."

Weston got up to open the door for her. Then he came back to the table and lit a cigarette.

"Well," he said, "I suppose we'd better see the Redferns next. I expect he's recovered a bit from the shock now."

PATRICK REDFERN had recovered full composure by now. He looked pale and haggard and suddenly very young, but his manner was quite composed.

"You are Mr. Patrick Redfern of Crossgates, Seldon, Princess Risborough?"

"Yes."

"How long had you known Mrs. Marshall?"

Patrick Redfern hesitated, then said, "Three months."

Weston went on: "Captain Marshall has told us that you and she met casually at a cocktail party. Is that right?"

"Yes, that's how it came about."

"Captain Marshall has implied that until you both met down here you did not know each other well. Is that the truth, Mr. Redfern?"

Again Patrick Redfern hesitated a minute. "Well—not exactly. As a matter of fact I saw a fair amount of her one way and another."

"Without Captain Marshall's knowledge?"

Redfern flushed slightly. "I don't know whether he knew about it or not."

Hercule Poirot murmured, "And was it also without your wife's knowledge, M. Redfern?"

"I believe I mentioned to my wife that I had met the famous Arlena Stuart."

Poirot persisted: "But she did not know how often you were seeing her?"

"Well, perhaps not."

"Did you and Mrs. Marshall arrange to meet down here?" Weston asked.

Redfern was silent a minute or two. Then he shrugged his shoulders.

"Oh, well," he said, "I suppose it's bound to come out now. It's no good my fencing with you. I was crazy about the woman—mad—infatuated—anything you like. She wanted me to come down here. I demurred a bit and then I agreed. I—I—well, I would have agreed to do any mortal thing she liked. She had that kind of effect on people."

Hercule Poirot murmured, "You paint a very clear picture of her. She was the eternal Circe. Just that!"

Patrick Redfern said, bitter. "She turned men into swine all right!" He went on: "I'm being frank with you, gentlemen. I'm not going to hide anything. What's the use? As I say, I was infatuated with her. Whether she cared for me or not, I don't know. She pretended to, but I think she was one of those women who lose interest in a man once they've got him body and soul. She knew she'd got me all right. This morning, when I found her there on the beach, dead, it was as though—" he paused—"as though something had hit me straight between the eyes. I was dazed—knocked out!"

Poirot leaned forward.

"And now?"

Patrick Redfern met his eyes squarely.

"I've told you the truth," he said. "What I want to ask is this—*how much of it has got to be made public?* It's not as though it could have any bearing on her death. And if it all comes out, it's going to be pretty rough on my wife.

"Oh, I know," he went on quickly. "You think I haven't thought much about her up to now? Perhaps that's true. But, though I may sound the worst kind of hypocrite, the real truth is that I care for my wife—care for her very deeply. The other—" he twitched his shoulders— "it was a madness—the kind of idiotic fool thing men do—but Christine is different. She's *real*. Badly as I've treated her, I've known all along, deep down, that she was the person who really counted." He paused—sighed—and said rather pathetically: "I wish I could make you believe that."

Hercule Poirot leaned forward. He said, "But I do believe it. Yes, yes, I do believe it!"

Patrick Redfern looked at him gratefully. "Thank you," he replied.

Colonel Weston cleared his throat. "You may take it, Mr. Redfern, that we shall not go into irrelevancies. If your infatuation for Mrs. Marshall played no part in the murder then there will be no point in dragging it into the case. But what you don't seem to realize is that that—er—intimacy—may have a very direct bearing on the murder. It might establish, you understand, a *motive* for the crime."

"Motive?" Redfern asked.

"Yes, Mr. Redfern, *motive!* Captain Marshall, perhaps, was unaware of the affair. Suppose that he suddenly found out."

Redfern said, "You mean he got wise and—and killed her?"

The chief constable spoke rather dryly: "That solution had not occurred to you?"

REDFERN shook his head. "No—funny. I never thought of it. You see, Marshall's such a quiet chap. I—oh, it doesn't seem likely."

"What was Mrs. Marshall's attitude to her husband in all this? Was she—well, uneasy—in case it should come to his ears? Or was she indifferent?"

"She was—a bit nervous. She didn't want him to suspect anything."

"Did she seem afraid of him?"

"Afraid? No, I wouldn't say that."

"Excuse me, M. Redfern," Poirot murmured. "There was not, at any time, the question of a divorce?"

Patrick Redfern shook his head decisively.

"Oh, no, there was no question of anything like that. There was Christine, you see. And Arlena, I am sure, never thought of such a thing. She was perfectly satisfied married to Marshall. He's—well, rather a big bug in his way." He smiled suddenly. "County—all that sort of thing, and quite well off. She never thought of me as a possible *husband*. No, I was just one of a succession of poor mutts—just something to pass the time with. I knew that all along, and yet, queerly enough, it didn't alter my feelings toward her. . . ."

His voice trailed off. He sat there thinking.

Weston recalled him to the needs of the moment:

"Now, Mr. Redfern, had you any particular appointment with Mrs. Marshall this morning?"

Patrick Redfern looked slightly puzzled. "Not a particular appointment, no. We usually met every morning on the beach. We used to paddle about on floats."

"That's his conscription card. It says to carry it with you at all times"

ROBERT DAY

"Were you surprised not to find Marshall there this morning?"

"Yes, I was. Very surprised. I coul understand it at all."

"What did you think?"

"Well, I didn't know what to thin mean, all the time I thought she w be coming."

"If she were keeping an appointn elsewhere you had no idea with w that appointment might be?"

Patrick Redfern merely stared shook his head.

"When you had a rendezvous Mrs. Marshall, where did you me

"Well, sometimes I'd meet her in afternoon down at Gull Cove. You the sun is off Gull Cove in the after and so there aren't usually many pe there. We met there once or twice.

"Never on the other cove? Cove?"

"No. You see Pixy Cove faces and people go around there in boat on floats in the afternoon. We n tried to meet in the morning. It w have been too noticeable. In the a noon people go and have a slee mooch around and nobody knows n where anyone else is."

Weston nodded.

Patrick Redfern went on:

"After dinner, of course, on fine nights, we used to go off for a s together to different parts of island."

HERCULE POIROT murmured, yes!" and Patrick Redfern shot an inquiring glance.

Weston went on: "Then you can us no help whatsoever as to the c that took Mrs. Marshall to Pixy this morning?"

Patrick Redfern shook his head said, and his voice sounded honestly wildered:

"I haven't the faintest idea! It w *like* Arlena."

"Had she any friends down here s ing in the neighborhood?"

"Not that I know of. Oh, I'm she hadn't."

"Now, Mr. Redfern, I want yo think very carefully. You knew Marshall in London. You mus acquainted with various members o circle. Is there anyone you know of could have had a grudge against Someone, for instance, whom you have supplanted in her fancy?"

Patrick Redfern thought for minutes. Then he shook his head.

"Honestly," he said, "I can't thi anyone."

Colonel Weston drummed wit fingers on the table.

"Well, that's that. We seem to b with three possibilities. That of a known killer—some monomaniac—happened to be in the neighborhc and that's a pretty tall order—"

Redfern said, interrupting, "And surely, it's by far the most likely planation."

Weston shook his head.

"This isn't one of the 'lonely c murders. This cove place was p inaccessible. Either the man would to come up from the causeway pas hotel, over the top of the island down by that ladder contraption, o he came there by boat. Either w unlikely for a casual killing."

"You said there were three poss ties," Patrick Redfern said.

"Um—yes," said the chief const "That's to say, there were two p on this island who had a motiv killing her. Her husband, for one your wife for another."

Redfern stared at him. He lo dumfounded. "My wife? Chris D'you mean that *Christine* had any to do with this?"

He got up and stood there stam

(Continued on page 49)

"Yeah." Eddie's fury was mounting. "Well, I'll tell you what your reason is. It's me. To you I'm prime beef on the hoof. If I win the title, you clean up"

Kid Tinsel

By Octavus Roy Cohen

ILLUSTRATED BY GILBERT DARLING

The Story Thus Far:

WITH orders from Max Ellison, a prominent New York fight manager, to sign up Eddie Gordon, a young middleweight whose manager, Pop Mallory, has just died, Joe Barton motors to Birmingham, Alabama. A few days later, back in New York, he reports to Ellison—tells him that, because of a curious contract Gordon had signed, he must work for a girl: "Pat" Mallory, Pop's daughter! He does not refer to a murder that he, Joe Barton, had committed near Birmingham, late one night—and his flight from a possible witness, *Eddie Gordon*, who had not seen his face in the darkness but who had gained possession of his revolver!

Gordon goes to New York City. There he meets Max Ellison, and his gay young daughter "Babs" (who soon falls for the young fighter). And there, managed by Pat Mallory (whom he has never understood or liked), he wins a series of fights.

Labeled "the Tinsel Kid" by Cliff Halliday, sports writer, he is generally regarded as a coming champion.

Unfortunately, he has an enemy: Joe Barton. Barton loves Babs Ellison. Jealous of the fighter, he plans to "eliminate" him—have him murdered by Morrie Oakes, a professional killer. But first he must regain possession of his revolver, which happens to be registered in the name of Joseph Barton! . . .

After gadding about with Babs Ellison almost every night, Eddie fights Tommy Gateley—and is knocked out. By this time, Max Ellison feels sure that the boy from Birmingham is a great fighter—greater than his own Dixie Grogan, world's champion middleweight. So, to prevent the two from ever meeting in the ring, he tries to force Pat Mallory, by trickery, to sell him Eddie's contract. But, outsmarted by Cliff Halliday (who threatens to expose him in the newspapers), he admits that he is beaten. And, after Eddie has knocked out Gateley in a return fight, he signs articles for a fight between the great Grogan and Eddie Gordon. . . .

In training at an attractive "camp" near New York, Eddie receives two callers: Babs Ellison and Joe Barton. When they leave, Eddie watches them as they drive away—in Barton's car. The car seems vaguely familiar—*he wonders where he has seen it before!* Joe Barton notes the expression on the fighter's face. Guessing its meaning, he realizes that he must act—get rid of Gordon—as soon as possible.

IX

PAT tried to relax; tried to console herself with the thought that she was absolutely right in what she was about to do.

She knew what she was stepping into: more bickering, more quarreling, more misunderstanding, more unhappiness . . . all widening the already well-nigh unbridgeable gap between herself and Eddie. It was all so very silly; so wrong. Something which had started with a silly cartoon before they'd ever met—a cartoon they'd both practically forgotten. Things had piled up . . . clash had built on clash until cause was forgotten under the daily impact of effect. Well, there was one more week to go: one more week during which she had to stick her chin out and let them pound it. She heard Babs' car coming up the road and she was standing outside the gate as it came to a quivering halt. Babs jammed on the emergency, snapped off the ignition and stepped out of the car with what seemed to be almost a single motion. She said, indifferently, "Oh, hello . . ."

"Good evening . . ."

Pat was slender, yet beside her, Babs looked thin. Pat was pretty and feminine; Babs was vivid. Pat was gentle; Babs was hard and on the defensive. She was young, but her instincts were keen. She sensed that this was no accidental meeting.

Pat said, "I'd like to have a little chat with you."

"That can be arranged."

"It isn't going to be easy . . ." The older girl was feeling her way. "I hope you won't misunderstand. It's about Eddie."

Babs surveyed her insolently. "You're not telling me anything I didn't know when I saw you waiting."

Pat kept her voice steady: "Next week, Miss Ellison—Eddie is fighting the world's champion. It's the most important moment in his career. He isn't in the shape he ought to be—either mentally or physically. I know you have his interests at heart just as much as I have. . . ."

Babs said coldly, "Listen, Mallory—suppose you pitch all your fine phrases into the bushes. We've got each other sized up, so there's no sense sparring. You think I'm poison to Eddie and you want me out—is that it?"

Pat hesitated, then met Babs on her own ground: "That's it. Though I wouldn't have put it so brutally."

"Of course you wouldn't. Your trouble is that you're a chronic lady. Well, I'm not—and I don't want to be. This

sort of thing has got to be talked straight."

"I'm talking straight."

"Like heck you are." Babs' voice was contemptuous. "If you were honest, you'd say that you're in love with Eddie and jealous of me."

"No-o . . ." Pat shook her head. "You're wrong on both counts."

"Oh yeah? Well, I don't think so. So you can go peddle your tomatoes somewhere else."

Babs started toward the gate, but Pat barred her way. Her voice now matched that of the younger girl, and her eyes looked squarely into Babs'. Pat said, "You're making me do this the hard way, Miss Ellison."

"You aren't doing anything. I'll see Eddie whenever I want, and no dizzy dame is going to stop me."

"We'll see . . ." Pat fought back her own anger and compelled herself to talk more gently. "Let's don't play this way, Miss Ellison. Try to believe me. I'm not jealous of you, and—so far as I'm concerned—you and Eddie can do what you please when you please after next week. But right now you're bad medicine for him, and I'm changing his prescription."

"And what will he say?"

"Plenty. None of it nice. But it's still going to be that way."

"Suppose I walk in anyway . . ."

"I'm renting this place. For the time being, it's mine. If you walk in, I'll have you taken out."

Babs put thin hands on narrow hips. "Tough gal, huh?"

"I can be—if I must. But I don't like it. Why not be reasonable. What's a week more or less? Go on back to New York. Lay off Eddie until after the fight. That's not much to ask."

"It's a heap more than I'm going to do."

Pat sighed and shook her head. "You're forcing my hand."

BABS looked down the path leading from the river and turned back to Pat. "Here comes Eddie," she said. "Seems like the stage is all set for a lovely battle royal."

Pat waited. She was tense and white with anger. This was worse than she had anticipated, and she suspected that what lay immediately ahead would be even less pleasant. But there wasn't any running out now. She saw Eddie come toward them, saw that he observed Babs' hot, angry eyes; saw his inquiring gaze turn from Babs to her, heard him say as he joined them, "What gives? Who did what to whom and why?"

Babs was silent, and so Pat spoke. She said, "It's something you'll neither understand nor like, Eddie."

"That's no novelty. Let's have it."

Pat didn't evade: "I've asked Miss Ellison not to see you again until after the fight."

She saw his cheeks flush . . . but before he could say anything, Babs spoke. "That's a nifty," she said caustically. "She didn't *ask* me anything. She said if I came around this camp again she'd have me pitched out on my ear."

"Is that true?" Eddie was grim as he turned to Pat.

"It's true."

"Well, I'll tell you what I—"

Pat cut him off: "Don't bother to say it, Eddie. In the first place, I know exactly what you're thinking. In the second place, it won't make any difference. My reasons—"

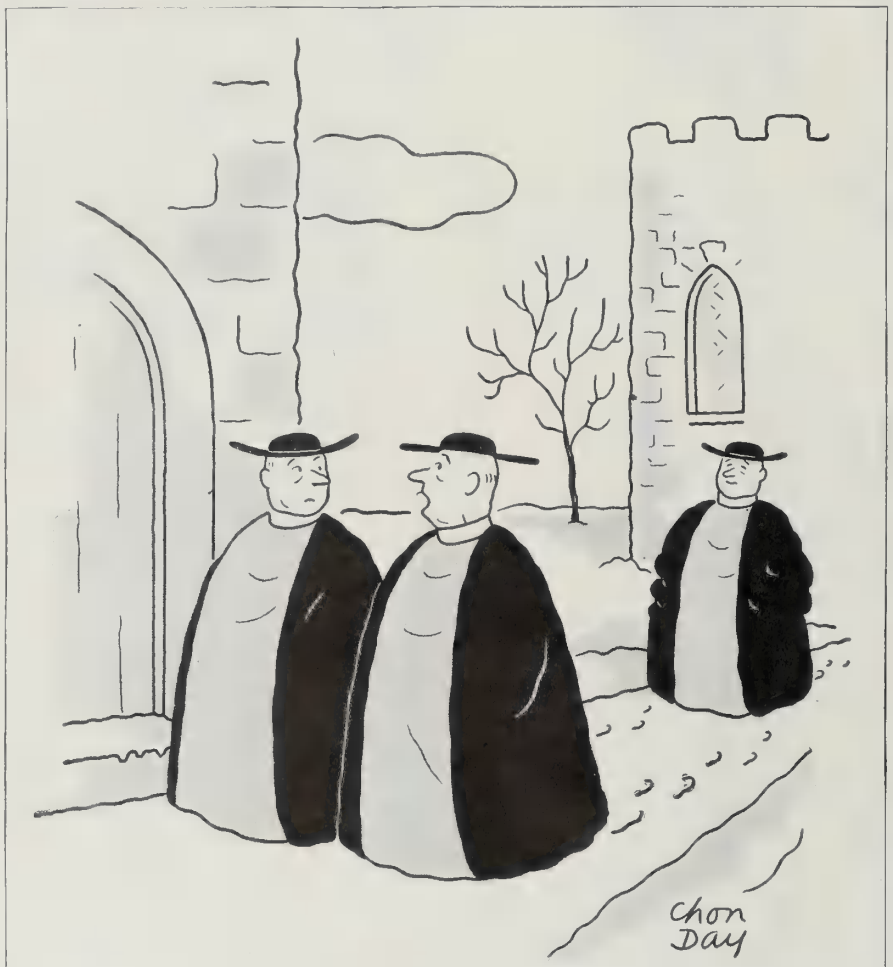
"Yeah." Eddie's fury was mounting. "Your reasons! Well, I'll tell you what your reason is. It's me. To you I'm one hundred and sixty pounds of prime beef on the hoof. If I win the title, you clean up."

Babs interrupted: "There's more, Eddie. She's also jealous of me."

"That's a laugh," he snapped. "Pat isn't jealous of anything except the dough I might make for her."

"So . . . ?" Babs was amused and there was a wise, mature look in her young eyes. "You're a nice lad, Eddie—but awful blind."

"What do you mean: Blind?"



Babs said tauntingly, "You tell him, Mallory."

Pat held herself in with an effort. "I'll tell you both only one thing," she said quietly. "So far as I can control things, Eddie's stepping into that ring next week in first-class shape. I can't stop him from seeing you, Miss Ellison . . . but I can stop you from visiting this camp—and I shall."

Pat Mallory turned away. She walked toward the house. A certain dignity walked with her, and Eddie looked after her uncertainly. Then he turned his attention to Babs. He said, "You're not going to pay any attention to her, are you, Babs?"

She looked up at him. There was an odd light in her eyes; a light of unwilling admiration.

"I believe I am, Eddie," she said slowly. "There are two things you don't know about that girl," she said. "*One* of them is that she isn't fooling."

"Keep an eye on him—I think he's got a frock full of snowballs"

CHON DAY

MORRIE OAKES paced the sitting room of Joe Barton's impressively ornate apartment. Two or three times he opened his lips to speak and closed them again without saying anything.

Young Mr. Barton, elegantly encased in a flowered silk lounging robe, lay back in a huge club chair and eyed his stalwart companion through half-closed eyes. His slim, young figure was momentarily relaxed, but the eyes were not. Those agate eyes of Joe's never seemed to relax. And he waited for Morrie to speak.

The big man whirled suddenly and said, "Jeez—don't stare at me like that. It gives me the creeps."

Barton smiled thinly. "I'm waiting to hear what you've got to say."

Morrie shook his head. "You're too deep for me, Joe. You tell me to go out and pick you a guy who can do card tricks. So I done it. So I still don't know what it means."

"Who did you get?"

"Jimmy Watson. And I'm telling you, the guy is good. He can change the spots right in front of your eyes."

"Can he keep his mouth shut?"

"He's a sphinx." Morrie seated himself heavily. "What I don't get is where Cliff Halliday rates in this setup."

Joe Barton spoke softly, more to himself than to Morrie. "I still don't like Gordon," he said, "and I don't dare to touch him till I get the gun. He hasn't got it, and it isn't in Pat Mallory's joint. The way I've got it pegged is that Gordon turned it over to her, told her it was important—and that she put it in her bank box. The job is to get it out of there."

"Which ain't no cinch."

"Maybe . . ." Barton paused long enough to light a cigarette. "I've been watching. This Mallory cluck and Cliff Halliday are nuts about each other. So if he asked her a little favor, she'd do it."

"I'm beginning to get it."

"Sure. Even you, Morrie. Now, just suppose Halliday was to tell Mallory that he was in a jam, and asked her for the gun she's got in her bank box. I figure Gordon never told her what that gun spells . . . and if I'm right, there'd be no reason for not turning it over to him. Then the minute I got it—"

Morrie nodded and snapped his fingers. "Goomby Gordon," he said. "Just like that." Another idea commenced to penetrate the brain of the slow-thinking Mr. Oakes. "But Halliday ain't *in* no jam," he said.

"He will be. That's where Jimmy Watson fits. Cliff Halliday is a pushover for stud poker and he hasn't got a dime in the world. His salary is spent two weeks before he gets it, but he still thinks he can push cards around, which is one of the reasons. So I want Watson to nick him for every cent the traffic will bear . . . and on credit. Let him tickle Halliday along. Wha right now is his IOU for a write."

Morrie shook his head. "Y doin' this the hard way, Joe. A it's all for nothin', anyhow. E don ain't spotted anything, or cracked."

Joe's eyes bored into Mo ain't paying you to think," coldly. "I'm telling you wh When do you see Watson aga

"Right now. He's waitin'."

"Then get going. And keep with me."

Mr. Oakes walked out of t ment. He sought and found Jim son and repeated his previous instructions. Mr. Watson was the point of exasperation. Yeah Halliday; yeah, he'd played him before lotsa times; yeah, ready fixed things up for ther this evening. Then he'd repor

Morrie sighed with relief an out. It was up to Jimmy now had a hunch Jimmy was the Dapper and shrewd, and he h with him. All during the afterno rie gave an occasional thoug Watson, and he telephoned t tleman at seven o'clock. Wat port was brief but satisfactory. "It's on."

"Goin' okay?"

"Yeah."

AND it did go okay. Cliff Hal an excellent stud player, b the definite handicap of bein Of course he knew that Jimmy lived by his wits, but it never to even so sophisticated a p Cliff that he'd be cheated in friendly game like this.

Cliff lost with magnificent co Jimmy Watson feigned sor ribbed Cliff into playing on c did a good job of it, too, unt Mr. Halliday shoved back fro ble and said, "That's all the can take, Jimmy."

"Aw, come on. Your luck's change."

"It might get worse."

Watson gave as good an im a smile as he could. "You're of luck."

"Nope." Halliday made a v fort to conceal his very genui "You're the one who's out o told you from the beginning credit isn't worth a dime to t I can't figure anything more use those IOU's you've got. Thr sand, isn't it?"

"Yeah."

"Well, if your grandchildre it, you'll be fortunate."

"So what? I'm not yelling. me all that before we starte you?"

"That doesn't make me feel ter." Cliff smiled at the other n I lousy, Jimmy—or are yo good?"

"I make a living at it. But news to you, either."

"Right." Cliff was embarra feel pretty crummy . . ."

Now, here's a real man. He has no gift for gab but little Susan very definitely goes for this guy

Loved I Not Honor More

By Frederick Hazlitt Brennan

A SHORT SHORT STORY COMPLETE ON THIS PAGE • ILLUSTRATED BY WALTER C. KLETT

WELL, here I am—little Susan Jones, gone patriotic all of a sudden. Chris should see me now. It would hand him a laugh, me attending the organization meeting of the Women's Auxiliary Air Corps. Chris is going to see me pretty soon. I'm to meet him at the Cock and Bull for luncheon. Cock and Bull . . . ha! He might at least have picked a restaurant named the Stars and Stripes. A man ought to make it look good, when he tries to dodge the draft by proposing immediate marriage. He ought to—

"Susan Jones!"

"Oh . . . I'm here—"

"How many flying hours, Miss Jones?"

"Two hundred and fifty."

"Private pilot's license, of course?"

"Oh, yes."

"Any experience as a mechanic?"

"No-o, not much. But I'm willing to train for it."

"Good. Thank you, Miss Jones. Next—Mildred Bailey—"

I've been all wrong about Chris Hartwell. The stupid ones bore you, but the bright ones fool you. It's quite all right to be able to earn thirty thousand a year as an advertising-agency executive. A pat on the back, Chris. You are a clever lad, but, my dear, you can't put *this* over on dumb little Susan Jones. Almost, but not quite. There are too many gags in the newspapers and magazines about young men of draft age who decide to marry suddenly. Oh, Chris, how could you expect a gal, even when she is madly in love, not to bump her nose against the obvious? All her best friends will tell her, darling. Only just now, Mildred Bailey said—

"We are honored to have with us this morning Major O'Donnell of the United States Army Air Corps!"

Now, here's a real man, Chris. He has no gift of gab and he's just told that corny I-want-to-be-hostess-in-an-Army-bomber joke, but little Susan very definitely goes for this guy. There comes a time when the witty chatter palls, Chris. It begins to date you, my cynical, amusing pal. This nice, dull major goes up in the sky and says it with bombs and machine guns. Maybe that's the way we're going to have to say it—

". . . This is a new kind of warfare. The world has reached a dreadful democracy of battle. Civilians, men, women and children, are soldiers now. There is no more 'front' in the old definition of the term—"

You see, Chris? He's right. It's no good sitting around night-club tables and making jokes about politicians. There was plenty to be said, of course, and you did say it well. I laughed, didn't I? A good audience, little Susan. And we'd read all the old war books, hadn't we? The whole debunking lot of them from Three Soldiers to All Quiet. War is hell and a fool's game and civilized people have sworn off forever. Not again, never any more. What do you want to be when you grow up, my little man? Alive. Oh, sure. Let someone else fight this one, if it comes. "I think I'll sit this one out!" you said. I'm sorry, Chris. I clapped hands for that. But—"The Women's Auxiliary Air Corps is a mighty long name. They've got one in England. They call 'em the Me-Toos. I like that better. You see—"

I HAVEN'T dared tell you that I sneaked off and joined this outfit. I was afraid of your sardonic grin. We are funny, Chris, but we're in earnest. We won't get anywhere, much. They may let us ferry training ships, if there's a war. Probably we'll just get some dirty kitchenry work to do. Like mopping up grease around the hangars. But they can't keep us gals home knitting socks this time. We're Me-Toos. This would be everybody's war—

"Well, that's about all I have to say—except that, like any professional soldier, I am hoping we can get tough fast enough not to have to fight. We'll hope for the best—and good luck, young ladies."

And good luck to *you*, Flier! How I wish I could take you with me to see Chris. He'll probably want to argue. And you can't argue this. You either feel it or you don't. Oh, Chris, if you were only a conscientious objector! I might—but you're just a cynic, my dear. The only thing you're afraid of is being called a sucker. They oversold us all on that sucker argument. The Yanks Are Not Coming—that's the Communist slogan. The one catch in it is that maybe some pretty tough boys will be coming to get the Yanks. And so we sit this one out in a nice, fat advertising job, eh, Chris? We yell "Hi-yah, Sucker!" and—

"Susie!"

"Hunh . . . oh . . . yes, Mildred?"

"Does Chris know you've joined up?"

"No . . . not yet, darling."

"It'll hand him a laugh!"

"Yes?"

"After the way you used to talk—he'll *die*."

"Oh, yes, indeedy—but he won't die permanently. That's one thing Chris is going to be very careful about!"

"Why, Susie!"

Well, here I go to the Cock and Bull. If I wanted to make this good and corny I would dress up in my W.A.A.C. uniform and carry a little white feather to pin on the boy. But, for auld lang syne, I will try to be subtle, Chris. Never by word or deed shall I indicate my nasty suspicion. I shall merely say that I do not think we understand each other well enough for marriage. That will baffle him. But, after all, a gal can't come right out and say: "Why all the hurry, Chris? Afraid you'll catch a cold—in the draft?" Oh, Chris, I could never say such a thing to you. I do love you . . . or I did . . . no, maybe I still . . .

"Uh . . . hello, Susie!"

"I beg your pardon . . . hunh . . . *you*? Oh, Chris—"

"Now, let me explain—"

"*What are you doing in that uniform?*"

"Please don't cry . . . don't get sore . . . you don't have to marry me. . . . I know you think I'm nuts . . . that I'm trying to run out on you—"

"Oh, Chris, dear—"

"Shhhh . . . everybody's staring . . . let's go outside . . . you can denounce me—"

"You enlisted . . . as a *private* . . . oh, Chris—"

PARTLY PRIMITIVE

By Luther Davis and John Cleveland

PHOTOGRAPHS FOR COLLIER'S BY IFOR THOMAS

Katherine Dunham, "the Marian Anderson of the dance," goes direct to voodoo headquarters in the Haitian jungles for her material. The resulting ballets have the critics hunting new adjectives

KATHERINE DUNHAM was e
when she gave her first danc
cital. She organized a dozen
small colored girls into a troupe
they performed one Sunday at the
tist Church in Joliet, Illinois—proc
to the Christian Endeavor. "It w
hideous affair," Katherine says t
"and all the little girls' brassières
off."

Sixteen years later Chicago's Cen
of Progress Exposition hired Kath
to direct a hundred and fifty y
Negroes in a production at So
Field. "It was terrible," Katherine
reminiscently; "eight of my little
lost their brassières."

There's something about Miss
ham's style of dance—"primitive
ing" she likes to call it—that re
in nudity. Even today her choregr
has a wild abandon, and it is or
complicated series of ingenious h
zippers and pins (patent No. 1
K. Dunham) that keeps her girls
losing their shirts nightly.

The Katherine Dunham Dan
hand-picked and hand-pinned by K
erine herself, are a company of se
teen—fifteen whirlers, a pianist a
drum beater. They are to be seen nig
except Sunday, spinning and leapi
New York's Martin Beck Theater w
they form the nucleus of the all-N
musical-comedy hit, Cabin in the
Sunday is their free day—except fo
hearsals in the afternoon and rep
highly profitable concerts in the eve

An anthropologist of note, Miss
ham carries a degree from the Un
sity of Chicago, and can boast a
spent in the West Indies as a res
fellow of the Rosenwald Found
She is the author of a great many
cles on primitive dancing and it has
said of her by such thoughtful ind
uals as Herman de Vries, music cri
the Chicago Herald-American, "K

**Here's Katherine Dunham dancin
the title role of one of her ori
ballets in the musical show Cab
the Sky. She's Temptress Cleo**

A West Indian number with Dunham and four of the members of her company. Right, the Negro choregrapher as a singing, dancing Georgia Brown

re Dunham is to the dance what Marian Anderson is to song."

She appears on stage regularly with her troupe and is acclaimed as a solo performer, but is rather proud that she doesn't dance exceptionally well. She airily shrugs her smooth, brown shoulders at those "misguided souls" who, infatuated by her slim grace, don't notice that her footwork is unremarkable. One young Harlemite who wanted to get into the troupe made the mistake of trying to flatter her by saying, "If I could dance like you, Miss Dunham, I wouldn't care about doing anything else in the world—not even eating."

Katherine stared him out of her dressing room. "If you danced the way I do," she said, "you couldn't afford to eat."

Among the "misguided" who think her distinguished dancer are Richard Watts of the New York Herald-Tribune ("Miss Dunham is both an exciting young woman and a provocative dancer"), John Mason Brown of the New York Evening Post ("Katherine Dunham is unquestionably an excellent dancer"), John Martin of the New York Times ("As a dancer she is not only lovely to look at, but has style and authority"). When she reads notices like these, Katherine smiles her wonderfully understanding, relaxed smile. "How nice of them," she says. But let someone praise her choregraphy—her real love and true pride—and she is as coy flattered as a Victorian maiden receiving her first proposal. When Dance Magazine said that she had "a true genius for theater choregraphy" she kissed on air for weeks.

The Katherine Dunham Dancers, Inc., are a great success and much in demand, earning well over $2,000 weekly. New York is at Katherine's feet, but she is too happily busy to notice it. "I'd love to come," she told an imploring hostess recently, "but I'm at work on a dance about puberty rites among primitive peoples—and I don't think I'd be very good company."

In 1937, when she was twenty-seven, Katherine resorted to psychoanalysis. Each week she went to a young psychologist in the graduate school at the University of Chicago who had finally succeeded in tearing down her psychoses and complexes and was almost ready to begin the task of putting her back together again. She was in the midst of her tenth treatment when the doctor abruptly asked to be excused. He went into the next room and shot himself.

"I still worry about it," says a now rehabilitated Katherine. "I'm afraid I must have said something wrong."

In the case of an intelligent, sensitive Negro forced to live in our prejudiced society, one doesn't have to look far for the need for psychoanalysis, but Katherine had still another cause for complaint—when she was a child her father made her play The Wedding of the Winds on the piano.

A kindly man whose family romantically stems from Madagascar, via Tennessee, Mr. Dunham had—and still has—a strange and improbable attachment for the mandolin and guitar. During the day he runs a cleaning-and-dyeing establishment in Joliet, but at night he becomes a fiend for music of a peculiarly sentimental variety.

Why Pop Plays Alone

He made Katherine learn piano, and her brother Albert was pressed into service as second mandolin. The trio played nightly with Katherine's mother and the family doctor for audience—until one night when Katherine was seven. Suddenly she stormed from the room, tears in her eyes and anger in her heart, screaming in childish treble, "I won't ever play—no I won't ever *listen* to that windy marriage again!"

The grateful doctor happily prescribed an end to Katherine's piano playing, but Mr. Dunham insisted that Albert play on—louder. Albert stood it a while longer and then fled to the quiet of the University of Chicago where he became one of the most brilliant students in its history. He won scholarship after scholarship, got his bachelor's and later his Ph.D. there. He took his master's at Harvard and now teaches at Howard University, where there is an unwritten rule that no student play, whistle or hum The Wedding of the Winds.

With Albert gone, the Dunham household settled into a silence interrupted only by an occasional ping as Mr. Dunham plucked a reminiscent chord. He hinted around sometimes, and Katherine might have relented and accompanied him, if she hadn't been so very busy right through high school and junior college. There was her regular school work, her literary pursuits as class poet and occasional paid contributor to Child Life Magazine, and her activities with the Terpsichorean Club. This last was an "interpretative dance group" and Katherine soon became its star and renegade. Subtly she perverted its warm-milkish dances to her own ends, and by the time she was ready to follow Albert to the University of Chicago, members of even this staid group were beginning to drop an occasional brassière.

Before she left Joliet, Katherine knew that her mind worked best as a choregrapher; that her field must be group—not solo—dancing. So, still in her 'teens and still middie-bloused, she decided to form a dancing school to help her earn her tuition at college and, at the same time, provide her with a reservoir of dancers trained the Dunham way. She entered into a long correspondence with a real-estate agent in South Side Chicago, and, by mail, rented herself a studio which she was assured was "quite large enough for anything."

Her first evening in Chicago she went directly to her new property. She was delighted to find a big, beautiful, old house. Feeling like a squire, she hurriedly tried the key the agent had mailed her. It wouldn't fit. She noticed an old, dilapidated stable in the rear. The key fitted.

There were bugs in the stable, and there wasn't any water. The furnace burst at the first suggestion of cold weather, and Katherine was forced to ask the aid of a kind, faintly criminal friend who showed her how to tap a city gas main for free gas. The police hunted her down and threatened to jail her, and the gas company placed their most solemn curse upon her. "Never again, so long as you may live," pronounced the overzealous supervisor, "will you be permitted to buy gas from us." As a result Katherine had bronchitis most of the winter, and her few students who could afford to pay tuition caught cold and were yanked home by irate mothers. Only a few of the hardier souls remained and they hadn't a penny among them. However, Katherine somehow dragged herself to her university classes every day and did brilliantly.

Her college career was motivated by three itches: the itch to dance, the itch to travel, and the itch to get warm. They were all scratched simultaneously in the board room of the Rosenwald Foundation one day in 1933. The professors and pince-nezed ladies and gentlemen of the board called her into their presence at the behest of Mrs. Alfred Rosenwald Stern, who had been impressed by one of Katherine's dance recitals in an abandoned loft. A committeeman asked politely what study Miss Dunham would like them to finance for her.

The Committee Catches On

"It's a bit difficult to describe exactly," she said. "Do you mind if I show you?" While the board members gasped, Katherine took off her jacket and skirt, and stood revealed in her rehearsal tights and blouse. "This," she said, "is the only kind of dancing you can learn in Chicago." She did some meaningless pirouttes, an arabesque, and personified a lovesick faun. "Now," she continued, "what I want to learn is something more native—more vital; something that will help me teach people about Negroes." She did a short tribal war dance. "I want to go somewhere where they dance like that; find out why, how it started—and what influence it has had on the people."

"How about the West Indies?" the chairman asked, without bothering to take a vote.

During her year in the Caribbean she investigated Jamaica, Martinique, Trinidad, and many smaller islands, but her real love was Haiti. At the beginning of her stay there she had a difficult time because the upper-caste residents, both white and Negro, were suspicious of this strange young woman who

Miss Rear Admiral

By Jan Fortune

ILLUSTRATED BY EARL OLIVER HURST

The Higgins girl of Beaver City, Nebraska, joins the U. S. Navy, and takes Hollywood with the only weapon it doesn't understand—the simple, unvarnished truth

OULD have been all for the best
'd just turned off the alarm and
e back to bed with an ice bag and
adache I already had.
n I'd never have met the Spirit of
et Special when it pulled into Los
s that Sunday morning; and if I
met the special, I'd never have
myself mixed up with the worst
eadache I've ever had, bar none:
one Higgins of Beaver City, Ne-
.
when Manny Steinberg gets an
r an epic, it's not for an assistant
tion man to cavil on a Sunday-
g assignment, hang-over or no
ver. So I called my photographer,
, and took off for L. A.
Spirit of the Fleet Special was
in when we clattered into the
. You could spot the contest win-
sy, because each one wore a rib-
ross her chest, and the ribbons
ariously labeled: Miss Battle-
liss Sub Chaser, Miss Submarine,
Destroyer and so on for twelve
which covered various phases of
activities.
ce said somberly: "It pains me
sort of cheap promotion does,
d, "Well, this bunch isn't hard to
" and broke off, because I'd spied
golden-haired cutie, standing on
dbag, peering out over the heads
people. Across her chest was a
which read, "Miss Aircraft Carrier." A bunch of news guys were crowded around her, asking questions.

"Do your stuff with the cheesecake," I said to Horace. "The blonde seems to have something."

I barged over just in time to hear Otto McMann saying: "But where *is* Beaver City, Miss Higgins?"

"Nebraska," she said, not looking at him.

"And, of course, you are just too thrilled over coming to Hollywood, aren't you?" McMann probed.

She said, still not looking at him: "I can smell it from here."

THE news guys roared. McMann saw me and winked. "Smart dame," he said. "She can smell Hollywood from here."

The girl swung around to face McMann, her chin out. "I wasn't talking about Hollywood," she said firmly. "I meant I could smell the sea—the harbor—the place where the ships are—" Everybody roared again. "What's funny?" she demanded. "There *is* a harbor in Los Angeles, isn't there?"

"Sure." McMann winked at me again. "Battleships bumping the curb at Main and Market." I pushed through and took her arm.

"I'm Bob Henry from the Steinberg Studios, Miss Higgins," I said. "And the harbor's at Long Beach—thirty miles away." I gave McMann a glower. "Any of you smart guys want to ask any more questions, go ahead—I'll answer 'em."

McMann said, unabashed: "Let her talk, Bob. Maybe she doesn't want to be a movie star, either."

"I don't," Miss Higgins replied flatly.

McMann pushed in closer. "Then why did you enter this contest?"

"Because I wanted to see the Fleet," she said.

McMann made a soft, breath-sucking sound. "So I presume you're not at all interested in the chance of appearing in a Steinberg epic with Gable Taylor?"

"No," Miss Higgins retorted, "I'm not."

"You—you just wanted to come to the West Coast so you could see the Fleet?"

"Sure," Miss Higgins said. "I wanted to see it so bad that I didn't even mind being a contest winner!"

"Such patriotism is indeed touching," McMann said softly.

"What's touching about it?" the girl demanded. "I'm from a Navy family. My great grandfather was at Manila Bay with Dewey."

"And what was great grandfather's name?" McMann was looking at me, tapping his yellow teeth with his pencil.

"Thaddeus," she said, her chin out. "Thaddeus Ephraim Higgins!"

IT SOUNDED okay. It sounded like a swell blurb for Manny's Navy epic, only somehow a sort of sixth sense told me I'd better get Miss Higgins away from the press, and do it quick. Horace broke it up by calling for her to make a shot. When that was over, we herded the girls into cars. I took Zone with me—that sixth sense again, I told myself. We were scheduled to lunch at the studio commissary and tour the harbor afterward. But the next thing I knew, I was sitting at the lunch counter on the Navy landing, while Zone ate a ham sandwich and gazed out at the Fleet, enraptured.

"When I was ushering at the Bijou in Beaver City, I used to dream about doing this." She slapped more mustard on the ham. "Gosh, Mr. Henry, you don't know what it means to be the only girl in a Navy family. All my menfolks died in the service, except great grandfather, and he got pensioned off for what happened at Manila."

"Wounded in the battle?" I asked.

"No, in the engine room," Zone said. "Seems Admiral Dewey gave an order to back up right quick, and great grandfather was caught off balance. He backed into the firebox and burnt his—his—That's how come he was pensioned."

Whew! I thought. If McMann had heard that one!

"And Grandfather Higgins—" Zone took a swig of coffee, "he died in Havana right after the sinking of the Maine."

"In—a naval engagement, I suppose?"

"At a cockfight," she said. "My, he was the one! My grandmother said he could drink his whole ship's crew under any bar anywhere!"

"And your father?" I asked feebly. "Was he killed in a naval engagement?"

"No," Zone said. "He was on shore leave in Balboa, and a monkey dropped a coconut on his head. It was the week I was born. That's how come my mother named me Canal Zone—on account of father—but I dropped the Canal—"

THERE was a tremendous flutter and clatter outside. Horace and the other sweet young things had arrived. So had McMann and his photographer.

"Look, baby," I said to Zone, "promise me you won't talk to any newspapermen. Don't tell them anything about yourself or your father or your grandfather—or the coconut—or the monkey—or what your full name is, please, for the love of Pete and Manny Steinberg!"

"But I think it's patriotic," Zone said stubbornly. "I'm proud of it."

McMann had spotted us through the window and was heading our way. "Be a sweetheart," I said. "Scram—and meet me at the motor launch."

She had seen McMann, too. She scrammed.

He slid onto the stool beside me, grinning knowingly. "Well," he said out of the corner of his mouth, "is Beaver City *the* one?"

I snapped: "Look here, Manny doesn't pull that sort of stuff and you know it."

"No, but maybe the Navy does," he winked. "In exchange for certain favors—?"

Horace banged on the window and gestured toward the motor launch.

"Which admiral's cousin is she, anyway?" McMann persisted.

"You're all wet," I said, and got up.

"So's the Navy," McMann said. "But I'm patriotic. I'll string along. What say, Bob?"

"I say you go chase yourself," I told him, and walked out.

Zone went her own sweet way the minute she felt a new deck under her feet. Aboard the Tennessee, I located her in a gun turret, where a bunch of gobs were explaining battle stations to her; on the Maryland, I had to drag her away from six young aviators to have her picture made with a rear admiral; and when we made the flagship she just disappeared into the bowels of the ship. I finally found her in the engine room, regaling the crew with the story of Grandpa's wound at Manila Bay. I gave

Right there was where the jolly tars earned their salt. They lifted Zone onto their shoulders, formed a flying wedge, and leaped up on the stage

her a cold eye. I said: "I told you not to tell that yarn!"

"To newspapermen," Zone corrected me. "And I didn't. I waited till he went away." She sighed dreamily. "Mr. Henry what do you think? I've been invited to three Navy hops! I can't wait."

"I can't either," I said sarcastically.

WHEN we got back to the studio that night, Horace said: "Bob, I don't think it was fair of you to tip off Beaver City."

"I didn't tip her off to anything!"

"Of course not!" Horace said. "It was just coincidence today the way she left the admirals flat."

"Zone prefers enlisted men, that's all."

"Don't try to stall a pal," Horace said. "Admirals are all very well—but you and I know it's the enlisted men who are going to choose the Spirit of the Fleet."

"Horace, on my word of honor—I didn't tell her!"

"Well, let's go have a drink, anyway," Horace said sadly. So we did.

When we emerged from the bar at midnight, the morning papers were on the streets, and I bought one. McMann had his whole page taken up with a layout of the pictures he'd snooped of Zone that afternoon. The caption underneath read: "Granddaughter of late Rear Admiral Higgins snoots Navy biggies to fraternize with enlisted men." Underneath was a whole column about the late Rear Admiral Higgins at Manila Bay.

With the smug paternal air inherent in all Hollywood commentators, McMann said that Manny Steinberg's nation-wide search for a girl epitomizing the Spirit of the Fleet had ended. Miss Zone Higgins (whose unassuming charm and naïveté had already swept blasé Hollywood off its feet) was IT.

"Well," I said to Horace sadly, "that ends her."

"Yep," Horace agreed. "Whenever McMann picks a winner, they never even place. Little Zone is phft!"

We went home.

NEXT morning when I got to the studio, my boss, Walter Doran, was screaming his lungs out. "Big shots all over the place," he yelled at me. "And you have to shoot her with a bunch of sailors. A hell of a way to handle an admiral's daughter."

"He wasn't an admiral," I said, "and it was her own idea, and besides—"

"Don't quibble!" the old man shouted. "She's connected with the Navy, and—"

"Look, chief," I said. "Just because this baby happened to have Navy menfolks doesn't mean we've got to do nip-ups—"

"But the enlisted men are doing the voting!" the old man wailed. "And they'll vote for the admiral's daughter. They'll have to or lose their jobs!"

"The Navy personnel works under a little different setup from a motion-picture studio," I pointed out dryly. "An admiral isn't a producer, and the jolly tars, believe it or not, can vote for whomever they please, and still keep their jobs. Besides, the Spirit of the Fleet hasn't been chosen yet, and when she is, I'll wager my last plugged nickel it won't be this Higgins!"

"You're darn tootin' it won't!" I swung around. Zone was barging through the door. I slid off the desk.

"This," I said, "is Miss Zone Higgins!" She went right past me, straight up to the old man and stuck the newspaper under his nose. "Are you the boss of this business?" she demanded. "Well, listen, I don't stand for having my great grandfather poked fun at—not even for a Steinberg Navy epic!"

"A most regrettable mistake," the old man soothed. "We'll see that you get some really good stories—"

"You just see that I'm not mentioned at all, and it'll suit me fine!" Zone raged. She spread the page on the old man's desk and pointed to the McMann caption. "So I fraternized with the enlisted men, did I?" she raged. "Well, what of it! Where'd we all be if the Navy didn't have enlisted men, and somebody jumped on us? We'd be in a mess, that's what! We'd be pushed right off the ocean, that's what!"

"You're absolutely right, Miss Higgins," the old man began, but she slammed the paper down on his desk. "Count me out of your silly contest," she said. "I won't be a party to anything that's as phony as this!" She went out the same way she'd come in.

The old man took out his handkerchief and mopped his brow.

"You get a rough idea," I said.

"Well, what are you standing there for?" he yelled. "Go after her!"

"But she said she wouldn't—"

"Hell's bells!" he roared. "We can't offend the Navy—not when we're facing a shooting date! Besides, what she said is good stuff—it makes sense—it's a darn' swell story!" He started pushing buttons. "And as for you—you go get Miss Zone Higgins to change her mind about this contest or you're not working here any more. Whether she's our winner or not, remember, she's still an admiral's daughter—"

I started to tell him again, and then I thought: "What the hell! Hollywood's been done in before!"

I went looking for Zone instead.

She was standing on the corner waiting for the bus. I said: "Hello."

She said: "Don't you hello me! If you'd let me tell that long-nosed guy the truth yesterday—"

"Look, honey," I said. "If you'd told McMann what you told me about the Higginses, you'd be crucified on the highest hill in Hollywood this morning. Let's get a ham sandwich."

"No siree!" she set her heels stubbornly. "They can have their money back! I'm through!"

"Okay," I said. "Then I'm through, too. And jobs are scarcer than hens' teeth right now."

"Every now and then you sound an awful lot like Beaver City," she said. "Where were you born?"

"Del Rio," I told her. "It's a little town in Texas—and the folks there still think the harbor is in Los Angeles." All at once we were laughing together.

"I'll take that ham sandwich," she said. "And I'll do what you want me to about the contest, Mr. Henry."

"I want you to go right on being Zone Higgins," I said. "Do as you please, say what you think, and no matter what happens, don't let 'em push you around."

"Can I go to the Navy hops?"

"By all means," I said. "Don't miss *any* Navy hops!"

She didn't. When the votes came rolling in, it was a landslide for Beaver City.

WHEN I walked on Stage Five, at nine o'clock Monday, the script girl said Zone was still over at make-up. Just then she barged in through the door, followed by the hairdresser, and marched up to me, eyes blazing.

"Will you look at me?" she demanded.

"See, Ming? That's us!" RICHARD TAYLOR

"I feel like a silly cow peering through a fence, with these false eyelashes banging my cheeks—"

I said: "Honey, you look wonderful!"

She said: "I look like every other girl I've seen in Hollywood—"

I shoved her sides at her. "Here, read your lines and cool off, glamor girl."

She started reading, her little red mouth moving with the words. Suddenly, she looked up at me.

"None of this makes sense!"

"That's just your cues," I explained.

"I know all about cues," Zone cut in. "We used to have high-school plays back in Beaver City." She started across the stage. "Which one is the director?"

I hurried after her in a panic. "Look here, Zone, you can't do this—"

"You told me not to let 'em push me around," she said over her shoulder. She walked right up to the great Garson Moyle. "I'm Zone Higgins," she said.

"The Spirit of the Fleet," I put in feebly. "You remember—?"

Moyle said: "Oh, yes—well, we're not quite ready for you yet, Miss—Spirit—"

Zone said: "I don't like an about this whole thing—terribly

Moyle's eyes bugged in his fat little. He said: "What in par don't you like terribly, Miss Higg

"This make-up, for one thing,' reached up and yanked her eye off. "Nobody really has lashes a long—at least, not where I came And these silly little curls! A pla who has to work for a living can't to keep her hair fussy like thi Moyle. A plain girl's hair would look this way."

She gave her blond curls an u swish with both hands.

I heard a low moan as the hair collapsed in a vacant chair.

Zone was going on: "And th this girl talks—she makes me sick

Moyle was smiling his nastiest which I knew meant trouble. He to Sidney.

"Miss Higgins—this is Mr. S Sidney, the author of our story. pose you tell Mr. Sidney what he to improve it."

"You're kidding me," Zone said I'll do it anyway. What can I lose

"Exactly," Moyle purred.

I backed up and sat down in a beside the hairdresser, who was ing through his hands.

I patted his shoulder sympathet "I know, pal," I said.

"Look," Zone was saying to the Sidney, "this girl is a plain gir me, isn't she? Or like I'm suppo be. And yet you've written h goggled-eyed because the boy fr an ensign, and got her fussed Annapolis, and stuff like that. why don't you have her a girl really Navy—Navy from down and darn' proud of it? Soose
o Goose

y Bob Considine

y Soose has the skill and ce that make champions. can take a terrific beating, how it hurts his manager!

PHOTOGRAPH FOR COLLIER'S BY CHARLES KERLEE

ORE respects than one the most re- table young fist fighter in the coun- oday is good-looking William Stephen called Billy, college-bred son of a Hun- steel worker.

se has beaten both claimants of the l's middleweight championship without ing the title. He has had extreme success professional since leaving Penn State, but income was so unsatisfactory that he ught of retiring from the ring at twenty- o. He is one of those rare fighters who kes care of his manager, instead of vicious ersa, for Soose's manager is a sensitive, good- atured Hollywood scenarist who has been known to faint dead away at the sight of Soose taking a punch on the jaw.

Soose says things like, "I dare say my right hand is completely over its tenosinivitis trou- ble . . ." without blinking an eye. He'd like to go back to school, to complete the medical, legal or physical-education courses he started. He has a year and a semester left, but from the looks of things he'll have to postpone that for a long time, for he seems about to embark on a career as a world's champion and after that he wants to take a crack at Hollywood as an actor.

Don't get the idea that Soose is a goose. He is sensible far beyond his twenty-three years, and though he is quiet, rangy and photogenic, he is a two-fisted fighting man, full of the necessary pitilessness. He is just plain un- conventional for the ring game. To light- heavyweight champion Billy Conn's honest amazement, Soose can fight "even if he did go to college." That is Conn's and the fight game's highest compliment.

Madison Square Garden and the top-notch fight writers were eagerly awaiting Billy's New York debut in his fight scheduled with tough young Tami Mauriello, a Bronx middle- weight who has been unbeaten in 25 fights. Mauriello can take it as well as dish it out. The experts figured that it would be a torrid test for Billy. But they knew too that no pain he would absorb would be as keen as the sympathetic aches and imaginary cuts en- dured by his manager.

Soose's relationship with his manager, Paul Moss, has created downright alarm in the beak-breaking business. It is revolutionary in that there is no master-servant aspect to it. Moss, a rugged-looking, quick-witted home- townsman of Soose's, rarely goes into Soose's corner any more. Makes Moss nervous. To pour additional salt into the wounds of the Managers Guild, Moss demands, "What good could *I* do, Billy?"

But Soose is not looking for a Jack Kearns or a counterpart of the late great Joe Jacobs to pilot him. Moss arranged for Billy's edu- cation, started him on his pro career, got him centered in the public eye by announcing that Dick Powell, the actor, was Billy's manager, steered him into a fight with Ken Overlin, world's middleweight champion of New York, and, even more astutely, got Soose into the ring with Tony Zale, world's middleweight champion of the National Boxing Association.

Soose did the rest with a clean, crackling right-hand punch, a busy, nagging, hooking left and some of the most classic footwork this side of a Currier and Ives print. He was (and is) counseled by one of the greatest trainers and seconds in the game, Ray Arcel, who owns a "piece" of him. At Penn State he fought under the guidance of Leo Houck, the coach who also developed Steve Hamas at the same school. But Billy was his own first in- structor. For he was only fifteen when he made his formal ring debut, and weighed ninety-eight pounds. The main terror of his first ten fights was that his mother would find out and give him a licking.

No Fights, No Soose

Billy Soose became the greatest college fighter of all time. At least no other learned leather-thrower equaled his record. He fought fourteen freshman and varsity matches from the time he entered college until he left in his junior year. He knocked out all fourteen opponents, some of whom outweighed him twenty pounds, and did it with those heavy mittens the collegians use.

One day the school's dean of men called him into his office and showed him letters from the University of Wisconsin and from the Uni- versity of North Carolina threatening to drop Penn State from their schedules if Soose re- mained on the team. At the same time the Eastern Intercollegiate Athletic Association, after investigating Soose's active amateur ca- reer, put through a ruling specifically aimed at him. It barred thereafter from conference- teams all former winners of Golden Gloves tournaments. And Soose had won Golden Gloves titles from 112 to 145 pounds. Soose quit school.

That led to his becoming a pro, and to the formation of the novel team of Soose and Moss. Moss is a Farrell, Pennsylvania, boy who made good. After graduating from Penn State he engaged in radio and publicity work in New York, then went to Hollywood where he helped to write the first Big Broadcast and other pictures. He returned to Farrell for a vacation and saw Soose, then finishing Farrell High, fight several of his 184 amateur battles. Soose had offers to go to the University of Pittsburgh and to Washington & Jefferson. Pitt even offered to send a special tutor to Farrell to coach him over certain entrance hurdles. But in that region of Pennsylvania the sun of learning rises and sets on State Col- lege, and Moss rendered what was hailed as a great public service to Farrell when he fixed it for Soose to become a Nittany Lion. Moss went back to Hollywood, became Powell's praise agent, and forgot Soose.

To help support himself at school, the young man waited on tables, worked as an usher and assisted the trainer of the football

team. At first his ambition was to become a doctor, then he decided that the law was his forte, and when he was flung more and more to the physical side of the school he decided to specialize in physical education. What the school's athletic department wanted him to specialize in, of course, was fighting—for it was soon apparent that he was extraordinarily gifted in mayhem.

He was like a man fighting boys. Long before he was out of high school, and as young as he was, he knew from bitter experience how to feint, and weave, and slip punches, and counter and pace himself. The rival collegians he met were excellent college fighters, because Penn State's schedule is always tough. But he handled them just as a good pro would handle a barroom fighter.

When Billy turned pro in April of 1938 a group of his Farrell supporters immediately thought of Moss. They wired him and suggested that Moss send for him and become his manager. Moss' knowledge of the ring game was limited to an uncertain conviction that there was a difference between feint and faint. But he wired Soose the train fare to California and agreed to become a fight manager, a decision that promises him an early but exciting grave. Looking back on the decision Moss believes that he acted primarily in self-defense. He was afraid that if he said No to the Farrell demand the citizens of the village would boycott his family's furniture store. He had also had trouble getting masculine-gender publicity spread around the country on Powell, and he thought Soose might be a temporary solution.

Soose arrived, and Powell, the so-called manager, was pictured with a towel around his shoulder, attending to the corner needs of a battler who looked more like an active customer's man. On the strength of the Powell tie-up, Moss talked the promoters of the Henry Armstrong-Baby Arizmendi fight into using Soose in the semiwindup. Thus he made his debut pretentiously, on March 13, 1938, at the Olympic Auditorium, Los Angeles.

Fighter Manages Manager

Moss and Powell shook visibly while a tough sailor named Johnny Dean waded enthusiastically into the stringy, black-browed ex-collegian. And they lost all vestiges of managerial restraint when Soose knocked out his man in the third round. Before that, Soose had his hands full with them in his corner, especially Moss. "Take it easy, Paul," the panting fighter soothed the manager between rounds. "I'll get him soon."

Soose knocked out four of his next five opponents on the coast, but never made more than $50 in a fight. The combine went deeply into the red when Soose needed a tonsilectomy. Both Soose and Moss were losing all their illusions about the dough in the pro game when Moss got a wire from a Pittsburgh promoter offering Soose one thousand dollars to box Al Quaill at Forbes Field.

Now Moss numbered among his friends some of the most incorrigible ribbers in Hollywood, and for a full day he was convinced that this was a phony wire. It took Joan Blondell, Mrs. Powell, to convince Moss that it wasn't a phony. The right-hand punch that Soose hit Quaill with in the first round of their Pittsburgh fight was no phony, either, nor was the fighter's realization that he had done some woeful harm to the fist.

He finished out the fight against Quaill using his left almost exclusively, and won it with a fine exhibition of boxing skill, though Quaill was a ten-to-three favorite. Soose won a few fights after that, too, but it was plain that his hand wasn't right.

Moss ordered a long rest in the hope that the hand would improve. When it remained weak he got Billy a job in the Mercer Tube works, a Farrell steel plant, in hope that the handling of hundred-pound ingots would strengthen the hand, keep Billy as tough as those ingots. But the hand remained weak.

A Jolt for Mr. Jacobs

Moss then sent him to New York to go under the wing of Ray Arcel. At the same time, with disarming naïveté, Moss wrote to a bewildered, head-scratching Mike Jacobs that "It is not my intent to bore you with words about this boy's fighting ability. Such a description would have to be secondhand if it were to carry any weight, since my experience in the boxing game is limited to what I've gathered around the country during the last six months, the sum total of which has convinced me that I know little or nothing. So I must rely on boxing men like Harry Keck, Arcel, Nate Lewis, and trust that they are at least partly correct when they say he is the most outstanding fighting prospect in the ring today."

Mike said, "Phew!" and sent the letter out to his publicity department, for translation. Simultaneously, Soose's hand seemed to respond to Arcel's treatments. He was able to beat Johnny Duca in February, 1939, at Youngstown. It was a satisfying victory in that Duca had won a bad decision over him in Lancaster the year before. But after the excitement of the fight wore off, his hand was an angry lump of pain.

Moss borrowed money to retain Dr. Jerome G. Finder, a celebrated Chicago surgeon. Finder practically rebuilt Soose's hand, put sheathing, tendons and muscles back in place and scraped out scar tissue—working through a one-inch incision which now shows only faintly on the back of Soose's hard fist. Soose was sent off to the Maine woods, and Moss wouldn't schedule another fight for him until September, 1939. But when Soose did fight, against one Joe Fedz in Beaver Falls, Pennsylvania, Billy won by a quick kayo. The ersatz fist withstood the hammering, and there was joy unrestrained in this cultured clouting combine.

In 1940 Soose started out with a decision over Vince Pimpinella and followed that one with a three-round knockout of Jimmy Clark. The clever Georgie Abrams outpointed him for the second time in his career, but Soose came back to belt out Enzo Iannozzi and former champion Babe Risko. Coincidentally, Ken Overlin won the New York end of the middleweight crown from Ceferino Garcia and, gay soul that he is, found himself broke two days later. Looking around for somebody safe with whom he could draw money, Overlin, and his manager, Chris Dundee, selected Soose as the victim, assuming naturally enough that Soose, who couldn't beat Overlin's lesser stable mate, Abrams, certainly wouldn't bother the champ. The match was made at over-the-weight terms, obviating any chance that Overlin would lose his title.

It seemed an absurd precaution at the time. Overlin was three-to-one even in hostile Scranton, scene of the fight. But at the start of the fight Soose sank his right into Overlin's middle and took charge of the match, at least to the satisfaction of the two judges. Referee Jack Walton voted four rounds for Soose, five for Overlin and one even. The New York writers who bore witness generally condemned the verdict, stated that Overlin deserved at least a draw, and for the most part overlooked the fact that a fellow with only a semilocal reputation had put up a whale of a fight against a champion.

Moss smartly used the unfavorable publicity as a wedge to get into Chicago. He conned Art Winch and Sam Pian, astute former managers of Barney Ross, into believing that Soose was Zale's natural opponent. They agreed that a quick victory for Zale, a ferocious knockout specialist, over the man who held a decision over Overlin would strengthen Zale's claim to the title and proportionately cheapen Overlin's. The over-the-weight match was staged within a month after Soose's July victory over Overlin. And to the discomfiture of his hecklers, Soose was terrific. The referee and both judges agreed that he won eight of the ten rounds. The crowd, whistling for a knockout after Zale hit Soose with everything except the arena's mortgage in the first two rounds, swung over to Soose and rooted him home.

The only thing certain about Soose's future, futures in the ring game being even more uncertain during these conscripting days, is that they'll never have to run a benefit for him. He loves to fight, but he could get along without it. He suspected not long before the Overlin fight that there was more gore than gold in the game, and he thought of retiring to become boxing coach at Cornell. The Overlin and Zale fights boosted his three-year professional earnings to $12,250 and put him in line for important money. If all goes well this winter he should become Penn State's best paid ex-student of recent and near-recent vintage. Also, and wholly without vanity, he sees a future for himself in Hollywood if he becomes champion. And, that failing, he will be content to go back to school, get his degree and go to work.

One thing Moss has never learned. He has never absorbed the "They Can't Hurt Us" philosophy of managers. He can't look at Soose getting hit without a surge of sympathetic reaction. In the trying moments of the Overlin fight he roamed off into the night, white-faced and shaken, forcing himself to go back into the ball-yard arena just in time to see Soose's hand raised in victory. He was ill after Soose, peering through a film of blood, beat Frankie Nelson into a mass of wounds.

A Manager Takes the Count

But Moss' peak for sympathy was reached on the night of December 11, 1939, in Cleveland. Billy was in there against tough old Paul Pirrone. Moss was in Billy's corner with Arcel. Pirrone came glaring out of his corner, let a Soose jab slide back across his thick head and countered with a beaut of a right to Soose's jaw. All six feet of Soose came tumbling down in an insensate heap from the effect of the shocking punch, while Moss watched in horror.

Arcel was screaming some instruction to Soose's dead ears, but as the count of the referee reached three the trainer heard a heavy thump next to him. And, turning, he saw Moss on the floor in a glassy-eyed swoon. It was one hell of a problem for Arcel, what with both Soose and Moss down and out. But he kept bellowing advice to the stricken fighter, while with a free hand he broke one of those ammonia capsules and held it under Moss' nose.

Moss began to come around. In a minute he knew where he was and when the full horror of what he had seen happen to Soose struck him again he gasped, weakly, "My God . . . was Billy hurt bad?"

Arcel busily pointed at the ring, and when Moss' eyes cleared there was Billy, very much alive, pounding Pirrone from rope to rope with a furious counterattack. He had gotten up at the count of nine, but a referee could have counted 109 over his manager. Soose won the fight, but Moss hasn't been quite the same since.

Army parachute jumpers line up for inspection before a practice jump. Equipment includes emergency 'chute in front, regulation 'chute on back, pistol strapped to leg and special shoes, some with ankle supports. Equipment is not yet standardized: note two men at right wearing helmets designed to keep pilot's mouth from falling open when pulling out of power dive

GENERAL NATHAN BEDFORD ORREST had been a Bostonian instead of a Tennessean he might today e known as the Pappy of the Parachutists. He had the main idea. The hitch was that the Confederate armies had no air service. The Unionists had, but they didn't have much imagination about it. This shows you the necessity for coming things and imagination if you want to get anywhere.

You'll remember old General Forrest. He was the gallant Southern commander whose simple rule for winning a battle was to "git thar fustest with the mostest." He was a swooper of the most persistent type and gets credit in Army lore as the inventor of the idea of shooting infantrymen on horses. After he'd got them aboard and told them to ride on, he'd send them swooping around the Union flanks, hell for leather, to blow up supply dumps, tear up railroad and generally raise Cain.

This sort of unorthodox warfare tried Union patience sorely and for months the boys in Blue marched with their chins on their shoulders listening for the hoofbeats of Forrest's mounted infantry in their rear. If Forrest had had the Union's air-service balloons it's a cinch he'd have had his raiders swooping down from the sky on parachutes instead of across hill and dale on horses.

But General Forrest didn't have any air transport and the Union didn't have any novel ideas, and so it wasn't until 1940 that parachute troops began trying to "git thar fustest with the mostest" during the German attack on Holland. And it wasn't until six months later that our own Army had a parachute outfit organized and ready for action. We'll go down to Georgia and have a look at it in a minute—but first let's get some background, as the saying is.

The basic war problem is, and always has been, the same. It is to get a doughboy—fed, watered, happy and in good working order—from here to there with a minimum of delay. That was Hannibal's problem and Genghis Khan's and Napoleon's and Pershing's. Today it is General Marshall's. The problem has been tackled, through the centuries, by putting soldiers aboard transport, taxicabs, busses, battleships, mules, horses, elephants, camels, trucks and planes. Hitching them to parachutes is merely the latest device for the same old purpose.

Since our Army started to organize parachute troops, civilians are always asking how 'chutists could be used by a nation on the defensive. We have been sold the word "defense" so thoroughly that the idea of our Army's attacking an enemy seems unreal. The truth is, as Army men point out, that you can't win a war on the defensive. To win, you have to attack. A "defensive" army—or navy—is just a political catchword. Any force organized merely to defend a country would be beaten before it started.

You may get some idea how our parachute battalions might be used by imagining the Germ—well, an enemy, had landed in Labrador, set up an air base and started to bomb our "Vital Triangle." That's the territory enclosed by a line running from Boston to Washington to Chicago to Boston. Put that triangle out of business and it's curtains—most of our industry is concentrated there. Well, suppose the enemy has this Labrador base.

We'd try to bomb this base and then capture it. In the old days we'd have tried to get troops there afoot, or in trucks or on horses. Now, the idea is to get them there via parachute. This would be about the only way to get them onto the enemy base. Our planes couldn't land them, to start with. But with reasonable luck—and, oh, boy! the luck we've had in our wars!—a couple of parachute battalions might get five hundred fighting men onto the base, to capture and hold it long enough for our troop-transport planes to set down reinforcements and bring in artillery, small tanks and armored cars, all of which have been carried experimentally by plane.

This sounds, for the 'chutists, like a suicide detail, but as a matter of fact a man coming down on a 'chute isn't so

PHOTOGRAPHS FOR COLLIER'S BY HANS GROENHOFF

vulnerable as you might think. In the old Western phrase, he's comin' asmokin' with his .44 and maybe some hand grenades. The enemy on the ground is actually at some disadvantage.

In the World War, for another example, parachute troops might have been sent to reinforce the famous "Lost Battalion." In the next war they'll undoubtedly be used to rescue cut-off detachments, as well as to operate, if possible, behind the enemy lines.

The birthplace of parachute fighting in our country wasn't at an Army post or air-service field, but near the little town of Winthrop in the high Cascade Range of northern Washington State, and later in the Bitter Roots near Missoula, Montana. The man who started it wasn't a flier or a soldier: he was David P. Godwin, assistant chief of the Division of Fire Control of the U. S. Forest Service. Godwin wasn't after new methods of attacking human enemies; he was after forest fires.

The Russians had been experimenting with parachute troops, and so had the Germans. The Forest Service lads had discussed it for years and had been parachuting food, water and tools down to fire fighters for a long time.

Godwin got reports from both countries and had them translated. The Russian dope wasn't very useful and the German was full of baloney, obviously intended to mislead—or frighten. So, late in 1939, Godwin went out to the Pacific Northwest and started to work out the thing from the ground up—and down.

The service started dropping smoke chasers into fire areas in October, 1939. The first jumps were made by professionals, but the local boys soon caught onto the idea—and that gave Godwin a basic principle: It's much simpler to make a parachutist out of a fire fighter than vice versa. The Army has adopted the principle and is making jumpers out of infantrymen, instead of the other way around. If you're a professional 'chute jumper, but a civilian, you're out of luck trying to get into a parachute battalion.

Godwin and his men developed special clothing and braces for jumpers, to protect them in landings in rough country and treetops. One danger was the tendency of 'chutes to oscillate, which might mean maiming or killing a man by swinging him against a tree or rocks. So a nonoscillating 'chute was worked out. To drop cargo, the rangers made 'chutes of burlap at a cost of $1.50 that would carry down anything from a crate of eggs to a radio set for the use of fire fighters in rough country.

The end of the fire season and the coming of winter stopped work that year, but it started again early in 1940, this time with the Missoula district as a base. The service worked out a technique. When a lookout reported a fire, smoke chasers got into their protective suits, climbed into the plane and streaked for the blaze, which was usually just a small one. The plane first circled and dropped a test 'chute with a sandbag. Watching where this landed gave the pilot the wind direction. On the next circle he knew just where he must drop his fire fighters to land them near the blaze. It had to be close, because in that mountain country ground travel is slow.

When the plane was in the right spot, the pilot gave the word to go, and the smoke chasers bailed out. The ship then made a third circle and dropped cargo 'chutes carrying rations, maps, flash-

t be impatient at all this back-
We're getting around to the
Early in the summer of 1940
met General Henry H. Arnold
Army Air Force in Washington and they got to talking about parachute troops. Godwin told the general what the Forest Service had been doing out in the timber country, and Arnold asked if he could send out some observers. Godwin said sure. Arnold sent out Lieutenant Colonel E. A. Smith, of the infantry, and Captain Reuben Kyle, Jr., of the Air Service. They flew to Missoula, found out all they could, borrowed samples of the equipment invented by the forest boys, flew back east and started the organization of a parachute corps.

The outfit was created at Fort Benning, where the Army's infantry school is located, in the pine and cotton country of western Georgia, ten miles from the textile-mill town of Columbus. Here, on a 152-square-mile reservation, are concentrated infantry, tanks, mechanized units. Here, too, is the Air Service's Lawson Field.

The first jumpers came from the Twenty-ninth Infantry and were all volunteers. Every officer in the outfit volunteered, too. From the available men, the organizers took the athletes—basketball and football and volleyball champs, track men and boxers. Parachute battalions in the future are going to win all the athletic events, it seems, because they'll be composed of the pick of the Army's sports experts.

To command the 501st, which is the official designation of the battalion, the general staff chose Major William M. Miley. Soft-spoken, hard as nails, Miley is a Californian and one of the Army's top gymnasts. He is ■ swordsman and an acrobatic tumbler and before he started parachuting was athletic director at Benning.

Under the major in the early stages of development were Captain Bill Ryder and Lieutenant Jim Bassett. Like their C. O.—and all the rest of the outfit—they were intensely interested in 'chuting, working twenty-four hours ■ day, experimenting, writing manuals and reports, working out tactics, inventing new gadgets—doing ■ swell job. There were less than fifty of them, to start with, living in pyramidal tents out on the prairie because there were no barracks for them.

Now let's go out to Lawson Field and watch the boys jump. They pile out of trucks and hunch into their 'chutes, helping one another, looking one another over for flaws. Captain Ryder is togged out like everyone else.

"It's a rule," he says, "that the men never are asked to do anything the officers don't do. It isn't that way in some armies. . . ."

The boys file into the big ship, standing with motors idling. It roars away, gains altitude, circles the field. The noise lessens as the ship is throttled down. Then suddenly ■ man appears at the doorway and steps out. Seconds later his 'chute is opening, billowing above him like half a grapefruit shell. Another man, and another. You time them. Twelve men out in ten seconds.

The men are coming down now at about ten miles an hour, you figure.

Down with Shoulders

By Aimee Larki

ILLUSTRATED BY GILBERT DARLO

There's a definite fashion tren to follow in selecting a 19 wardrobe. Here are the clu

Shoulders are the big news for 1941. From sports to evening clothes, in coats and dresses, shoulders have gone natural. There is only enough shoulder padding to make hips look slim

We are getting smooth hips by wearing a pull-over, a sarong or a longer bodice with fullness placed at the hip line or below. How far down your overblouse comes depends on your figure

Your skirts will still be short, but they'll be only short enough to flatter your figure. Let the right length be decided by your legs. Even when skirts look slim they give you room for action

DRESS BY LORD AND TAYLOR

HAT BY DOBBS

IT'S gotten so you can't buy a dress or a hat or pair of shoes without running smack into a lot ballyhoo about American designers. You see th names on the tags, and their pictures in the pape and you read about them in the ads. If Paris had fallen, most of them would never have gotten to fi base with the publicity boys and girls. They wou still be working behind the scenes, while the depa ment stores, the wholesale manufacturers and mos Paris would have kept right on getting the credit.

It's a fact America has some top-flight designe A couple of good big handfuls of them. They ha been functioning in New York and California years. Their names were familiar to you before t ballyhoo began. They are truly great designers, w have earned their fame by the excellence and ori nality of their work. But when designers are cro ping up by the tens and dozens all along Fifth Aven and you can't look at anything in any store witho having its parent rise up and haunt you, it's ti to get out your popgun. Important designers are developed overnight.

American mass production doesn't work that w It has to its credit the fact that American women a the best dressed in the world. They can get goo looking clothes at any price they want to pay an where in the country. They can get them from mail-order house if there isn't a store handy to t ranch. They are the envy of all the other women of t world, for nowhere else is it possible to get such go materials, so well styled and well cut, at a price fit every pocketbook. America can well be proud this industry.

But because he has a big investment involved, t manufacturer isn't keen to jump on every new ide designer may conjure up. He'd rather give you som thing similar to that dress you liked and bought such quantities last year—he feels sure of that. J enough changes, he'll say to his designer, to make this year. A runner, he calls it. Some manufactur would rather watch what their nearest rivals are ing, which is the reason design-piracy is one of t evils of the trade. Of course, most of them fran adapted and copied from Paris models. None these things is conducive to creative design. Th will have to be some changes in the American set and some money invested in design that doesn't ha to beat sales figures before the latent talent here really blossom.

But, meanwhile, there's that dress to buy, and t hat and those shoes. . . . Where is the clue to y 1941 wardrobe? What's the trend to watch, so th out of all you see, you will buy clothes that are their way into the fashion picture, not on the way o

Never doubt it. There are plenty of fashion tric here today and old stuff tomorrow. But underne is a slow-moving trend—changes in fashion beca you like change in everything; slow changes beca you are not going to launch a brand-new wardr every year. The present trend was evident in P two years ago. It is here today in full force.

It spotlights normal shoulders and slim hips.

The accent has been taken from extremes of fa ion and put on simplicity and naturalness. Should are padded only enough to flatter your hips into lo ing slimmer.

Skirts hang straighter. They are short; but o to a shortness that is becoming. The actual brev in inches is up to you. Pleats, a subtle shirring fullness or a sarong give you graceful motion plenty of walking room.

Waistlines are normal. Some bodices are blou Some are the casual easy-fitting pull-over, due popularity day and night; continuing down over hipbone it gives a long, slim-torso look that is e nently becoming.

Your whole wardrobe will be fined down in way. Fewer tricks, simpler lines, more emphasis the basic suit, coat and *(Continued on page*

Fenno girl.
ay, something about this mo-
ade her think of that. She was
in a place that had been home for four years and that now suddenly wasn't any place at all, just an apartment on Sutton Place with a lot of furniture in it, a lot of wedding presents that didn't have any significance any longer. She didn't belong to it any more; she had already started a new life; it was already the past, this apartment, a place she would remember, maybe: when I was married to Curly Mayson we lived in an apartment on Sutton Place.

Maybe she would remember that night right after they came home from the honeymoon and sat in front of the fire in the living room in their bare feet; maybe she would remember coming home from the hospital after Funny-face was born, how funny it had felt to them both that there was a baby in the place that belonged to them; maybe she would remember all the good parties, people barging in after the theater, the Negro from Harlem they used to get in to play the piano, the night she drank too much champagne and did a dance in the middle of the floor.

And maybe she wouldn't remember at all. Already the four years were sort of a blank, unreal. Maybe she would be having such a wonderful new life that she wouldn't remember the one with Curly because she wouldn't have time. This moment was set like a wall between the two lives, the end of one, the beginning of the other. The end of Mrs. Charles Mayson, the beginning of Mrs. Mallory Mayson. The Fenno girl would be Mrs. Charles Mayson soon. It was funny having three different names in your life before you were twenty-three. First Janet Mallory, then Mrs. Charles Mayson, now Mrs. Mallory Mayson. . . .

Her mother-in-law moved about the living room in a distracted sort of way. She had come in from Long Island to see Jan off and to start the work of having all this stuff put into storage. It was nice of her to see to that; Jan was glad she didn't have to fool with it. She never knew how to cope with that kind of business; she felt about twelve when she tried. Mrs. Mayson was dead set against the Fenno girl; she thought she had lured Curly away. But it was all right with Jan. Curly couldn't help it if he got this terrific sneaker, and the Fenno girl was divine, all right. You couldn't help falling in love with people. Maybe she would fall in love with somebody herself. She was beginning a brand-new life in which anything could happen.

"I STILL can't believe this awful thing is happening, Jan dear," Mrs. Mayson said. She sank down on the big sofa and lit a cigarette. "You and Curly were so perfect together. It's so heartbreaking to have it break up now, before you'd hardly got started. You're being so brave, Jan."

"No, I'm not. . . ." She really wasn't. There wasn't anything to be brave about. She and Curly had had a divine time ever since the night she met him at the Hasty Pudding dance up in Cambridge. They'd had everything they wanted: got married two months later with a swell big wedding and millions of parties and scads of bridesmaids and ushers; had a honeymoon in Honolulu and done simply everything marvelous; come back to this apartment and had a big time in it, parties and going out to Long Island for long week ends; had Funny-face dumped in their lap like a prize package, terribly cute and sort of surprising. Now Curly was mad for the Fenno girl and wanted to marry her. It was all right; it had been fine.

"Curly doesn't realize what he's throwing away," Mrs. Mayson said. "If he was a little older maybe he'd have more sense and realize that you are the girl he really loves. Or ought to. I just hate to have you get hurt, darling. I feel as if you were my own child. It's odd for me to say it, but you mustn't feel your life's over. You'll meet dozens of other men and fall in love with someone and marry him."

"I feel okay," Jan said. Mrs. Mayson thought her heart was broken, but it wasn't. She just felt through with something, and ready for what came next. She had loved Curly, she still did. But after all when you were eighteen you didn't know anything. You just knew how to have fun. She felt about Curly the way you would about a brother, maybe. Of course they'd been married and had Funny-face. But all that hadn't

sunk in, exactly. It was all just gay and fun, not important. It certainly wasn't anything you called passion. Things like that, real grown-up love, lay ahead of her in this new life. That was what made it so exciting. She moved restlessly around the room and ran her hand over her pale blond, shoulder-length hair.

"It's absolutely fair for Curly to have to be the one to go to Reno," his mother said. "He broke it up. I know he wants to go, to be near that girl while she gets hers, but anyway I'm glad you don't have to go out there. It's an absolutely savage place. Horrible women. You oughtn't to be exposed to anything like that, darling. Don't tell me. I know."

Jan didn't answer. Curly wanted to go to Reno, and she didn't care. It might have been fun to see what it was like, but it was going to be fun this summer up on the North Shore too. It didn't matter who got the divorce. It was all cooked up anyway. Mental cruelty. Her being mentally cruel to Curly. How would you be mentally cruel to anyone?

At last Nana was coming in with Funny-face. Jan put on her red straw hat in front of the mantel mirror. It looked nice, with her red-and-white foulard print. Funny-face looked sweet in his lavender romper, running around the room holding on to Nana's hand. Jan looked at him with the curiosity she always felt: how funny that that fat little tootsie was her child! She never really felt that he was, more as if he was a baby brother. It hadn't bothered her any while he was coming; they used to go dancing right up to near the end. . . .

MRS. MAYSON was kissing the baby. "I'll miss little Charles horribly," she said. "It's been divine for me, having a grandson at my age. I can't wait till he comes back for our six months of him. Gran's baby, yes, oh, you darling! I hope it won't be too awful for you giving him up part of the year, Jan. But I promise you I'll see he's well taken care of. I won't let that girl neglect him as I'm sure she would. I'll keep my eye on things. And Nana will be right on deck, I'm sure, won't you, Nana?"

The big-boned, horse-faced Irish nurse smiled back at Mrs. Mayson.

"I know it'll be all right," Jan said. She put on her white gloves and picked up her red purse from the coffee table. "Well," she said.

Mrs. Mayson got up and put her arms around Jan.

"Goodby, Jan darling," she said. "I could kill Curly for acting like such a dummy, even if he is my own child. You're a sweet, darling little girl, and it makes me sick. Remember I'm terribly fond of you and I'll always be. I'm absolutely on your side and I wish you could come and stay with me, although I suppose you won't."

Jan kissed her. "You're an angel to attend to all this," she said, waving her hand around the room.

"It's the least I can do. And it would be so heartbreaking for you to have to send away all your lovely wedding presents. It seems yesterday that we had such fun fixing up the apartment. Oh, dear," she kissed Jan again.

She saw them off from the door of the apartment, standing there while they waited for the lift, the three of them. Then it came, and they got in, and the door slammed, and that was the last time Jan would ever go down from the apartment. She felt fresh, as if her face had just been washed, and ready for what was to come next.

Fifty-seventh Street was bright and hot and beautiful in the afternoon sun. The heat put a sort of hush over the East River where tugs floated languidly on the grayish oily water; people strolled slowly down the street; the cart loaded with flowers in pots crept along the curb, and Jan waved to the man driving it as she got into the taxi after Nana and Funny-face. She would probably never see him again. This early June heat made her feel expectant; it was the kind of afternoon when you left to drive out on Long Island for a big week end; it was the kind of afternoon that made you look forward to smelling the salt sea, and playing tennis, and having fun with lots of people. The whole summer lay before her, mysterious and unimaginable.

The taxi stopped and went, stopped and went, through the hot city over to the West Side, toward the dock where they would take the boat for Boston. They passed pier after pier, going far downtown.

They got out of the taxi and Jan paid the driver and gave him a fifty-cent tip and they walked slowly along the pier, slowly on account of Funny-face's short fat legs, and onto the Boston boat. They had two large staterooms side by side. Their bags were carried in and Jan tipped the porter. Then with Nana and the baby she went up on deck and stood against the rail looking down at the swirling, dirty water. A lovely fresh smell came from the sea down beyond the harbor. They would sail in a minute now. Lots of people crowded the deck and hung over the rail.

"It's time Charlie had his supper," Nana said. "I wonder if I shall be able to order the proper things."

"Oh, sure," Jan said. "Take him down into the dining room, I guess. They can get you everything."

Nana took Funny-face away by the hand. Jan watched them go. Then she looked back at the water. They were nearly around the Battery and steaming up the East River. Pretty soon they would pass the end of Fifty-seventh Street. She must remember to look up and see the apartment house once more.

Barges and tugs passed, the wash from them spreading out fantails in the dark and oily water. They were going up to Boston, to a new life. Curly was all gone; not part of her life any more; somebody she'd see sometimes and be glad to see and feel fine friends with. He had been her husband. But it had always felt kind of silly to know that she had a husband. The word sounded so much more important than any way she felt. Curly kept on being a boy, a beau, somebody to have fun with. And then there was Funny-face, the only thing that would live on as an actual proof that she had been married, and had a child.

She leaned over the rail and scowled gravely at the New York buildings sweeping by. She wondered if she was horrid, the un-motherly way she felt about Funny-face. But she didn't see how she could help it. She simply didn't feel maternal or whatever you felt. Funny-face had popped out at her from nowhere as a big surprise and he might as well have said boo. He didn't need her, with an expert like Nana, and Jan didn't feel any need for him. She adored him. But she didn't yearn toward him or any of those things. He was just a funny little thing she had picked up somewhere who was, incredibly, part of her life just as her mother and her father were part of her life. But she didn't feel like a mother, she never had.

She hadn't been ready to be a mother, that was it. A sort of quick clarity invaded Jan's mind and she felt she had an explanation. Because she still had the feeling she had had in school, that some day it would be wonderful to have babies, to be married. She still felt that anticipatory way in spite of the fact that she had been married and had a baby. She hadn't been ready to be married, either; it had just come along and overtaken her. A whole lot of things had happened to her prematurely, as if she had dreamed them, and they hadn't taken hold of her because she simply wasn't ripe for them.

"You have just heard Major Fortescue's analysis of our overseas broadcast. This will be interpreted by our Washington expert, Mr. Greeley. Mr. Marshall, our networks expert, will then analyze Mr. Greeley's broadcast. You will then hear from our overseas correspondents again, who will analyze Mr. Marshall's talk"

JACK MARROW

SHE was still twenty-two and she felt that young, and at the beginning of things, ready and waiting for life to begin. It was as if she hadn't been to enough dances; hadn't met enough boys; was still waiting for the moment when she would fall in love with somebody and then would want to marry him and want to have a baby. It had all happened, but it hadn't happened to her inside; she was still twenty-two, waiting for everything.

Funny-face was like a tangible reminder of a forgotten dream she had had once.

They were way uptown now and she hadn't looked to see the apartment house. It didn't matter at all. The breeze from the Sound was battering at her straw hat and she started below. The crowds that filled the boat were an odd lot; not like on an ocean liner, not settling down, because they would land next morning; milling and laughing and acting crazy on the Boston night boat. Jan looked at them curiously, going down the stairway. Near the bottom she passed a young man who looked at her fixedly; his dark face was somehow familiar to her, but she could not r
ber where she had seen him befor

THE *New* INTERNATIONAL TRUCKS*

All-Truck Trucks *Better Than Ever!*

International Harvester is proud to present "The New Internationals."

Meet the kind of motor trucks you've always wanted to own . . . beautiful in appearance, powered beyond requirements, engineered for unbeatable economy . . . the *New K-Line Internationals.*

These trucks are new to you but they have already successfully endured hard lifetimes of hauling service in every type of test on all kinds of roads, and months of grueling punishment over the great International proving grounds.

Economy is again the outstanding feature. And the heart of the remarkable economy in all the light-duty models is the new International-built Green Diamond Truck Engine . . . exclusively International. The smooth performance of this new power-giant, plus its sensational low-cost operation, make these new K-Line Internationals big money-savers on any hauling job.

See the new Green Diamond Engine

There are new double-anchor hydraulic brakes; long, easy-riding springs; sealed-beam headlights; safety glass throughout; a new all-steel Safety Comfort-Cab; and many other features.

Phone any International Dealer or Branch for a *New* International demonstration . . . And write for a catalog giving you all the details about the *new* International line.

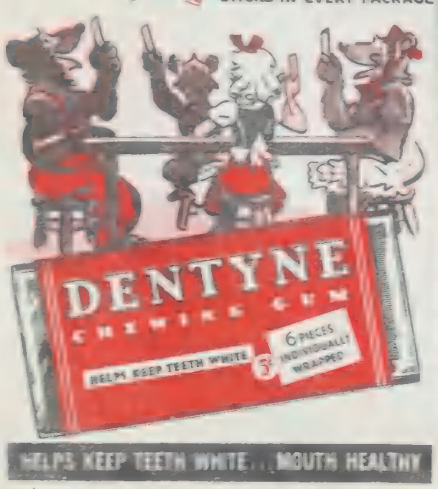
Goldilocks was brightening up her smile with delicious Dentyne the day she found the home of the three bears. Of course she tried their chairs, their beds and their porridge—and you've never seen three madder bears.

But Goldilocks flashed her lovely smile and said "Anyway, porridge won't make your teeth shine."

"But it's nice porridge," wailed the big bear.



"And not chewy enough," said Goldilocks. "Now Dentyne has an extra firmness that helps polish teeth and makes them gleam. It strengthens jaw muscles—firms up your gums. Here try some."

"M-M-M," said the little bear. "It's delicious. That nice cinnamon taste is different—and *extra* good."

"Right-O," laughed Goldilocks, "and note the flat handy package. It slips neatly into purse or pocket. More smiles to you and brighter ones—with Dentyne."

Moral: Help your teeth stay lovely and sparkling by chewing Dentyne often. Get a flavortite package today.

6 INDIVIDUALLY WRAPPED STICKS IN EVERY PACKAGE

Out of the Blue

Continued from page 31

Their problem is to land in a group on a target about thirty feet square. The dangling bodies swing back and forth as the jumpers manipulate the steering flaps to counteract air currents. Two of them almost collide, but quick work saves them.

There is the crack of a shot from the sky and then a short volley. Captain Ryder is practicing marksmanship as he descends. Pretty good at it, too, considering this is only his tenth jump.

Less than a minute after they have left the plane the eleven men and the captain are grouped, hauling in their 'chutes, within the limits of the target. They have come down about 700 feet in fifty seconds. Just before each lands, you see him reach up with both hands, grip the lines and give himself a lift just as his toes touch earth. This trick, which calls for split-second timing, breaks the shock of collision. If you do it too soon, or too late, chances are you'll break a bone, probably an ankle.

One man is pulled over by a gust and tumbles, like an acrobat, as he hits. He's up in a second.

"You see why we need tumblers," grins the captain—and to the 'chuters: "Good work, men. Any bruises?"

There are none this time, it turns out.

The Army's not Copying Anyone

"We've had more than 300 jumps," says Ryder, "but only one fractured ankle. Plenty of bruises and a sprain or two, though."

He explains that it's vital, in battle, to get all your men down in perfect physical shape, because there won't be many of them, and each must be fit for his job at once. There mustn't be the slightest physical—or emotional—trouble.

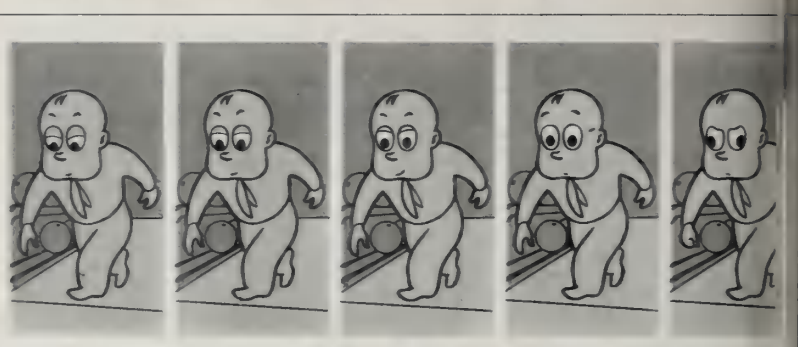
"Don't get the idea we're just copying the Russians or Germans," says Captain Ryder, back in the orderly tent. "We're starting in where they leave off. Can't win a war by copying the other fellow—you have to outsmart him.

"You can't go much by what the Germans did in Holland or in Norway. Their parachutists came down in ideal conditions, with a lot of preparation done for them by spies and secret agents.

"By the way," he adds with a grin, "all our men are volunteers. Our information is that the Germans had to order their men into 'chutes and that they had a tough time getting good ones. We have hundreds of volunteers. Look here . . ."

He displays a file of letters, from all over, pleading for a chance to join the 501st—letters from civilians and kids and privates and sergeants and majors in the Army and Reserve and the National Guard. Most of them are man-to-man letters, from Private George Spelvin to Major Miley, in defiance of War Department red tape. But, horrified as they may be at this democratic way of running an army, the brass hats at Washington haven't done a thing to Private Spelvin—that sort of spirit is too good to discourage . . . Couldn't get away with it in any other army, though.

All the jumpers with whom I talked agreed that the surprise of the game is that the 'chutist has little or no sensation of falling. Most of them were afraid they would. It was the same story from the newest rookie to Captain E. Vern Stewart, of the Illinois National Guard, who has more than 400 jumps to his credit. The captain has jumped at 500 and at 22,000 feet. The long jump took thirty-six minutes and the main sensation was boredom.



"If I ever jump that far again I'll take along a good book," grinned Stewart.

You'd think, if you stepped from a plane going nearly a hundred miles an hour and then were stopped by a parachute's opening, there'd be a mental or physical jolt. But there isn't. In the Army you don't even have to worry about pulling a rip cord.

"The way we've developed it," explained Captain Ryder, "each man has a twelve-foot 'static rope,' one end of which is attached lightly to the 'chute on his back. He holds the other end of the rope. When he is ready to jump he goes to the door of the plane, clicks his rope fast to a gadget, leans forward a little, half facing toward the ship's tail, and steps off, arms folded over his chest. The rope tightens, opens the 'chute and then snaps at the 'chute end. It's pulled back into the plane. The soldier by that time is dropping like a feather—more or less—guiding himself down."

Army 'chutes are made of silk and cost about $250 apiece. With care they last for at least 200 jumps. Experiments are being made with nylon, rayon and cotton. Some of the sharps think even tough, waterproof paper may be developed with strength enough for the shocks and strains.

Each Army jumper has his own 'chute, takes care of it and folds it after each jump. A 'chute *has* to be folded right—if it isn't, the next time you jump the War Department notifies your next of kin.

Split

CROCKETT JO

Some of the Army's early experimenting was done at Hightstown, New Jersey, from a 125-foot tower operated by a private concern. This was something like the famous parachute jump at the New York World's Fair, and was used to get the men accustomed to the idea. At Benning, the Army is building a 250-foot tower, for the same purpose. It will enable the men to learn each move slowly, and give officers a chance to correct mistakes before the actual jumping from planes is done.

In actual warfare, men will be 'chuted down from as low an altitude as possible, in order to shorten the length of time they're exposed to enemy fire. It's planned to have the boys jump from only 300 feet, which would give them less than twenty seconds in the air. Surprise is an important element in attack by parachute troops, and the sooner they can be grounded, the less chance there is of discovery.

The Army hasn't tried it yet, but landing in a dense forest is easier than on open ground—according to the veterans of the Forest Service. They call treetop stops "featherbed landings." Only trouble is, after a 'chute gets tangled up in the trees, to get it down. The smoke chasers want to recover the 'chute because it's expensive; the Army will want to because its presence would be a giveaway to enemy planes.

They haven't decided yet whe
send men down with guns and gre
or cargo-'chute these down sepa
The Germans claim to send their
down with machine guns, bomb
trenching tools and even bicycle
safe enough to chute down grena

aries," about parachuters. Nothin
of that, either. It wasn't until Ge
made such a spectacular display
land that any real progress was
Then, as we've seen, it was
Forest Service that the Army w
help. Curiously, while the Russi
veloped 'chuting for war purpose
turned it to fighting forest fires la
mer in Siberia. We started out
fires and switched to war.

Not everyone can become a chutist. The experience of the so far is that if you pick your can to start with, you can expect ninety-five per cent of them to jumpers; taking the Army as a perhaps ten per cent would fai physically, some psychologically

The percentage of civilians wh can become jumpers is pretty That is why, in early days, com air lines resisted well-meanin paigns to make them supply 'ch each passenger. The lines knew the emotional grip of a fall, sor sengers would freeze in the door fuse to jump, and thus block pas who would; that other passenger jump and then forget to pull the to open the 'chute.

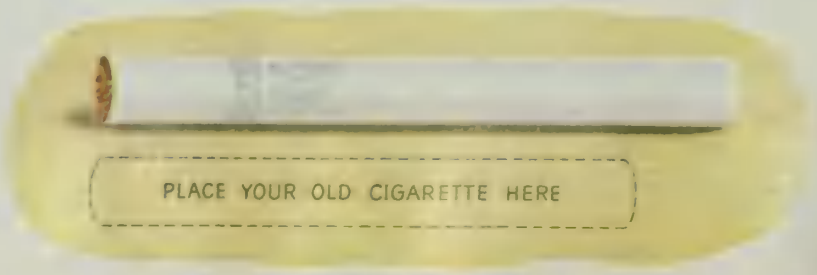
Late in 1940 we had only a cc score jumpers in our Army, b ones were being developed fast; time next year we'll have thousa parachute battalion includes 412 and men—and 379 of them, inclu the officers, are jumpers. We h one battalion getting under way many Germany and Russia ha definitely known. Not many,

Just as old General Forrest's n infantry was composed of Southe so is our new 'chute outfit. Y respondent asked Captain Ryde most of his flying doughboys we The captain grinned. "They're al ern boys," he said. "That is, all He's a No'the'n boy—from Ker

Something is happening in the cigarette business!

Look around—America.

Look in the Service. Look wherever you see young people. Something is happening in the cigarette business. A basic improvement in cigarette design is here.



It's Pall Mall—modern, streamlined—over 20 per cent longer than your old cigarette,—designed for better smoking.

See what this step-forward in cigarette design does for you!

It is a scientific fact that tobacco is its own true filter. In Pall Mall the additional length travels the smoke further: giving you not alone a longer cigarette but a better cigarette—a definitely milder, a definitely cooler smoke.

Pall Mall is a smoother cigarette, too. BULKING—that natural process revived by Pall Mall—lets time do what machines can only approximate. BULKING causes the traditionally fine tobaccos of Pall Mall to mellow, softens all traces of harshness. As a result, Pall Mall is a really smoother smoke.

Prove it—yourself, try Pall Mall critically. See if you don't agree that something is happening in the cigarette business!

"WHEREVER PARTICULAR PEOPLE CONGREGATE"

1941 American Cigarette and Cigar Co.

...and on oil pumpers, too,

HALF DONE JOBS won't do!

ALWAYS CHECK ENGINE BEARINGS

Power-stealing, motor-fouling oil waste is often caused by worn connecting rod bearings. To correct it calls for new bearings as well as new piston rings, or the job is only HALF DONE—and the costly oil pumping continues.

If your car engine is sluggish, lacks pick-up, has smoky exhaust and "eats oil", remember that it costs little more to replace the connecting rod bearings, when the engine is opened up for service, and thus be sure of complete correction.

You can quickly find out if worn connecting rod bearings are causing oil pumping. Have your service man check the engine with the Federal-Mogul Oil Leak Detector—and see for yourself if engine bearings are the source of trouble. If so, replace in sets with Federal-Mogul Oil-Control Bearings to restore power, pep and economy!

FEDERAL-MOGUL CORP., DETROIT, MICH.

surprise as Jimmy Watson appeared.

Cliff rubbed the heaviness out of his eyes and said, "Sorry, Jimmy—but I'm still broke."

"Yeah. I figured."

Watson reached into his pocket and produced Cliff's three-thousand-dollar IOU. "Been worrying about this?" he inquired.

"That's one way of stating it."

"Want it back?"

Halliday had the grace to grin. He said, "Listen, Jimmy, a burnt dog gathers no moss. I'm off poker for life."

"That's smart for a sucker like you. But it wasn't what I came for." Watson's narrow face was expressionless, his voice flat. "If you want to do me a little favor—and ask no questions—you can have this."

HALLIDAY frowned. "That doesn't sound right sensible, Jimmy. What you've got in your hand says three thousand. There's nothing I could do would be worth that."

"It would to me." Watson seated himself by the side of the bed. "I'll give you the setup and you can say yes or no. There's no use asking questions, because I'm not talking."

"Go ahead . . ."

"You're pretty good friends with Miss Patricia Mallory," stated Watson, pretending not to notice the start of surprise which Halliday made. "She's got a bank box somewhere. In that box is a .32-caliber, pearl-handled, nickel-barreled revolver. It doesn't mean a thing to her, but it means plenty to me. Ask her for the rod, slip it to me—and I give you this IOU."

Cliff was sitting up straight, his manner grave, his eyes thoughtful. He asked, "What's the gimmick?"

"That's for me to know. There is one, sure—otherwise I wouldn't be offering three grand for a gun worth maybe twenty bucks. But I'm not telling, see. Now look: I'm not asking you to do anything that's under the table. You don't steal the gun. You go straight to her and ask her for it. Open, like th Tell her why if you want. Tell her n for—it don't make any difference to It's all on the up and up. She either d or she doesn't. What's it to you if I my own personal reasons for want it?"

Halliday smiled. "You make it sou plausible. But the thing seems scre Miss Mallory's got a gun that's wo three thousand dollars to you. Bu still doesn't mean anything to her. I figure that if I ask her for it, she'll h it over. It doesn't check."

Jimmy Watson shrugged. "Mayb don't check, Cliff—but you know w you can do if you want. What's the swer?"

"I don't know. . . ." Cliff looked at the other man. "I've got to think over, Jimmy. That all right with yo

"Yep. You know where you reach me."

He went as unceremoniously as had arrived. Cliff got out of bed put some coffee in the percolator few minutes later, with the first hot of the coffee, his brain began to d but the answers continued to elude h

He walked to his dresser and ope one of the drawers. Digging down neath a pile of shirts, he uncovere revolver and picked it up.

That was it, all right—.32-cali pearl handle, nickeled barrel.

The more Cliff considered the si tion, the crazier it seemed. Obvio the gun had been used in the commi sion of some crime—else Wa wouldn't want it. But he wond where Pat fitted in.

Cliff also wondered why Jimmy W son didn't think that Eddie Gordon the gun. "It's insane," he decided. got to carry it to the right spot."

He called long distance and asked Eddie's training camp. He got the r but there was a long wait before E came to the phone. He said, "I'm u ing up, Eddie. Got the day off. I to make palaver with you—alone

Eddie seemed enthusiastic, and a

"Now here is something nice—if you go in for home movies"

later Cliff was at the wheel of his car headed into the wilds of New ey. He'd already thought so much it the thing that he was only con- ng himself. There simply wasn't answer, and he hadn't invented one he reached the training camp three s later.

closeted himself with Eddie in the r's bedroom, and told the whole ing story from the beginning. "And s all I know about it, Eddie. It's gun. You gave it to me. And I ght it back to you."

die was thinking, too. He wasn't g much luck piecing things to- r, but he was remembering some- . He recalled the night when a ge man had frisked his room. There been a fight, and the intruder had ed. But nothing had been stolen. med clear now that whoever it was have been after that gun.

en that, however, didn't check, be- Cliff described Jimmy Watson as all, wiry man, and the person who nvaded Eddie's room was a husky idual. He heard Cliff saying, 's it worth three thousand dollars s guy Watson? Why did he think Mallory had it? And where did you ?"

die walked up and down the room. id quietly, "I'm in a fog, too, Cliff. ll you how I got that gun."

I TOLD the story of the collision nd subsequent assault on Shades ntain the night before he left Bir- am. Cliff nodded and said, "I fig- here was something violent behind right. Look, Eddie . . . how did ad shape up: the one who slugged

lon't know. He conked me before a look."

nd you didn't get even part of a r at him?"

ot really. He was small, as I re- er it—and certainly not very

at's a hell of a vague description," mented Cliff. "But what there is of uld fit Jimmy Watson. And pre- g he *did* kill a man with that gun 'd certainly want it back."

ah . . ." Eddie was staring at the "I don't know your little friend. he's been a naughty boy, that's siness. I'm a lot more interested ting you out of your jam."

H studied the revolver intently. s harmless enough looking; gay He carried it to a writing desk in rner, scrutinized it closely and of something on a piece of paper.

"hat happens?" inquired Cliff.

"I noting down the serial number," nd Eddie. "Just in case."

"hat a brain. . . ." Cliff touched his on the shoulder. "You happen pretty regular also, Mr. Gordon."

"Thanks." Eddie turned toward his drom door. "Mind waiting here a ment, Cliff?"

Eddie walked alone into the other om and closed the door behind him. iff relaxed in his chair. He gazed out rough the window at the late after- oon sun as it streamed through the lia- and bathed the training camp in ld- splendor. He knew that there is more to this thing than appeared on e surface. He fancied there might be more even than Eddie had told him.

He sat up suddenly, his figure rigid. He had heard the bark of a revolver: ll ut frightening.

Cl leaped toward the door of Ed- e Gordon's bedroom, his face white. Fo the merest fraction of a second, iff Halliday paused with his hand on e doorknob. Then he stepped inside. Ed e Gordon was standing near the ot the bed with the gun in his hand. om the barrel there came the faint ne brance of a wisp of smoke, and the room was pungent with the acrid smell of powder. Eddie looked at the gun in his hand, and then at Cliff.

"Nothing to get excited about," he said. "Just the same old story: Gun went off accidentally."

Halliday made an impatient gesture. "Don't give me that," he said. "What happened?"

"Okay." Eddie placed the gun on his dresser and walked to the bed. "Give a look."

He stripped off the bedclothes and started doing things with the mattress. He ripped it in the middle and inserted probing fingers. He wore an expression of concentration, and eventually he smiled. He withdrew his hand and held it out, palm up, toward Cliff.

"There's the answer," he explained.

Cliff looked down at a bullet, and then up at Eddie.

"Out of that gun?" he inquired.

"Sure. I thought I could muffle it completely."

"What's the idea?"

"Ballistics. Plus a hunch. I'm going to send this airmail and special delivery to the Birmingham police. They undoubtedly have the bullet which killed that poor lug at Buzzard Roost. They can test one against the other. It's as sure as fingerprints."

"And if you find out that he was killed with this gun—?"

"We can then discuss what to tell the cops—if anything."

Eddie seated himself at the desk, and started to write. Cliff watched him. Nice guy, this Gordon. Odd how Pat Mallory got in his hair. Seemed as though the two couldn't get together without scrapping. Eddie got up and handed him a sheet of paper. "Look it over," he suggested. "See if it's literate."

Police Department
Birmingham, Alabama

About eight months ago ■ man was killed somewhere near Buzzard Roost. I imagine you have kept the bullet which was taken from his body. If this killing has not been solved, may I suggest that you make a ballistics test of that bullet in connection with the one I am enclosing, to determine whether they might have been fired from the same gun. Please answer to my New York address which is . . .

Cliff nodded and smiled. "It ain't only literate," he compliments, "it's classic. You must have done more in college than play football."

"Maybe . . ." Eddie took Halliday's arm and propelled him toward the door. "Out you go, fella. You got some business to transact."

"Meaning you want to get this off right away?"

"Yowzah. Airmail, special delivery, registered, and from New York."

"Do I get to see Pat?"

"You do—but briefly." Eddie waved, turned away and walked toward the old barn which was doing temporary service as a gymnasium. Two battered pugilists were sitting in front of a rickety old table pushing checkers around, and Eddie beckoned to one of them.

"Listen, Happy," he asked, "didn't I hear you say you had a brother on the New York police force?"

Happy Madden nodded. "Sure you did, Boss. He ain't no ordinary flatfoot, either. He's—"

"Skip it. How'd you like to do me a favor, and to keep your mouth shut about it?"

"You call it."

EDDIE handed him a slip of paper. "That's the serial number of a gun," he explained. "Maybe it's a New York gun and maybe it isn't. If it is, I want to get whatever dope they have on it. You know, where it came from and who it belongs to."

Happy took the paper. "Can do," he grunted. "Easy."

"Can keep mum, too?"

"Can't you put a little mark on there or something so I can remember which end the luggage goes in?"

REAMER KELLER

"Like a clam."

"Then you're set. We're moving in to New York day after tomorrow. As soon as you get settled, start finding out."

Mr. Madden made a semicircular gesture in front of his battered countenance. "I gotcha, Boss. Time my brother gets through lookin' up this number, you'll know the gun's middle name."

Eddie thanked him and walked into an adjoining room where a solicitous Feets Johnson was waiting for him.

"You done pos'poned yo' rubdown again, Mistuh Eddie," reproved Feets. "'Tain't right."

"I had business."

"Yeah—you been havin' plenty business recent, Mistuh Eddie . . . but they ain't enough of it fightin' business."

Eddie doffed his clothes and stretched out on the rubbing table. "Maybe I ought to get mad at that, Feets—but I can't . . . quite."

"Hmph! 'Tain't no matter does you git mad or not. You been cuttin' up, Mistuh Eddie, an' somebody ought to had tell you about it."

"They have been . . . if you know who I mean."

"Yeah, I know. Trouble with you is you don't pay enough mind to Miss Patricia. She's a smart lady, Mistuh Eddie."

"Maybe."

"'Tain't no maybe 'bout it. Lookit what she done fo' you: Got you fightin' fo' the world's champeenship. Matchin' you up swiff an' easy. Ain't that what she done?"

Eddie's thoughts flashed to Max Ellison, whose co-operation had made the break-in possible. "She's done all right," he conceded. "But there are certain things you don't understand."

"'Tain't me that don't understan'." Feets' ministrations became more violent than he realized. "It's you, Mistuh Eddie. Honest, I never seen no man with so much brain an' so lil sense. If you knowed which side yo' bread was buttered on—"

"I probably wouldn't eat it." Eddie refused to let Feets disturb him. He said, "Did you know that Mr. Ellison is still trying to buy my contract?"

"Co'se I knowed it. But shuh! he ain't no good manager like Miss Patricia is. An' anyway, how come him to want it now? Fust off it was 'cause iffen he was handlin' bofe you an' Mistuh Grogan—he could keep you fum fightin' under the law. But now . . ."

"He figures me to win, and he'd like to be handling the champion."

"Well, Miss Patricia would like to handle you better. So she was right to say she wouldn't let you go."

"You're partisan, Feets."

"That ain't so, Mistuh Eddie. Ise an honest, decent man, an' you know it."

"I apologize." Eddie turned over on the table and pillowed his head on his arms. "You been having a bit of trouble yourself, haven't you, Feets?"

Mr. Johnson grimaced with distaste. "Ise gittin' awful fed up with the female gender," he confided. "Seems like they don't never want nothin' essept what they ain't got."

"Doesn't that go for you, too?"

"It wouldn't if I was rid of Magenta. That 'ooman . . ."

"Does she know about Marvel?"

MR. JOHNSON emitted a long, low, unhappy whistle: "Mistuh Eddie, she knows plenty—an' what she don't know, she makes up. Ise glad Miss Geech departed away fum this vicinity on account else they might have been an embarrassin' situation."

"What do you mean: Embarrassing?"

"I mean Magenta was threatenin' to commit mortality on Miss Geech." Feets shook his head and veered away from the subject. "Look, Mistuh Eddie—there ain't on'y a few days lef' befo' you fight Mistuh Grogan. How come you cain't git relaxed 'twix now an' then?"

"I'm relaxed."

"No, you ain't. You is skittish as a young colt when he's fust turned loose in a clover field. All the time fightin' with Miss Patricia; all the time gittin' grouchy . . . what it's doin' to you, Mistuh Eddie, ain't no good."

Eddie turned over and sat up. "I've been in better shape," he confessed. "But I'm still all right."

"I sho Lawd hope so. You is the best middleweight that ever was . . . but this Mistuh Grogan, he ain't no bum. Pop always used to say that a champeen had somethin' extra special, an' that when the goin' got bad, you'd find out plenty quick what it was that made him champeen. Well, tha's what Ise skeered of, Mistuh Eddie. You sort of got the idea that this is just another fight. You ain't trained right. You don't seem to give no hoots fo' nothin'."

"Maybe I don't."

"Tha's foolishment, Mistuh Eddie. Ev'ybody wants to be the best in the world at somethin'. Heah you is gittin' yo' one big chance, an' you're doin' yo'-se'f wrong. 'Tain't yo' muscles Ise worried about—it's up heah . . ." and Feets tapped his forehead. "You ain't got the correck psych—psych—what you call the way you is thinkin'. Tha's the thing you ain't got."

Eddie started to dress. Underwear, sneakers, soft flannel shirt and slacks. He ran a comb through his hair and

turned away from the mirror. "Maybe you've got something, Feets," he said at length. "I'll think it over."

He walked out of the house. Evening was at hand, and the camp was rich with the gold and purple of the setting sun. It was quiet and tranquil and soothing, and the coolness of the September night was settling about the woodland.

Eddie walked toward the river. He wanted to be alone; he wanted to think —undisturbed.

ORIGINALLY the placards stated that the event would be held Thursday. But early that morning billposters, and employees of ticket agencies, pasted red-lettered strips across the word, "Thursday," so that it read "TONIGHT."

Thursday morning's newspapers blazoned the tidings:

DIXIE GROGAN DEFENDS TITLE TONIGHT

Eddie Gordon Favored to Win Bout at Yankee Stadium

There were numerous photographs of Eddie and of Dixie Grogan; there were physical comparison tables which supplied the interested public with all essential details: age, height, weight, reach, chest (normal), chest (expanded), biceps, thighs. . . . There were prophecies, and analyses of records; there was a calm assurance that if the weather happened to be clear (which the forecaster promised) the Stadium would be jammed.

There were many mentions of Pat Mallory, and a couple of pictures of her culled from the files and reprinted.

But on this particular morning, Miss Mallory was having a very difficult time. The sun streamed into her apartment and marked out the lines of concentration in her face. She reached for another slip of note paper and made a fresh start:

"Dear Eddie:

"Tonight you are fighting for the championship of the world. Tonight is your big chance . . ."

Pat quit writing and gazed with distaste at the flat, colorless words on the paper before her. With a quick, nervous gesture, she crumpled the sheet into a tiny ball and tossed it into a wastebasket which was already more than half full of similar false starts.

There was so much she wanted to say that words seemed inadequate. He was going to need all the help she could give him, all the help anyone could give. The chips were down now—he was either in proper shape or he wasn't; what happened was in the laps of the gods and in Eddie's two hard fists . . . and in his mind and heart.

Her mind probed into the immediate future. She was thinking, "This time tomorrow morning I'll know the answer. So many things might happen. . . ."

She was afraid of Dixie Grogan. He didn't have the essentials of greatness that Eddie definitely had; but he was clever, shrewd, courageous and a hard hitter. He had more experience than Eddie. He knew all the tricks. He was a calm, methodical fighter who was at his best when the going got toughest. He was better and smarter than any other man Eddie had ever fought.

Eddie was going to need everything Pop had taught him, everything he'd learned from the other boys he had fought. He needed to be keen and alert, needed to carry into the ring with him a degree of concentration and determination exceeding any he'd ever needed before.

The buzzer sounded. Pat put down her pen and crossed the room, a slim, attractive girl in figured house coat and toeless mules.

She opened the door and arched her eyebrows in surprise.

Pat said mechanically, "Come in . . ." and stood back as Babs Ellison walked into the room. The very young, very wise, very spoiled daughter of Max Ellison seemed utterly sure of herself. She walked to the middle of the room, turned, smiled, and said in a voice that was rather pleasant, "Shall we shake?"

Pat controlled her bewilderment with an effort. She said, as matter-of-factly as she could, "Of course we shall."

Babs dropped her gay red-and-white bag on the sofa, selected a cigarette from the humidor, lighted it and inhaled gratefully. "Surprised, aren't you?" she asked.

"That's natural, isn't it?"

"Sure." Babs' wise young eyes were amused. "Why should we fight, anyway? Up at the training camp you went nuts and I got sore. I'm not popular with you, and maybe that goes double —but there's no sense acting like a couple of kids."

She looked around the compact little apartment and nodded with approval. "Cozy," she commented calmly. "Neat, rather than gaudy." And then, in the same tone, "How's Eddie?"

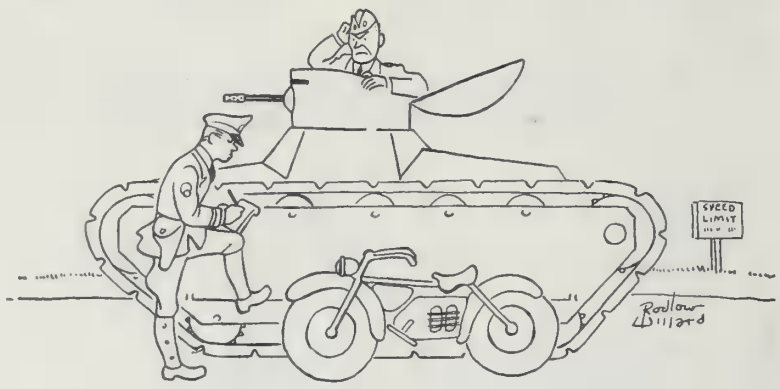
Pat met the young eyes levelly. She didn't know what this was all about, and she was waiting. She said, "Eddie's all right."

An impish grin appeared on the lips of Babs Ellison. "I expected you to say, 'Don't you know?' "

"That would have been pretty obvious."

"I've seen you that way. But we'll skip it. I suppose you're wondering what brought me here. And no matter what you might guess—you'd be wrong. My real reason is screwier than anything you could think up."

Pat smiled in spite of herself. There was something frank and honest and likable about this amazing child. "I'm listening," she said.



Babs said, "Eddie is due to cop the title tonight. We think it calls for a celebration."

"Who do you mean: We?"

"Joe Barton and I. It was his idea, really. He wants to fling a party at the Penguin Club right after the fight. You and Eddie and Joe and me. And Cliff Halliday, of course."

"Why 'Of course?' "

"Maybe Joe doped it out that you and Cliff would be lost without each other. He's never been right yet."

Pat said hesitantly, "It's a nice i tation, Miss Ellison—"

"Oh, for the luvva Pete—be your My name is Babs, and it isn't a invitation.' "

Pat laughed. "That's my story an stick to it. What I'm wonderin whether you haven't left something said."

The younger girl looked straight the eyes of the older one. "Still loo for the low blow, aren't you? Y figuring that maybe I'm building beautiful slap in the face for you. Y thinking that maybe Eddie and I n have something to announce, and t wanted to watch you take it on the Come clean: Weren't you thin something like that?"

"Perhaps . . ."

"Of course you were. Well, I' honest, too. I'd like it to be that I'm goofy about Eddie. But that how things are. Not yet." She s her head. "I'm still trying, though

PAT was thinking fast. There something so disarming about girl; something so grotesquely and i guingly unashamed. Pat said, "I give you a definite Yes or No."

"Why not?"

"It depends on Eddie. He a haven't been hitting it off so well that little episode up at camp."

"Forget it." Babs' voice was i tient. "Eddie's maybe trained dow fine. They tell me that's good. Let get through with Dixie Grogan and be in the mood to step high, wide handsome."

"I hope so." Pat was speaking ge "If it works out that way—and wants me—I'll string along."

"Why not make it definite?"

Pat shook her head. "No can she said lightly. "There's someth must attend to first."

They chatted briefly and then departed. For a long time after sh gone, Pat sat staring at the opp wall, trying to fit the pieces of th saw puzzle.

She dressed and went out. She to the west side hotel where Eddi taken a suite of parlor, bedroom bath. There was a definite absen warmth in the greeting he gave he his manner remained indifferent.

She finally said, "I came over t you something, Eddie . . ." and sh him of Babs' visit. "And that's th she put it, Eddie," Pat finished. "S asking you: Do I go or not?"

(To be continued next week)

Down with Shoulders

Continued from page 32

dress that will be good next season as well as this. More emphasis on quality. Your accessories and the perfection of your ensembling will count for more. This doesn't mean strictly classical clothes. But now that American-made clothes are to the fore, it does mean that the American way of selecting and wearing clothes will dominate the fashion scene. That means comfort—clothes easy to get into and easy to shed with the pull of a zipper.

The most talked about color is beige and that old favorite, Shantung, is due for a comeback.

You'll dress not only to suit your life and climate, but yourself. If the long torso line isn't becoming to your figure, the bloused one is pretty certain to be. Two-piece dresses give you a wide choice; you'll find a proportion of top to skirt that hits you in the right spots. If you've developed a bewitching pompadour, wear a pompadour hat on the back of your head to show it off; youngest is the felt derby. But if the forward-pitched hat is more suited to your beauty, there are plenty of them in the picture, too. They've lost their silly, doll-hat look and now fit the back of your head in a way that is infinitely more becoming and more practical. If you keep your hair perfectly groomed, be sure your hat shows it off. If it's difficult keeping your hair within bounds try one of the new turbans that will cover it entirely, even your ears, making you more sleek and trim than ever.

Now for the basic wardrobe which is fashion's theme song for 1941. Carefully selected, it carries over from season to season and breaks down those sharp distinctions between winter and spring. Then you have clothes that look well in any season of the year. A help when you travel from climate to climate. A boon when spring is delayed and you need the warmth of your heavy coat but hate its wintery look. Think of these things:

Your coat. Consider the boxy great-coats that can be worn over a suit.

If the color of your coat is an off shade, your ensembling problems can be more than half solved by ordering a half yard of the material for a matching hat. (Often your store can get it from the manufacturer. It's worth trying.)

Nothing will give you more return for your money than a collarless wool suit, to wear now under your fur coat or top-coat. It can be crisp and sporty with a shirt, extra warm with a sweater, and charming for evening with a chiffon or satin blouse and a few fresh flowers. Pick the color and fabric with spring *and* early fall in the back of your head, and the suit can carry you round the calendar. The skirt will be straighter-hanging, perhaps pleated, and the jacket a little longer than last year's.

With these simple clothes, accessories will count enormously. Pick shoes and bags of the same simplicity. Pumps are back as fashion favorites. Bags are bigger than ever and softer, fitted c hold your paraphernalia in neat But heft the bag of your choice fi make sure it isn't too heavy for a toting. Buy the best quality yo afford; your bag is a conspicuou important part of your costume. I and string bags are your best b ensembling different outfits.

Gloves are another important sory item that can make or break costume.

Try placing your very best je pin on your hat instead of your Or, for your only jewelry, wear mous colored stones as earring match them with even bigger sto the cuff links of your shirt sleeves.

There you have the fashion p for 1941. Wearable clothes, well in America, with your own indi stamp. For no matter who desig makes her clothes, the American w decides what she will wear. She's America's fashion dictator.

Our Designs on Martinique

Continued from page 15

riend. A warship at anchor in times of eace is a ship at rest. It retains its ride. In wartime it is an eager thing, adying for a fight. In defeat, an nchored warship with guns for which here is very little ammunition in the agazines is a sad thing. The Bearn nd the Bertin lay motionless on a otionless blue sea, blue as the Medi-rranean, so blue it defied the refuse 53,000 people.

On the docks, men sat and idled in e sun. The docks were littered with bbish, but there were no sacks of flour, barrels of gasoline, oil, paint. No cks of cement, no piles of lumber, none the paraphernalia of commerce. None the goods and the movement and the ises and the machinery that make a rt a vital part of people's lives. The achinery of the port was dead too.

In the grocery stores, there were pty boxes of macaroni and soap in e windows, and a flyspecked assort-nt of useless packaged goods in sun-ded containers that only foreigners or rists would require. There were no lging bags of rice inside, or of chick-as and beans. Bottles of old wines re on the shelves, but who wants wine the tropics? Most important of all, ere was no codfish. Salt fish is the ple of native diet. It's been so since ve days.

The Consul Isn't Talking

You drop in on the American consul, all, quiet gentleman from Texas. His me is V. H. Blocker. The "V" is for kler, which is an unusual name for st name, and you ask him about it and blushes and says, well, just call me k. In the consul's office you also et Commander Ernest Blankenship, o become Buck practically at once. was yanked from a peaceful almond ch in California and he talks with, we ught, a certain nostalgia for Paso bles. Get that in about Paso Robles ewhere in your story, he says.

Commander," we said, "while I was king at the harbor, I saw what looked me like an American flying boat, a Y-1 or maybe a PBY-3, drop down d then a boat went out to it and stand-g in the stern of the motorboat was u with a brief case under your arm."

he commander said something like k, Tsk, Tsk" and shook his head and oked at that guy from Texas and their es were as blank as though they had t filled inside straights. The daily rol boat taking reports from Marti-ue is a secret known to about 500,000 ple. We talked of other things.

here was, for instance, malaria on the island. The marshes were aboil with it. The town of Fort-de-France teemed with typhoid and the dobie itch. Try to cure dobie itch! Only white people try. Five hundred lepers were "con-fined"—that was the official word for it —to the hutches they call houses in Fort-de-France. There are at least 1,000 on the island, perhaps 1,500. And there are only 250,000 people on the whole island. There is no leprosarium and Frenchmen who rule the island admit leprosy is a "problem." There have been appropria-tions by the French Chamber of Deputies in Paris for a leprosarium, but these, like those for roads and other im-provements, vanished in graft, imported mistresses, cigarette smoke and rum.

Rum is the great prophylactic of the tropics and the indispensable anesthetic against the boredom of an inbred island, a cure for the abysmal weariness of sun and rain, heat and sweat. Rum makes the men forget why they came to the island, or why they married half-castes, why their children are sometimes black and sometimes the color of tea with milk. Women forget about en-larged pores, about the fidelity of hus-bands. They grow fat and either their bodies lump and sag or they become skeletal and they dream of France and know they'll never go back. All the women, with few exceptions, look like the rain-whipped palms.

Syphilis, in Martinique, is a house-hold word. Amoebic dysentery is known as a "congestion" of the intestines. Sooner or later it gets them all. Even the blacks boil their water and the whites and near-whites drink bottled water out of unsterile bottles.

Since ships stopped coming to Fort-de-France—in a normal year an aver-age of 600 came to take away the rum, sugar, molasses and bananas and leave flour, codfish, perfumes, meat, winter vegetables, clothing and medicines—the island has suffered. There have not been a dozen ships in the harbor since June 13.

The other day an American tanker arrived with a few tons of gasoline and another Yankee freighter with 8,220 sacks of flour. If the bakers don't argue too long and the flour doesn't rot in the sheds while they discuss who should get how much of it, Martinique's quarter-million people will eat for the next month. The arrival of the ships was an event.

Until some ether was obtained from a transient tramp steamer's lockers, there was none in the hospital for operations. There still is no catgut for sutures. The hospital needs cotton, bandages, every variety of medicine. It has about two years' supply of antimalarial serum, but none for typhoid. An epidemic would wipe out Martinique unless the typhoid serum arrived in time.

The sugar mills need machinery, parts for machinery, and coal to run the ma-chinery that's to grind the year's crop. They start cutting cane January 15. More than 30,000 cutters will swing the machetes—if the coal arrives to feed the locomotives that lug the cane cars from the fields to the factory and to feed the old steam engines of the mill, flat-bed single-cylinder affairs that went out with Dardanella.

Eggs are Important

There isn't a pair of shoes to be bought in all Martinique. The Czech, Bata, sold out long ago. Oh, there are a few pairs for the ladies who live in the bougainvillaea-shaded mansions on Di-dier Hill, 500 feet above the fevers and stinks of Fort-de-France. But none for the men and women who work in the city. A shoe is a sign of caste. It distin-guishes the European of island birth from the native.

An egg costs a franc, in Martinique. A franc is only about two and a half cents, but it's a lot of money when a worker earns 20 francs, less than half a dollar a day. Eggs would be cheap if the hens laid properly. They don't be-cause the feed that used to come from the States via France stopped coming. Eggs became scarce. Poultry that sur-vived the mongoose that infests the island has died of starvation or has be-come diseased. Arrival of a supply of "Lay or Bust" from the States called for a village celebration in the hills. The blacks and the tans all got sozzled on rum and danced the beguine by firelight. The beguine began in Martinique, by the way, and not in Tin Pan Alley.

Back in the hotel a tall, handsome

There's One in Every Neighborhood!

1. ONE DAY Marge and I are having ourselves a cozy little gossip when up strolls this neighbor we call "Mrs. Trouble." You know the kind that is full of conversation—but only about *herself*, and usually about her *ailments?* Well, today it was the irregularities of her intestinal tract.

2. AFTER SHE HAD GONE, Marge, the imp, sparks an idea. "These eternal sympathy-seekers!" she says. "Most of them just don't *eat* right. I'll bet a little *'bulk'* of the right kind in her diet would take the *blues* out of her conversation. Let's be her fairy god-mothers and send her a letter and a package of KELLOGG'S ALL-BRAN."

3. "'MADAME,' WE'LL SAY, 'why *endure* your constipation first, and then try to *"cure"* it with purgatives? Better to get at the *cause*—and *pre-vent* it! If it's the common kind that's due to lack of "bulk," ALL-BRAN should do the trick. Eat it regularly and drink plenty of water.' "

4. I FORGOT ABOUT IT, until one day when Marge and I were together, in waltzes our "Mrs. Trouble" as chipper as a robin on a May morning. "A friend of mine told me," she says to Marge, "that it's to you I'm indebted for a wonderful favor. I've knitted you a little sweater to celebrate my joining the ALL-BRAN 'regulars.' "

OPEN HOUSE

Collier's "House of Ideas" is now a reality! On one of the terraces of Radio Center the house you have read about in Collier's has been built. It's two stories high, beautifully landscaped, and completely furnished down to the last monogrammed sheet.

You are cordially invited to visit this "House of Ideas" at Rockefeller Home Center any day except Sunday, between 10 a.m. and 6 p.m.

For a complete illustrated booklet on the house, send 10 cents to:
Mr. E. K. Simpson
"Collier's House of Ideas"
Rockefeller Home Center
630 Fifth Avenue
New York City

Negro with a sculptured mustache was waiting for us. He had the manners and speech of a Louis XIV flunky at Versailles in the French era of wonderful idiocy just before Madame la Guillotine got busy. He, too, had gold teeth, but Gold Teeth, new ones.

The name sounded like that of the Monsieur So and So whom Coffee-Cream mentioned on the dock earlier. Gold Teeth said he was a journalist. This turned out to be as reliable as most of his information. He was a baker's second assistant bread-shoveler. But he had been to Paris, on a scholarship, and he used polysyllabic words. After three rums, he was a cinch. Ninety-five per cent (not 90) of the island's population was ready to become American. No matter that Martinique, of all the islands of the Caribbean, never changed hands in the ebb and flood of imperial fortunes in the New World and remained French for 315 years.

This pro-Americanism could easily be proved, continued Gold Teeth, with a plebiscite. He overlooked the matter of convincing the French administrators of the island, tough sailormen like Admiral Henri Robert, newly appointed West Indies high commissioner, that a plebiscite would be advisable. In fact, that goat-bearded little admiral might object with the help of from 4,000 to 5,000 soldiers he could muster and equip from the crews of his ships and the garrisons of the forts. Gold Teeth merely waved his handsome size-18 hands.

Gold Teeth Has the Answers

We saw a good deal of Gold Teeth after that. Practically every day, in fact. Pretty soon we began to suspect that he was an agent provocateur of the admiral's. The admiral scotched this by sending one of his agents in uniform down to the dock to see us off a few days later and to inquire if we had talked with Gold Teeth and what did we think of him and so we looked very blank.

Not having time to make a house-to-house canvas of the huts in the jungle and the huts in the cities and towns of Fort-de-France, St. Pierre and Lorrain to ascertain exactly how the descendants of slaves felt about becoming Americans, we listened to Gold Teeth and four or five others of his "party." Before we left we found the answer to Gold Teeth's attempts to proselytize American reporters.

He and his gang want America to take Martinique so that the island shall be "freed." Then Gold Teeth and his pals would become big shots. Martinique as an independent state couldn't survive a month. It would die of starvation. It could not sell, as it does now, its $2,250,000 worth of sugar every year to France at four times the crop's true market value. France pays premium prices for sugar as part of a huge subsidy for the colony.

After 40 years the United States hasn't been able to Americanize Puerto Rico. That island's still belligerently Spanish. Martinique would be French for another 300 years. Gold Teeth, to measure his intelligence and, therefore, the accuracy of the song and sizzle he hands every correspondent silly enough to listen to him, said he could make Martinique American in five years.

The Creoles want Martinique to become American, but in a special kind of way. The Creoles are all businessmen, merchants, big farmers, importers and exporters. They want to retain their French nationality and trade with France, whose economy is geared with that of her colonies. But they want American soldiers, sailors and fliers, and American military and naval protection. They want Martinique and they want to sell it too. Now don't be hasty and say, "How French!" That's more Creole. The Creoles are thinking in terms of profits and of the money which America would have to pour into Martinique to make it livable and to convert it into the Gibraltar of the Lesser Antilles, which it very definitely is not at the moment. But Creoles want the Tricolor, not the Stars and Stripes.

The big planters, like the bearded little lord of Usine Laureinty, largest of the sugar plantations and rum mills, would like American intervention too. As this man expressed it, Martinique may die on a pile of her own sugar this next year. What if France can't take the rum and molasses of the island this year despite her promises to do so? Britain may declare the rum and molasses, the base for the extraction of alcohol needed in turn for the manufacture of carburants, to be war materials. Big planters don't care. American intervention would include them in some kind of sugar-quota system. The American taste for Martinique rum could be developed. The little planters would be absorbed, killed off. Instead of receiving worthless paper francs the big planters would receive American dollar bills. The big planters frankly don't give a rap whether they are French or American or English. Not German, however. They don't want Germany. That means paper money and barter.

For all of the islanders—those who can read and write and do, which would be about 100,000 out of the island's 250,000—it is safe to say that they would rather be American than German. It is equally safe to say that if the Nazis should prove so dumb as to send any mission to Martinique, that mission would be murdered. They hate Germans on Martinique. And they don't like Italians, either. And they don't like the English, what with Dakar and Oran and one thing and another. But Americans—why, everybody loves Americans.

The other 150,000 islanders, a cough-racked, skinny lot who know only life and death and sweat and toil when they can get it and calalu when they can stew it with codfish and breadfruit—really don't know whether they'd like to be anything but Martiniquiens. Their world is an island, and so it has been for 315 years, and they breed among themselves and only the scourges that kill the infants keeps the islanders from spilling off into the sea.

The men to contend with on the island are not these, nor their half-white masters, but its new rulers—the officers and men of the Emile Bertin and the Bearn. These number at the very outside about 1,200, probably less. These are the tragic men of the island, lost Frenchmen who've fought Germany at least once, often twice and whose fathers fought Germany before them and knew the humiliation of Bismarck's peace.

No Time for False Moves

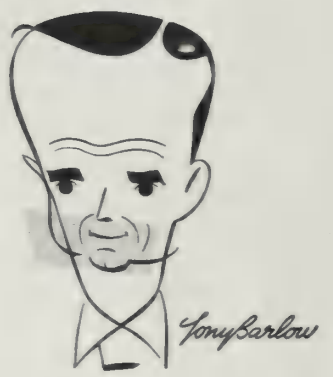
To understand them through their own lies and propaganda and censorship is a difficult thing. It is only when you come to know that their untruths and propaganda and taboos are a defense mechanism that their tragic position becomes clear. They are men with the thong of an armistice around their necks. One false move on their part and the thong is tightened and France the France that is choking but, miraculously, still breathes, will suffocate.

They can't come out and say they hate Germans and will fight them again if given a chance. But take the men of the Bertin, or the Bearn. They are all Bretons, long-armed men from Brittany, farmers and fishermen and sailors. They have families in Brittany, wives, mothers, sisters, all manner of kin from whom they haven't heard a word since the occupation began. Can these love the Germans?

To keep them from going crazy with worry over their families and with shame in defeat, they've been turned loose on the soil of Martinique and near-by Guadeloupe. They slog around in the mud tending onions, spinach, corn and radishes and a couple of cows. Their arms are corded and they are reasonably happy with sweat. They wear the wooden shoes of Brittany.

When Commandant Robert Batt read from the quarterdeck of the Bert the orders informing his men that France had fallen, his sailors wept. Their ship had been hit by a 2,000-pound German bomb at Namsos. They don't like Germans. Commandant Albert and his men on the Bearn are Bretons, too. To say that any of these men are pro-German because as soldiers they must obey the orders of Vichy is libel on their honor as men and Frenchmen.

Any German attempt to seize Martinique would be a violation of the armistice. The French on Martinique would be within their rights to fight. But would they? We asked a high officer of the Bertin. His reply:



"We would fight to the last man and the last gun. We would be exquisitely right in doing so. It would be our sacred duty to fight. But we would need help to defend the island if the German came in great force—an eventuality we do not foresee except as a hypothesis."

By needing help he meant that the ship and the Bearn are disarmed. The disarmament of a warship under the armistice does not mean the removal of guns. It means only that the crew is reduced to the minimum required to maintain the ship, keep it from deteriorating. The crew has been reduced to somewhere between 250 to 400 on the Bearn, which has a normal complement of about 800. The Bertin's normal complement of 700 to 800 men and officers is, as far as we could make out, intact. The demobilized sailors of the Bearn have been sent home.

Disarmament also means that all but a small fraction of the ship's ammu

f cruisers. The six-inch guns of
at St. Louis and Desaix are so
officers of the Bertin decided to
mount the better four-inch guns taken from the "auxiliary cruisers."

There are on the island, according to some amateur military experts movable batteries of eight-inch guns. There's only one road along which they could possibly be moved. It runs from Fort-de-France to St. Pierre. The other day a storm washed it out. That's how good it is. The other roads are narrow, twisting, winding affairs that are roads only in name.

There's only one menace on Martinique. It's that gold the Bertin loaded at Brest and carried to New York, via Halifax, to buy armaments for the defense of France. There's $368,400,000 worth of it stowed away in Fort Desaix. It might leak out. France might suddenly decide to give it to, say, Germany to propagandize in South America or secretly buy needed war materials. This might, conceivably, happen.

American warships patrol the seas outside Martinique's harbor day and night. Flying boats check the smallest fishing boat that goes in and out, ascertain its destination. Consuls at strategic points ascertain their cargoes. The gold might slip through, but it's about a 1,000 to 1 bet that it won't.

A destroyer lies gray and comforting on the horizon and with an ordinary glass you can read her silhouette clearly, see the four funnels. She's there at night, too, two points of yellow light on the black slab of the sky. We called her "Our Guardian Angel."

No, as a menace Martinique is highly overrated. One move by Germany to seize it and the island's ours. The Havana conventions of last July provide for that. We can occupy it any time it's a threat to our security. And the Monroe Doctrine enables us to grab Martinique with any attempt to change the sovereignty of the island. Martinique a menace? No—but she has a swell harbor. And that we ought to have it is a different story.

Over Night

I be up on the North Shore."
Good We'll have to get together."
I love to."

"You certainly don't seem like a Boston girl," he said. "I guess it's the New York influence. You're pretty smooth, all right."

She laughed, and did not know just what to say.

Quite suddenly he turned and put his arms around her and kissed her. She was surprised and then she was happy. He kissed her a long time and she clung to him.

"Darling," he said.

"Darling." This was overwhelming and she could not think at all. This was wonderful and unexpected and somehow what she wanted. What she had wanted for a long time. It was so terribly strange how he suited her need that she had not understood herself.

They stood for a long time on the open deck in each other's arms, kissing. She moved her hand across his smooth hair she knew was so dark, and felt, with her fingers, his features that were dark too. He was so strong and eager and the way he kissed her was so wonderful and unknown and demanding. This was the thing she hadn't ever had. She had never felt like this with Curly, nice Curly with whom she had fun like children. This was the thing she had felt that she had missed. But it was so wonderful that it should come to her at once.

It was a long time that they stood together, swaying slightly, in the shadow of the lifeboats; with the boat plowing steadily through the black whispering water, the boatful of people underneath them, but, where they were, a great dark

1. **DAISY** needs a laxative. But she's going to see a man about a job at 10—so she puts off taking anything, scared to risk possible embarrassment, scared to do anything that might interfere with a successful interview.

2. **MAISIE** needs a laxative. She's got a job interview scheduled for 10 o'clock, too—BUT Maisie says to herself—"Never put off till tonight the laxative you should take this morning"—and she knows that Sal Hepatica's speedy.

3. **DAISY—SUFFERING** from the heaviness and headache that often go with constipation—makes no impression on the man she hoped would be her future boss.

4. **MAISIE IS HER VERY BEST SELF** . . . Sal Hepatica worked fast, brought such gentle relief. She gets the job and as they shake on it she silently thanks Sal Hepatica.

Whenever you need a laxative —take *speedy* Sal Hepatica

WHEN SIGNS of constipation announce that you need a laxative, don't delay: take speedy Sal Hepatica. It usually acts within an hour. Acts without discomfort or griping; acts gently by attracting water to the intestinal tract.

Sal Hepatica—keep in mind—is more than a laxative. It is decidedly helpful in

counteracting excess gastric acidity. Helps turn a sour stomach sweet again.

No wonder 3 out of 5 physicians recently interviewed recommend Sal Hepatica. Try it, the very next time you need a laxative!

SAL HEPATICA

"TIME TO SMILE!" Tune in on EDDIE CANTOR—Wednesdays at 9 P. M., E. S. T.

peace and the smell of salt and the sight of the stars.

"I guess I have to go to bed," she said. "It must be late." She hoped he would ask her to stay up on deck with him longer; they could stand here and watch the stars wane. She was anything but tired; she felt fresh and exalted and beyond thought. But he didn't.

"I'll see you to your room," he said instead.

All the crowds had disappeared and the decks were empty as they walked down the stairways and the corridors hand in hand. It was as if there was nobody on the boat but themselves, Jan thought; as if it were a ship in a dream, being propelled through dark waters for them, under eternal stars; a magic boat, belonging to them.

When they came to her door she stopped. Henry put his arms around her and kissed her slowly, on her mouth and on her eyes. She opened her door and switched on the light inside. He stood leaning against the side of the door, looking at her. His eyes were extraordinary; long and dark and strange in his dark face. She put a hand on each side of his face and reached up to kiss him; he looked foreign, like an East Indian perhaps, looking down into her face before her smooth mouth touched his.

"Let me come in," he said, talking into her hair.

"I don't believe I'd better," she said, moving away and looking at him earnestly. "I mean it's terribly late and we'd wake Funny-face, maybe, and Nana, right in the next stateroom, with our talking."

He looked at her.

"Okay," he said. "You know best."

INSIDE her stateroom alone she stood still in the middle of the room, feeling breathless and bewildered. The cool salty air blew in through her open porthole. Suddenly she drew a long breath of the air and threw out her arms and jumped on her berth; she hugged her shoulders with her hands and grinned hard with the joy she felt. Henry was so wonderful. She was terribly happy. She jumped up off the berth and undressed, throwing her clothes around the room, and dropped back into the berth, hugging the pillow, picturing to herself Henry's tanned face and his dark almond eyes.

Everything about him, everything about being with him, was so different from anything she had ever known. Entirely different from the old, old days before she was married, and the way she had felt about kissing then. And different from anything she had ever felt with Curly. It was all wonderful and miraculous. Oh, this was what she had wanted obscurely, not knowing its name. This was where she belonged. She felt so right, not awkward or too young, not merely gay and friendly, but uplifted. Perhaps she was falling in love. She felt about Henry that he was what she had been wanting, that for him she was ready, all ready. She was ready to fall really in love with him. At last she was not doing something before its time; she was not unprepared. It was so strange that it should have come to her at once, like this, at the very beginning of her new life.

She had caught step again after being out of it so long. She was living in key with what she felt inside. It was like the expression "act your age." She was acting her age.

She dropped slowly off to sleep with great, beautiful anticipations filling her mind. There was the whole beautiful blue summer ahead. The whole beautiful white winter. Freedom, and this happiness of being in tune. There was Henry. He would come for week ends at the family's on the North Shore, and they would dance, and sail, and dance some more, and kiss in the moonlight of other nights.

The knocking woke her out of her sleep. She was confused and could not think where she was, what the noise was. . . . She was on a boat, she could hear the water sweeping by outside. . . . It was knocking she heard. Half asleep she jumped up and opened the door in her nightgown.

Henry stood outside leaning against the wall close to the door.

"Weren't you waiting for me, darling?" he said, reaching out for her and coming in through the door part way. He grasped her very close and began to kiss her.

She struggled away and tried to get her eyes open, to think straight.

"Go away, please," she said, as calmly as she could. "I don't want you here. Go away." She wrenched open the door and pushed him part way out.

He stood still, looking at her with his long eyes. Then, without a word, he turned and walked away down the long empty corridor with its dim night lights.

She slept a little, after a while, and when she woke up it was morning and the water outside her porthole was bright blue and sparkling, and sunshine came through and lay in dancing patches on the floor.

"Your busy season?" TONY BARLOW

For a minute she could not think why with all the freshness of the morning she felt so wretched. Then suddenly she was obsessed with the urge to see Henry and explain to him. To tell him what she really felt and what she meant. To explain to him how wrong he had been, but that she was crazy about him, only differently, he didn't understand. She felt hot under her skin when she thought of what he had wanted, but the other memory, the stars last night up on deck and the cool, smooth feeling of Henry's cheek were just as important, and if she could explain to him perhaps it would still be all right.

She began to dress in a hurry. There was a knock at her door and Nana came in. She did not have Funny-face with her. She looked about the stateroom stiffly, as if there was something the matter with it.

"Charlie and I have had our breakfast, madam," she said. "I hardly slept a wink all night. I couldn't feel any confidence in this boat with all the running and laughing. Goings-on," Nana said.

"Oh, it's all right. We'll be getting in in a few minutes," Jan said, looking at the stockings she put on. Nana was acting funny. Perhaps she had heard Henry last night. Perhaps she didn't understand either. And there wouldn't be any explaining to her.

"I was about to say, madam. I'll keep Charlie right here in our stateroom while you have your breakfast. It's a very rough crowd outside. All sorts of people. He might catch something. He can play with his own clean toys right here."

"All right," Jan said desperately. "I'll come back and get you in a few minutes."

NANA went away and Jan hurried down to the dining room. There were not very many people there. She looked around the large sunny place and saw Henry in a corner at a table, and went over to him. When he saw her he got up from his chair without saying anything. She sat down.

"Listen, I wanted to explain to you," she said.

"There's no need to explain," he said, and went on eating eggs. The waiter came and she ordered orange juice and coffee hurriedly.

"Listen," she said. "It's so awful you shouldn't understand. I didn't mean anything awful last night. I mean, it was wonderful, I thought. I don't go around kissing people. Only this was different. I didn't mean to make you think anything different from what it was. I just liked kissing you. I mean, I wasn't being a—tease, or anything. Honestly."

"Oh, yes?" he said. It was horrible, like some awful movie. She felt words struggling into her mouth and none of them were any help to her. She wished she knew how to express herself, to make it clear the way she was.

"Look," she said. "I'm not like that. I've never done things like that, ever. I'm—I'm not that kind of girl."

"'Not that kind of girl,'" he said, mimicking her. He seemed more cold than angry. "Listen, don't for heaven's sake get all the way back to that one."

"I'm not, I'm not," she cried. "If you'd just see . . ."

"Thank you for a very charming evening, anyway," he said. "There was nothing in the world wrong with the way you kissed me last night. It was keen. I'll be seeing you about Bean-to sure. Better luck next time. S wasn't your type." He put some down on the check that lay bes plate and got up. He bowed looking at her with those long dar and walked away.

She wanted more than anythi in the world to cry. But she c cry here. She swallowed dowr hot coffee and paid her check an up to her stateroom blindly. Sh in and stood still staring arou room. Then she went out again a Funny-face's room. Nana sat w hat on, on the edge of the berth. face was playing on the floor.

"You're all ready?" Jan said. as if she were bursting with sor inside. "We're in."

When someone's eyes are judging you can you be sure it's Safe to Smile?...

The Answer's on the tip of your tongue

Make the Tongue-Test...

Run the tip of your tongue over your teeth . . . inside and out. Feel that filmy coating? That's Materia Alba . . . and it doesn't belong on teeth! It collects stains, makes teeth dull, dingy-looking.

Your Tongue Tells You

Your tongue tells you what others see . . . the filmy coating that dims the natural brilliance of your teeth, your smile. And it's this filmy coating that makes teeth look dull . . . bars your way to romance.

Switch to Pepsodent *with* Irium

Know the joy of Teeth that feel bright to you ...look bright to others

Pepsodent will remove the filmy coating that clings to teeth . . . the coating your tongue can feel, your friends can see. Because only Pepsodent contains IRIUM . . . super-cleansing agent that loosens and flushes away sticky particles that cling to teeth.

Use Pepsodent regularly. Because Pepsodent also contains an exclusive, new high-polishing agent that safely buffs teeth to such a shiny smoothness, this filmy coating slides off before it can collect and stain.

Only Pepsodent gives you this wonder-working combination that makes your teeth feel so smooth, look so bright. Make sure of the loveliness of your smile. Get a tube of Pepsodent with IRIUM today.

States within time and population considerations that originally kept major-league interest in the northeast.

Imaginative sportsmen talk of transfer of weak or duplicating franchises, like the Browns or Phillies, to Los Angeles and San Francisco or Portland—"hot" towns in the sense of population, fan insanity and player sources. Harry Stuhldreher, ex-Four Horseman, made the point it would be less difficult for baseball clubs than for football teams, because the latter never postpone their frolics on account of bad weather; further, that habitual air travel for college teams would be welcomed by faculties since less time would be lost in travel.

Since the day Tunney flew from Stroudsburg to Philadelphia and thus gave Dempsey a psychological cuffing before he entered the ring, planes have carried many champs and nears. Tennis barnstormers, boxers, poloists. Most college football teams in the Middle, South and Far West fly once or more each season to intersectional games. At least one team, Texas Tech of Lubbock, flies to all its games. Famous basketball teams maintain far-flung schedules by plane, notably the Phillips Oilers of Oklahoma.

The Brooklyn Dodgers, as you might expect, were first (in 1939) to introduce extensive flying into professional baseball. They require two chartered ships for their 42 men—30 club members, 12 reporters. The players like it because they get an extra day's rest, also sleep tucked snugly in their little hotel beddy-byes and don't have to tip Pullman porters. The Green Bay Packers brought planes into professional football this autumn when they flew east for a match with the New York Giants. The great, big, strong laddies balked at first: they had never flown. Yet when bad weather caused grounding en route three men refused to budge from the p said they would await clearing we It may not be true, but it is fast b ing legend on the airways that the ardess finally coaxed them out peanuts.

THE BACK SEAT

frequently disappeared into the bush for days on end. It was necessary for the proper accomplishment of her field work that Katherine have the support of the elite, and she spent a hectic few weeks rushing back from her peasant friends and their dances to prim and disapproving teas in Port au Prince. Many a hostess was confirmed in her belief that Katherine was definitely "not nice" when she discovered "L'Americaine's" hair still sticky with the eggs and feathers of a voodoo ceremony.

Happily gathering interesting data on native dances and their origins, Katherine chose to ignore the glowering looks of the "better element" until she was warned that they were preparing to ask her to leave. Then she rented the biggest theater in Port au Prince and announced a concert. Drawn by rumor and gossip, the entire literate group of the island fought for seats, and some, expecting the worst, came armed with ripe fruit. They didn't use the fruit, for the performance Katherine gave wouldn't have offended a minister's maiden aunt's maiden aunt. Wearing a long tulle dress sprinkled with rosebuds, she minced politely through a bit of Debussy, a soporific Spanish number complete with castanets, and climaxed the evening with The Fire Dance, at the end of which she released a flock of doves into the audience. People cried "Lovely, lovely!" and "How artistic!" and Katherine was *persona grata* everywhere; a friend of the peasants and a guest member of the local arist

ea has died," Anton said slowly, h realized that he should have hat was why things seemed so and so quiet. "I am glad she does not know what has happened to our country because it would make her unhappy."

He spoke gravely, so that his words seemed to be carved out of feeling as solid as wood. They seemed more seen than heard.

"I am sorry," Roth said, and there were tears in his eyes. He felt suddenly lonely, orphaned for a second time. Aunt Mathea would have welcomed him as she had when he was a boy, and old Anton was definitely treating him like a visitor not quite to be trusted.

"Anton did not come home from Finland," his father said, and Roth knew better than to ask why he had gone there in the first place. He was glad he had missed that campaign.

"Anton was a good friend," Roth heard himself saying. His voice shook a little and he realized that he had looked forward to seeing Anton again.

THERE was a long silence before Roth asked almost diffidently, "And Margreta?"

A softness came into the old man's face, and Roth knew that Margreta, at least, was alive and well. He waited eagerly to know more, and felt his heart beating heavily under his trim, fitted uniform.

"Margreta is as always," her father said. "She is not unlike her mother." He said that as if he could think of no more perfect praise.

"And where?" Roth asked, getting up restlessly.

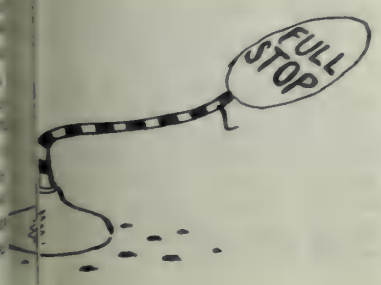
"She was working in Copenhagen," her father said. "For an exporter—Margreta always loved to have to do with the world, you remember. Now that she has no job she is helping Holger." He paused. "Co-operative work."

Roth felt that inward prickle of attention that warned him of danger.

"I'm going to find Margreta," he said, as the old man looked at him with grave dislike. Old Anton would not like his daughter to marry one of the enemy—Roth knew that was how an old-timer would regard him. Yet Roth could arrange things so that this one farm would be restored to prosperity, and the old man must know it.

Holger was talking to half a dozen men under a great tree and Margreta was folding and stuffing some sort of a circular into envelopes at a table near by. Roth saw people looking at one another, as they did whenever he joined a group. Their faces grew blank and their eyes hard. Holger looked Roth over from gold-braided cap to polished boots.

"A general has come to call," he said to Margreta, whose hands seemed to slow at their work for a moment and then she began to fold and stuff again. Then she sprang to her feet and came to welcome Roth. She held out her hands and he took them in his ruthless grasp, knowing that women must be hurt a little. She looked at her reddened fingers and Holger looked at them too.



"A great man and a strong," he said unpleasantly, and Roth stiffened.

"Yes," he said, "that's true. And let me say that I'll not be lenient even to those I have known before if they break the rules."

The group of men turned into statues until Holger's voice brought them to life again.

"What have poor farmers like us done to make you worry?" he asked. "We obey all the rules and only meet now and then to talk over poor crops and such country concerns."

As if at a signal the farmers got up,

Now You'll *Like* Yeast!

Mash a cake of Fleischmann's Fresh Yeast in a dry glass with a fork. Add ¼ glass of cool plain tomato juice . . . or milk . . . or water.

Stir till the yeast is completely blended. Fill glass with liquid . . . give it another stir, and . . .

Drink your yeast this easy, pleasant way. If you are one of the millions who know what Fleischmann's Yeast can do for you, but never stayed with it long enough to get its full benefit, you'll now find it easy to take this new, pleasant way. Remember, for daily use, Fleischmann's Fresh Yeast is one of the richest of all common foods in the amazing vitamin B complex. Drink it last thing at night . . . first thing in the morning.

nodded to Holger and began to leave.

Margreta said, "Don't forget the meeting tomorrow night." She unfolded the circular in her hand so Roth could see its innocence. "Danish farmers," it said. "Preserve your land! Meet at the Lunoe Farm, Thursday night, and learn new ways to eradicate all kinds of pests!"

Again Roth felt that prickling as he noticed that the big silo behind the barn had recently burned down to a pile of blackened embers.

Margreta spoke suddenly and smiled so that Roth felt a wave of warmth sweep over him. She slipped her hand through his arm and turned him away from the burned silo.

"Are you going to take me to dinner?" she asked, and as they left Holger standing in his yard, it seemed to Roth that perhaps she and Holger had meant him to come so they could find out the temper of his mind.

But as Margreta smiled and chattered with him, laughing in the old, merry way, as if he were not an enemy, he forgot everything but the pleasure of knowing that he could make this beautiful woman his whenever he wanted to.

He took her first to have a drink at the Yacht Club on the Langelinie. The swastika floated over it, too, but otherwise it might have been any summer evening in another year. People sat at little tables drinking from tall glasses, talking with one another and looking out at the harbor where the king's yacht rode at anchor.

MARGRETA said, "Holger and I have argued about you so many times. He says you cannot separate a man from what he does—that if a man is a" —she hesitated tactfully—"conqueror, let us say, he will be ruthless and violent. I said there was in a man still some of what he once was." She raised her eyes and looked steadily at him. "I wanted to see which of us was right." Her voice fell a little, and Roth thought of the brook on the Haunstrup farm where they used to have picnics.

"I did not want to have memories hanging about in my head if—" She blushed.

"If?" Roth asked triumphantly.

"If I married Holger." Her voice was still lower.

"Holger?" Roth said. "My dear girl, he is left over from the old days. You and I are young and strong. We want success."

Margreta looked at him silently. She was tanned, he noticed, and her leaf-green dress was beautifully becoming.

"Is it success to be hated and feared?" she asked.

He said, "That proves how strong we are."

She said, "Do you never wonder—?"

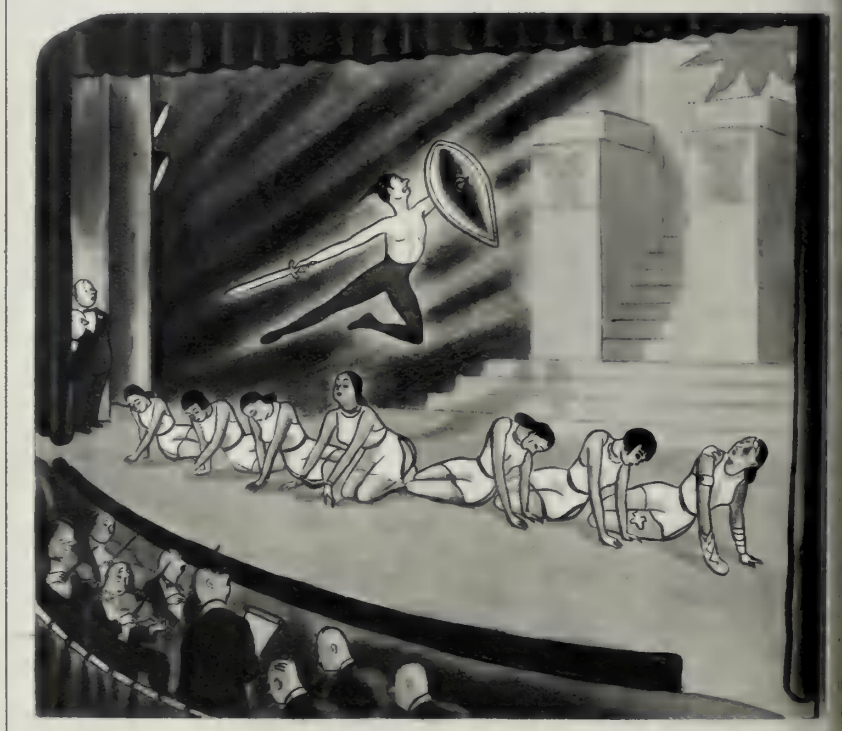
"No," he answered, taking her hand. "We are in control and nothing can defeat us." That was to warn her.

She was looking at him with a long, questioning glance that angered him a little and he snapped his fingers for the waiter, who sprang to serve the uniform.

"Let us leave," he said. "I have things to say to you, but not here."

As they got up to go, Roth noticed that theirs was the only table occupied, though when they arrived every table had been taken. He looked at the sky to see if a storm had frightened people away, then at his watch to see if they had stayed late without knowing it. They had been there less than an hour, and the sun was shining on the harbor and on the people walking by. The waiters bowed as they left.

"What happened to all the others?" Roth demanded. There was something about those empty tables that was almost threatening.



Margreta said, "They were all Danes, perhaps." He flushed.

"They have no right," he said.

"Is there a law?" Margreta asked in a level voice. "Have you passed a law yet that people may not leave a café when they choose?"

Roth didn't answer. They walked on slowly. On the road, bicycles went by, and a few official German cars. It was hardly a private place, but Roth was suddenly too full of a hard anger and determination to conquer this woman, as unwilling countries were conquered, to care. All the softness had gone out of his feeling for Margreta. She had become only a beautiful woman, to be taken by force. He pressed his mouth down on hers, glad to feel her amazed and furious resistance, glad to know he could overpower her by brute strength. That made him feel proud, for he was completely the conqueror.

Margreta stood still after the first second of wild struggle, so still that at last he released her, knowing she was not responding. But he told himself it was because his attack was so sudden and

"He never quite makes it" CHAS. ADI

because she was so utterly vanquished. When he looked at her face it was still and hard, and her eyes were as gray and remote as a wintry sky.

She spoke slowly, dropping her words like cold stones. "I am glad you did that," she said. "If you had not, I might have gone on defending you to others, like my father and Holger, and thought myself that you were the Roth I knew as a youth. Now I know you are exactly what your uniform proclaims. You have betrayed our friendship and hospitality. You have trampled on all we free Danes held dear. I thought perhaps I was wrong and prejudiced about you who have come to destroy us, but now I know there is nothing evil enough that I can think about you."

Her words were hurting Roth. He felt one last upsurge of old and soon to be forever lost emotions—shame and self-questioning and that queer, horrible loneliness that he had been struggling against ever since he had been in Copenhagen. It attacked him when he saw people's faces go blank as he approached. When, as this afternoon, he seemed to spread a shadow before him. His uniform, his speech, his presence there might have marked him with a medieval bell, so that when he walked out in these streets that had once been

so charming and so gay, he was lik plague-stricken, calling out, "Unc Unclean!"

"Thank God I am free of whatev traction you once held me with," greta said. "I am going back to H now, to help him."

"Help him what?" Roth asked pidly.

"Do what he has to do," she saic Roth wondered what Holger did why his cattle were sick, his crops and his silo burned down. No one blame a man for accidents that him, but Roth found himself thi again there were so many acci lately. So many fires. So many fac reporting broken machinery that not be fixed. So many dead animal when you inquired into their death got a shrug for an answer or, at "You took our feed. Cattle don't li air."

Yet there was nothing to com about, officially. People were they did as they were told. It was in the things about which no regula had been laid down that you

sometimes sense that under their ness was a hatred for the conq that burned like swampfire, un guishably. People who left resta when an officer came in, as if the lost their appetites. People who d understand questions. Old ladie preferred to cross a street withou hand under their arm.

MARGRETA began to walk awa Roth hurried after her. It w credible that this should happen t who was so powerful!

He said almost humbly, "Pleas I never to see you again?"

She turned to look at him on time before she crossed the stree looked at his polished boots that w heavily in streets of countries they did not belong. At his unifor fitted as closely as his firm, thoughts. At his cap. At his swor

"You have the power to *order* m your presence," she said.

It was only then, as she was w away from him forever that Roth ized that a conqueror is doomed t liness. His footsteps echo with a l sound, and words of greeting in a f tongue, "Good evening, Herr C Everything is quiet," hang heavy unresponsive air.

Evil Under the Sun

Weston thought, "Nice little Bit wishy-washy, perhaps. A od for that philandering young husband of hers. Oh, well, the ng. Women usually make a u once!"

wn, Mrs. Redfern. We've got ough a certain amount of rou- see. Asking everybody for an f his movements this morn- for our records."

e Redfern nodded.

d in her quiet, precise voice: s, I quite understand. Where nt me to begin?"

Poirot said, "As early as pos- dame. What did you do when got up this morning?"

e see. On my way down to I went into Linda Marshall's fixed up with her to go to Gull morning. We agreed to meet nge at half past ten."

d not bathe before breakfast,

"No. I very seldom do." She smiled. "I like the sea well warmed before I get into it. I'm rather a chilly person."

"But your husband bathes then?"

"Oh, yes. Nearly always."

"And Mrs. Marshall, she also?"

A CHANGE came into Christine's voice. It became cold and almost acrid. She said, "Oh, no, Mrs. Marshall was the sort of person who never made an appearance before the middle of the morning."

With an air of confusion, Hercule Poirot said:

"Pardon, Madame, I interrupted you. You were saying that you went to Miss Linda Marshall's room. What time was that?"

"Let me see—half past eight—no, a little later."

"And was Miss Marshall up then?"

"Oh, yes, she had been out."

"Out?"

"Yes, she said she'd been bathing."

There was a faint—a very faint note of embarrassment in Christine's voice. It puzzled Hercule Poirot.

"And then?" Weston asked.

"Then I went down to breakfast."

"And after breakfast?"

"I went upstairs, collected my sketching box, and sketching book and we started out."

"You and Miss Linda Marshall?"

"Yes."

"What time was that?"

"I think it was just on half past ten."

"And what did you do?"

"We went to Gull Cove. You know, the cove on the east side of the island. We settled ourselves there. I did a sketch and Linda sun-bathed."

"What time did you leave the cove?"

"At a quarter to twelve. I was playing tennis at twelve and had to change."

"You had your watch with you?"

"No, as a matter of fact I hadn't. I asked Linda the time."

"I see. And then?"

"I packed up my sketching things and went back to the hotel."

Poirot said, "And Mademoiselle Linda?"

"Linda? Oh, Linda went into the sea."

"Were you far from the sea where you were sitting?"

"Well, we were well above high-water mark. Just under the cliff—so that I could be a little in the shade and Linda in the sun."

"Did Linda Marshall actually enter the sea before you left the beach?"

Christine frowned a little in the effort to remember.

"Let me see. She ran down the beach—I fastened my box—Yes, I heard her splashing in the waves as I was on the path up the cliff."

"You are quite sure of that, Madame? That she really entered the sea?"

"Oh, yes." She stared at him in surprise. Colonel Weston also stared at him. Then he said: "Go on, Mrs Redfern."

"I went back to the hotel, changed, and went to the tennis courts where I met the others."

"Who were?"

"Captain Marshall, Mr. Gardener and Miss Darnley. We played two sets. We were just going in again when the news came about—about Mrs. Marshall."

Hercule Poirot leaned forward. "And what did you think, Madame, when you heard that news?"

"What did I think?"

Her face showed a faint distaste for the question.

"Yes."

Christine Redfern said slowly:

"It was—a horrible thing to happen."

"Ah, yes, your fastidiousness was revolted. I understand that. But what did it mean to *you*—personally?"

She gave him a quick look—a look of appeal. He responded to it. He said in a matter-of-fact voice:

"I am appealing to you, Madame, because you are a woman of intelligence with plenty of good sense and judgment. You had doubtless during your stay here formed an opinion of Mrs. Marshall, of the kind of woman she was?"

Christine said, cautiously, "I suppose one always does that more or less when one is staying in hotels."

"Certainly, it is the natural thing to do. So I ask you, Madame, were you really very surprised at the manner of her death?"

"I think I see what you mean. No, I was not, perhaps, surprised. Shocked, yes. But she was the kind of woman—"

Poirot finished the sentence for her:

"She was the kind of woman to whom such a thing might happen . . . Yes, Madame, that is the truest and most significant thing that has been said in this room this morning. Laying all—er" (he stressed it carefully) "*personal* feeling aside, what did you really think of the late Mrs. Marshall?"

CHRISTINE REDFERN said calmly, "Is it really worth while going into all that now?"

"I think it might be, yes."

"Well, what shall I say?" Her fair skin was suddenly suffused with color. The careful poise of her manner was relaxed. For a short space the natural, raw woman looked out. "She's the kind of woman that to my mind is absolutely worthless! She did nothing to justify her existence. She had no mind—no brains. She thought of nothing but men and clothes and admiration. Useless, a parasite! She was attractive to men, I suppose—oh, of course she was. And she lived for that kind of life. And so, I suppose, I wasn't really surprised at her coming to a sticky end. She was the sort of woman who would be mixed up with everything sordid—blackmail—jealousy—violence—every kind of crude emotion. She—she appealed to the worst in people."

She stopped, panting a little. Her rather short top lip lifted itself in a kind of fastidious disgust. It occurred to Colonel Weston that you could not have found a more complete contrast to Arlena Stuart than Christine Redfern.

It also occurred to him that if you were married to Christine Redfern, the atmosphere might be so rarified that the Arlena Stuarts of this world would hold a particular attraction for you.

And then, immediately following on these thoughts, a single word out of the words she had spoken fastened on his attention with particular intensity.

He leaned forward and said:

"Mrs. Redfern, why, in speaking of her, did you mention the word *blackmail?*"

511 Pl., Racine, Wisconsin

Miss Rear Admiral

Continued from page 26

took her arm. "You're getting paid for it."

"But I'm not having any fun!" She jerked loose from me. "And it's all your fault! I wish I'd never laid eyes on you, that's what!"

"Okay, baby," I said shortly. "We'll wash it up right here."

"You're washing it up too late—I'm in the movies now."

"Don't worry, babe," I said shortly. "You won't be long." I slammed off. At the corner, I looked back. She was standing there, blond hair flying in the wind, watching me. She lifted her hand as if to wave, and then let it drop slowly. She looked sort of lonely. But *I* was through.

They premièred Manny's Navy epic at the Carthay Circle, and before the picture had run three reels people began buzzing to one another about that cute little blonde who had the priceless lines about her grandfather's getting his stern seared at the battle of Manila Bay.

The old man dragged me out in the foyer. "Where is that Higgins girl?" he hissed. I said I didn't know. He yelled: "You better know! If you don't have her here by curtain time, you're—"

"Not working for Steinberg any more." I went out to my car, got in, slammed the door, and lit a cigarette.

If Zone didn't care enough about her own future to show up the night they premièred her first picture, why by golly, she knew where she could go! I wasn't chasing around after her any more!

ALL I had to do was ask the first uniform on the Navy landing, where the Navy hop was. Then I went there and, of course, I found Zone. She had on a smart-looking evening thing that set off her light hair. She looked wonderful.

I pushed my way through the Navy to her side. "Come on, smarty pants—get going," I said. "You're wanted by your public."

She turned off her smile quick. "Look here, Bob Henry, I am sick and tired of being dragged at Manny Steinberg's chariot wheels."

I said: "And I am sick and tired of having to pull you out of screwy joints and get you back up to Hollywood to be dragged. And I wouldn't do it, except that—"

"Except, if you don't, you'll lose your job," she mimicked.

It made me mad. "Yes, I will," I shouted. "But after six weeks of you, I'd rather go back to Del Rio, anyhow."

"I'm sorry, Bob," she said, instantly contrite. "Of course I'll come along with you."

But it wasn't a pushover. She brought the major portion of the Fleet—all I could crowd in my car.

We made the Carthay Circle just as the curtains were swinging to across the screen. The lights went up, the orchestra spied Zone and the Navy coming down the aisle, and swung into "Anchors Aweigh!" and the audience went mad! They stood up and yelled and screamed; they surged toward Zone and tried to mob her.

Right there was where the jolly tars earned their salt. They lifted Zone onto their shoulders, formed a flying wedge, and leaped up on the stage with her.

Then Manny Steinberg appeared, put an arm around the cause of it all, and raised his hand for silence.

Someone tugged at my elbow. I turned. It was the old man. "Bob, I'll never question your judgment again," he blubbered, and wrung my hand. "This is the most tremendous stunt I have ever seen. Let's go have a drink."

Manny was promising the fans another great picture, starring his newest discovery, Miss Zone Higgins, as we went out.

WHEN the phone rang next morning, I rolled over, groaning, and lifted the receiver. "Hello," I said.

It was Zone. She said: "Bob, for heaven's sake! There are agents and things all over the place!"

I said: "Lock the door and hold everything, baby. I'm on my way."

When I pushed through the gang in the hall and got inside, Zone was pacing the floor.

"Everybody's got contracts!" she said. "Manny's secretary phoned and said he had one for me to sign, too. What for?"

I explained contracts, and Zone blew up. "But I don't want to be a movie actress!" she cried. "It's no fun!"

"Baby," I said, "I can't wait to see Manny's face when you tell him that."

It turned out the way I knew it would. Manny didn't believe Zone was on the level. He thought Zanuck was after her. So he upped his ante to three fifty.

Then Zone pulled a line about wanting to ush in Long Beach where she could have fun, so Manny jumped to five quick.

At seven fifty and a six months' option I said we'd take it, and rushed Zone outside before she could open her mouth. . . .

Manny had his promotion staff in next day—he had a wonderful idea for a publicity campaign on Zone: Have her fans pick a new name for her. Zone blew up. "My menfolks didn't have to change their name to get in the Navy," she said. "And I reckon the Navy's more important than the movies." Only we weren't screening a Navy epic any more, and the blurb wasn't good for newspaper space.

Then we went into a huddle, trying to hit an unusual angle on Zone for publicity, like Dietrich's legs or Garbo's seclusion or Marie Wilson's eyelashes. But we couldn't think of any.

Meantime, Zone was always appearing some place with half a dozen or so Navy uniforms. At first, it was considered cute. And then after a while, the columnists started poking fun at her, especially McMann.

Then there was the night at Frank Capra's house. Capra's guests were watching a March of Time whic the battle wagons on their aro Horn cruise. When sailors start ing out of hatches and racing stations, some nasty-smart dan back of the room said right o "Where's Higgins?"

It caused a gale of laughter, in McMann's column next Manny was burned! He called and issued orders that she was seen with any more Navy me said he could take his half-finis ture and jump off the breakwa it.

Right in the middle of the r sent out an SOS for me. Zone w ing mad, and crying; and Manny old man both looked as if they lowed the back end of a sound

"All right, all right, we comp Manny said. "One Navy m can have—I don't argue wh take your pick and we give h build-up."

"But," Zone objected, "if I with one, then I'll likely get fond of him."

"Come on, baby, be reasor said. "Give the other girls a b

So after a while she dried and picked Perry, and went drama lesson. Manny turned t man. "I want you should star paign on this Perry guy—what in the Navy?"

"He's an aviation mechanic in.

"Oyoy, oyoy," Manny moan got to get him a ensign at least

"Won't that be a little diff asked.

Manny gave me a look. "Fo Steinberg? Nah, nah, my boy. to do is call the admiral." H pressing buttons and the old m got up and went out, but quietly

I'll pass over what happened

Of course I wasn't there to those things get around the soon grapevine had it that M most burst a blood vessel whe socked home to him that N operation on making an epic of and making an ensign out of a were two totally different thing

As far as the admiral was c Zone's boy friend was a mech he was going to stay a mechanic

Manny let the big build-up sl ing for the best. After all, if Zor out star material, the public mi look a little thing like a Navy her closet.

IT WAS raining when I turne still raining when the teleph and wakened me in the small fore dawn. Zone was on the w said: "Bob, can you please c here, quick?"

I said: "For the love of m time is it?"

"He says every store and ch theater are open and still th place for them all," she said. thousand of them caught ashore get any sense out of him."

"That makes us even," I said he, and where is everything o who is it that's all caught asho

"There's a terrible storm, Navy men can't get back abo ships. You've got to get me Beach quick."

"I'll be right over," I said.

She was pacing the floor wh there. "Perry called again," "He's crying—he sounded dr that wouldn't make him cry, w

"How should I know?" I sai

et's get going." The road out San dro Avenue was flooded; we had to tour.

When we reached Long Beach it was uzzy gray daybreak, rain still drizzling wn. The town was blue with sailors. 'here is this Perry supposed to be?" I ted.

'He said he'd be waiting out in front the P. E. station."

'But that was hours ago!"

'Pull over to the curb." Zone had eady spotted him. He *was* in front of P. E. station.

He was a slight, dark young man—s Perry—with a mess of uncombed ck curls hanging down from beneath soggy white hat, and in his gray odshot eyes. He was dripping wet, he didn't seem to know or care. He t stood there, swaying in the rain, s on the street unseeingly. Zone nbed out of the car and ran up to n. "Perry, I came as quick as I could."

'You were a long time," he said kly. He pulled her hand through arm and started walking away, sway- as he went.

parked the car and went after them.

IT WAS all so crazy: it was like a bad eam—that next hour. Zone and Pry walked in the rain, down Ocean levard, bumping into sailors, and I led after them, why, I didn't know. Ne of it made sense and it wasn't any ny affair, and yet I stuck.

erry kept talking—his words came to me on the wet wind: "I should ut there! I should be out there, too! y I said it was too rough to risk the or launch. But the others went! y went because they were supposed and now they're at the bottom of bay—" He covered his face with his ds. "They crashed on the break- er—they're at the bottom of the !" Zone clung to his arm.

hey were far down the beach road and they stopped and leaned nst a stone balustrade. The sea was ing up beneath them, black and with white foam on its top.

erry leaned his slight body against , as if for protection and comfort, peered out through the murk toward ships.

e was trembling all over.

stepped forward and said. "Can— I help?"

Yes, Bob," Zone said. "He's done he needs sleep. Get him a room at Hilton—a room with a radio. Please y."

was while I was whizzing back up the street on a run that I bumped into McMann. He said: "Hi, Bob, what gives?"

I said, "Nothing," and started to run on again, but he grabbed my sleeve.

"What's the little Higgins doing down here?"

"You wouldn't get it if I told you," I said, and jerked loose.

His cold, light blue eyes glinted icily. "Look here, Henry, you're being nasty to the wrong guy at the wrong time."

"So what?" I said, and pushed past him. "Out of my way, snoop."

THEN I galloped off in the downpour and left him standing there. The significance of his presence in Long Beach never hit me till after I'd bulldogged a room where there wasn't any room, and helped Zone get Perry into it, and ordered up a bottle of rum and a hot-water bottle and a radio. Perry wouldn't quiet down till that was installed, and Zone was sitting by it, waiting to hear when the word was passed that all liberty was canceled.

Then I went back downstairs to find McMann at the desk, poring over the registry. I put on a smile of cordiality and walked over. "Hello, Otto," I said.

He swung around on me. "Since when did you start stooging for Dan Cupid?"

I said: "You're all wet." I felt my grin going.

"So?" His smile was nasty. "Well, you can't deny that she is upstairs in a room with a sailor, can you?" I didn't answer. "Go on," he urged. "What gives? Or do I just make a guess?"

"Don't be like that!" I begged.

"Are they married?" he demanded.

"No," I said. "But it's not what you think."

"In cases like this, I don't have to think," he said. "So long, Henry."

I went back upstairs and routed Zone out into the hall. "You're in a jam," I said. "You've got to get out of here on the double." I told her about McMann. Her chin went out.

"Perry needs me and so I'm staying right here till liberty is canceled and that's all there is to it, Bob."

After all these months, I knew better than to argue with Zone. So I went in and sat with her till the seas went down at dusk, and the men were called back aboard their ships.

When I came to work next morning, the old man pounced on me. He had the morning News. I'd already seen it, and it wasn't good. "What do you know about this mess?" he demanded.

I tried to explain it, but somehow it sounded a little stupid and mushy.

The old man interrupted me in the middle to say: "I think you'd better get over to Manny's office and give your act there."

When I came into the office, Manny was shouting at Zone: "A morals clause in your contract, you've got!"

Zone, her chin out, countered with: "Where I came from, you don't need a morals clause to help a person out when he's in trouble!"

"You don't deny it?" Manny roared. "You admit you was in a hotel room with a sailor?"

"It was pouring rain," Zone snapped. "Why shouldn't we get in out of the wet?"

"Why should you get in out of the wet where McMann could see you?" Manny bellowed. "Do you want every fan in the United States should think you're just a—a little—"

"Hold it," I said. I was boiling mad. "Nothing happened that wasn't on the up and up. I don't care what McMann put in his column. I was there—I was with them—I know."

Manny swung around on me. "Well, that's a difference," he said, blowing relievedly. "That's a big difference."

He turned to Zone. "But the damage is already," he said to her. "And you got to learn your lesson. The minute this picture is done, you get suspended—for ten weeks—without pay. And that's final."

"No, I don't," Zone said. "I'm quitting—*right now!*"

MANNY got up from his desk, his little round face working. "I got a contract, young woman. Nowhere in Hollywood do you work. In pictures you are through before you are even started!"

"Listen." Zone got up and walked over to his desk, her little chin out. "Contract or no contract, *I'm not working for you!*"

Manny sat back and started turning a light mauve. I went over and put my arm around Zone. "Come on, baby," I said. "We'd better go."

Zone's not in Hollywood any more. Last I heard from her, she was living in Pensacola. Perry got transferred to the air base there, and they've got a little house on the bay. Zone writes nice letters, all about the petunias in her garden and the new kittens and the neighbors and the weather and Perry—and Perry Junior, who's expected any day, now.

She still sounds like Beaver City—or Del Rio.

Lighted Windows

Continued from page 13

's. There were more men in the le than he had ever seen before. had put up a big sign saying, Happy New Year!"

he door swung open and a man aled out with stiff dignity and went lowstreet.

A warm current of air followed him n Burdock smelled the keen, high d of whisky. He swallowed.

I was hot inside. Lunk wiped his ar on the apron and pumped Bur- ock's. Burdock said, "We're out on the na camp on Township 21. You re- mber Cort Gregory? He was here rit me two years ago."

He looked around at the double line t e bar. He saw men from other ans—Guy Merchant, from Lubec; n Merrill Colcord, and Block Ash—n e felt the strength of their hand- hakes.

"What you going to do, Tom—set the ow afire?"

"Hey, Tom, where do you keep the women?"

Chet Loving had a good start—the bottle that had kept him warm on the long ride to town began to work in the heat of the place.

Burdock let the talk surge around him. In a lull he spoke to Lunk alone. He said, "I'm going upstreet for a while." He passed Lunk a bill. "Set them up, Lunk. Tell them I'm coming back later."

The back door led out onto an alley. Halfway down the alley toward Water Street there was a small house set flush with the sidewalk. As Burdock passed he heard a woman's high, full-lunged laugh against radio dance music. He went along Water Street to Walnut. He stopped there at the corner and looked up toward Maple.

The day he had seen Alice Baines for the first time he had been in Parlow's barbershop waiting for a haircut and she had been sitting in a car just outside the window. She wore a blue polka-dot dress and her dark hair was smoothed into flat waves on either side of her round head. She had very white skin and her arm, which rested along the door of the car, was plump. There was about her that self-confidence, born of security—the protecting respectability of her home.

"That's the Widow Baines' daughter," Jim Parlow had said, reading the look on his face, "and lumberjacks like you best lay off."

Burdock left the corner and began walking up Walnut. He walked slowly, uncertain of his plans. He tried to find reasons for delay—to put off going. He asked himself—why in hell would she care to see him anyway? The whole thing was just an idea in his head. He almost turned back to Water Street. Instead he went into Slade's restaurant and ate hamburgers and drank a cup of

coffee. After that he spent an hour in the Bijou Theater without remembering anything he saw. It was ten-thirty when he came out into the cold northeast wind, smelling of snow. He lowered his head into it and walked on toward Maple.

In Carter's drugstore he saw a crowd sitting around the back tables. They were the kids of the town, the sons and daughters of the people who lived on Walnut and Maple. He had brought Alice Baines in there once and they had watched other couples dancing. That was about as far as it had gone between them. He had called at her house three times.

He remembered the friendly warmth of the big kitchen, the way old Mrs. Baines sat there in the rocker and looked him over. Once she had ordered him to take off his coat so that she could sew on a button and he had sat there in his shirt sleeves, as if that house was his own home. He had gone away after that, following work, living the life he knew best. But when those moments came when he thought of settling down in a real house, with an upstairs and a downstairs to it and stacked stovewood in the shed he saw Alice Baines in that house—not because he had fallen in love with her but because she belonged in a house like that.

He hunched forward. He slanted his body into the wind and felt the dry snow from the drifts hiss against his boots. . . .

THERE was a light in the Baines house. When he walked up to the front door and knocked, he heard young, high heels tapping on the bare floor and the fumbling rattle at the lock. The door opened an inch or so and he felt the heat of the house rush out to greet him, like a friendly dog.

"Who is it?" Alice Baines asked.

"Tom Burdock."

He heard the surprised catch of her breath, the step back and then he saw the door open.

"Tom! Well, I never. Come in, come in."

He pulled off his hat and with it turning in his hands in front of him he followed the still-opening door into a dimly lit hallway.

Alice Baines walked ahead of him into the brilliant light and soft, warm air of the kitchen.

"It's been a coon's age since I saw you last," she said, smiling. "Where've you been keeping yourself?"

He shifted his weight. "Around. We're working up on 21. I thought I'd come in and say hello."

"There! I'm glad you did. Sit down, Tom. Let me take your hat and coat."

She seemed pleased at his coming, but he felt in the way she moved, the way she looked up at the window when she returned from the hall where she had left his things, that she was apprehensive, as if she were expecting someone. After the first moment of welcome, her attitude was divided between listening for something outside the house and pride in showing him, without speaking of it, the changes in the room.

He had felt these changes the moment he came in. Now, sitting in a new leather armchair, he saw these changes —the new linoleum, the electric refrigerator, the long, smooth-lined sink.

She watched him look around and said, finally, "It's been done over. Do you like it?"

"It's dandy," he said.

He thought of the old rocker, with a plush footstool, where her mother used to sit. He wondered about the old lady, but something, a feeling, stopped him from asking about her.

"Where did you spend Christmas, Tom?"

He looked up and, half laughing, half shamefaced, said, "Well, I dunno—around. In the city, mostly."

Alice Baines looked at him thoughtfully for a moment, and then, her mind going back to her own problems, she said, "Judith is here—you remember my sister? She had a job in Calais for a while, but the place went out of business so she's living with us now."

HE REMEMBERED her, a pretty kid, with lively dark eyes, about seventeen. She would be nineteen now.

He said, "Yes, I remember her."

The wind was getting stronger outside and the snow beat against the black panes, like many moths. A gust blew open the back door into the woodshed and he got up to close it. There was a light in the shed and he saw stovewood piled roof high. Just as he turned he saw on a workbench the inner tube of an auto tire stretched across a vise. There was a new patch recently put on it. A man's heavy coat hung on the door.

When he came back into the room Alice was looking out the window—her hands cupped against her face to shade the light. She turned and a worried expression stayed in her eyes for a second.

"I don't know what's keeping him," she said. "He ought to be back by now."

Burdock felt the heat of the stove and sweat start on his forehead. He didn't say anything. He knew now what he had felt in the flash as he saw the coat and workbench in the shed.

Alice shrugged her shoulders. "Well, he'll be here any minute. I'll get some coffee ready." Then, startled, laughing a little, she said, "Why, Tom! I don't believe I told you I was married. Isn't that the limit?"

"You married?" he said, feeling the awkward way he still stood there.

"It's been almost a year now. I'm so used to it I didn't think to tell you. You see, after mother died we set up housekeeping here."

Burdock's mouth closed and a muscle in his throat contracted. So low, it was almost a rumble in his chest, he said, "Well, that's fine, Alice."

There was one thing uppermost in his mind—to get out before the man came. He didn't want trouble.

But he couldn't move. He didn't know what to say to get out with. He hadn't taken in the whole thing yet, but already he was saying to himself, "What were you expecting anyway?"

Alice put three blue-and-white cups on the breakfast-nook table.

"Edward's down at the police station. There's been a lot of trouble on Water Street . . ." She stopped and an embarrassed expression went across her face as she looked up at Burdock, still standing there. She didn't go on to explain, but began a tuneless hum as she moved the coffeepot onto the hot part of the stove.

"How long will you be up on 21, Tom?" she asked, after a moment.

"A month or so. I don't know where we'll go from there."

"Come in and have dinner with us sometime. And—"

He heard the stamping of shoes on the back porch.

"That's Edward," Alice said.

"It's proved to be the most successful summer stock show yet!"

JEFF KEATE

A compact, darkly dressed young man hurried into the room through the porch door. His face was disturbed. He glanced at Burdock and his eyes went cold when he saw Burdock's leather boots and checked shirt.

ALICE started to introduce him, but Edward's nervousness alarmed her. She crossed the room and put her hand on his arm. "What happened, Edward? Is there anything wrong?"

"Plenty," he said, his voice harsh, and Burdock felt excitement in it. "The town's full of bums. They're everywhere, drunk and yelling at respectable citizens. I got one locked up. Carlton can't do a thing with them. Where's Judy—is she in yet?"

"No."

"She oughtn't to be out on the streets alone." He looked at Burdock again—sizing him up. Alice completed the introduction.

The wind sent a puff of smoke back through the chimney and a few ashes whirled in the heat above the stove.

"You're logging back on 21?" Edward asked.

Tom nodded.

"Yes—I'm still logging." He felt h self stiffen.

"Your gang is going too far," Edw said He turned to Alice. "I went h with Stanley to see if everything okay there." Then, suddenly: "Cal Wilsons right away. Tell them to Judy to stay there the night. Tell t what's happening."

He took off his coat and went int hall to hang it up. When he came i looked at Burdock again and Tom the resentment in this man's eyes- sentment and at the same time complacent superiority of the ma the town over the woods worker. rdock said to himself, "I got to ge of here." He would say goodby to as soon as she came back from phoning.

But before she had hung up som passed the kitchen window and Ed shouted, "Alice! Judy's come. them she's okay."

The back door opened and Bur saw Alice's sister standing there, s ing the snow off the fur of her coat. cheeks were stung to a high color b wind and snow still clung to her hair under the hat.

"You all right?" Edward asked.

The girl was looking at Burdock. said, "Hello, I remember you. I sav when you came to see Alice once." turned to Edward. "I'm all right. it's blowing a gale outside."

"Anyone follow you?"

She laughed. "No such luck."

"This is no time for fooling," ward said. "There's a bad bunch in tonight."

"My—is it that bad?" Judy look Burdock and he saw, or thought he a twinkle in her eyes as though didn't take her brother-in-law too ously. Burdock felt lighter—mo ease.

Edward suddenly said, "Listen

OUTSIDE on the street there wa clumping of boots on the walk. someone shouted. Edward went th to the front room and looked out behind the drawn curtains. Wh came back he was paler than befo

Two men looked in at the k window. One yelled, "That's him! the guy who had Chet locked up."

Burdock saw Edward glance a the room, as if looking for a pla hide. Then, when pride came to h pulled himself together and stood in his own home—all the fright from him. He closed his hands int He walked to the back door and it open. He held back the first m the suddenness of his appearanc squared himself and said, "Wha meaning of this? Clear out of her

Burdock could see four men their faces weaving in the light. walked to the door he saw another the porch steps and the two grabb ward's arm and yanked him ground.

Burdock felt Alice trembling him. She cried, "Stop them! them!"

Both women ran to the window

Earl Stone was standing at the the steps when Burdock came Burdock could see his face clearly light from the kitchen. There wa plete surprise in his expression.

"Tom! Well, look who's here! the hell's going on?"

"Let that man go," Burdock s

"Hey—wait a minute," son shouted.

"Let that man go!" Burdock re

"We want Chet," Guy Mercha now coming up from the group Earl. "That feller there had him up."

Burdock could see Edward str with the two men who held him

knew these men. Words would stop them now. For one second the ght passed his mind that maybe all this wasn't his business, mixing with town people this way. He re-d, dimly, that he was on the wrong of the fence. But because he had in that room, fed by the warmth safety of that house, he felt he had ght for those things.

t indoors," Edward ordered.

AS Earl Stone who came up to dock and said, "Well, what about e'll go if Chet gets out."

ard began to sputter—a sputter as already turning into grudging ement. Tom stood there beside him ying anything. He felt let down, ed. He had come out to one of omes on Maple Street and had nt with him a Water Street brawl. rdock, fighting was like drinking e done in barrooms and bunk-s—but never in front of women. saw Edward rubbing his knuckles, ng the men disappear down the e Edward said, with some satisfac-n, "Well, that's that. Better come in."

dock was uncertain. He didn't feel oing in there now. He said, "I'll y hat and coat."

y was standing just inside the door he took a step toward him as he came in. "That was wonderful," she said. Her eyes were shining.

Alice said, "I don't know what we would have done without you, Tom."

Burdock shifted his weight. He saw Judy pour coffee into a cup and bring it to him. "Sit down here," she said, pointing to the breakfast nook. She put cake and doughnuts in front of him. There was a small pitcher with real cream in it.

Burdock said, "Gee—thanks."

Edward sat down wearily. He was still breathing hard and his hand shook.

Judy said, from the stove, "Now, if that coffee isn't hot enough . . ."

Burdock began to feel good. His taut muscles slacked off. He saw Edward sip at his coffee. He said to Edward, "You've got a nice place here. You've fixed it up fine."

"We like it," Edward said. He leaned back in his chair. He, too, was easier now. He looked at Tom and said, unexpectedly, "Why don't you come in and have dinner with us tomorrow? We have a big dinner on the holiday."

Alice said, "I had already asked him to, Edward."

Burdock hesitated.

Judy said, eagerly, "I'll make an apple pie for you."

Slowly, still uncertain, as if he didn't quite understand, he said, "I'd like to."

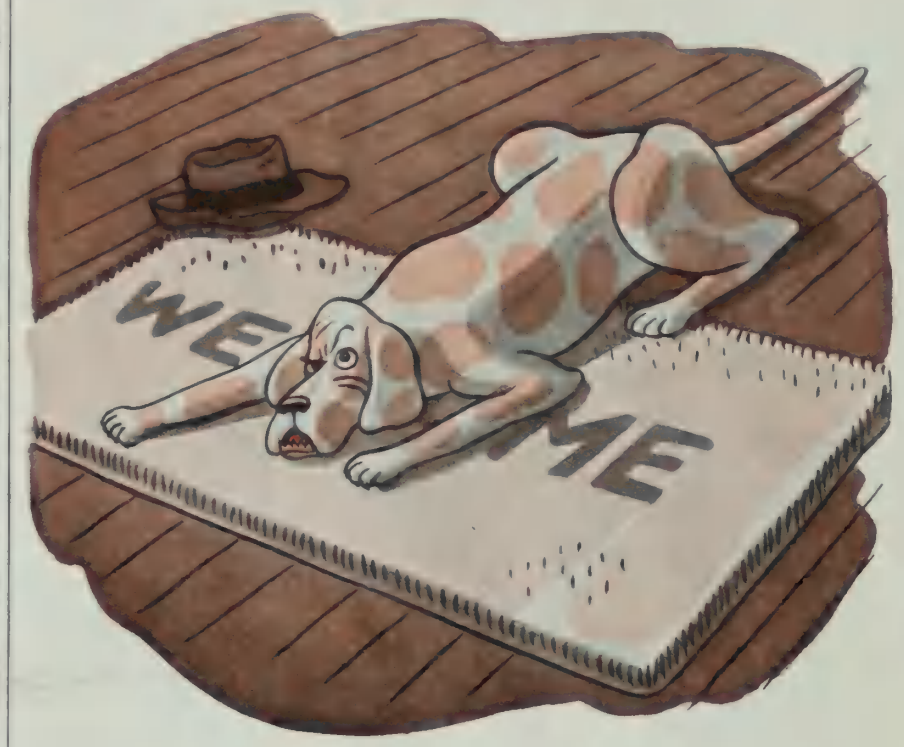
TWENTY minutes later Burdock walked down Maple Street toward town. The wind, at his back, quickened his steps and the snow rushed by him. Most of the houses were dark now, pulled within themselves. He hardly noticed them. In his mind's eye he still carried a picture of the warm room back there and the people in it.

He walked on, without considering his direction. He found himself, suddenly, in front of Lunk's. He went in. The place was hot, filled with smoke and the throbbing noise of many voices.

That noise, or most of it, stopped abruptly as the door swung behind him. Some of the men at the bar turned to look at him. It began to dawn on him that there must have been talk of the thing that had happened on Maple Street. He felt tension grow.

Earl Stone, Guy Merchant and Merrill Colcord regarded him closely. For a moment no one spoke. Then Cort Gregory left the bar and strolled toward Burdock. He began talking before anyone else could speak. His voice was clear, deliberate, soothing, with a little chuckle threading through it: "Well, Tom—we're all glad to see you back." He laughed, all the time watching the action of those at the bar. Then he said, "They tell me she's a honey. The drinks are on you, Kid. Set 'em up for Tom, Lunk."

The room relaxed. Men turned back to the bar. Burdock heard Colcord say, "Boy—what a spitfire! She was just as set to fight for Tom as he was for her. Never saw anything like it in my life."



It came to Burdock then that they were talking about Judy. He had a quick picture of her standing there on the porch, the light from the kitchen on her, the wind whipping at her skirt—and he remembered how strong and defiant her voice was. And he saw again the quick, warm smile as she gave him his coffee.

He looked around the crowded room and thought of other New Year's Eves spent in places like this. And he thought of that road divided ahead of him—but with this difference: He knew for sure which road he was going to take this time.

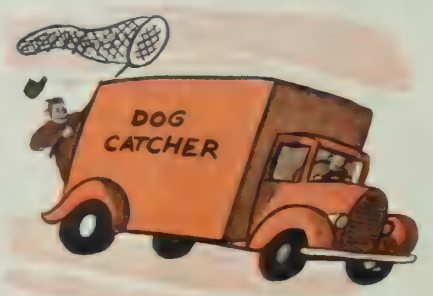
Cort Gregory was standing beside him at the bar. He said, quietly, "Hope the boys didn't spoil things for you with her, Tom."

Burdock felt the warmth go up over him like a tide as he said, "Guess not. I'm going to see her tomorrow."

My man-eating dog is gone forever

UNTIL a few months ago, the kind of dog I loved was the kind who wags his tail at everybody.

Then my friends became a problem. Despite the new, higher price of liquor, they kept dropping in on me like flies and saying, "How about a



drink?" At that time, I didn't serve M & M. I thought you had to pay a fortune for good whiskey. And as I had no fortune, I got me the meanest dog in town.

After he had torn the seat out of seven pairs of pants, my friends didn't drop around any more. I had to go to *their* homes to see them.

One night I tasted an elegant whiskey at Jim Evans's place. I asked him how he could afford to serve it.

"You should read the ads in Collier's," he said. "This whiskey is M & M. It costs less than the whiskey I used to serve and *tastes better*."

I agreed. Then I went home and called the dogcatcher. Next day I ordered a case of M & M. Once again, I have fun, friends, and drinks. It's a good life, thank you.

Quit Fooling About Taxes

LEERING like a hobgoblin at the incoming Congress is the question: How about taxes?

Do we simply go ahead this year and invent some more bizarre, partly invisible taxes which will soak too few people to make any difference ballotwise, and hook these grotesqueries into the already crazy patchwork which we grandly call our taxation "system"?

Or can the new Congress find the courage to undertake a top-to-bottom revision of the tax setup? Seeking more revenue for the government and a more decent deal for the taxpayers (meaning all of us, directly or indirectly), can Congress tackle such sore spots as the following?

Income Taxes. Politicians concede that income taxes in the upper brackets are so high that they produce less revenue than they would if they were lowered somewhat. Yet politicians also concede that up to now they haven't had the courage to lower them. Can they find the courage this year?

How about the fact that great numbers of wage earners pay no income taxes at all, and hence do no worrying about government economy?

How about the injustice of taxing a windfall like any yearly income of the same size? For example, Ernest Hemingway, reputed pretty much broke for the last half-dozen years, has just made a small-sized mint out of sales and movie rights on his new book, but must pay income taxes next year just as if he made that much every year. That can't be just.

How about the assorted exemptions, which grow more complex each year—meaning more money for tax doctors and less for government?

Gift and Inheritance Taxes. One professed purpose of these taxes is to prevent piling up of great, perpetuated knots of inactive wealth. Well, then, why are gift taxes almost as stiff as inheritance taxes? If we must have gift taxes at all, why can't they be a good deal easier than inheritance taxes, and sharply graduated. That would encourage men of wealth to make moderate-sized gifts in their lifetimes, thus breaking the wad up, and thus keeping the money in circulation.

Corporation Taxes. Do the existing arrangements stimulate hiring of labor and payment of reasonable dividends? Or do they keep firms shaving the pay rolls; and do they force out so much money in dividend payments that it is impossible for most concerns to build prudent backlogs for lean years? Does anybody really know? Isn't it about time we found out, adjourned politics on this topic, and streamlined our corporate tax methods?

State and Municipal Taxes. Mayor LaGuardia of New York has said he hopes the federal government will some day collect all the taxes, and blow back proper percentages of the money to states, cities, counties. We hope no such thing will ever come to pass; we believe that the closer the people are to the tax collectors the harder they can kick back at unjust or oppressive taxes.

But isn't it time to do something about tax raids into one another's legitimate tax fields by federal, state, city and county governments? Does this chaos simply have to go on and get worse, to the progressive impoverishment of taxpayers—meaning, to repeat, all of us?

We're building up the national defenses, lopping off deadwood here and there, streamlining many a government department and process. The President has even uttered a kind word in public for some economy in government. Can't we get action on the tax mess, too, in the next few months? Action that will count?

Look out for a COLD
Watch your THROAT . . .
...argle Listerine Quick!

A careless sneeze, or an explosive cough, can shoot troublesome germs in your direction at mile-a-minute speed. In case they invade the tissues of your throat, you may be in for throat irritation, a cold—or worse.

If you have been thus exposed, better gargle with Listerine Antiseptic at your earliest opportunity. Listerine Antiseptic kills millions of the germs on mouth and throat surfaces known as "secondary invaders". . . often helps render them powerless to invade the tissue and aggravate infection. Used early and often, Listerine may head off a cold, or reduce the severity of one already started.

Amazing Germ Reductions in Tests

Tests have shown germ reductions ranging to 96.7% on mouth and throat surfaces fifteen minutes after a Listerine gargle. Even one hour after, reductions up to 80% in the number of surface germs associated with colds and sore throat were noted.

You can realize now why so many tens of thousands of people gargle with Listerine Antiseptic at the first hint of a cold or simple sore throat . . . and why Listerine Antiseptic in the last nine years has built up such an impressive test record against colds.

Fewer and Milder Colds in Tests

Tests conducted during nine years of careful research showed that those who gargled with Listerine Antiseptic twice a day had fewer colds, milder colds, and colds of shorter duration than those who did not gargle. And fewer sore throats, also.

So remember, if you have been exposed to others suffering from colds, if you feel a cold coming on, gargle Listerine Antiseptic—*quick!*

LAMBERT PHARMACAL COMPANY, *St. Louis, Mo.*

HERE'S HOW LISTERINE ANTISEPTIC GARGLE REDUCED GERMS

The two drawings at right illustrate height of range in germ reductions on mouth and throat surfaces in test cases before and after gargling Listerine Antiseptic. Fifteen minutes after gargling, germ reductions up to 96.7% were noted; and even one hour after, germs were still reduced as much as 80%.

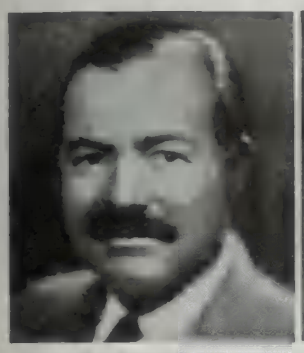
ANY WEEK

PERHAPS we're a bit late with this, the football season having come at last to an inevitable end with the exception, of course, of the Greeks and the Italians, who seem unable to get out of the Albanian Soup Bowl. But this just goes to show you how the lads in at least one of our better football universities die for their alma mater. Mr. Ed Haldeman of Hollywood reports: "I am on my way to San Francisco on the Daylight Limited. Pretty soon I am sitting in a blackjack game with these college boys, who are on their way to play their traditional rival for the final game of the season. In about half an hour I notice that these big athletes are pretty boisterous and upon close scrutiny I find that each has a very large bottle on his hip. I take a few bucks off these boys, who are getting stiffer and stiffer, when in walks a small, dapper, traveling salesman party who sits in the game after listening good-naturedly to remarks about his race and religion. In five minutes this little party wins the deal and two hours later he still has the deal to say nothing about all the boys' money and two bucks of mine. The bottles are now empty and the college athletes are beginning to feel very sad and squeamish, when in comes the water boy with word that Father So-and-so is coming. The priest is a good guy who has come along to see that everything goes all right with the boys. The boys throw the bottles out the window and in comes the Father with a big bag of very red apples and, what's more, he sits down and makes each boy eat all of his apple, as he tells me apples help to keep his boys in condition. To my great surprise these boys lose the game twenty-one to nothing, and I am told that next year they are going to cut down on apples."

IF WE hadn't received, in the nick of time, a fiercely indignant letter from Captain Myles Thorberg Benz of Hartford, Connecticut, we might have started out on this weekly adventure in high spirits. And no columnist has the right to do that. As you know, it is the columnist's bounden duty to find out what's going on and get sore about it. It sounds easy but it isn't. Captain Benz's letter for example. Somebody has been telling the captain that munitions workers are making themselves ridiculous by buying silk shirts and champagne and otherwise "flaunting their war-born wealth with outrageous disregard for taste and morals." The captain wants us to inveigh hoarsely against this dismal display of human weakness. But somehow we can't push ourselves around to it. And it's chiefly the captain's fault. For example, he fails to include in his letter the reasons why a high-income group like munitions workers shouldn't wear silk shirts and guzzle champagne. We're sure we would if we could afford it. Perhaps the captain has overlooked the possibility that the silk shirts and the champagne are mere gestures and, as such, good for the soul that has crept along for many lean years on denim and beer. Many years ago we resolved that if we ever came into money we'd do what a boyhood idol, Uncle Ellick Willard, did when his brother died leaving him a windfall of two hundred and forty dollars. Uncle Ellick Willard was a sort of handyman in our village. When presently the lawyer handed him the money he bought an abandoned trolley car for two hundred dollars and the rest he invested in cakes and a large cask of root beer. Then he invited all us kids to the trolley car to eat and drink with him. That party will be green in our memory while memory lasts.

CONGRESSMAN MARTIN DIES to the contrary, we have plenty of evidence that Mr. J. Edgar Hoover's F.B.I. is energetically on the alert. There is Mr. Rafael Escallon, a Cartagena, Colombia, student of journalism at Syracuse University, for example. Mr. Escallon's father is a newspaper proprietor in Cartagena. A year ago while a student at a Virginia prep school, Mr. Escallon wrote several pieces for his father's paper, one of which was somewhat critical of England's failure to help Poland and Czechoslovakia fight Hitler. Someone in Colombia sent the article to someone in Canada. From Canada it was mailed to Washington. Immediately a couple of G-men appeared at the Virginia school. They were still investigating Mr. Escallon for Nazi infection when the young fellow moved on to Syracuse. Our man called on Mr. Escallon, who said that he thought he'd finally convinced Mr. Hoover's investigators that he is honest. "It was very interesting, most flattering," said young Mr. Escallon. "Your F.B.I. told me that they were very glad that I realized that geographically it was too difficult for England to send help to Czechoslovakia and Poland. I hope that when I am a full-fledged journalist my articles will be so widely read by important people."

WE HOPE it isn't too noticeable, but we are in rather a hurry to finish this column that we may plunge into the excitement of Idaho Potato and Onion Week. It is just about to commence and we are warned by its sponsors to make no effort to preser tato-and-onion-week re they're doomed. If we su proceed immediately to which will be followed by Hot Tea Week. Our in all of these and more h but we don't know. Ou us the 1941 schedule of find that ninety-six w nationally celebrated. we shall probably be un bids to quite a number carnivals. In fact, we're mitted to Sew and Save Salmon Week, Be Kin Week, Notion Week, Change Week, Straw Ha Week, Iced Tea Week Letter Writing Week, Noodle Week, Hard of H Sweetheart Week, Pajar (we can scarcely wait) Week. We have a fee latter week will be more sary if we get that far.



NATURALLY this maga surprised by the enthu readers. We get it out th yet it was not until we inspiring story of Mr. Irv or Schnitz, "The Mayo fourth Street," that w broke out before publicat days before this here Sch tered the mails or appe newsstands we were re gratulatory post cards. BOOKS YOU WILL SOON BE READING

_ they are all Book-of- the-Month Club Choices...

Ernest Hemingway's [illegible] FOR WHOM THE BELL TOLLS, was the Club's November choice. No book in recent years has received such universal and warm praise from all critics.

Margaret Armstrong in TRELAWNY has written a biography of "one of the most genuine originals of our race;" it was our October choice, and is rising swiftly on all best-seller lists.

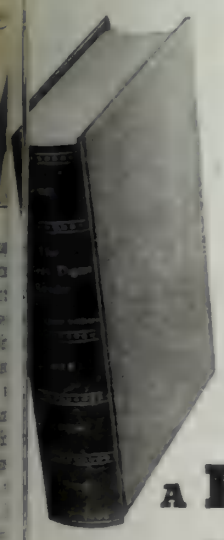
William Saroyan's new book, MY NAME IS ARAM is a delightful puckish picture of a small boy which, we have a hunch, may go the way of Clarence Day's *Life With Father*.

Franz Werfel's new novel EMBEZZLED HEAVEN, is the Club's December book—a quiet, deeply thoughtful work in an entirely different vein from the exciting *The Forty Days of Musa Dagh*.

Willa Cather's new novel, SAPPHIRA AND THE SLAVE GIRL, is her first book in five years. The scene is pre-Civil War Virginia; it is in the mood of *Death Comes for the Archbishop*.

Hans Zinsser's book, AS I REMEMBER HIM, was a Club choice just prior to his death; if any book deserves its present place, among the top best-sellers in the nation, it is this.

Jan Struther, with MRS. MINIVER, is a new author to Americans—instantly and widely introduced as so many authors have been in the past, when her book was chosen in August.



Gontran de Poncins, a Frenchman, has written KABLOONA, an extraordinary book about Eskimos—beautifully translated and strikingly illustrated. It too will appear very soon.

Van Wyck Brooks' NEW ENGLAND: INDIAN SUMMER is, in the opinion of many, even more absorbing than *The Flowering of New England*. It was our judges' choice for September.

TO NEW MEMBERS

The best articles and features of the past 18 years in the Reader's Digest

IN A SINGLE BOOK—

THE READERS DIGEST READER is a collection of 138 articles chosen from the thousands of leading articles that have been reprinted in that magazine. They are those in which the reading public itself indicated the most interest. The list of contributors reads like a roll-call of famous contemporaries whose range of interests is as wide as life itself. Whether you are in the mood for relaxation or learning, escape or scientific discussion—whether you are interested in "The Wisdom of Laziness" or "The Discovery of Anaesthesia," or the inimitable Stephen Leacock's advice on how to open a conversation, or indeed any conceivable topic, here is your book.

FEW people realize that writers who now have become as famous as Pearl Buck, Clarence Day, Stephen Vincent Benét, Sigrid Undset, Hervey Allen, John Steinbeck, J. B. Priestley—and a score of others little less known—were *first* introduced to a nation-wide book-reading public by having one of their books selected, and then distributed to every tiny corner of the country, by the Book-of-the-Month Club.

Fully a million perspicacious book-readers—in the families which use the Book-of-the-Month Club service—now rely upon it to keep themselves from missing the new books they are really interested in.

Time and again you buy the "book-of-the-month"—not knowing it has previously been chosen by our judges—merely because some discerning friend has said warmly: "There's a book you must not miss." How sensible to get these books from the Club, since you pay no more for the books you buy, and save enormously in other ways.

Here is the simple procedure: You are not obliged, as a subscriber of the Club, to take the book-of-the-month its judges choose. Nor are you obliged to buy one book every month from the Club.

You receive a carefully written report about the book-of-the-month chosen by our four judges, *in advance of its publication*. If it is a book you really want, you let it come to you. If not, you merely sign and mail a slip, saying, "Don't want it."

Scores of other careful recommendations are made to help you choose *among all new books* with discrimination. If you want to buy one of these from the Club, you merely ask for it.

In addition, there is a great money-saving. More often than not—as the writers and books mentioned above demonstrate—our judges' choices are books you find yourself buying anyway. *For every two books-of-the-month you buy you receive, free, one of our book-dividends.*

During 1940 close to $5,000,000 worth of free books (retail value) were given to the Club's members—given, not sold! You pay no yearly sum to belong to the Book-of-the-Month Club. *You pay nothing, except for the books you buy*—and you pay for these no more than the regular retail price (frequently less) plus 10¢ for postage and other mailing charges. Your only obligation is to buy four books-of-the-month a year from the Club.

BOOK-OF-THE-MONTH CLUB, Inc., 385 Madison Ave., N.Y. A471

Please enroll me as a member. It is understood that I am to receive a free copy of THE READERS DIGEST READER, that I am also to receive, without expense, your monthly magazine which reports about current books, and that for every two books-of-the-month I purchase from the Club, I am to receive the current book-dividend then being distributed. For my part, I agree to purchase at least four books-of-the-month a year from the Club.

"You're on Your Own"

Become a qualified pilot by applying now for training as a U. S. Army Flying Cadet

A man's life can have many great moments. But surely one of the greatest comes with the first solo flight when the Flying Cadet's instructor says "You're on your own"— and points aloft!

U. S. Army aviation training is the finest in the world today.

While training as a U. S. Army Flying Cadet, you will be paid $75 a month, and furnished, free of cost, uniforms, equipment, medical and dental attention, and board and lodging. When you graduate from the "West Point of the Air," you will be commissioned a Second Lieutenant in the U. S. Army Air Reserve, and placed on active duty with the regular Army Air Corps with pay and allowances ranging from $205.50 to $245.50 per month.

How to qualify? You must be sound physically, 20 to 27 years of age, unmarried. You must have completed at least two years of college work, or pass a written examination covering equivalent work. The number of Flying Cadets that can be accepted is limited. Apply at once! Visit or write.

U. S. ARMY RECRUITING SERVICE

Visit or write the nearest U. S. Army Recruiting Station or write to: "The Commanding General," of the Corps Area nearest you:

KEEP UP WITH THE WOR.D

By Freling Foster

As it is too dangerous to release Army pigeons from planes traveling at high speed, the birds will soon be launched in metal cages equipped with parachutes. An automatic device opens the door when the forward movement of the cage has been slowed up sufficiently for the pigeon to take to the air.

Not long ago, a Harvard professor conducted a test among 1,500 persons before whom he played two phonograph records, asking the listeners to state which they preferred. Fifty-nine per cent concurred with "critics," who, he said, had liked one or the other, and ninety-six per cent did not realize that the recordings were identical.

Water must be added to certain antifreeze materials to keep them from freezing. For example, pure ethylene glycol solidifies at 10 degrees F. above zero, while a 50-50 mixture solidifies at 40 degrees below zero. Pure glycerin freezes at about 60 above zero, while a 70 per cent glycerin and 30 per cent water mixture freezes at about 34 below zero.—*By W. J. Arthur, Charleston, West Virginia.*

The largest pari-mutuel pay-off in the history of American horse racing was won by a poolroom proprietor in Anna, Illinois, on August 14, 1939, when he placed a daily double $2 bet on "Merry Caroline" and "Joy Bet," running at Washington Park in Chicago, and received the whole pool, which amounted to $10,772.

Among the many slang and colloquial words and phrases that originated in England and were in common use long before the birth of the United States are: Beat it, booze, frisk, grub, gyp, hick, kid, lousy, mammy, mob, mooch and racket.

As there are twenty-nine different-sized teaspoons in use in this country, few of which hold an exact medicinal dosage of one eighth of an ounce or one dram, a true medicinal teaspoon will soon be supplied free with each prescription by all American druggists.

Cary, Katharine and Jimmy

are three jolly chums from P-H-I-L-A-D-E-L-P-H-I-A

A blue-blooded heiress (spirited, sporting, scandalizing) gets herself engaged to a self-made stuffed shirt (pompous, petty and prudish)! When she sets out to deflate him, the feathers fly! You'll love the way Katharine Hepburn bowls him over.

Besides the stuffed shirt, there are two other fellows—they both think Katharine is rare, reckless and racy. Cary Grant is the ex-husband who's crazy about removing the 'ex' and Jimmy Stewart is a reporter who hates his assignment but loves the subject of it!

Champagne flows... moonlight beams... and things look pretty romantic to Katharine and Jimmy around midnight! They look pretty suspicious to a couple of other fellows but the whole scene will be a laughing matter to you!

It's anyone's guess who's going to meet Katharine and the parson at the finish line! But it's a fast and racy story to the amazing end! (No wonder the play rocked and shocked Broadway for a solid year.)

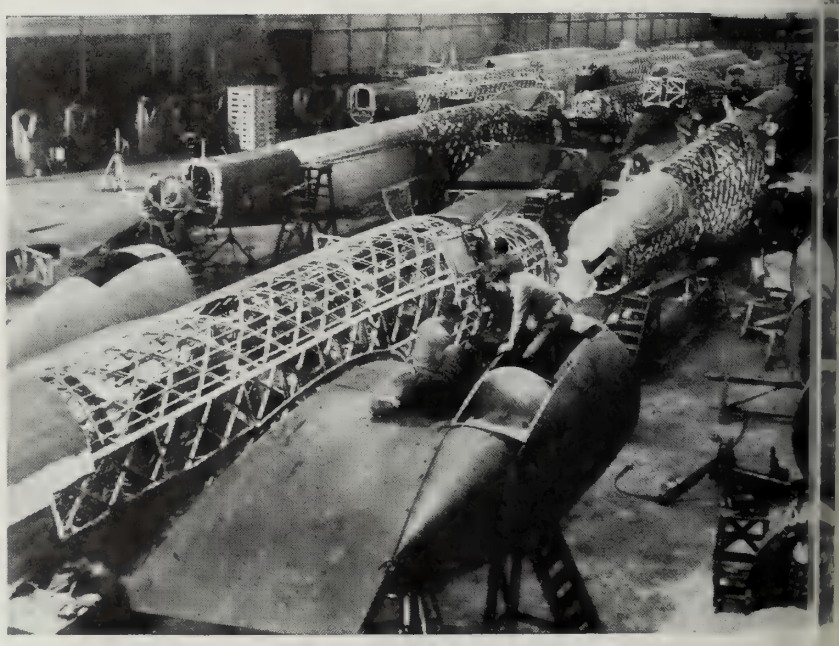
Wing Talk

TWO of our greatest natural resource assets for air defense are being neglected: spruce and lakes. In the Pacific Northwest, and in southeastern Alaska, crowding down the shaggy mountainsides for hundreds of miles along the shores of the Inside Passage, are boundless forests of tall Sitka or western spruce. It is straight-grained, light and strong—the best all-round wood material for airplane rib and spar work. Now that all of us want to see our skies blackened with American planes in a big hurry, aviation engineers are contending out loud again that "wood-and-fabric" planes can be made as strong as those of metal alloys for all except the highest-performance ships, and treated to be no more combustible. There is a heat point where dural, the aluminum alloy most used in planes, will burn like film.

Widespread devotion to all-metal construction grew here at least partly because of the necessity of "selling" the air. In the first years of plane travel horror of the idea of fire aloft, or of parts breaking off, were serious deterrents to public acceptance. To the average person without technical knowledge, metal is a symbol of strength and noninflammability. The engineer knows there are qualifications. Anyhow, air safety really came with government regulation, federal airways, businesslike operations and responsible personnel—so that today it makes no difference to your expectation of life whether the planes you travel in are made of cast-iron or tissue paper.

There was another factor in the swing to all-metal. The industry was engaged in the elusive chase of the ship that would be "stamped out" in a few big chunks. Plastics may bring that time-and-labor-saving process before this war is over. At present, however, manufacturing economies remain in a toss-up between the number of man-hours required for riveting alloy sheet skins and man-and-woman hours for stretching, taping, sewing and doping wing fabric.

In Europe wood-and-fabric was never so completely sidetracked. The Germans never made the mistake of becoming addicted to but one general construction type in either planes or engines. The Wellington bomber is among British ships using wood-and-fabric. Pictures recently observed of the famous Hurricane pursuit assembl ine reveal wood ribbing and sparring. st- moment advice, however, is that ng- land is now going all-metal s ply because her aviation wood reserves ive run out.



The argument between "w-f" nd "a-m" runs along many scientific ays in which your reporter can't guide ou hear about "specific gravity" (s ace wins), and "effective strength in m- pression" (aluminum wins). . out physical characteristics, splinterin de- terioration, longevity and such t ags. Much of this discussion, now say ers and engineers alike, has been i ali- dated by the European war's demo ra- tion that in the application of air rce the life of the airplane, a compara ely inexpensive military weapon, shou not be considered.

From this side line it seems: tal construction has great merits. V od- and-fabric has merits, too—certain for all plane types in lower-speed bra ets. And the designers of your country ky armadas feel that, quality being a ot- able, in this emergency need of *qua ty,* both types should be exploited. M an- while, the world's greatest source ine spruce, owned by us, stands vir lly uncut.

Our foremost plants for the r hu- facture of pursuits, bombers and ns- ports are wholly committed a no-longer-necessary "sales" pren e— and, what is more binding pract ily machined and tooled only for it. V od- and-fabric scarcely persists with u ex- cept for gliders and light planes Not the least danger, mourned by aer au- tical engineers, is that this coun is threatened with complete loss its once great and outstanding skill the art of airplane woodworking.

Lakes, next week.

WE'RE great for reversing thin In the last war the famous L rty motor of Packard—miracle of it ay. and best for many years after 1918 was block-mounted on trucks and dri to the top of Pike's Peak for tests der altitude conditions. Wood and fabric go into Britain's Wellington Bombers

What six Life Insurance Presidents say about *Air Travel*

MR. FRAZAR B. WILDE, *President, Connecticut General Life Insurance Company, Hartford:*

"Commercial airline passengers are good life insurance risks. Connecticut General was a pioneer in granting them full coverage at standard rates. We place no restrictions upon air travelers using the scheduled airlines of the nation."

MR. LEWIS W. DOUGLAS, *President, The Mutual Life Insurance Company of New York:*

"In recognition of the splendid record which commercial Air Transportation has achieved, we have removed all restrictions on life insurance coverage on passengers traveling on established U. S. flag airlines throughout the entire Western Hemisphere."

MR. A. N. KEMP, *President, Pacific Mutual Life Insurance Company, Los Angeles:*

"Accepting the accomplished fact of the security, comfort and dependability of the nation's scheduled airlines, we have removed all restrictions on policyholding passengers flying within the United States."

MR. JAMES A. FULTON, *President, Home Life Insurance Company, New York:*

"In 1866, The Home Life was the first Company to remove all policy restrictions as to ground travel. Now we are happy to be among the first to grant standard insurance to those who fly as fare-paying passengers on scheduled airlines in the United States."

MR. F. W. HUBBELL, *President, Equitable Life Insurance Company of Iowa, Des Moines:*

"We congratulate the Air Transport Industry on its record of efficiency—and in doing so, remove all restrictions on coverage of air passengers of these carriers in the United States, placing them in the same class as those using other forms of transport."

MR. JOHN A. STEVENSON, *President, The Penn Mutual Life Insurance Company, Philadelphia:*

"We have followed with interest the remarkable advances in safety made by the airlines during the past decade. Consequently, we are eliminating extra premiums in policies on fare-paying passengers flying on scheduled airlines within the United States."

We're in the Flying 40's!

Over 3 million passengers flew more than a billion passenger miles in the past year; nearly 4 million will travel a far greater total of miles by air in 1941!

This is dramatic evidence of the essential place the airlines now occupy in the nation's transportation system.

But the highest recognition that any public carrier can receive for its record of efficiency and dependability is expressed by the life insurance executives whose portraits and statements of company policy are shown above.

Make *your* next business or pleasure trip by air and discover for yourself why millions now say—*It Pays to Fly!*

Write for the free illustrated booklet which tells the fascinating story of this nation's great Air Transport system.

AIR TRANSPORT ASSOCIATION
Room 735 Field Building, Chicago, Ill.

Ask Your Travel Agent. It's *easy* to buy an air ticket to any point on the domestic or international airlines. Simply call any Travel Bureau, Hotel Transportation Desk, or local Airline Office, for schedules and fares or general information.

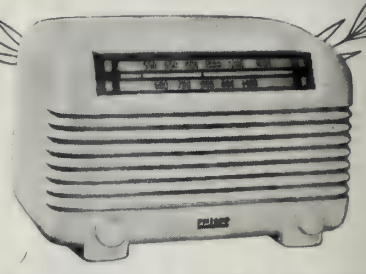
PHILCO

brings you recorded music

A new kind of Radio-Phonograph

NO NEEDLES TO CHANGE!
RECORDS LAST TEN TIMES LONGER!
NEW PURITY OF TONE!

The Philco *Photo-Electric* Radio-Phonograph is the *new sensation* in the world of recorded music! Only Philco brings you the amazing *"Beam of Light"* principle of record reproduction . . . an exclusive invention that adds new thrills, new and greater delights to the enjoyment of your favorite records. The pointed, *scraping* needle is gone! In the new Philco Photo-Electric Radio-Phonograph, a rounded jewel that *never needs changing* floats over the record and reflects the music on a beam of light from a tiny mirror to a photo-electric cell. It releases overtones of beauty long hidden in your records which you hear for the first time. Surface noise no longer annoys you. And record life is increased *by ten times!*



And, only Philco gives you the TILT-FRONT CABINET. No lid to lift . . . no dark, unhandy compartments. Simply tilt forward the grille, place your records and tilt it back again.

All these new joys, in addition to startling improvements in radio reception, are yours *only* in a Philco Photo-Electric Radio-Phonograph.

HOME RECORDING is *optional equipment* with every Philco Photo-Electric Radio-Phonograph. Make your own records at home; record family voices and events, radio programs, etc.

PHILCO 608 P Radio-Phonograph *illustrated above*, brings you these new Philco achievements at a popular price. Automatic Record Changer, powerful 9-tube circuit, amazing American and Foreign radio reception with new kind of Overseas Wave-Band. Handsome cabinet of hand-rubbed Walnut. *Only $12.95 down.*

TED BY RONALD McLEOD

te Plunkett didn't know much u patriotism but he was the best li Andy Jackson had when he g the Battle of New Orleans

MISTER WHITLOCK PLUNKETT'S gaunt, lined cheek brushed the cherry stock of his rifle gun and he moved the long octagon barrel a bit to the right until he got the bead he wanted, his silver sight dead center on the Britisher's chest, two inches above the crossplate, at fair buck range.

He squeezed his whole trigger hand, exerting a quarter of a pound of pressure, and a splinter of fire flashed in the pan. His rifle cracked. The enemy skirmisher jerked erect, then lurched, clutching at a tree trunk as he fell. Mister Plunkett ducked and darted twenty paces to the left and the spot where he had been was mowed by fire.

The somber expression in Mister Plunkett's cold, gray eyes never changed. His eyes, shadowed by bushy brows, were bloodshot from fatigue and were swollen puffy from powder. His scraggly brows and long hair were shot with silver and he looked like a determined undertaker out making business. He had killed a man, a British sharpshooter, one of the King's Rifles. He knew the soldier was a sharpshooter because he had worn a jacket of Sherwood green, a custom handed down from the days of Robin Hood. The Green Jackets were harder to hit than the Red Coats and were better men in the woods than their musket brothers.

Mister Plunkett measured a charge of Eagle fine superfine grain powder with his eye and began reloading. He spread a greasy rifle patch over the muzzle of his gun, selected a ball from the supply in his mouth and shoved it down the barrel with his hickory ramrod. He tapped the ball three times to set it just so and then he primed with fine, fine superfine.

He looked first to the east, studying the swamp over there, and then the stunted cypress woods in which he was hiding. Then he glanced to the west, across the cane stubble of Chalmette, along the two ditches the Americans had dug and down Rodriquez Canal that ran from the swamp to the Mississippi River. He counted again the eight batteries along the ramparts, an embankment just behind the canal two thirds of a mile long. The ramparts were of mud, fence rails, barrel staves and cypress boughs, five to eight feet high and four to ten feet thick. They had built the ramparts in two weeks, taking two days off to repel the British. They had tried cotton bales, but they caught fire too easily. Gumbo mud was better.

It was a right fancy job of work, Mister Plunkett thought. He hadn't known Southerners had enough get-up-and-get to do so much work in such a hurry.

He measured the field again. Must be nigh eight hundred yards from the woods to the river. Mighty little space for an army to work in. The ditches petered out just before they reached the woods and Mister Plunkett's outpost. He wondered why Andy Jackson hadn't dug the ditches into the woods. Perhaps it was a trap. The British might mass there to avoid the ditches. But they still must cross the canal

The Royal Scots Fusiliers and the Forty-third Monmouthshires charged, with General Pakenham leading them

and ramparts. It was a needle's eye. And it'd be easier for a camel to go through a needle's eye. . . .

He glanced through the cypress at the body of the Green Jacket and, confident that he was safe for the minute, propped his rifle against a tree and took a thong of whitleather from around his neck. There were twelve knots in the thong. Mister Plunkett tied the thirteenth and muttered, "Thirteen down and six to go."

Mister Plunkett, No. 1 Rifleman of half-breed Pierre Jugeat's Choctaws, hadn't traveled alone from Eastport, District of Maine, to Chalmette to defend New Orleans because he loved New Orleans. He didn't give a cobbler's curse about the town. He wasn't particularly interested in the causes of the War of 1812 or in the results. Mister Plunkett was fighting because he had a grudge and had made a vow. He didn't give a whoop about preservation of the United States. He thought the states a bunch of brawling, poor little republics that were always hollering and mouthing about liberty, justice and sovereignty. Mister Plunkett didn't understand all those big trick words and wanted no truck with all that talk about liberty and brotherhood. Slick words. Politicians' words.

THE Down Easterner never wasted a word. He'd as lief waste a rifle ball. He wanted only to be left alone and because he'd always had so much liberty he never associated freedom with the joy of being left alone and never reasoned that a man might have to fight for the right to be left alone. Down-East they said he was stubborn, cantankerous and not too bright. Not batty or addlepated, but just a mite thick. Mister Plunkett didn't know much about most things, but he knew the British owed him a debt of nineteen prize hides and he had traveled slap-dab across the whole United States to collect.

His hides were stored in Eastport when the British took the town. They hadn't ought to have done that. Many New Englanders favored the British and didn't want any part of Mr. Madison's war. But the Red Coats shouldn't have moved in like that and acted so high and mighty. It peeved some of the folks.

Mister Plunkett was in the woods running his trap lines when a covey of marines stole a keg of rum and then went hellin'. They fired the warehouse where Mister Plunkett's hides were, but they wouldn't burn, being green. So the marines shot them full of holes. It was sinful waste. That's what made Mister Plunkett so mad. He would have been fist-fighting mad if they had stolen his hides, but to shoot them full of holes—

They were no good to anybody now and the wanton waste made Mister

Plunkett killing-mad, which is to be distinguished from Mister Plunkett's fist-fighting and gouging mood. But he kept his mouth shut until he got a load of Demerara rum. Then he made dire threats against the British.

Some of the boys joshed him and asked him what he aimed to do about his hides and Mister Plunkett said, "They shot holes in my hides, so I aim to shoot holes in theirs."

"Nineteen of 'em?" somebody asked.

"No more, no less. Where be they?"

"They're standing for Boston. The nabobs got the marines out of town after they cut up so unmoderatelike."

Mister Plunkett took one last swallow of rum and got his gun. He had never been farther than fifty miles from Eastport. "I wasn't aiming to go so far, so I better get going. I ain't coming back until I collect. Might take me a few weeks, but I'll be back before long."

He worked his way on a schooner to Cape Cod and walked to Boston. There were no British there, so he continued to New London, thence to New York. Hearing there were Red Coats out in Pennsylvania, he worked his way out there, driving a wagon. He got as far west as Ohio without seeing a Britisher, then headed for Washington City.

THE months rolled by. When Mister Plunkett got broke, which was often, he took odd jobs until he got a stake, then moved on. He found Washington City in ashes and no British. He pushed on to Pensacola where they told him he'd find plenty of British around New Orleans. Mister Plunkett stole a horse, took the Old Spanish Trail and wound up in New Orleans, broke, hungry, disgusted and baffled.

He had no idea exactly where he was or how far he had traveled. When he told folks he was from Maine, they just grinned tolerantly and muttered, "Another drunken flatboatman from Kaintuck. His tongue is so thick he can't talk English."

Mister Plunkett had never dreamed that the United States was so big or that there were so many kinds of races, money, religions and politics in the world. No two men seemed to agree on anything except that they wanted to be left alone to run their brains, hands, hearts, souls and pocketbooks as they slap-dabbed pleased. Mister Plunkett felt the same way about things.

He joined the Mississippi Dragoons to get a square meal. He borrowed a dollar on his horse and pitched the coin onto a big drum. That meant he was volunteering. General Hinds of the Dragoons spotted him at once. He looked too old, too gaunt to stand the hardships of the Dragoons. General Hinds asked his name.

"Whitlock Plunkett."

"Say 'sir' to me!" the general snapped.

Mister Plunkett looked at the general for several seconds, turning the command over in his mind. "That's a moderate request. I'll do it. I'll say 'sir' to you if you'll say 'mister' to me."

General Hinds flushed angrily, then smiled. He had noticed the fine rifle. "Very well, Mister Plunkett. You talk like a Yankee."

"Nope, sir. Yankees are Connecticutters. I'm from Maine."

The general gaped at Mister Plunkett, then whistled. "That's part of Massachusetts. How'd you get so far from home?"

"That's my business, sir. I ain't asking you a string of fool questions."

General Hinds was irked at such insolence and bad manners. Here was a queer one. Andy Jackson h strange critters in his army, bu took the cake. Hinds said, "Y need a rifle like that in the D

"Then I won't stay in the I All I want is to get fair buck nineteen Lobsterbacks."

Hinds wanted him, but for of the army he sent him to Pierr half-French, half-Choctaw ca fifty Flathead scouts and sharp Mister Plunkett smiled for the in months when he saw Juge captain was wearing his red ca tassel. Mister Plunkett liked Some of the woodsmen back ho them.

He liked everything about tl taw scouts except their odor a flat heads. None of them cou English. He liked that, too. \ be pestered with talk. Jugeat m prove his rifle and he transfer the Dragoons to the scouts issued moccasins, buckskins, hawk and a scalping knife. H get a red cap. Only the capta wear one.

Mister Plunkett went to Hinds and asked for a bit leather. It was issued and, gra the favor and warmed by his ration, he told Hinds:

"I ain't good at figures. W whitleather to keep count of t ishers I kill. One knot, one mar

Bit by bit, the soldiers picke Plunkett's story out of him ar oned he was batty. The story Andy Jackson. He hadn't seen Plunkett and had formed his from reports. For some reason, Jackson got Mister Plunkett's fir of Whitlock confused with whi and called him, "Mister Whitl He became a sort of symbol to and the commander often told yo cruits, "Work hard and some da be tough as Mister Whitleather

MISTER PLUNKETT and th taws were sent below New in December and began skir right off while Jackson tried to o the British, fortify his lines, kee in New Orleans, pacify the W partment, train an army, quell re cure his wound, watch his cra gestion and write his wife with able regularity.

The first knot in Mister Pl thong was tied the night of De twenty-third in a fight near V plantation. He and a Choctaw two Red Coats in a thicket and Plunkett shot his man in the hea Choctaw used his tomahawk.

He bagged two pickets on Ch day and two Highlanders in a battle on the twenty-eighth. F

(Continued on page 59)

Mister Plunkett fired, but he wasn't sure he got a man. He moved his gun and brought it to bear on a Scotsman

Dorothy Comingore was desperate for a good movie part and Orson Welles wanted a leading lady who could act. You have a right to expect something from that combination of circumstances

The lady above used to be Linda Winters when she was doing bits for Paramount. Now she's Dorothy Comingore—the gal on whom Orson Welles is betting in his attempt to prove he can make movies too

tent to be entertained by one of the great directors of our time. It ended with Welles escorting her to her door and departing with the words:

"God bless you, my child."

This rather startled her after her previous knowledge of Hollywood swains and she was no better pleased when the pictures of her night with the great man appeared in the public prints.

"They were captioned merely: 'Mr. and Mrs. Orson Welles at Chasen's.'" says Comingore sadly.

Welles promptly forgot her but Drake, his press agent, was pleased with the outcome of the evening, no scandals, no insults, no skirmishes. When Welles, after several centuries of preparations for pictures that were never made, finally decided on Citizen Kane, Drake kept nagging him about the Winters-Comingore lady. Welles made tests of dozens of important Hollywood stars and then finally reached Comingore. At this juncture she was engaged in a form of slavery known as making "quickies" —six days' work for a flat fee of $150 and no monkeyshines about wages and hours. Degradation could go no lower and she was not kidding herself when she showed up before Welles. However,

If Mori ever gets back to Japan he will probably tell his wife about the Chinese girl. She was pretty and very gentle—but she was not of importance in warfare

MORI wasn't sure when he first noticed the Chinese woman. She was over on the dike two paddies away and a little ahead of him. She was carrying something in both arms: not a large something, but small and wrapped in straw, as though she were cradling it from the sun.

She looked over toward him, walked on and then looked sideways again. She was too far away for him to see her face, but her body was young and slim in the blue pantaloons of a farming woman.

Mori stepped down from the gap in the village wall. His heavy soldier boots sank into the rubble of powdered bricks and shattered tiles spreading out into the fields like a dirty fan. That is, what was left of the fields. He grunted when he thought of these Chinese farmers daring to resist steel with only a wall of mud and sod.

Mori wasn't in a hurry. He walked slowly as a man does when he is lonesome and living half on memory . . . fighting, pushing on, pushing on always, men falling, other men coming, old ones, old, old . . . and then young ones from Hokkaido, from Kyushu, but never from Miyagi. Never the comforting sibilance of the Miyagi tongue. . . .

Mori came to the cart road and climbed up. It was a causeway winding through the paddies. Dry paddies they were now, growing only brown clods for crops these two years since the Japanese had come. Earth that should have been green with spring still had the color of winter. And though it was planting time and the white rice birds fluttered in the sky, no man's hand put rice in the earth.

Mori saw the Chinese woman was walking faster now on the dike. She still looked s ways at him to see what he would do. walked on the road toward the place where would come on it, and it was like walkin cushions, the yellow dust was so thick. stumbled, and yellow dust filled the air smoke. Mori hated it, this alien dust. He h yellow hills, yellow fields and yellow earth.

He closed his eyes and all he could see green—pine green, rice green, moss green the green of sea water in the cove below house. He thought of wisteria, of wild gr and of the white incense lilies that bow in wind like polite ghosts.

And when he thought of these things thought of his wife . . . so young, sweetly s missive. Mori groaned. It was two years si he had seen his wife and the walls of his ho Two years since he had seen the boy who his son.

He opened his eyes and there was the C nese woman, a little nearer now, for the d she was walking converged to meet the r Mori could see ahead where they joined. was there where the road wound behind first small hill. It wasn't far. He walked a tle faster. The woman turned and saw he quickened his pace. She ran a few steps, then eased to the same pace as his. She still ahead, but frightened now that she k he was following her.

MORI looked back toward the village wh the barracks were. No one moved on little road behind him. No one was watchi It wasn't like the main road across the val that cut through the mountains into the val beyond. That was filled with people. This v just a handcart road that went as far as foothills and lost itself in narrow ravines.

Mori cupped his hands over his eyes to st at the main road. Big vans, ammunition va moving there: three, four, five of them. . . . T last battle? Would this be it? Mori was afr to hope. For two years the officers had pro ised each battle would be the last.

Up ahead the woman rounded low bush and peeked back at him. Mori broke into jog. She dodged behind the next bush, ran the next, and around (*Continued on page* 5

Corporal of Horse Hawes d back to his old job—they say st chauffeur in the world. His title may seem a bit incongruous but again they say that Hawes has a way with horses, too.

Beside him was Chief Inspector Henry Cameron of Scotland Yard, tall, distinguished, with a bit of a Herbert Marshall look about him; the best pistol shot in England. If you looked closely, as I did, you'd notice a slight bulge under the left side of his well-tailored coat. Herbert Morrison—small, chubby, active, seeing more with his one eye than most men see with two, sat in the back and beside him sat His Majesty King George the Sixth.

Smoke rose sullenly from the ruins of what two days ago had been a large warehouse. The royal car stopped and my car behind it stopped too. Soldiers, demolition workers, policemen gasped in amazement. They hadn't known that the King was to visit Southampton today. The King smiled a greeting and then talked to them. He didn't patronize them with fatuous comments. He asked them briskly about the tools they were using—did they have enough? Was the mobile canteen feeding them all right? How was the drinking water?

The guns began. Then we heard the drone of an airplane. The guns increased their tempo. The blue of the sky was dotted with ugly puffs where the shells were bursting. There was only one German airplane. It wasn't more than 8,000 feet up.

The black puffs encircled it. It was so low that even I could tell by its low, sharply tapered wings that it was a Heinkel 111, used both for reconnaissance work and for bombing. It came closer and now it was directly overhead. The King gave it one cursory, disinterested glance and then resumed his conversation with the workmen. The King wore no tin hat. The German aircraft above might have been a harmless gull from the near-by Atlantic. The bits of shrapnel falling from the exploding shells might have been gentle raindrops. Citizens of London take their German airplanes and their shrapnel very casually.

The People's King

There was a time when George the Sixth was only the King of England. As such he was given the respect and honor due to his high office. Nothing more. At public functions when someone called for the traditional "Three cheers for His Majesty" the cheers were given willingly enough. It is different now.

The eminence of his position and the dignity of that office necessarily isolates the King from his people. In the past they themselves have wanted it that way. He could never be one of them. He was a symbol rather than a man. Like the Houses of Parliament or St. Paul's Cathedral or the Tower, the King was a reminder of the glory of the past and like them too he was a guarantee that the future would be secure. But then the war came.

The gossip of servants spreads like quicksilver on a rock. Palace attendants whispered that His Majesty obeyed the rationing rules with the same meticulous care as did the lowliest charwoman. During those first horrible days of the night air raids, when the East End was clawed so badly, bewildered citizens whose homes had fallen about them during the night would be surprised by an early-morning visit from both the King and Queen. They expressed more than their sympathy. They were full of practical ideas. They stimulated the formation of mobile canteens. Then Buckingham Palace was bombed. The King took it as every citizen of London takes it. Gradually the King became a human being and none the less King for that. People began to shake their heads thoughtfully and say, "Now that's a good man."

When the King is in London the flag flies from Buckingham Palace. People began to notice that the flag was always there. They began to gather outside the gates to get a glimpse of him when he drove out—always in that old-fashioned limousine with large glass windows. In London we shy away from automobiles that have too much glass. But not George Windsor, citizen of London. He likes the car, and, after all, he did go through the Battle of Jutland. The noise of bombs and guns is nothing to bother an old navy man.

If you want to know how the people of England feel about their King, come along with me and spend a whole day with him. Southampton was hit two nights in succession. The King has

THE papers and the movie magazines and the radio say that Charles Bouvain is the mos young actor in Hollywood. I read where he football star at some university. In a magazine a about him that he studied art in Paris, France, wanted to be a painter.

Then one night, over a slug of bourbon in the showed the old man a bunch of pictures in a weekl which showed this same Charles Bouvain doing a l in and outside a big ranch house on a hill lookin Hollywood. It showed this Bouvain holding a te up in the air with a big smile on his face. Then him in a big blue-tiled swimming pool with a co girls in swimming suits that looked like they belonged to their little sisters. Then there was a Bouvain all dressed up in an army uniform for a playing in a moving picture.

The old man studied the pictures through Then he said, "Fellah kinda looks like Chuck, don

"It not only looks like Chuck," I said, "but it's that picture is showin' at the Stadium Theater night."

That's how it started. The next night me a man and Mary Brown went to the Stadium and sa ture, and Chuck was in it. We all three identifi right. It said Charles Bouvain on the screen, but man it was his son, Chuck Boone; to me it was m brother, and to Mary Brown it was a guy she used four years ago.

Mary and I drove the old man home and he bottle. "That's him," he said. "He's prettier, but t He mixed three with ice and ginger ale and I saw I hers down like it was champagne. She was in dream. "I can hardly believe it's really him," she in the movies!"

"Why not?" the old man said, "ain't he bee every other kind of trouble?"

"Well," I said, and it was a mistake. "The him was four years ago and he was climbing on freight and he was sure in a hurry."

The old man grinned and drank. "He oughta said, "with Mary's old man here right on his tail w sixteen-gauge like Chuck was a clay pigeon."

I KNEW I never should have brought that sub knew it the way she looked at me and then at th But the old man kept right on. "I don't think your have nicked him at thirty paces," he said to her.

Mary stood up slowly. I guessed what was c and stared down into my glass. "I've said it a times," she said, "but I'll say it just once more. I left the dance that night at one o'clock. We did in the storm. Everybody knows there *was* a storm bad it was. The car *did* die on us, and we *did* lake cabin, and we *did* have to stay there till mor that is *all* that happened."

I hoped the old man would leave it right the didn't. Women never scared him much. "Sure, said, "keep your feathers down. What beats Chuck run off. Shotgun or no shotgun, I'da stayed ried up with you."

It was a slick flattery, but it didn't cool her d just turned to me with a terrible little smile. "A she said, "I can't see how you can talk about Chuck he went out and amounted to something. He here in this corny little town and turn into a mechanic!"

The old man chuckled and said, *(Continued o*

They've Got the Flu!

By J. D. Ratcliff

UPSA THOMAS

No flu for this ferret despite the virus going directly into his nostrils. The newly developed vaccine will protect him

The elusive influenza bug, so small no microscope has ever detected it, seems to have met its match at last in a promising new vaccine

THE last epidemic of killing flu made grim history when it swept the earth in 1918. The next, now due, may leave a different record. For it will furnish a proving ground for a new vaccine; a vaccine that appears capable of whipping this 20th-century counterpart of the Middle Age plagues. It was discovered last spring by the Rockefeller Foundation in New York. The vaccine came into being only after a superb accident had happened; one of those accidents that come along occasionally to give a researcher a hand-up over an apparently insurmountable problem. But let's get to the scene of action.

Dr. Frank L. Horsfall, Jr.—a medical man devoting his life to research—peered through the glass door of a ferret cage. The ferret stared back, murder in its eyes. This wasn't right. The wretched animal should have had watery eyes and a runny nose; aching muscles and fever. It should have been stretched on the cage floor, sick with flu.

Horsfall, thirty-four, dark-haired, good-looking, pleasant, had infected the animal. Hands protected by heavy leather gloves, he had held up the flashing, writhing bundle of sharp claws and teeth, and carefully dropped influenza virus into its nostrils. By all the rules it should have been miserably, wretchedly, beautifully sick within a few days. But it wasn't. Either there had been a bad slip-up or something momentous had happened.

Momentous was the answer. That healthy ferret with the evil eye was the tip-off on the new vaccine. It is quite possible that this shot-in-the-arm stuff may soon be saving London's populace from something more dangerous than bombs. There is every chance that it holds the solution to history's greatest murder mystery.

William arrett

of a man who spent years waiting for a come to her senses found that he had d two years too long

RATED BY C. C. BEALL

She was having a good time. I didn't let it worry me. She had to learn sometime

THE night that Kinlock fought Steve Russell for the middleweight championship, Julie Carthe most beautiful woman in the

were looking at her when I paher down the aisle to our seats the press section and they kept ing at her after we were settled. was just a few months past nineat night. She was blond, slender npact, with the bluest eyes in the nd a smile like a tooth-paste ad, ore human. She was a show girl looked like a show girl, but she e only woman I ever met who ook like that and still make you take her home for keeps. It was t night at the fights and she was wide-eyed at the ring, her fincking at my sleeve. I put my ver hers.

prelim was over and some peonew came around to be introA lot of people I just vaguely bered came around, too, and ot a sparkle to her like a rose rain. She did not believe that eople were coming around just to hands with me and she would en really shocked if she learned me of them really did. After all, n the champ myself and I had a ng.

the ring they were getting ready main go and the announcer introducing the celebrities: Jack ey, Gene Tunney, Jimmy Brad-Barney Ross and the usual gang hamps that you find at all the big Then they called me.

eezed Julie's hand. "This is me,

ooked at me kind of startled and e announcer was giving it to "Folks, that great champion of a great division—Jimmy, the Great Dane. . . ."

I was standing up and then I was climbing into the ring and the fans were tearing the house down. They remembered all right and it made my heart swell up a bit to know that Julie was down there listening to them go nuts over me. I took my bow and turned to the corner where Steve Russell was waiting for the gong.

STEVE was all tense and serious as a fighter always is before the gong but he gave me a half-smile and I shook his gloved hand. The last time we met in this ring, he nearly tore my head off with a left hand, but he was a clean boy and I liked him. He still had the championship that he took away from me and I was pulling for him to keep it.

"Good luck, Kid," I told him.

He nodded his head. "Thanks, Jimmy."

That was that and I crossed to the other corner. I did not know Earl Kinlock and from what I had heard and seen of him, I did not like him.

He had come out of the steel mills and some shanty town in Pennsylvania, a rough, tough, anything-goes type of mauler who had gone slick-haired and snaky the moment he got ten bucks in his pocket. He was looking at me cold-eyed as I approached, but as the ex-champ, I had to be polite. I stuck my hand out. He did not even look at my hand and he tossed the words at me before I could get my mouth open.

"Scram," he said. "You ain't wishing me a thing—and I'm going to bat that other old has-been out in t'ree rounds."

"You're talking out of your class, mug," I told him, and I left him on that. Inside I was boiling mad. I hated the hide off young upstarts who tossed their weight around and showed a lot of disrespect for the crown that they were trying to win.

By the time that I got back to my seat, though, I had cooled off. Julie was looking at the ring and she only flicked her eyes briefly to me. She didn't mention the hand that the crowd gave me.

"I'm betting on the young one," she said. "Who are you for?"

THAT "young one" crack stopped me for a second. After all, Steve hadn't hit thirty yet. Then I realized that Kinlock's twenty-four or five put him a lot closer to Julie in age and that she would naturally think that way.

"He hasn't got a chance," I said. "The Champ will ruin him."

She had her chin in the palm of her hand and her eyes slid sidewise again so that she was looking at me out of the corners. "What makes you so sure?"

The fighters were up in the center getting their instructions. I shrugged. "Steve Russell is the lad that took n

measure," I said; "the only one that ever did. I ought to know what he can do. He had his left hand in my face all evening."

Julie's voice was like a kid's. "That was so long ago," she said.

She said it so innocently that it wasn't a crack. "So long ago!" It had been two years. I had been champion for five. So what? So, if I tried to tell her about the night I won the title from Monk Gorman, I would be talking about the days when she was playing hopscotch and begging pennies for lollipops. If she was capable of thinking of such a thing, she would probably imagine me as being born in some place surrounded by Indians—and I could tell her that my folks knew Paul Revere without even making her eyebrows lift. Me and the early settlers and John L. Sullivan! I was thirty-two years old.

THE bell rang and they came gliding out. It is always pretty to see two good men come out for the first, especially if you've been in there yourself and know what it is all about. They came out very fast and Steve looked as good as he did on the night that he took me. He came right to his man and shot that left.

There never was a finer straight left in the business, but this Kinlock just faded away from it, crouched low and fired both barrels. He threw the right first and landed it under the heart, hooking with his left for the jaw.

It was all wrong and a sucker attack but he landed and Steve Russell fell into him, holding on for a moment and tying him up. Seventy-five per cent of the crowd did not know what had happened, or that anything had happened. It had been fast action and a crowd never really settles down to seeing anything until the first round is nearly over. It is different with a fighter who is watching a fight. I saw plenty.

Steve stepped away and his left flicked out. He landed three straight jabs as he retreated and then he stopped retreating and hooked. His hook was short and Kinlock moved in close and punched for the body. Kinlock was nice and loose and he had a weave that gave him leverage when he hooked. Steve was shooting his left like a drill and it looked pretty to the crowd, but he was mostly landing high—and it wasn't the same left that had taken my head off. Not by a million miles was it the same left!

The bell rang and the boys went back to their corners. Neither of them looked marked up and Steve walked with a cocky strut, but I looked at his waistline and his stomach wasn't taut the way it should be. Julie turned to me excitedly.

"I'm still betting on the young one," she said. "What's his name again?"

"It's Kinlock," I told her, "Earl Kinlock."

This time I did not argue with her about who was going to win.

Steve came out for the second with a burst of speed. He went right after Kinlock and drove him back into the ropes. He had his right cocked but he was doing his business with the left and Kinlock went into retreat, hooking for the body and not looking any too good to the crowd. Kinlock's nose was red and he did not seem to be able to get away from that jab any more than I was able to get away from it two years ago—but I knew different. I could have got away from Steve Russell's jab tonight. Watching Kinlock, I felt that *he* could. He wasn't flustered. His eyes had a calculating look. He was deliberately taking that left—and he wasn't giving Steve a single opening for the right.

Then it happened. Steve was still chasing him, still driving him back, but his left slowed just a trifle. He put more effort into shooting it. He dropped it just a shade. When he did, Earl Kinlock crossed his right.

I saw Steve's legs buckle and Kinlock was bulling into him. The boy from the steel mills was suddenly throwing leather from all angles. When Steve covered his head, Kinlock whipped hooks into his body and Steve had to grab him and hold. At the bell they were exchanging punches along the ropes and nobody had been on the floor, but the story of that fight had been written.

Steve lasted just two rounds more. He was on the floor in the fourth and in the fifth he went down twice. The second time he went down on his face and he did not even quiver when the referee threw the count at him.

Julie gripped my arm and shook it. Her voice was pitched high. "He's fascinating," she said. "Perfectly fascinating. He's so good-looking and so savage. . . ."

I swallowed hard and I could not think of a comeback. We had been watching the same fight, but she had seen a superman hammer his way to the championship of the world—and all I had seen was a so-so slugger who had slapped over the shell of a once-great fighter.

I helped her on with her coat but she did not have any eyes for me.

I took her by the arm but, before I could get her away, Hymie Foutz, who was one of Sam Menton's stooges, came barging through the crowd. "Hey, Jimmy," he said, "don't run away. Sam's throwing a party for the champ. He wants you should come. Bring the girl friend, you hear!"

He was on his way after more guests before I could answer him and tell him "No." Julie was shaking my arm. "Who is Sam?" she said.

"He's the promoter," I said. "Let's go."

"But the party. We're invited."

"Nix. It will be a brawl. I'll take you to a roof garden."

Her full lips parted a little over white teeth. "I want to go to the party," she said.

Well, that's the way it was and there wasn't anything I could do about it.

"Okay, kid," I said, "if you want to go, we'll go. But it will be a brawl."

Everybody has seen, or read about penthouses, but there never was a penthouse like Sam Menton's. It was as big as a railroad station and looked like you'd imagine a Turkish harem. It was dazzling white and there were palm trees spotted around, a hidden orchestra and several bars. Julie gasped when she saw it and she never quite got her breath back all evening. Everybody was there who did not amount to much.

TO JULIE this was a gathering of important people, but it was seven years back to the night when I won the middleweight championship and I had seen a lot of people playing the same roles in those seven years. Most of these dressed-up tramps were on the make; if they did not try to borrow money from a man who wasn't used to having any, they would try to get it away from him in "deals." They had taken a lot of mine. Julie, of course, couldn't know.

She was having a good time for the first half-hour or so. She took a drink even when I wouldn't, but if that was her idea of excitement I did not let it worry me. She had to learn some time. The mugs swarmed around her like flies around honey, but I could understand that, too. She was the most gorgeous thing that had ever stepped into Sam Menton's hippodrome of a house and they could not overlook her. Then Sam Menton came tooting over with Earl Kinlock.

"Hey, Champ," he yelled, "want you to meet the new champ. Grand boy.

(Continued on page 53)

OUR NEW ARMY

Private Lewis Schooley checked in at Fort Sam Houston, San Antonio, in cowboy rig. He had to wait for regulation shoes, meanwhile learning that high-heeled boots may be fine for riding but not for drill

No more spud-peeling for the lowly K.P. squad. Sergeant Williams and First Lieut. Semrod inspect the mechanical potato peeler at Fort Sam Houston. There's another gadget at this camp that slices spuds, too

Here, Collier's correspondents start to tell you what is going on in the camps in which our new fighting force of draftees and volunteers is being trained. Not all sections will be covered every time. In this issue there are reports from the South, the Southwest, the Pacific Northwest and the Pacific Southwest. Future reports will come from other sections in rotation.

First reports from Collier's correspondents give this general picture:

As the year started, housing of troops was getting better, although thousands still were living in tents heated by primitive stoves. And there was a lot of mud. The general reaction seemed to be: "Well, war's nicnic, anyway." Of actual suffering seemed little.

Food? Generally good. Reporters wrote, several instances, they preferred Army food to that offered in near-by restaurants. There was some complaint about "cafeteria service," which forced men to line up, in bad weather, for meals.

Army routine wasn't hard on the men although they still honed to get the guy who sets the bugler up. Army instructors were breaking in men by easy stages, toughening them, building them up. Sick men were hustled into hospitals and good care; they complained that, they got in, it was hard to get out—that medicos would not release them like were completely well.

Some new men, accustomed to unlimited days, thought they should have more time, but a majority accepted the demands of the job cheerfully. Recreation, in part, was getting better organized. Here are some of the high lights of the reports. Others will appear in this issue.

THE SOUTH: Draft Board No. 9, Atlanta, busy classifying questionnaires, suddenly went into executive session. Under "Dependents," a single gentleman of color had listed: "My mistress." Attached was a note: "Gentleman, I have been living with this lady for three years as my lawful wife and I intend to support her and do for her as I would my wife."

Since the draftee had accepted the lady as his wife, in a sworn document, the board accepted her as such, put her boy friend in Class 3—and duly notified the lady that she now had all the privileges of wifehood, including nagging, the right to sue for divorce and collect alimony.

Calm but progressive Albany, in southern Georgia, is getting used to airplanes; near by is a busy air-cadet training school, soon to be expanded to train 225 fliers at a clip. Up to now, the safety record is perfect.

Only near-accident was when a pupil froze to the controls of a plane. This happened at 400 feet and the chief instructor spoke feelingly about it when he came down with the pupil.

"Lucky for me I had my little disconnector along, wasn't it?" he asked, fingering a businesslike blackjack affectionately.

Georgia's Fort McPherson boasts about Frank L. Smith, Birmingham born, an automobile finance man who has the highest I.Q. in camp. He scored close to genius rating. The Camps' Induction Center is very proud of Smith and is keeping him hidden away from generals and the Fourth Corps Area Headquarters, who might be tempted to steal him.

Recently a mess officer was inspecting the food during a meal and asked I. Q. Smith if it was all right.

"Swell," said Draftee Smith.

"Hit shore is," spoke up Draftee Jones, from the mountains of North Georgia, indicating Smith, "this feller just tole me he wanted me to take some of his'n."

I. Q. Smith blushed.

Above Montgomery, Alabama, a pilot on his second solo flight got lost. Having only a one-way radio, he scribbled a note and dropped it into the town, asking the finder to call Maxwell Field and tell of his plight. The field would then locate him by instruments and radio instructions.

A small girl found the note and took it to Fox Henderson of Montgomery. He phoned the field. The field radioed the pilot. The pilot came in safely. The meticulous Air Corps thereupon sent Mr. Henderson an official note of thanks and an offer to pay for the phone call.

"Forget it," said Mr. Henderson.

If you have a friend in training at Camp Blanding and have been worrying because of the camp's reputation as a "little Siberia," you can cheer up. The place is rapidly coming out of the wilderness; it now has bus service to Jacksonville, more conveniences and a good start on an entertainment program.

●

PACIFIC NORTHWEST: At Fort Lewis, the huge camp south of Tacoma, Washington, one of the minor cogs in the machine is Corporal Tuck W. Sherman. Tuck punches holes in the classification cards—holes that signify whether the rookie has had experience as a barber, a teamster or a clerk—so that the new soldier can be put quickly into his proper niche. Corporal Sherman, who has been in the Army eight years, spent two years at Panama, getting tanned and tough. Grabbing his punch and reaching for another card, he announced:

"One punch from me and a guy's whole Army life is changed."

Old line soldiers at Fort Lewis tell you today's new trainees are good. Their explanation is that trainees are drawn from every stratum of society, instead of being "depression soldiers" or "payday soldiers" who often have been undernourished or unsuccessful in civilian life.

Sergt. Walter Hedrick, 3d Division, has served 29 years in the Army and has only the "butt" of a year to complete before retiring to a near-by farm. He fought across Siberia in the World War; was at Vera Cruz, and with Pershing on the Mexican border. Now he's a mess sergeant for trainees. New young men like Wayne Chapman, Port Orford, Oregon; W. H. Craft, Heyburn, Indiana; T. J. Byrd and Ferdinand Boris, of Billings, Montana, serve under him. Of these and others Sergeant Hedrick said:

"These are the best men I've seen in my 29 years. Mind you, you can't be cross with them. You have to be polite. They insist on it. They're gentlemen. But they're out to learn, and you don't have to tell them things twice."

First Sergt. Anton Friedrich, short, slightly bald, and red of neck from standing in the sun, has served 22 years in the Orient with the famed 15th "Can Do" Infantry, guarding the railroad from Tientsin to the sea. He's a professional soldier.

Of trainees, he says:

"You have to cater to them, all right. But they're willing, they're quick, and they'll make good soldiers. In my day, you joined the Army for adventure or something like that. But these young fellows, they've got a different slant. They're serious."

Major Robert G. McNary of Portland, Oregon, in charge of fitting men into the 272 trades and 125 service occupations the Army recognizes, found that most volunteers were teamsters and practically none cooks. One of the trainees said he was a riveter.

Major McNary made him a cook. "If he can't do anything else," said the major, "he can drill holes in doughnuts."

●

THE SOUTHWEST: Brownwood, squatting complacently on a rolling, red, mesquite-clad plain, is Texas' new military capital, the site of Camp Bowie. Six months ago the camp was nothing at all.

Today Brownwood is booming and has broken out with a rash of cheap dance halls and barbecue huts and a nightmare of tourist cabins and hastily built apartments. But the town blows few alcoholic breaths into the Texas sky. Even beer is taboo. The boys in Bowie came up against the "dry county" system and discovered that to buy a bottle of liquor you must first get a prescription, at fifty cents, from a licensed physician.

Rents are high. Five-room plain houses cost about $100 a month. Before the boom the price was $35.

To the San Antonio post come draftees and volunteers from the Texas farm and ranch country.

It's no uncommon sight to see a new man breezing into camp clad in cowboy boots and the traditional ten-gallon hat.

Before Army shoes have been issued or while he's breaking them in, the ranch-country recruit may even do his drilling shod cowboy style.

At the Dodd Field Training Ground near San Antonio, steady rains make a quagmire of new roads. Three heavy trucks bogged down.

As laborious attempts were made to free them, a lieutenant came marching by with a company of selectees—and figured it was a good chance to impress the rookies with their importance. He stopped them facing the trucks, toward which he waved a hand.

"Motorized units without the help of Infantry," were his only words. "Forward March!"

About four out of ten of the letters sent to Texas trainees are wrongly addressed. One letter writer, hearing about inadequate housing, sent a note to "John Fishback, in Bivouac, Dodd Field, Texas."

Corporal E. B. Terry, who handles most of the mail at Fort Sam Houston Reception Center, says that each recruit gets about three letters for each one he writes. During his first camp days, his outgoing letters are fat and numerous, but as the novelty wears off they become thinner and scarcer.

●

PACIFIC SOUTHWEST: The folks around Monterey, California, which is a great vegetable-, fruit- and fish-canning center, have their own term for the routine through which the Monterey Presidio puts recruits. They call it "Processing the boys."

No report of activity in the Monterey area is complete without mention of Pvt. Lewis Galliani and Zephyr. Pvt. Galliani, a San Franciscan, enlisted two months ago, was assigned to the Antitank Co., 17th Infantry, Fort Ord.

Pvt. Galliani's parents drove to Fort Ord recently to visit him. They brought along his 125-pound Great Dane, Zephyr, and when they were ready to leave camp the hound refused to get in the car. He's still there, the company mascot.

Joe thinks it would be a nice idea to have a regimental turnout some day and present Zephyr with a Croix de Grrrr.

Sleight of Heart

By Mike O'Leary

A SHORT SHORT STORY COMPLETE ON THIS PAGE • ILLUSTRATED BY JOHN HOLMGREN

THE man who had been Colter The Great stared at the stage before him, where the blue-serged individual poised by the barrel of stubs, and for the first time wondered what he might do with the sedan if he won it. Not ride in it certainly, for he had not set foot in a car since that night long ago when the wreck of one had taken from him the irreplaceable Edith. He shuffled his broken shoes and dully speculated on how long it would be before the girl two seats over resumed her temporarily abated babble.

"What'd we do if we won it, hon? What'd we do, hon?"

"*One* thing"—it was the first time Colter had heard her escort do aught but mumble—"we'd sell the *old* bus and buy you that blue dress, sugah. Yes, and a coat, if we got enough. After that, we'd drive ouah fancy new sedan right back to Waco."

Wearily curious, Colter peered past the youth next to him—her husband, apparently—and looked at the girl, now the lights were on. A pretty, little thing, he saw, with hair as blond as Edith's had been, and tiny, discolored hands.

He swallowed and shut his eyes, wishing he could shut his ears, also. And shut his mind to echoes of this afternoon's words by the agent who, in the years of glory, had booked him solid, coast to coast, at incredible salaries. For the words had been poignant: "I had a call for a magician, today, Colter. Big-time stuff."

"Yes, I understand magic has made a real comeback, Ike."

"Party that came here was Al Bristol. You wouldn't know him—though he's heard of you, of course. This morning, he comes in. 'Ike,' he says. 'I'm looking for a magician.' 'Fine,' I say. 'Mystic Muldoon is at liberty, temporarily.' 'I said a *magician!*' he says. 'Not a magic-store Hermann with assembly-line illusions and mail-order patter. A magician, see?' 'How about Abdullah, the Star of Asia, then?' I say. 'That mustard-faced wop!' he sneers. 'I want a *true* magician. A sleight-man. And tops.'

" 'I had a guy like that, once!' I say. 'Colter The Great, inventor of the forefinger switch, the greatest free-hand—'

" 'Yeah, I heard about him,' Al says. 'Heard, too, he drank himself almost to death, after that accident killed his wife.'

" 'Nope,' I say, 'he didn't. Went on a big bender after he buried her, yeah. I doubt if he's touched a drop since.'

" 'Okay,' Al says. 'If he's got the stuff he usta have, I want him.'

"Well, Colter?" Ike had finished. "What do you say?"

"Why, why—I couldn't!" Colter had cried, almost hysterically.

"Why not?" Ike Lesser had said, something between pity and contempt in his eyes. "You did your stuff in here the other day!"

"I told you I'd been amusing children in park playgrounds with memory feats and simple sleights, and it seemed to me my touch was coming back," Colter had said, tremblingly. "I didn't—!"

"Colter!" Ike had interrupted. "Your touch *is* back! The stuff you did up here in the office last week was as good as you ever showed in the old days. It ain't your touch that's troublin' you—it's your nerve! Get that? Your nerve!"

"I'm sorry," Colter had said wearily. "I shouldn't have come."

"Listen, old-timer—" Lesser had thrown an arm about the shabby shoulders and the hardness had left his voice—"your wife was one of the swellest fellas that ever lived. If *you'd* died in that wreck, insteada her, she wouldn't o' quit cold like you're doin'!"

He paused, to go on; this time in his usual, cold tone, "Be here at ten, tomorra morning. Here's half a buck to eat on, tonight. If you show Al the old line, you'll be tippin' a waiter this much tomorra night!"

COLTER had shambled out, mutely. Ike didn't understand. If he had made any slips before those children, it wouldn't have mattered. But Colter The Great, in the center of a stage, superior and a trifle caustic, daring audiences to detect him, was different. Of t Like the rapid-fire, extempo banter he had maintained, now winking whimsically toward th where a blond head as high as h forever had nodded approval.

Dejected, worn with walki fighting his thoughts, he had sou theater. In a silent audience a m concentrate; get his bearings. old days he had often sat in a to catch the feel of them before stage. Sitting here tonight, he s had realized that he was catc feel of this one, too; had felt competency surging back wit wild heartbeat.

AND then this couple next to entered, disrupting concer shattering aplomb, jerking him the realization of being a nervel row bum . . . forever . . .

"He's startin' to read the hon! Oh, hon . . ."

His fingers touched the ticke pocket Touched, too, his sole ing nickel. No bed tonight, but . . . walking . . .

A voice rang from the stage: Number—Is—SIX—"

"Damn!" snapped the youth Colter. "Both ouah tickets sta nine! You don't get no blue d time, sweetheart babe!"

The girl was trying to smile; a though her unhappy spouse ha in some gallant effort, and requi solation. "I don't care about dress, hon!" she said, stroking "No, nor any old new cah, eithe you, hon, and no woman could ev more'n that, darlin' lamb!"

Her eyes dropped to the two in the boy's upturned palm, light was full on her pale blon so like a head Colter would ne get that it had brought a lump throat, earlier. But no lump wa throat, now, and through his ve flooding that once familiar s power which he had not felt fo He threw back his head and uproariously. All eyes in the turned toward him, and he revel

"Lad!" he said. "This world i people who quit without tryin of them! But *you?* You quit *looking!*"

He tapped the uppermost aut ticket in the boy's hand with b index finger, smiling into the eyes.

"Young man!" It was Colt Great, bantering an audience-stooge with kindly, yet irritatin dulgent superiority as he nodde hand holding the tickets. "Did y hear that nine can be six—if y it right side—"

He had no chance to finish. girl who had wanted a blue dr snatched some tickets from a lim and a girl who would wear that she rolled into Waco in a fancy dan that would make folks eyes was pushing a boy toward th shrieking delightedly as she And Colter had half a notion to with her. . . .

As the last of the audience trai he sat rapt, planning some rea dacious sleights for his first b appearance in fifteen years. He put them over with a smash, he re tossing away the automobile ti had palmed while substituting h For never, in his entire life, worked the forefinger switch bett he had tonight.

Wearily curious, Colter peere the youth next to him—her hu apparently—and looked at th

The boy did ...well on these—Dr. Swimmer whispered ...to him that he was above the average. ...Joe was next led to a table where a ...bowl of cubical jigsaw puzzle awaited ...him. This was the well-known Wiggly ...block test; the point was to assemble ...the eight or ten pieces as rapidly as ...possible. Joe's nerves seemed to have ...vanished. He worked calmly and swiftly. ...Dr. Swimmer nodded with satisfaction. ...In due course, after other formalities ...and examinations, Joe Brown would be enrolled in one of the training courses being given in Bridgeport. He would go to school from eleven o'clock at night until seven o'clock in the morning—those hours being necessary because the trade schools and factories are in use at other times. He would be taught how to work sheet metal, how to rivet and how to use simple machines. He would emerge at the end of five weeks—200 hours of instruction—as a semi-skilled worker and would be employed at once by, for instance, the Vought-Sikorsky Division of the United Aircraft Corporation in its sprawling plant on the outskirts of Bridgeport.

A Lesson for Other States

Almost 300 such training-school graduates are already at work there. United Aircraft is calling loudly for more of them, and so are the other airplane, engine, machine-tool and armament plants of Connecticut. For that small state, often called the "Armory of the Nation," is booming with war orders. But Connecticut can't get enough trained men—even half-trained ones. Before the year is over conservative estimates indicate 15,000 will be needed.

Connecticut hasn't enough men, but from twenty of these training schools located in her major cities are being graduated 1,500 young men a week. The overwhelming majority are employed

The Story Thus Far:

WHILE managing Eddie Gordon, a young middleweight fighter, Pop Mallory dies in Birmingham, Alabama. Whereupon, Pop's young daughter, Patricia ("Pat"), insists that Gordon live up to the terms of a curious contract he had signed and accept her—a girl!—as his manager. Learning of this, Joe Barton—sent to Birmingham by Max Ellison, a prominent New York fight manager, to sign Eddie up—returns to New York. Not, however, until he had shot one Nick Bellis to death near the Southern city and had a narrow escape from a possible witness (*Eddie Gordon*), who, without seeing his face, had gained possession of his *registered* revolver! . . .

Gordon goes to New York City. There, managed by Pat Mallory (whom he dislikes), he fights his way up to a match with the world's middleweight champion: Dixie Grogan. And there he makes a dangerous enemy: Joe Barton. Suspecting that the girl he loves—"Babs" Ellison, Max's daughter—is becoming infatuated with the young fighter, Barton orders Morrie Oakes, a professional killer, to "eliminate" Eddie Gordon. He tells Oakes, though, that there must be no killing until the missing revolver has been recovered. It so happens, however, that Eddie had given the weapon to Cliff Halliday, a friendly sports writer. So when Oakes tries to steal it, he cannot find it.

Puzzled, Barton has a hunch that the revolver is in Pat Mallory's bank box. A short time later, Jimmy Watson (a crooked gambler, in Barton's pay) "wins" three thousand dollars from Halliday in a poker game—and takes the sports writer's IOU for the entire amount. Then, obedient to Barton's orders, he offers to cancel the debt if Halliday (a close friend of Pat Mallory) will hand over to him a "small pearl-handled .32 revolver" that Pat (so he says) has placed in her bank box!

Certain that the revolver Watson wants and the one Eddie Gordon had given him are one and the same, Halliday confers with Eddie. He produces the revolver, and Eddie insists that he give it to Watson. Then, after jotting down the weapon's serial number, Eddie fires a bullet into a mattress—a bullet which he recovers and, later, sends to the Birmingham police. . . . Pat Mallory is secretly in love with the man she is managing. She does not care for Babs Ellison. Nor does Babs care for her. In the course of a talk with Eddie, Pat tells him that, following the Grogan fight, Babs is giving a party to which she, Halliday and Eddie are invited. Then: "Do I go or not?" she demands.

X

EDDIE shrugged. "Why do you ask me?"

"We-e-ell . . . seeing that it's planned as a celebration for the new champion . . ." Pat said.

"Sounds a bit previous. Suppose I don't win?"

She glanced at him quickly, more than a trifle disturbed by the uncertainty in his voice. "Let's don't talk that way, Eddie."

"Why not? Grogan's no pushover, and you've been reminding me that I'm not in the best of shape."

"You'll win." She spoke with a confidence she did not entirely feel. "Which brings us back to where we started. Do I attend the party—or don't I?"

He shook his head. "You'll have to answer that one."

"I'll do whatever you'd prefer."

"I haven't any preference." He wasn't hostile: merely indifferent. "I don't see any reason why you *shouldn't* go, if that's what you're asking." He looked straight at her. "Will Cliff be there?"

"Yes."

"Then go. You like him."

"And as far as you're concerned, it simply doesn't matter one way or the other?"

"You put it a bit crudely," he said, "but that's how it seems to figure out."

She sighed. "I was hoping that maybe—just this one day, Eddie . . . we might find a touch of what we ought to have."

He asked pointedly, "Why? Now look, Pat—and get it straight once and for all. You've been calling the shots ever since Pop died. There's no use pretending that I liked it, because I didn't. I don't like it now—and I never will like it. I'm handing you all credit for doing what you thought was right . . . or smart . . . but when it comes to giving three cheers, I think I'll ask to be excused."

He walked across the room and then came back to her.

"My apologies for the speech, Pat. It just seemed a good idea to set the record in order on this momentous day. As for tonight—I'd say trail along and have fun. After all, you belong. You're my manager."

MEANWHILE, in the sitting room of Joe Barton's apartment in mid-town, Mr. Morrie Oakes was pacing up and down trying to find an answer. He turned suddenly and glared at the wiry, dapper little fellow who was regarding him with colorless eyes.

"Look, Joe," burst out Morrie. "You've had that gun for twenty-four hours. So I'm askin' you: What are you waitin' for?"

Barton's voice was flat and toneless. He said, simply, "Tonight."

"Tonight . . ." Mr. Oakes never grabbed an idea on the fly, but this sank in quickly. An expression of consternation spread over his none-too-prepossessing countenance. "Holy cats!" he protested. "You ain't figurin' to ask me to knock no guy off right in the middle of Yankee Stadium, are you?"

"Don't be a prime sap. Eddie Gordon's going other places tonight. The Penguin Club, for instance."

"How do you know?" inquired Morrie.

"Because I'm flinging a party for him."

Mr. Oakes collapsed into a chair. "Well, whadaya know about that?" he inquired. "You sure got a sense of humor, Joe. That's a darb, no kiddin' . . . flingin' a party for him. So what happens after he leaves the Penguin Club?"

"Nothing," stated Joe Barton. "He isn't going to leave."

He watched the other man for a moment and then went on coldly: "That's where you step in, Morrie. You're going to be at the Penguin Club tonight all prettied up in white tie, tails—and gloves."

Morrie said, "Go ahead, Joe. Maybe I ain't gonna like this."

"You'll like it. Now . . . what about this blond babe of yours . . . what's her name?"

"Rita?" Morrie waxed enthusiastic. "She's tops."

"I don't mean that. What I'm interested in—has she got nerve, or does she fling hysterics the minute something happens?"

"Hysterics? Not her, Joe. But what's the setup?"

"It's simple—so try to grab it the first time. My party will consist of Babs Ellison and myself, Cliff Halliday and Patricia Mallory—and Eddie Gordon. We're going there right after the fight. You and Rita will be there . . . but I don't know you and you don't know me."

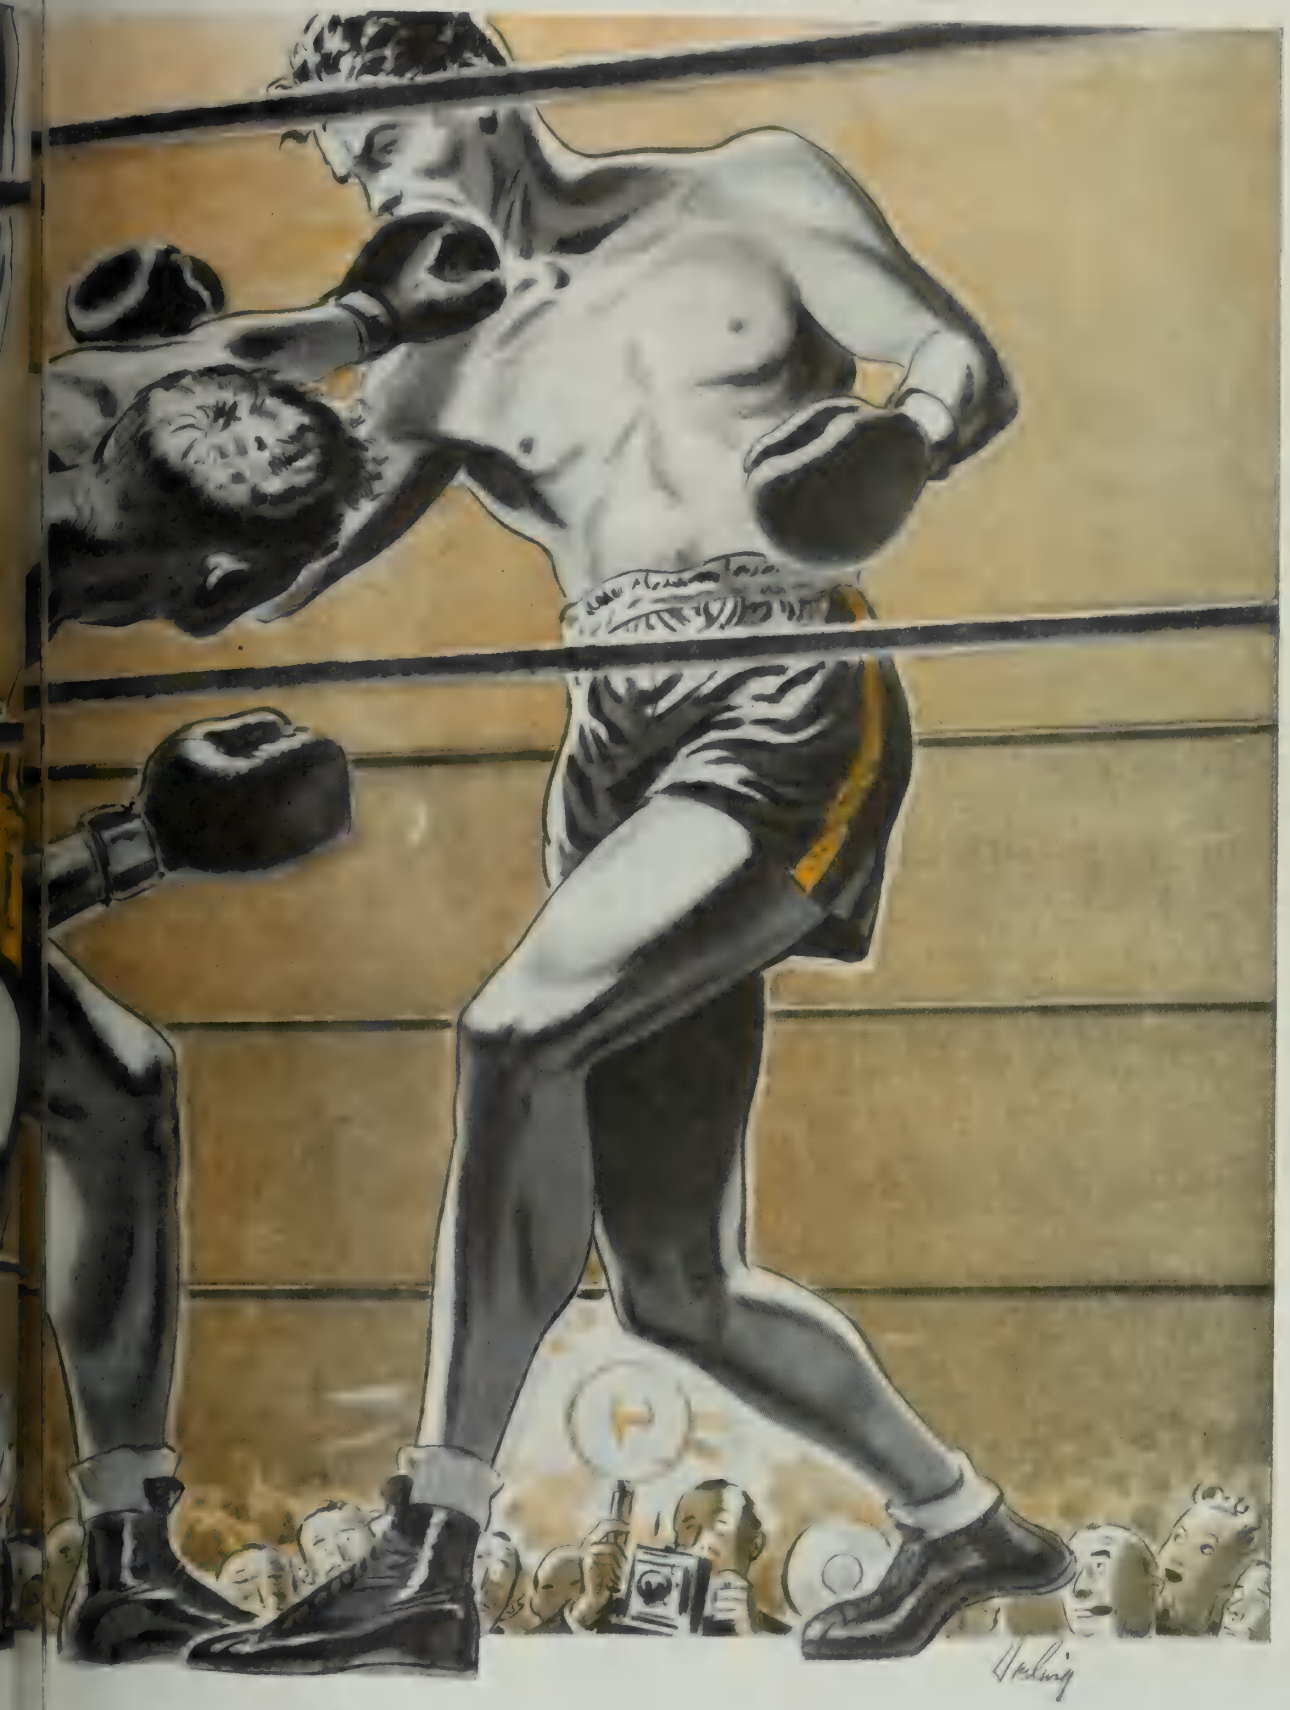
"I getcha so far."

"Along about one o'clock in the morning, the Penguin Club gets pretty wild. Everybody's oiled by then. They start yelling for rumbas and congas. That means plenty of drums, loud trumpets—and a crowded floor. Keep your eye on Gordon. When the music starts sizzling and he commences dancing with Mallory—you drift out with Rita. And be sure you're wearing gloves."

"Gloves? I don't get it, Joe."

"The gloves are so there won't be any fingerprints on the gun."

"What gun?"



"The one you're going to shoot Eddie Gordon with."

Morrie emitted a long, low whis said, "That don't sound awful se Joe."

"It's the most sensible thing thought of. Figure it out for yo I pick the minute and give yo signal. By that time, nobody's any attention to anybody else. N Gordon nor Mallory know you o You dance close. Rita should be ing a dress that has a cape to it little fur jacket. You've got the your right hand, and that hand is a her—so you're holding the gun her cape. When you're right c Eddie, you jam the gun into his and let go."

"Wow. . . ." Mr. Oakes shook his "That takes care of Gordon, all he conceded. "But how do I ma getaway?"

"You don't. The minute you fi

y fo him. *You're* as safe as I am."
Yea . . . maybe . . ." Morrie seemed
fle ibious.

"There isn't any 'maybe' about it. You're a bad egg, Morrie—but lucky. You haven't got any police record so even if some eagle-eye spots you in that room, they've got nothing to hold you on. It's a simple job, and there's ten grand in it for you."

Mr. Oakes nodded. "That's lotsa dough," he admitted. "I'll do it."

"Sure you will." Joe Barton's voice was cold. "Not only for the money, but also because I've got plenty on you if I ever want to remember it." The younger man uncrossed his legs and stood up. "You've got it all straight, have you, Morrie?"

"Yep."

"And Rita won't crab it?"

"She's aces." Morrie scratched his head. "I'll be watchin' you close, Joe. . . ."

"Correct." Barton's thin lips stretched into a smile that was not pleasant. "But don't start anything until I give you the signal."

THE two clean-limbed young men met at the office of the boxing commission. Dixie Grogan was slightly taller than Eddie, and his muscles were bulgier. His sandy hair was in sharp contrast to that of his opponent, his nose was flat, and his gray eyes bore scars at the corners.

He moved to the middle of the circle of attendants and officials and held out his hand. He said, "Hello, Gordon."

Eddie smiled. "'Lo, Dixie," he said.

The champion eyed the nude figure of his opponent with approval. "You're looking fit," he complimented.

"You, too, Champ. We ought to have fun tonight."

"Sure. We'll give the crowd what they're payin' for."

The photographers crowded in. Dixie and Eddie posed: shaking hands, with bare fists clenched, smiling, scowling. That done, they grinned at each other in the friendliest fashion, and Eddie said, "It's a lot of malarkey, but the public likes it."

They stepped on the scales and the weights were officially checked: Grogan 159, Gordon 157¾. A puffy little doctor hustled up with a stethoscope and clapped it against Eddie's body. Feets Johnson regarded the proceedings with some contempt. "Shuh, Doc," he commented, "you ain't gwine git no wrong numbers on that telephone."

The physical examination was thorough but brief; both fighters were given official okays. Once again they shook hands. Eddie said, "Good luck, Dixie," and Grogan grinned, "Same to you, Eddie. I'll be seein' you later."

That was that. Eddie shrugged into the robe which the ubiquitous Feets held out for him, and started toward the room in which he had undressed.

A pudgy little man with moonlike face and placid gray eyes stopped him. Max Ellison said, "Got a minute to spare, Eddie?"

"Sure . . . certainly." Eddie gestured to Feets. "You run along," he ordered. "I'll join you."

"A'right, suh. But don't you go catchin' yo'se'f no cold."

Max beamed on the young fighter and led him into a corner of the room. "You seem to be in pretty good shape, Eddie."

"Yes . . . I'm all right."

Max shook his head. "I'm afraid," he commented candidly, "that this is my last day as manager of the world's middleweight champion."

Eddie smiled. "You seem to have an awful lot of confidence in me."

"I have. Dixie is a good boy, but he isn't *that* good."

"You're a queer one, Mr. Ellison. You'd think—to hear you talk—that you were rooting for me to win."

"You'd think wrong. Personally, I'd like nothing better than to see you get your ears pinned back. But what I want and what I'll get are two different things."

Eddie said, "Thanks. You know, I'm sorry we never got together. You've done things I wasn't crazy about . . . that frame-up you tried on Miss Mallory, for instance—"

"You still think I engineered that?"

"Sure. What's the use of trying to kid me? You did it, and it was one hundred per cent lousy. I didn't like it then, and I don't like it now. But I'm fair enough to admit that I asked for it by checking in with your idea in the first place. So it's at least half my fault, for which I'm plenty sorry. Besides—" and he smiled—"it didn't work."

"It certainly didn't. Which means that you and I will probably never play in the same league. Your Miss Mallory is much too smart for an old codger like me."

Eddie frowned at that. "Why are you so sure?"

Evil Under the Sun

By Agatha Christie

ILLUSTRATED BY MARIO COOPER

The Story Thus Far:

AT THE Jolly Roger, an old hotel on an English south-coast island, Hercule Poirot, noted Belgian criminal investigator, observes that everyone is nervous, apprehensive. And presently he learns what is wrong: Two of the guests—Kenneth Marshall's wife, Arlena, and Christine Redfern's husband, Patrick—are having an "affair," and trouble is expected.

In the hotel and on the beach that lies below it, Poirot sees much of the Marshalls. He has daily chats with the other guests—among them: Miss Emily Brewster, an old maid; the Reverend Stephen Lane, a religious fanatic; two Americans—Mrs. Odell Gardener and her husband; Major Barry, a colossal bore; Rosamund Darnley (who had once been in love with Kenneth Marshall); and Horace Blatt. . . .

One warm August morning, Poirot goes to the beach. Arlena Marshall is there. She asks a favor of Poirot—that he tell no one he has seen her. Then, climbing on a small float, she paddles away. That same morning, "Pat" Redfern and Miss Brewster, out for a jaunt in a rowboat, find her body on the beach at Pixy Cove—she has been strangled to death!

Inspector Colgate, Chief Constable Weston and Poirot go to work on the case at once. Kenneth Marshall (the most obvious suspect) has an alibi—at the time of the murder he had been in his room, typing letters. Feeling sure that a man, *a powerful strangler,* had killed Arlena, Colgate, Weston and Poirot question a series of persons: Linda Marshall, Kenneth Marshall's daughter by his first wife (who supplies Christine with an excellent alibi by testifying that she and Christine had spent the entire morning of that tragic August day at near-by Gull Cove); Patrick Redfern (who admits that he was "crazy" about Arlena, and still loves his wife); and Christine Redfern.

Christine characterizes Arlena as "the sort of woman who would be mixed up with everything sordid: blackmail—jealousy—violence."

Weston says quietly, "Why did you mention the word *blackmail?*"

Hurry, hurry... there's exciting news about "the world's best peas!"

1. **There has been** a bumper crop of succulent Birds Eye Peas! (Millions insist they're the best-tasting peas in all this world). Birds Eye, being good business people, naturally want to sell them quickly as possible. So-o-o-o . . .

2. **For this lucky week** only, you can buy them at a SPECIAL LOW PRICE! Yes, as *garden-fresh* and tender as the summer morning they left the vine! All their extra-sweet flavor *sealed in* by *Quick-Freezing* . . . 4 hours after picking. Furthermore . . .

3. **No shelling or washing** to do! No messy, wasteful pile of pods! Just 12 full ounces of green and luscious peas to *eat* and thrill to! Why, you'd have to shell 2 whole pounds of market peas to get as much as one box of Birds Eye! Yes . . .

4. **Birds Eye Peas** are so fuss-free you save 22 whole minutes' work! Every ounce you pay for you *eat*. And if you don't agree they're the last word in peas, *your money will be refunded!* Buy some today!

REG. U. S. PAT. OFF.

"I've bought 2,000,000 lbs. of tobacco," says Arthur Noell, independent leaf buyer of Durham, N. C.

"So I know fine tobacco–and that's why I smoke Luckies!"

ALL OVER THE SOUTH, tobacco experts like Arthur Noell kno Luckies pay higher prices to get the finer leaf.

In buying tobacco, as in buying most other things, you get what yo pay for. And Lucky Strike's more expensive tobaccos are worth the mon because they're *milder*.

Before the auctions open, Lucky Strike analyzes tobacco samples - finds out just where and how much of the finer, naturally milder le is going up for sale—then pays the price to get it.

That's important to you, especially if you're smoking more today. F the more you smoke, the more you want such a genuinely mild cigaret

Among independent tobacco experts—auctioneers, buyers and war housemen—Luckies are the 2 to 1 favorite. Why not smoke the smol tobacco experts smoke?

With men who know tobacco best—It's Luckies 2 to

Colonel Weston nodded. He said: et's have 'em all in and get it over as possible. Never know, might mething. About the blackmail- t if about nothing else."

Mr. nd Mrs. Gardener came into the e of authority together.

Mrs Gardener explained immedi- ly: I hope you'll understand how it Colonel Weston—that is the name, I Reassured on this point she went on: "But this has been a very bad shock to me, and Mr. Gardener is always very, very careful of my health—"

Mr. Gardener here interpolated. "Mrs. Gardener," he said, "is very sensitive."

"And he said to me, 'Why, Carrie,' he said, 'naturally I'm coming right along with you.' It's not that we haven't the highest admiration for British police methods because we have. I've been told that British police procedure is most refined and delicate and I've never doubted it and certainly when I once had a bracelet missing at the Savoy Hotel nothing could have been more lovely and sympathetic than the young man who came to see me about it, and, of course, I hadn't really lost the bracelet at all, but just mislaid it, that's the worst of rushing about so much, it makes you kind of forgetful where you put things." Mrs. Gardener paused, inhaled gently and started off again: "And what I say is, and I know Mr. Gardener agrees with me, that we're only too anxious to do anything to help the British police in every way. So go right ahead and ask me anything at all you want to know—"

"Don't gimme none o' that!! I don't care who yuh know!! I wouldn't care if yuh was the mayor's uncle! See?! Gimme yuh operator's license!! . . . That's what I shoulda said t' that guy!"

JAY IRVING

Colonel Weston opened his mouth to comply with this invitation but had momentarily to postpone speech while Mrs. Gardener went on:

"That's what I said, Odell, isn't it? And that's so, isn't it?"

"Yes, darling," said Mr. Gardener.

Colonel Weston spoke hastily: "I understand, Mrs. Gardener, that you and your husband were on the beach all morning?"

For once Mr. Gardener was able to get in first. "That's so," he said.

"Why certainly we were," said Mrs. Gardener. "And a lovely, peaceful morning it was, just like any other morning if you get me, perhaps even more so, and not the slightest idea in our minds of what was happening around the corner on that lonely beach."

"Did you see Mrs. Marshall at all today?"

"We did not. And I said to Odell, 'Why, wherever can Mrs. Marshall have got to this morning?' I said. And first her husband coming looking for her and then that good-looking young man, Mr. Redfern, and so impatient he was, just sitting there on the beach scowling at everyone and everything. And I said to myself, 'Why, when he has that nice, pretty little wife of his own, must he go running after that dreadful woman?' Because that's just what I felt she was. I always felt that about her, didn't I, Odell?"

"Yes, darling."

The lips of Hercule Poirot quivered in a little smile. His eyes met for a minute the shrewd, gray eyes of Mr. Gardener.

Colonel Weston said rather desperately, "Well, thank you, Mrs. Gardener. I suppose there's nothing that either of you has noticed since you've been here that might have a bearing upon the case?"

"Why, no, I don't think so." Mr. Gardener spoke with a slow drawl. "Mrs. Marshall was around with young Redfern most of the time—but everybody can tell you that."

"What about her husband? Did he mind, do you think?"

Mr. Gardener said cautiously, "Captain Marshall is a very reserved man."

Mrs. Gardener confirmed this by saying, "Why, yes, he is a real Britisher!"

ON THE slightly apoplectic countenance of Major Barry various emotions seemed contending for mastery. He was endeavoring to look properly horrified but could not subdue a kind of shamefaced gusto. He was saying in his hoarse, slightly wheezy voice:

"Glad to help you any way I can. Course I don't know anythin' about it—nothin' at all. Not acquainted with the parties. But I've knocked about a bit in my time. Lived a lot in the East, you know. And I can tell you that after being in an Indian hill station what you don't know about human nature isn't worth knowin'."

He paused, took a breath and was off again:

"Matter of fact, this business reminds me of a case in Simla. Fellow called Robinson, or was it Falconer? Anyway, he was in the East Wilts or was it the North Surreys? Can't remember now and anyway it doesn't matter. Quiet chap, you know, great reader—mild as milk you'd have said. Went for his wife one evening in their bungalow. Got her by the throat. She'd been carryin' on with some feller or other and he'd got wise to it. By Jove, he nearly did for her! It was touch and go. Surprised us all! Didn't think he had it in him."

Hercule Poirot murmured, "And you see there an analogy to the death of Mrs. Marshall?"

"Well, what I mean to say—strangled, you know. Same idea. Feller suddenly sees red!"

"You think," Poirot said, "that Captain Marshall felt like that?"

"Oh, look here, I never said that." Major Barry's face went even redder. "Never said anything about Marshall. Thoroughly nice chap. Wouldn't say a word against him for the world."

Colonel Weston stirred a little restively. He said, "You don't know of anything—that you've seen or noticed that might help us in this case?"

"Well, really, Weston, I can't say I do. Saw her and young Redfern one afternoon on Gull Cove"—here he winked knowingly and gave a deep, hoarse chuckle—"very pretty it was, too. But it's not evidence of that kind you're wanting. Ha, ha."

"You did not see Mrs. Marshall at all this morning?"

"Didn't see anybody this morning. Went over to St. Loo. Just my luck. Sort of place here where nothin' happens for months and when it does you miss it!"

THE major's voice held a ghoulish regret. Colonel Weston prompted him: "You went to St. Loo, you say?"

"Yes, wanted to do some telephonin'. No telephone here and that post-office place at Leathercombe Bay isn't very private."

"Were your telephone calls of a very private nature?"

The major winked again cheerfully. "Well, they were and they weren't. Wanted to get through to a pal of mine and get him to put somethin' on a horse. Couldn't get through to him, worse luck."

"Where did you telephone from?"

"Call box in the G.P.O. at St. Loo. Then on the way back I got lost—these confounded lanes—twistin' and turnin' all over the place. Must have wasted an hour over that at least. Damned confusing part of the world. I only got back half an hour ago."

Colonel Weston said, "Speak to anyone or meet anyone in St. Loo?"

Major Barry said with a chuckle, "Wantin' me to prove an alibi? Can't think of anythin' useful. Saw about fifty thousand people in St. Loo—but that's not to say they'll remember seein' me."

The chief constable said, "We have to ask these things, you know."

"Right you are. Call on me at any time. Glad to help you. Very fetchin' woman, the deceased. Like to help you catch the feller who did it. The Lonely Beach Murder—bet you that's what the papers will call it. Reminds me of the time—"

It was Inspector Colgate who firmly nipped this latest reminiscence in the bud and maneuvered the garrulous major out of the door.

Coming back, he said, "Difficult to check up on anything in St. Loo. It's the middle of the holiday season."

The chief constable said:

"Yes, we can't take him off the list. Not that I seriously believe he's implicated. Dozens of old bores like him going about. Remember one or two of

Ruth only reads of Romance!

For, like so many others, Ruth has bad breath and doesn't know it. That's the tragedy of this common fault—you seldom suspect it in yourself. Yet dentists say:

"76% of all people over the age of 17 have bad breath. That's why dentists recommend Colgate Dental Cream. For Colgate's active penetrating foam gets into hidden crevices between teeth . . . helps remove decaying food particles and stop the stagnant saliva odors that cause much bad breath."

How do you like
that penetrating foam?
Teeth brighter,
your smile more appealing?

them in my army days. Still—he's a possibility. I leave all that to you, Colgate. Check what time he took the car out—petrol—all that. It's humanly possible that he parked the car somewhere in a lonely spot, walked back here and went to the cove. But it doesn't seem feasible to me. He'd have run too much risk of being seen."

Colgate nodded. He said, "Of course, there are a good many charabancs here today. Fine day. They start arriving around about half past eleven. High tide was at seven. Low tide would be about one o'clock. People would be spread out over the sands and the causeway."

"Yes," Weston said. "But he'd have to come up from the causeway past the hotel."

"Not right past it. He could branch off on the path that leads up over the top of the island."

Weston said doubtfully, "I'm not saying that he mightn't have done it without being seen. Practically all the hotel guests were on the bathing beach except for Mrs. Redfern and the Marshall girl who were down in Gull Cove, and the beginning of that path would only be overlooked by a few rooms of the hotel and there are plenty of chances against anyone looking out of those windows just at that moment. For the matter of that, I dare say it's possible for a man to walk up to the hotel, through the lounge and out again without anyone happening to see him. But what I say is, he couldn't *count* on no one seeing him."

"He could have gone around to the cove by boat," said Colgate.

Weston nodded. He said, "That's much sounder. If he'd had a boat handy in one of the coves near by, he could have left the car, rowed or sailed to Pixy Cove, done the murder, rowed back, picked up the car and arrived back with this tale about having been to St. Loo and lost his way—a story that he'd know would be pretty hard to disprove."

"You're right, sir."

"Well, I leave it to you, Colgate," the chief constable said. "Comb the neighborhood thoroughly. You know what to do. We'd better see Miss Brewster now."

EMILY BREWSTER was not able to add anything of material value to what they already knew.

Weston said, after she had repeated her story, "And there's nothing you know of that could help us in any way?"

"Afraid not," Emily Brew

never exchanged half a dozen words with her until I met her here."

"Were Captain and Mrs. Marshall, as far as you knew, on good terms with each other?"

"On perfectly good terms, I should say."

"Was Captain Marshall very devoted to his wife?"

Rosamund said, "He may have been, I can't really tell you anything about that. Captain Marshall is rather old-fashioned—he hasn't got the modern habit of shouting matrimonial woes upon the housetop."

"Did you like Mrs. Marshall, Miss Darnley?"

"No."

The monosyllable came quietly and evenly. It sounded what it was—a simple statement of fact.

"Why was that?"

A half-smile came to Rosamund's lips. She said, "Surely you've discovered that Arlena Marshall was not popular with her own sex? She was bored to death with women and showed it. Nevertheless, I should like to have had the dressing of her. She had a great gift for clothes. Her clothes were always just right and she wore them well. I should like to have had her as a client."

"She spent a good deal on clothes?"

"She must have. But then she had money of her own and, of course, Captain Marshall is quite well off."

"Did you ever hear or did it ever occur to you that Mrs. Marshall was being blackmailed, Miss Darnley?"

A look of intense astonishment came over Rosamund Darnley's expressive face. She said, "Blackmailed? Arlena?"

"The idea seems to surprise you."

"Well, yes, it does rather. It seems so incongruous."

"But surely it is possible?"

"Everything's possible, isn't it? The world soon teaches one that. But I wondered what anyone could blackmail Arlena about?"

"There are certain things, I suppose, that Mrs. Marshall might be anxious should not come to her husband's ears?"

"We-ll, yes."

She explained the doubt in her voice by saying with a half-smile, "I sound skeptical, but then, you see, Arlena was rather notorious in her conduct. She never made much of a pose of respectability."

"You think, then, that her husband was aware of her—intimacies with other people?"

THERE was a pause. Rosamund was frowning. She spoke at last in a slow, reluctant voice. She said, "You know, I don't really know what to think. I've always assumed that Kenneth Marshall accepted his wife, quite frankly, for what she was. That he had no illusions about her. But it may not be so."

"He may have believed in her absolutely?"

Rosamund said with semiexasperation, "Men are such fools. And Kenneth Marshall is unworldly under his sophisticated manner. He *may* have believed in her blindly. He may have thought she was just—admired."

"And you know of no one—that is you have heard of no one who was likely to have had a grudge against Mrs. Marshall?"

Rosamund Darnley smiled. She said, "Only resentful wives. And I presume, since she was strangled, that it was a man who killed her."

"Yes."

Rosamund said thoughtfully, "No, I can't think of anyone. But then I probably shouldn't know. You'll have to ask someone in her own intimate set."

"Thank you, Miss Darnley."

Rosamund turned a little in her chair. She said, "Hasn't M. Poirot any questions to ask?"

Her faintly ironic smile flashed out at

How's your "Pep Appeal"? —by Dorne

Lil: Arthur—that's a horse, not a hearse! Put some *pep* in it!
Art: Aw, Lil! I didn't wanta be an actor.

Aunt Patty: Lil, it's a plain case of no *pep appeal!* I'll bet he doesn't get all his *vitamins*. Come over to my house and I'll show you lesson number one—a lesson entitled "KELLOGG'S PEP."

Aunt Patty: And don't let him forget it, Lil! Right in that crisp wheat-flake cereal, KELLOGG'S PEP, are extra-rich sources of *two of the most important vitamins*, the ones our diets are most likely to be deficient in, vitamins B_1 and D.
Art: Holy smoke, Auntie! It's *delicious!* Why haven't you told us about it before?

Art: You know, KELLOGG'S PEP and those other vitamin foods she told us about might make a lot of difference in me!
Lil: From now on, my handsome hero, you're going to be the most vitaminized man in Suffolk county!

Vitamins for pep! Kellogg's Pep for vitamins!

Pep contains per serving: 4/5 to 1/5 the minimum daily need of vitamin B_1, according to age; 1/2 the daily need of vitamin D. For sources of other vitamins, see the Pep package.

BE MODERN
WITH FLUID DRIVE

Bu

ater"a Chrysler cruises
s horsepower!

hrsler can cruise all day at 60 miles an hour on 43 epwer out of a total of 140! Think of the economy of that! ak f the vast reserve you have when you want it!

Th whole flow of power in a 1941 Chrysler is keyed to the t avanced engineering knowledge. In addition to *Fluid* ve give unlimited speeds without gear-shifting, Chrysler's fir engines have multiple-jet carburetors . . . with jets for low speeds, for average driving and cruising . . . and a "Spitfire" jet that leaps into action when you "step on it." In a Chrysler, you get exactly the right carburetion and exactly the right gear ratio for top performance . . . and peak economy!

In all truth, the 1941 Chrysler upsets an old proverb! It lets you eat your cake and have it too! You can have the thrills you want . . . the driving ease you long for . . . and still enjoy economy all the way!

So why shift gears . . . when Chrysler's modern engineering gives the smoothest, easiest, safest, most thrilling performance on the road . . . *at low cost!*

To know just how thrilling *Fluid Driving* is, you must try it for yourself! Your Chrysler dealer is eager to give you a demonstration that will open your eyes to a whole new world of motoring pleasure. Make a date today!

Tune in on the Major Bowes Original Amateur Hour, CBS, Thursdays, 9 to 10 P. M., E. S. T.

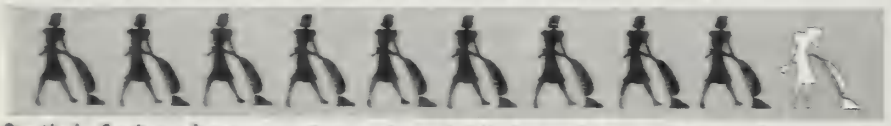
WHY SHIFT GEARS?

TRY *FLUID DRIVE* WITH VACAMATIC TRANSMISSION



Will Knox Gelatine REDUCE TIREDNESS for WOMEN?

158 women in tiring jobs volunteered to drink Knox for 28 days. They were checked by reporters once every week. Did they feel less tired? Did they have more energy left at the end of the day?

What desk workers reported. Included were 60 telephone operators, secretaries, cashiers, teachers. 2 out of 3 who started, and 9 out of 10 of those who completed the 28-day test said they felt noticeably less tired.

On-their-feet workers tested, numbered 98, from housewives and nurses to saleswomen and beauticians. Again, 2 out of 3 who started, and 9 out of 10 who completed the 28-days reported in substance: I know I'm not as tired after a hard day's work.

In addition, comes a report by a physiologist from a well-known university. He, too, tested women drinking Knox Gelatine regularly. His findings were that these women gained in endurance.

Don't these results suggest that women, as well as men, who are tired may benefit by following the Knox Gelatine Build-Up faithfully? Most of the women who reported "less tired" in worker tests noticed results after the 14th day. See what 2 weeks of the Knox Build-Up will do for you.

TRY THIS YOURSELF...for 2 weeks

1. Drink 4 envelopes of Knox Gelatine every day for 2 weeks. Then drop to 2 a day. After 28 days, drink as needed.

2. To prepare, pour 1 envelope (¼ pkg.) Knox Gelatine into ¼ glass water or fruit juice, not iced. Let liquid absorb gelatine. Stir. Drink immediately. If it thickens, stir again. The gelatine is tasteless.

BUT BE SURE it's plain, unflavored Knox. Knox is all body-building protein. Ready-flavored gelatine dessert powders are ⅞ sugar, ⅛ protein. Buy from your grocer in 4-envelope or economical 32-envelope package.

KNOX Gelatine

A PROTEIN FOOD THAT FIGHTS FATIGUE

him. Hercule Poirot smiled and shook his head. He said, "I can think of nothing."

Rosamund Darnley got up and went out.

They were standing in the bedroom that had been Arlena Marshall's. Two big bay windows gave onto a balcony that overlooked the bathing beach and the sea beyond. Sunshine poured into the room flashing over the bewildering array of bottles and jars on Arlena's dressing table.

Here there was every kind of cosmetic and unguent known to beauty parlors. Among this panoply of woman's affairs three men moved purposefully. Inspector Colgate went about shutting and opening drawers.

Presently he gave a grunt. He had come upon a packet of folded letters. He and Weston ran through them together.

Hercule Poirot had moved to the wardrobe. He opened the door of the hanging cupboard and looked at the multiplicity of gowns and sports suits that hung there. He opened the other side. Foamy lingerie lay in piles. On a wide shelf were hats. Two more beach cardboard hats in lacquer red and pale yellow—a big Hawaiian straw hat—another of drooping dark blue linen and three or four little absurdities for which, no doubt, several guineas had been paid apiece—a kind of beret in dark blue—a tuft, no more, of black velvet—a pale gray turban.

Hercule Poirot stood scanning them—a faintly indulgent smile came to his lips. He murmured, "*Les femmes!*"

Colonel Weston was refolding the letters. "Three from young Redfern," he said. "Damned young ass. He'll learn not to write letters to women in a few more years. Women always keep letters and then swear they've burnt them. There's one other letter here. Same line of country."

He held it out and Poirot took it.

"Darling Arlena:

"God, I feel blue. To be going out to China—and perhaps not seeing you again for years and years. I didn't know any man could go on feeling crazy about a woman like I feel about you. Thanks for the check. They won't prosecute now. It was a near shave, though, and all because I wanted to make big money for you. Can you forgive me? I wanted to set diamonds in your ear lovely, lovely ears—and clas milk-white pearls round you only they say pearls are no goo days. A fabulous emerald, the that's the thing. A great emera and green and full of hidden fire forget me—but you won't. You're mine—always.

"Goodby—goodby—goodby,

INSPECTOR COLGATE said, be worth while to find out really did go to China. Othe well, he might be the person we ing for. Crazy about the woman izing her, suddenly finding out he played for a sucker. It sounds t though this is the boy Miss E mentioned. Yes, I think this m useful."

Hercule Poirot nodded. H "Yes, that letter is important. I very important."

He turned around and stared room—at the bottles on the c table—at the open wardrobe a big Pierrot doll that lolled insole the bed.

They went into Kenneth Ma room.

It was next door to his wife's b no communicating door and no b It faced the same way and had tw dows, but it was much smalle tween the two windows a gilt hung on the wall. In the corner the right-hand window was the d table.

On it were two ivory brus clothesbrush and a bottle of hair In the corner by the left-hand w was a writing table. An open typ stood on it and papers were rang stack beside it.

Colgate went through them r He said. "All seems straightfo enough. Ah, here's the letter he tioned this morning. Dated the that's yesterday. And here's t velope—postmarked Leathercomb this morning. Seems all square we'll have an idea if he could hav pared that answer of his before

He sat down.

Colonel Weston said. "We'll lea to it, for a moment. We'll just through the rest of the rooms. I one's been kept out of this corrid til now and they're getting a bit about it."

(To be continued next week

"Something's wrong, Kennesaw! I think you're supposed to leave tracks like this!"

hers.

"I saw Max Ellison down there," he
.

"You . . . ?"

"He tells me he called on you last
t."

"That's right."

"Do you think you were wise to turn
his offer?"

"I turned it down. Isn't that the an-
?"

"He thinks you were smart. He said
you'd make a heap more money by
onto me."

She said slowly, "It's astonishing how
surely you and Mr. Ellison have
out my motives."

He seemed puzzled. "There's no other
figure, is there?"

"I suppose not." She pulled herself
. "Skip it, Eddie. Pitch into
nch. You've got some heavy
g to do."

He looked at her, and then smiled—just a trifle. "Okay, Boss," he said. "I'm still taking orders."

It was a little easier after that. They didn't talk about anything important—which was, in itself, important. Occasionally she saw him looking at her as though trying to adjust some thoughts that confused him . . . and she tried not to think about what those thoughts might be. There was only one thing important right now, and that was to keep Eddie's nerves from getting ragged. She'd done the best she could for him up to this point.

She rose from the table and peeped into the bedroom. "This way, Mr. Gordon," she called. "The crib is ready."

Feets' midnight countenance appeared over her shoulder. "Sho is Mistuh Eddie. I hope you is feelin' slumbersome."

EDDIE joined Feets in the bedroom and closed the door. Pat walked to the window and stared off across the city.

The room was high above the street, and traffic noises drifted up to her. Cars and trucks and people down below moved along like tiny insects; men and women intent on their own particular interests, unmindful of this young girl who stared down at them.

It was odd, the way she felt today. "Maternal?" she thought, and then had the grace to laugh. "What's the use of kidding myself?"

It had been a strain on her: a strain of watching and worrying and thinking. There had been times when she had doubted the wisdom of her course; other times when she had been heartsick . . . when she had wanted nothing so much as to transfer her burden to other shoulders . . . to shoulders that were broader and stronger than hers.

Tonight marked the end. Of something . . . she couldn't quite find the word. A phase? It was more than that. "I'm thinking trite things," she reflected, "and the funny part is that they all fit perfectly. 'Another milestone passed' . . . 'The fork in the road' . . . 'The hope that a difficult job will prove to have been well done.'" She shook her head. "Quit thinking, Pat," she commanded herself sternly. "'Tain't gittin' you nowhere."

She was relieved when the door opened and Feets tiptoed into the sitting room. He whispered, "I got him all laid out, Miss Patricia."

"Think he'll sleep?"

"Yas'm. I prospeck he will."

Pat said, "I can't help asking the same question over and over again, Feets. Is Eddie in good enough shape to go the distance if he has to?"

Feets made no effort to conceal his worry. "I don't know, Miss Patricia," he confessed miserably. "Maybe yes an' maybe no. Mistuh Grogan is plenty smart. He hits fast an' he hits frequent. Ise just hopin' that Mistuh Eddie persuades him early."

"Yes . . . And yet he doesn't dare to take chances with a boy as good as Dixie." She sighed. "We certainly want Eddie to win tonight, don't we, Feets?"

"Meanin' you an' me?"

"Meaning you and me and Pop."

Feets nodded solemnly. "You know, Miss Patricia—that's right queer. All the time I was in yonder alone. I was thinkin' 'bout Pop, an' wishin' he was heah. Ever sence he fust puck up Mistuh Eddie, he was lookin' for'd to a night like this . . . when Mistuh Eddie would be fightin' fo' the champeenship."

His voice trailed off and he shook his great black head. "But shuh! this ain't

THE ELECTRIC STORAGE BATTERY COMPANY, Philadelphia . . . The World's Largest Manufacturers of Storage Batteries for Every Purpose . . . Exide Batteries of Canada, Limited, Toronto

no kind of way fo' me to be talkin'. Us got to keep ourse'ves in a celebratin' mood. What you fixin' to do the rest of the afternoon?"

"I'm going over to my apartment. I'll be back by the time he wakes up." She looked at the door and then at Feets. "Do you suppose he's asleep yet?"

Feets tiptoed across the room and cracked open the door. He tiptoed back.

"Yas'm," he said. "Mistuh Eddie's gone to sleep."

Pat moved slowly toward the bedroom. She paused uncertainly on the threshold, then entered the room and closed the door behind her.

She moved to the bedside and stood looking down at the sleeping man. He looked relaxed, boyish. There was nothing forbidding about him now.

She reached across him and adjusted the covers. He didn't move. . . .

And then she bent down and brushed her lips against his.

She straightened, as though terrified by what she had done. She backed away from the bed. Her lips formed the words, "I'm sorry, Eddie. . . ." And then, as she moved toward the door, her innate honesty asserted itself. "No, I'm not sorry at all," she confessed. "I'd do it again if I dared."

ALL avenues of traffic leading to the Yankee Stadium were jammed. The subways were crowded to suffocation, streets were congested with taxis and private cars, human beings swarmed toward the entrance gates.

Inside the great ball park a preliminary was in progress. Over the ring the lights blazed down, and elsewhere the park was in darkness so that the impression created was of a tremendous diamond in a gigantic onyx setting. Row on row of seats stretched across the field, the massive double-decker stands were crowded.

Far down under the stands, so that the noise of the crowd came to them only like the booming of a distant surf, sat Eddie Gordon and Cliff Halliday in the former's dressing room. Eddie was already clad in fighting regalia and his trunks showed briefly beneath his flannel robe. The bandages had been adjusted and tested and molded firmly over hard knuckles. Shoelaces had been tied, untied and tied again. Shoe soles had been rubbed in resin so as to eliminate danger of slipping on the canvas covering of the ring.

Cliff was seated in a chair near the rubbing table. He was watching Eddie with wise eyes that had seen all this before and understood the symptoms. Nor was he particularly pleased with what he saw.

Eddie was nervous. Too nervous. Drawn just a bit fine. Restless. He sat on the table for a while, then got up and walked around the tiny dressing room. He inspected his bandages again as though dissatisfied. He clenched a fist and pounded it into the palm of the other hand.

He seated himself once more, but fidgeted and started walking again. Cliff thought, "Not so good. It's all right to be edgy—but not that edgy."

The door opened and Mr. Happy Madden entered the room. Mr. Madden was in fighting togs. He said, "I'm on next, Eddie." He looked questioningly at Cliff. "I brung you something."

Eddie held out his hand. "Thanks, Happy. Let's have it."

Mr. Madden gave him a piece of paper. "It's about that gun you gimme the serial number of. The dope's all written down."

An irate official slammed open the door and barked at Madden, "Bring that chin of yours into the ring, Happy. They're waitin' . . ."

Happy waved as Eddie and Cliff called "Good luck," and trotted off happily to do his chore. Eddie unfolded the paper that the rock-ribbed pugilist had given him.

He stared. His eyes opened wider. He whistled softly and said, "Well, I'll be damned."

Cliff got up. "What gives?" he inquired.

"That gun I had . . . the one Jimmy Watson wanted . . ."

"What about it?"

"It belongs to Joe Barton!"

Cliff sat down very suddenly. "That's a hot one," he commented. "I don't get it."

"Me either." For the moment Eddie's tension was dispelled. His brain was groping with another problem. "It doesn't add up right. What was Jimmy Watson doing down in Birmingham with Joe Barton's gun?"

"Suppose you tell me, Eddie."

The young fighter shook his head. "I never could fit Watson into this picture. There was a screw missing somewhere—and maybe it still is. Look, Cliff—do you suppose this dope Happy gave me is the McCoy?"

"Why not? His brother's a cop, isn't he?"

"Yes . . . but . . ."

"That part checks all right. Barton's old man carries a lot of weight, so it isn't unreasonable that Joe should have a gun permit. But why the hell should he want that gun three thousand dollars' worth?"

"Maybe," said Eddie slowly, "for the same reason that we thought Jimmy Watson wanted it."

"You mean Barton might have been the lad who slugged you with it in Birmingham?"

"Could be. He was there that night. The guy in the car was little. Barton is. If whoever it was had just killed somebody with that gun . . . he'd want it back. Babs Ellison saw it in my room . . . maybe that's how Barton knew I had it. He must have recognized me that night. But before he had my room searched, I had turned the gun over to you . . . and they probably figured I'd handed it to Pat . . . or is that too complicated to be right?"

"It's too right to be complicated," stated Halliday. "But check it out of your mind, Eddie. You've got important business on hand. You can't climb into the ring with a smart lad like Dixie Grogan while you're thinking about something else."

"It isn't as easy as that."

"Maybe not. But try to forget Barton."

The door opened quietly and a flat voice asked, "Who wants to forget me—and why?"

THEY looked up as the dapper little man advanced into the room. He was in dinner clothes; clothes that were a trifle too broad of shoulder, a little too extreme of cut. He wore a red carnation. The smile he gave them just missed out on its intention of appearing friendly. "Somebody talking about me?" he inquired.

Eddie did not evade. "Yes," he said. "Both of us. How much did you hear?"

"Not enough to hurt." He looked from one to the other. "I'm counting on both of you for the Penguin Club party tonight."

"Win or lose?" asked Eddie.

"Be yourself. You'll win." Joe made a brief motion with one nervous hand and said, "Luck, Eddie. 'By . . ." The door closed behind him almost as silently as it had opened. Eddie said, "Did he hear us?"

"I don't believe so."

Eddie was thoughtful. "This whole setup has a bad odor."

"Forget it, kid. Concentrate on Grogan, can't you?"

"Yeah . . ." There was no conviction in Eddie's tone. "Hadn't you better be going, Cliff?"

"I suppose so."

"Sitting with Pat?"

"Yes . . ." Cliff held out his hand. "Take it in stride, Eddie. You've got the stuff, if you use it right."

"I'll remember. . . ."

Cliff Halliday made his way thoughtfully along the long corridor. He was thinking fast, and he didn't like his own thoughts. He wasn't pleased with Eddie's physical condition or his mental state. The revelation about Barton had confused both of them, and Eddie couldn't afford to be confused.

He joined Pat at the ringside. A black cloth evening coat with a white fox collar covered a simple black evening gown, and did nice things to her face. She scarcely heard his casual compliment. Finally she said, "What's on your mind, Cliff?"

"Nothing."

"You wouldn't try to kid a girl, would you?"

"I'd try. But I'm not very good at it."

She said, "Is Eddie all right

"Yes. . . ."

"I don't like the way you Cliff." She was getting ter again just when she had begu "Why not tell me?"

He spoke carefully: "I wo understood it myself. The wh is so fantastic. . . ." He lighte rette. "Listen, Pat—are you a sure that Joe Barton was in ham the day after Pop's funer

's the little things that make life friendly

A playful pup, eager to be petted, scampers to the door. His master's hearty handclasp welcomes you inside and a deep chair invites you to relax beside the fireplace. No mistaking them. These are symbols of friendliness—of which there are many. Words of praise or kindly counsel... an ear for the other fellow's problems and a heart for those less fortunate than we... a smile for the world at large... cookies for the neighbors' kids... a thoughtful 'phone call... flowers for a hostess... hospitality however simple. These little gestures speak every man's and woman's language and they say, "It's so easy to be friendly."

glanced down at Pat's firm, clear handwriting. These letters did things to him . . . things he couldn't understand.

He leaned against the rubbing table and read:

"Dear Eddie:

"This is the night I have been waiting for, and instead of a lot of fine words—all I can say is: Good luck and God bless you. Pop"

A HUSH fell over the vast stadium as the fighters met in the center of the ring. The referee, immaculate in gray shirt and trousers, spoke briefly to the boys: the customary, laconic statement that they were familiar with the rules and were to give the crowd a good show. He said, "Shake hands now and come out fighting." The usual thing, the same words, yet tonight it was different. Eddie nodded briefly at Dixie as they touched gloves and turned toward their corners.

Eddie Gordon realized now that this wasn't, as he had several times declared, "Just another fight." It wasn't that the man opposite him was the best he'd ever fought, it wasn't any fear of what might happen . . . it was merely that there is an importance to a bout involving the championship of the world. Every breath, every move, every block, every punch assumes a vital significance.

Eddie was conscious of the tension, and somewhat surprised at it. He tried to remember Pop. He recalled early, important battles in his meteoric career . . . fights in which Pop's wise, placid face and smooth, quiet, expert advice had pulled him over some dangerous shoals.

Tonight there was only Feets. Two other handlers, of course; but mostly there was Feets . . . and the huge Negro was no expert at concealing his own emotions. He'd do his best, but at this awful moment before the beginning of the fight, Eddie wondered whether that best was going to be quite good enough.

He went to his corner and grabbed the upper ropes in his gloved hands, swaying back and forth to limber his arm and shoulder muscles a little more, rubbing his fighting shoes on the canvas floor to assure himself that there was plenty of resin on the soles.

For one merciful moment he forgot the champion in the opposite corner. He saw faces in the crowd: the eager, vivid face of Babs Ellison, and beside her Joe Barton: young, hard and dangerous. That started Eddie thinking, and he tried to cast those thoughts out of his mind. The job just ahead of him required concentration.

He saw Cliff Halliday at the ringside. Cliff smiled up at him and made a little gesture of confidence as though to say, "You're in, kid. Take it in stride."

What a swell guy that Cliff Halliday was. A friend for any man's money. Beside Cliff was Pat Mallory.

Eddie looked straight at her. He was aware of the fact that she looked pretty tonight in her evening gown and with her delicate face framed by the great white fox collar of her evening coat. He found himself gripped by an odd sort of emotion.

There was something in her eyes which held him; an expression which was almost pleading. She was trying to look confident, but not succeeding very well. She, too, made a little gesture, and he forced himself to smile and nod. Pat . . . Cliff . . . Joe Barton . . . he was thinking of too many things. He heard the deep, throaty voice of Feets Johnson. "You better commence thinkin' 'bout Mistuh Grogan," Feets was saying. "An' don't you think 'bout nobody else."

The gong sounded. It seemed unusually loud and clear. There was an audible indrawing of breath from the tens of thousands of persons in the arena. Eddie turned. He saw the benign, moonlike countenance of Max Ellison just beyond Dixie Grogan's lithe figure, and once again he had that terrible feeling that the odds were against him. Max was smart—perhaps the most astute fight handler alive . . . and Max was handling Dixie Grogan.

Eddie moved out to the middle of the ring, dropping easily into fighting pose; muscles tight, eyes narrowed and wary, left hand extended with the elbow slightly crooked, left shoulder hunched, right arm cocked back. . . . He deliberately shut out the faces of the spectators, trying to eliminate from his thoughts everything save the man in front of him.

They moved closer. Gloves touched cautiously. Then, suddenly, Dixie's left flicked out. It came from nowhere and it came fast. It caught Eddie in the mouth: once, twice, three times. Not hard enough to do any damage, but it stung. A sigh, and then a roar, went up from the mass of humanity packed outside the ropes. The battle was on.

Eddie tried to step inside, but Dixie backed away. Then the left came again: twice. Eddie blocked the second and moved in with a hard counter to the body. Except that it didn't reach Grogan's body. It landed on his forearm, and now the two fighters went into a half clinch; bodies close, muscles tense. They moved around, body rubbing against body, feeling each other out; both alert for that quiver of arm or back muscle which meant that a punch was coming. They threw tentative blows at each other's body and jaw . . . not with any intention of hurting, but to estimate the defense.

THE referee stepped between them. Eddie was having a little more luck concentrating now. Chiefly because he was lost in admiration of Dixie's left hand. Yes—sure, he'd trained for it . . . but that didn't mean anything. This left of Dixie's was as fast as the stroke of a rattler. It kept snapping into his face so that his head would bob back and he'd be thrown off balance. That meant he couldn't start a good, hard punch. Pat had been right. Dixie's jab was something to write home about.

For the first minute and a half the action was slow; careful, unexciting. But the crowd did not become restless. Here were the two best in the world. The chips were down. They were entitled to go at this job their own way.

Exchange of lefts . . . then they were in close again, snapping short blows to ribs and jaw. Then out again, sparring. Eddie was watching Dixie's shoulder now, watching for the almost imperceptible muscle twitch which signaled the rapier thrust of that stabbing left. He saw one coming and stepped inside. His right jarred home to Dixie's hard body, but at the same time Dixie's left curled against his own jaw.

The blow hurt. Hurt plenty. It was an unorthodox punch, an unexpected one. Eddie clinched, shook his head and heard the Niagara roar of the crowd which had sensed the beginning of authoritative action.

"Just to add to our incentive we'll designate you, at this point, as 'The Sow's Ear'" LOUIS JAMME

Eddie crouched and shuffled in. He waded straight into a barrage of sharp lefts. He stalked his man, taking what he had to take while he watched for an opening. It came at last: a left which missed, a left of his own, a counter which he picked off . . . and then they were toe to toe throwing punches at each other.

They threw them fast—and hard. Eddie's head was down, his muscles were alive. He gave each punch almost everything he had. But Dixie Grogan didn't break ground. He traded blow for blow, punishment for punishment. It was a grand rally and it lasted through to the end of a brilliant first round. The crowd was on its feet, shrieking, so that the referee had to jump between the fighters to signal them that the round had ended.

They went to their corners. Max Ellison talked quietly with Dixie. He asked, "What's he got?"

"I don't know, Max. He can hit, but I knew that in advance. He's not as smart as I expected."

Max nodded sagely. "He's he warned. "But he doesn't see working at it. Looks like he's go thing on his mind. Take it ea round."

Feets was talking earnestly t Gordon. "He hadn't ought to you that way, Mistuh Eddie. Ho it happened?"

Eddie said, "He's good. Plenty

"That don't answer nothin'." was insistent. "You got to watch Mistuh Eddie. Please, suh . . closer. An' try to keep inside th

An Actor in the Family

Continued from page 16

"Maybe somebody ought to go after Willie here with a shotgun too!"

That did it. She turned and swept out of the room. I followed her to the front door but it slammed in my face. So I walked back to the kitchen and poured a drink. "We should never have brought out that skeleton again," I said to the old man.

With the company gone, he drank one straight. "There are a lot more people gotta get their cars fixed than have gotta go to them movies," he said, "so bein' a mechanic ain't anything to get sarcastic over."

"She was just mad," I said.

"Willie," he said, "trouble with you is you're too easygoin'. You got to kick women around some. You been playin' second fiddle to Chuck ever since he hauled outa town. You shoulda married Mary right after she forgot about him. Now she's gonna sure as all hell remember him again and you're gonna have trouble. Maybe you better go right on over and ask her to marry you."

"I don't wanta marry a woman with another guy on her brain," I told him.

"Women don't have brains," he said wistfully. "You got to learn that some way."

"They have 'em today," I said and went upstairs to bed. But before I got into bed I looked myself over in the mirror and I run a hell of a poor second to the way Chuck looked in that moving picture. I lay in bed and thought about it. What he had was glamor, and now what he had to back it up was one of those movie salaries. It was almost light when sleep put an end to my misery.

All the next day I worked at the Arcana City Garage.

I called her at noon and she said she was sorry but she was going to a church social with Joe Benford that night. I said, "You sound like you got the phone in the refrigerator," and she said, "Thank you," and hung up.

SO I sat around that night with the old man and he said, "Willie, love that runs smooth is sometimes like a lawn mower that ain't cuttin' any grass. After four years that Benford ain't gonna cut you out in one night."

"I ain't worried about Benford," I said.

The old man measured out a bourbon. "You know," he said, "that Chuck is just like his maw and you're just like your maw. Chuck's maw was slim as a reed and prettier than Christmas, and your maw was big and solid like you. They was two kinds of women which both had their advantages. Like you know, I married Chuck's maw first, and she lit out inside two years and I never did see her since. An' I ain't forgotten her since neither. So I married your maw an' I knew where she was and what she was thinkin' right up to the day she died. They's two kinds of women and they's two kind of men, like you and Chuck, and this here Mary Brown's gotta pick between you, unless like I done she can wed the both of you."

He drank down the bourbon and I left him. I went straight over to the church social and found Benford. Mary was standing beside him. "Joe," I said, "you know me, I don't want any trouble. I'm gonna take Mary here home."

Joe looked at her, then at me. He could see she was madder than hell, but I weigh two hundred and twenty pounds, so he said, "Okay, Willie, you just made yourself a date."

She didn't say a word and got in the car like she was under arrest. I drove the car up the road and around the lake, and she still didn't say ar "Mary," I said, "if you're sor the way me and the old man about Chuck and you, I'm sor wanta apologize. I ain't got a against Chuck, except I think crazy to leave a swell girl like y if he hadn't hauled out I never w had a chance with you."

"Have you got one?" she ask her tongue was a flat icicle.

I KEPT on driving. It was a night and the lake was full It was a little lake, but it was de right then I felt like jumping i must have looked the way I wa ing because she suddenly sai sorry. I didn't mean to say th not really mad at you. I'm just I don't know."

She looked away at the sky, didn't have to explain because She was dreaming about Chuck and that Hollywood swimming p the way those actors get around. what I always wondered about: still in love with him, which she once she saw him up there on tha screen. And from that night o worse until it was pitiful. Ever Chuck was in we went to see came to town, and Mary just s holding on to her handkerchief a ing at him. Every time he wore ent suit, and every time his p longer.

The movie page in the Arcana had an article about him ever and one evening Harriet Spoon, tor, came out to interview the o "Wasn't he the black sheep of t ily?" she asked him.

"Well, you couldn't call Ch white," the old man said, "but h such a heller as people got to th

"Tell me about him," Harriet said, and when the old man got walked out of the room, beca didn't like ugly women and Har ugly like a frog, she turned to asked if little Mary Brown had Chuck's high-school sweetheart. you an idea what becoming an a do to a guy who once was pois that night in the paper there is a of me and a picture of Mary, tell I'm his half brother that works Arcana City Garage, and Ma home-town sweetheart.

That was all it took. The next of days people kept coming i garage to get their cars fixed a one of them says, "By the way you related to Charles Bouva movie actor?"

Whenever his movies came t they had his name spelled out tric lights without even mer actors like Gary Cooper or Carol bard. They sent the old man a couple of complimentaries, but man never went to see them, so I took Mary instead. Once I said "Suppose Chuck there was maki fifty bucks a week or so, do yo he'd be so almighty wonderful?

"Don't be envious," she said, the program in her pocketbook could put it in her scrapbook.

"I ain't envious," I said, "but i of funny. All the people, I noti keep askin' about him are th people who figure you're as gooc salary you make."

"It isn't that at all," she said achieving something. It's being all over the country, all over th probably. It isn't just anybody w do that."

Then one night she said to me

'ou leave Arcana? What can you r mount to here?"

o ething about the way she said it l me sore. I stood up and said, a I don't want to say much, because re. I don't want any trouble don't want to hurt your feel- t I got to tell you I think you're ag bughouse over these movies. cl never thought a sensible girl like uld do. So I'm gonna leave you e or a while till you get yourself ig ened out."

h ust stared at me as though she d t believe her ears. I could hardly e my own ears, so I walked away k hile I knew I still had the edge. w t straight home to the old man. w in the kitchen with his stocking the stove. I told him and he ou done right. Once in a while g to give a woman just one hard ve . . You just sit tight and see what pe s."

h s the way I sat but nothing hap- ec

N night I saw her go into a second- ru theater to see Chuck's last movie in She walked home alone, missing h avement cracks, and I followed at on the curb and watched her ro a light go on. She stayed up an r d then the light went off and I t me. Inside the house all the ts ere burning, though the old man al have been in the feathers a pl of hours ago. Near the picket I opped dead in my tracks. There a g green car parked out in front. ok at the license plates and knew it was. I walked inside and there, e ugh, sitting at the kitchen table di over a bottle of Scotch to the m, was Chuck!

e d on a suit I never saw in any he ictures. The coat and the pants i't hatch. Around his neck was a sil scarf. On one side of his head tl blue beret. Otherwise he was th same Chuck except for his teeth. re could look any more he jumped an pumped my hand. "How are Willie?" he said, and pulled me n to a chair and poured a drink of Sc ch. They were pretty well down fi and I could see the old man ni and teetering on his chair a bit li ning to Chuck, who went right al g.

he s no doubt about the guy, he wat you call personality. The le tchen was lit up with him. He fil d the room. He was way ahead ny dy who listened to him, and he ch nged from the guy I last saw vli into that B. & O. boxcar. He us g more words than he used to w d some of them were big ones. tal d faster and he had a kind of ic t like actors in the theater.

Fe ws," he said, "you probably de why I never wrote to you. Well, an ctor, not a writer. I just let it unti could sail in here and bend the elb v in person. Willie, you should e s n Pop here when I blew in. He n't l ow me. He took two steps over ard hat shotgun in the corner and abl d him!"

hu laughed and slapped the old man's shoulder. The old man grinned "It was your teeth done it," he said. "Chuck here's got his teeth all fixed over. Cost him six hundred dollars!"

Chuck laughed and showed his teeth and poured out three more jiggers. Holding up his drink, he said, "Well, here's to old times and new times. From now on everything is going to be different. I'm going to take the old man back to Hollywood with me, and, Willie, you come along. How does that sound?"

I killed the jigger and looked at him. The old man downed his and then got up quietly, waved his hand and went out toward his bedroom. He swayed a little, but not much. He was sixty-five and he could still pitch four good innings for the Arcana Blue Sox, but he'd had a big evening and he was sixty-five. "Look at him go," Chuck said. "He's all right, isn't he?"

"Yeah, he's all right," I said.

We sat there and for a minute we didn't say anything. Then Chuck said, "Willie, you want to go to California?"

"Nope," I said. "I got a job."

Chuck smiled. "Willie," he said seriously, "you're a funny guy. Four years ago you were the best mechanic in the state of Ohio. You still are but you're still working for the same jerkwater garage. I'll tell you what's wrong. You're too slow. You're good but slow. You live like you used to fight. You're always on the defense. You fight good and long, but all you can ever get is a decision. You know what I mean? You got to go out there and smack life in the face."

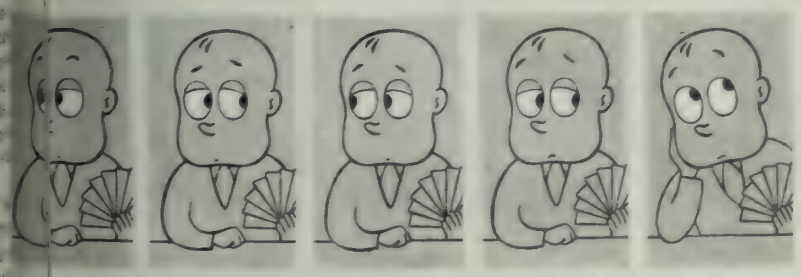
"Everybody don't have the same style," I said.

"That's right," he said. "But I'll tell you what I'll do. I'm lousy with money. I'm going to clean up. You know me. All right, you come out west with me and I'll pay your way through Cal Tech."

I shook my head. "That's a pretty swell thing to give me, Chuck," I told him, "but I guess I can't. You go on out and take the old man. A couple of months of that sun'll take the wheeze out of him. He's got it coming."

He argued a little more and then suddenly he said, "I know—you got a girl. Right?"

"I had one," I said.



He looked puzzled. "Who?"

I looked straight at him. "Mary Brown," I said.

"Mary Brown . . ." He let his mind go back, picking out memories. "Mary Brown!" he cried. "Sure! Where is she? How could a girl that pretty stay unmarried four years?"

I didn't know. I didn't want to go into it. I killed off the bottle and got up and went to bed.

THE next morning, long before Chuck got up, a letter came for me special delivery. I knew it was from her and my heart beat like an oil pump. Inside the envelope there was a picture of Chuck cut out of one of the magazines. That was all, except that the picture was torn in half, right down the middle. I knew what it meant, like anybody would, and any other morning I would have run clear across town to see her. But not

this morning. Giving up a guy you can't have who is three thousand miles away is one thing. But with Chuck right there in town it was different. That letter came a day too late, or Chuck came a day too early.

I just went down to work the same as ever. And before noon it seemed like everyone in town knew Chuck was home. He lit up the town just like he lit up the kitchen.

Harriet Spoon and the mayor and the sheriff all went out to call on him. That night they gave him the front page in the Herald. But that was only the beginning. He made a personal appearance at the Stadium Theater and the president of the chamber of commerce introduced him on the stage. They even brought out the old man to say something. The old man had on his Sunday suit and you could almost smell the mothballs clear to the back row where I was sitting. Then finally they made Mary come up from the audience, and she stood there blushing and smiling and glowing, while Chuck held her hand and the audience applauded. That was where I left.

It seemed like the whole town went on a vacation with him, and everywhere he went Mary went with him, like that lamb in the fairy story. And you couldn't blame her. Only once did I see her to talk to her. That was when I was getting home from work and she and Chuck were climbing into his car on their way to a banquet the Rotary Club was giving him. I just looked at her and she looked at me and we both said "Hello" and stared a little, while Chuck watched us, and then I went in.

THAT was the night I persuaded the old man that he should go to Hollywood. It was hard to do, but finally he broke down and said he'd try it just one winter and see if it killed off his wheeze. "Tell me they drink gin out there," he said thoughtfully, because he hated gin.

"They drink everything in sight," I told him.

"What you gonna do?" he asked me. I could feel those old blue eyes cutting into me.

"Just what I'm doin'," I said, not looking at him.

"You're not gonna blow town, are yuh?" he said, and that's just what I'd been thinking. "You ain't gonna maybe become a mechanic in the Army for example?"

"When they draft me," I said, "then I'll be in the Army."

But I didn't fool him. He looked away and drank down his coffee and tossed a piece of meat to the cat, but I didn't fool him. He knew I was thinking about leaving town and was only waiting for him and Chuck to leave first. So I didn't say anything, and then after a couple of days it got so I didn't go home to eat. I ate at Schidell's restaurant and hung around the garage or the pool hall until after midnight.

I didn't see Chuck, but I heard plenty about him. What I heard was very peculiar. First it was a crack somebody made in the garage. Then it was some gossip in the poolroom. A poolroom is one place where they don't beat around bushes. And the story was that Chuck was through with Mary Brown and was playing the field. I could hardly believe it, but it was a fact. He was moving from one girl to another so fast that even their steady fellows couldn't keep track of him. It was a regular blitzkrieg. It got so the poolroom was full of guys that Chuck had put back into circulation. There was plenty of talk about knocking his ears off, but nobody did any more than talk, because they remembered him. His fists had built up a reputation that nobody was going to forget in four years.

Then one afternoon I saw Mary. She was sitting in their car outside the bank waiting for her old man. She looked terrible. She looked as though she had been sick. I stopped for a second before her old man came out and said, "Hello, Mary," and she smiled and said, "Hello" in a voice I could hardly hear, as though her heart had been killed. Then her old man came out and they drove away.

Something about the way she looked made me burn up inside. Sitting in that car, she looked like a picture of one of those Frenchwomen on the way to the guillotine. I said to myself, Why does he have to fool around with her? Why does he have to fool around with the home-town girls when he's got a swimming pool full of them back there in Hollywood. I walked around for two hours and then started looking for him.

He was at the Arcana Country Club where there was a big dance in his honor. Chinese lanterns were hanging from the limbs of trees and the richest people in town were dancing on the big veranda or strolling around the lawn carrying drinks. I waited till I saw him come walking out with a little bunch of people, mostly girls, and when he saw me I beckoned to him. He excused himself and came over, lighting a cigarette and smiling. "Good evening, Willie," he said, "haven't seen you around lately."

I went right to the point. "Chuck," I said, "I never want any trouble with anybody, which you know, but you been asking for trouble."

"What?" he said, smiling and rocking on his heels a little. I knew he was ready and I knew it was no good, but I said, "Chuck, four years ago you run out on her. You let her face the music and you ducked outa town. Now you're back again and you haven't changed much that I can see."

"And so what about it?" he asked.

"Well," I said, "I don't wanta beat the hell outa you right here in front of all your rich friends who used to kick you around when you were on the county with me and the old man, but if you wanta argue about it we can go down the fairway a piece and settle it out."

He laughed out loud. "Come on, Willie," he said, and I followed him across the first tee and out onto the fairway. A few people stood staring after us. About fifty yards down the fairway he stopped and took off his coat.

"This ain't far enough," I said, "they can still see us."

"You know me, Willie," he said. "I wouldn't be any good without an audience."

I took off my coat. He looked pretty good standing there. He was only about a hundred and eighty pounds but he was fast and smart and he knew how to fight. Every time I connected with him he hit me three times. I swung like a discus thrower and he jabbed them in from about ten inches. I knew what I had to do was take a beating until he got careless. Just once he was bound to get careless and then I had to get him. He circled around me with a grin.

THERE were people packed up on the tee now, watching. "We should have charged admission," he said, and sent in his left twice. It was timed perfect and it had a lot of snap and jar. I swung and missed and he laughed and said, "Good old Willie and his Sunday punch!" I went in again and suddenly his left was down and there he was wide open and smiling and I let him have it. It was just right and he went slamming across the grass a full ten feet. For a second I was scared I'd hurt him but he rolled around and sat up. He grinned but he didn't get up, so I walked away, leaving him sitting there.

That's the last I saw of him. I walked past the people on the tee and nobody said a word. But the next day it was all over the town. But nobody said anything about it to me, not even in the poolroom. The more I thought about it the worse I felt. I couldn't go home and face the old man. So without going home at all I went up to the lake, broke into one of the summer cabins and stayed all night to think it over. There seemed like only one thing left to do and that was leave town. All the next day I fished for bluegills and caught three and thought it over. I thought about Mary and the old man and Chuck and the garage and Hollywood and the Army and when I figured it all out I walked back to town and went home to pack up.

Nobody was there. I looked in the closets for my clothes and saw that all the old man's stuff was gone. Chuck's stuff was gone from his room too. So I called up Mac, the boss at the garage, and asked him if he'd seen or heard of the old man. "Yeah, I have," h "I saw him yesterday. He was with Chuck for Hollywood. Th new plugs put in here."

It was a blow. But I had it cor me for going crazy. "Okay, M said. "I couldn't get down to w day. I didn't feel good."

"That don't matter any more, said, "because you don't work any more. I work for you."

"What do you mean?" I said.

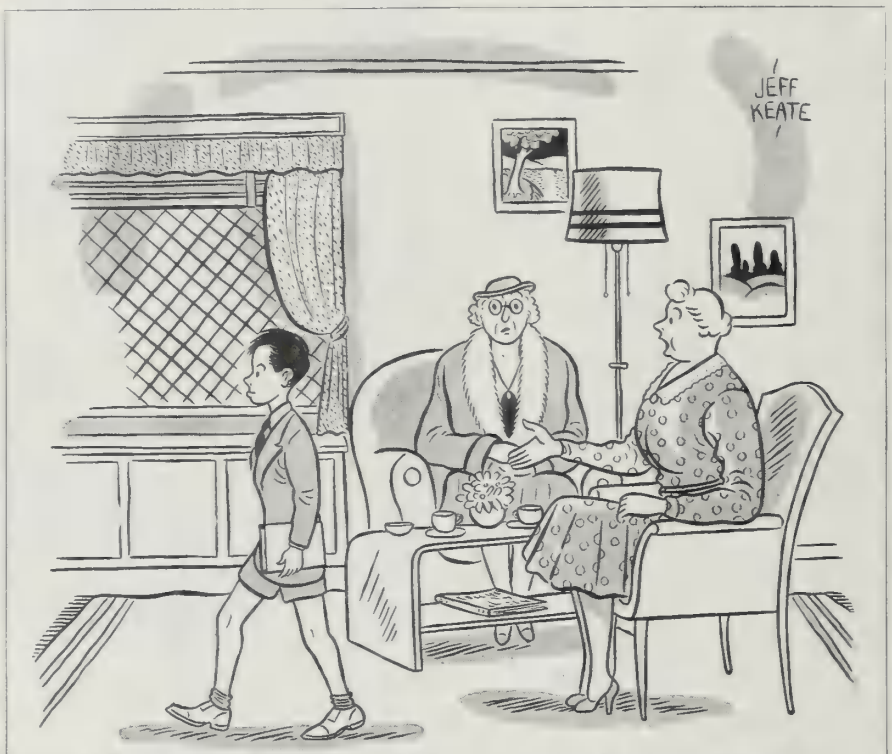
Mac laughed. "They told me you," he went on. "Chuck didn buy plugs in here. He bought the damn' garage. I got the papers my hand. You own the joint. want to know is will you give me

I let the receiver drop on the t could still hear Mac jabbering a he laughed and hung up. I got went into the kitchen. If Mac then it was true. I couldn't figure I cleaned the bluegills and w about to drop them into the fryi when the door opened and Mar there.

Things were happening too f just stood there and stared at h she stared back, smiling a litt coming over toward me. I sat d the chair and she took the fryi away from me. "You couldn't fish," she said. "Better let me

SHE put the pan on the sto I watched her. I couldn't talk could feel was how wonderful it see her close again and be alo her. "Set another place at the tab said, and I got up then and pu two plates without dropping eith though I couldn't feel them. Th down again, and she said, with h turned: "I don't know what yo of me any more, but I know eve that happened—between you and too—and I don't know anythin clear except that I love you."

I took a deep breath like lo drinks of water in a sunstroke a "Don't go a word further than t



She turned around and came and the rest of what she had to said in my arms, which was eas nicer. "I didn't know what he w said, "but now I see through hi just a show-off, just a ham act a . . ."

"Forget him," I said, and I wa to tell her how we could both fo when the doorbell rang. It was t door and so I walked out thro hall and the parlor and ope Sammy Cass was there with a te I signed for it and took it and find a dime to give him so he grapes all the way down the arb he was leaving the yard.

It was a long telegram and it w the old man and St. Louis. This it said: "Dear Son. This is su country and a big town. We find you nowhere when we left. me that told Chuck how it wa Mary. He thinks he put up a good act. He hopes you get right away and take her to see pictures. He also says that y graph your right hand too much he had to hold out his jaw a full onds before you could find it. you can come out west for a hon sometime. Love from us both father, Nate Boone."

I read it twice, and slowly it on me. I walked back to the holding the telegram in my hand was standing there smiling, j nothing had ever come betwee cept that she fell in love with m a telegram, darling?" she asked. does it say?"

I put it slowly in my pocket a I kissed her. "It don't matter said. "It's just from the old m let you read it—after we get m

"Like all parents, Henry and I hope someday he'll be President —and Henry thinks he knows a way he can beat Roosevelt!"

JEFF KEATE

NEW 1941 HUDSON WINS SAFETY AWARD

For Safest Body Design

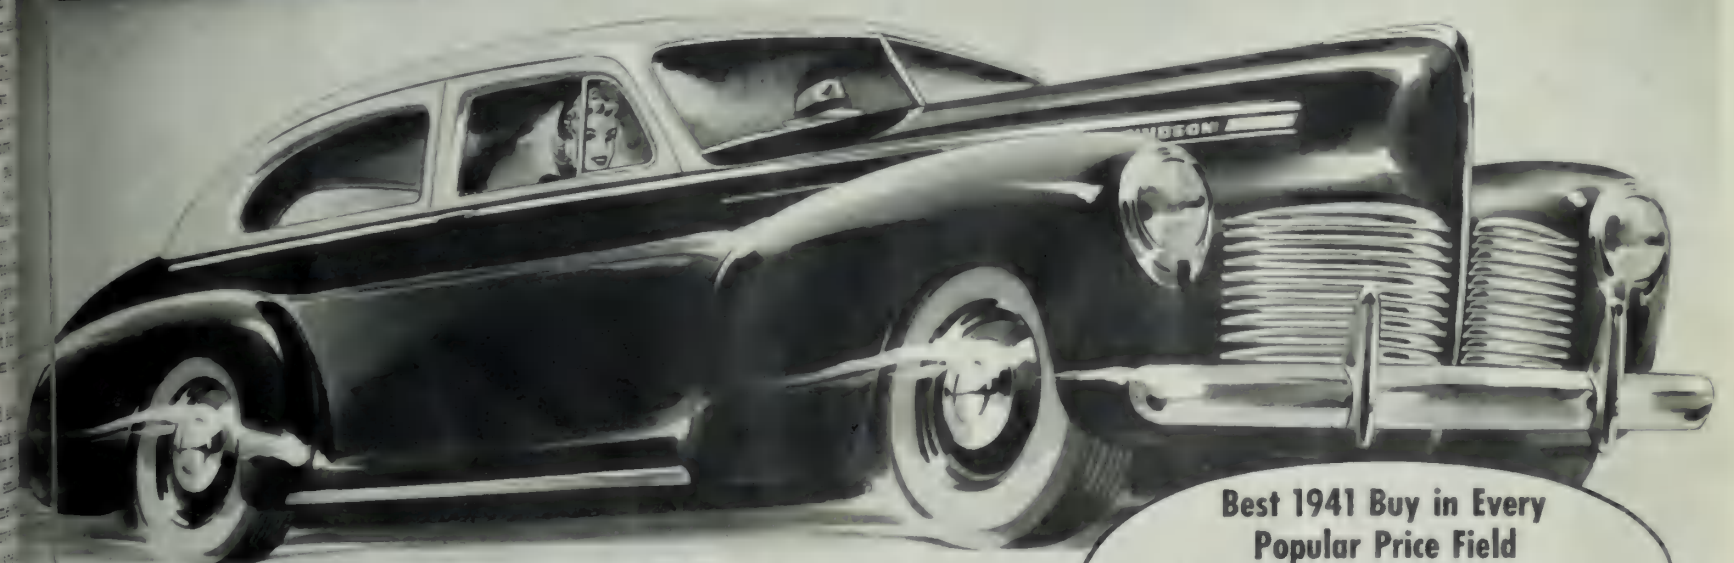
LEADING SAFETY AUTHORITY GIVES HUDSON HIGHEST RATING ON FEATURES FOR PASSENGER PROTECTION...FIRST PERFECT SCORE EVER RECORDED

PICTURED HERE is the trophy awarded to Hudson for safest body design of all 1941 cars . . . by *Safety Engineering Magazine* and its publishers, the Alfred M. Best Company, America's foremost insurance analysts and recognized leaders in the promotion of safety.

In this annual award, cars are judged on 14 points of body design which do most to help you (or any other driver) to prevent accidents, and to protect you and your passengers if accidents occur. *On every one of these 14 points, Hudson received the highest possible rating.*

You Drive With *Super-Safety* . . . in a Hudson

But Hudson safety only begins with safest *body* design. All the way from GO to STOP, Hudson guards you and yours with *super-safety* found in no other automobiles built today.



Patented Double-Safe Brakes! If hydraulics should fail (as they can in *any* car through leakage due to accident or service neglect), you just push farther *on the same foot pedal* . . . and STOP. But *only* in a Hudson!

Patented Auto-Poise Control! Automatically helps hold front wheels straight in high winds, on rough roads, even if a tire blows. No other car has anything like it!

Dash-Locking Safety Hood . . . hinged at the front so wind can't lift it if it's left unlatched! *Extra Wide Vision* . . . front and rear! *Extra Power* to whisk you out of tight spots!

Here's one map you

Collier's for January 18, 1941

WHAT ARE THESE WALLS MADE OF? Conflicting weight laws in adjacent states • Conflicting regulations governing lights and safety equipment • Length and height laws that arbitrarily block whole sections of U. S. highways • A string of license plates from state to state • Insurance that's good in one state — insufficient in another • Special ownership taxes and horsepower fees • Mileage taxes — collected in a confusion of ways • Official cards, forms and stickers — about which there is official disagreement even within the same state. Altogether — thousands of laws that block the free flow of goods by truck.

SOME OF THE STATE BARRIERS TO TRUCK TRANSPORT

ever saw in school!

WHEREVER THEIR WHEELS CAN ROLL, THE TRUCKS OF AMERICA HELP REDUCE YOUR LIVING COSTS . . . HELP BRING BETTER LIVING AND BETTER BUSINESS . . . HELP PROVIDE MODERN HIGHWAYS AND SWIFT, FLEXIBLE TRANSPORT FOR AMERICA'S DEFENSE . . .

BUT— We can't jump trucks over man-made interstate walls!

VER take a cross-country trip—you and your family—in the family car ...over those grand roads...through the lovely land that is America? ou ever noticed any barriers at state ur aries, did you?

B they were there, Mister . . . *real barriers* hi you couldn't see. *Barriers which stop, sl w, or handicap the freight-carrying uc that do so much to lower your living sts . . on food, clothes, furniture . . . on ar everything you buy.*

Th e barriers are the confusion of length d eight laws . . . special fees . . . and te ermits.

LACK OF UNIFORMITY

r ample — a truck traveling south is pro- ed g according to law, with a normal ad. But the moment it crosses the Ohio ve half the cargo must be taken off. It co es a two-truck load until another state ie reached. That means an increase in st d needless delay.

Tr ks rushing airplane parts between rta west coast cities have been delayed u necessary inter-state barriers — in some ses s much as one or two days.

A id-west manufacturer of percussion ps shipping by truck to save ecius time. November and De- mb schedules called for delivery of over one million pounds. Shipments went through on time, but a barrier tax of $500 per trailer — imposed by a city on the route — caused a terrific increase in the cost of producing vital defense material.

A truck load of iron lungs from an American manufacturer, destined for Ottawa, Canada, ran afoul of a weight-law barrier. After much argument, this humanitarian shipment was released — but not until after a delay of twelve hours. And, because of missing subsequent connections, the iron lungs arrived two days late in Ottawa.

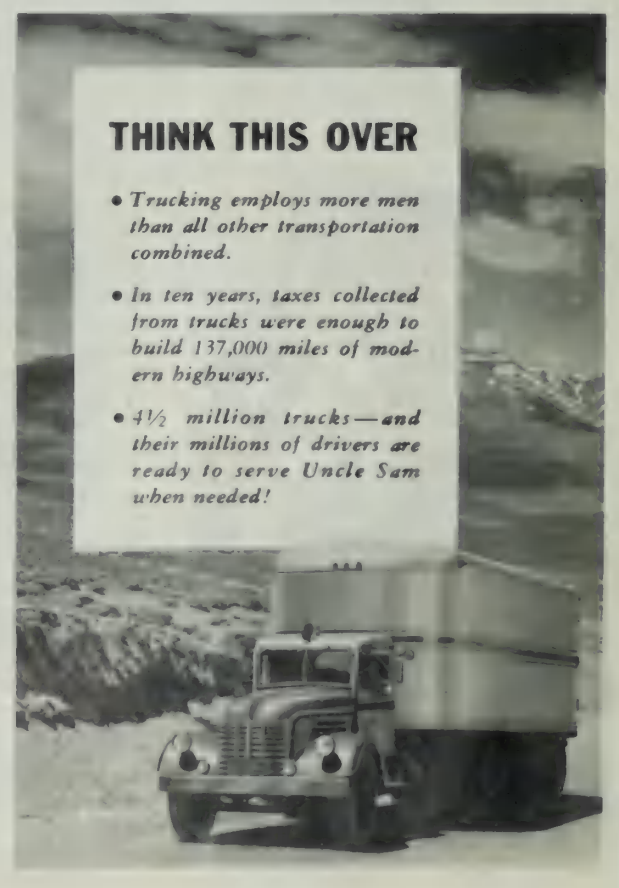
And so it goes.

Truck operators try to anticipate these delays and avoid extra expense. But it is not always possible.

REDUCES TRUCKING ECONOMY

What does all that mean to you? Simply this — interstate barriers are preventing trucks from cutting your living costs even *more* than they do now.

Trucks—unlike other forms of transportation—can travel direct routes—the shortest distance between points. Faster deliveries, with less handling, mean less damage—less loss—lower prices to you.



Trucks speed production — make mass production economies possible.

And taxes collected from trucks go a long way in building and maintaining America's highway system.

TRUCKS PAY ALL HIGHWAY UPKEEP?

If truck taxes this year were all applied to roads, they'd pay for the entire upkeep on every mile of state highway in the U.S.A.—with enough left over to build 8,000 miles of new roads besides! That's a lot of roads for you to enjoy as a motorist—and for Uncle Sam, in national defense.

Next time truck legislation comes up for discussion, keep these things in mind. Remember—the free flow of goods by truck makes a difference, *a big difference*, in your family's budget!

How to Train Defense Workers

Continued from page 23

immediately. Very few fail to win advancement, and the industrialists of the state no longer insist that costly machinery will be wrecked by workmen who have not had years of experience. The important thing is that other states can follow Connecticut's example. A few are already doing so. The federal government has appropriated $15,000,000 for the payment of teachers' salaries in the states which establish vocational training for defense workers.

So a start has been made, at least, toward supplying the additional 2,500,000 semiskilled men who will be needed for the national-defense program next year. Colonel F. J. McSherry, who represents the Army and the Navy on the Co-ordination Committee on Labor Supply headed by Sidney Hillman, has declared that Connecticut pointed the way. The nation as a whole, he said in September, was following the Connecticut plan.

"The work you have been doing here," Colonel McSherry told the Connecticut State Vocational Association, "has greatly helped other states in starting their work."

Originally, though, the Connecticut plan was merely a scheme to get men off the relief rolls and to halt a curious paradox—the employment of skilled workers from outside the state while residents, lacking proper training, could not get jobs. The project had its inception in the inaugural message of Governor Raymond E. Baldwin, who took office in January, 1939. Its success, though, has been largely due to a young manufacturer, Carl A. Gray. Mr. Gray, now president of the Grenby Manufacturing Company, a machine-tool concern of New Britain has given more than a year of his time without pay as chairman of the governor's commission to study unemployment.

Everyone Must Help

One of the first tasks of states trying to emulate Connecticut will be to find a Carl Gray, which won't be easy. On the other hand, they can adopt certain basic principles which Mr. Gray believes vital to any plan for the training of defense workers. He thinks the work must be done by the local communities, with minimum supervision by state or federal authorities. He insists that all elements in the community must co-operate—finance, industry, education and labor. This has been done everywhere in Connecticut. A representative of the A. F. L. or the C. I. O. has been active on each community committee. In consequence, union labor hasn't interfered, as it has often done in the past, with the training of new men for industry.

The Connecticut plan goes back to a meeting at the Hartford Club in July, 1939. Governor Baldwin presided, and it was attended by such men as John A. Coe, president of the American Brass Company; Eugene Wilson, president of United Aircraft Corp.; Frederick Conard, vice-president of the Underwood Elliott Fisher Company; Harry C. Knight, president of the New England Telephone Company.

Mr. Gray addressed the meeting. He said that a rapid survey of unemployed and unemployables was being taken and that local committees would have to help because the situation differed in different communities. He said two main groups required help—the "forgotten youth" with no adequate training and the "skill-rusty" older men who had abandoned their trades because of the long depression.

The unemployment survey was finished in two months. It revealed that a third of the state's employable unemployed were young men and women between sixteen and twenty-five years old who were untrained and unskilled, who were the living casualties of the depression. In due course the Young Commission, working on a national basis, confirmed these figures. Another third represented "skill-rusty" older workers. Mr. Gray of Connecticut thereupon set out to train the first group and to salvage the second.

He picked key men in Bridgeport, Manchester, Meriden, Bristol, New London and other manufacturing centers in the state. These were men of the type that had met at the Hartford Club in July, and in due course they constituted an advisory council to which Governor Baldwin also appointed the commissioner of the state board of education, the director of the State Employment Service, the commissioner of the Department of Labor, the president of the State Manufacturers' Association and representatives of the labor unions. Carl Gray told this group, again, that unemployment was a local rather than a state problem. Governor Baldwin lent his prestige and influence to the cause and addressed meeting after meeting throughout the state.

Meanwhile, Mr. Gray was preparing to illustrate what he meant. He was getting ready to set up the first training course in Hartford.

No money had been appropriated, but the governor agreed to draw on his contingent fund for $2,000 or so. Gray found, of course, considerable skepticism as he started. Industrialists said that the "forgotten youth" of sixteen to twenty-five could not be trained and would wreck costly machinery. They added that the "skill-rusty" older men were beyond help. Labor leaders expressed alarm that the new men would displace union members. Finally, Gray was told, no place for a training school was available in Hartford. His answer was that the Hartford Trade School would do. He would schedule the classes from eleven o'clock at night to seven in the morning so that the regular sessions would not be interfered with.

The most difficult part of the job, at first, was to select the boys who would take the course. The State Employment Service, fortunately, had fairly adequate data on the education and qualifications of the unemployed youth. The service agreed to select an initial batch of about one hundred. ' the decision which may have most important factor in the the Connecticut plan. This w ject all candidates to the m aptitude tests evolved by psy during the past decade or two

Gray was somewhat dubiou value of the tests. So we Leonard Maloney, head of Employment Service, and a g manufacturers. Psychologist on WPA projects—themselv wise unemployed—were av give the tests, however, and t ment was tried.

The Cream of the Cla

Major Maloney, George manager of the Bridgeport bra employment service, Charles his assistant, and Mr. Gray unanimous that aptitude tes very well indeed. The misfits- who are clumsy with their ha afraid of machinery—are cul the start. So are the unintelli

Out of each 100 boys takin from 50 to 55 qualify for f amination. An additional te average, drop out because o defects. Another ten may be by personnel managers who all candidates with an eye to h when the five weeks have pass out of every 100 only 30 to lowed to take the training cou this does not mean that the not benefit greatly. They a stores, shops and filling statio of them get the jobs vacated qualified boys.

Fifty-three boys were finall for the first course in Hartfor while, Pratt & Whitney Aircra additional equipment in the had assigned about a dozen foremen and workmen to serve ers, and had agreed to pay the Weston, of the regular staff at school, was placed in gener and one night at eleven o'clo middle of November, 1939, wo It was going to be tough. On hour break, for lunch, was pe two o'clock in the morning.

During a mere five weeks 20 training would be jammed into But on December 22d the en of 53 was graduated; not one by the wayside. And every was hired at once. They wer for Pratt & Whitney Aircraft,

nen Mr. Walker said. "But today
have ifty who may never have seen
a file until they took the training course. We'll employ all they will send us."

That morning was a cold, damp, rainy New England day. Outside the Colt plant, wet and bedraggled, was a line of about 200 men looking for work. I asked Mr. Walker how many of them he might be able to hire.

"With luck, three or four," he said. "On the average, about two."

"How many men could you put to work immediately, if only they had some training?"

"At least 200, easily," he said.

But the soggy 200 had no training. Colt's had neither time nor facilities for teaching them the essentials—even the very basic essentials—of the machine age. Mr. Walker was emphatic, however, in his praise of the boys who had taken Connecticut's training courses. He was astonished at the progress they had made, he said. In the plant, at the moment, 250 were at work.

It's Better Than Relief

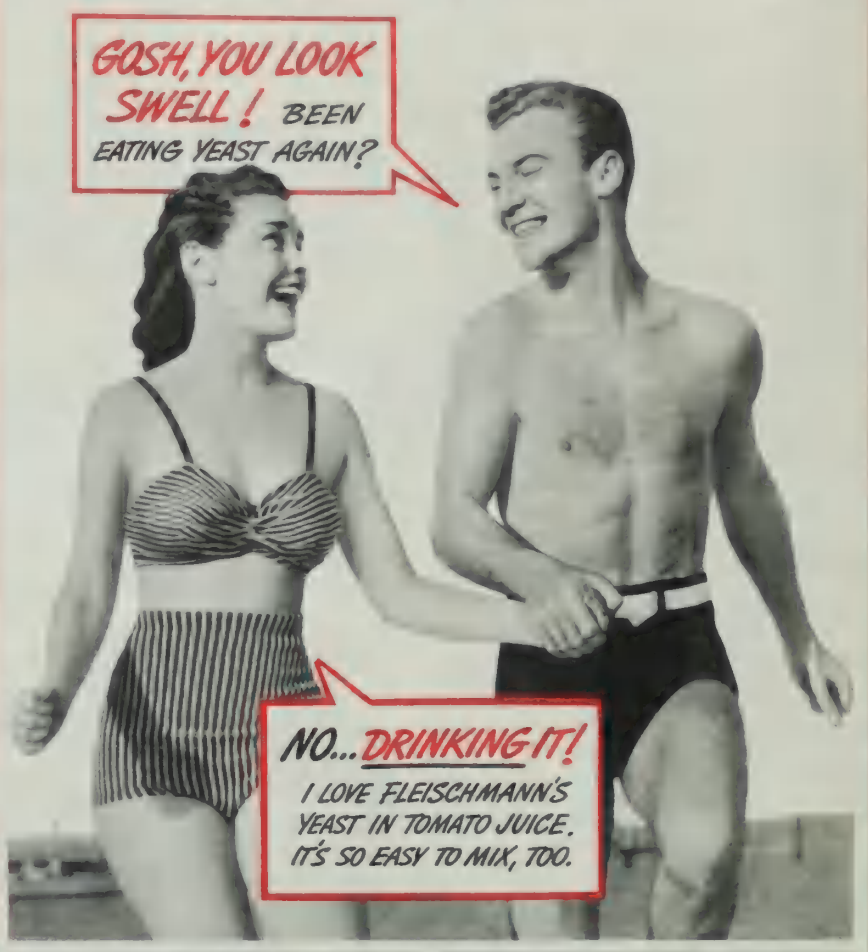
The young men of the United States may be mechanically minded, as the Connecticut plan appears to prove. This does not mean, though, that many of today's youth have had experience working with tools. Less than 42 per cent of Connecticut's unemployed had previous manufacturing experience of any kind. Most of the boys with whom I talked admitted that their familiarity with machinery was, at the best, sketchy. One said he had spent a summer in a sawmill. Another confessed that he did not even know how to drive a car.

Today's war is a war of machines. The defense program is a program of machines. In the classified advertisements of nearly all big newspapers today may be read the story of industry's compelling needs. In a single issue of the New York Times are help-wanted notices of the Sperry Gyroscope Company, the Wright Aeronautical Company, the Federal Shipbuilding and Drydock Company and many others. Assemblers, machinists, grinders, operators for turret and engine lathes, for the Bullard lathe—all these are lacking. Immediate employment is available for such men.

But throughout the United States the relief load and the number of men on WPA projects remain about the same.

The answer is training. Connecticut has proved that not very much of that, provided it is efficiently given, is needed. The federal appropriation of $15,000,000 is now being used to pay teachers where states inaugurate training courses. New York State has appropriated $110,000 for the purchase of tools and machinery. Other states are getting under way.

The defeat of Governor Baldwin in November will in no way interfere with Connecticut's program for training men. The greater part of the work is now in the hands of private industrialists, in any event. Besides, Mr. Gray's commission receives its authority from the legislature of the state. Finally, Governor Robert A. Hurley, who has succeeded Governor Baldwin, is pledged to carry on the training.



The cost? Up in Connecticut, operating with Yankee thrift, Carl Gray has paid but a mere $600 for administrative expenses during a year and a half. He has no staff. His stenographer is a part-time volunteer. Money has to be spent for materials, for light and heat and power, of course. And how much have these cost?

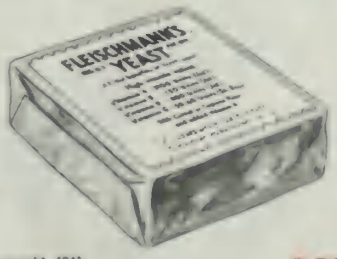
"The experience of Connecticut," says Carl Gray, "has been that thoroughly competent beginners, entirely satisfactory to the employer, may be turned out at an average cost of $17 per student. With increased job-training volume, this per capita cost will be further reduced."

Not much WPA employment or relief can be supplied for $17 per man.

You'll like yeast this new way

JOE: You know, I felt absolutely tops when I was eating yeast. But I didn't like the taste. I couldn't stick with it.
ANNE: Same here! But this new way, in tomato juice, gives you all the benefits of yeast, plus a delicious taste. I'm staying with it this time . . . and twice a day, too. Nobody needs to sell me on the idea. I *know* how much better I feel.

JOE: Maybe I'll start again. I read that "yeast is one of the richest of all natural sources of the wonderful vitamin B complex." Right?
ANNE: Certainly. It's been proved, and lots of us don't get enough. That's why it gives you that up-and-coming, going-to-town feeling! Try it out again . . . first thing in the morning, last thing at night. And take my word for it, you'll like what it does for you.



MASH . . . Take a cold cake of Fleischmann's Fresh Yeast and mash it in a dry glass with a fork.

STIR . . . Add a little cold tomato juice, milk or water. Stir till blended. Then fill glass. Stir again and . . .

DRINK your yeast this delicious, easy way. It's quick, too . . . whole business takes less than a minute!

Fleischmann's *Fresh* Yeast

DRINK IT . . . TO YOUR HEALTH!

They've Got the Flu!

Continued from page 18

they would have taken an enormous stride forward. They would have converted this violent death to a simple animal where they could watch it, feel over it and perhaps get some real facts about it.

Landlaw filtered the throat washings the group had collected in hospitals. The filter would strain out any bacteria—and the stuff that went through would be—what? Landlaw didn't know. He hoped it would be virus—the virus of influenza. With a blunt syringe he installed a few drops of this elixir of death in the nose of a squirming ferret. Then the group sat back to wait. It wasn't a long wait—only 48 hours. Then one ferret got sick with a disease that looked like flu! Youngest members of the group enthused. They had flu cornered in a research animal! It would be easy from this point on. Landlaw patient and careful, curbed their enthusiasm. What made them think this was flu? Certainly it looked like that unruly disease. But unfortunately, be said coldly, good medical research wasn't based on casual appearances and youthful enthusiasms. They had to know.

They passed this sickness—whatever it was—from ferret to ferret; and from ferret to mouse. Then, after a few months of this, a splendid thing happened. Stuart-Harris was examining a ferret one day when it let go a beautiful full-blown sneeze, right in his face! Two days later he was flat on his back with fever, headache, sore muscles—but he had an ear-to-ear grin on his face. The cycle was completed. They had passed flu from sick man to ferret, and back to man again. It was a virus disease. Now things were moving.

Flu researchers the world over had a hot scent and were now on the trail. Down in Australia F. M. Burnet made a happy discovery. He found that flu virus would grow and thrive in fertile eggs. One simply punched a minute hole in the end of an egg and dropped in a little virus. Then the hole was sealed and the egg placed in an incubator. The virus, which lives only on live tissue, went to work on the embryo.

This discovery gave researchers the ready source of infective material that they needed. It saved them the tedium of grinding up lungs of mice killed by flu, or the nasal passages of ferrets.

Work of this sort, clever as sin, began to pop everywhere. A group of Russian workers in Moscow wanted to know what would happen if you dropped virus into human noses. They got a group of "volunteers"—whether or not they were captured from a passing streetcar the literature does not record. In any case the volunteers got the virus and got the disease.

Up at Harvard other men wanted to check on the belief that flu is spread by sneezing. So they built a sneezing machine—a small, glass-enclosed cage with an atomizing nozzle stuck in one side. Ferrets in the cage got flu after a couple of blasts of the atomizer. Further work with high-speed cameras and other equipment indicated that droplets are expelled from the mouth of a sneezer at the rate of 100 miles per hour; and that flu microbes in the droplets float in the air, well and happy, for as long as half an hour.

Meanwhile, the Rockefeller Institute in New York had its own problems. Dr. Thomas Francis, Jr., pink-faced, bespectacled, continued the work of Laidlaw and began hunting virus strains of his own—in Alaska, Puerto Rico, Philadelphia. He noted that all strains were not alike; some were blustery and killing, others were meek and mild. As often as not an animal that was immune to one of these strains (by virtue of a recent attack of the disease) would not be immune to a second. Was flu, then, a disease like pneumonia, of which there are 30 types? It looked as if something of this sort might be the case.

A Vaccine with Drawbacks

Tommy Francis, friendly, gracious, a superb worker, chased flu microbes through the San Joaquin Valley in California and in the labyrinthine depths of Brooklyn. He found that he could shoot the microbes of a certain strain—say Philadelphia 37—into the bloodstream of an animal. Instead of getting the disease—as it would if the virus were dropped into the nostrils—the ferret reacted in quite the opposite direction. Somehow this potent juice caused the animal's blood to build antibodies—immune factors which fight off infection. After being vaccinated in this manner ferrets got high-grade protection!

"That's the beauty of our marriage—Henry lives his life and I live mine"

EDWARD JOVE

Would a man react the same way when given shots of virus? Francis got a hundred volunteers and shot the flu juice into them. None of them had adverse reactions. Antibody content of the blood of nearly all of them shot up! It appeared that live virus vaccine would protect. Still, it had its drawbacks. For one thing, it was good only for a single strain. PR-8 recovered in Puerto Rico wouldn't protect against WS (named for Wilson Smith) found in London.

This was a discouraging fact with obvious implications. There were dozens of strains loose in the world and you couldn't vaccinate against all of them. If you did, like as not an unknown one would drift in from somewhere to knock the vaccinated man over.

So things were left still pretty well up in the air. All researchers could do was wait for an epidemic. Then they could rush out, isolate the virus responsible, grow it in eggs and make a vaccine. No, this wasn't the answer. But this was the situation last spring.

In the course of the seven previous years a tremendous assault had been made on flu. Shelves sagged under the literature that accumulated; but the key to the situation was missing. No man could be sure but what he would be among the twenty million that went to the graveyard next time flu took a world tour. Then a magnificent history-making laboratory accident happened.

Dr. Frank Horsfall, who took over the Rockefeller flu work when Tommy Francis accepted a faculty job at New York University, noted that his ferrets were dying for no accountable reason. But a little investigation disclosed the cause: there was a lab epidemic of distemper, terror of all researchers who work with ferrets. This disease kills the animals surely and swiftly. It is costly—ferrets come at $4 each; and often erases months of tedious work already done on the animals.

Horsfall rushed to save what animals he could. His soft voice grew sharp as he prodded his four assistants to hurry: grind up lung tissue of animals that had died, whirl it in a centrifuge to remove solid particles and shoot this back in

Grasping better-tempered ferrets by neck and tail, and evil ones with forceps, he again started dropping virus in noses to infect the animals with flu. Then he sat back to wait for them to get sick with the same assurance that a man looks to the West for the sunset. But they stayed contrarily, obstinately well! Horsfall bridled. These creatures out of hell *had* to get sick. He was wrong as could be. They didn't have to at all. And they didn't. For some unaccountable reason the Stuka microbe that had always caused flu before wasn't working!

Worried, Horsfall checked his virus and found it still potent enough to kill mice. There was but one explanation. Somehow—he hadn't the slightest idea why—the combination of the flu virus from human beings and the distemper virus from dogs seemed to give wide-scale protection. It seemed here was a striking fact—to protect from all types of virus on hand lab. Here was the overlapping that research men had sought long!

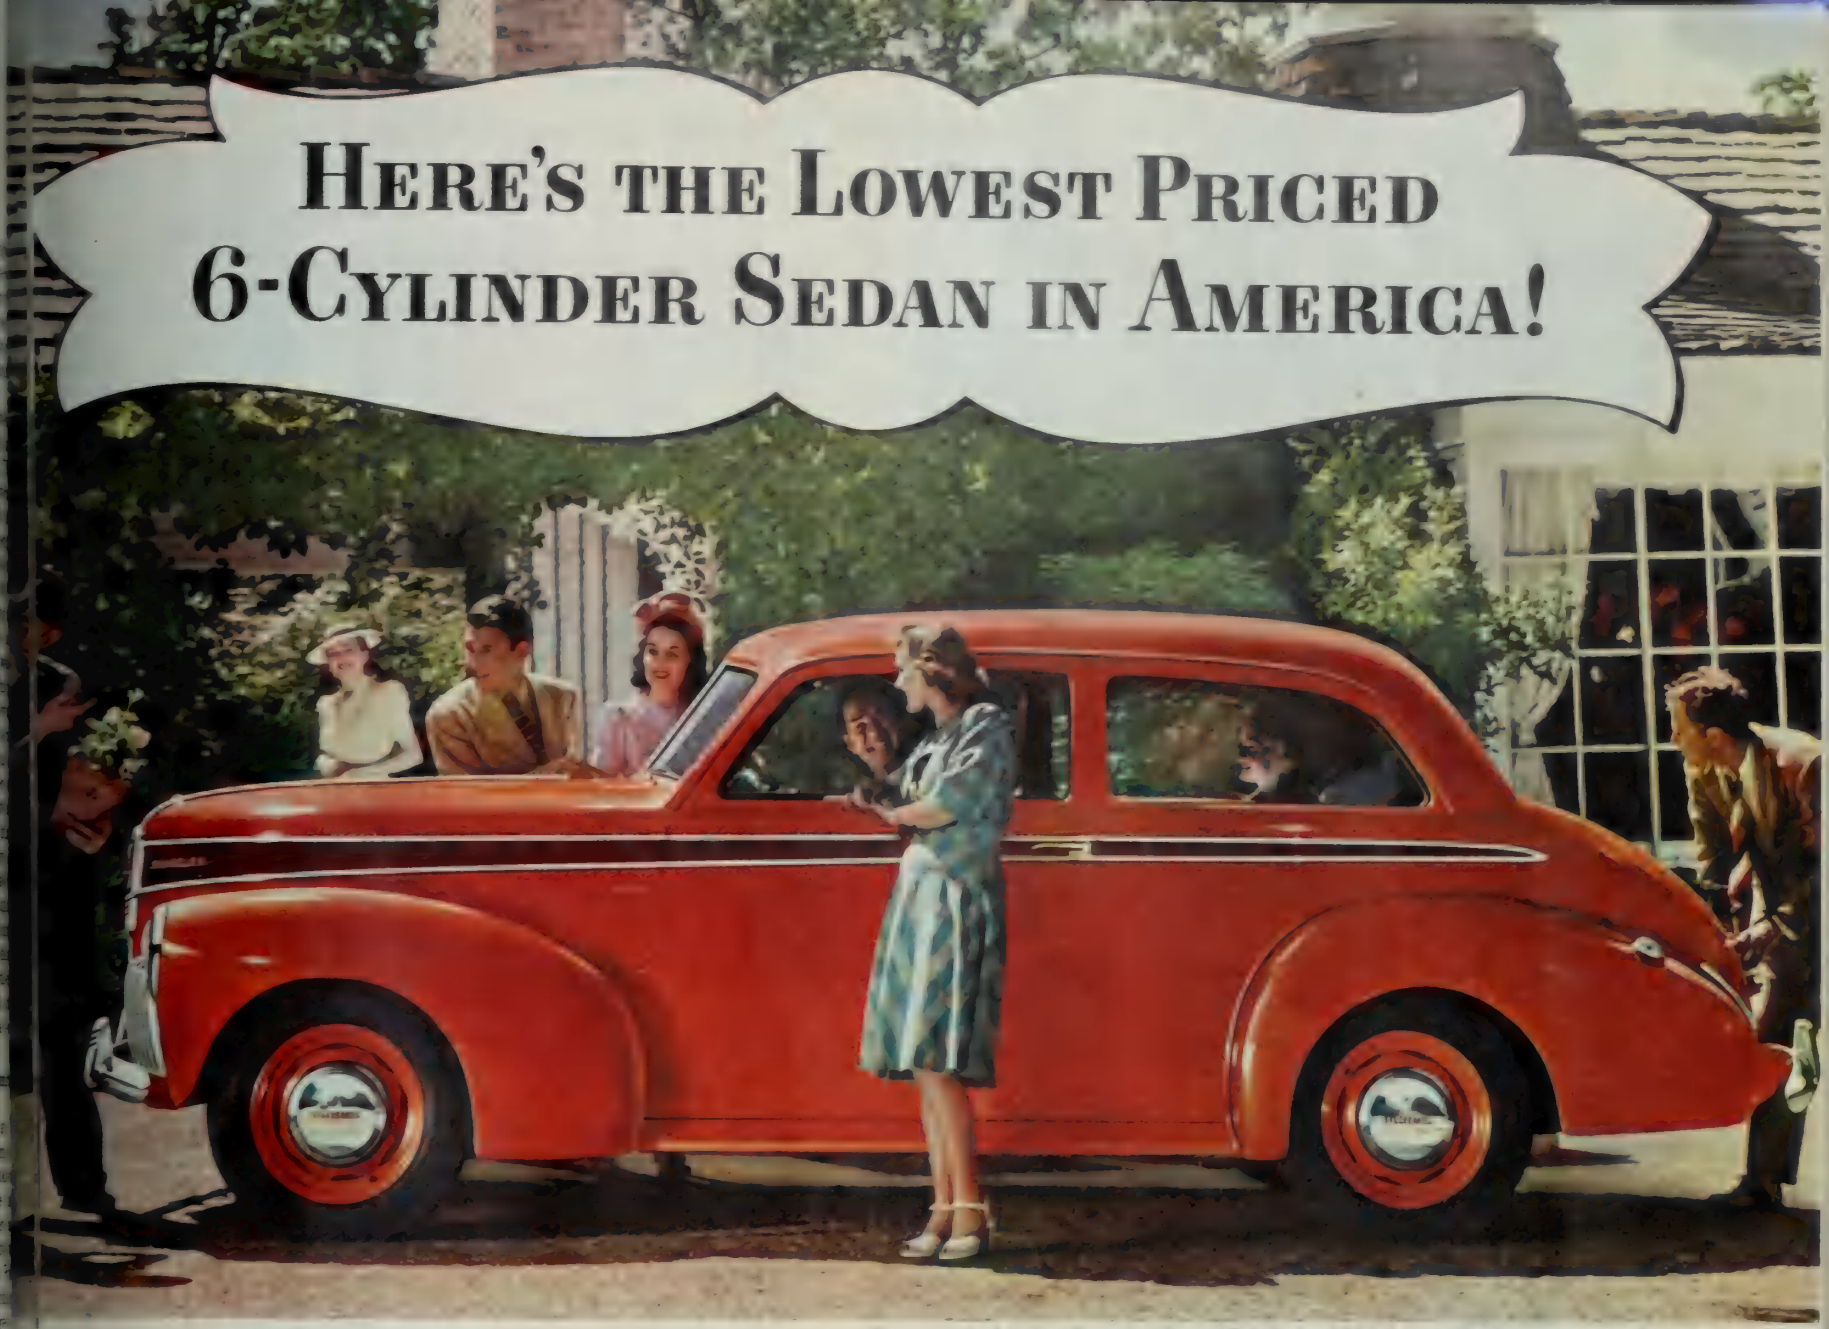
This thing had splendid potent The Australian, Burnet, had shown to grow virus in fertile eggs. This nated troublesome animals from t tute. One could shoot both the the distemper virus into an egg, egg into a nice warm incubator temperature was kept at 100° F microbes would grow and reprodu a rich culture that could be used basis for a vaccine. There was h catch to these pleasant, hulling th Would this combination virus protect men as it protected ferret

Horsfall inoculated various lab ers, checked their blood after a fe and found that average antibod tent had shot up several hundr cent! Such an observation is means conclusive proof that the would ride unscathed through a e demic. But it is the next thing to One large-scale check indicate people with many antibodies i blood were only an eighth as li get flu as people with only a few

The Big Opportunity

What Horsfall needed at thi was a good, lusty flu epidemic.

While the mild, soft-spoken F didn't exactly wish anyone bad still wouldn't be altogether acc say that he was distressed by wor arrived last summer from Puert Flu had broken out. Working d night, he and his helpers prepare sands of doses of vaccine.



The finished stuff was rus Puerto Rico. Tragically enough there too late. The epidemic, its growing and spreading, had peter No conclusions could be drawn f few people who did get the shots in the arm. Then a few ago good news came from the Coast—that is to say good news medical researchers. Flu was k people over by the tens of thous California, Oregon, Washington, Arizona and New Mexico. In som munities it was putting 30 per the inhabitants to bed. It was killing flu like that of 1918 but, same, it was flu.

Horsfall hurried his vaccine to California towns and vaccinato gan. Results of this work won't be for several months—until the ep has worked itself out.

While there is no evidence t present mild flu will develop a killer variety, conditions are ripe appearance of the killer. Epid gists are betting even money th flu will have a severe outbre winter. With thousands of peop pell-mell into unsanitary, badly lated bomb shelters and subway ing like termite tunnels, condit ideal for growth and spread of t eases, meningitis and flu.

British health authorities have expressed interest in Horsfall's and he has put his staff on an 8- midnight schedule. The lab is m million doses of vaccine for use ment. If it gets this opportun proves to be successful, the final will have been written in m most costly, most lethal plague. ow's newspapers will be telling the tide is running.

HERE'S THE LOWEST PRICED 6-CYLINDER SEDAN IN AMERICA!

George Windsor, Citizen of London

Continued from page 15

decided to visit Southampton, see the amount of damage and reassure himself that everything is being done for the homeless and the wounded. If you want to come along you'll have to get up early—we must be at Southampton by nine-thirty. We'll have to get up at six-thirty. That's what the King is doing. Shake the sleep out of your eyes and stop shivering; sure it's cold, but there's no heat in Southampton at all and no hot water either. It's a lot colder there.

Herbert Morrison, minister of home security, usually accompanies the King on these expeditions. There are no ceremonial rites connected with a trip by the King. Following his car is another occupied by Harold Campbell, the King's equerry, and a Scotland Yard man. There is no screaming of sirens and no motorcycle cops lead the way. No secret-service men stand on the running boards of the cars. Traffic lights are obeyed. Once out of the city the cars travel fast, but then there are no speed laws in England.

Heroes in Review

The civic center (England's equivalent of the town hall or city hall) is in the center of the city. The center of Southampton was hit badly. The volunteer services are lined up in front of the white, scarred building. There are women ambulance drivers, air wardens, auxiliary firemen, canteen workers—all wearing the uniforms of their services. They have only been told this morning about the King's visit. As the King steps from his car a full-throated roar of welcome comes from the two hundred men and women who stand there. People hearing the cheering come running. The mayor, wearing his gold chain of office, welcomes the King. He tells the King of the two horrible nights and he tells of the heroic work done by the men and women volunteer workers.

"I'd like to meet some of them," the King says briefly.

He walks up and down the lines and now and then the mayor singles one out who has deserved especial attention. Here is Mrs. Francis Hartley, for instance, dressed in the dark blue of the ambulance service. "Mrs. Hartley drove an ambulance all during the bombing," the mayor reports. "Once the blast of a bomb lifted her ambulance right up on the sidewalk. She was stunned, but recovered, and she kept on driving all night."

The King congratulated her. He moved down the line. He smiled when he noticed a clerical collar showing above the blue uniform of an Air Raid Precautions worker. Who wore dusty, muddy dungarees and whose face was lined with fatigue. On his left breast there was a line of war ribbons. He was Colonel Reverend Sydney Turner; he had a right to be tired. He and his men had been on duty fifty-two hours. They had just taken an hour off to meet George Windsor, citizen of London. "Did you lose any men?" the King asked.

"We lost three," the fighting prelate said simply.

The King's lips tightened and his face became grim. He had just been told that the dead and wounded had mounted to more than 300.

The King left the civic center. He walked down High Street for three blocks. Only desolation and destruction met his eye. This was Southampton's main street. Here were the shops, the banks, the newspaper—smoldering ruins now. He went on to the water front to inspect the docks and to talk to the workers.

I walked back to the civic center to pick up my car. I was stopped a block away. Even my military passes, my press passes and the special pass saying that I was a member of the King's party wouldn't pass me through the cordon that had been thrown around the civic center. But they did give me an explanation of what was going on. Three minutes after the King had left the civic center an unexploded bomb had been discovered in the ruins of a moving-picture theater just fifty yards from where he had been greeted by the mayor. It was being dealt with now. It might explode any moment. "That's why we wouldn't let the Queen come down here today," a member of the King's party whispered. He knew there were unexploded bombs here.

The King went to look at fire headquarters. The large fire engines, usually gleaming with brass and bright paint, looked tired now—covered with mud. The firemen, too, who stood at attention until the King put them at their ease, looked worn. Women served them hot tea. Their uniforms were torn and their faces were grimy, but when the King asked one of them "How was it?" he grinned and said, "It was pretty thick, but we beat them."

The civilian army of England, the army that is really fighting this war, had won another victory. The town of Southampton—it is not a city—had been hurt, but her people were able to grin. The civilians of England are magnificent soldiers.

The King walked to his car. People surrounded him. The two Scotland Yard men and the police were elbowed good-naturedly aside. The King didn' They crowded around him, tall him, and he answered them. I not only the King of England r was one of them. He was sharir common danger. After all, his had been bombed too.

England's Hardest Working l

"We're all right," a plump, r aged woman called to him, "ar are you?" "Now give it to Berli other cried out, "only worse!" Tl nodded grimly. After all, he wor these people. They, in the broac were his employers. He was m civil servant doing a good job. and is probably the hardest-v civil servant in England, he is c the hardest working ruler Engla ever had.

The conscientious King stepp his car. Corporal of the Horse Hawes slipped the clutch into ge big, old-fashioned limousine b move. My car followed. A throated roar went up as the Ki Make no mistake about it—the of England have a great liking great respect for George Winds zen of London.

During the early days of the b King appeared unexpectedly in t End one morning. He walked t the ruins of still-burning hous dodged falling bits of wreckage talked to the men who were tr reduce the chaos of destruction.

"You're a great King!" a l lunged Cockney cried to hir looked at the man, smiled, an back, "You're a great people!"

It is quite possible that bot right.

"Can't you wait until you get your skis on?" WILLIAM VOI

The postman always drinks twice

AND right he is to break the fatigue and monotony of his long, cold route with a second, midmorning cup of hot coffee!

For Science says coffee relieves fatigue, actually rests you when tired, and makes your mind clear and alert.

Industry recognizes this fact in factories the country over, by having "time out for coffee" in midmorning and afternoon—finding a *definite improvement in efficiency* through it.

So when you feel the urge for a cup of coffee, it isn't only to give rich satisfaction to your taste—the gentle "lift" you get *is good for you.*

And as that "lift" lasts only about two hours, if you're like 97 people out of 100 you can drink a fragrant cup *whenever you want it*—morning, noon and night—without worry over sleeping.

The Forward Faun

Continued from page 13

she got through the tests and waited for the verdict.

"The job is yours," said Welles simply, just like that.

"Now, listen . . ." she began defensively.

"The job is yours," he repeated, to show it was no gag.

"Well, Mr. Welles," she began tentatively, "I think I ought to tell you something: I'm going to have a baby."

"What?" howled Welles.

"A baby."

"When?"

"About seven months," said the expectant mother, timidly.

"It's all the better!" he yelled ecstatically. "You're hired. If you start in it, it'll really prove to those bums that I'm going to finish the picture on time."

Dorothy was born in Los Angeles, where her father was a printer. Dorothy went through high school and was at the University of California at Berkeley when the wanderlust struck her. She ran off to Taos, New Mexico, where she got a job at the Kit Carson museum. After a year at Taos she came back to California and settled at Downieville, a little gold-mining town in the northern part of the state where she got a job as a soda-jerker, which she didn't like. She moved on down to Carmel because she had decided she wanted to be an actress and thought she might catch on with the Carmel Little Theatre. The going was tough down there, too. Dorothy tried selling pictures and managed to starve at it. Then she modeled for artists.

It took her a year to get into the Theatre but she finally had parts in The Night of January 16th and The Cradle Song. Charlie Chaplin was visiting in Carmel that season and raved about Comingore in The Cradle Song.

"People say he sat out there and bawled," says Comingore, "but I didn't see him."

No Romance, but a Job

Chaplin's opinion got into the papers and a reporter from San Francisco came down to say he'd give her a story if she told him the real low-down on the Comingore-Chaplin romance. Since there hadn't been a romance, she was somewhat at a loss and compromised by refusing to say anything. Nothing daunted, the young man went back and wrote the story and printed her picture.

Pretty soon she had a wire from Warner Brothers saying to come down at their expense and let them have a look at her. She came down and they put her up at the swanky Town House.

"The Town House (laughter)," says Comingore. "It was like Annie the Apple-woman at the Waldorf."

They made tests of her and finally decided after meditation that parting with $75 a week wouldn't ruin the firm and she was signed. The man who signed her was Max Arnow and pursuant to the quaint Hollywood custom, Miss Comingore went right out behind Arnow when he left three months later.

She had a brief experience with the quickies, then landed with Columbia for a year and was back with the quickies when Welles dredged her up from the bottom of the well. Her most famous quickie was Prison Train, in which she worried desperately about her brother, who was being lugged off to the Rock. They worked with the famous old Burbank train, which has appeared in a thousand movies, and it was a question of getting done in a rush because the rent on the train was mounting up. It was Comingore's job to get off at each stop of the fictional prison train and comfort her brother.

"They set up the camera and took six shots, all alike except that I had a different costume each time. Come down the steps, talk to brother, race back into the car, change, down the steps, talk to brother, back into the car, change. . . . By the last time I was too fagged to talk to brother; just lolled my tongue at him. Had to furnish my own clothes and make-up. Made about nine dollars net on that engagement."

Mr. Collins Does It Right

In Hollywood she was rushed by the usual boulevard menaces. She didn't like it but it meant a free meal and she was in a mood for food. At this juncture Mr. Richard Collins, the screen writer, appeared on the scene. Not only did Mr. Collins appear but he turned out to have the instincts of an old-line gentleman.

When he rang the doorbell on the evening of a date, he held under his arm a box of bonbons and in his hand bloomed a bouquet of posies.

"Bucked me right up," says Miss Comingore. "Made a new woman out of me. He said he wanted to marry me. I married him."

And that accounts for the baby which would hurry Citizen Kane along to its finish even if Mr. Welles flagged in his zeal, which is something Mr. Welles never does.

However, he can be a bit negligent as was proved soon after the picture started shooting when he fell off a ladder, like Humpty Dumpty, smashed his ankle and all the physicians of Hollywood and the prayers of the RKO directorate couldn't put him together again for six weeks. But he sat in a wheel chair and directed the company and continued to get from the unknown Comingore emotional acting of a type not often seen in the City of Shadows.

"Why shouldn't she be good!" demands Welles. "She's grown up. Some of the others would be good, too . . . if they were grown up."

This sort of talk will obviously get young Orson nowhere with the people who count in Hollywood. But if Citizen Kane is good, a few additional insults will not matter. If Comingore flops, Citizen Kane will flop. If Citizen Kane flops, Citizen Welles will depart Hollywood in the night, passing through Needles with his shirttail sticking straight out behind him. He may not be a genius, as some people claim, but he is certainly a brave man.

t w the first of a long list. Later columns did not pull any punches. They stepped right out and named Earl Kinlock and Julie Carter as stepping a fast pace in the night clubs. Other things, too, were hinted at in print, but I did not believe them.

Julie had not met Kinlock as a girl swept off her feet. She had met him as a woman who wanted something. It had been a fight from the start and I could not see her as letting him win any of the rounds; not after the way that she started. There was, I told myself, a chance for me until they published a marriage notice. Just thinking about her still set my pulses to hammering and I was not taking a count for anybody while I could still make a fight of it.

She had seen Earl Kinlock in a ring on the best night that he ever had, but she had never seen me do anything in a ring except take a bow.

Three weeks after the night Earl Kinlock won the championship, I was sitting in Sam Menton's office. Sam was smoking a cigar and looking as if he suspected what I came for and wasn't ready to believe it.

"Sam," I told him, "I'm coming back. I want to go in with Kinlock."

He took the cigar out of his mouth slowly and his eyes went into hiding behind the little flesh pockets that bulge all around them. Sam did not become the biggest promoter in the game by being the kind of slob that he is at parties. In his office, he is somebody tough to handle.

"Na, Jimmy," he said. "That's no good. You're all through."

"Nobody ever knocked me out."

He shrugged. "This Kinlock would do it. He's a hooking fighter, Jimmy. That kind would cut an old fighter up pretty bad."

"On the way he fought Russell, I'd murder that slob," I told him.

Sam's eyes came out from the pockets. "Once you could do that, Jimmy," he said, "because this Kinlock is not yet a great fighter. But now maybe you are jealous. It makes you crazy."

I squared myself for a battle and I poured it to him. "It would be the biggest gate you've had in two years," I told him. "No middleweight ever packed them in for you like I did. You'd double them up in the cheap seats with

WAKE UP YOUR LIVER BILE—

WITHOUT CALOMEL

—And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pints of liquid bile onto the food you swallow every day. If this bile is not flowing freely, your food may not digest. You get constipated. You feel sour, sunk and the world looks punk.

It takes those good, old Carter's Little Liver Pills to get these 2 pints of bile flowing freely to make you feel "up and up." Get a package today. Take as directed. Amazing in making bile flow freely. Ask for Carter's Little Liver Pills. 10¢ and 25¢.

people who'd be wondering if he could put me on the floor."

He shook his head. "Your friends wouldn't like to see you on the floor, Jimmy." He screwed his face up. "Should Pop Weyling come to me and say he wants that fight for you, okay," he said. "Otherwise, not for no million bucks, Jimmy."

We looked squarely at each other and we were two people who had made a million dollars plus together. We shook hands and that was that.

Pop Weyling had managed me since I was in knee pants and fighting at smokers. He had treated me like a father, and on the night that Steve Russell punched me apart he had clucked over me like a mother hen over a chick. He swore that night that it was my last trip to the wars—and it had been. Telling him that I wanted Earl Kinlock was going to be a lot different from telling Sam Menton. I did not have the same arguments.

For an hour I just walked around, trying to make up my mind to see Pop Weyling and tell him that I was putting the gloves on again. My nerve just wouldn't come up to the mark. In a long lifetime, Pop was the only man I had ever been afraid of.

At the end of an hour, my mind was made up. I checked into a hotel, took a suite and called up the sports editors of all the morning papers. They were around in twenty minutes and they came personally. They did not send any cubs. I shot the works with them and when the midnight editions came out, I was in the headlines:

DANE CHALLENGES KINLOCK

Ex-Champ Plans Comeback Try for Middleweight Crown

There were a number of variations of that and pictures out of the files. When I got back to the hotel, Pop Weyling was waiting in the lobby. He was a little older and he had less hair than when I last saw him, but meeting his steady stare still sent the cold chills down my spine. He waved a copy of the Courier.

"How about this?" he barked. "Have you signed anything?"

I swallowed hard before I answered him. "You're my manager," I said. "I've never signed anything."

He wadded the paper and tossed it aside. "Okay. That's all I wanted to know. I'll see Sam Menton."

That was that and he left me without any postscripts. Somehow I would have rather had the blasting that I expected. Pop knew about Julie, and he knew I wasn't going to change my mind. There was only one thing for him to do—and he did it.

CARLO was on the top of a mountain and I went up there with a young heavyweight that Pop was managing and a black boy who knew how to cook. It was one of the loneliest spots in the world and for three weeks I did nothing but chop wood and climb mountains.

At the end of the three weeks, I was hard again; not exactly glowing the way I had been once, but hard. I came down then to the old camp at Station Landing where I had trained for most of my fights in the old days. Pop was there and he had Nora Garran, the Irishwoman who had cooked for all his camps. He also had a trio of tough sparring partners and an outdoor ring.

"I've told the boys to go easy with you for a while," he said curtly.

"Thanks. They don't have to be careful."

I was just as curt as he was. No sparring partner of mine had ever had to pull his punches to keep from licking me and I had a sudden desire to beat the daylights out of this trio and knock them, one at a time, into Pop Weyling's lap.

I did nothing of the kind. Leveling at them with everything that I had, they still made me look foolish and I saw that they were following instructions. They weren't half-trying and any one of them could have taken me.

I knew then that two years is a long time in a fighting man's life and that the way back was going to be rough. I went to work in earnest.

If Julie wanted youth and speed and strength, I was going to give it to her. Kinlock was "good-looking and savage" according to what she said on the night of the fight. Well, I couldn't offer her any good looks. If I had ever had any, I had left them in a hundred rings. I could give her the savage part, and when I got through Kinlock wouldn't have the good looks to offer, either.

I went to sleep on that thought night after night. And at the end of a month I had my sparring partners fighting for their lives. The timing that was so badly off in the first weeks of training was becoming sharp again, my muscles had loosened up and my legs gave me a solid platform from which to fire my heavy artillery. Even Pop had warmed up.

He was more like the Pop of old; yelling at me and encouraging me, patting me on the back or bawling the blazes out of me. He watched me like a hawk in the ring and he was liking what he saw. The tip-off came when he started reading me the sports pages in the evening.

The boys who were covering my camp had started to root for me. They were remembering that I had lost my only important decision to a clever boxer and that the boxers had always given me trouble. They were remembering, too, that no puncher had ever stood up and traded with me and stayed on his feet. I was close to an even-money bet as the result of their ballyhoo—and I had been away for two years.

Three nights before the fight, Julie came out to the camp. I was relaxing in my room with the radio tu when Pop Weyling came in. was wooden, the way it is w talking terms with a promote

"There's a girl downstairs," "that says she'll sit in her car her horn till you come out."

"Julie?" I said. Pop shrugge

"I didn't ask. I just told he didn't have to make threats."

I was out of that room fast not look back.

JULIE was sitting in a car ou I could not see her very w not have to see her. There wa stinct inside of me that would me whenever she was near. I living with the thought of he want of her for months.

"Jimmy!" she said. "Jimm you'd see me."

"Sure." I got into the car t and she laid her hand on my a

"I've been reading everyt the papers said about you, Jim said. "I never knew before wh fighter you were. They all w how hard you hit and—"

My heart was turning over s my eyes misted a bit. She reading about me. I wasn't Pa to her any more. She knew I was now; not just an old g bows. Her fingers bit into my

"Jimmy, I came out here to call off the fight. You don't hav back, Jimmy. You liked me don't want you to fight."

I turned to look at her and was pounding so hard in my my eyes saw everything in a l tongue felt thick. She did not to fight.

"Why?" I said.

She kept my arm in that shook it. "Jimmy, I can't st keep seeing Earl in there," she s I dream at night that you are Earl the way you punched tho I wake up trembling when I seeing you knocking him dow stand it, Jimmy. I can't. I'm

"It's not necessary to shout 'Stop the presses' every time you bring in an item. We don't even start 'em till Thursday"

We who are privileged to transform the golden grain and fragrant hops into the beer your taste enjoys are jealous of its good name. We pledge ourselves to fight ceaselessly against every improper use of beer, whenever and wherever it appears.*

Won't you help us keep this great American beverage fit for the American way of life?

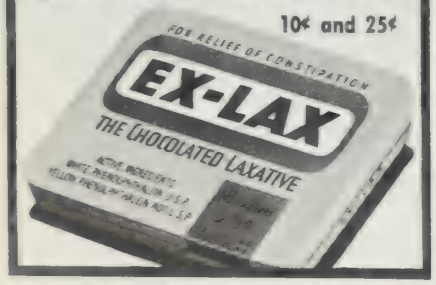
** For instance, the Brewing Industry has put into operation a self-regulation program to improve beer and ale retailing. Now at work in 14 states and being extended.*

It is described in a booklet, sent free on request to United Brewers Industrial Foundation, Dept. B 1, 21 East 40th St., New York, N. Y.

UNITED BREWERS INDUSTRIAL FOUNDATION

Mrs. T---- handles a Difficult Case

Billy raised an awful fuss today when I tried to give him a laxative. I even promised him new skates - but he just wouldn't take the stuff.



Mother had a bright idea. Told me to try giving Billy some Ex-Lax. He balked at first, but one bite and he was all smiles! Simply loved that chocolate taste!

Billy slept quietly all night. This morning Ex-Lax worked fine - didn't upset him a bit. I'll never have to bribe him to take a laxative again!

The action of Ex-Lax is thorough, yet *gentle!* No shock. No strain. No weakening after-effects. Just an easy, comfortable bowel movement that brings blessed relief. Try Ex-Lax the next time you need a laxative. It's good for *every* member of the family.

with him, Jimmy. I don't want him hurt—"

I drew the breath into my lungs and it hurt them. For a few moments I had been building something. For a few moments she could have had the fight or anything else that she wanted. Now I looked at her in the light of the dashboard and a cold wind blew from somewhere.

She was no longer Julie of the cool, clear eyes and the confidently poised head and the soft, remote lips; she was haggard-eyed and heavy with make-up—not fresh any more, but desperate. I asked a question because I had to, not because I could not guess the answer.

"Are you married, Julie?" I said.

"No, but—"

"I know."

She did not have to tell me any more. Earl Kinlock had won that fight as he had won the fight against Steve Russell; taking everything for a while, then moving in savagely and without pity. Julie had challenged him that night at Sam's party and anyone had only to look at her now to know who had won when the sparring was out of the way. Something died in me, but I shook my head.

"I can't do anything about the fight now," I said, "without letting a lot of people down."

It was all that I could say. She was watching me desperately and I knew that she had never seriously hoped that the fight could be postponed or put off. She came right in with her counter:

"You don't have to hurt him. You won't, Jimmy. Please."

"He's in there to fight, Julie. He won't pull any punches."

"But you can beat him. You hit so hard. They all say so. I can't stand it, Jimmy."

There are things that a man can take and there are things that he cannot take at all. I've taken everything that they could throw at me in the ring, but I could not stay in there with Julie. I opened the door and stepped out.

"No decent man throws fights, Julie," I told her. "Sorry."

I turned away then and went indoors and I knew that she would not sit out in front and honk and that she would not follow me in. In the ring or in love or anything else, when a person is licked and admits it, there is not much fight left in them to throw at anyone.

Pop Weyling was sitting quietly in my room when I came back. He had his old pipe in his mouth but he wasn't smoking. He knew me better than I knew myself and he must have seen from one look at my face that I had taken another beating.

"Did she let you down, son?" he said.

I couldn't lie to him but I was looking away from him when I answered. "Yes," I said.

Pop got up slowly. "Maybe I should have let you find out about women when you were young," he said. "Maybe not. But you're a fine, clean lad, Jimmy, and there's a girl somewhere who'll know it and appreciate it."

He walked rather heavily to the door and turned for just a moment. "That's not saying that I'm not damned sorry about this one," he said.

"Okay," I said. "Thanks."

I DID not fight my fight with Kinlock in my mind on the nights that were left before the fight itself. I was done with that, somehow, and I could not bring it back. On fight night in my dressing room, I looked off into space and let my handlers fuss over me and rub my back and muscles. Usually I was touchy and cursed everybody in sight, but tonight I just sat there and let Pop Weyling worry about the fact that I was not on edge.

If the fight had been three nights earlier, I would have come to the dressing room with a hate of Kinlock and a desperate anxiety to get out and put on a show for Julie. Now I no longer hated Kinlock and Julie was finished. I did not want her as she was and neither Kinlock nor anyone else could give me back the Julie that had been.

The dressing room was tense as it usually is before a big fight and people dropped things noisily because they were trying to avoid dropping things. Then somebody pounded on the door and a voice said:

"All right, boys. Let's go down."

I drew my robe tight around me and we started the long march down the dark aisle. It was a ball-park fight and the place was packed. At the foot of the aisle the ring blazoned white under the big lights and there was a half-sighing, half-murmuring noise from the crowd with occasional shrill overtones.

We reached the ring and I climbed the steps with the crowd roaring. Kinlock came into his corner right after me and I scarcely looked at him. The announcer was introducing Tunney and Dempsey, Jim Braddock and Barney Ross. I looked down past the press section to the seat that I usually occupied and it was a strange sensation. The announcer was swinging into another introduction and I only caught part of it.

"—that great champion in this very arena—Steve Russell!"

Steve was rising from a seat behind the press section and then he was climbing into the ring and taking his bow while the crowd roared for him. He turned and came to my corner.

"The best of luck, Jimmy," he said.

HE HAD my gloved hand and he was shaking it. I patted his shoulder with my other glove but my eyes were hazed. Steve Russell had just taken the bow that I used to take. He was going back to his comfortable seat back of the press section where he could light up a cigar and relax as an ex-champion should. Me?

I was up here with a bathrobe over my shoulders and the shooting mittens on my hands. I was going back to the rocky roads of championship; up at seven and hit the road, exercise and spar. No Julie to fight for—nothing but the championship. I had already had that!

The referee was calling us together and the crowd stilled. I stepped forward from my corner and I heard the instructions through a haze. I walked back then and in a few seconds there would be the bell. I scraped my feet in the resin and then, for the first time in any ring, fear came up and grip muscles.

I was suddenly aware of the fac did not want to be a champion. being an ex-champion. I wanted was leaving and not the prize fight. Julie was gone and hatr gone—and the want of the cro felt naked and terribly alone. N in the world for which to fight—a gloves on my hands.

Then there was a hand on my a I was looking into a pair of eyes th grown old squinting into the ring Pop Weyling was looking at me looked on the night when Steve I cut me to ribbons; a little scared, sick and feeling hurt worse than

HIS lips moved but I could nc what he was saying. I was l instead what he had said on th that Julie came around to the ca

"You're a fine, clean lad, Jimm there's a girl somewhere who'll k and appreciate it."

I drew a deep breath into my

"Okay, Pop!" I said.

I did not know whether there be a girl or not. I was still full ache for Julie and I couldn't imagi other girl anywhere who would l ferent and still make me want h was not important now, though. I frightened any more.

The bell rang and I turned fast lock was gliding toward me with h flattened against his teeth and hi like marbles. I moved into him a muscles were loose.

I made him miss his first lead hooked to his head. For just a m there was fear in his eyes—and I I had him.

It flashed into my mind, too, tha had done this to him; Julie wc over him and sure that he was g be licked.

I shook him up pretty badly wl tried to swarm into me and be rounds I had a thought that was big for a guy like me: Kinlock, I fi was no good and when he won that he had no right to win outsi ring, he threw away the thing made him a winner inside the ro

Maybe I was wrong, but w knocked him cold three rounds I wasn't thinking of Julie nor of th might find some day nor of my s the aisle where Steve Russell w ting.

All I thought about when K went down on his face was, "Gee is going to like this!"

And he did.

"Hey, Tom! Two cents postage due!"

rn of the hill. Mori ran too, and d. He wished she wouldn't go so fast or so far. His shoes were t. He stopped for a breath. He i he had brought his bunk mates im to help catch her.

T woman ducked into one of the s now. Mori followed, grinning. in't look at the steep walls of the or at the queer twist it took t a high hill. He saw only the n ahead. She had stopped running as pushing the straw bundle away er under a ledge. Then she stood er back against it, and faced him. i ran to her. She was young and and pretty. Her eyes were big, . Mori thought, than a woman's ould be. Was it fright made them drous big and black?

i saw her body shake with that fright, and as she swayed he saw

UNNY-BUSINESS MEN

lf-Portraits of Collier's Cartoonists
No. 22

An ex-Californian, born in 04, Ned Hilton had no for- al art training, sold his first awing to a newspaper at e age of thirteen, and s since worked in a sign op, as a poster designer, ency layout man, cover tist and illustrator. Car- ons like the one on the fac- g page are his chief interest m now on, he says. Drinks stly beer and is not as sour he appears above despite s residence in Manhattan's eenwich Village.

e saw of the bundle she was hiding, d remembered the way she had rri it in her two arms. It was some- ing precious, something dear . . . Mo reached and held the woman with e had. With the other he groped for e saw covering. The woman groaned, hop ess, shuddering groan, but made mve to stop him. Mori's big hand mbed at the straw and turned it back. "*Ai mah!*" he exclaimed, and did not elie what he saw.

He rgot the woman to take the bun- e in his hands and look at it again. It as fed with rice shoots—the young, nde vibrant green of rice shoots.

Mo rolled a clump in his hand and lt it, wonderingly. His fingers ess and prodded in the way they id t pressed and prodded for two ars It was good rice. Yes, spongy the oots and brittle in the stalk. It as od rice. It would grow well. He cke it up and laid it down, separating, gently, a clump that was too big, pinching off a weed caught in the roots. He squeezed some and saw a drop drip between his fingers. It was wet still from water. But not wet enough! It must go back in water or it would wilt, and wilted shoots are the same as no rice at all.

Mori looked at the woman, and smiled, suddenly. "Where?" he asked. "Where?" and he held the rice up before her.

She did not know the words he spoke and shook her head.

Where was she taking the rice? Where was she planting it? Mori wanted to know. He looked about him now with different eyes. The sharp walls of the ravine, the bushes that masked this path from the road, and a tunnel that led beyond to . . . Mori stooped to look. There was light beyond, and a flicker of green.

"There!" Mori said, pointing with the clump of rice shoots. "There!" he urged, and motioned the woman forward.

But she did not move. She only stood staring at him with her eyes that were so big. Then Mori walked there himself, carrying the rice in his two arms as tenderly as the woman had. When he bent his head to enter the tunnel the woman was following him.

The tunnel was short, burrowing under the abrupt hill that closed the ravine, to come out into a small hushed valley. It was sweet and green, not a valley really, but round and hidden like the bottom of a teacup.

"*Mah!*" Mori exclaimed running forward, gulping the air in gasps, and eating the green with starved eyes. He touched the grass to know the feel of it, he slid his hand down the satin bole of a big bamboo. Then he went to the little brook and knelt beside it as though it were a shrine.

BEYOND the brook was the paddy. Mori saw it now, and saw it was half planted with scattered rice shoots. He gathered up the bundle of straw that lay on the grass beside him and crossed to the paddy. The woman came and stood by his side, always silent, always looking at him warily.

Mori saw the rice was badly planted. Mori knew the fine, healthy shoots he held in his hand would not make good rice, planted this way.

"Who . . . ?" Mori began, and then used his hands to ask the question, pointing to the woman and pointing to the paddy. He asked twice this way.

The woman nodded then to tell him she had done the planting, and shook her head as though to say she too knew it was hopeless.

Quickly Mori looked around, at the mud-brick house backed against fringed bamboo, at the old woman standing in the doorway, and at the child who hid behind her pantaloons—a boy, Mori saw, of the height of the boy who was his son. Mori looked back at the woman.

She knew what he was asking this time and held up three fingers to show him there were only the three of them living in this teacup valley.

Mori filled his lungs, and did what he had to do. He unbuttoned his tunic, his shirt, his trousers, he loosened the lacings of his boots, and stepped out of those unnatural bindings to become a man again. Clad only in the wide cloth he wore about his middle, he felt free once more.

All afternoon he worked there, planting the new rice the woman had brought, replanting the rice that was not even and mending the dikes. He carried weeds and sod and mud to strengthen

"Hurry Up Now! Pa's Waiting!"

THE kitchen stove used to feel pretty good on a winter's Saturday night when the thermometer was down around zero. So did the heated flatiron in the foot of the bed. But how many of us would trade the comfort and privacy of our modern, heated bathrooms for the cramped discomfort of the wooden tub and the sting of the home-made soap? And who wants to lug out the water afterward and mop up the kitchen floor?

There are a lot more of today's home conveniences that we wouldn't trade for their counterparts of the "good old days." The electric washer, for instance, for the scrubbing board; the electric light for the messy coal-oil lamp; the furnace for the parlor base-burner.

Most of us are incomparably richer than the people of a generation ago—not so much in money, perhaps, but in the things our money will buy. And in most cases these are the products of American industry—manufactured articles that have been developed by industry, improved, made less and less expensive so that more millions of people can afford them.

In almost every manufacturing improvement that has made this progress possible, electricity has played a vital part. And the scientists, engineers, and workmen of General Electric, who have done so much to make electricity more useful, are still seeking ways for electricity to help in the creation of More Goods for More People at Less Cost.

G-E research and engineering have saved the public from ten to one hundred dollars for every dollar they have earned for General Electric

YOU'LL ALWAYS BE CONSTIPATED UNLESS—

You correct faulty living habits—unless liver bile flows freely *every day* into your intestines to help digest fatty foods. SO USE COMMON SENSE! Drink more water, eat more fruit and vegetables. And if assistance is needed, take Dr. Edwards' Olive Tablets. They not only assure *gentle yet thorough* bowel movements but ALSO stimulate liver bile to help digest fatty foods and tone up intestinal muscular action.

Olive Tablets, being *purely vegetable*, are wonderful! Used successfully for years by Dr. F. M. Edwards in treating patients for constipation and sluggish liver bile. Test their goodness TONIGHT! 15¢, 30¢ and 60¢.

those dikes, to tighten them so the water would lie full and deep.

The woman stood and watched, not afraid now, just watching. She brought a mattock and put it in his hands as he straightened the rice rows, and then stood and watched his hard, broad torso bend to the rhythm of the strokes he knew.

She came with an earthen pot of tea and little cakes that were sweet and held them for him. Mori dropped the mattock and came to sit on the bank. He wiped his face in the grass, and drank the tea, and laughed a little.

When the first shadow fell on the paddy, Mori looked up at the sky, and remembered. He wiped the mattock and took it to the house, the little mud-brick house close by a pomegranate tree with red blossoms reaching out like thin tongues of flame. He went to the brook and lay in it, letting the clear water sluice the mud from his body, and then he got into the harsh garments he had laid aside.

WITH his hands Mori talked to the woman again. He pointed to the sun and held up four fingers to show her he would return in four days.

She nodded, showing no fright, but questioning. Mori could not answer these questions, not even in his own language could he answer them. He only felt that he must come again. So he bowed in the bow of his country; and the woman who did not know this bow knew he had not harmed her and her child and the old grandmother, and tried to give the bow back. And when she bent too far, and jerked up to keep from toppling, she laughed a small laugh with him.

Mori looked again at her before he turned into the tunnel. Her eyes were very big.

And he came again in four days.

The woman was washing in the brook when Mori stepped out of the tunnel. She jumped up and stood stiffly for a moment, watching the tunnel mouth for other soldiers coming through; and when they did not she turned to watch Mori cross the yard and come to her side.

In his pockets he brought broad beans. He scooped them out with his hands and held the hard white kernels before her. For planting they were, and he pointed to the sunny patch where he would put them. She thanked him with a wondering smile.

But he could not tell her how he had scraped them up from the floor of the commissary truck, so he reached in another pocket to bring out a roll of wire, a leather thong, and a cutting knife. Her eyes grew very big at the richness of these things.

Mori went on across the brook. He took off his uniform as he had done before, and then just stood looking—at the shimmer of many greens, at the red of pomegranate blossoms, and at the flutter of slender white birds. But he did not speak. He had no words for the feelings of these things. He only filled his lungs with a quick, glad breath.

Soon he went to the paddy. He saw the young rice pushing up in the sun. Yes, it was strong; it was good.

He paced the dikes and saw that they held. He measured the water with his eyes and knew there must be more. So he set himself to mend the water wheel. He fastened the blades with the wire he had, and with his knife he cut new bamboo spokes and fitted them where they should be, until the wheel was turning and lifting water up from the brook into the paddy.

When the woman came with the tea, Mori was lacing splints into a rake that was like a bear's claw. She watched the way his hands moved, quicker than hers, and sure. And the boy came, too, and sat beside them, and helped with the lacing. Mori's eyes strayed again and again to the little-boy hands.

Suddenly, Mori put down the rake, and with his knife cut a small round of bamboo. He scooped it and trimmed it and pierced it just so while the boy watched him. He fitted a reed into a hole and tied it there with a hair. It was a whistle and Mori laughed when he gave it to the boy. The boy blew it and they heard the thin warble of a bird, sweeter by far than the call of the slender white birds above.

They went together to the patch where the beans would grow—Mori pulling and tearing at the weeds, the woman raking, and the boy running through the rows blowing his bird song.

Not that day, but another day Mori whittled in the sun to make a cricket cage, and then hunted crickets in the grass with the boy. They hung the cage in the shade behind the house and sat through the minutes until the tiny choristers began their eerie chantey.

So the short spring went on, those precious days when Mori didn't stand duty in the barracks, when Mori lied and sneaked to get away from his bunk mates, when he took the long road up the valley and doubled back to hide in the bushes near the tunnel mouth to be sure no one followed him.

He mended the thatch on the house, he spliced the well rope when it broke. He did all the things a man does. And one afternoon he took the woman's hand and went with her through the bamboo grove. In the grass beyond, he drew her to him. She did not pull back. She was content.

Mori heard the stories, though, that were running through the barracks. Guerrillas in the upper valley, guerrillas in the lower valley, guerrillas swooping down from the hills at dawn, guerrillas creeping into a village to fire a barracks in the heavy hours of night. . . . New troops came marching in, and word went round the regiment would move that very day against the guerrilla stronghold two valleys distant.

That very day, that very day. . . . Mori counted the time on his fingers. Could he get to the farm? Could he slip out for his little farewells and get back in time? He went. It took cunning and stealth, but he had and stealth for such a little thi

Out on the road Mori heard of bombers coming up from t valley. They came in two file low, fanning the hills on either their deadly flight. Mori knew was then, for Mori had seen the ers do the trick in other valleys ing and pounding to drive the guerrillas back to their stronghe where the troops with heavy gu fall upon them this night.

Then suddenly Mori was Bombers here! Bombers looki into the teacup valley! He saw bomber fly out from the others over the little hills and let his Mori felt the bump, and slowly saw the dust rise up like a giar room.

He knew, even though he l run, that the tunnel was gone, filled, covered with earth and ro when he saw that it was, he cli over the earth and rocks, up, up bling, clinging, clawing, but al over the high hill.

He stood on the rim and look He dashed the mist from his e then wiped them slowly, for th wet, and looked again to see if of that green was left.

He saw a hideous hole, gap stones and dead earth. There living thing in it—no house, n no tree, no woman, not even th tered green of young rice. Em lay everywhere.

A BUGLE blew back in the l Mori heard its clear message feet shuffled to obey. In the m raised his head somehow to sta sky where the bomber had bee was thinking of bombers . . . l soldiers, guns, killing and de blotting out growing things, wa good, green rice. . . . Mori raisec arms in a screaming curse.

Then the bugle sounded ag clear call cut into Mori's consci and he lowered his arms. H moved in the chains of obedienc the hill he went, down the scarr down, down, to do the thing he to do.

"I simply can't go on living without him, but I'm going to try not to let it bother me"

Tough as Whitleather

er Plunkett turned to go and tossed him a strip of whitleather h was tied nineteen knots. "It's o untie a knot every time you get than to tie one. Saves time."

n't thought of that," Mister tt said. "Good idea, but I've al- tarted my way and ain't no use ging. I'll keep the whitleather, don't mind. No need of wast-

nd the Choctaws crawled to the lines and the Indians toma- two pickets. Mister Plunkett to the first campfire he saw and d a Creek Red Stick. He made mpt to kill the man. He wanted keep him out of the fight. He grudge against the Creeks and need of wasting life. Later he Spaniard, a deserter from Pen- in the gun arm.

Choctaws and a few marauding hirts kept the British nerves on edge and the weary, bewildered Red Coats were not given an opportunity to close their eyes. They complained bitterly of the Americans' unorthodox tactics. Their officers assured them they could not expect civilized treatment from a rabble of Dirty Shirts. The Yankees didn't understand the rules of war. They didn't know that war was a business for gentlemen.

Mister Plunkett got back to his lines by one o'clock, just as Jackson had his men aroused. "You've slept enough," Jackson said. A half gill of raw whisky was issued and the Americans stood to. A fog, thick as cream, rolled up. Mister Plunkett went to the edge of the woods and waited.

HE COULD see the dry space between the cypress and ditches. An army coming through that way would be like a bull walking down a church aisle. Jackson had the opening covered by four batteries. Directly behind the batteries were Carroll's Tennesseans and Adair's Kentuckians. Behind them were recruits armed with rusty Spanish *escopetas*, and behind the recruits were the Dragoons, ready to ride to the left, through the woods and into the British rear.

The Southerners built small fires to warm their hands, but Mister Plunkett wasn't cold. There was a nip in the air. This would be called spring weather back home. Mister Plunkett heard a stir in the American lines. It was three A. M. and Jackson was visiting the batteries. Mister Plunkett heard Jackson speak to a boy: "Joe, how are they using you? Wouldn't you rather be back home with Aunt Lucy than with me?"

The boy said, "Not by a damned sight."

The general said, "Stick to 'em, Joe."

Some of the men laughed. The laughter was not merry, but hoarse and strained. The Dirty Shirts never admitted it, but they had a great deal of respect for those Britishers out yonder. Mister Plunkett didn't have any respect for anybody who would shoot holes in hides, wasting hides, powder, lead and the time it took to shoot.

At six o'clock on Sunday morning, Mister Plunket sniffed the fog. It would clear in an hour. He knew fog. A pale light broke in the east and Mister Plunkett saw the British lines. They had come up during the night. He saw about seven hundred Red Coats crossing the river to assail Morgan's men on the other side. He saw Keane with twelve hundred men preparing to attack up the east bank of the river. General Gibbs had twenty-one hundred men near the edge of the woods. A regiment of West Indian Negroes were ready to strike through the woods, and Lambert had fourteen hundred in the middle of the field to be used where needed most. Mister Plunkett grunted. That was a lot of men.

He scarcely was able to make out the form of the British soldier who was standing at ease in his line near the woods. He could see the red jacket. Mister Plunkett straightened and brought his gun to his shoulder. His rifle was so long that he had to throw back his right shoulder to handle it and he stood in what military men called an awkward position. He closed his eyes, then opened them quickly to steady his sight. It was the longest shot he had ever made.

He took a deep breath, then allowed his breath to slip back into his throat. That steadied him. He drew his bead and fired. He saw the man stumble and

Taste NEW RY-KRISP!

Better flavor than ever! Scored for easy eating

Now Ry-Krisp wafers are baked a new way to bring out the full, rich flavor of whole rye. Finer texture, too, and extra crisp. At your grocer's in the red-and-white Checkerboard package.

No need now to starve yourself or take exhausting exercise to reduce. With the Ry-Krisp plan, a normal person can lose 7 to 8 pounds a month simply by following three easy rules.

SIMPLE AS A. B. C.

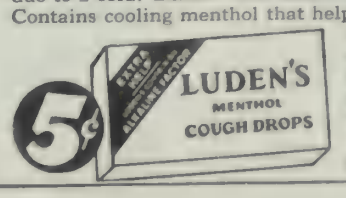
A. Enjoy 2 or 3 Ry-Krisp wafers as bread at each meal.

B. Eat sensibly, choosing foods and portions from the Ry-Krisp booklet.

C. Exercise moderately just to help keep skin and muscles firm.

Ry-Krisp, an unleavened all-rye bread baked into crisp wafers, is helpful in this reducing plan because each wafer has only 20 calories, supplies energy, provides bulk to help stimulate natural elimination.

Order Ry-Krisp from your grocer today. Share this bread-tray treat with all the family . . . it's as delicious as it is wholesome.



TO GET FREE REDUCING BOOKLET—Just send penny postal, stating whether reducing plan is for man or woman. Address Ry-Krisp, 728C Checkerboard Square, St. Louis, Mo. Offer good only in U. S.

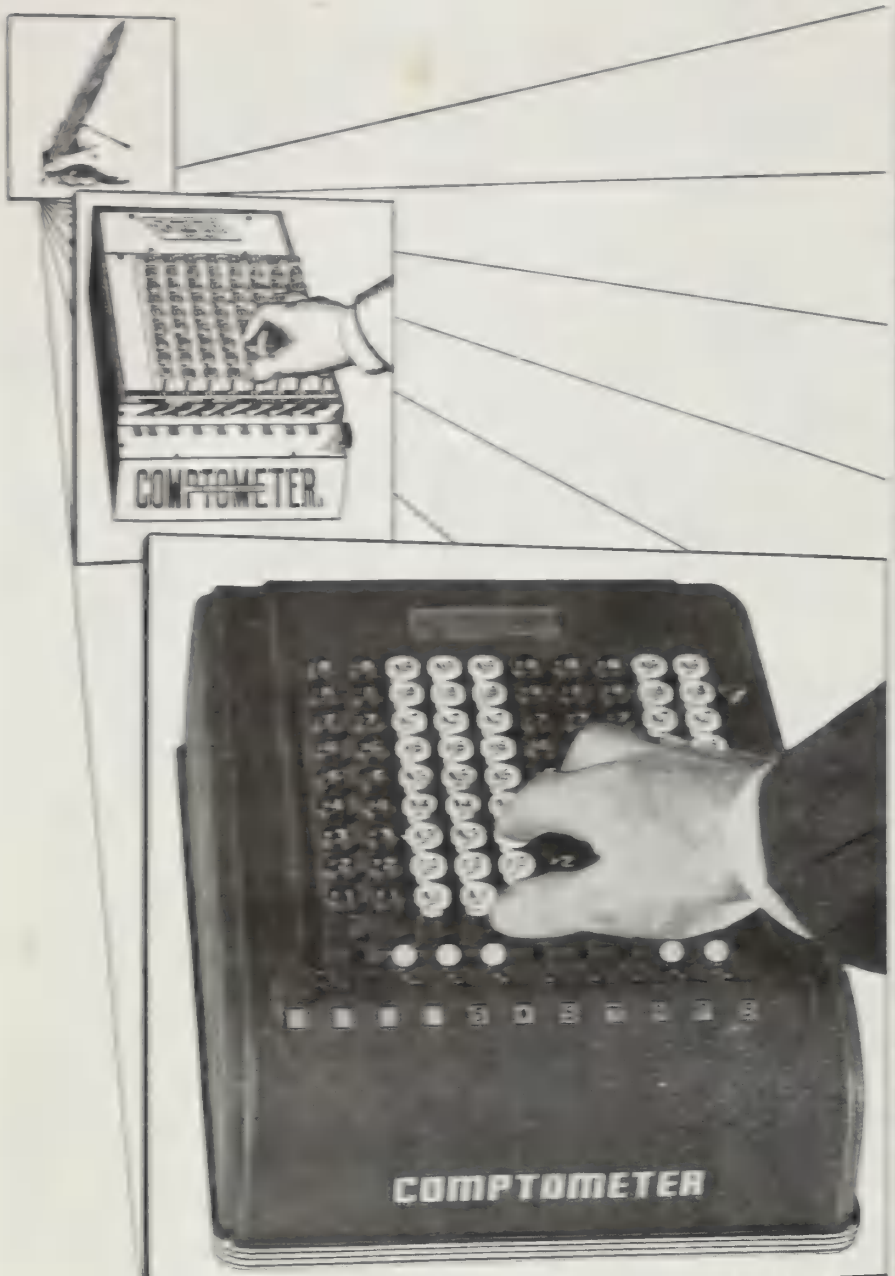
Trademark—look for the name in each wafer



SANDPAPER THROAT

Does your throat feel prickly when you swallow—due to a cold? Benefit from Luden's special formula. Contains cooling menthol that helps bring quick relief. Don't suffer another second. Get Luden's for that "sandpaper throat!"

Copr. 1940, Luden's, Inc.

PROGRESS AND PROFITS

There's more to the caption of this advertisement than alliteration.

There's the fact that, in almost every instance, those business and industrial concerns which are quickest to recognize progressive change, and adapt themselves to it, are the concerns which show the highest profits.

There's the fact that yesterday's production methods are almost as obsolete as yesterday's military tactics. And that goes for figure-work production methods—where progress has been less spectacular but no less real.

Comptometer *methods* are an integral part of "Comptometer Economy" in the handling of vital figure work. They are as modern as the new Model M Combined-Touch Comptometer. Together, methods and machine handle *more figure work in less time at lower cost.*

Felt & Tarrant Manufacturing Company, 1714 North Paulina Street, Chicago, Illinois.

was tying the fourteenth knot in his rawhide when a messenger ran out from the lines and commanded, "Hold your fire! Old Andy said hold your fire!"

"I shoot 'em when I see 'em," Mister Plunkett said. "Tell him that."

The Choctaws began picking off Red Coats and Jackson fumed. The Indians didn't understand his profanity and thought he was praising them, so they advanced into the woods to surprise the West Indian Negroes.

A rocket soared from the British lines, whining at first, then whistling. It exploded in a burst of blue. Another signal rocket exploded near the river. Mister Plunkett filled his mouth with rifle balls, crammed greasy patches into his shirt. The dumed fools were announcing their attack. Drums rolled a charge and the fog lifted as though the drums had beat it away. The field was a carpet of frost. Mister Plunkett had seen so many beautiful things in his life that he was hard to impress, but this sight took his breath: blue-and-silver rockets bursting, cannon belching red, drums rolling and Red Coats marching in perfect precision across a carpet of silver. They were almost too pretty to shoot. Mister Plunkett thought as he drew a bead. . . .

JACKSON was standing on the ramparts near Carroll's men, a walking stick tucked under his arm. Major General Gibbs, on a black horse, led his men into the narrow pass by the woods. The Americans loaded their cannon with grape, bits of chains, slugs, anything that would scatter. They aimed point-blank at the Red Coats and opened fire.

The smoke from the big guns spoiled Mister Plunkett's aim and Jackson sent word that the cannon should be cooled to give the riflemen a chance. The British ranks closed and the Americans waited until they were within two hundred yards. Jackson nodded to his riflemen and stepped down from the ramparts. Mister Plunkett had drawn his bead, but the first row of Red Coats went down before he could fire.

The Seventh Fusiliers moved in and Mister Plunkett got his fifteenth man. The Dirty Shirts worked in relays, one line stepping to the ramparts to fire, while their comrades loaded. The Fusiliers withered. The ranks looked like a curry-comb with half the teeth broken. The British column melted into a skirmish line. Major General Gibbs urged his men to push on with the bayonet. The men in the front ranks quailed, a strange thing for British veterans to do. They turned toward the rear and threw the column into confusion. General Pakenham rode up to rally the men. A rifle ball smashed his arm and the column retreated out of range to reform. Mister Plunkett had fired three times, but wasn't sure he had got his sixteenth man. He put the rawhide thong on a bush. It was too much trouble to take it from around his neck every time he killed a man. During the respite he tied knot number fifteen.

The praying Ninety-third Highlanders, every man a six-footer, obliqued to support Gibbs. Keane gave the order and Colonel Dale commanded them.

Mister Plunkett's sixteenth man was a Scotsman. He loaded and primed again, waiting for the smoke to clear so he could get a shot. The Royal Scots Fusiliers and the Forty-third Monmouthshires charged with Pakenham leading them. General Gibbs was to the left of the front, waving his hat.

It was the hat that attracted Mister Plunkett. A man who waved his hat and yelled must be somebody important. A man who could afford such a pretty hat was bound to be a nabob. Mister Plunkett supported his rifle against a tree and aimed at the man's head. It was closer than good buck range. The hat fell at the edge of the ditch. Gener slumped in his saddle and h dashed to the woods, so close t Plunkett that he could see the the man's head. Then the genera from the saddle.

The Scots were riddled and w ing about in fatal confusion. ham, Dale, Wilkinson and Gib dead or dying. Keane was woun had lost his sword. Never befor many officers been killed in so time.

The British were retreating. Plunkett fired into the red mas wasn't sure that he got a m moved his gun to the left and it to bear on the chest of a hug man, who was just standing the dumb ox, his head bowed. He of the praying Highlanders. I Plunkett had known he was maybe he wouldn't have shot h then maybe he would have. who would stop to pray in a fig expect favors from God, but he get any from Mister Whitlock F

Pakenham's last order was th bert's reserves should charge, b bert knew it was foolish. The a fleeing. A Highlander threw d gun and picked up the body of ham. Mister Plunkett started him. He'd be number nineteen couldn't shoot an unarmed m Highlander took Pakenham's the rear and they put it in a keg to preserve it.

Mister Plunkett rubbed the out of his eyes and scratched h He didn't know the English w feated. The fight had lasted h half an hour. More than two t Britons were dead. The Americ totaled eight. As the enemy like helpless sheep at the far en field, Mister Plunkett saw five men get up suddenly and su They had fallen prone to escape death.

MISTER PLUNKETT finge thong. He didn't have mu room, but needed only one mo The British would be back. I ways came back. He tied th around his neck, leaned agains at his advanced outpost and w Dirty Shirt brought him orders at headquarters. Mister Plun nored the man. The courier t the battle was over and Mister P stared at him, then swore so started walking down the field.

"You're headed the wrong w Dirty Shirt said. "Them's Brit there."

"I need another man," Miste kett said, and turned his cold, bl eyes on the Tennessean. Th Shirt was awed. Mister Plunkett was open at the throat despite th weather and his bony chest was with mud and welts. The inse been bad. His eyes were puffy scarcely could keep them open. been on his feet for forty-eigh "Batty," the Dirty Shirt m "Plumb crazy as a loon. Powd and blood mad."

"Who said the fight's done?" Plunkett demanded.

"Old Andy. He wants to see

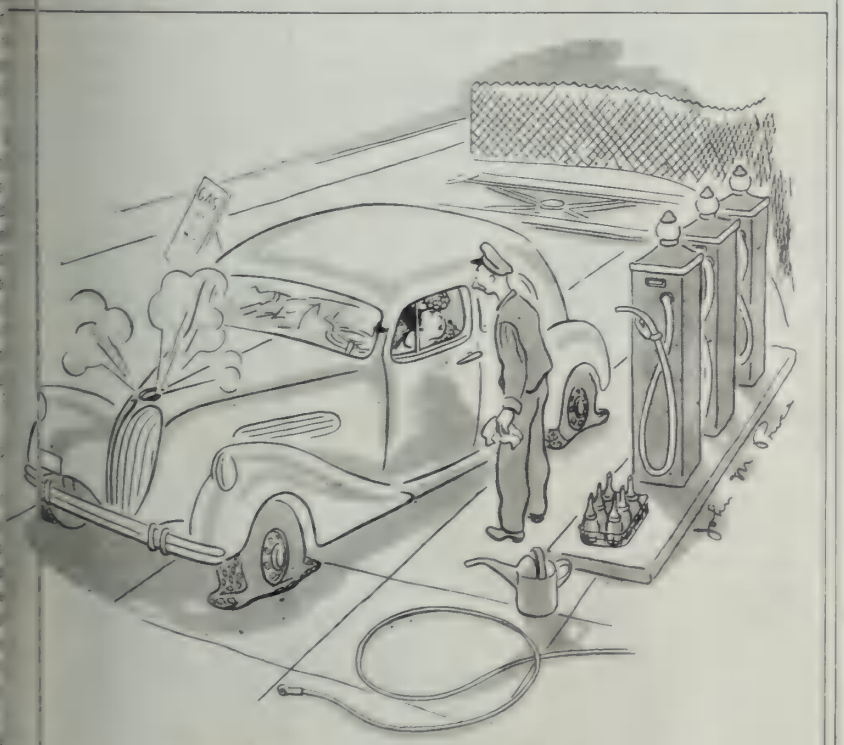
Where is Maine?"

The general pointed to Maine, then to New Orleans, and Mister Plunkett whistled. "I did come a right smart way, didn't I? And all that's United States. Big, ain't it?"

General Jackson nodded his head and the other officers nodded, too. Mister Plunkett continued to look at the map, fascinated. "If I come two thousand miles, reckon I can go two thousand more. Lot of things I want to see." He lowered his voice. "I ain't bragging. I'm a moderate man and never lie. You don't have to believe me, but I saw some strange things coming down here. I saw a man take a bath in a tub. I saw a man wash his teeth. I swear it. I saw a woman in a silk dress and the people said she was a good woman. I want to see some more things." He took his rawhide thong and put one end of it on the map at New Orleans and the other end at Eastport. Then he swung the thong around in a quarter circle. "Who owns the land out there? Is it still the United States?"

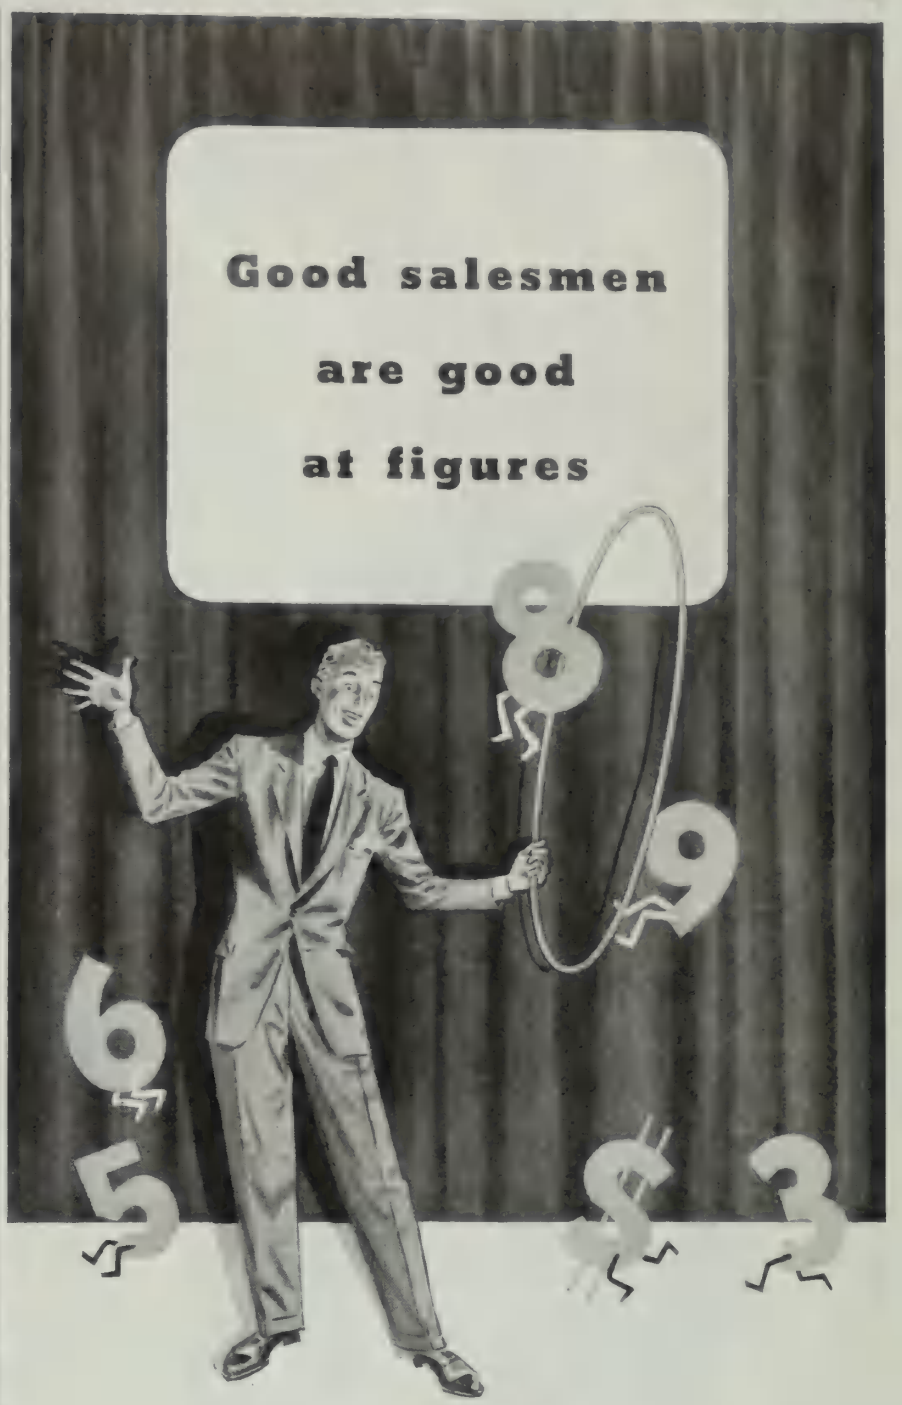
"That's right," the general said. "Nothing out there much except mountains and Indians and a lot of fresh air. No folks."

Mister Plunkett got up and reached for his rifle. "Well, there's going to be. I'm aiming that way. I'm grateful for the time you gave me."



General Jackson walked with him to the door. "You know your own mind but we'd be mighty proud to have you settle down here. We are God-fearing people. Liberty-loving, sovereign, humble before God, but proud before men."

Mister Plunkett thanked him. "I'll get on. I don't hold to all that talk about liberty. I don't understand all them big words and I don't believe nothing I don't understand. All I want is a place where I can go and come as I please, say what I want to. Maybe I'll get me a woman out there."



General Jackson shook his hand again and smiled at his officers as Mister Plunkett walked away.

An aide spoke up without being spoken to: "He's a crazy old coot, eh, Andy?"

The general returned to his reports. He looked at his map and then up at his men. "No, gentlemen, he's not crazy. He knows what liberty is. I hope he has a raft of children and a multitude of grandchildren. I won't worry about my liberty in that case or about the liberty of our great-great-grandchildren."

"Now don't start finding things that need taking care of—all I want is gas!" JOHN M. PRICE

Here's one worth figuring out!

DIVIDE the total cost of your last sales trip by the number of customers visited. (One company found this average cost to see a customer was about $9.)

Now average what it would have cost you to *telephone* each customer before you started for his town.★ (The same company computed the average cost of such calls at approximately 75c.)

Your figures may be quite different, but the principle stays the same.

If the Long Distance call tells you your customer is tied up or away, you save the expense of a visit!

If you find out he *is* available, you can make a definite appointment, avoid a long lobby-wait, and have time for more visits per day.

Either way, it's a doggoned good investment!

★ Many rates are shown on the inside front cover of most directories.

TO GREECE AND RETURN

WHATEVER comes hereafter, the Greeks in 1940 A. D. have shown themselves to be of the same breed as Leonidas' thousand of 480 B. C. who held the pass at Thermopylae till all but one were killed.

Koritza, Konitza, Pogradec, Porto Edda, Argyrokastron—by these signposts the tale of Italy's trip to Greece and return can be read. The glory that the Greeks gathered there will not be dimmed by any reaction that may come. The most probable reaction at this writing is a large-scale spring offensive by Mussolini & Co., possibly with German help, and it is hard to see how Greece's ultimate chances can be any better than were those of Finland last winter.

There's a fighting chance, though, that it may turn out that way. After forty days of Greek victories in Albania, and after the British crippling of Mussolini's navy at Taranto, a British drive suddenly cut loose in North Africa against Marshal Graziani's forces, which had set out for the Suez and settled down near Sidi Barrani.

It may just happen that the British will be able to knock Italy out of the war before spring. If they do, they'll probably blast Mussolini, inventor of Fascism, out of the Chigi Palace. Aside from some serious mishap to Mr. Hitler himself, that would be the most deadly blow that statism could suffer at this time.

Such a liberation of the Italian people seems almost too much to hope for, so soon. And yet . . . the P. S. to the Thermopylae slaughter was the Battle of Salamis. At Salamis the Greek navy smashed the Persian navy of Xerxes. At Plataea, a year later, the Greeks blitzed the biggest of all the Persian efforts to conquer Western democracy for Oriental statism.

It's foolish to make flat predictions these days. We'll just note the fact, though, that, while history doesn't always repeat, neither does it always fail to repeat.

Safer Safety Pins

A DULUTH doctor's invention, d a safety pin that really is safe, i into production by the Minnesota I ers, a protégé of the Minnesota Dep Education.

This pin, it is averred, can't spring self. Hence, if a baby swallows it danger of its opening up and punc poor little rabbit's liver or lights. opened and shut with one hand (try with the ordinary small safety pin) not easily bent out of shape.

The report sets us wondering l other articles in common use could improved but simply aren't.

Shoelaces are still hard to dub shoes, though most laces wear bette once did. All the brands of our favor that we know of come in containers habitually break finger nails. The s of various other packaged drugs.

Pen and pencil clips have at long l at a point where they will hold yo pencil in your pocket as grimly as a ing her stance at a bargain counter. still gradually gnaw your pocket shreds—unless we've missed someth

And so on. Maybe we're wrong; seem to us that anybody who will basic improvement in one of a hun everyday items will make himself earned money and the human race tinctly happier.

Keep the Draft Democratic

WE DON'T overwork the word ing," "appalling" and "outra this page, because we don't shock, outrage easily.

Also complete courses in Anthropology, Archeology, Astronomy, Bible History, Botany, Civics, Classical Literature, Drama, Economic Geography, English Language, English History, Eurythmics, Geology, Geography, German, Greek, Interior Decorating, Italian, Mnemonics, Money, Music, Penmanship, Philology, Phonetics, Physical Geography, Politics, Shorthand (Gregg & Pitman), Social History, Typewriting, Writing, Zoology.

Handsome, Life-Time Binding of Pin-Seal Grained Novelex, Beautifully Embossed and Hand-Tooled in Brown, Black and Gold. This Standard Edition is illustrated here. Also a DE LUXE EDITION in Genuine Morocco-Grained Arteraft—the last word in beauty and distinction—for only 50¢ extra per volume. To see this edition, check box in coupon.

HIGHER EDUCATION AND HIGHER EARNINGS GO HAND IN HAND!

THE formula for success is simple. You learn all you can about the business or profession which gives you your income, and in addition, widen your information of the other fields of knowledge which will make you a well-posted and well-read citizen—a candidate for a well-paid executive position.

It was to aid men and women in seeing and developing all their possibilities for personal advancement that the National Educational Alliance was organized. Now all of the 1585 fascinating lessons of the Alliance have been put into convenient book form—for enjoyable home study, at amazingly low cost!

Just As In College You Study Only the Courses You Want

Think of Studying Courses of Immediate Practical Value . . . ACCOUNTANCY, PSYCHOLOGY, ENGLISH, etc., for only a few cents each!

NO MATTER what your present position and ambitions may be, the ALLIANCE Courses will bring you help to fit your particular needs—practical, positive help to carry you on to the goal ahead—to ever higher earnings—to greater accomplishments in your social and cultural life.

No longer need you believe the old saying that "there is no royal road to knowledge," for the ALLIANCE has surveyed and paved the path for you—and has made a higher education, PRACTICAL KNOWLEDGE FOR ALL, available at a cost that probably less than you now spend for your daily newspapers.

Take, for example, a subject like PSYCHOLOGY. If you had attended lectures on this subject in person at a college, it would cost you hundreds of dollars—and even an elementary textbook would cost you three or four dollars. Yet the NATIONAL EDUCATIONAL ALLIANCE brings you a complete and practical survey of this useful science in 38 individual lessons by an eminent educator especially selected from Northwestern University—AT A TOTAL COST OF LESS THAN 21 CENTS!

57 Practical Courses for Everyone—Business Man, Mechanic, Office-Worker, Teacher, Parent, Student.

"World's great bargain in education"—

is the consensus of opinion of over 300,000 men and women who are already enjoying these 57 home study courses.

"I paid $120 for a course in Accounting, which would not compare in any way with the wonderful lessons in the Alliance Course."—E. M. O'D., New Haven, Conn.

"Have never before received so much benefit from an educational course in such a short time." V. O., Springfield, Ill.

Examine These 10 Volumes FREE

Enjoy 5 days' FREE examination of these 57 courses, in 10 superb volumes, in your own home. If not delighted, return them and your examination will not have cost you one cent. But if you are convinced that these courses are indeed the world's greatest educational value—then keep the Library, and remit, in easy monthly installments, the incredibly low bargain price at the rate of less than 1c a lesson!

Send only 25¢ refundable deposit with coupon and save shipping charges on 20-lb. case of books.

NATIONAL EDUCATIONAL ALLIANCE, INC.,

COVER EARL OLIVER HURST

ANY WEEK

WE'VE just been visited by a journalist who told us about a newspaper proprietor he used to work for. It was in a central Kentucky town and, at the time, a particularly torrid local political campaign was being launched. On behalf of the staff, our friend went to the publisher and asked him which candidate he was going to support, both being Democrats. "I haven't made up my mind," replied the boss. "All I can tell you is that when I do I'm going to be awfully damned bitter."

MOREOVER, we've just been interrupted by the telephone. It was Mrs. Peg Marshall, wife of our colleague Jim Marshall. Mrs. Marshall was in Flushing, Long Island, and had just come out of a pastry shop. "I couldn't resist it," she said. "In the window there was a sign proclaiming that the lady had just fried a fresh batch of Fluffy Wuffies. I bought two dozen, one for you and one for Jim. They look like holeless doughnuts and taste like Fluffy Wuffies. Tomorrow, the lady said, is Tasty Wasty day. I'll not forget you boys."

UP TO now nothing seems to have come of that idea of lending Princess Juliana of The Netherlands a couple of billion dollars on the understanding that she relay it to the Bank of England. Thus we might have side-stepped the Johnson Act which forbids loans to the debtor belligerents. However, we're advised by one of our most diligent Washington scouts that the plan lacked the popularity that its creators hoped for. He says that some marplot, on the eve of Her Royal Highness' visit to Washington, dug up the fact that she is one of the richest owners of Washington real estate. He gave us an estimate of what her and her mother's Washington holdings are worth. We think we'd better not mention it, being somewhat stunned by the figure. However we can't help mentioning one property—an enormous apartment house valued variously from three to five million dollars. It's a swell joint. We know because we attended a party there not long ago, our host being an almost ferocious isolationist. We got into quite an argument with him. Finally he told us that at least part of his isolationism was due to being tired of the high cost of living in the Princess' house. Just what all this has to do with helping England pay the high cost of licking Hitler we aren't sure. We merely jot down these little items in the interest of this and that.

WE WON'T say that he's the only one, but Mr. Arnold B. Thedder of Atlanta, Georgia, is a trifle weary of all the talk of the mechanical and scientific wonders that our new Army will abound with. Too many gadgets working too many automatic miracles. In the last analysis, thinks Mr. Thedder, it will be some adventurous guy with a machine gun who'll win the war. "They're rigging the lads up with two-way radio sets which means that he'll be so busy listening to commands from someone far in the rear and saying Yessir that he won't have time to do anything about the enemy. They've got tanks that can communicate by wireless with one another and with the supreme command. They've got the air force, the artillery and the infantry all hooked up to bawl out one another while the fighting is hottest. For my part it's all too new to be true. Of course something is going to blow a fuse at the wrong time and the whole hookup is going to collapse. But don't worry. I've just found out that, for all this scientific skulduggery, the Army is still training dogs and pigeons to carry messages when the juice fails. "Personally I'm betting on the birds and the dogs. They're something I understand."

AND we've just received our favorite joke again. This time it comes from Mrs. Lansing T. Vaill of Toronto, Canada. As far as we recall this is the twentieth time somebody has sent it. Maybe you've heard it too. Anyway, there were two hippopotamuses sunk contentedly in the mud and slime of the banks of the Nile. The day was fearfully hot. Flies and other unnecessary nuisances were making the day even less attractive. Both beasts lay half asleep in the muck, only their heads in full view. And one of them says drowsily to the other: "Do you know, for some reason I can't help thinking this is Thursday."

AS EVERYBODY knows we've devoted our life to spreading sweetness and light, even in days like these. It's a ticklish job, a deceptive one. For example, some time ago this magazine published an article about the Border Patrol on the Mexican frontier. Therein it was stated frankly that while the men may like the life, the loneliness and occasional absences of modern conveniences make it less attractive for wives. We've just heard from Patrol Inspector Douglas R. O'Connell of Edinburg, Texas. "Well," writes Inspector O'Connell, "you've done it. Yessir, you've done it. For weeks I've been working on the girl friend trying to convince her that the Mexican border is the place to live. And I think I had her convinced when, bang, that piece about the Border Patrol came out. Listen, mister, t

Take your Health Bearings regularly through life

OUR VOYAGE through life can be a long and ppy one. But certain dangers are inevitable. hat's the way life is.

And that's why, like a careful mariner, you oul try to know at all times just what dangers ar nd and ahead of you—and what you can do avo them.

Ma hazards to health are best prevented or inim ed by taking your health bearings and hav- g th ough physical check-ups at regular inter- ls. his sound course is begun when the wise othe to-be places herself under a doctor's care fore er baby is born.

Cor etent and regular medical advice should en l d the infant through its first year—watch- g its rogress, prescribing its diet, immunizing it ains smallpox and diphtheria. Regular exam- atio by the doctor will help discover and med physical or mental handicaps.

You doctor can make the emotional upsets and physical changes of the troubled, adolescent teens less disturbing. He can make the young adult years safer from attack by such diseases as tuberculosis, syphilis, and valvular heart disease.

During working years, regular medical examinations can help to insure your physical fitness for your work and guard your earning power. If caught in time, errors of diet, exercise, and habit, can be corrected before too much harm is done.

▶ When you have passed the age of 45, annual physical examinations are particularly important. They guide you in adjusting your work and play to the natural limitations of your years. Early detection may halt or soften the impact of diseases common to later life, such as hardening of the arteries, chronic kidney disease, heart disease, cancer. They help to make possible a useful, sickness-free old age.

Thus does the practice of taking your health bearings at regular intervals increase your chances of enjoying a happier and longer life.

You'll like yeast this new way

TOM: All nuts-and-wiggles! Been eating yeast again?

ELLEN: No . . . drinking Fleischmann's Yeast in tomato juice. And, boy, does it taste *good*!

TOM: Say, maybe you've got an idea there! I [illegible] every day, and I felt swell [illegible] all the time. But I never seemed to [illegible] the taste.

ELLEN: Taste? . . . Nuts, it gives tomato juice the flavor of rare fresh bread! It's delicious! Millions of people are going to find out how good it is, and how much good it does, too. Start it, and I'll bet you'll never leave it.

TOM: I'll give it a trial. Everybody says it's one of the richest natural sources of the amazing vitamin B complex. And a man needs plenty of vitamins these days! Such competition!

ELLEN: Go ahead. It's a swell idea. Drink it first thing in the morning, last thing at night. And when you begin to look better, and feel peppier, I get the credit . . . understand?

MASH Take a cold water tablespoon of Fleischmann's Fresh Yeast and mash it in a dry glass with a fork.

STIR . . . Add a little cold tomato juice, milk or water, but still blended. Then fill glass. Stir again and . . .

DRINK your yeast this delicious, easy way for a quick, tonic . . . while it's [illegible] takes less than a minute!

Fleischmann's *Fresh* Yeast

DRINK IT . . . TO YOUR HEALTH!

Wing Talk

FARSEEING men who love aviation seem afraid that air defense is getting into the same fix as Mark Twain's famous weather—everybody talking, nobody doing much about it. For example, they point out that in our lakes you can observe how lack of national air plan and policy over the years has left another great asset of this nation undeveloped and unappreciated.

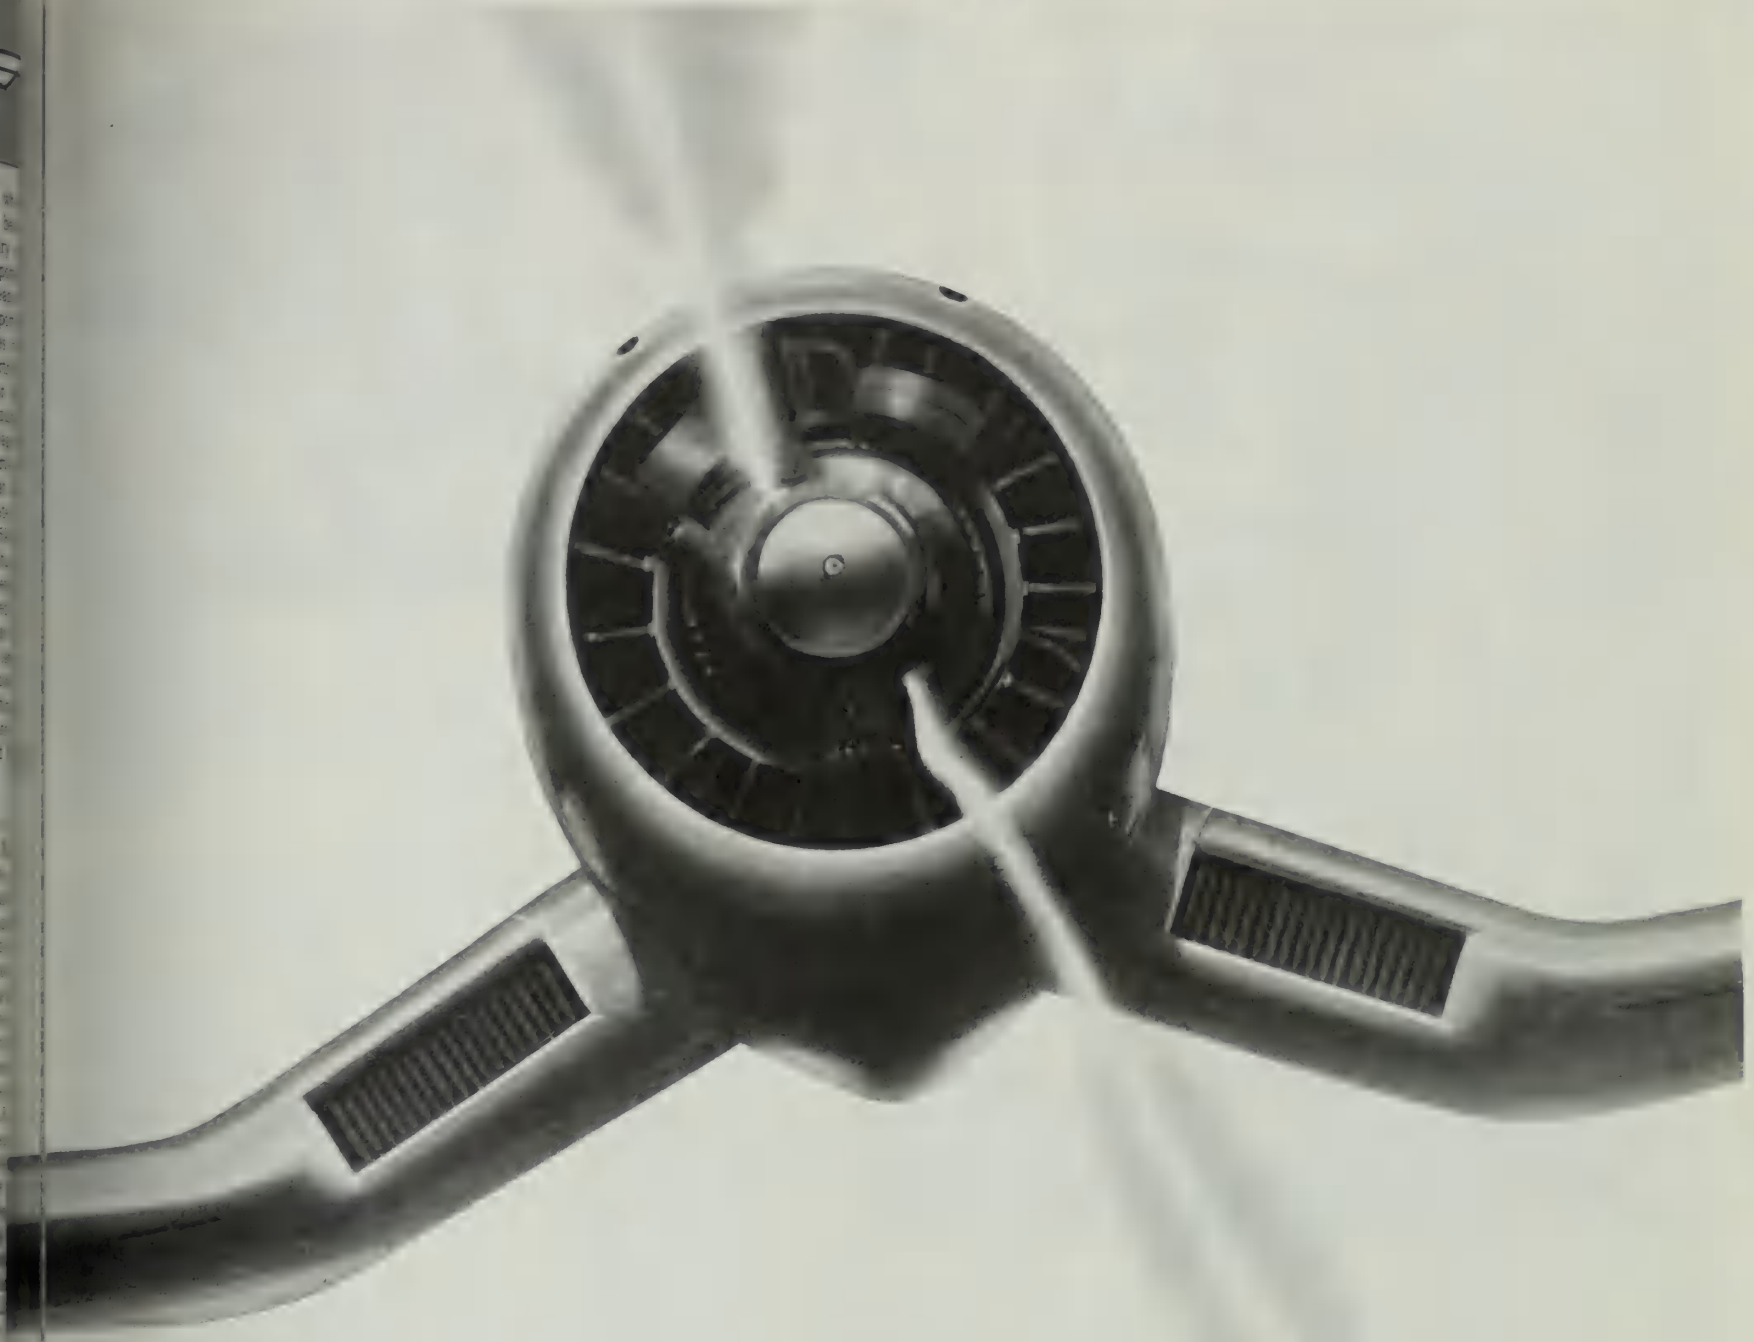
One handicap of surface transportation always has been its dependence upon terra—whether "firma" or "aqua." The S. S. Normandie can't go to Des Moines; nor the 5:15 to Honolulu. Sour grapes are expressed in the persistent attempts of vehicles of each sphere to invade the other. In the daffy sequences of the newsreels, launches come from the water and run upon wheels, and cars put out to sea. The airplane moves neutrally above both elements, and finds geography a push-over.

Lately the plane-smart who dwell within eyeshot of Floyd Bennett Field abaft of Brooklyn's Flatbush section in the Asia Minor of Greater New York City have begun to see a new type of big ones bound for service in Europe: twin-motor "PBYs" dropping from the sky to roost briefly for the last time on home territory before they go to Halifax. The code by which naval planes are marked indicates the primary function of this type is (P) patrol, the secondary (B) bombing; while the (Y) according to the Navy's custom of assigning a letter to each concern from which it buys planes reveals these were manufactured by the Consolidated Aircraft Corporation.

The passage of landplanes across the United States jiggles no eyebrows. But the PBYs are flying boats. Hair-pulling between seaplanes and landplanes is relaxed only when both gang up in their classic heavier-than-air brawl with lighter-than-air. We're not egging them on now—but merely asking you to share our impartial jubilation in remarking the national good fortune that matter-of-fact flight of boats across the land mass of the continent emphasizes. Within the boundaries of the United States proper are more rivers, artificial and natural lakes and reservoirs suitable for aviation purposes than in any other comparably populated and developed nation on earth. Exclusive of the Great Lakes and reservoirs, we have about 58,000 square miles of water area—a larger patch than the whole [illegible] Arkansas. Air leaders believe [illegible] the approaching military era [illegible] source may be more important [illegible] Atlantic and Pacific oceans.

While you count landports in [illegible] can reckon sizable lakes in the [illegible] That's why any pilot worth his [illegible] start inland from either coast [illegible] misgivings in a plane equipped [illegible] ter landings. Ten years ago the [illegible] Board of Maps and Surveys p[illegible] a list naming the largest lake [illegible] entirely within each state, plus [illegible] others of importance—159 all told. Kansas, Oklahoma, Kentucky and Virginia were unrepresented, a[illegible] there are several hundred square [illegible] of water area in each; also each [illegible] bordered or crossed by large [illegible] was not a total census—none such [illegible] Wisconsin officially estimates [illegible] nearly 3,000 lakes; Minnesota [illegible] about 7,000 named and thous[illegible] smaller ones unnamed.

AIRMEN want to know: If the [illegible] Canal is vital to our Navy's [illegible] freedom of movement to prote[illegible] coasts, can the great inland [illegible] reservoirs be less than a godsen[illegible] mobility, effectiveness and strikin[illegible] of its air squadrons? Take Lake [illegible] behind Boulder Dam—the larges[illegible] made lake on earth. All the naval [illegible] of all the world's powers could [illegible] there and not shade its waters. [illegible] Salt Lake is as big as Delaware [illegible] of-the-Woods bigger than Rhode [illegible] Lake Michigan is as large as Ma[illegible] Connecticut, and New Jersey com[illegible] All these huge lakes are strate[illegible] placed to help our air defense co[illegible] invaders from one ocean or b[illegible] that remote peril ever comes.



A lake five miles in diameter [illegible] be used to base fleets of our larg[illegible] ing boats, with necessary supp[illegible] overhaul shops and barracks [illegible] around it each more than a mil[illegible] the next. The buildings repres[illegible] major expense. A comparable la[illegible] with clearing, grading and su[illegible] would cost millions. A landport [illegible] chewed beyond usefulness by air [illegible] bombardment of water landing a[illegible] waste of time and TNT.

Experts, therefore, are now [illegible] that while no other phase of land[illegible]

THE *AIR-COOLED* ENGINE
Priceless American Asset

First 500, then 1,200, and now 2,000 horsepower! The whole progress of military aviation centers around the ability of airplane engines to develop POWER.

America alone has 2000-horsepower engines in production.

Through each successive advance in power production, American radial air-cooled engines have led the way. With the development and actual production of the new 2,000-horsepower Pratt & Whitney Double Wasp engine, America lengthens her lead.

Long the envy of the world in low weight per horsepower, dependability, performance, and economy, the American air-cooled engine is now bringing to our flying forces the advantages of maximum speed as well.

In these engines our country possesses a priceless asset.

YOU have probably known several cases like that . . . the medical records report lots of them. And they all lead up to this warning:

Don't take a cold lightly. Don't neglect it. Take care of it at once.

HELP NATURE EARLY

If you feel a cold coming on, or your throat feels irritated, go to bed. Keep warm. Drink plenty of water and fruit juices. Eat lightly. Gargle full strength Listerine Antiseptic every two hours.

All of these simple measures are aimed to help Nature to abort a cold quickly. Rest and warmth build up reserve. Juices and water aid elimination. Food restores strength. And Listerine Antiseptic kills millions of germs on mouth and throat surfaces . . . the very types of germs that many authorities claim are the cause of many of the distressing aspects of a cold. Tests showed germ reductions on tissue surfaces ranging to 96.7% fifteen minutes after the Listerine gargle, and up to 80% one hour after.

9 YEARS OF RESEARCH

And in tests conducted during 9 years of research, those who gargled Listerine Antiseptic twice a day had fewer colds, milder colds, and colds of shorter duration than those who did not use it. This success we ascribe to Listerine's germ-killing action on the mouth and throat surfaces.

We wish we could say that Listerine Antiseptic so used would always head off a cold, but we cannot. We do say that as a first aid it is deserving of your most serious consideration.

ow not to please your typists

THIS EMPLOYER thinks he is doing his typists a favor by purchasing new typewriters for them.

He isn't — unless each girl happens to be getting the make of her choice.

For today's up-and-coming young career wo- an and deserves a voice in the selection of ewter. She alone knows what make suits her tying best, enables her to do better work for nd o it faster.

f i new-typewriter time in your office, let pis decide. You'll be the winner in increased a respect from a happier, more efficient

e w a *selfish* motive in making this plea for pis ? Of course! If they are graduates of mod- sin s schools, they probably learned on a leding choice in over 20,000 schools. They ly l ow that a Royal stands up longer, is faster sie o operate (the all-time speed record was n a oyal). Finally, it's just natural that they pre r to use the finest quality machine made. at, the opinion of most typists, is the Royal.

ROYAL

WORLD'S NUMBER 1

TYPEWRITER

Copyright 1941 Royal Typewriter Co., Inc.
*Trade-mark Reg. U. S. Pat. Off.

Do your typists this favor. It costs you nothing. Phone your local Royal office—*we're* so confident of Royal's superiority that we'll gladly put a new Royal in your office for a free "desk test." Compare the machine with any other make—we're certain you'll find that a Royal will save your girls time and effort, will mean better work, will give you more typewriter for your money. Here are a few reasons why:

Easier to operate. Whether her touch is light or heavy, a simple twist of Royal's Touch Control* dial will adjust the keyboard to her exact pressure. Less finger tension! To change margin stops, just flick the MAGIC* Margin lever, and *click*—it's set! Changing ribbons, too, is only a matter of moments on a Royal. No messy fingers!

Easier on nerves and eyes. No flashing type bars to blur the eyes. On the Royal, they flash unseen. Nor does the carriage clatter and jump when the shift key is struck. The Royal has a quiet, locked, bob-less shift. Finger-comfort keys save broken fingernails. While Royal's no-glare finish eliminates dancing light reflections, saves eyestrain.

I learned my lesson from a big green wave

AN OIL TANKER, butting its way between Marcus Hook, Del., and Beaumont, Texas, is not the most romantic thing in the world.

But when, between my sophomore and junior years in college, I got the urge to go to sea, my only chance was aboard a tanker. So I signed on.

Now one way an oil tanker can be distinguished from many other vessels is by the "catwalk" that stretches fore and aft along her length. This "catwalk" is provided because a heavily loaded tanker, deep in the water, is often swept by waves. In fact, in a high sea, even the "catwalk" is not always safe.

I discovered this on our return trip from Beaumont. I was walking forward along the "catwalk" with a bucket of paint aboard in each hand, when a mountainous green wave struck us. Only by dropping the buckets and grabbing the rail did I prevent myself from being washed overboard. When I reached the other end of the "catwalk," dripping and with both my buckets gone, the bosun was waiting for me.

What he said was short and to the point: "One hand for the ship—one hand for yourself!" And the way he said it I knew that next time I'd remember that seaman's rule-of-thumb and have one hand free to protect myself from danger and the other to keep from losing whatever I might be carrying.

"One hand for the ship, one hand for yourself!" How well those words have stood by me since my one trip to sea! I remembered them when I took on the not too grave responsibilities of my first regular job; when I got married; when I went into business for myself; and as our family has grown.

I've found that insurance was the rail of the "catwalk" through life. Many a time, I've be... let go for a moment. But I've never ... bosun's words.

As a result, fire or storm cannot take ... from me. If I have an accident and ... the hospital, I know my bills will be ... And when I finally pass on, I know th... will be able to live in peace and decer... rest of their lives.

And by taking care of my own and ... thrown any burdens on other people. N... to risk anything trying to rescue me ... troubles I should have prepared for, but ... don't intend that anyone ever shall.

The principle of "one hand for the s... for yourself" is not a hard one to apply. ... a very easy one to neglect and forget. ... touch with a Travelers agent or represe... row? His training and experience have ... cially well-fitted to advise you on the kin... you need and the amounts you should ...

THE STARTING HANDLE

By Roland Pertwee

tania rules the waves l Ir. Hughes' son-in-law l lings firmly in hand Timarsh. It's a cinch

O HE Hughes family the advent of ar was the cue for a diversity of atriotic expressions. Behold the sitn of Mrs. Hughes from cus- ar suits of solemn brown into a pair lac and a striped shirt; her coura- as ttempt to read the editorials in Tnes, her arrangement of red, te nd blue crinkly paper in the es f the dining and drawing room. er daughter, Molly, who already ess d a leash of slacks in beige, y lue and terra cotta—she looked aolinarily nice in them, if rather ay behind, being built on those bb lines which inspire slaps and hi s—turned her thoughts to graver ter; took a course in first aid and he ursing; put in three evenings a week at the food office and became secretly affianced to Alan Sinclair.

Mr. Hughes, a retired building contractor with funny eyebrows, bought himself a motorcycle as a measure of economy and an example to car owners, and, on his first day out, came into collision with a military car, through no fault of his own, and was laid up for three weeks with a broken rib and a greatly increased critical faculty. Of Mr. Hughes it would be no injustice to say that he was both a cross and critical man who clearly perceived the shortcomings of governments in general and Alan Sinclair in particular. Confident in the rightness of his judgments, he pronounced Alan to be an ass, employing a variety of censorable adjectives before the word. This conclusion had been provoked by the young man's tendency to eschew all normal procedure and pursue courses of unusual and disastrous subtlety.

For Alan was an original youth who never approached an object by the direct route if there was any possibility of reaching it around the corner. His mind, if it may be so described, moved in a manner almost impossible for an average intelligence to follow or endure. He was a man who would rather reach an attic by climbing the ivy than by using the stairs. He was interested in the detection of crime and evolved novel, if seldom successful, methods for bringing malefactors to justice.

A CASE in point was when Mr. Hughes indignantly stated that some dashed person was paying nightly visits to his orchard for the purpose of pinching the Blenheim oranges. Eager to earn Mr. Hughes' respect, Alan, without confiding his intention, cunningly mounted a shotgun in the branches of an apple tree, connecting the trigger with a wire that ran through the grass.

The ruse might well have resulted in the capture of the raider had not Mr. Hughes, with the laudable intention of keeping the doctor away, stepped forth that same night into the orchard, whereby the piece was discharged within a couple of feet of his right ear, producing a violent singing that deadened the sound of Alan's approach and left him at the mercy of a blow from a bag of salt.

The event was unhappily timed, for Alan had intended to follow up his success by asking Mr. Hughes for the hand of Molly. That this request would be made in vain was clearly revealed when Mr. Hughes recovered consciousness and bade him leave the premises nor ever return.

Belonging to a generation born to adversity, Molly neither wilted nor despaired. She perceived that, from her father's point of view, what Alan had done was grievous, and experienced some private misgivings in regard to his intelligence. These, with loyalty born of love, she forebore to utter, and remarked that her father simply would not try to see good in anybody. To this he replied that he was not such a fool as to fail to recognize a congenital idiot when he saw one.

"That young fellow has never done a useful day's work in his life. I doubt if he's enough sense to write his name on a wall with a piece of chalk."

Molly replied that nobody with

sense of propriety would dream of writing his name or anything else on a wall and, warming to her subject, propounded the hypothesis that Alan was a genius and one day would startle the world.

"Well, he won't startle it from this house," said Mr. Hughes, and went to bed to the singing of violins.

THESE events occurred before the declaration of war, and had it not been for the war and Alan's immediate enlistment, and the fact that he looked like "a sweet little convict" in his battle suit, the young couple might have been permanently divided.

Meeting in a disused pigsty, this being chosen as a place where interruptions were unlikely, Alan pleaded his cause and, following a period of probational petting, in which he acquitted himself most effectively, he was accepted.

"I look on the war," he said, "as my great chance, Mollypie," that being the name he had for her. "Civilian life never offered me any scope, but now I shall find just those opportunities for self-expression I've always been looking for. Yes, old thing, I can see myself outwitting Adolf at every turn. I can hear the general staff saying, 'Get hold of that fellow Sinclair, he's always got the answer up his sleeve.'"

"The answer to what?" she asked.

"Whatever's puzzling 'em, of course. For all you know I may be the future Lawrence of Arabia."

But although it seemed unlikely, Molly did not deny the fact, and even tried to look as if she believed it.

Before parting he inquired whether, since he had now joined up, his suit was viewed with greater favor by that excellent if austere man, her father. Molly said it wasn't.

Later, they went their several ways: Alan to his training, Molly to the office of the local food controller, where she made out lists of stocks and requirements and put in some brisk, defensive work against the food controller who, in her presence, was almost permanently out of control.

Meanwhile, Mr. Hughes, convalescent from his recent mishap with the motorcycle, prosecuted a critical campaign against every government department—national and local—the general staff, the press and public, with increasing severity. It was an occupation that excluded him from practical participation in the civil-defense services springing up throughout the country. But let it not be supposed that his devotion to England was the less on this account. He withheld himself because he perceived the futility of other men's actions and the inefficiency of their performance. Time that might otherwise have been usefully, if dully, employed with the A.R.P. or the A.F.S. was spent telling his wife, who was in no position to remedy the evil, exactly what the general staff and the cabinet ought to have done, but hadn't.

IT WAS not until the collapse of France and the withdrawal of the B.E.F. to defend their own shores that Mr. Hughes, reversing a policy of words speaking louder than deeds, plunged into the lists. He joined the Local Defense Volunteers and, as a natural leader of men, in possession of a motorcycle, was created commandant of the Tidmarsh area. From that moment there was no peace and the roar of his machine was heard by day and night. He surprised the men detailed to guard bridges and

"What do you want?" Miss Fishpingle said. "Go away." "I got to use your telephone. There's Germans about," Edward shouted

more than once nearly got hir for his pains. His keenness v spiration and a menace. He his men to be unsparing in ob and ruthless in the prosecutio duties. Under his leadershi commonly held that any para foolish as to descend at Tidma environs would get short shrif

Came a morning when Mo beside her breakfast plate a ty envelope on the back of whi ink, was: *Alice Through the Glass*. Her curiosity titillated, the seal to find that the letter Alan. She had always known believed in miracles, and the of his letter proved that his not misplaced, for, following dance of endearments, it info that he had been granted a co and would be posted in a we to one of the departments of Intelligence.

Molly was so delighted tha nounced the fact over the table, exclaiming: "Goodness! (Dad, listen to this!" Then re passage aloud, added: "So t are, Dad."

"Exactly! There you are!" grim rejoinder. "And it just l my opinion of those chaps at th

THERE being no doubt as to t cation of his words, Molly w the room in dudgeon and, tur page of Alan's letter, found the it was covered in what appear gibberish. The first line—whi "etarudbo llits si nam dlo e pointed to the conclusion that brains he had once possessed serted him, and it was not unti membered the mysterious word back of the envelope that hope Holding up the letter to a mi perceived how clever and subtl been. Eagles Over England

By Quentin Reynolds

CABLED FROM LONDON

What does the R.A.F. think of the planes America builds and sends them? The only way to find out is to ask. Mr. Reynolds asked and here are the answers

JAMES H. DOOLITTLE

Complete with R.A.F. insignia and camouflage, a Lockheed-Hudson twin-motored bomber leaves the factory at Burbank, Cal., to be flown eastward on the first leg of its journey to England

LIE Beaverbrook. You don't have to make appointments to see him, for one thing. He's too busy to make pointments. You just walk into the Ministry of Aircraft Production ildi and tell one of his secretaries, wa to see Lord Beaverbrook. It's por nt."

Bea rbrook sat behind his huge sk, piling, and we talked about this d t. Then, because I know you n't ve to be evasive and too polite th Beaverbrook, I decided to give it hi

"I h e a clipping from a New York wspaper," I said. "It says that the neri n airplanes sent over here are god. It says they are used only in inin; that the pilots don't like them; at th y are no good in combat and—"

"Le me see it," Beaverbrook said rsely He read. He put the clipping wn his desk. He was ominously iet.

"I dn't write it," I said hastily. Don' blame me."

"It a scurrilous article," he said igril "Not a word of truth in it. ney re magnificent aircraft. Come id lk at them. Talk to the pilots. y in them yourself. Go to the fac- ries where they are assembled and sted.

"Th e is a ban on visiting those fac- ries," I reminded him.

Bea rbrook brushed the thought of e ba aside with a quick gesture. "Can ou g tomorrow? Good. I'll tell you here very American aircraft in Eng- nd at the present moment. Go here r you want. If the airplanes are no good, write that they're no good. But see for yourself. See for yourself."

I did. . . .

I visited a coastal command station that uses only American airplanes. For months they have been flying over Norway and the Channel ports; they have patrolled the North Sea looking for (and finding) German submarines. This squadron uses only the Lockheed Hudson. The Hudson is well armed. Originally it was used only for reconnaissance but when Dunkirk came along every aircraft available was pressed into service. The Hudson made its debut as a dive bomber, harrying the German advance. It was a Hudson from this squadron that located the Altmark.

A Plan for Punishment

Most of the squadron was out on a daylight raid over Norway when I visited the station. That's about the nastiest job a pilot has to face. Vital targets in Norway are well protected with antiaircraft guns and with Messerschmitts. One by one the squadron straggled back. Twelve of them had left six hours before. Eleven landed and we waited on the field for the twelfth. It was a brilliant day and finally the cold sun found a black speck in the distance. It grew larger and we noticed that it was wobbling a little bit. A Hudson is a clean-limbed aircraft but this one seemed frying at the edges. It circled the field once, flying rather uncertainly.

Something very obviously was wrong and yet the pilot had sent no wireless message that he was in difficulty. The commanding officer gave a crisp direction; two pilots went running and almost immediately two automobiles shot out of a hangar. One was an ambulance; the other a fire engine. The wounded airplane above wiggled its wings when it saw the two cars out on the field. Then it came down to land. We stood there quietly, a little tense. We noticed that the landing gear hadn't been lowered. His flaps were down and he swayed slightly then bumped agonizingly on the winter-hardened dirt of the airport, bumped again, leaned over, recovered and then stopped. The ambulance and the fire engine were right beside the Hudson when it landed but neither was needed. Five men hopped out, all grinning. The pilot, a huge, blond-haired lad, came over to his commanding officer.

"They kicked us around a bit over Stavanger," he said cheerily. "We caught a lot of *flak;* couldn't get away from it. Then two Messerschmitt 110's came out of a cloud and gave it to us. We had quite a scramble and we got one of them. Then I went into a cloud and got away."

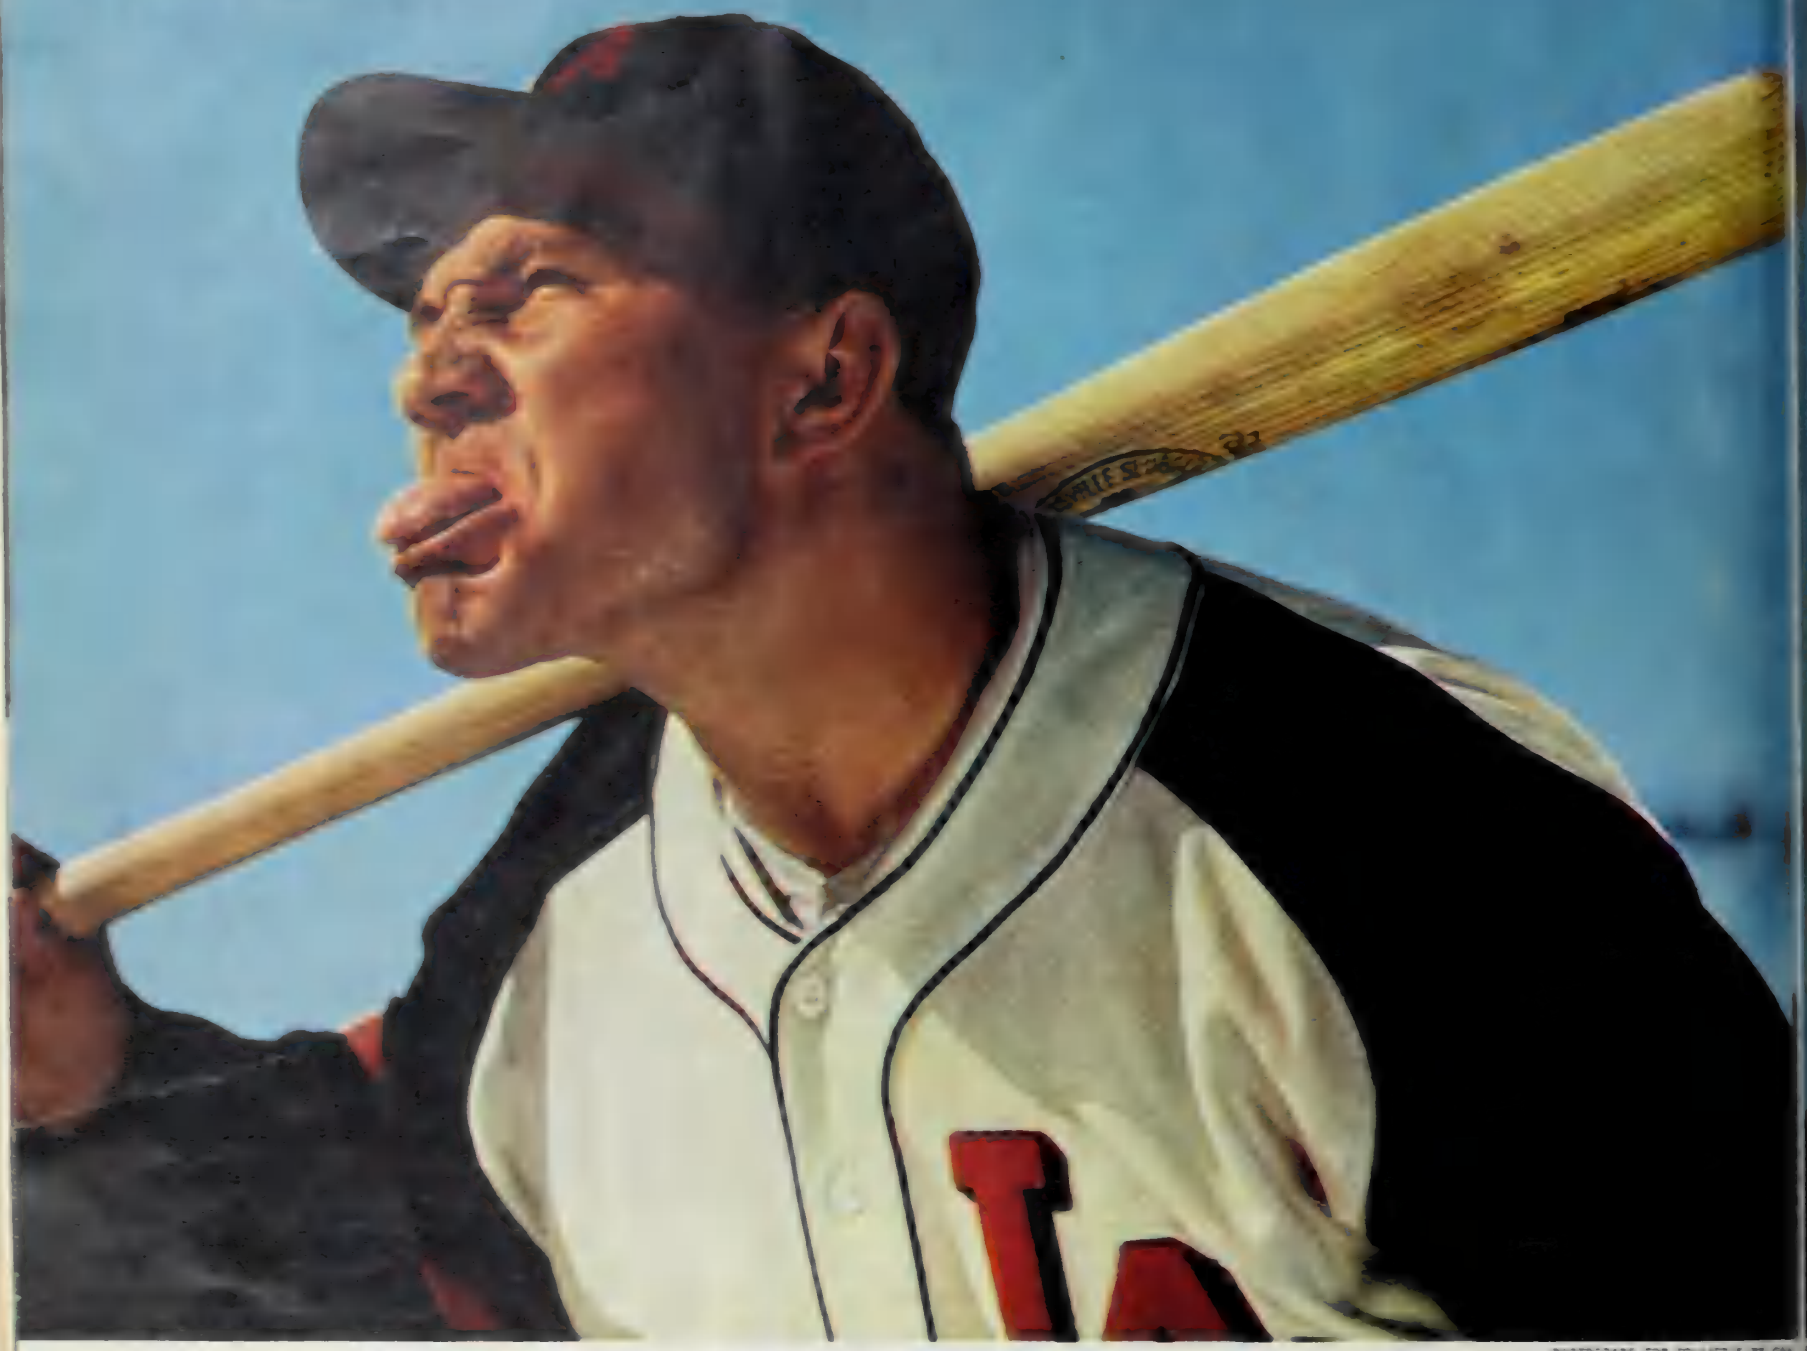
We walked over to inspect the aircraft. There was a huge, gaping hole in the fuselage. There were a hundred smaller holes. Miraculously, none of the men had been hit.

"Did your landing gear stick?" I asked the pilot. "Stick," he laughed. "Hell, it was shot to pieces. Pretty near everything else was shot to pieces. Look at the rudder. Not much left of it. But the old kite brought us home 350 miles on one lung. Not another aircraft in the world could take the punishment this one did today, and yet make its landfall. You don't come from California, do you?"

I told him I didn't.

"Well, if you ever get out that way," he said earnestly, "drop into the Lockheed factory and tell them thanks for me. This is a kite that doesn't know when it's licked. I've flown it about three hundred hours and we've been kicked around a lot but we always got back."

That night we sat around and talked of aircraft. These pilots had flown everything that was heavy—Wellingtons, Blenheims, Whitleys, Douglases.



"What about that Douglas Boston?" I asked.

"Most controllable twin-engined aircraft I ever flew," the squadron leader said. "It can do anything. It takes off like a scalded cat. It handles like a cub. It's marvelous for dive-bombing and I might add there are a lot of them in action right now. I can't say where but you read the papers, don't you? Yes, sir, I wish we had a thousand of them."

Clouting Cossack

By Kyle Crichton

PHOTOGRAPH FOR COLLIER'S BY CBS

Clowning is only one of the talents Lou Novikoff will bring to the Chicago Cubs next season

All Lou Novikoff, the Mad Russian, wants is a bat and somebody to throw that ball up to him. He's so ponderous that even if he nicks the pellet it's likely to take a leg off someone

LOS ANGELES is always nuts about something and last summer the Shrine of Fantasy was squirrelly over a broad-looking gentleman known as Lou Novikoff, the Mad Russian, who played left field for the Angels, led the Coast League in everything connected with hitting and presented a personality only slightly removed from the fabulous.

Among other things, they had a Novikoff Day at which he was awarded the Sporting News trophy for the Number One Minor Leaguer of 1939. He had led the Texas League with .368 (fifty points ahead of old Nick Cullop who was next best) and had then been recalled by Los Angeles for the last six weeks of the season in time to knock bricks out of every wall in the circuit and end with a percentage of .452.

Ordinarily, on such occasions the recipient of the honor goes into a fog and recovers only after he has dropped three pop flies and struck out so often that people think he is swinging on a gate. Not so out here. In the ninth inning of the first game of the double-header against San Diego, he reached up over his head and whammed the ball as if he were beating a water moccasin with a plank. It went nine miles over the center-field fence and three runs scored. In the last inning of the second game he broke up a scoreless tie by lunging across the plate and walloping one that was almost in the dirt. That also took flight over the distant barriers and the game was done.

"If I can get to 'em with a bat," says Lou, to all complaints about his hitting, "they ain't bad balls no more."

Between games they gave him the trophy. He answered the quick cracks of Joe E. Brown, the master of ceremonies, with nifties of his own. He did imitations, at which he is very good. Then Mr. Brown announced that the Mauling Muzhik would respond to the words of laudation in song. He would depict the Sad Soul of the Steppes in melody so pathetic that hardened souls would crack and weep. Mr. Novikoff took a strangle hold on the microphone. He cleared his throat. He began to bellow in a voice that could be heard in Vancouver, British Columbia. He sang My Wild Irish Rose.

Although Lou was born in Glendale, Arizona, he spoke nothing but Russian until he was ten, being one of twelve children of a family that had originally come from Kavkaz in the Caucasus. They landed in Washington, D. C., and worked their way to Los Angeles by gentle stages and proceeded to starve in a very decisive way. When Papa Novikoff died about seven years ago, conditions were so bad that the family was on county relief. What helped them then was Louie, who did very little about his schooling and concentrated on softball.

The Softball Sensation

After breaking into softball with the Inglewood Park Florists, Lou hitchhiked up to Bakersfield, went without food for two days and finally landed a job pitching for Ralph's Grocery, knowing the value of proper provisions. He subsequently played for Visalia and Huntington Park, where he came under the guidance of Joe Rodgers, who has since been his mentor, foster father and principal support. He played u name of Lou Nova because he to preserve his amateur stand eventually did get in one year a velt High in Los Angeles.

As a softballer, Lou was a se

He was known as the Babe the sport and there are experts tell you no man ever played the well as Novikoff. In a play-o against Santa Ana, Lou struck o ty-two men in eight innings, en lead of three runs and went out right field for the hell of it. A hit him full on the conk out ther runs scored and Rodgers took menacingly in hand and rushed t sack back into the box. He fina in twelve innings.

In the same series Louie hit run so viciously and so far t Rodgers later had it measured gone 325 feet on a straight line according to Joe, would be a mately 500 feet in hard ball.

"All right," said Joe, then enough of this. You're going i real game."

He got a tryout with Hollywoo Coast League, hit everything th him and had still to catch or sto hit at him in right field three

William Martin

ATED BY PAUL BROWN

ORT SHORT STORY COMPLETE ON THIS PAGE

AIL were scarce that fall. Most f the old-timers in the valley, ncluding Warden Tickie himself, hunting at all this season—giv- birds a chance. It was an un- gentleman's agreement.

Pop Jameson managed to keep eement, too, for a while. But by er he just couldn't deny himself nd of a gun any longer.

nd old Don, his pointer, moved ip through the woods now. The was more tired this afternoon 'd expected to be but he kept . He wanted to stand on the minute and look at Palmer's before turning back home. See- hollow, in December, was a part ng.

e top of the ridge Pop eased his arrel to his other arm and blew nittened hand. Below, Palmer's lay in picture stillness, its nar- ozen creek a length of jagged tween the willows. A blue crane ldenly from the weeds along the ank and flapped its awkward, flight upstream. With far-see- s the old man watched the bird sight, then he whistled old Don

ld dog suddenly took on new life, and wagging his tail. They go home now! There were al- rds in *this* hollow.

Pop smiled a little and sighed and shed his heavy feet slowly down He couldn't say no. This was f hunting, too—seeing your dog .

Old Don yelped approval and ran gin- wnhill and into a clump of wil- ut of sight. A second later he ut on the other side, head low- il apprehensive. Then he froze statue.

Pop walked slowly to the old dog's A single bird whirred up in a flash of brown and white. Pop raised his gun and fired. The bird wheeled, unhit, and sailed low along the brown curve of the hillside beyond the creek.

A gun boomed on the hillside behind Pop and he saw the bird jolt in midair and drop. Old Don yelped and started across the creek after the bird.

Pop looked back up the hill at a big, square-set man in a red hunting jacket. "Good shot, son," the old man called.

The big stranger didn't answer. He was busy clodding his brown-and-white setter to fetch the bird. The setter came down the hill whimpering and limping in both hind legs. Pop noticed the red mat of hair on the setter's hind quarters.

The setter met Don in the middle of the creek, coming back with the bird, and he followed the old dog back to Pop's side, whining guiltily. Pop turned the bird over in his hand, then patted Don's head.

The stranger came scuffing down the hillside in a hurry, with his hand out. "That's my bird, old fellow," he said challengingly.

"Sure is, son," Pop answered mildly, and handed over the bird. Old Don whined, and Pop touched his head and said, "But I got him too, Don. Got him as he turned."

THE stranger stuffed the bird into his red coat. "Okay, old fellow," he said indulgently, "you got him, too." He motioned the setter to heel.

The setter crouched, whimpering. Pop shook his head. "You're huntin' a mighty lame dog, aren't you, son? Looks like he's been peppered bad."

The stranger's eyes cut sharply toward Pop. "I let him have a load this morning for dragging tail on me," he said impatiently.

"That so?" Pop said. Pop didn't say son this time. Pop asked, "Reckon you could hunt along with me for a spell and give your dog a rest?"

The stranger glanced over at old Don speculatively. "He'll be slow," he said appraisingly, "but the setter's about through." He fished in his inside pocket for his watch. "I'll give you a dollar an hour, old fellow. Okay?"

Pop looked down at the setter. "I'm glad to do it free," he said slowly.

"Okay, let's get moving, old fellow. We're wasting time." He dragged the setter by the collar to a willow and tied him up. "I'm George F. W. Burston," the stranger said significantly, and then he took charge. "You take your shots, old fellow. I'll take mine. You work on the hill. I'll take the creek bottom." He walked past Pop and into the weeds along the creek.

Birds were scarce. But at the creek bend, old Don made a point. Pop moved his coat aside, waiting. The stranger, gun poised, walked briskly up to old Don and kicked the weeds. Three birds roared up in a burst of wings. One bird flared toward the hill. Pop upped his gun and fired. The bird skimmed on.

The stranger's gun boomed and the bird fell. Then the stranger pivoted and fired twice more. The other two birds dropped. It was beautiful shooting.

The stranger picked up the last two birds. Old Don made for the bird nearest Pop. Pop walked up the hill a little way and sat heavily down on a log. He was about tuckered out.

Old Don came up to his knee with the bird. The stranger hurried up the hill, smiling. "That's three for me, old fellow. You missed." He held out his hand.

Pop handed over the bird and said with mild dignity, "It's your bird, but I didn't miss. I got him on the rise."

The stranger smiled broadly. "Okay, old fellow, you got him, too." He dropped the three birds on the ground, leaned his gun against the log, and started digging in his bulging coat and dumping out birds. "What's happened to 'em this year, old fellow?" he asked. "I was down here in '38 with a party of three and we got over two hundred birds in three days!" He dropped the last bird on the pile at his feet and patted his empty pockets. "This is all—fourteen."

"The limit's twelve," the old man said quietly, "you've taken two over."

The stranger's eyes went sharp. "You a game warden?"

"I don't believe in wardens," the old man said quietly. "It ought to be between a man and himself what he does when he's got the upper hand."

The stranger grinned knowingly. "You're having a bad day, old fellow. Take a couple of birds. No hard feelings. I'm using your dog."

THE old man's calm reserve made the stranger color. He shrugged and said, "You shoot 'em or I shoot 'em. What's the difference?"

Pop looked up. "No difference," he said quietly, "if you haven't a mind to see a difference. . . ." And then he stopped. He had lived too long to hope any more that you could change a man's heart with a few words.

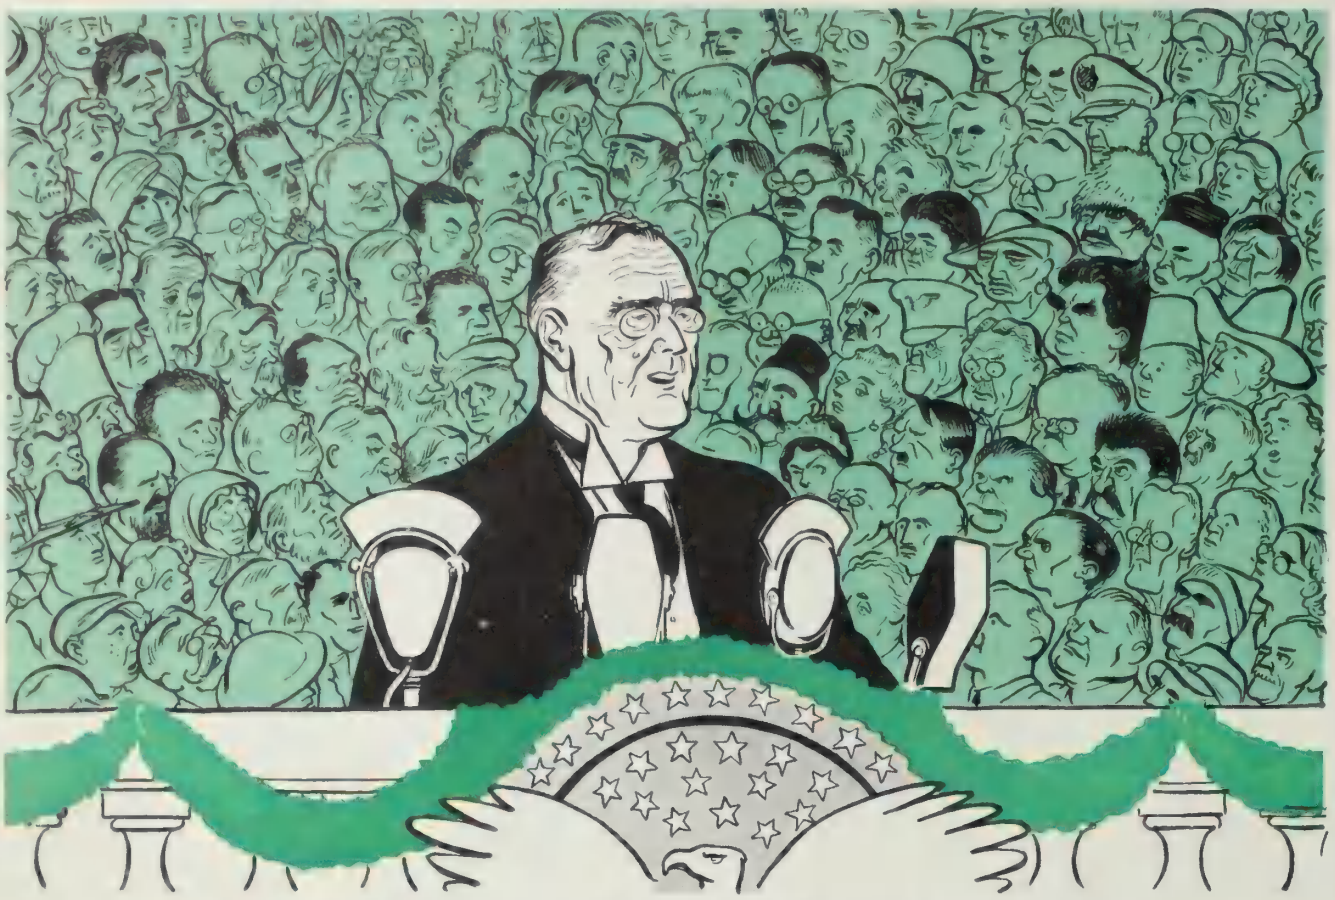
It was the stranger who spotted Warden Tickie Fisher first, in his green uniform, coming up the hollow on their side of the creek. Then Pop saw the warden, too. The stranger glanced quickly down at the birds—twelve at his own feet and two between Pop's old-fashioned boots. For a long second the stranger looked into Pop's clear eyes and he saw in them what he wanted to see. He knew that the old man would say nothing.

The stranger smiled. Warden Tickie strolled up and took out his pipe. "Howdy, Pop."

"Hello, son," the old man replied.

Warden Tickie turned. "Got to check your birds, mister. State law."

The stranger nodded. "Go right ahead, Warden. Here's the lot. Fourteen birds together. The old gentleman's been kind enough to let me hunt behind his dog. I'm George F. W. Burston," he added.



Warden Tickie counted the birds with the stem of his pipe. "Twelve and two makes fourteen," he said. He turned to Pop. "Can I see your gun, Pop?"

"Sure can, son." He handed up his single-barrel. The stranger lighted a cigarette, watching.

Warden Tickie stepped back a pace and aimed the gun at the two birds between Pop's feet. The gun roared. Not a feather moved. He turned on the stranger, "I'm takin' up your license for the season, Mister Burston. You took over the limit. Everybody hereabout knows Pop is shootin' empties this year and hunting in his head—giving the birds a chance."

The setter met Don in the middle of the creek, coming back with the bird, and he followed the old dog back to Pop, whining guiltily

In a few days, a harassed man will speak from Capitol Hill and the world will listen

Taps for the New Deal

By Walter Davenport

CARTOONS BY CARL ROSE

There was more than one joker in the pack the New Dealers were shuffling for their third round—a new Education Administration administering federal schools, a new Alien Administration that would make our current alien laws obsolete, a Federal Press Bureau and other revolutionary cards. But the hand was never dealt. Europe's war and our national-defense cyclone swept it aside

THE New Deal was America's first war casualty. What its successor will be depends upon who wins—Democracy or Dictatorship. The Forgotten Man and the Economic Royalist are in overalls and uniforms. They're as awkward as Newfoundland pups; but almost overnight they've discovered that they had better march together if they want to save what they've got, little or much.

This is no theory. And it isn't propaganda. Washington, from the White House down to the last crowded street corner, is scared dizzy. They're afraid that we're going to get into this war; that if England's need doesn't do it, Hitler's fury will. They're afraid that we're already in and don't know it. But they're even more afraid that if it hasn't come, catching us defenseless, it will come and we'll still be unarmed.

But whatever happens, none contend that the New Deal still lives. The more pessimistic are fearful that while it lived it sapped national vitality, leaving us with no will to fight for "The American Way of Life." If any of you yearn to be demoralized, spend a few days in the capital. In a few days, a harassed man will speak from Capitol Hill, while the entire world listens. Only a few in the crowds that have gathered to listen pretend to believe that his third inaugural address will contain his real fears. The common belief is that he will tell us in effect that the New Deal, what he has fought for since 1932, is deathless, that it is the thing that Americans will make sacrifices for and that those sacrifices will preserve liberty and democracy.

It's a Revolution

Whatever it will be that Mr. Roosevelt says, only the most loyal of his surviving New Deal generals contend that the crusade is still on its feet. And these are admittedly a trifle left-handed in their argument, saying that if America is forced to fight it will be to preserve the New Deal. But if you insist that they be realistic they, too, will tell you that as a revolution, as a wholesale revision of government processes, the New Deal has been blasted into abeyance.

No one worth listening to tells you that the New Deal, as such, collapsed under its own weight. It is merely that a choice had to be made between gratuities and guns. There won't be enough money for both. The billions already appropriated for rearmament are just a beginning. The billions we devoted so liberally to dams and reclamations must now go to help England, directly and indirectly. The huge sums that financed peaceful projects and happiness-promotions must now buy planes and battleships, cantonments and tanks. And Washington is agreed that the sooner we realize that this is a part of the sacrifices we shall have to make and like, the better.

Not that it will happen without a fight. Capitol Hill, politically farther away from the White House than it has been for eight years, is traffic-jammed with lobbyists. They're demanding everything from war profiteering to unions of soldiers and sailors.

Push your way around. Here's a group that tells you that Hitler can't be stopped under the Wagner Act. Another is prepared to prove that the 30-hour week is our only salvation. Firebrands from Mr. Dave Lasser's Workers' Alliance are trouping the House office building with warnings of strikes and industrial paralysis if relief appropriations are revised downward. They curse the American Federation of Labor and Mr. Bill Green, its twe sand-dollar president, for its r in-defense-plants policy.

Tender young men and won herded by Youth Congress le seeking audiences with senat be told, when cornered, that tional Youth Administration r larger appropriations and da him that first cries "Hold, Better-dressed are the ladies tlemen who have appointment for the repeal of the Joh that forbids loans to governm haven't paid what we lent the first World War.

Shoulder through. That gr asking directions to Senator office wants more flood-contr and a $10,000,000 munitions pl have much more chance of s Senate majority leader than t crowd—the one that wants to that the American people wa not war, and that charity begins and ought to stay there. Eve sentative's and every senato ing room is crowded. But ther of the usual congressional everybody's getting a hearing or later.

Congress Looks at the V

Even if England weren't be help, even if there were no t war for this side of the Atlan election in November would ha bad news for the New Deal. Tw million anti-Roosevelt votes the political map a lot. Senator and Representative McCorm Democratic vote herders in C won't admit it publicly, but all y to do is listen and look to kn Congress has bolted. Wait until are asked for swimming pools skating rinks, air-conditioned rooms, WPA theater and sy orchestra projects, dietary kitc Blackfeet Indians, for Passar dies, for dams on dry creeks, fc like that. Just wait until some legislation comes along. Cong getting hard-boiled. Or so they

Anyway, Congress will have p chance to prove it. Its corridor with foreign delegations—South can, Chinese, Greek, British, S Canadian, Mexican, Australia and so on. They ask arms, mone credit, guarantees. The Capitol reinforced by District cops, F.B Dies Committee investigators, intelligence agents, bodyguards tives and unidentified sleuths, many clashes.

A rawboned fellow with a quack stops a group that looks He tells them that ten thousand can farmers will march on Was if so much as a dollar of the A taxpayer's money is lent to a nation. Two uniformed police n on him and two plain-clothes

Capitol cops are polite bu you can't do any loiterin

The Capitol is jammed as never before with lobbyists, demanders and pressure groups

ry gentle, but equally persist- Move on, sir, move on. Please block the passages. Thank you. Move on but not before he tells what he is and that Europe can go to hell for all he cares. They thank you for the information, but he moves and they move off to find out what route he might be over there among the ladies. Some of them want to go over to England. The others don't want to go to war for anybody, the United States included. Both sides have interviews with members of Congress. They're easy to handle. Senator Gerry: Certainly, ladies, this way please. Mr. Martin of Massachusetts? Police: His office is at that end of the Capitol. Right head and turn down to your right. Give your names to the attendant at the door. Thank you.

But sometimes it isn't so easy. Apparently the entire country understands that something violent has happened to the world. The early days of the New Deal are dead as the days of Coolidge and Hoover and that what's to follow them is anybody's guess. Mix in with this crowd. You gather that they're afraid that they've lost something. Perhaps the hope they had they felt they had upon the establishment. If you'll notice that tall, sober-faced man with his arms folded over near Old Bob LaFollette's statue; well, he's a World War veteran and he's feeling mean. When he came in there were six or eight other veterans with him, but the cops, a little leery of them, separated them, scattered them without their knowing it. These Capitol police are pretty clever guys, not like the average flatfeet with their "Break it up, buddy, break it up!" These guys have technique.

The Veterans Fight Again

These veterans of 1918 are afraid that they're going to get lost in the new shuffle. They've got the idea that all this new war preparation (and maybe a new war) is going to see a new push of veterans come up and shove the first World War vets out of the road just as the A.E.F. lads did the old-timers before them. These middle-aged vets think that all this is going to cut off their pensions and privileges—or at least cut them down. The cops have to handle them awfully sweet because Congress is full of their friends. Lots of congressmen have made a career of these 1918 veterans, winning elections by promising more and more in allowances, compensations and pensions.

But the order is out that nobody may loiter or stand around glowering. So they speak to the guy at Old Bob's statue. Can we do anything for you, buddy—show you anywhere? Anybody you want to see? Naw, buddy don't want to see nobody in particular. Buddy just wants all these punks to know that he and the other A.E.F. vets ain't going to be pushed around by nobody—especially these new punks in this new army they're mustering in. Okay, buddy. Nobody's going to push you around—you and me both. I'm an A.E.F. vet myself, chum. And listen, it's worth my job to let folks stand around. Okay. Thanks, buddy. Take it easy. Nobody's going to shove us around. Atta boy.

Maybe we're wrong but the more evidence we found of the New Deal's retreat, the easier it was to believe that Congress—Republicans, Democrats, Liberals, Tories—hope that the retreat will become a rout. Some of them are pretty outspoken about it. Not a few of the realists among the New Deal's executives—the practical men who managed to squeeze the tears out of their jobs and who didn't catch the Messiah fever—are likewise hopeful although not so outspoken. They believe that even if the war had not intervened, the New Deal's crazy-quilt pattern was about to be replaced by a soberer design, sacrificing none of its warmth but adding nothing to its dimensions. The whole business got out of hand.

Nobody in Washington is prepared to predict what would have happened had the world retained its sanity. The commonest guess is that with no war to worry us, Mr. Roosevelt would not have sought another term and that Mr. Willkie would have been elected President. Even the most incurable of the New Deal officials will admit without much coaxing that Mr. Willkie would have made hash of any opponent but Mr. Roosevelt. And they'll confess without pausing that the rational Mr. Willkie would have put an end to the pretty pink fripperies although saving the solid red meat of the New Deal.

We talked to a number of the realists. Several of them went so far as to say that the New Deal's tendency toward the unmanageable had worried even so doting ■ parent as Mr. Roosevelt.

Some Divided Opinion

No one in Washington is foolish enough to predict that the President's third inaugural address will be the New Deal's funeral oration. Even those to whom such phrases would be delicious music are prepared to hear him reassure the country that the New Deal, far from being a corpse, is the true spirit of our democracy and of the loin-girding we are undergoing to save the same. But there are going to be more skeptics listening in than ever before in the past eight years.

(Continued on page 40)

THEY went next into Linda Marshall's room. It faced east, looking out over the rocks down to the sea below.

Weston gave a glance around. He murmured: "Don't suppose there's anything to see here. But it's possible Marshall might have put something in his daughter's room that he didn't want us to find. Not likely, though. It isn't as though there had been a weapon or anything to get rid of."

He went out again.

Hercule Poirot stayed behind. He found something that interested him in the grate. Something had been burnt there recently. He knelt down, working patiently. He laid out his finds on a sheet of paper. A large, irregular blob of candle grease—some fragments of green paper or cardboard, possibly a pull-off calendar for with it was an unburnt fragment bearing a large figure 5 and a scrap of printing . . . *noble deeds* . . . There was also an ordinary pin and some burnt animal matter which might have been hair.

Poirot arranged them neatly in a row and stared at them.

"'*Do noble deeds, not dream them all day long,*'" he murmured. "*C'est possible.* But what is one to make of this collection? *C'est fantastique!*"

And then he picked up the pin and his eyes grew sharp and green. "*Pour l'amour de Dieu!* Is it possible?"

Hercule Poirot got up from where he had been kneeling by the grate. Slowly he looked around the room and this time there was an entirely new expression on his face. It was grave and almost stern.

To the left of the mantelpiece there were some shelves with a row of books. Hercule Poirot looked thoughtfully along the titles.

A Bible. A battered copy of Shakespeare's plays. The Marriage of William Ashe by Mrs. Humphry Ford. The Young Stepmother by Charlotte Yonge. A Shropshire Lad. Eliot's Murder in the Cathedral. Bernard Shaw's St. Joan. Gone With the Wind by Margaret Mitchell. The Burning Court by Dickson Carr.

Poirot took out two books—The

Evil Under the Sun

By Agatha Christie

ILLUSTRATED BY MARIO COOPER

"If she couldn't find something or the bell wasn't answered at once or her laundry wasn't back, she'd be rude and nasty about it"

The Story Thus Far:

IN NEED of a rest, Hercule Poirot, brilliant Belgian criminal investigator, goes to the Jolly Roger, an old hotel on an English south-coast island. There he notes that the guests are all agog over a none-too-secret "affair," in which two of their number—Kenneth Marshall's wife, Arlena, and Christine Redfern's husband, Patrick—are the shameless principals.

Poirot finds the place quiet and placid—until one fine morning the body of Arlena Marshall is found by Patrick Redfern and Miss Emily Brewster, another guest, on the beach at near-by Pixy Cove. The woman had been murdered, *strangled to death!* . . . Learning of the tragedy, Poirot goes into action. And soon, the canny Belgian, Inspector Colgate and Chief Constable Weston (who feels fairly sure that the killer is a man) have quite a bit of evidence. . . .

Among the guests at the Jolly Roger, in addition to those already mentioned, are: Linda Marshall (Kenneth Marshall's daughter by his first wife), who had detested Arlena; the Reverend Stephen Lane, a religious fanatic; two Americans—Mrs. Odell Gardener and her sweet, docile husband; Major Barry, a grand old sport, but a terrific bore; Rosamund Darnley, a well-known London dressmaker who had, at one time, been in love with Kenneth Marshall; and the loquacious Horace Bl[a]tt"—a gentleman with more mu[s]cle than brains.

Marshall has an excellent alibi—at the time of the murder he had apparently been writing letters in his room. He admits, tho[ugh], that Arlena had been wealthy and that [he] was her heir. Mr. Gardener, too, has a good [a]libi. Major Barry has a weak one—he tells Colgate and Weston that on the morning of the murder he had left the hotel at ten and gone to St. Loo (a near-by town) and returned (after losing his way) at one-thirty. The sleuths take his statements with a grain of salt.

But they believe Christine Redfern when she tells them of a conversation she had overheard on the beach, one dark night—a conversation between Arlena Marshall and a man whom she could not see, and whose voice she could not identify) who was, very obviously, trying to blackmail Kenneth Marshall's wife.

Christine characterizes Arlena as "the sort of woman who would be mixed up with something sordid: blackmail—jealousy—[or] . . ."

Discontinuing their questioning, the investigators search the dead woman's room. There they find a love letter, addressed to Arlena and signed "J. N." They search Marshall's room. Then, "We'll just glance through the rest of the rooms," Weston says quietly.

**mel Worsham Beau-
amp comes back to his
m folks in the South**

"Roth Edmonds sold him," the old Negress said. She swayed back and forth. "Sold my Benjamin"

HIS face was black, smooth, impenetrable; the eyes had seen too much. The Negroid hair had been plaited so that it covered the skull like a cap in a single neat-ridged sweep that had the appearance of having been lacquered, the part trimmed out with razor so that the head resembled a bronze head, permanent, imperishable. He wore one of those sports costumes and ensembles in the newspaper advertisements, shirt and trousers matching and cut from the same fawn-colored flannel and they had cost too much and were draped too much, with too many pockets. He half lay on the steel cot in the steel cubicle just outside which the armed guard had stood for twenty hours now, smoking cigarettes and swearing in a voice deliberately and unassistantly not a Southern voice the features of the spectacled young white man sitting with a broad census taker's form on the steel stool opposite.

"Samuel Worsham Beauchamp. Twenty-six. Born in the country near Jefferson, Mississippi. No family. No—"

"Wait." The census taker wrote rapidly. "That isn't the name you were arrested under in Chicago?"

The other snapped the ash from the cigarette. "No. It was another guy I killed in the cop."

"Alright. Occupation—"

"Getting rich too fast."

"—ne." The census taker wrote rapidly. "Parents?"

"Sure. Two. I don't remember them. My grandmother raised me."

"What's her name? Is she still living?"

"I don't know. Mollie Worsham Beauchamp. If she is, she's on Carothers Edmonds' farm. Near Jefferson, Mississippi. That all?"

The census taker closed the portfolio and rose. He was a year or two younger than the other. "If they don't know who you are here, how will they know—how do you expect to get home?"

The other snapped the ash from the cigarette, lying on the steel cot in the Hollywood clothes and a pair of shoes better than the census taker had ever owned. "What will that be to me?"

So the census taker went away; the guard locked the steel door again. And the other lay on the steel cot smoking until they came and slit the expensive trousers and shaved the expensive coiffure and led him out of the cell.

ON THAT same hot, bright July morning, the same hot, bright wind that shook the mulberry leaves just outside Gavin Stevens' window blew into the office too, contriving a semblance of coolness in what was merely motion. It fluttered among the county-attorney business on his desk and blew in the wild shock of his prematurely white hair above the thin, intelligent, unstable face, above the rumpled linen suit from whose lapel his Phi Beta Kappa key dangled from the watch chain—Phi Beta Kappa, Harvard; Ph.D., Heidelberg—Stevens, whose office was his hobby, although it made his living for him, and whose serious vocation was a twenty-two-year-old unfinished translation of the Old Testament back into classic Greek. Only his caller seemed impervious to it although by appearance she should have owned in that breeze no more of weight and solidity than the intact ash of a scrap of paper—a little old Negro woman with a shrunken, incredibly old face beneath a white headcloth and a black straw hat which would have fitted a child.

"Beauchamp?" Stevens said. "You live on Mr. Carothers Edmonds' place."

"I done left," she said. "I come to find my boy." Then, sitting opposite him on the hard chair and without moving, she began to chant: "Roth Edmonds done sold my Benjamin. Sold him in Egypt. Pharaoh got him—"

"Wait," Stevens said. "Wait, Aunty." Because memory, recollection, was about to click and mesh. "If you don't know where your grandson is, how do you know he's in trouble? Do you mean that Mr. Edmonds refused to help you find him?"

"It was Roth Edmonds sold him," she said. "Sold him into Egypt. I don't know whar he is. I just knows Pharaoh got him. And you the Law. I wants to find my boy."

"All right," Stevens said, "I'll try to find him. If you're not going back home, where are you going to stay in town? It may take some time, if you don't know where he went and you haven't heard from him in five years."

"I be staying with Hamp Worsham. He my brother."

"All right," Stevens said. He was not surprised. He knew Hamp Worsham, but he would not have been surprised even if he had never seen the old Negress before. They were like that. You knew them all your life, they might even have worked for you for years; they might have different names, then suddenly you learned that they were brothers or sisters, or claimed to be, and you were not surprised.

He sat in the hot motion which was

not breeze and heard her toiling slowly down the outside stairs, remembering the grandson. The papers had passed across his desk before going to the district attorney five or six years ago—Butch Beauchamp, as the youth had been known during the single year he had spent in and out of the city jail, the old Negress' daughter's child, orphaned of his mother at birth and deserted by his father, whom the grandmother had taken and raised, or tried to. Because at nineteen he had quit the country and come to town, in and out of jail for gambling and fighting, and at last under serious indictment for breaking and entering a store.

Caught red-handed, whereupon he struck with a piece of iron pipe at the officer who caught him, then lay on the ground where the officer had felled him with his pistol butt, cursing through his broken mouth, his teeth fixed into something like grinning through the blood, then two nights later he had broken out of jail and was seen no more—a youth, not yet twenty-one, yet with something in him from the father who had begot and deserted him and who was now in the state penitentiary for manslaughter—some seed not only violent but bad.

"And that's who I am to find, save," Stevens thought. Because he did not for one moment doubt the old Negress' instinct. If she had also been able to divine where the boy was and what his trouble was, he would not have been surprised, and it was only later that he thought to be surprised at how quickly he did find where the boy was and what was wrong.

Edmonds' farm was seventeen miles away. But then, according to the old Negress, Edmonds had already refused to have anything to do with the business. And now Stevens comprehended what the old Negress had meant. He remembered that it was Edmonds who had sent the boy into Jefferson; he had caught the boy breaking into his commissary store and had ordered him off the place and had forbidden him ever to return. "And not the sheriff," Stevens thought. "Something broader, quicker in scope, than his would be. . . ." He rose, descended the outside stairs and crossed the empty square in the hot suspension of noon's beginning to the office of the county weekly newspaper. The editor was in—an older man, though with hair less white than Stevens', in a black string tie and an old-fashioned boiled shirt and tremendously fat.

"An old nigger woman named Mollie Beauchamp," Stevens said. "She and her husband live on the Edmonds' place. It's her grandson. You remember him—Butch Beauchamp, about five or six years ago, who spent a year in town, mostly in jail, until they finally caught him breaking into Rouncewell's store one night? Well, he's in worse trouble than that now. I don't doubt her at all. I just hope, for her sake as well as that of the great public whom I represent, that his present trouble is bad and maybe final too—"

"Wait," the editor said. He didn't even need to leave his desk. He took the press association flimsy from its spike and handed it to Stevens. "It just came in," the editor said. It was datelined from Joliet, Illinois, this morning: "Mississippi Negro, on eve of execution for murder of Chicago policeman, exposes alias by completing census questionnaire. Samuel Worsham Beauchamp. . . ."

STEVENS was crossing the empty square again in the hot suspension in which noon was now several minutes nearer. He had thought he was going home to his boardinghouse for the noon meal, but he found that he was not. "Besides, I didn't lock my office door," he thought. "So it seems I didn't mean what I said I hoped." So he mounted the outside stairs again, out of the hazy and now windless sun glare, and entered his office. He stopped. Then he said, "Good morning, Miss Worsham."

She was quite old too—thin, erect, with a neat, old-time piling of white hair beneath a faded hat of thirty years ago, in rusty black, with a frayed and faded black umbrella. She lived alone in the decaying house her father had left her, where she gave lessons in china painting and, with the help of Hamp Worsham and his wife, raised chickens and vegetables for market.

"I came about Mollie," she said. "Mollie Beauchamp. She said that you—"

HE TOLD her while she watched him, erect on the hard chair where the old Negress had sat, the rusty umbrella leaning against her knee. On her lap, beneath her folded hands, lay an immense old-fashioned beaded reticule. "He is to be executed tonight."

"Can nothing be done? Mollie's and Hamp's parents belonged to my grandfather. Mollie and I grew up together. Our birthdays are in the very same month."

"I telephoned," Stevens said. "I talked to the warden at Joliet, and to the district attorney in Chicago. He had a fair trial, a good lawyer. He had money. He was in a business called numbers, that people like him make money in." She watched him, erect, not moving. "He is a murderer, Miss Worsham. He shot that policeman in the back. A bad son of a bad father. He confessed it afterward."

"I know," she said. Then he realized that she was not looking at him, not seeing him at least. "It's terrible."

"So is murder terrible," Stevens said. "It's better this way." Then she was looking at him again.

"I wasn't thinking of him. I was thinking of Mollie. She mustn't know."

"Yes," Stevens said. "I have already talked to Mr. Wilmoth at the paper. He has agreed not to print anything. I will telephone the Memphis paper, but it's probably too late for that, even if they would. . . . If we could just persuade her to go on back home this afternoon, before the Memphis paper . . . Out there, where the only white person she ever sees is Mr. Edmonds, and I can see him and warn him not to tell her, and even if the niggers would hear about it, they wouldn't—. And then maybe in about two or three months I could go out and tell her he is dead and buried somewhere in the North. . . ." This time she was watching him with such an expression that he ceased talking: she sat there, erect on the hard chair, watching him until he had ceased.

"She will want to take the body back home with her," she said.

"The body?" Stevens said. The expression was neither shocked nor disapproving. It merely embodied some old, timeless, female affinity for blood and grief. Looking at her, Stevens thought: "She has walked into town in this heat. Unless Hamp brought her in in the buggy he peddles eggs and vegetables from."

"He is the only child of her oldest daughter, her own dead first child. He must come home."

"He must come home," Stevens said. "I'll attend to it at once. I'll telephone at once."

"You are kind." For the first time she stirred, moved. He watched her hands draw the reticule toward her, clasping it. "I will defray the expenses. Can you give me some idea—?"

He looked her straight in the face. He told the lie without batting an eye, quickly, easily: "Ten or twelve dollars will cover it. They will furnish a box,

(Continued on page 45)

"Well, that's all right, Captain. You can call it our contribution to the defense program"

On this page, Collier's special correspondents continue to draw for you a picture of what is going on in America's new fighting force. This week there are high lights and incidents from camps on Long Island, New York; in Minnesota; in Maryland and New England.

As the scheme develops, it is becoming evident that the old Army and the new are beginning to understand each other; that recruits are taking their training cheerfully in their stride; that there still is some confusion, but that it is being ironed out without too much delay and in good temper in most cases.

Reports from other sections of the nation will be printed next week.

THE EAST: At Camp Upton on Long Island, the draftees and volunteers have discovered ey can call National Guardsmen almost anying—except "Saturday Night soldiers." That ckname has been the cause of more fist fights an anything else around Yaphank. There is easonable amount of rivalry between the old ny, which has a kindly scorn for everybody ; the Guardsmen, who high-hat the draftees the old Army; and the draftees, who have r notions about the Guard.

terunit rivalry, even to the accompaniment few knockdowns and drag-outs, is nothing orry about, old-line officers say. Keeps the interested and on their toes.

"hen they first got started up here at Updrawled Corporal John Berg of Orange, Jersey, an old-timer, everybody went on duty, even guys in the medical depart- who don't handle guns. I'm out in front headquarters and I see a medico marching soners to the guardhouse. This medico- sees some pals across the street and 'Hi, fellas, look. They gimme a rifle and 't the faintest idea how to use it!' But e prisoners to the guardhouse, all right." beat that," said Private Aaron Gilman ll Harbor, Long Island. "While I'm in they bring in a prisoner with an armed eems the prisoner left his post on guard isten in on a prize fight. Serious stuff. t into an argument about how a rifle the guard gives his rifle to his pris- demonstration and the prisoner shows rk it. . . . Wow! If an officer had come

In the old Army, 'way back in '17 and '18, new soldiers tried on shoes until they found a pair that fitted—or they thought fitted. Then their company commander, usually, felt the rookie's toes through the shoe, to make sure the size was right. That's all changed now. A machine tells the quartermaster corps the scientific size each new man needs.

Sort of takes the joy out of life—no more bitter arguments with the quartermaster sergeant. Oh, well—he always won, anyway. Still does.

●

NORTHWEST: Lieutenant J. A. Carlson of the Fort Snelling, Minn., recreation center was surprised lately by the request of an old sergeant. The sarge's digestion, skin, nerves and sensibility have been toughened by twenty years in the service. Still, he wasn't pleased. His company of regulars and a company of conscriptees eat at opposite ends of the same building.

"Lieutenant," said the sergeant, "I want to eat with the new men. They eat like civilians. They talk; they don't yell. I can hear the guy next to me the first time he asks to have the potatoes passed."

Lieutenant Carlson says it's true that regulars make an awful racket at mess. Yell at the top of their voices. Probably just to show they're in the Regular Army.

A draft registrant walked into the office of Lieutenant Colonel Norman Dean at Minnesota Selective Service headquarters. Whacking his heels together, he came to stiff military attention three paces from the desk.

"Sir," he said, "I wish to learn my exact status in this draft. Until two years ago, I was oberleutnant in a panzer division of the army of the Reich. I was in charge of a platoon of twelve-wheeled, fast reconnaissance cars. I lost my commission when I emigrated to the United States. In this country, I have my first papers. I make no objection to the draft but I think basic training would be uninteresting and dull. Is there a specialized branch I could enter? Also will officers and men be hostile to me because of my German army background?"

Colonel Dean replied that he would be required to enter basic training but if he showed special aptitude, his rise would be rapid. As to the officers and men, Colonel Dean assured him that if he showed the proper spirit, there would be no trouble. As a precautionary measure, the draft officers notified G-2. Publicity of the man's name might hamper the investigation or embarrass him if he is inducted.

SOUTHEAST: Carpenters, electricians, plumbers and other skilled mechanics helping rebuild Fort Meade, Maryland, get paid on Friday—and get paid plenty. Some of them get better than $75 a week. This is good money and the gamblers, flimflam artists and organized chiselers of Baltimore think so too. Just recently the police interrupted one crap game on the fort area and four others in the woods. Total haul: ten gamblers, a hundred or more disillusioned workmen and 150 pairs of dice—all loaded.

The Army has had a hard time naming the new draftees. They've also been called "conscripts" and "selectees." The regulars at Fort Meade refer to them as "one year wonders"—being careful not to let the draftees hear them.

Other additions to Fort Meade vocabulary:

Bing spot—a vaccination scar

Angel's whisper—the bugle call

Ah-ha treatment—getting fixed up for a cold

Butch—any surgeon

Chinese landing (One Wing Low)—any bad plane landing

Field Officer's Weather—fine weather, the only kind field officers are supposed to like for flying.

●

NORTHEAST: The six-ton armored scout car slithered around the icy corner. The young Army captain cursed and slammed on the brakes. The car skidded—and very neatly folded up the fender of a car which had been parked at the curb. "Damn!" cried the captain and he climbed out of the armored car and went up the walk to the old mansion. It was in Worcester, Mass., and a stern-faced middle-aged woman was already at the door awaiting him.

"Yes?" she said coldly. "Who did it?"

"First Reconnaissance Troop, First Division."

She looked puzzled, then smiled suddenly

"You mean the government—the Army?"

"Yes, Ma'am."

"Well, that's all right, Captain. You can call it our contribution to the defense program."

●

NORTHWEST: The draft board of Meeker County, Minn., recently got a penny postcard from Atwater, twenty miles away, in answer to their notification for a farmer to report.

Dear sir: He left for N. Dakota for Thanksgiving and won't be back till some time next week. I'll tell him as soon as he gets home.

THE HIRED MAN ★★★

This 'burger Business

By Frank J. Taylor

Pert car-hops i uniforms serve nians with th ishing varieti once-humble

PHOTOGRAPH FOR COLLIER'S BY CHARLES KERLE

Sizzling hamburgers with cheese started on the coast for all kinds of 'burgers. ever put one of these overstuffed buns i mouth you will begin to see the reaso

FOR a stout, dark, ruddy young fellow in his early thirties, with a weakness for wine-colored shirts, we'd say that Mr. Lionel Sternberger of Pasadena had started something pretty terrific. All the way across that vast strip of U.S.A. bounded on the east by Miami, Florida, and on the west by Hollywood, California, we'd watched the 'burger business booming full tilt. We'd seen, day after day, how a million-plus motorists nosed their cars into drive-ins regularly to tackle their appointed task of downing a million-plus 'burgers — cheeseburgers, nutburgers, twinburgers, chickenburgers, squareburgers, porkburgers, royalburgers, all kinds of 'burgers.

This latest fad in eating may never have been but for the whimsy of Mr. Sternberger's eccentric jaloppy which stalled in the mud in front of that hamburger stand on the edge of Pasadena a dozen years back.

At the time, Mr. Sternberger was barely twenty, which gives you an idea of how briefly the 'burger industry has been a-building. Returning from a youthful argosy to New York, Philadelphia, Atlantic City and way points, Mr. S. had reached the edge of Pasadena with this old jaloppy, a thimbleful of gas in the carburetor, and thirteen cents in his pocket. The gas whiffed out just as he arrived at the wayside stand and he coasted to a halt in the middle of a mud puddle.

"How's business?" he called to the man behind the counter.

"Not so hot," replied the hamburger merchant. "How's travel?"

"Not so hot, either."

"Tell you what I'll do," propositioned the man behind the counter. "I'll trade you the key to this hamburger joint for the key to your lizzie."

"It's a deal," agreed Mr. Sternberger, who knew the lizzie.

"Shake," said the other, who knew the hamburger stand.

Man Bites Idea

While the ex-counterman hustled down the road for a tow car to pull the jaloppy out of the mud, Mr. Sternberger took stock of his new larder. It totaled one bun, enough meat for one hamburger sandwich, a slice of cheese, half a bottle of relish and some coffee. Mr. Sternberger peered up the highway, then down the highway. No customers looming on the horizon, he sizzled the last lone hamburger for himself. It was a skimpy lunch for a hungry young feller, so he slipped the slice of cheese between the meat and the bun. When he bit into the sandwich, with the cheese half melted by the hot meat and the toasted bun, a wave of gustatory gratification swept over his face.

"A cheeseburger!" exclaimed Mr. Sternberger, who knows a merchandising idea when he bites into one.

Hastily locking up the stand, he hustled over to Pasadena, where he hunted up sundry old school friends from whom he begged, borrowed and wheedled until he had accumulated a hundred dollars cash. With this capital he repainted the stand, stocked the icebox with ground steer meat, cheese and relishes, bought buns and coffee and paper napkins and opened up for business. The name over the stand was "The Boulevard Stop." One of his first customers was a traffic cop.

"Gimme a hamburger sandwich," said the cop.

Having great deference for cops, Mr. Sternberger debated, as he broiled the meat and toasted the bun, the wisdom of experimenting upon the law by adding a slice of cheese in the sandwich. While he wavered, the law spoke up.

"Son, every time a motorist sees a boulevard stop, he doesn't like said. "You ought to get a bett for this joint."

"What is a good name?" as Sternberger, hastily slapping a cheese on the sizzling meat.

"I'll think one up for you w cruising around," promised t sinking his teeth into the sa "That's good. What is it?"

"A cheeseburger—cheese an burger."

"You've got something, boy.'

It Hasn't Stopped Yet

The next day the officer return three other speeder-chasers. All wanted cheeseburgers.

"Why don't you call your jo Rite Spot?" asked the first cop Rite Spot for hamburgers-with-in-them, see?"

Not long after the patrolm a carload of men rolled up and th craned his neck out.

"Is this the joint where you se burgers with cheese in them?" manded.

"Yeah, who told you about the "A cop up the street. Make u

Story Thus Far:

MALLORY—who has been managing Gordon, a young middleweight, and Eddie adores—dies in Birmingham. Whereupon, Max Ellison, a noted fight manager, sends Joe Barton love with Max's frisky young daughter") to sign Gordon up.

Successful in his mission—because, in accord with the terms of Gordon's contract, *he must accept Mallory's daughter, Pat, as his manager!*—Barton returns to Atlanta. He says nothing of a wild evening when he had shot a pick-up acquaintance, Nick Lucas, to death near Birmingham; he says nothing of an encounter with a possible witness, *Eddie Gordon*, who, without seeing his face, had gained possession of a revolver registered in the name of Joseph Barton! . . .

Eddie goes to New York City. There, managed by Pat Mallory (who is secretly in love with him), he fights his way up to a match with Dixie Grogan, middleweight champion of the world. Unfortunately, he meets Babs Ellison, who is soon infatuated with him; and, in a frenzy of jealousy, Joe Barton goes into action.

Barton's first step, he is well aware, must be to regain possession of his revolver. His second, once he has the weapon, is to employ Morrie Oakes, a professional killer, to murder the newcomer from the South. By resorting to a clever stratagem, he succeeds in securing the revolver. After which, he tells Oakes exactly what he is expected to do.

Barton, it appears, is giving a party, immediately after the fight, at the Penguin Club. His guests will be: Babs, Pat Mallory, Eddie Gordon and Cliff Halliday (a brilliant sports writer who admires Eddie and is in love with Pat). He tells Oakes this; and he "suggests" that Oakes, taking advantage of the inevitable noise and confusion at such affairs, shoot Eddie Gordon on the crowded dance floor.

The great evening arrives. Eddie finds Grogan a tough customer. At the end of the fifth round Cliff Halliday and Pat realize that Eddie is off form.

BY THE tenth round, Eddie was beginning to tire. He had fought hard. The crowd was sensing an upset and howling for it. They applauded virtues in the champion which they had never before suspected. They declared loudly that Eddie Gordon was a bum. . . .

The tenth round. The eleventh. The twelfth. Feets was beside himself. He said, "I might as well tell you, Mistuh Eddie—you got to do somethin'. . . . You is 'way behime on points."

Eddie nodded. He wasn't wasting precious breath on words any more. Three more rounds; three more eternities. Dixie could take it . . . he was good, that boy.

Eddie was tired as he shuffled out for the thirteenth. Dixie was boxing gorgeously; coasting in on points under Max Ellison's expert handling. Eddie hunched his shoulders and tensed his muscles. He was waiting for Dixie to come to him now, almost too weary to chase the elusive champion.

He caught a glimpse of Pat's agonized face . . . and then it seemed to dissolve, and Pop was sitting there. Pop was kindly and understanding and sorrowful. Pop seemed to be saying, "I don't mind your losing, Son . . . anybody can lose. But you're not giving all you've got."

Something happened to Eddie Gordon. He became angry . . . not with Dixie Grogan, but with himself. He was making a bad showing: no one knew it better than he . . . but he was tired and hurt and worried. . . .

Dixie slammed a hard, punishing right to the body, a left to the jaw, another right to the body.

But this time Eddie didn't clinch. He didn't wince. He didn't even know that he was badly hurt.

He took those punches. And his right came from nowhere at all. It was his prize punch, and it carried everything. It didn't travel more than six inches.

Dixie was flat on his back, blinking

(Continued on page 50)

Eddie's right fist flashed up. It landed on the side of Morrie's jaw. It landed square, and hard. The big man went down

I wondered if his running gave him such heavenly rhythm, and then I didn't bother wondering any more. I just surrendered myself to the song

NTERCOLLEGIATE MILE

othing helps romance like saying the right ing to the wrong person—at the right time

AN OLDER sister can be one of two things to a girl: a hindrance or a curse. My sister Celia is a little bit of each. I mean, well, how can a girl ever get to show anything of her own with a sister who's so absolutely slick-jick, so . . . well, all right then, so beautiful as Cele?

Not that I don't adore Cele. I just wish she'd get married and perhaps grow attractively plump. In fact, I wish her every happiness in life.

And Celia always *includes* me: oh, yes, like that time last spring when she took me along to the boat race on the absolute definite promise that I'd be with a crewman that same night.

Well, I suppose I was, technically. Only he turned out to be the coxswain and after the Hartnell crew won, the important men threw him in the river. And later on, when we danced, his head bobbled up and down somewhere under my chin and tickled it like the dickens with that bristle haircut they all wear. His name was Skipper—something you might call a pup—and he weighed ninety-eight pounds—with cigarettes.

I was a sucker again in October. That was the night of the Hartnell-Dartmouth game. Cele and Bill Faxon—Bill is Celia's in a very big way and the fastest college miler on the track—well, anyway, Cele and Bill had me rigged for an evening with a football man.

You know that man—the one with bone-rimmed glasses in a floppy sweatshirt and ducks—who runs out on the field carrying water when one of the heroes gets hurt?

Well, he was it. And the fact that he was a third assistant

—at two cooing people use
—absolute drivel, of course—and worry all the way into town.

Worry about this Spike Jones job, and whether he was another Singer Midget or a bespectacled boyish blimp.

I had an awful few minutes when we got there. I mean, the lobby simply swarmed with close-cropped skulls and directional ears and split-faced grins with air-conditioned teeth, any of whom, by past experience, might very well have been *it*.

But then, and you could have slain me with a slipper, I heard Bill call somebody "Spike," and he wasn't tall, nor was he short—just nicely medium with good shoulders and a haircut that wasn't trick.

I KNEW at once that I could dance with him and not strain to murmur in his ear, if things ever got as far as murmuring, and the more I looked at him the more certain I felt that perhaps they could.

He had an easy smile that wasn't oily; on the other hand, neither did it creak. In dinner clothes he looked like most men *think* they look when they've been consulting some stag magazine.

Bill said, "This is Spike Jones. Kit Cavendish."—and I took a mild shot of amperage up one arm. Not that he held my hand too tightly, or didn't know when to let go, but his was a nice, square hand with lots of gimph in it, and he said: "You were very nice to come."

My heart was racketing around, but I remembered to keep my eyes lazy, and tilt my head back—it gives my throat a rather nice line. I said, "Was I?"—and let it hang there. You mustn't go googly all at once.

Then a perfect mob of us spilled down the stairway and flowed out on the Salle Moderne floor. Spike Jones and I flowed anyway; he could butter a slow number all up. I wondered if his running gave him such heavenly rhythm, and then I didn't bother wondering any more.

I just surrendered myself to the song of the reeds and the rumble and boom of the skins, and that floating mood that overtakes you when the music and man are just right.

He said: "Listen, we meld."

I said: "Well . . . could be."

Both of us, brilliantly inane. But you get that way sometimes so easily. You just make noises. You really don't talk.

On the way to our table he veered me off and I had a bad moment or two, for he was heading right for a table where Marge Hart sat with a man. Marge looked disgustingly divine in a polka-dot swiss. But it wasn't Marge that Spike wanted to see, it was her man.

Spike said: "Miss Cavendish, Tony Bissell of Dartmouth. Next to Bill Faxon, Tony's the fastest miler in the Ivy League."

This Tony Bissell—who really wasn't bad-looking, but nothing that would ever interest *me*—stood up and looked appropriately modest, and introduced Spike to Marge. Then the two men went on being bluff and hearty or whatever men fancy they are, and Marge said to me: "He's cute, Kit. Where did you get him?"

I patted my back hair. "He just happened along in my life."

"Maybe we'll trade a dance later?"

"Maybe. We're with a party, of course."

Then we went back to our table and I dropped my chin in my hands and shut out the others and kept my eyes in his—his were a very nice brown—and asked him all about himself.

Most men, given that encouragement, put a record on the phonograph of their ego and let it go round and round. Not Spike. He covered his life as far as me in not more than three thousand words. And most of it was all about Bill Faxon.

Bill was the world's greatest guy. Bill had taught him all he knew about form and pace, and didn't I think Bill was positively grand?

I said: "Spike, I've been helping Celia admire Bill Faxon for years and I'm a little bit tired of the job. It'll do my soul good to see him beaten tomorrow night. Especially," I added, "by *you*."

Spike frowned. "But it doesn't work that way."

"What doesn't work which way?" I asked.

"Well, you see, Bill and I work it like this: I've trained myself to set a terrific pace to the three-quarter post and hit it on the split second. I'm bait. I draw other men out. Men like Tony Bissell, for instance. They get overextended: then Bill moves up in the last quarter mile and kills 'em off."

I swallowed. "You mean you *never* win?"

He shook his head. "I completely shoot the works getting out there. After I've done it, I'm blown. But wait till you see Bill's finish drive—it's *something*!"

I tried—really tried for a minute—to absorb this co-operative spirit of Spike's. But I couldn't blot up a bit of it. The situation was hopelessly improgitable, and in case you don't know what that is, it's the way things are when an evening goes completely and utterly smurd.

Further dancing with Spike didn't cheer me up, nor did dancing with anyone else, nor the food—which was really delicious—nor the way that music heated up when it got around to playing Blue, Believe Me—which exactly defined my mood.

Bill Faxon took us home early. He said there were training rules to be kept. I was quite beyond caring, or nearly so, but there was the most heavenly January sky—one of those nights in winter with a hundred and two million stars and a fat balloon of a moon coming up as we bowled along over the snow.

Spike and I were scrooched in the rumble done up in three or four robes, and from time to time I looked at him, sitting beside me in the night. I was trying to find something unattractive to focalize on, like a weak chin or a misplaced ear.

But his chin had the nicest thrust to it, and his ears were set close to his head, and just as we reached the house he caught me at it. I was certain he'd misinterpret the look.

Celia and Bill were muttering up front, going through that inane routine of saying good night, and not wanting to, and I thought Spike moved closer to me.

I had the fiercest impulse to make him feel, well, ineffectual, so I let out the tiniest sigh and allowed my eyelids to flutter before they closed as if I were building up to a *swoon*.

THEN I waited. But nothing happened! When I opened them, he hadn't moved an inch. "It's a nice little act, Kit"—he sounded *amused*—"and to tell the truth I nearly went for it, for you're a sweet little dish. But if I *had* made the pass you'd have dusted me off with a very cool 'Be yourself!' And then you'd have told me a short goodby and said you were afraid you wouldn't be seeing me any more—especially at the Garden tomorrow night."

I made one of those frustrated noises you make when words get jammed in your mouth.

"I've been trying to figure you," Spike went on, "ever since your overworked charm flattened out. I think I've got it: you're an ungrown gal who goes for the glammer guys. Front runners and touchdown heroes. Lord help the lad you love who joins the Army: he'll have to be a colonel, nothing less. Well, good hunting, Kit. I could have gone for you. But we be not of the same blood, thou and I."

I'd been planning to tell *him* off, and here he was telling *me*. It was *I* who

(Continued on page 29)

"I've been trying to figure you out ever since your overworked charm flattened out," he said. "I think I've got it: you're an ungrown gal who goes for glammer guys

Plenty of Hats

By William MacHarg

Mystery of the fragrant hat. Another O'Malley masterpiece of detection

"THAT dead lady," O'Malley said, "got stabbed at a restaurant workers' ball. It was what they call a Benefit Ball and anybody could go to it that had a ticket, and people bought tickets and give 'em away; so we got no real line on who might have went to it. Mrs. Gosson the lady's name was. Her husband owns a string of little restaurants. Everybody was dancing and the lady got knocked off and nobody seen who done it."

"An odd case," I said.

"You ain't heard the half of it."

O'Malley showed me a photograph of the dead woman. She had been attractive and had been in her early thirties.

"Cops that was detailed there to keep order," he went on, "stopped everybody from leaving the ball. They called other cops and questioned all them people and took all their names. They didn't find nobody suspicious. After they'd let everyone get their hats and coats, there was one hat left."

"The killer's?" I asked.

"We can't find it belonged to nobody else."

We looked at the hat. They had it at the police laboratory. It was a brown fedora, nearly new. There were no initials in it. The maker's name was.

"It's my size," O'Malley remarked. "I guess I'd look good in it. Get anything from the hat?" he asked the young cop who showed it to us.

"Only that the guy that owned it used a hair restorer."

"What help is that? This dead lady's husband didn't go to the ball. She went with her niece. We'll go talk with the niece."

The niece worked at a florist's. Her name was Miss Dalley. She was nineteen years old and prettier than any of the flowers she sold.

"Tell us about your aunt," O'Malley invited her.

"I don't know how it was. We didn't expect to go to the ball. We had nothing to do and Mr. Gosson had bought tickets. So she said 'Let's go to the ball and you can dance.' She didn't expect to dance herself. She knew a lot of people and was always talking with someone. I was dancing and I heard people cry out, and I went over there, and my aunt had been stabbed."

"She didn't say anything?"

"She couldn't."

"Yeah. What men had she been talking with there?"

"I didn't notice any man in particular. She was always with some group."

"You live with your aunt and Mr. Gosson?"

"I did until now. Now I've made another arrangement."

We went to some of the restaurants, looking for Gosson. He wasn't at any of them, so we talked with the managers. The first was named Affor, and the second named Johnson, and the third was named Bennen. O'Malley asked them all the same questions and he got the same answers.

"Mrs. Gosson ever come here?"

"Sometimes."

"Ever see her with any man?"

"Not the way you mean."

"Are you sure, O'Malley," I asked, "this was done by a man?"

"If it's his hat. Besides, we figure a woman couldn't have stabbed her like that. This Gosson and his wife started out with one restaurant. They both worked in it. Then they got more of 'em.

A man's voice said: ... him. I couldn't for... face!" And a woman said: "That's the m... stopped in the dark ... a cigarette. I saw h...

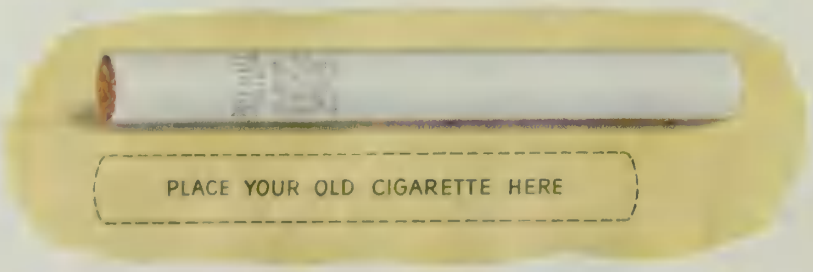
"Here's a basic improvement in cigarette design!"

● Look around—America.

Look in the Service. Look wherever you see young people. A basic improvement in cigarette design is here.



It's Pall Mall—modern, streamlined,—over 20 per cent longer than your old cigarette,—designed for better smoking.

See what this step-forward in cigarette design does for you!

It is a scientific fact that tobacco is its own true filter. In Pall Mall the additional length travels the smoke further—giving you not alone a longer cigarette but a better cigarette—a definitely milder, a definitely cooler smoke.

Pall Mall is a smoother cigarette, too. BULKING—that natural process revived by Pall Mall—lets time do what machines can only approximate. BULKING causes the traditionally fine tobaccos of Pall Mall to mellow, softens all traces of harshness. As a result, Pall Mall is a really smoother smoke.

Prove it—yourself, try Pall Mall critically!

to know that in every worth-while
eavor there was always an unsung
n with a spade? And in my own terms, how about Evashevski in football? Where would Tom Harmon have been without *him?*

Dad said: "If you were high-hat with this Jones boy simply because he's willing to be what's best for his team, why I'm downright ashamed of you, Kit. I never placed better than a second in my life. And where would *you* be, young lady, if your mother had felt like you do?"

Of course I fell into that one. "Where?" I asked, like a stupe.

"You wouldn't be here at all," Dad said, and hitched around on the seat the way men do when they think they've been clever.

But I was beyond resentment by this time. I felt utterly sunk. I barely missed a truck on Canal Street because its lights were all fuzzy in my eyes—but I wasn't crying because I felt sorry for myself; I was crying for something else, and Spike Jones was all mixed up in it somewhere—I *knew* it by the time we reached the curb.

"Never thought I'd have a glory-headed pip-squeak!"—that was Dad getting out. Then he turned and looked at me. "Why, honey, what's the matter?" he said.

Aren't men unpredictable? Brutish one moment, and all tenderness the next. I guess I kind of wailed at him: "Take me in there with you, Daddy. I want to see Spike!"

"Well, my gorry," he said. "Stop crying. And hurry up and park the car."

BY THE time I got back he had a seat for me right next to his own. Dad can be efficient, when he wants to be. But I left him at our section entrance. I told him to go on up. I'd be coming right along. Waves of sound were beating down on me as I ran along behind the stands, and every once in a while I'd hear the boards drum and I practically prayed that it wouldn't be the mile.

I found an usher down by the tunnel where the contestants go in and out, and I said: "Which way to the locker rooms?"

He nodded toward two swinging doors. "But, lady, I wouldn't go in there. It ain't no place for you."

I took a half dollar out of my purse. I said: "*You* go! And find me a man named Jones."

He found *two* for me. One simpered, and wanted to know what I was doing later on. The other was annoyed as the dickens and said he'd never heard of another Jones named Spike. And I was getting more frantic by the minute, when all of a sudden Tony Bissell came walking out.

He remembered me, thank goodness, so I didn't have to go through all that. I said: "Where's Spike Jones, Mr. Bissell?"

"Both he and Bill Faxon are on the track warming up," he said. "They'll be calling the mile pretty soon now. I've got to get out there myself."

I GRABBED the sleeve of his sweat suit. "Will you take a message to Spike for me?" I asked. "And be *sure* to give it to him before the mile starts?"

"Gladly."

"Well, tell him this, please: I'm here, and it doesn't make any difference."

Tony Bissell smiled. "But I'm sure it will, to Spike."

"No, you don't understand—I mean his not winning isn't going to make any difference to me, whether he cares or not."

"Shucks, this is silly! I always wear gloves on a job!" JAY IRVING

"Aren't you a bit pessimistic?"

"No. You see he can't win. He's bait, or whatever he called it. He just sets a terrific pace and he thinks I don't like him because he does it, and goodness knows I gave him reason enough for that, and . . . oh, Mr. Bissell, I'm so mixed up and excited and anxious—won't you just tell him that I'm here?"

You never saw a man smile so warmly as Tony Bissell, he was grinning from ear to ear, and he patted my shoulder with one hand, really he was terribly nice, and he said: "Don't you worry, Miss Cavendish. I'll see that Spike gets it right away."

Well, there! I'd done it, and I'd meant it, and perhaps it did cost me something in pride, but that part didn't matter. For the first time since, well, since last night and that slow number I'd danced with Spike Jones I felt good. Even though I knew he might not give a hoot—still, he had said I was a sweet little dish.

I went up to my seat then, and there were Celia and Marge Hart and I even forgot to be mad at Celia for getting me in dutch about the cars.

Down below, the track was a swarm of color. Men in sweat suits jogging around. Green for Dartmouth, and blue for Yale, and gold and maroon for Hartnell, and the infield men were soaring over bars, and jumping into sawdust, and throwing things around.

I snuggled up close to Dad and whispered: "I got a message through." But Dad didn't even hear me. The funniest thing was happening to him. He'd tighten up all over and let out the most profound grunts, and after a moment I saw that he was watching some big men heave a metal ball.

"Why, you old darling," I said to him. "You're helping them shoot the pot."

"I'm what?" he looked terribly puzzled.

"You're helping them shoot the pot—over there."

"For heaven's sake, Kit"—Dad looked embarrassed. "That's putting the shot. Keep still!"

Men can be so technical. But just then I spotted Spike Jones. He and Bill Faxon were trotting along together and Bill was talking and Spike was nodding his head. And my heart went whomp! just looking at him, and then it went whomp again when I saw Tony Bissell catch up with them and run along beside them for a while.

The next time they came around, Spike looked up our way and his hands went up over his head. He clasped them together and shook them and broke out a great big smile. I knew what it meant. Tony Bissell had told him. I felt wonderful. He was glad that I was there!

I waved back, and Marge Hart—I could've *killed* her—helped me. "He really *is* cute, Kit," she said. "Tell you what— if he wins I'll trade you Tony Bissell for him."

I simply looked my contempt. Then the music was cut from the loud-speakers and a voice boomed: "Calling contestants for the mile!"

A SILENCE came over the Garden and all the men left the track except the milers. It seemed an eternity while they were assembling and their starting positions called out and a big yell went up for Tony Bissell, and another when Bill Faxon's name was called. If I hadn't been certain that Spike would be embarrassed I'd have cheered his name all alone.

Then they crouched, and I jumped when the gun barked, and there was a mad surge forward of flailing arms. And the crowd roared when they shouldered one another for position going around the first high-banked turn.

When they straightened out for the backstretch there was some kind of order at last. And there was Spike right where he said he'd be: out front and pulling away.

By the time they'd finished the first lap, Spike had a lead of ten yards; then running two and three, but close together were Tony Bissell and Bill. By the time they'd finished three laps the whole field was stringing out behind 'way down to a man who was dropping back very sadly—a forlorn-looking runner from Yale.

Remarks were going on all around me like: "Look at the pace that kid sets! He'll fold any minute! Can't maintain it!"

Someone else said: "It's only a trap! I saw him pull it at New Haven. But he's not fooling Bissell with it tonight."

Then Dad said: "A lot of swell running for nothing. Bissell's not being sucked in."

And I said, "Well, naturally, not after I—" but I stopped in time with a gasp. Oh, what a dumb bunny I'd been! Me, with my one-track mind! Spilling everything to Tony Bissell! Selling poor

You'll be head over heels in love with WINT-O-GREEN LIFE SAVERS. They taste swell and make your mouth fresh as the driven snow.

We hereby nominate a fourth monkey: "Breathe No Evil" . . . dedicated to the people who keep their breaths pleasant with CRYST-O-MINT LIFE SAVERS. Carry them with you always.

Looking at the O-shape of Life Savers, you could conceivably call them "sweet nothings." But anybody who's ever tasted Wint-O-Greens will tell you they're *really something!*

Everybody's breath offends sometimes after eating, drinking, or smoking. Let LIFE SAVERS save yours. 14 delicious mint and fruit flavors. Sold everywhere. 5¢.

$2500.00 IN CASH PRIZES!

Just tell us why you like WINT-O-GREEN Life Savers . . . in 10 words or less.

1. Each week for *10 separate weekly contests*, 26 cash prizes will be awarded. 1st Prize: $100.00 cash; 5 prizes of $10.00 each; 20 prizes of $5.00.
2. Enter each weekly contest as many times as you wish. Contests start Jan. 20th, and March 29th, 1941. Send entries to Life Savers Contest Editor, Port Chester, N. Y.
3. Include a Wint-O-Green Life Savers wrapper (5¢ package) or reasonable facsimile with *each* entry.
4. Wint-O-Green counts one word, Life Savers count two.
5. Prizes are awarded for answers best for advertising purposes, in opinion of the judges.
6. In case of tie, duplicate prizes will be given. Decisions of judges will be final. Contest open to residents of U. S. and Canada. All entries become property of Life Savers.
7. Each week's contest closes Saturday midnight. The date your entry is received at post office in Port Chester, N. Y., is official date of entry. Prize winners will be notified by mail.
8. Employees of Life Savers or their advertising agency, or their families may NOT enter.

Spike Jones out, just because I'd been so anxious to get a message to him that I hadn't thought about anything else.

My heart was breaking as I watched him, lengthening that precious lead of his. He was glancing over his shoulder now. I knew why. I knew that he was wondering why Tony Bissell wasn't dogging his steps.

I couldn't bear looking any longer. I dropped my face in my hands.

"What's the matter with you, Kit?" Dad was asking.

Then a sharp sort of yell went up.

"What's happened?" I asked, lifting my head.

"Jones just lapped the Yale man." Dad said. "They'll wave the Yale man off the track in a minute. Look at that Jones boy *run!*"

"You look at him, Dad." I begged. "Just let me know when he reaches the three-quarter post."

"He's coming down on it now." Then Dad gave a wild sort of roar, and the whole arena roared with him, and people began to stand up.

"Here comes the race!" yelled a man behind me. I had to stand up, too. After a moment, I saw what they were yelling for: Tony Bissell and Bill Faxon were stepping out.

They looked like two powerful, lean greyhounds—and Spike was the rabbit up ahead. But Spike hadn't slackened his pace any, though he'd passed the three-quarter mark. I knew he wouldn't until Bill Faxon passed him, but that wasn't going to take long, with Bill and Tony charging up there, and only the lapped Yale man in between.

Spike went into the turn again, and the Yale man came staggering along, and a tuxedoed official was waiting there, trying to wave the Eli off. But you know how a Yale man can be—they never, never give up. Just as he went into the turn himself, Tony and Bill thundered up.

Tony went wide to pass him, and the Yale man looked startled and swerved, and Bill was passing on the inside, and he and the Yale man bumped.

But bumped! It was awful! A collision! Both of them went down and rolled. The official had the Yale man by one arm and dragged him off just as the following herd came along. Poor Bill! He tried to get back in it. He got up and began to run again. But you could see at once that it was hopeless.

The crowd let out one of those long, diminishing: "Oh-oh-oh's."

I REACHED for Celia's hand. She looked stricken. I tried to squeeze it and tell her not to care, but I couldn't make myself heard in the bedlam that was breaking loose all around.

For Tony Bissell was out to make the kill now. He was fast overtaking Spike. I saw Spike look back again over his shoulder and I could *feel* him still digging in. He still had yards left on the backstretch, and he held them around the turn. Running down the straightaway before us I could see his head thrown back and the way he was sucking air in and the cords standing out on his throat.

A gun banged when both of them tore by us, and I screamed, but nobody heard, because everyone else was screaming. It was the gun for the last lap of the mile.

Dad was sort of chanting: "He can't do it! He can't do it! He can't stand off a bid like that!"

They were rounding the turn again, and Spike went into it holding fast to the pole. Going down the backstretch for the last time, they looked like a one-man silhouette, and I held my breath and prayed. I expected Tony Bissell to pull out front.

But he didn't! I started yelling in Dad's ear. "Spike will *never* give up! He'd let Bill take the lead a
him, but *never* anyone else!"

ou; Stepmother and William Ashe—
id anced inside at the blurred stamp
fir l to the title page. As he was about
r lace them, his eye caught sight of
bc k that had been shoved behind the
he books. It was a small, dumpy vol-
me ound in brown calf.

H took it out and opened it. Very
ov he nodded his head. "*So I was*
gh he murmured. "Yes, I was right.
ut r the other—is that possible, too?
o. is not possible, unless . . ."

H stayed there, motionless, stroking
is ustache whilst his mind ranged
usi over the problem.

H said again softly, "*Unless*—?"

'CONEL WESTON looked in at the
door. "Hullo, Poirot, still there?"
"I rrive. I arrive," cried Poirot. He
urr d out into the corridor.

T room next to Linda's was that of
he edfern's. Poirot looked into it, not-
ng tomatically the traces of two dif-
ere individualities—a neatness and
din s which he associated with Chris-
ine nd a picturesque disorder which
ras haracteristic of Patrick. Apart
rom hese sidelights on personality the
oor did not interest him.

N t to it again was Rosamund Darn-
ey's oom and here he lingered for a
mor nt in the sheer pleasure of the
wn's personality.

H noted the few books that lay on
he ble next to the bed, the expensive
imp city of the toilet set on the dress-
ng ble. And there came gently to his
ost s the elusive, expensive perfume
hat Rosamund Darnley used.

N t to Rosamund Darnley's room
at th northern end of the corridor was
an den window leading to a balcony
rom which an outside stair led down to
he cks below.

Weston said, "That's the way people
go wn to bathe before breakfast—
hats, if they bathe off the rocks as
mos of them do."

In rest came into Hercule Poirot's
eyes He stepped outside and looked
low

Bow, a path led to steps cut zigzag
ead g down the rocks to the sea. There
was so a path that led around the hotel
to th left. He said: "One could go down
thes stairs, go to the left around the ho-
tel ad join the main path up from the
caus way."

Weston nodded. He amplified Poi-
rot's statement: "One could go right
acro the island without going through
the tel at all." He added: "But one
migh still be seen from a window."

"What window?"

"Two of the public bathrooms look
out hat way—north—and the staff bath-
room and the cloakrooms on the ground
floor Also the billiard room."

Poirot nodded. He said: "And all the
form r have frosted-glass windows and
one oes not play billiards on a fine
morn ng."

"Exactly," Colonel Weston assented.

He paused and then said, "If he did it, that's the way he went."

"You mean Captain Marshall?"

"Yes. Blackmail, or no blackmail, I still feel it points to him. And his manner—well, his manner is unfortunate."

"Perhaps," Hercule Poirot said dryly. "But a manner does not make a murderer!"

Weston said: "Then you think he's out of it?"

Poirot shook his head. "No, I would not say that."

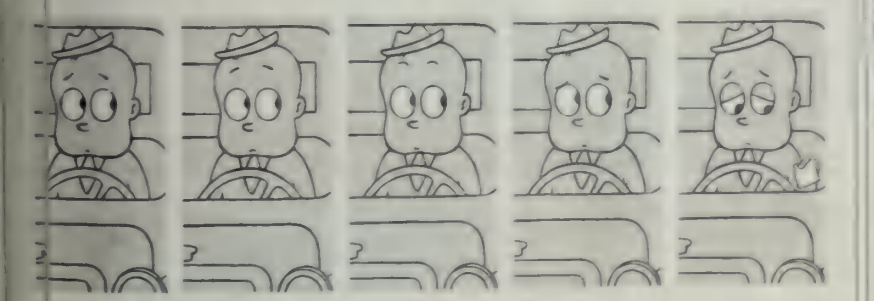
Weston said: "We'll see what Colgate can make out of the typewriting alibi. In the meantime, I've got the chambermaid of this floor waiting to be interviewed. A good deal may depend on her evidence."

The chambermaid was a woman of thirty—brisk, efficient and intelligent. Her answers came readily.

Captain Marshall had come up to his room not long after ten-thirty. She was then finishing the room. He had asked her to be as quick as possible. She had not seen him come back but she had heard the sound of the typewriter a little later. She put it at about five minutes to eleven. She was then in Mr. and Mrs. Redfern's room. After she had done that she moved on to Miss Darnley's room at the end of the corridor. She could not hear the typewriter from there. She went to Miss Darnley's room, as near as she could say, at just after eleven o'clock. She remembered hearing Leathercombe Church strike the hour as she went in.

At a quarter past eleven she had gone downstairs for her eleven-o'clock cup of tea and "snack." Afterward she had gone to do the rooms in the other wing of the hotel. In answer to the chief constable's question she explained that she had done the rooms in this corridor in the following order:

Miss Linda Marshall's, the two public bathrooms, Mrs. Marshall's room and private bath, Captain Marshall's room, Mr. and Mrs. Redfern's room and private bath, Miss Darnley's room and private bath. Captain Marshall's and Miss Marshall's rooms had no adjoining bathrooms.



During the time she was in Miss Darnley's room and bathroom she had not heard anyone pass the door or go out by the staircase to the rocks, but it was quite likely she wouldn't have heard if anyone went quietly.

WESTON then directed his questions to the subject of Mrs. Marshall.

No, Mrs. Marshall wasn't one for rising early as a rule. She, Gladys Narracott, had been surprised to find the door open and Mrs. Marshall gone down at just after ten. Something quite unusual, that was.

"Did Mrs. Marshall always have her breakfast in bed?"

"Oh, yes, sir, always. Not very much of it, either. Just tea and orange juice

Traffic Cop

Mr. Indigo Blue and Mr. Beamish Bright

MR. BRIGHT: A glorious morning, Mr. Blue! I feel as joyful as a skylark!
MR. BLUE: And I feel as sad as a crow. All I know is trouble.

MR. BRIGHT: Here! Here! my lugubrious friend. Cheer up! There's Springtime in the air! Come walk down to the grocer's with me.
MR. BLUE: It's not springtime inside of *me*, Mr. Bright. If you only *knew* how many pills, purgatives, salts, laxatives and cathartics I've taken. Life is just a vale of tears.

MR. BRIGHT: (at the grocer's) Here's a present for you, my woeful one, that may show you the silver lining. Instead of *dosing* constipation why not try to get at its *cause?* If yours is the ordinary kind that's due to lack of the proper kind of "bulk" in the diet, crisp, toasty KELLOGG'S ALL-BRAN may be just the ticket. Eat it every day, drink plenty of water, and watch the world grow brighter.

MR. BRIGHT: (sometime later) Well! Well! If it isn't the old king of the glooms. Isn't that "Happy Days" I heard you playing?
MR. BLUE: And happy days it *is*, Beamish, since you told me about ALL-BRAN's better way.

Join the "Regulars" with *Kellogg's* ALL-BRAN

and one piece of toast. Slimming, like so many ladies."

No, she hadn't noticed anything unusual in Mrs. Marshall's manner that morning. She'd seemed quite as usual.

Hercule Poirot murmured: "What did you think of Mrs. Marshall, Mademoiselle?"

Gladys Narracott stared at him. "Well," she said, "that's hardly for me to say, is it, sir?"

"But yes, it is for you to say. We are anxious—very anxious—to hear your impression."

Gladys gave a slightly uneasy glance toward the chief constable who endeavored to make his face sympathetic and approving, though actually he felt slightly embarrassed by his foreign colleague's methods of approach. He said: "Er—yes, certainly. Go ahead."

For the first time Gladys Narracott's brisk efficiency deserted her. Her fingers fumbled with her print dress. She said: "Well, Mrs. Marshall—she wasn't exactly a lady, as you might say. What I mean is, she was more like an actress."

"She was an actress," Colonel Weston said.

"Yes, sir, that's what I'm saying. She just went on exactly as she felt like it. She didn't—well, she didn't trouble to be polite if she wasn't feeling polite. And she'd be all smiles one minute and then if she couldn't find something or the bell wasn't answered at once or her laundry wasn't back, well, she'd be downright rude and nasty about it. None of us as you might say *liked* her. But her clothes were beautiful, and, of course, she was a very handsome lady, so it was only natural she should be admired."

COLONEL WESTON said, "I am sorry to have to ask you what I am going to ask you, but it is a very vital matter. Can you tell me how things were between her and her husband?"

Gladys Narracott hesitated a minute. "You don't—it wasn't—you don't think as *he* did it?"

Hercule Poirot said quickly: "Do you?"

"Oh! I wouldn't like to think so. He's such a nice gentleman, Captain Marshall. He couldn't do a thing like that—I'm sure he couldn't."

"But you are *not* very sure—I hear it in your voice."

Gladys Narracott said reluctantly:

"You do read such things in the papers! When there's jealousy. If there's been goings-on—and, of course, everyone's been talking about it—about her and Mr. Redfern, I mean. And Mrs. Redfern such a nice, quiet lady! It does seem a shame! And Mr. Redfern's a nice gentleman, too, but it seems men can't help themselves when it's a lady like Mrs. Marshall—one who's used to having her own way. Wives have to put up with a lot, I'm sure." She sighed and paused. "But if Captain Marshall found out about it—"

Colonel Weston said sharply, "Well?"

Gladys Narracott said slowly: "I did think sometimes that Mrs. Marshall was frightened of her husband knowing."

"What makes you say that?"

"It wasn't anything definite, sir. It was only I felt—that sometimes she was—afraid of him. He was a very quiet gentleman but he wasn't *easy*."

"But," Weston said, "you've nothing definite to go on? Nothing either of them ever said to each other."

Slowly Gladys Narracott shook her head.

Weston sighed. He went on: "Now, as to letters received by Mrs. Marshall this morning. Can you tell us anything about those?"

"There were about six or seven, sir. I couldn't say exactly."

"Did you take them up to her?"

"Yes, sir. I got them from the office as usual and put them on her breakfast tray."

"Do you remember anything about the look of them?"

The girl shook her head. "They were just ordinary-looking letters. Some of them were bills and circulars, I suppose, because they were torn up on the tray."

"What happened to them?"

"They went into the dustbin, sir. One of the police gentlemen is going through that now."

Weston nodded. "And the contents of the wastepaper baskets, where are they?"

"They'll be in the dustbin too."

Weston said: "H'm—well, I think that is all at present." He looked inquiringly at Poirot.

POIROT leaned forward. "When you did Miss Linda Marshall's room this morning, did you do the fireplace?"

"There wasn't anything to do, sir. There had been no fire lit."

"And there was nothing in the fireplace itself?"

"—then you add sugar and water and that's lemonade"

REAMER KELLER

"No, sir, it was perfectly all right."

"What time did you do her room?"

"About a quarter past nine, sir, when she'd gone down to breakfast."

"Did she come up to her room after breakfast, do you know?"

"Yes, sir. She came up about a quarter to ten."

"Did she stay in her room?"

"I think so, sir. She came out, hurrying rather, just before half past ten."

"You didn't go into her room again?"

"No, sir. I had finished with it."

Poirot nodded. "There is another thing I want to know. What people bathed before breakfast this morning?"

"I couldn't say about the other wing and the floor above. Only about this one."

"That is all I want to know."

"Well, sir, Captain Marshall and Mr. Redfern were the only ones this morning, I think. They always go down for an early dip."

"Did you see them?"

"No, sir, but their wet bathing things were hanging over the balcony rail as usual."

"Miss Linda Marshall did not bathe this morning?"

"No, sir. All her bathing dresses were quite dry."

"Ah," said Poirot. "That is what I wanted to know."

Gladys Narracott volunteered: "She does most mornings, sir."

"And the other three—Miss Darnley, Mrs. Redfern and Mrs. Marshall?"

"Mrs. Marshall never, sir. Miss Darnley has once or twice, I think. Mrs. Redfern doesn't often bathe before breakfast—only when it's very hot, but she didn't this morning."

Again Poirot nodded. Then he asked: "I wonder if you have noticed whether a bottle is missing from any of the rooms you look after in this wing?"

"A bottle, sir? What kind of a bottle?"

"Unfortunately, I do not know. But have you noticed—or would you be likely to notice—if one had gone?"

Gladys said frankly, "I shouldn't from Mrs. Marshall's room, sir, and that's a fact. She has ever so many."

"And the other rooms?"

"Well, I'm not sure about Miss Darnley. She has a good many creams and lotions. But from the other rooms, yes, I would, sir. I mean if I were to look special. If I were noticing, so to speak."

"But you haven't actually noticed?"

"No, because I wasn't looking special, as I say."

"Perhaps you would go and look now, then."

"Certainly, sir."

SHE left the room, her print dress rustling. Wetson looked at Poirot. "What's all this?" he said.

Poirot murmured: "My orderly mind; it is vexed by trifles! Miss Brewster, this morning, was bathing off the rocks before breakfast, and she says that a bottle was thrown from above and nearly hit her. *Eh bien,* I want to know who threw that bottle and why?"

"My dear man, anyone may have chucked a bottle away."

"Not at all. To begin with, it could only have been thrown from a window on the east side of the hotel—that is, one of the windows of the rooms we have just examined. Now I ask you, if you have an empty bottle on your ing table or in your bathroom w you do with it? I will tell you, yo it into the wastepaper basket. Y not take the trouble to go out o balcony and hurl it into the sea one thing you might hit someo another it would be too much t No, you would only do that *if y not want anyone to see that par bottle.*"

Weston stared at him. "I kno said, "that Chief Inspector Japp, I met over a case not long ago, says you have a damned tortuous You're not going to tell me no Arlena Marshall wasn't strangled but poisoned out of some myst bottle with a mysterious drug?"

"No, no, I do not think there wa son in that bottle."

"Then what was there?"

"I do not know at all. That's am interested."

Gladys Narracott came back. Sl a little breathless. "I'm sorry, sir said, "but I can't find anything m I'm sure there's nothing gone from tain Marshall's room, or Miss Marshall's room or Mr. and Mrs. fern's room, and I'm pretty sure t nothing gone from Miss Dar either. But I couldn't say about Marshall's. As I say, she's got s lot."

Poirot shrugged his shoulders. matter. We will leave it."

Gladys Narracott said, "Is there thing more, sir?" She looked fro to the other of them.

Weston said: "Don't think so. T you."

POIROT said: "I thank you, no. are sure, are you not, that the nothing—nothing at all, that you forgotten to tell us?"

"About Mrs. Marshall, sir?"

"About anything at all. Anythin usual, out of the way, unexpla slightly peculiar, rather curious—e something that has made you sa yourself or to one of your collea 'That's funny!'?"

"Well," Gladys said doubtfully, the sort of thing that you would n sir."

Hercule Poirot said: "Never what I mean. You do not know w mean. It is true, then, that you said to yourself or to a colleague to 'That is funny!'?" He brought ou three words with ironic detachment

"It was nothing really," Gladys "Just a bath being run. And I did the remark to Elsie, downstairs, th was funny somebody having a around about twelve o'clock."

"Whose bath, who had a bath?"

"That I couldn't say, sir. We hea going down the waste from this w that's all, and that's when I said wh did to Elsie."

"You're sure it was a bath? Not of the hand basins?"

"Oh! quite sure, sir. You can't take bath water running away."

Poirot, displaying no further de to keep her, Gladys Narracott was mitted to depart.

Weston said: "You don't think bath question is important, do you. rot? I mean, there's no point to it. bloodstains or anything like that to w off. That's the—" he hesitated.

Poirot cut in: "That, you would is the advantage of strangulation! bloodstains, no weapon—nothing to rid of or conceal! Nothing is needed physical strength—*and the soul o killer!*"

His voice was so fierce, so char with feeling, that Weston recoile little.

Hercule Poirot smiled at him ap getically. "No, no," he said, "the b is probably of no importance. Any

"Don't try to high-hat me..."

said the briar to the meerschaum

"But you *are* a cheap-looking bit of boxwood," replied the carved meerschaum pipe.

"Mebbe so," said the briar, "but I've lived and you haven't."

"I beg your pardon?" said the meerschaum, and every figure on it raised its eyebrows.

"You've never been smoked," said the briar. "You've never seen the look of solid satisfaction on a man's face as the smoke of fine tobacco rolls back over his tongue."

"Sounds great," said the meerschaum. "Does every tobacco give you this wonderful experience?"

"Not by a bowlful!" said the briar. "In all my years, I've known only *one* tobacco with the aroma and flavor that bring perfect contentment to a man and his pipe. That's Half and Half."

A CARGO OF CONTENTMENT IN THE BOWL OF ANY PIPE

Next time you settle down with your pipe, load it with Half and Half. It's a smoke a man can understand. It's companionship when you're alone. It's a smoke that comforts when you're blue—that calms you down when you're getting edge-y. It's a smoke that never nags. A friendly smoke. A kindly smoke that wouldn't bite the meanest man on earth. This fragrant, aromatic tobacco is contentment in the bowl of any pipe. That's what it is!

This quaint 1904 meerschaum is from Half and Half's $25,000 collection—a collection of unique pipes assembled in honor of a uniquely aromatic tobacco... Half and Half.

Remember, Half and Half comes in the patented Telescope Tin that gets smaller and smaller as you use the tobacco.

HALF AND HALF

The Little Church At The Corners

An Old American Institution

COOL AND WHITE it stands, where the straggling town lines meet the county road. Above the clustered maples its slender spire reaches toward the blue, a sturdy testament to humble faith. Well-built of honest oak and weathered pine with deep roots in the soil of America. Clean and simple of line, as befits the house of worship.

NOT large, still on occasion it can hold a surprising number and much activity, for the church of all the countryside is many things besides. It draws the tide of farm and home life to its door, and serves as newspaper, theatre. In very truth, the meeting house – the seat and center of social life for millions of Americans. A venerable and beloved institution, frequently built by its own members, from their own forests and quarries, it contributes untold riches in good works and character to the national life.

HERE, too, men come to worship in the manner they have chosen—and to meet and greet their kin and neighbors. Here, the ladies, in their best black silks and cashmeres, preside at many a worthy "social"—charity bazaar, strawberry festival or bake sale.

HERE, too, are held the great American feasts—the church chicken dinners! Wherein every proud woman strives to outdo with the dish for which she is particularly famous, and the larders and root-houses are fairly looted of the emerald jellies and ruby jams, ruddy ketchup, jade-green relishes, spiced peaches, quince conserve, cucumber slices! Only one place on earth's surface can conjure up such bounty—the American farmland!

TO ALL the past and present generations of mothers and grandmothers who have helped prepare these hundred thousand church suppers, the H. J. Heinz Company acknowledges a very real debt.

FROM them—the best cooks in the world—we have learned many of our choicest recipes. Many pa careful, old-time ways of doing things. Many ago arts of making simple and wholesome taste extra delicious.

THIS was the traditional wholesome fare to w the American institution of Heinz has devot deep respect and infinite care these more th years. It is preserved today in all its simple goo for the modern American table, by carefully rec recipes that were family favorites when Hein gan, by the same tantalizingly slow cooking, b same art of knowing how to do it just right. way your Grandmother made it when she was trying to create something extra special for the church supper—a long time ago.

H. J. Heinz Compa

An Old American Institution

ave had a bath. Mrs. Redfern be-
e went to play tennis, Captain
all, Miss Darnley. As I say, any-
here is nothing in that."
olice constable knocked at the

ough I'd tell him to come out."
'An what did Captain Marshall
y?"
Rosamund smiled rather shamefac-
ly.
'We when I opened the door he
s ty ng so vigorously, and frowning
d lo ing so concentrated that I just
nt a ay quietly. I don't think he even
w m come in."
'An that was—at what time, Miss
arnle ?"
'Jus about twenty past eleven. I no-
ed t clock in the hall as I went out
ain."
'An that puts the lid on it finally,"
aid Inspector Colgate. "The chamber-
aid h ard him typing up till five min-
utes to eleven. Miss Darnley saw him at twenty minutes past, and the woman was dead at a quarter to twelve. He says he spent that hour typing in his room and it seems quite clear that he *was* typing in his room. That washes Captain Marshall right out."

He stopped, then, looking at Poirot with some curiosity, he said: "M. Poirot's looking very serious over something."

"I was wondering," Poirot said thoughtfully, "why Miss Darnley suddenly volunteered this extra evidence."

Inspector Colgate cocked his head alertly. "Think there's something fishy about it? That it isn't just a question of 'forgetting'?"

He considered for a minute or two, then he said slowly:

"Look here, sir, let's look at it this way. Supposing Miss Darnley wasn't on Sunny Ledge this morning as she says. That story's a lie. Now suppose that *after* telling us her story, she finds that somebody saw her somewhere else or alternately that someone went to the ledge and didn't find her there. Then she thinks up this story quick and comes and tells it to us to account for her absence. You'll notice that she was careful to say Captain Marshall didn't *see* her when she looked into his room."

CHINA SKY

BY PEARL S. BUCK

The Editors of Collier's are delighted to announce her most distinguished novel since The Good Earth

BEGINNING IN NEXT WEEK'S COLLIER'S

Poirot murmured: "Yes, I noticed that."

"Are you suggesting," Weston said incredulously, "that Miss Darnley's mixed up in this? Nonsense, seems absurd to me. Why should she be?"

Inspector Colgate coughed. "You'll remember," he said, "what the American lady, Mrs. Gardener, said. She sort of hinted that Miss Darnley was sweet on Captain Marshall. There'd be a motive there, sir."

Weston said impatiently: "Arlena Marshall wasn't killed by a woman. It's a man we've got to look for. We've got to stick to the men in the case."

Inspector Colgate sighed. "Yes, that's true, sir. We always come back to that, don't we?"

Weston went on: "Better put a constable on to timing one or two things. From the hotel across the island to the top of the ladder. Let him do it running and walking. Same thing with the ladder itself. And somebody had better check the time it takes to go on a float from the bathing beach to the cove."

Inspector Colgate nodded. "I'll attend to all that, sir," he said confidently.

The chief constable said: "Think I'll go along to the cove now. See if Phillips has found anything. Then there's that Pixy's Cave we've been hearing about. Ought to see if there are any traces of a man waiting in there. Eh, Poirot? What do you think?"

"By all means. It is a possibility."

Weston said: "If somebody from outside had nipped over to the island that would be a good hiding place—if he knew about it. I suppose the locals know?"

"Don't believe the younger generation would," Colgate said. "You see, ever since this hotel was started the coves have been private property. Fishermen don't go there, or picnic parties. And the hotel people aren't local. Mrs. Castle's a Londoner."

Weston said, "We might take Redfern with us. He told us about it. What about you, M. Poirot?"

Hercule Poirot hesitated. He said, his foreign intonation very pronounced: "No, I am like Miss Brewster and Mrs. Redfern, I do not like to descend perpendicular ladders."

"You can go around by boat," Weston said.

Again Hercule Poirot sighed. "My stomach, it is not happy on the sea."

"Nonsense, man, it's a beautiful day. Calm as a millpond. You can't let us down, you know."

Hercule Poirot hardly looked like responding to this British adjuration. But at that moment, Mrs. Castle poked her ladylike face and elaborate coiffure around the door.

"Ay'm sure ay hope ay am not intruding," she said. "But Mr. Lane, the clergyman, you know, has just returned. Ay thought you might like to know."

"Ah, yes, thanks, Mrs. Castle. We'll see him right away. Ask him to come here."

STEPHEN LANE strode into the room with his usual vigor.

Weston said, "I'm the chief constable of the county, Mr. Lane. I suppose you've been told what has occurred here?"

"Yes,—oh, yes—I heard as soon as I got here. Terrible . . . terrible. . . ." His thin frame quivered. He said in a low voice: "All along—ever since I arrived here—I have been conscious—very conscious—of the forces of evil close at hand."

His eyes, burning, eager eyes, went to Hercule Poirot. "You remember, M. Poirot?" he said. "Our conversation some days ago? About the reality of evil?"

Weston was studying the tall, gaunt figure in some perplexity. He found it difficult to make this man out. Lane's eyes came back to him. The clergyman said, with a slight smile:

"I dare say that seems fantastic to you, sir. We have left off believing in evil in these days. We have abolished hell-fire! We no longer believe in the devil! But Satan and Satan's emissaries were never more powerful than they are today!"

"Er—er—yes, perhaps," Weston said. "That, Mr. Lane, is your province. Mine is more prosaic—to clear up a case of murder."

Stephen Lane said: "An awful word. Murder! One of the earliest sins known on earth—the ruthless shedding of an innocent brother's blood. . . ." He paused, his eyes half closed. Then, in a more ordinary voice he said, "In what way can I help you?"

"First of all, Mr. Lane, will you tell me your own movements today?"

"Willingly. I started off early on one of my usual tramps. I am fond of walking. I have roamed over a good deal of the countryside around here. Today I went to St. Petrock-in-the-Combe. That is about seven miles from here—a very pleasant walk along winding lanes, up and down the Devon hills and valleys. I took some lunch with me and ate it in a spinney. I visited the church—it has some fragments of early glass—also a very interesting painted screen."

"Thank you, Mr. Lane. Did you meet anyone on your walk?"

"Not to speak to. A cart passed me once and a couple of boys on bicycles and some cows. However," he smiled, "if you want proof of my statement I wrote my name in the book at the church. You will find it there."

"You did not see anyone at the church itself—the vicar, or the verger?"

Stephen Lane shook his head. "No, there was no one about and I was the only visitor."

Colonel Weston said pleasantly, "You mustn't think we're—er—doubting what you say. Just a matter of checking up on everybody. Just routine, you know, routine. Have to stick to routine in cases of this kind."

"Oh, yes, I quite understand," Stephen Lane said gently.

WESTON went on: "Now the next point: Is there anything you know that would assist us at all? Anything about the dead woman? Anything that could give us a pointer as to who murdered her? Anything you heard or saw?"

"I heard nothing," Stephen Lane said. "All I can tell you is this: that I knew instinctively as soon as I saw her that Arlena Marshall was a focus of evil. She *was* evil! Evil personified! Woman can be man's help and inspiration in life—she can also be man's downfall. She can drag a man down to the level of the beast. The dead woman was just such a woman. She appealed to everything base in a man's nature. She was a woman such as Jezebel and Aholibah. Now—she has been struck down in the middle of her wickedness!"

Hercule Poirot stirred. He said, "Not struck down — *strangled!* Strangled, Mr. Lane, by a pair of human hands."

The clergyman's own hands trembled. The fingers writhed and twitched. He said, and his voice came low and choked: "That's horrible — horrible! Must you put it like that?"

"It is the simple truth," Hercule Poirot said. "Have you any idea, Mr. Lane, whose hands those were?"

The other shook his head. "I know nothing—nothing. . . ."

Weston got up. He said, after a glance at Colgate to which the latter replied by an almost imperceptible nod, "Well, we must go on to the cove."

"Is that where—it happened?" Lane said.

Weston nodded.

Lane said: "Can—can I come with you?"

About to return a curt negative, Weston was forestalled by Poirot.

"But, certainly," said Poirot. "Accompany me there in a boat, Mr. Lane. We start immediately."

(To be continued next week)

The Starting Handle

Continued from page 13

The starting handle, a long and widery affair, was under the back seat, and, with some difficulty, Alan succeeded in cranking up the engine. Neglecting to remove the starting handle, he popped into the driving seat and, with his left arm encircling Molly, drove away into the gathering night.

At the foot of a long, steep hill, where a brook was spanned by a small bridge, Alan turned the car into a grassy sward and pulled up behind a clump of willows. The better to conceal it from observation, he covered the hood with a double armful of brush. Then, joining hands, the lovers tiptoed into the silence of the woods. Not very long after their encirclement, there came down the road one Edward Vicary, by profession, a bedger and ditcher, and, by recent enrollment, a Local Defense Volunteer.

As a bedger and ditcher, Mr. Vicary's attention was held by what flanked the road rather than by the road itself. It is not therefore surprising that he should have halted and scratched his head in perplexity at the unusual phenomenon of a quantity of brush growing upside down. Cautiously approaching, he discovered where Alan's car had been hidden. He peeped through the window and saw that it was empty. He tried the door and found that it was locked. He went around the front and, by the light of a match, found that the car was an Opel.

EDWARD VICARY was not a widely informed man, or he would have known that the possession of an Opel did not necessarily mean that its owner was a German, a fifth columnist, nor sympathetic to the Nazi cause. What he did know was that it was a car of German origin, and that the suspicious nature of its concealment pointed to the owner being up to no good. There had been rumors in the neighborhood of mysterious lights flashed at night on hills and in woodlands, for the purpose of directing the course of hostile aircraft, and he had no doubt that the owner of this car, assuming that it had not been dropped from the clouds a few minutes previously, was the author of these outrages.

It was a situation that called for immediate action, and the first to suggest itself was to immobilize the car by slashing the tires. But before putting the idea into operation, he felt that he should have the support of higher authority.

Less than a quarter mile away was a chicken farm where abode two spinster ladies, named Fishpingle, who enjoyed the amenity of a telephone. Thither he went with haste, his arrival synchronizing with the ladies' retirement to rest. He knocked hastily, then, stepping back from the front porch, shouted: "Is anyone about?"

The head of the younger Miss Fishpingle appeared, and with some confusion of ideas, she remarked: "What do you want? Go away."

"I got to use your telephone. There's Germans about," Edward shouted.

From the bed, the elder Miss Fishpingle asked what was being said, and the younger complacently replied: "There are Germans about."

"Well, fancy!" said the elder. "Let's go downstairs and make a cup of tea."

Confronted with the telephone, Edward Vicary showed a weakening of purpose. "I never could get familiar with these things," he said, "so p'r'aps one of you ladies would kindly speak for me."

Mr. Hughes was wondering what the device had become of Molly when the telephone rang.

"Hello? Who is it?" he shouted, and listened attentively while Miss Fishpingle relayed Edward Vicary's statement. "I'll come at once, and tell the man to stand by the car until I arrive. No, tell him nothing of the kind. There may be more than one of the devils. Tell him to strike across the fields and wait for me at the top of the hill."

Looking down from the first-floor landing, Mrs. Hughes beheld her husband slinging a shotgun across his shoulders.

"What is it?" she called.

"Germans," he replied, and rushed from the house.

A moment later she heard the roar of his motorcycle and said to herself, "So they have landed," but was sure that George would be more than a match for them.

FREEING herself from Alan's embraces, and rising from a bank of fern on which they had been reclining, Molly said, "I must fly, darling. There'll be an awful hullabaloo if I'm not in by twelve."

Alan said, "But it's understood, isn't it, that you'll marry me the very instant you come of age?"

"It may not be the very instant, darling, but it'll be as near the instant as possible."

They kissed again and sorrowfully returned to the car where a greater sorrow awaited them, for the starting handle was gone.

Even the sweetest feminine nature is apt at such a time to turn sour, and Molly is not greatly to be blamed for resorting to her father's definition of Alan and calling him a fool. His cheerful assurance that feet were invented before motorcars did not help.

"The thing to do is to steer a course nor'-nor'-west, across country, and hit the road a mile outside the town. With any luck we might pick up a lift and you'd be in before one o'clock."

"Yes," said Molly, "and I'll be out before two o'clock if Daddy learns that I've been with you."

"Take it from me, sweetheart, he never will."

On that understanding they took to the fields.

WITH recklessness born of national emergency, Mr. Hughes steamed along the road on his motorcycle. He was too well known for his identity [illegible] to be demanded at the barricades, steering perilously through the ranks of tar barrels, he turned into a lane and proceeded rapidly. The modest light afforded by a headlamp failed to disclose a prostrate object lying in the road. The object looked like half a swastika, but as a stone with one end slightly [illegible]. This end, struck by the front wheel of the machine, transformed the machine into a cup-cat, flinging it upward and causing it into the rear sprocket and driving chain.

Edward Vicary, approaching, witnessed the horrifying spectacle of Hughes leaving the saddle and describing a parabola through the air as if suddenly endowed with wings. [illegible] a three-point landing on [illegible] clear off the road and, rolling [illegible] over, came to rest breathless, [illegible] sprained wrist and ankle, at the [illegible] of the ditch. That he still [illegible] proved by a string of choice oaths [illegible] decency forbids should be [illegible]

"Blimey, master," said Vicary, [illegible] were a middlin' brawsh [illegible]

Then, stepping into the road, [illegible] the wreckage of the motorcycle, [illegible] tracted and exhibited a [illegible] handle.

"Whoever left it there," [illegible] Hughes, moaning over and [illegible] injuries, "ought to be shot as a [illegible] He tried to rise, but failed. "Try it, get on to the telephone. Not police. Get a car. Get an [illegible] Get out of my sight."

THE elder Miss Fishpingle was [illegible] to the younger. "Even if the Germans about we may as well [illegible] the sleep we can get, and as we [illegible] allowed two ounces of tea a [illegible] would be criminal to make [illegible] when the familiar voice of Edward Vicary once more hailed them in the night. This time both ladies [illegible] the window.

"Yes, what is it now?"

"Disaster's out of it. He [illegible] up like an old box. I reckon [illegible] short of a ambulance would [illegible] reach the hospital alive."

The younger Miss Fishpingle [illegible] "Gracious! Who did it? Germans?"

"No, there's no sich [illegible]

The elder Miss Fishpingle [illegible] wouldn't try to understand it. I [illegible] but if somebody's hurt we'd better [illegible] the van."

So they put on their clothes and [illegible]

Quick Relief for THROBBING

COLD WEATHER JOINTS

When the icy wind cuts through you, how it eases up your pains, grinding "cold-weather joints"! Absorbine Jr. quickly eases those aching spots — brings speedy, penetrating relief from each winter torture.

Normally, little blood vessels feed lubricating fluid into the joints. Extreme cold constricts blood vessels. Stops up the supply of fluid. Makes joints "grind" and ache. Hinders your movements and work.

Rub in Absorbine Jr.! Feel the warmth spread, as it speeds up the blood flow — helps nature quickly counteract the effects of cold. Soon your joints "glow" with relief! You'll feel like singing, as all suffering ends in a jiffy. Write W. F. Young, Inc., 404 Lyman St., Springfield, Mass., for free sample.

FAMOUS also for relieving Athlete's Foot, Strains, Bruises

ABSORBINE JR.

No Empty Pocketbook!

WHEN the after-holiday bills come rolling in it takes thought to know where the money is coming from. Write for my free booklet, "Six Adventures in Dollars and Cents." For girls and women. It will help you get started making money, too!

To a young man about to buy his first car—

YOU ARE DECIDING. In a few days you will buy. You do not want our advice, nor do we want to give you any. This is *your* adventure, and that is as it should be.

But some things we can tell you now that are more than mere advice. They are things that have held good since we made the first Ford 38 years ago.

The first one is to *buy* your car, and not just let someone *sell* you one. Look deep as you go, and look in your own time. Don't let anyone press or hurry you. Don't be afraid to ask questions. It is *your* money that you will spend. And the car that you will choose is to be *your* companion.

Look under the hood. That has always been a good idea. And look *behind* the prices you are given so that you *know* what they include. Take a long and testing try-out run before you settle on any car.

Talk to owners of the makes you consider, and learn from their experience. Include owners of this year's cars, for things move fast in the world of motor cars, and yesterday can be a long, long time ago.

And try a Ford. We've designed and built it to serve you well and serve you long.

...ome Ford Advantages for 1941:

ROOMINESS. Bodies were lengthened and widened this year, adding [illegible]" to seating width.

SOFT, QUIET RIDE. A new Ford ride, with new frame and stabilizer, softer springs, improved shock absorbers.

SMOOTH 8-CYLINDER POWER. An advantage still unmatched in its price field. With records for gas and oil economy as well as for performance.

BIG WINDOWS. Windshield and windows so increased all around that nearly four square feet of added glass goes into each '41 Ford Sedan.

LARGEST HYDRAULIC BRAKES in the Ford price field, give added safety, longer brake-lining wear.

GET THE FACTS AND YOU'LL GET A FORD!

Ford

MENTAL WORKERS Test Knox Gelatine to fight Tiredness!

Can Knox Gelatine fight fatigue for men and women in jobs where business problems and quick decisions strain the nerves? 223 mental workers recently volunteered to drink Knox for 28 days. 140 of them completed the test. Read the impressive results!

124 out of 140 reported benefits! Of the 140, which included salesmanagers, secretaries, cashiers, teachers, nurses, who completed the Knox 28-day test, 124 reported tiredness was definitely reduced.

Manual workers also said, "Less tired"! 208 men and women in exhausting manual jobs agreed to drink Knox Gelatine for 28 days. Included were painters, steel workers, bus drivers, farmers, many others. 145 completed the test. Of these, 137 said they were definitely *less tired!*

It all ads up to this: In 26 occupational groups, 2 out of 3 who began, and 9 out of 10 who completed the 28-day Knox test reported tiredness reduced! Most of those who said they were "less tired," noticed results at the end of 2 weeks. Whether your job is on the framework of a steel skyscraper or in an office inside it, don't these figures suggest Knox Gelatine may help give you more endurance? Try drinking Knox for at least 2 weeks.

TRY THIS YOURSELF...for 2 weeks

1. Drink 4 envelopes of Knox Gelatine *every day* for 2 weeks. Then drop to 2 a day. After 28 days, drink as needed.

2. To prepare, pour 1 envelope (¼ pkg.) Knox Gelatine into ¾ glass water or fruit juice, not iced. Let liquid absorb gelatine. Stir. Drink immediately. If it thickens, stir again. The gelatine is tasteless.

BUT BE SURE it's plain, unflavored Knox. Knox is *all* body-building protein. Ready-flavored gelatine dessert powders are ⅞ sugar, ⅛ protein. Buy from your grocer in 4-envelope or economical 32-envelope package.

SEND FOR FREE KNOX BULLETIN

telling how *you* may try reducing tiredness. Write Knox Gelatine, Dept. 70, Johnstown, N. Y.

A PROTEIN FOOD THAT FIGHTS FATIGUE

to an outbuilding where the van used for taking eggs to the railway station (they had two hundred Cochin Chinas, forty-seven Wyandottes and a hundred and three Rhode Island Reds) stood immobilized in the event of capture by the enemy.

While one Miss Fishpingle replaced the distributor, the second fumbled along a beam for the switch key, knocked it off and spent several minutes searching for it in a litter of straw and sawdust on the uneven floor.

THE last quarter mile of the lovers' journey up a hill of one in eight, and across wet plowland dedicated to roots, tried Molly's patience to the breaking point. But for the physical weakness which had compelled her to accept the support of Alan's arm, it is doubtful whether any contact would have been made between them. Rain was falling when they reached the highroad at a point a great deal farther from the town than Alan had predicted.

"You really *are!*" said Molly, who was not dressed either for a tempest or a hike. "I'm beginning to wish I'd never come."

Then, like a star gleaming through a black, hopeless night, she saw the twinkling head lamp of an approaching car.

"Courage, duckie, the rescue party is at hand," said Alan, stepped boldly into the middle of the road, flashed his torch and brought the Fishpingle van to a standstill.

The elder Miss Fishpingle, who was at the wheel, transferred her grasp to a billet of wood and, holding it in a convenient position to strike, sweetly bade the young man approach and be recognized. Meanwhile, her sister had armed herself with the fire extinguisher and was ready to quench him should occasion demand.

It was fortunate for Alan that his features were revealed by the light of the headlamp and the need for handing it out to him where the chicken got the ax no longer existed.

"Well, if it isn't you!" exclaimed Miss Fishpingle. "And we were sure you were a German."

Alan saluted gallantly.

"I wonder if you'd give myself and a young lady a lift to Tidmarsh? She's a V.A.D. and her presence is urgently required."

"It is indeed," said Miss Fishpingle, "for there has been an accident and the unfortunate victim is in the back of the van."

"That," said Alan, "is absolutely terrific, and we'll throw in a few quick ministrations en route."

He hoisted Molly over the tailboard and lightly leaped in beside her, landing by ill chance on Mr. Hughes' sprained ankle.

"Hell and haddocks' eyes!" cried Mr. Hughes, lashing out abortively with the starting handle, which he had brought with him as an instrument of vengeance.

From Molly came a horrified: "Goodness! It's Daddy!"

While Alan, paralyzed by the news and the wind created by the starting handle, was frozen to silence.

HEAVEN knows what would have happened had not the voice of Edward Vicary announced from a corner of the van that the master, while on duty, had taken "a bravish scummer off his motorbike." This announcement synchronized with an urgent demand from Mr. Hughes to know what the blazes Molly was doing at that time of night with a young man whose society was forbidden. Then it was that Alan proved that M.I.5 had not engaged his services in vain.

"Looking for you, of course, sir, what else?" he declared. "Mrs. Hughes told us you were in danger."

"I don't believe it," said Mr. Hughes, which, for him, was moderate, must be remembered that he was l and reduced.

"Believe it or not," Alan cont "but that's our story and we're s to it. What's more, you can asl Hughes whether we're speakir truth, can't he, Molly?"

Molly supposed he could, but s hoped he wouldn't.

"If she says you are," sai Hughes, "there'll be three liars i of two."

At which Alan became almos lime.

"I resist," he said, "criticizing for bringing such an allegation ag wife who has put up with his ill- for I don't know how many years. ally, how many years have you married? Not that it matters, fo urgent things are at stake. Nov have the facts. You left the house And why? You proceeded where what happened to you? I ask, b in your present condition, it's o that the duty you set out to perfor never accomplished."

Mr. Hughes was dumfounde Alan, taking the war into enemy tory, swiftly threw in his reserves.

"Speaking professionally, and pose you've noticed that I hol Majesty's commission—wait a mi he produced the torch and flashe his shoulder insignia. "See that? do? Good. Well, as I was saying failure to carry it out, whatever i have been, is liable to have mos ous consequences. So now ope divulge, and quick about it."

Mr. Hughes said: "If I was possession of my faculties I'd bo ears—both of them."

"If you did," said Alan, "I sho compelled to put you under close a thing I'm reluctant to do to a pr tive father-in-law."

Mr. Hughes said: "You'll Molly over my dead body."

"Thanks for the promise," said "Now, on with the tale."

THAT he had contrived in so s time to assume so much aut filled Molly with admiration an Hughes with dismay. In the ci stances, he had no choice but to a statement.

During its narration, Molly cl Alan's arm with increasing anxiet even when the fact was revealed was their car which had brough Hughes forth into the night, anc starting handle which had laid hi Alan's *sang-froid* never deserte

"Am I to understand," he dem "that you took this action witho viously notifying the police?"

"There was no time," saic Hughes, "but I gave Vicary instru to do so."

"Which I never," Edward adr guiltily.

"Scandalous," said Alan throu teeth. "But fortunately the chie stable is a pal of mine and I'll best to get him to overlook it. G that starting handle. From now in charge of this affair and I'm mandeering this van for the purp

"Not until it's taken me moaned Mr. Hughes, who was acl every limb.

"It isn't taking you home, it's you to the hospital. Molly will s in, fix you up with a Thompson then pop along and tell her moth erything she ought to know." H plemented this remark with sug elbow work against Molly's r reception area, then raising his so that Miss Fishpingle could cried: "To the hospital and step

tell him the truth," said Alan,
"nearly the whole truth, and nothing but that part of the truth that won't give the show away."

This project he carried out the next morning, speaking sternly from the foot of Mr. Hughes' bed in the accident ward.

"One of the gravest errors an investigator can make is to form conclusions on purely circumstantial evidence; it's liable to make him the laughingstock of the town."

"Anybody who laughs at me will very soon laugh on the other side of his face," said Mr. Hughes.

"Ah, but will they?" Alan replied, with point. "Will they? A nice fool you'd look if it went around the neighborhood that you'd dashed off into the night shouting 'Germans!' when all that had really happened was that a couple of young lovers had slipped into the woods for a bit of necking."

Mr. Hughes' jaw dropped.

"Are you telling me . . . ?"

"Yes, I *am* telling you, and I turned up just in time to restore the missing starting handle where it would do most good."

Mr. Hughes paled.

"Oh, dear! I'd be sorry if a story like that got into circulation."

"And I'd be sorry too, but blest if I know how it's to be prevented."

"Why? What do you mean?"

"That it's one of those conflicts between love and duty. Of course, if I were to marry Molly I wouldn't want everybody saying my father-in-law was a bit of an ass. On the other hand, if anything prevented me marrying Molly, I wouldn't give a hoot what they said, one way or the other."

MR. HUGHES communed with himself in silence, then said:

"A wise man should never be ashamed to admit when he's in the wrong. I was highly impressed with your conduct last night. Highly impressed. And I see no reason why you shouldn't go far."

Alan clapped a hand to his brow, reeled and gripped the iron rail at the foot of the bed.

"Why, my boy, whatever's the matter?"

"Amnesia," was the reply. "Loss of memory. Last night, you said? But I've forgotten everything about it, it's all a blank. Where am I?"

"In the accident ward of Tidmarsh Hospital," said Mr. Hughes, dryly. "But you ought to be in a lunatic asylum."

"Oh, you're paying for it now? That's funny, I always had an idea you were married"

BARBARA SHERWIND

HOW I RETIRED ON A LIFE INCOME OF $150 A MONTH

To men of 40 who want to retire in 15 years

"FIFTEEN years ago I made a discovery that changed my life. I believe it will interest you.

"At that time, I was worried about myself and my future. I seemed to be living in a circle. I used to dream of being able to relax and enjoy life, without money worries. I longed for security.

"But dreams like that seemed hopeless. I wasn't rich. I probably never would be. Like millions of others, I would simply live and work and die—spend a lifetime making ends meet.

"But that was 15 years ago. Now I have retired on a life income. I have no business worries—my security is guaranteed. I can work or play, as I like. Each month the postman hands me a check for $150 and I know that I will receive another $150 every month as long as I live.

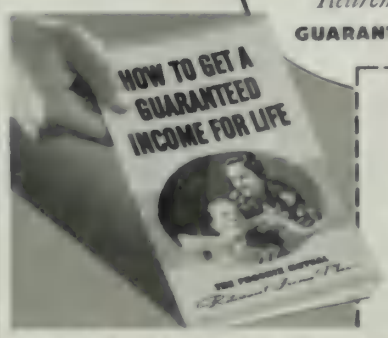
Here's What Happened

"My friends are envious. They want to know how it was possible. How, without being rich, I ever managed to retire on a life income. The answer is simple: When I was 40, I discovered the Phoenix Mutual Retirement Income Plan.

"The minute I read about this Plan I realized it was just what I needed. It showed me how to get an income for life beginning in 15 years. It showed me how to get immediate protection for my family in case I did not live until then. It even included a disability income for me if, before age 55, total disability stopped my earning power for six months or more.

"Best of all, the cost of this Plan was within reason. In fact, the Plan called for far less money than ordinary investment methods would require to get the same income.

"Today, at the comparatively early age of 55, I have the things I want—life-long security and freedom to do as I please. I can laugh at the worries that used to haunt me. With an income of $150 guaranteed me for life, I can be sure of comfort and happiness in the years ahead."



This story is typical. Wouldn't you like to make sure of your own future?

Wouldn't you like to find out, for yourself, how the Phoenix Mutual Plan works? You can get the facts, without obligation, by sending for the booklet offered below.

Send for Free Booklet

Send the coupon and you will receive, by mail and without charge, a booklet which tells about the Phoenix Mutual Plan and how to qualify for it. This booklet explains how to get a life income of $10 to $200 a month or more, starting at age 55, 60, 65 or 70. It shows how the Plan can protect you against emergencies, and how you can fit the Plan to your own needs. Don't put it off. Send the coupon for your copy *now*.

NEW YORK CENTRAL SYSTEM

The Water Level Route... You Can Sleep

Taps for the New Deal

Continued from page 17

We were lucky enough to get stalled in a traffic jam of Washington economists and, oddly enough, understood quite a little of what was said. The meeting was about equally divided into three groups—one being strictly of the lotus-eater school; the second, graph draftsmen; and the third, tax assessors.

The lotus-eaters didn't contribute much of the talk further than to ask at intervals, "What, after all, does one want of life?" The gentlemen with graphs were much more convincing. As the national income rose (via the dynamite mills and the steel foundries) so would the government's borrowing capacity. As borrowing capacity achieved new ceilings so could appropriations. And as appropriations ascended, old agencies of the New Deal could be financed and new ones created. They readily agreed that no one worth listening to had any hope of paying this rearmament out of income and that to pass it on to future generations was but meet and right inasmuch as future generations would be the beneficiaries of the freedom insurance thus purchased. After all, said the lotus-eaters at this point, "What, after all, does one want of life?"

The third group merely flung their lips and wrinkled their noses, toyed with Phi Beta Kappa keys and talked about new taxation schedules. If what they predicted comes to pass you'll be working for the government from now on.

After the federal government has taken its cut of your income it will probably have to take your family too. As for state income taxes—well, they can't do any more than send you to jail. What, after all, do you want of life? We don't know, of course, how much these tax writers knew about the plans of Mr. Roosevelt, Mr. Morgenthau and the other authors of the new tax bill that Congress will be asked to adopt, but they offered the comforting thought that the bill that will be introduced into the new Congress will be a mere temperance leaflet compared to what you'll have to pay if we're actually wangled into war.

Hopes that Died Hard

Confusing as the experience was, we did not lose sight of our objective as we listened. Out of it we gathered afresh the conviction that the New Deal had run smack into a high, windowless, doorless brick wall at the end of a dead-end street. What might have become of it in the next four years had not Mr. Hitler given us something else to think about is brisk mental exercise, although a trifle on the time-wasting side. What it might have aspired to in loving hands can be guessed at only when you have some conception of the dreams of its hand-wringing prophets.

Such plans are now but gleams in the paternal eye. But we know that efforts were to be made to extend the lavender revolution into the public-school system. Federal schools were to be established, beginning at kindergartens and ending in colleges. Details did not get to the concrete stage but the rough idea is still alive. Preschool and elementary-school classes in the liberal manner would grade children according to their leanings and aptitudes. Mass methods of education along the old conventional lines would be abandoned and the individual pupil observed and catalogued for distribution into vocational or academic schools according to their capacities and susceptibilities. History and political-science textbooks would be rewritten, the bunk eliminated and the truth told.

A Department of Education with its head in the President's Cabinet would be asked for and into this new executive branch would be given the National Youth Administration, the CCC and all other governmental youth agencies. Its advocates vigorously deny that it would incorporate ideological propaganda activities. In spirit, at least, it has the sanction and approval of many modern educators. But it was sure to be opposed by state departments of education and local school boards, to say nothing of parochial-school authorities and sectarian educators.

The seeds of the plan have already been lightly sown by the National Youth Administration, according to The American Association of School Administrators, a department of the National Education Association. However, they seem to have run into an early frost. Citing the President's request for an additional $40,000,000 for the NYA, the school administrators have broadcast letters warning their membership that "the NYA is frankly and openly embarking on a training program. This means that the federal government is committing itself to a federal system of federally controlled technical education without regard to state and local educational authorities."

However, we may as well regard this extension of the New Deal as one of the activities that will die in the ground—for the present anyway. Mr. Roosevelt has already too much to worry about. The government's old resettlement activities were to be revived, revised, enlarged and made more alluring by a bonus and maintenance policy. Where the New Deal encountered many difficulties in lifting poverty-stricken peoples out of the scenes of the into more productive surrou would now make it financia while for the clients to co-oper pay them so much monthly ur gentle tutoring and urging, the self-sustaining. The new idea limit the payments to a specifi If in the administrator's opini settled family showed signs permanently unable to support subsidies might continue in But this, too, seems doomed to age.

Labor and Aliens

Before it became pretty ce the Wagner Act would be ame fore it became apparent that tional Labor Relations Board renovated in the interests of tisanship, there was much talk the latter much more arbitra Its rulings, were the interes Dealers to have their way, nonreviewable by any court. the more vigorous of these looking men and women were ing government confiscation of that resisted the board's mand what with one thing and anc cluding the war, nothing will this.

From a New Deal cranny we able to identify, although h abiding suspicion, was to come Administration that would mak ministration of our current imm and naturalization laws eve laboriously whimsical. rtment of Propaganda?

the ideas that may be trans- law, even if we come no ctual participation in the war re now, is a Federal Press ch a suspicious agency would assured, resemble little Dr. acket, but under tough super- ight be quite a help toward news censorship and regula- ar as we know, it has got no an the mull-over stage. t would be no more than a se for all such news and overnment agencies and de- chose to release, we don't the idea seems to be one of ely few New Deal visions elessly around Washington that isn't regarded by the tes Army as plain foolish- Army, ever struggling to be nd where men are men and stories, has never sobbed its out in chorus with true New And the latter have never e Army as a fine humanitar- .

heory of "If you can't beat m," a number of the New nded social workers in the National Youth Administra- on are looking toward the aining camps with damp eyes.

As we got it, several of these ladies and gentlemen have appealed to the White House hoping that the social work in those soldier factories be made an independent government function and turned over to them. Such moral guardianship and direction would not be confined to the training camps, either. It would operate in munitions-manufacturing centers, old and new. Its eyes would be alert for the encroachments of the immorality which, legend has it, is ever the danger of congested industrial towns and always the menace of industrial boom towns. With superior intelligence too, workers would be cautioned against squandering their new high wages on champagne, silk shirts and other lovely rubbish. And, commendably enough, the virtues of thrift and rainy-day provision would be taught. If you don't think there are going to be such days, wait until this war's over and we've finished this rearmament drive.

But always these petitioners have been referred to the Rearmament Commission and the War Department. The result is always the same. The projecteers have emerged shortly and on the verge of a dead run, their faces red.

We don't know how many more New Deal extensions were smothered by the war and American rearmament but we suspect that there were quite a roomful. And there would have been more had not scores of the pure-wool minds that yearned to reorder our lives in the New Deal's adolescence been dropped from the Roosevelt rolls. But you get the idea of those that remain.

Mr. Roosevelt is about to rededicate himself. Twenty-two million people who hoped it would be Mr. Willkie this time will listen, shrug their shoulders and bid you wait and see. Twenty-seven million who voted for Mr. Roosevelt will listen with mingled feelings. Some of them voted for him because they were afraid to trust the management of our foreign affairs to an amateur. Some voted for him because they were afraid of reaction. Some voted for him because they wanted the New Deal to drive on to new social heights. And some merely because of the material benefits the New Deal had showered down upon them.

There will be large numbers of the last two classes who'll be wishing they had known on November the fifth what they're now about to learn.

Wing Talk

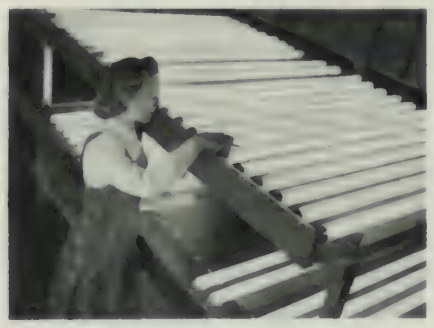
y and Marine Corps air ex- ould be cut into to do so, we in addition, to develop and organ- ds of inland waterports in erous times when every angle defense must be exploited to- ate and unassailable security. t numerical strength should d. A reserve of floats and skis half our Air Corps combat be money in the bank. Ger- n Norway used frozen lakes. where the United States is efense millions, commercial use skis much of the year; d bombers likewise. Skis n be quickly substituted for ey detract 10 to 20 per cent eed of a landplane; but that n being grounded or debased ang pinch. A further use of suggested by German prac- Baltic and North Sea coasts asoline and oil tanks deeply fficult to spot, more difficult

ts of flying boats, or adapted orts, could be held in reserve on strategic lakes, ready to shift whole armies from coast to coast overnight. Stripped planes in types now available can load 100 men each. Fifteen such planes could shift a regiment of parachute or conventional troops from Washington State to Washington, D. C., or from Chicago to New Orleans—put them down at threatened points on a dusk-to-dawn schedule. One hundred and fifty such planes—costing no more than a single Navy cruiser. $30,000,000, could transfer a whole division and all but its heaviest equipment.

Total war has a corollary—total defense. To prepare for anything less is not smart. Moreover, hundreds of thousands of private fliers are expected in the next decade as a result of the Civil Aeronautics Training Program, Army and Navy schools, and general stimulation of the war. An inland waterport system must be added to landports if pleasure fliers are to have advantages matching those provided for motorists by our highways.

And don't forget your water wings!—W. B. C.



WHAT EVERY BUSINESS MAN SHOULD KNOW

about Fluorescent Lighting!

QUESTION. ***What is fluorescent lighting?***
ANSWER. G-E Fluorescent Lighting is a brand new light source, in which the light is produced not by a filament, but through fluorescent powders, coated on the inside of long glass tubes, which convert invisible ultra-violet energy into visible light.

Q. ***What are its advantages for me?***
A. Its higher efficiency and greater coolness permit higher levels of illumination than ever before. Since people see faster, with less fatigue in better light, you should expect increased production, better sales, fewer mistakes, improved employee morale when fluorescent lighting is properly installed in your factory, office, or store.

IN THIS *"life-test"* **G-E MAZDA F** *lamps burn day and night to help assure the high standards set by G-E research.*

Q. ***Why should I insist on G-E MAZDA Fluorescent Lamps?***
A. G-E MAZDA F lamps are the latest product of General Electric Research and Development, which for 61 years have been giving America more and more light at lower and lower cost. Since G-E MAZDA F lamps were introduced in 1938, efficiency has been increased as much as 40%, prices reduced as much as 45%. Today's G-E MAZDA F lamps are made to give maximum light output for current consumed... made to *stay brighter longer!*

Q. ***What about fixtures?***
A. General Electric cooperates with many fixture manufacturers, and does not make fixtures itself. Your G-E MAZDA lamp distributor can supply styles to fit every individual need.

TESTING *the brightness of fluorescent powders used in* **G-E MAZDA F** *lamps to assure maximum light output.*

Fixtures bearing the Fleur-O-Lier or RLM tag assure maximum fixture performance because they're certified by Electrical Testing Laboratories to comply with exacting specifications. Such certification may be obtained by any fixture manufacturer whose product meets required specifications.

Q. ***What should I do now?***
A. See your G-E MAZDA lamp distributor. He can help you choose the right fixtures, and draw on all General Electric's experience to give you fluorescent lighting properly engineered to your needs, at the lowest possible cost. Your lighting company can also give you valuable advice.

G-E MAZDA F LAMPS *are recommended for use only with equipment providing good power factor, and using certified ballasts and starters, such as Fleur-O-Liers or RLM Industrial fixtures. Label shown here identifies Fleur-O-Lier fixtures, made by over 35 experienced manufacturers.*

This 'burger Business

Continued from page 22

The boom in 'burger sales cleaned the larder. Mr. Sternberger laid in a larger supply of steer meat, process cheese and buns. Business grew by leaps. Customers flocked from all over the Los Angeles area to try the cheeseburgers. Time after time he enlarged the Rite Spot until it grew into a neon monster, with eighty assistants hustling 'burgers to the hungry customers at dinnertime. In the eight years before he sold out to a big "drive-in" restaurant chain for $165,000 cash, Mr. Sternberger figures he made and sold over ten million.

"You learn something making that many cheeseburgers," explained Mr. Sternberger, who doesn't mind imitators but who flinches when a competitor turns out a poor imitation. "You have to make them just right."

One trick, he says, is to use only prime steer meat, ground just before it is used, because air gets to ready-ground hamburger patties, even in the refrigerator, turning the meat dark and giving it a dark taste, too. Another is to use process American cheese and slice it just the thickness of a quarter. Some of Mr. Sternberger's competitors tried thicker slices of cheese, and some heated the cheese before they inserted it into the sandwich. That, says Mr. Sternberger, ruins the cheeseburger. There's only one right way to slice the cheese. That's the thickness of a quarter. Stick to two-bit thickness, he says, and you'll never go wrong. Plop your cheese on the lower slice of your hot toasted bun, slap your sizzling hamburger pattie on top, then lettuce, relish and the other half of the bun, and slip the whole works into an oiled-paper bag.

Psychology on a Roll

Of course, one great invention always inspires another great invention, and Mr. Sternberger's success with the cheeseburger sparked many a mind to experiment with improvements upon the humble hamburger. Soon there were so many 'burgers in southern California alone that 'burger-minded motorists could have a different one for lunch every day for almost a month on end, without repeating. In the Los Angeles area, drive-in 'burger palaces sprang up so fast that a recent count showed 123 of them ablaze in neon, counting only the superpalaces with magnificent marquees overhanging the customers' automobiles and staffed by the snappy little car-hops dolled up like drum majorettes, Dutch girls, usherettes, drummer boys or what will you. Many of them take in $10,000 to $20,000 a month for the bright minds that were able to think up just the right new 'burger to tickle the fickle public fancy.

Take Jimmy Shaver and his nut-burger, for instance. Mr. Shaver is a genial soul who runs the Colonial Drive-In out on the Sunset Strip, just outside Hollywood, and he has some very definite ideas about the business. In the first place, eighty per cent of his customers are women, which is one reason why all his "car-hops" are men. "Women like to be served by men," said Mr. Shaver. The other reason he uses men is that the cuties in tight gay uniforms attract too many gents who drive in, order a couple of bottles of beer and drink slowly while they try to date up the girls. "That ties up your parking space," explained Mr. Shaver.

While he is broiling prime ground steer beef, Mr. Shaver toasts his whole-wheat bun, fries his onions (unless customers prefer them raw-chopped) and has the ground nuts handy. These include peanuts, cashews, pecans, almonds ground together fine. The layer of nuts goes into the sandwich, next to the hot hamburger, which heats the nuts. Mr. Shaver's gray hair is partly due to nut-burger troubles in the old days when his chefs used to fry the nuts in the meat, scorching them and imparting a burned taste. Now the hamburger does the heating job, the sprinkling of nuts nestling in the mayonnaise between the hot meat and the lettuce, with onions and relish on the other side.

There's a lot of psychology in the 'burger game, we gathered, especially from a talk with J. E. Lardemer, the boss man of Simon's, which is pushing the twinburger to new heights. Mr. Lardemer is a former Viennese with a bent for fundamentals. Once he journeyed all the way to Hamburg, Germany, to see how hamburg steaks were served in their native habitat. This was something of an eyeopener, too. On the Hamburg water front, where Mr. Lardemer nonchalantly ordered his first hamburg steak, the butcher sliced off a slab of raw beef, laid it on a chopping block, drummed on it gently but diligently with the blades of two sharp butcher knives, one in each hand. Then he turned the steak, and repeated the chopping. Satisfied at last, he slapped the meat raw on a slice of rye bread, seasoned it with salt, pepper and mustard, capped it with another slice of rye, and handed it to his astonished customer.

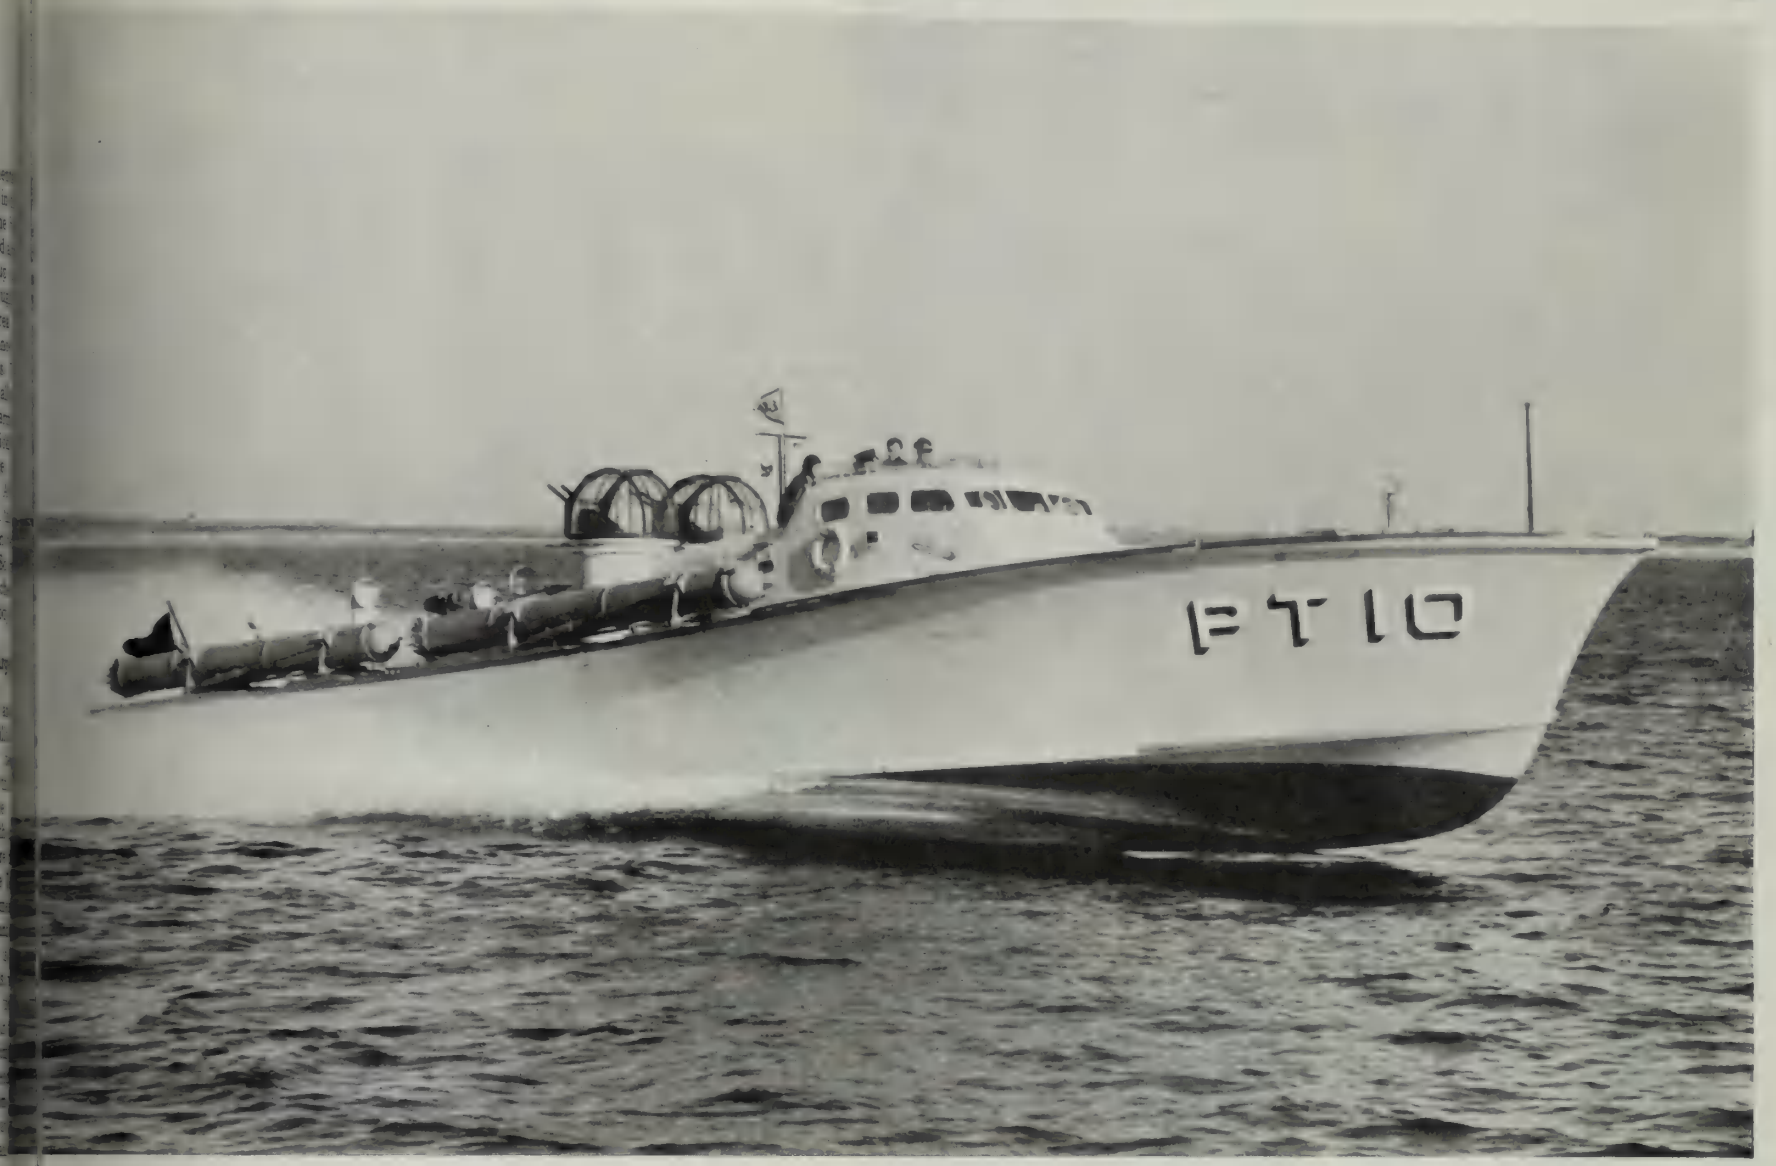
"The funny part of it was that it was good," recalled Mr. Lardemer. "I guess the mustard cooked the meat in my stomach."

The twinburger, in which Mr. Lardemer specializes, is cooked like a regular hamburger, except that the patty is cut in two, and served in two small toasted sesame seed rolls, with a choice of garnishes, such as chopped onions, cucumber, tomato or pickle relishes in tiny cups, so that the customer seasons her own, the twinburger being a favorite with the women.

"They're always thinking about reducing," explained Mr. Lardemer. "Give a woman a full-sized hamburger and she worries about eating it so much she doesn't enjoy it. Give her two small ones, and she eats them without worrying about it."

It takes only a fundamental this to put a new 'burger in the dollar class. There's some bas ing, we discovered, behind alm 'burger that's on the up an 'Burgerville, which is, roughly Angeles metropolitan area. chickenburger, for instance, tured by several drive-ins. The chickenburgers were actually m chopped chicken, kept warm in sauce, and spread thickly toasted buns, with lettuce, oliv onnaise or a mild relish. A pre sandwich it was, too, but the c eyed them with suspicion beca were so mild in taste. So mo chickenburger artists switched tc turkey, and now everybody's h

Let 'Em Eat 'Burgers



Busy as the fertile and i minds of the southern Californi been, the Texans have been them a close second in the or of novel 'burgers. The roy which is a hamburger with an e into the patty just before it is hails from down on the Texa and it is a right smart meal, t porkburger, in which ground por instead of steer meat, is cre "Doc" Jackson of Dallas, origi the Pigstands, probably the fu of drive-in restaurants in the

A lot of serious thinking, we ered, is going into the designin 'burgers. Two with some go chology behind them are th modeled squareburger and the size jumbo huskiburger. The other monster known as the ov hamburger, which includes, in to the ground steer meat, a c slices of tomato, a generous he pickle and a lot of lettuce. In salad bowl in a bun. Some of t new 'burgers, still in the designi stage, so to speak, are the tun the deviled-eggburger, the oyst (with coleslaw), the Dutc (melted cheese and ham), clam and crabburgers—the latter is fi in a bun, not half bad, w add. Another in the make is t cakeburger, hamburger betwe pancakes, preferably corn-mea Business is booming.

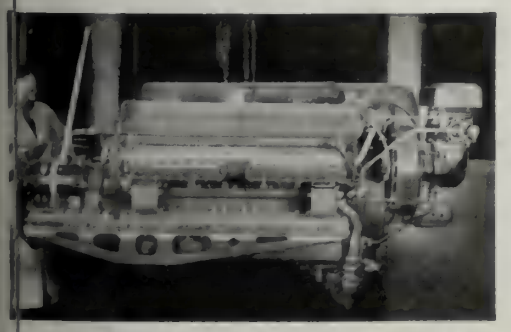
Packard powers the Water Wasps!

WITH UNCLE SAM'S newest sea-going weapon—the patrol torpedo fleet—came new problems in power, new demands for rugged speedability.

This is the kind of assignment Packard *likes* to tackle—a challenge to the engineering skill gone up in 40-odd years of building engines of almost every description—air, marine, car and tank. Packard is proud of the part it is once again playing in the national service, for Packard is powering the "water wasps".



Heart and soul of the high-speed Elco fighting craft pictured above, of course, are the motors. The three motors in this *PT-10* torpedo boat churn up 1350 horsepower each—*4050 in all!* Hundreds of these super-marine engines are needed for this new development, and Packard is already fulfilling the trust that such a vital assignment indicates.

History repeats itself

Nor is this all. Packard also has been chosen to build the battle-tested aviation motors which power the famous Hurricane and Spitfire fighters. Already, Packard production experts are swiftly laying the groundwork for building thousands of these great power plants. Thus history repeats itself. For in the last war, Packard was co-designer and largest builder of that other history-making aviation motor—the Liberty.

These tributes to Packard's reputation as a maker of fine motors are important to the man who wants the utmost for his money in a car. For, admire as you will Packard's smart new styling and luxurious interiors, the power plant still remains the all-important heart of the car . . . a heart upon which its life span, and your motoring pleasure, depends.

SISTERS UNDER THE SKIN!

Heart of the Water Wasps—incorporating the latest in science and metallurgy, this 1350 horsepower Packard engine is the newest ultra-modern type of 60-degree V-12 liquid-cooled, super-charged design.

Heart of your Packard—one of the most dependable motors of all time. Despite its size, power, and fiery performance, its all-around thriftiness compares favorably with small "economy" cars, owners say.

Packard

ASK THE MAN WHO OWNS ONE

Men with a Past

CASANOVA CARL. Wonders ▶ why girls pass him by. His hair is a bowl, plastered with sticky, smelly messes that girls can't stand. Kreml greaselessly grooms hair, removes dandruff scales.

◀ SAMSON SETH. Water-soaks his hair when combing it. His tresses always look as if they need trimming. Water removes natural oils, leaves hair dry, unruly. Kreml controls hair, relieves dryness.

BEAU BALDY. Lives a lurid ro ▶ mantic life in his imagination —and no place else. Originally a Casanova or a Samson or both. Too bad. Beau, Kreml and proper care could've helped you keep your hair.

◀ MAN WITH A FUTURE. Uses his head in more ways than one. Kreml keeps his hair looking *naturally* well-groomed. Beneficial oils in Kreml, the greaseless tonic-dressing, keep your hair lustrous, soft.

GET that well-groomed look without getting your hair wet or greasy. Kreml—every day—solves your problem.

And notice how Kreml helps your hair by removing dandruff scales, relieving itchy scalp. And Kreml checks excessive falling hair.

Women won't let men monopolize the benefits of Kreml. It keeps coiffures more manageable, especially after permanents.

Next time you ask for Kreml Hair Tonic at your drugstore and barber shop—ask for Kreml Shampoo, too. It is made from an 80% olive oil base—leaves your scalp tingling clean, your hair with a soft sheen.

REMOVES DANDRUFF SCALES — CHECKS EXCESSIVE FALLING HAIR

NOT GREASY—MAKES THE HAIR BEHAVE

Clouting Cossack

Continued from page 14

later. Frank Shellenback, the manager, signed him but Frank Lane, the owner, unsigned him rapidly, giving his opinion of brains in no uncertain terms.

Lou went back to softball, at which he was earning as much as $70 a game, an enormous sum in softball. He was content there but Rodgers wasn't. Joe sent him up to the Los Angeles tryout school next spring.

Truck Hannah, the Los Angeles manager, lent him his bat, a ponderous piece of ash so heavy that bat boys became invalids merely from dragging the thing back from the plate. Lou took that burden, picked a wild pitch off his ear and hit it a mile over the fence.

Los Angeles signed him and sent him to their farm at Ponca City, Oklahoma, where he hit .361 and led the league. Lou kept his pal, Joe, posted on his progress by air mail.

His first letter came soon after his arrival. He wrote:

"Well, Joe their trowing curves now and am I slaughtering them they can't fool the Mad Russian."

Next year he was with Moline, Illinois where he hit .367 and led the league again. His fielding had begun to improve and he had a great arm. When he came back to Los Angeles he thought he was going to stick, but they sent him up to Milwaukee on a hurry call. He was unhappy about that and still more depressed when Milwaukee took one look at his wild swings at the plate and asked permission to get him out of Wisconsin before he maimed somebody. When Los Angeles also showed some slight disdain for his worth and said Tulsa would be next step, Lou called up Joe Rodgers, who was managing the softball team at Long Beach, and announced his imminent return to his first love. Joe hustled up to see him.

"They gave me the run-around at Milwaukee," reported Lou, and now this Carl Dittmar, the coach, who never hit more than .230 in his life, is trying to tell me how to hit. I'm quittin'."

Joe gave him a sharp lecture, said he wouldn't give him a job at Long Beach if he came begging, and Lou went dutifully off to Tulsa and proceeded to massacre Texas League pitching. When Los Angeles got wabbling around feebly late in the season, they brought Lou back and he burned up the league.

Throw It and Duck

Up in Seattle one night Lou hit a curve over the fence, slammed a slow ball up against the fence and doubled off a fast ball. When he came up next time the Seattle pitcher yelled in to Jack Lelivelt, the manager, for advice.

"Toss it up there underhanded and throw yourself flat on your face," Lelivelt yelled back.

Lou was hitting the ball with such fury that Coscarart (brother of the Brooklyn player) pulled his hand away from a line drive one night, lest his arm be removed at the elbow. A drive through the box came so close to dismembering Ed Selway that observers swear Ed walked around for two days with his face a beautiful shade of bright green.

Last summer Lou was still clouting the ball with abandon, finishing the season with a percentage of .363 and causing discussion wherever he went. Old-timers claim he is the greatest right-handed hitter to come along in years, belonging in the great tradition of Al Simmons and Joe Medwick, which is to say, gentlemen who didn't care where the ball was so long as they could see it.

mother, the old nigger, in my car and you and me in yours. Miss Worsham and the old woman will take him back home, back where he was born. Or where the old woman raised him. Or where she tried to. And the hearse out there will be fifteen more, not counting flowers—"

"Flowers?"

"Flowers," Stevens said. "Call the whole thing two hundred and twenty-five. And it will probably be mostly you and me. All right?"

"All right," the editor said. "By Jupiter," he added, "even if I could help myself, the novelty will be almost worth it. It will be the first time in my life I ever paid money for copy I had already promised beforehand I will not print."

"Have already promised beforehand you will not print," Stevens said. And during the rest of that hot and now windless afternoon, while officials from the city hall and justices of the peace and bailiffs came fifteen and twenty miles from the ends of the county, mounted the stairs and stood in his empty office and called his name and then sat and waited and went away and returned and sat again, fuming, Stevens passed from store to store and office to office about the square—merchant and clerk, proprietor and employee, doctor and dentist and lawyer—with his set and rapid speech: "It's to bring a dead nigger home. It's for Miss Worsham. Never mind about a paper to sign: just give me a dollar. Or a half a dollar then."

AND that night after supper he walked through the breathless and star-filled darkness to Miss Worsham's house on the edge of town and knocked on the paintless door. Hamp Worsham admitted him—an old man, belly-bloated from the vegetables on which he and his wife and Miss Worsham all three mostly lived, with a fringe of white hair and the face of a Roman senator and the blurred pupilless eyes of the old.

"She expecting you," he said. "She say to kindly step up to the chamber."

"Is that where Aunt Mollie is?" Stevens said.

"We all dar," Worsham said.

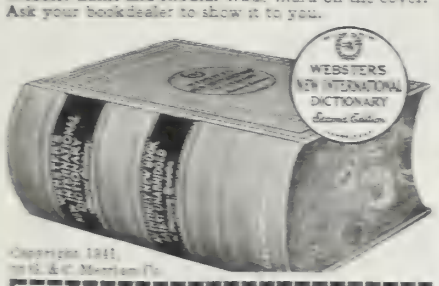
So Stevens crossed the lamplit hall (the entire house was still lighted by oil lamps and there was no running water in it) and preceded the Negro up the clean, paintless stairs beside the

"N son simply detests parties but he tries to be a good sport about it!"

Enchant

came from the witch's song

TO be *enchanted*, in the usual modern sense, is to be highly delighted or charmed—something very different from the original meaning. The word is ultimately descended from the Latin *cantare*, "to sing"; more immediately from its derivative *incantare*, "to chant or utter a magic formula over or against one," "to bewitch." This became Old French *enchanter*, which English borrowed as *enchant*. The first English meaning was still close to the original: "to act on by charms or sorcery." Today *enchant* is used figuratively to mean "to enrapture," as with music, beauty, or the like.



Bewitch is another word that has largely lost its original suggestion of evil sorcery; now it commonly means "to fascinate with something delightful." So, too, with the word *charm*, which goes back to the Latin *carmen*, "a song" or "an incantation."

These are but a few of the thousands of interesting word origins given in "the Supreme Authority"—

WEBSTER'S NEW INTERNATIONAL DICTIONARY, Second Edition

the Genuine Webster

Word origins are a famous feature of the Merriam-Webster. This great reference book goes far beyond ordinary conceptions of a dictionary. Its wealth of general information would fill a 15-volume encyclopedia. It contains 600,000 entries—122,000 more entries than any other dictionary. 12,000 terms illustrated; 3,350 pages. *WARNING:* The only genuine Webster is the MERRIAM-Webster. Don't be duped by so-called "Webster" dictionaries offered at fictitious "bargain" prices. Look for the Merriam-Webster name and circular trade-mark on the cover. Ask your bookdealer to show it to you.

faded wallpaper, and followed the old Negro up the hall and into the clean, spare bedroom with its unmistakable faint odor of old maidens. They were all there, as Worsham had said—his wife, a tremendous woman in a bright turban leaning in the door. Miss Worsham erect again on a hard chair, the old Negress sitting in the one rocking chair beside the hearth on which even tonight a few ashes smoldered faintly.

She had a reed-stemmed clay pipe in her hand, but she was not smoking it, the ash dead and white in the stained bowl; and actually looking at her for the first time, Stevens thought: "Good Lord, she's not as big as a ten-year-old child." Then he sat too, so that the four of them—himself, Miss Worsham, the old Negress and her brother—made a circle about the brick hearth on which the ancient symbol of physical coherence smoldered.

"He'll be home the day after tomorrow, Aunt Molly," he said. The old Negress didn't even look at him; she never had looked at him.

"He dead," she said. "Pharaoh got him."

"Oh, yes, Lord," Worsham said. "Pharaoh got him."

"Done sold my Benjamin," the old Negress said. "Sold him in Egypt." She began to sway faintly back and forth in the chair.

"Oh, yes, Lord," Worsham said.

"Hush," Miss Worsham said. "Hush, Hamp."

"I telephoned to Mr. Edmonds," Stevens said. "He will have everything ready when you get there."

"Roth Edmonds sold him," the old Negress said. She swayed back and forth in the chair. "Sold my Benjamin."

"Hush," Miss Worsham said. "Hush, Mollie. Hush now."

"No," Stevens said. "No he didn't, Aunt Mollie. It wasn't Mr. Edmonds. Mr. Edmonds didn't—" ("But she certainly won't hear me," he thought. She was not even looking at him, never had looked at him.)

"Sold my Benjamin," she said. "Sold him in Egypt."

"Sold him in Egypt," Worsham said.

"Roth Edmonds sold my Benjamin."

"Sold him to Pharaoh."

"Sold him to Pharaoh and now he dead."

"I'd better go," Stevens said. He rose quickly. Miss Worsham rose too, but he did not wait for her to precede him—he went down the hall, fast. "Soon I will be outside, then there will be air, space, breath," he thought. He could hear her behind him—the crisp, almost brisk yet unhurried feet, and beyond the feet, the voices:

"Sold my Benjamin. Sold him in Egypt."

"Sold him in Egypt. Oh, yes, Lord."

HE DESCENDED the stairs, almost running. It was not far now: now he could smell it, feel it—the breathless and simple dark, and now he could manner himself to pause and wait, turning at the door, watching Miss Worsham as she approached—the high, white, erect, old-time head approaching through the old-time lamplight beyond which he could now hear the third voice, which would be that of Worsham's wife—a true, constant soprano that ran without words beneath the strophe and antistrophe of the brother and sister:

"Sold him in Egypt and now he dead."

"O, yes, Lord. Sold him in Egypt."

"Sold him in Egypt."

"And now he dead."

"Sold him to Pharaoh."

"And now he dead."

"I'm sorry," Stevens said. "I ask you to forgive me. I should have known. I shouldn't have come."

"It's all right," Miss Worsham said. "It's our grief."

And on the next bright, hot day but one the hearse and the two cars were waiting when the southbound train came in. There were more than a dozen cars waiting, but it was not until the train came that Stevens and the editor began to notice the number of Negroes and whites both. Then, with the idle white men and youths and small boys and probably half a hundred Negroes, men and women too, watching quietly, the Negro undertaker's men lifted the gray-and-silver casket from the train and carried it to the hearse and snatched the wreaths and floral symbols of mortality briskly and efficiently out and slid the casket in and replaced the flowers and clapped to the door.

THEN, with Miss Worsham and the old Negress in Stevens' car with the driver he had hired and himself and the editor in the editor's car, they followed the hearse as it swung into the long hill up from the station, going fast in a whining lower gear until it reached the crest, going pretty fast still though quiet now, purring, until it slowed into the square, crossing the square, circling the Confederate monument and the courthouse while the merchants and clerks and professional men who had given Stevens the dollars and half dollars two days ago, and the ones who had not, watched quietly from doors and upstairs windows, swinging then into the street which at the edge of town would become the country road leading to the destination seventeen miles away, already picking up speed again and followed by the two cars containing the four people—the highheaded, erect lady, the old Negress, the designated paladin of justice and truth, the Ph.D. from Heidelberg—in formal component complement to the Negro murderer's catafalque, the slain wolf.

When they reached the edge of town, the hearse was going quite fast. Now they flashed past the metal sign which said in reverse, Jefferson, Corporate Limit, and the street vanished, slanting away into another long hill, becoming gravel. Stevens leaned forward and cut the switch, so that the editor's car coasted, slowing as he began to brake it, the hearse and the other car drawing rapidly away now as if in flight, the light and unrained summer dust spurting from beneath the fleeing wheels; soon they were gone. The editor turned his car clumsily, grinding the gears, sawing and filling until he was back in the road facing town again. Then he sat for a moment, his foot on the clutch.

"Do you know what she asked me this morning, back there at the station?" he said. "She said, 'Is you gonter put hit in de paper?' "

"What?" Stevens said.

"That's what I said," the editor said. "And she said it again: 'Is you gonter put hit in de paper? I wants hit all in de paper. All of hit.' And I wanted to say, 'If I should happen to know how he really died, do you want that in too?' And, by Jupiter, if I had said that and if she had known what we know even, I believe she would have said yes. But I didn't say it. I just said, 'Why, you couldn't read it, Aunty.' And she said, 'Miss Belle will show me whar to look and I kin look at hit. You put hit in de paper. All of hit.' "

"Oh," Stevens said. ("Yes," he thought. "It doesn't matter to her now. Since it had to be and she couldn't stop it, and now that it's all over and done and finished, she doesn't care how he died. She wanted him home, but she wanted him to come home right. She wanted that casket for him and those flowers and the hearse and she wanted to ride through town behind it in a car.") "Come on," he said. "Let's get back to town. I haven't seen my desk in two days."

n't. I can't imagine why anyd want to do it. She wasn't f woman such a thing could ."

it's you they wanted to get h. You had any trouble with fired somebody?"

who would do that."

ow if she went out sometimes men?"

that she didn't. You can put ut of your head."

ey," I said, when we had left, noted these circumstances? d his wife have been married ny years. He's made a comnount of money. Mrs. Gosis startlingly beautiful. She's on's niece, you understand, lation to Gosson. With a girl n his home, maybe Gosson get rid of his wife. He wears ize hat."

heard people say Gosson's in he niece, but everybody says o to the ball."

EY went back to headquarHe was still there next day.

ase!" he remarked. "The ions we ask, the less answers uess we won't solve it. Mrs. cked off about three in the lt was a late party because restaurant people work at got stabbed in the back. Cops mes of about four hundred t was there when the killing ut other people had been coming and going away again all night, and we don't know who they was unless someone remembers 'em. We ain't got the knife. The guy that done the murder didn't know she'd be there, because, if what the niece says is true, till midnight she didn't know it herself. A guy that planned murder would figure not to leave his hat, but if he didn't plan murder why would he go there with a knife?"

"You're not sure it's his hat."

"Well, we got nothing else. Cops took the hat around to see if anybody remembered selling it. It was bought at a chain store and there's a lot of them stores. They'd sold thousands of that same kind of hat. Of course no clerk could remember."

He had a police plan of the hall. We studied it. It showed a huge room with a stage at one end. Entrance stairs led to the checkroom and a hall, and the hall continued along one side to make a narrow barroom, and other stairs led to the basement; in the rear, stairs and dumb-waiters went to a downstairs kitchen.

Mrs. Gosson had been killed in the big hall and close to the door which led to the basement stairs.

"See here, O'Malley!" I exclaimed, "this murderer didn't have to go to the ball, if he knew the place. On the night of the ball the basement door undoubtedly would be unfastened. He could come in that way, go up the stairs, stab Mrs. Gosson and run down the stairs again."

"Gosh, we've sure broken the record from Omaha—if we only had a witness to prove it!" JOE EASLEY

"We seen that. But how did he know Mrs. Gosson was there?"

"Gosson is the one most likely to have known. She may have phoned him she was going. I advise you to check his alibi."

For several days I didn't see O'Malley. Then we met on the street. He had on a new hat. It was exactly like the hat I had seen at the laboratory. He was going to lunch. We lunched at one of Gosson's restaurants. Gosson wasn't there.

"Have you checked Gosson's alibi?" I asked.

"Sure. His and a lot of others. Some of the people who work for him was there when his wife got knocked off, and some others had been there and had went away. Gosson claims to have been at his restaurants, but there don't nobody feel sure they seen him after about two o'clock."

"Then he has no alibi. If he's in love with the niece that shows motive, and if nobody saw him that shows opportunity; motive and opportunity are all you have to prove."

THEN Gosson came in and stopped to speak with us. "Come into the office," he invited.

We went. This was the original Gosson restaurant and from the small office at the rear Gosson managed his affairs. The manager Bennen was there. We hung up our hats and coats and made ourselves comfortable. A tray was filled with the stubs of cigarettes.

"Have a cigarette," O'Malley offered Gosson.

Gosson didn't smoke. I took one and Bennen took one and we lighted up. I watched Gosson intently.

"What have you learned?" he asked casually.

We discussed the case. I was surprised O'Malley told so much. He said the police believed the man had come out through the basement.

"There's your man, O'Malley," I declared, when we had got outside.

"How come?"

"I guess you weren't watching Gosson. He's far too anxious to know what the police are doing, and he's nervous because he feels that you are getting close to him."

"You got it all solved."

I looked in the morning paper to see if Gosson had been arrested. He hadn't. O'Malley phoned me that night.

"You feel like going over to the precinct station house?" he asked.

I WENT to the station house. Gosson was there and O'Malley, and some detectives and other cops, and some people whom I recognized as Gosson's employees and others I had never seen before. We sat in the squadroom and talked and nothing happened. Then suddenly the lights in the squadroom and the hall and some other rooms went out.

"A fuse blew," one of the cops asserted, importantly.

He went to get it fixed, and we waited in darkness, and some other people came in but in the dark I couldn't see who.

"Have a cigarette," O'Malley offered, but he wasn't speaking to me.

Somebody scratched a match and lighted a cigarette and I saw by the light of the match that the man was Bennen.

Then a man's voice said: "That's him. I couldn't forget that face!" And a woman's voice said: "That's the man! He came out of the basement door and

he stopped in the dark and lit a cigarette, and I saw his face, and there was blood on him, and he didn't have any hat."

Then the lights went on, and Bennen stood palely staring around at us.

"All right," he said finally. "It was me."

"I don't get it, O'Malley," I said, a half-hour later.

"Yeah? What? You heard the guy confess."

"I heard him admit he killed Mrs. Gosson, but I don't know why, because then you took him away."

"Sure, he give us all that in his statement. This Bennen had been crazy about Mrs. Gosson for a long time. He seen her often because Gosson's office was in back of the restaurant Bennen managed, but she wouldn't pay any attention to him. She never said anything to Gosson or nobody else about Bennen, because I guess she figured a thing like that was likely to happen when a woman's in business. Bennen was the one that started that story about Gosson being in love with his niece, because he hoped maybe she would get jealous and that would give him a chance with her; but when Mrs. Gosson heard the story she didn't believe it."

"APPARENTLY nobody else did, either," I remarked.

"Well, you did. Bennen didn't have to work the night of the ball and he went there. He wasn't expecting to see Mrs. Gosson there, but she come there, and he asked her to dance but she wouldn't do it, and she wouldn't pay any attention to him. A guy that's as much in love with some woman as this Bennen was with her is likely to go nuts if the woman won't have nothing to do with him."

"But," I objected, "Bennen had an alibi."

"Sure. He said he left the ball about one A. M. and that looked to be true because nobody had seen him there after that. What the guy done was go down and sit in the basement. He says he sat there in the dark for two hours, smoking cigarettes and throwing the butts in the furnace, which was why we didn't find 'em, and thinking how when the ball was over Mrs. Gosson would be going back to Gosson. Finally he couldn't stand thinking about it no more. One time when he lit a match, he seen a box of tools and a knife was among 'em; so he took the knife and went up the basement stairs. He had the knife under his coat and was starting to go into the ballroom, but then he seen Mrs. Gosson talking to some people close by the door at the top of the stairs.

"When Mrs. Gosson left them people, she walked past the door and he stepped out and stabbed her and then run back down the stairs. It happened no one was looking till Mrs. Gosson screamed, and by then she'd run a few steps from the door. So then Bennen put the knife in his pocket and come out on the street through the basement door."

"And foolishly," I remarked, "stopped to light a cigarette."

"SAY! Don't be dumb. This case was this way: Cops that questioned everybody found no one suspicious, because the killer had got away; but them people couldn't remember nobody else that had been there at the time. The knife in the toolbox didn't belong there, but come from the kitchen, and they weren't using the kitchen that night and everything in it was locked up, and we couldn't learn if some knife was missing or not. We had only one thing to go by."

"The hat?"

"Right. If it belonged to the killer, them stores had sold so many of that kind of hat that it couldn't be traced. Still, I figured we maybe could make use of the hat."

"How?" I asked.

"Well, what would a guy do that had done a murder and left his hat behind?"

I didn't know.

"Say, boy! He'd buy a new one exactly like it, so no one could notice that he didn't have it."

"Of course."

"With all them stores selling all them hats, we couldn't trace out who might have bought one. We couldn't connect Mrs. Gosson with no man; so I figured it must be some man that seen her in one of them restaurants. It might be an employee or it might be a customer, because some others than restaurant people had went to that ball."

"I see."

"Sure. The hat was my size, so I bought me a few like it. Then I watched the employees when they come to work, to find out what kind of hats they had on, and I ate in them places and looked at the hats of the customers. If the guy was a customer, he probably wouldn't stop eating where he usually did, because he'd think that would be suspicious. The laboratory said the guy used a hair restorer, so I figured he might be a little bald. I didn't find no employee at first that wore that kind of hat; I found some customers. When I found one, I hung my hat up beside his, and if his hat was the right size, I took it when I went out, like it was by mistake. No guy could very well kick when I left him a brand-new hat just like his own. Then I sent his hat to the laboratory, and a plain-clothes cop that I had outside followed the guy and found out who he was."

"Smart business!"

"Well, it looked like it wasn't going to get me nothing. Till today I hadn't got around to that restaurant Bennen managed. Then Gosson asked us back in his office. Bennen's hat wa there and it was just like Bennen's a little bald. So I hat beside his and took his went out, and the laborator used that hair restorer."

"You had him!" I said.

"Yeah? How? You can't guy because he leaves his when he goes to a ball. If he figured he got out through ment, and I found Bennen suit that he hadn't worn sinc so it maybe had blood on it got rid of the suit, and we he'd thrown the knife down a we had to get proof out of Be self."

"WAIT a minute!" I said. " there weren't any witne

"Say, you're waking up! a lot of cigarette butts in a t office, and only Gosson an used the office, and Goss smoke. So Bennen must sm time he had a chance. A smokes like that lights a cig of times without realizing he' I figured Bennen was excited ous after the murder, and he be able to remember if he cigarette when he come out of ment or not."

"I see."

"Sure. We took him in th we'd had the lights put out and know who was there, and I two phony witnesses there they'd seen him. I offered hi rette and he was glad to get he lighted it, he heard two peo they'd seen him leave the after the murder."

"It broke him," I said triu

"Yeah; and if the departme me pay for all them hats, I'm be broke myself."

est pot hopped in and in a mo-
ment the Mohawk was flirting with clouds. A half-hour later he landed her.

"What can she do?" he smiled. "She can do everything that a Hurricane can do. She's a lovely airplane. I took her to 16,000 feet and found three Spitfires up there. I had a grand dogfight with them. Found I could dodge them nicely. I've flown fifty-four types of aircraft as a test pilot and this is the friendliest airplane I ever flew. It isn't as fast as a Spitfire, but what is? She's the most maneuverable aircraft I have handled."

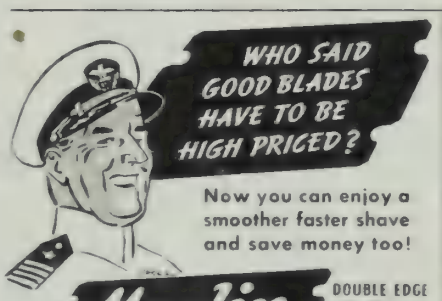
The Mohawk had a great success in France. It was the only French air fighter that could cope with the Messerschmitt. I saw Mohawk squadrons in France that had bagged dozens of Germans. The French pilots liked the Mohawks, which are just going into combat here in England. There is no doubt that the English pilots will like them, too.

The Fighter's Choice

Then there is the Curtiss P-40, which will soon be as well known in England as the Spitfire. It is known as the Tomahawk. It is a pretty lass somewhat on the lines of the Spitfire. It has a long nose and it is a sleek, imperious-looking creature. The Tomahawk has the liquid-cooled Allison motor. It is no secret among members of the aircraft industry that there were several "bugs" in the Allison. One by one they have been eliminated. Today the Allison ranks with the Merlin, which has always been considered the best liquid-cooled motor in the world. The success of the Spitfires and Hurricanes proves that point.

I watched a test pilot put a new Tomahawk through its paces. He did something I've never seen done with a Hurricane or a Spitfire—he climbed the Tomahawk almost vertically.

"How do I like it?" the pilot exploded when he had landed. "How could anyone fail to like it? It's a grand airplane. I've flown all of the fighter aircraft and in combat I'd rather have this than any. It is more maneuverable than a Spitfire. It isn't quite as fast as a Spitfire but what is?"



I visited the Eagle squadron, which was using the Brewster Buffalo. The Brewster is lightly powered with its 890-horsepower motor. This is a midwing fighter, a maneuverable plane that has everything in the world but power. It was designed especially for taking off from aircraft carriers. It has no equal in the fleet air arm. The Brewster makes up for its lack of speed by carrying more fuel than any of the other fighters. It is excellent for the Channel patrol. It is so maneuverable that a German has to get in very close before he can get a good shot at it.

The Glenn Martin bomber is another American aircraft that has won its wings with distinction. It is not permitted to say just where each type of aircraft is in action. Beaverbrook showed me a cryptic cable he had received from a squadron-leader friend of his. The cable merely read, "Mr. Martin doing very nicely here. Did some boxing yesterday and won by KO."

American aircraft good only for training? England wishes she had five times as many as she has.

Fresh from the flying fields of England came this report of American planes in action. In forthcoming issues Collier's will give you firsthand and comprehensive reports from the flying fields and factories of America in articles by W. B. Courtney.

Invest in Success

A FINE position, a beautiful home, motor cars, travel—sweet are the fruits of success. But how can I get them?—you eagerly ask. *By attaining, day by day, the knowledge that will unleash the latent power within you and bring you success without years of waiting.*

15 MINUTES A DAY WORKS WONDERS

Thousands of men and women have paved the way to advancement by spending 15 minutes a day with Dr. Charles W. Eliot's famous Five-Foot Shelf of Books (*The Harvard Classics*).

FASCINATING BOOK—FREE

A most interesting book, "Fifteen Minutes a Day," outlines this practical plan . . . tells about Dr. Eliot's fascinating Reading Courses . . . and how you may have this priceless library for little more than the average person spends for newspapers.

DR. ELIOT'S FIVE-FOOT SHELF OF BOOKS

(THE HARVARD CLASSICS)

THIS COUPON ENTITLES YOU TO FREE BOOKLET

NEW!

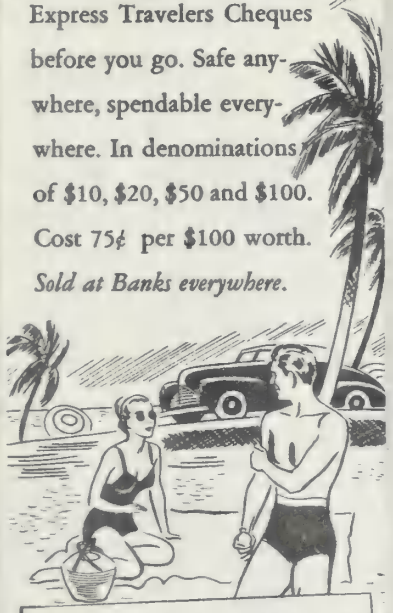
VICKS INHALER

Quick Way to Greater Breathing Comfort

READY WITH ITS RELIEF ANY TIME—ANY PLACE

When your nose gets stuffed up from a cold, from dust or bad air—you'll certainly welcome this new Inhaler perfected by the makers of Vicks VapoRub.

Because it's packed with effective medication that makes the nose feel clearer in seconds! And what's most important—you can use it just as often as needed.



Now to enjoy greater breathing comfort at work or play make this new Vicks Inhaler your day-long companion. Being about as small as your little finger it's easy to carry in pocket or purse.

By Makers of Vicks VapoRub

LOST OR STOLEN FUNDS WILL RUIN YOUR WINTER TRIP

Secure protection by changing your money into American Express Travelers Cheques before you go. Safe anywhere, spendable everywhere. In denominations of $10, $20, $50 and $100. Cost 75¢ per $100 worth.

Sold at Banks everywhere.

up at the arcs, before the crowd sensed that anything had happened. Then a roar swelled up from the stadium.

Eddie half walked, half staggered to a neutral corner. He tried to breathe, but the air choked him as though someone had thrown ice water into his open mouth. He heard the crowd, he even caught a glimpse of Feets' ebony face, distorted with an agony of hope.

Dixie took the full count. He was a smart lad, this Dixie. He went into a crouch, and Eddie realized he was waiting for an opportunity to clinch.

Eddie Gordon knew that it was now or never. He dared not clinch with Dixie, dared not wrestle with a man who knew how to protect himself until the numbing effect of that last punch should be dissipated.

Eddie circled his foe. For the first time in that battle he was concentrating. There was nobody in the world now save himself and this man before him.

He eluded Dixie's groping arms. He watched Dixie come in.

Dixie's right exploded against Eddie's jaw.

But that was what Eddie had waited for. Again his own right traveled upward: short, sharp and murderous. It was his best punch, his last punch . . . and he felt a hideous pain in his right hand as it landed.

But he knew that it was enough. He groped his way toward a neutral corner. He clung to the ropes to keep from falling. Then, above the howling of the thrill-satiated mob, he heard the announcer:

"The winnah—an' the new middleweight champeen of the world . . . Eddie Gordon."

THE dressing room of the new champion was jammed. Sports writers, photographers, real and would-be friends, hangers-on, rabid fight fans.

Ever since the moment when Eddie had recovered his strength sufficiently to leave the ring, ever since his arrival in this room, they had poured in: excited, eager, vociferous—and, in some cases, sincere. While Feets cut the bandages from Eddie's hands, while the club doctor inspected his swollen right hand and pronounced it nothing more serious than a sprain, questions poured at the winner. He answered them as briefly and honestly as he could. . . . And then the door opened and Feets looked up to see Pat Mallory standing there, alone.

Mr. Johnson swung into action. Using considerable tact and even more physical strength, he shooed everybody from the dressing room. They surged past the slender, pretty girl in the doorway. Some of them knew who she was and others neither knew nor cared. She waited until they had all gone and then she walked into the room. Eddie was still seated on the rubbing table, and Feets was busy at a locker in the corner. He pulled over his head the new white sweater with the black letters: EDDIE GORDON, WORLD'S MIDDLEWEIGHT CHAMPION. He grinned broadly and said, "Ise a consid'able prognosticator, ain't I, Mistuh Eddie?"

The big Negro looked with deep affection from one to the other. He moved to the door, and stood there for a moment with his hand on the knob. "I reckon," he said, "that you-all two chillun has got plenty to talk about . . . so Ise gwine stand right outside this heah do', an' see that nobody don't bother you."

He disappeared, closing the door gently—very gently—behind him. Pat moved forward slowly, her evening coat falling back so that Eddie could see the firm, young lines of her figure. She came close and held out her hand. She said, "Congratulations, Eddie."

He met her eyes and said, "Thanks."

Then they were silent again. Eddie was aware of an uncomfortable feeling, as though something impended. He was embarrassed and didn't know why. He was relieved to see the faintest ghost of a smile appear on her lips, even though he realized that there was no mirth in it.

Pat said, "I had a beautiful speech all thought out, Eddie—but I've forgotten the words."

He asked awkwardly, "What difference does it make?"

"None, maybe." She hesitated, and again tried to smile. "You gave me quite a scare."

"Yeah . . ." He looked straight at her. "I fought a lousy fight."

"It wasn't your best. What was on your mind?"

"Something . . ." He shrugged it off. "But I snapped out in time."

Pat fumbled with her evening bag, as though having trouble collecting her thoughts.

Eddie watched her curiously as she took out a folded document.

"Do you know what this is, Eddie?"

He nodded. "Yeah—sure I know. It's our contract."

"That's right. . . ." Her clear eyes held his, and he saw something there that was new and strange and unfathomable. "It's our contract."

Her hands moved. Slowly, methodically, deliberately—as though it was an act rehearsed a thousand times—she tore the contract across, and then across again. She placed the bits of worthless paper on the table beside him.

She said gently, "It *was* our contract, Eddie."

It had come too fast, too unexpectedly. He shook his head in bewilderment, and said weakly, "Hey . . . wait a minute . . ."

Her voice was steady. She said, "I've waited months."

"But, good Lord . . . Max offered you forty thousand for that thing."

"That's right, Eddie. Ma something—even to you."

He stared at her with n less comprehension.

"I don't get it. On the l doesn't add up right."

"I didn't think it would."

"But you've got to expla

She smiled. "I hit you when you weren't looking."

"That isn't it. I've wanted this contract. I've tried to get it. Now . . . I *should* be howling Hallelujah, and instead of that I'm asking myself questions. The only thing I'm sure of is that I'm all mixed up."

"I'm not," she said steadily. "I never have been."

A MINOR bedlam broke suddenly just outside the dressing-room door. They both looked in the direction of the noise, and they heard Feets' big, bass voice raised in protest.

"But you-all cain't go in yonder," Feets was saying vehemently. "'Tain't right nor fitten, an' I anyway ain't gwine permit it."

"Try to stop me . . ." Pat and Eddie looked at each other as they recognized the voice of Babs Ellison. They instinctively drew away from each other as the door burst open and Babs led the procession into the room. Behind her were Joe Barton and Cliff Halliday, but it was Babs who swept down on Eddie, flung her arms about him and kissed him soundly.

"Congratulations, Champ," she said. "You were magnificent tonight. You killed me three times over. I tell you . . ."

Her voice trailed off. She noticed that Eddie was paying no attention. He didn't know that she had kissed him. He didn't even know that she was there.

He was standing next to the rubbing table, and in his hands were a half-dozen scraps of paper. Babs asked petulantly, "What's the matter, Eddie?"

Eddie Gordon raised his eyes. In them there was doubt, uncertainty and the beginning of an idea.

"The matter?" he repeated slowly. He shook his head and looked down at the bits of paper again. "That's just what I'm trying to figure out," he said.

THE Penguin Club was smart, expensive, noisy, gay and uncomfortable. Just inside the entrance was a long, narrow passageway, flanked on one side by a gleaming bar and on the other by tiny tables, checkrooms and four telephone booths. At the far end of the bar, the room bulged suddenly, and it was in the center of that rectangle that the postage-stamp area, which was designated ■ dance floor, was to be found.

Tables occupied every available inch of space, so that the resplendently garbed patrons rubbed elbows with whoever happened to be occupying the adjoining tables. Hustling, bustling waiters shoved into you, too, as you worked at enjoying yourself.

On ■ miniature rostrum an American orchestra was now holding forth. The midnight hour had passed and the milder dances had been abandoned in favor of the more blatant jive.

The din was terrific, the cigarette smoke thick, the conversation and laughter loud and the dance floor so packed that couples moved slowly—and with greatest difficulty.

Joe Barton's table was at the ringside. He was well known to every employee of the Penguin, both as the son of a powerful political figure and also—on his own hook—as a ridiculously lavish tipper.

There were five persons at the table, and champagne stood in front of four of them. Joe Barton raised his glass.

"Another toast," he proclaimed, "to the new middleweight champion."

They touched glasses and smiled at Eddie who grinned back through puffed lips.

"And that," remarked Cliff Halliday, "is your eighth toast, Joe."

Babs Ellison said maliciously, "He'll

"I CHEATED DEATH ON A SKYSCRAPER ROOF!"

A true adventure of Milton H. Gibson, New York City

"ONE BITTERLY COLD NIGHT, my radio went dead," writes Mr. Gibson. "Suspecting that the howling wind had blown down the aerial, I threw on a dressing gown, grabbed my flashlight, and headed for the fifteenth floor roof.

"AN ICY WIND chilled me as I searched for and found the aerial. Making hasty repairs, I started back down. To my horror, I found myself locked out! I hammered the door. I shouted. But the wind howled me down.

"NEARLY FROZEN TO DEATH, I had an inspiration. Flipping the aerial loose, I tied the lighted flashlight to it, and swung it over the side of the building. Luckily the light attracted someone in an apartment below. Thanks to those dependable 'Eveready' fresh DATED batteries I was saved.

Signed Milton H. Gibson

drink 'em so long as the liquor holds out."

Halliday looked across at Eddie Gordon. "You've done good places," he remarked. "Nothing in the world to worry you."

Eddie nodded, and then smiled at Pat. None of them were paying any attention to Joe Barton.

Barton's cold grey eyes were narrow, his young face was hard. He stared across the room through the maze of afternoon dancers. He saw a big, black-eyed man who looked not too monogrammous in white tie and tails, and seated beside him an ambidextrous creature in a demure evening gown and silver-fox evening jacket. A close observer might have observed that the hand he stretched out toward his whiteglass was not quite steady.

THE tall girl in the demure gown caught Joe Barton's glance and turned to the man at her side. She said, "That's Barton, ain't it?"

"Yeah."

"Maybe he was givin' the signal."

"Maybe he wasn't." Morrie's voice was low. "Take it easy, Rita. You're gettin' jittery."

"So I'm jittery." She tossed off the remainder of her fourth highball. "But I can't help it."

"Lay off that dhertee. You ain't gonna go female on me, are you?"

"No-o . . . But look, Morrie—I ain't used to knowin' in advance. I wish it was time."

"It will be—soon. Crowd ain't steamed up enough yet. Barton'll know when. He ain't no screwball."

"I hope not. . . ." Rita was staring across the room. "They're havin' a swell time. Laughin' an everything. . . ."

They were having a good time, though there seemed to be no uniform quality to their merriment.

Definitely, Joe Barton was under a strain. More of a strain than he had believed possible. This was hitting him harder than he'd anticipated. He wasn't weakening . . . but it was a tough assignment, holding Morrie off until the crowd got thoroughly oiled and the music too loud. Yeah—that was the hard part: waiting and watching.

Babs Ellison was gay, with a caustic brittleness to everything she said. She, too, was under a strain. It hadn't taken her long to see the difference in Pat and Eddie. Pat was brighter . . . as though nice things were happening. And Eddie . . . for all his homely face with its pugilistic bruises, for all the purplish eye . . . he looked gentle. "I'd say shy," thought Babs, "if it wasn't such a crazy word to use about Eddie."

Cliff Halliday alone seemed normal self. His shrewd and inalienably sensitive Pat's face she's. He, too, had detected quality which had upset Babs he wasn't observing over it. Not ever had any real hope . . . but was a bit tough for a man through life carefree and hap there to fall for a girl who was with somebody else. Cliff was gracefully out of a picture he fitted into and he knew that to be feeling noble and hero only trouble being," he reflected I'm human—and therefore I fee

," responded Halliday, "is a r than feeling awful dead. Re-

member now . . . keep that eagle eye of yours on Barton. He's the guy you're interested in."

Eddie shrugged and started back toward the main dining room. A Cuban aggregation had usurped the rostrum and the wail of trumpet and beat of bongo was filling the crowded space with wild, rhythmic din.

As Eddie seated himself he was acutely conscious of Barton's arctic eyes. Those eyes had always bothered him . . . but now . . . knowing what he knew . . . He heard Pat ask, "Where's Cliff?" and he tried to smile "Little girls mustn't get too curious," he parried, hoping that it went off as he wanted it to.

The music became madder and wilder and louder. The rumba changed into the savage beat of a conga. Drums. Claves. Trumpet. Maracas. Dancers' eyes shining. Feet stamping. Bodies swaying. Pound-pound-pound . . . beat-beat-beat from the jungles . . . long, wailing, eerie notes that set your blood to tingling. One-two-three-*mmmmph!* One-two-three-mmmmph! Someone yelled "*Agua!*" at the frenzied, perspiring musicians and the beat came louder, faster, more savagely.

Barton tossed off a glass of champagne at a gulp and turned to Babs. He said sharply, "Let's dance."

The grotesque situation . . . the wild music . . . Cliff Halliday's advice . . . they were crowding Eddie Gordon's brain and pitching his emotions high. He rose and said to Pat, "Shall we tackle it?" and she said, "Yes . . ." and joined him, sliding contentedly into his arms.

"Close," thought Eddie . . . I've got to stay close to Joe. Close enough to do something. . . ."

He didn't notice—nor would it have meant anything to him if he had noticed . . . that a couple got up from a tiny wall table on the other side of the room: a big, burly man in formal dress—a man who was wearing white gloves . . . and a tall, slender, exotic-looking creature whose cheeks were unnaturally pale.

Morrie pulled her toward the dance floor.

"Come along, kid," he said gruffly. "It looks like this is it."

FOR the first few seconds of that dance, Pat Mallory let herself relax. Eddie was holding her tight, as though to shield her from the mad, gyrating horde on the floor. He was dancing simply, indifferent to the fancier steps of the conga, and she was content to have it that way.

At the beginning, he maneuvered so that he remained close to Joe Barton and Babs. He felt a trifle silly about it, yet the apprehension persisted. He was determined to do as Cliff Halliday had advised, to stick close to Joe, to watch every move he made. It wasn't easy to figure out what the hard-faced young man might be planning; difficult, indeed, to convince himself that he was planning anything drastic . . . and certainly not on this crowded dance floor.

Eddie heard Pat's voice as though from a distance. He didn't hear the words: just the voice. He looked down and grinned apologetically. "Sorry, Pat. . . ."

She met his eyes squarely and said, "Why can't you tell me, Eddie?"

"Tell you what?"

"Whatever it is that's worrying you."

He shook his head. "That'd take the next five years."

"So-o? Well, suppose you tell me the most important part."

He opened his lips to say something, but found himself saying something else. He said, "You!" and wondered where the word came from, marveled at how much truth there really was in it.

She knew that her cheeks flushed, and

Shots Heard 'Round the World...

Bring You the Better Oil That Comes Only From the Pennsylvania Grade Region

THE FIRST OIL IS STILL FIRST

PETER H. CURRY
President, South Penn Oil Company and a veteran of the region

Photo, Courtesy Studios

"SHOOTING" an oil well brings an exciting moment, even to veteran oil men. Explosion set off deep in the earth loosens reservoir rock, increases the flow of oil, and, at least briefly, raises the heart-beat of the men whose sweat and dollars have drilled the well.

Here in the Pennsylvania Grade Oil region, the boom of the shot that brings in a new oil well almost literally is a shot heard 'round the world, because Pennsylvania Oil is wanted everywhere. In every civilized country all that moves must move on oil—and the better the oil, the better modern motors do their jobs.

In early days, Pennsylvania Oil was the only oil. "Coal-oil" made the Pennsylvania region famous because it literally lighted the world. Steadily through the years, as new uses for oil developed, Pennsylvania Oil has held its proud position as the first and finest. Thanks to Mother Nature's generosity, the first oil-field ever "discovered" and developed, still produces its precious crude oil at undiminished rate . . . and will continue to do so for all the years that scientists can see.

Today Pennsylvania Motor Oils are *preferred* for motor cars, trucks, giant steamships, great airplanes. This motorized age has thoroughly proved the complete dependability of the motor oils produced in the Pennsylvania region.

Every "shot" that brings in a new well in this oldest of all the oil-fields, is a welcome sound to a waiting world, because, on every score, the first oil is still first.

P. H. Curry

ADVANTAGES TO YOU . . . *and your car*

Your automobile is an expensive piece of fine machinery. It deserves the best care that you can give it . . . and right lubrication probably is the most important care of all.

If you were to make a "score card" listing the points on which experts judge oils, you would find Pennsylvania Motor Oils winning on every score. They do not thicken up in cold or thin out in heat as much as other oils: they flow and pump more freely: they are less volatile: they form less carbon. They help you avoid other oil troubles caused by oxidation, acid formation, sludging and general "wearing out."

In simple language this means that Pennsylvania Motor Oils lubricate better at all temperatures, they last longer on the job, they protect your motor. You are sure of your money's worth when you buy a Pennsylvania Motor Oil protected by our emblem.

So, naturally enough, car owners who care about their cars, want these advantages that come with regular use of Pennsylvania Motor Oils.

100% PURE PENNSYLVANIA OIL

Pennsylvania Grade Crude Oil Association OIL CITY · PENNSYLVANIA

At left is the official emblem of the Pennsylvania Grade Crude Oil Association. It is registered in the U. S. Patent Office and protected under federal copyright laws. This emblem is not the mark of a brand. It is a guarantee to you that a motor oil is made entirely from Pennsylvania Grade Crude Oil and that the oil is up to the Pennsylvania Grade Crude Oil Association's rigid standard in every respect.

hoped he'd attribute it to the dancing. She said, as lightly as she could, "Not trying to kid me, are you, Mister?"

"I'll be darned if I know." He was suddenly awkward and boyish and shy. He said, "Look, will you promise not to collapse if I pay you a compliment?"

"That's a large order, but I'll do my best."

He said, steadily, "You're beautiful."

She tried to laugh off the thing that hit her. "I suppose that's part payment for tearing up your contract, isn't it?"

"No-o . . ." He wasn't smiling any more. He wasn't looking at Joe Barton, either. "It's a sort of confession of utter stupidity, Pat. And, frankly, I don't understand any part of it."

"Any part of what?"

"Me. And the way I feel. For more than three years I've been hating you . . . except that I haven't."

She said quietly, "You've given a swell imitation."

"So I've been rotten—"

"I didn't say that," she broke in quickly. "And I didn't think it." Her heart was doing funny tricks. "What is it that you're trying to tell me, Eddie?"

"I'm trying to tell you that I'm punch-drunk," he explained slowly. "I know what I'm thinking, but it doesn't make sense. Yesterday, you were a colossal pain in the neck. Today . . ."

"Today . . . ?"

"Today you're a pretty girl that I like to look at. You're somebody that I enjoy talking to. You're somebody that . . ." His cheeks flushed and he laughed with embarrassment. "Aw . . . it's crazy."

"Keep on being crazy, Eddie."

"I will," he said grimly—almost defiantly. "You're somebody I like to have my arms around."

She didn't hear the music any more, didn't know that she was being bumped and shoved by other couples who were dancing with too great enthusiasm. There seemed to be no one else in the world, no sound save Eddie's voice.

She looked at him and asked, simply, "Why?"

"Why?" he repeated, and did not know that his arms tightened. "That's a silly question, Pat. Maybe it's because your body is soft. Maybe it's because there isn't any reason. And maybe you're the answer to something else."

"That's sweet," she said, "even if I don't know what you mean."

"Maybe," he explained, "maybe you're the reason why I've never fallen in love with any other girl."

PAT was finding it pretty difficult to talk. Even thinking was no simple matter. She said, with an embarrassment that matched his, "I'm afraid the music is going to your head."

He frowned. "All right, smart gal," he said gruffly. "Laugh! Have your fun. You've earned it—the hard way. So I'll give you a real good time. I'll poke my chin 'way out." His manner was forbidding, his tone belligerent. He said, "I'm in love with you."

There wasn't any music then, or any crowd, or any movement. The whole world stood still, and Pat just let her body sway with his. Then she heard his voice: urgent and pleading:

"Funny, isn't it, Pat? It sounds twice as crazy to me as it does to you—and a damned sight more serious. For three years I've been trying to tear loose from you. Tonight you set me free—and now I don't want it that way. *I love you.*"

He saw her head move, felt her fingers tighten on his arm, heard her say, "And I love you, Eddie. . . ."

For a brief time he danced that way: close against her, unmindful of everything else in the world. Then a semblance of sanity returned. The name "Joe Barton" flashed into his mind, and he raised his head quickly. There was an instinct . . . a sixth sense . . . sent a little electric shock throu

He looked around. Joe Bart close to him—Barton and Babs ton's face had an odd, unusual He was staring over Eddie's sh staring beyond him. Babs was something, but Barton wasn't li

Eddie saw Joe Barton nod. S head bob. Saw the flicker of over cold, gray eyes. He heard P ing something:

"Eddie . . ." She had caught his fear. "There's something going on. The big fellow . . . w tall blonde . . . I'd swear I saw hi ing a gun under her fur jacket."

EDDIE was thinking fast. It stinct with him: the instinct trained athlete who reacts with orderly arrangement of thought. had been looking across his shou looking in the same direction Pa lory had been staring. Big ma blonde. Fur jacket. Those thing tered.

He whirled. He heard Pat's s "Eddie! Look out!"

The man, the blonde, the fur the gun . . . Eddie saw them all fraction of an interminable insta time to think things out. There —the vague thing he had been for. Coming from an unexpecte ter.

Eddie's right fist flashed up. It on the side of Morrie's jaw. It square, and it landed hard.

The big man went down. A screamed, and then another a other. An automatic dropped Morrie's hand and clattered ac polished dance surface. Men their female partners away. The the beginning of crowd hysteria blond woman—Rita—stood and not screaming, not talking, not

"Oh, Pat!" Babs said. "Isn't it dreadful! I never *dreamed*. I . . ."

Pat flicked a glance at Eddie. "No, of course you didn't, Babs," she said gently. "And now everything's going to be all right."

"Yes," Babs said slowly, and, catching Eddie's eye, somehow managed a smile. "It looks that way. Good luck!"

Then, wheeling swiftly, she walked away.

Pat and Eddie went to the door, got into a taxi and said:

"Center Street." Eddie leaned back against the upholstery and said, "What a night . . ."

THEY turned southward. Overhead the elevated roared, and street lights seemed to jump at them out of the darkness. Pat edged closer and—somewhat timidly—took his hand.

"Feeling better?" she asked.

"Sure. That's the chief advantage of being ■ pug."

She hesitated briefly and then said, "What about Barton? And that other fellow?"

"They've got plenty against Barton," Eddie answered. "And that removes one prime, first-class worry from my mind."

The taxi was passing along lower Third Avenue. On either side of them were squalid shops, malodorous restaurants, red-brick tenements, unsightly flop houses. But Eddie Gordon wasn't looking at them. He was staring at Pat. Tentatively, as though fearful that she might stop him, he slipped his left arm around her body.

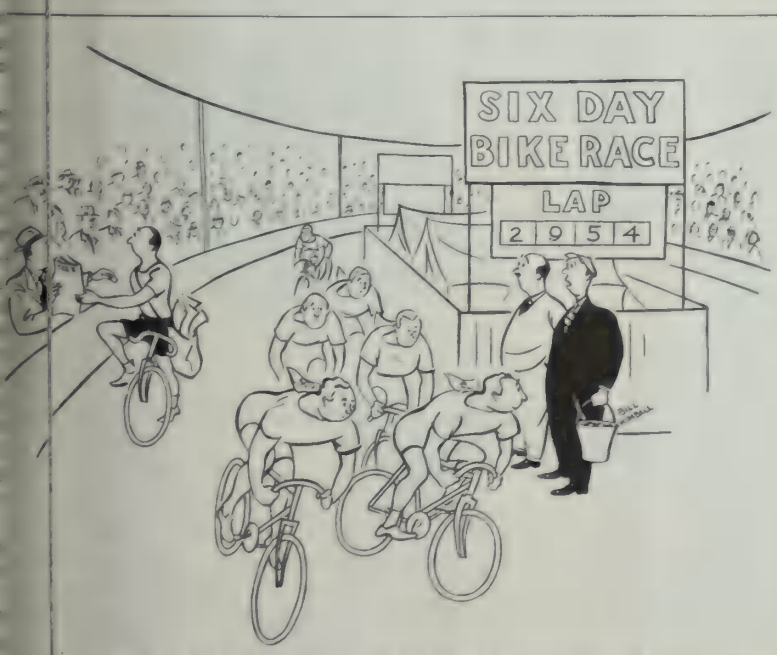
"Any objections?" he asked.

"No."

They rode for ■ few minutes in silence. Pat let her head rest against Eddie's shoulder and it seemed only natural for him to lean down so that his cheek touched her hair.

It was Eddie who spoke first. He took his arm from around Pat, and sat back in the seat so that he could look directly at her.

He said, "This is going to be awful tough."



Pat looked up at him. "What is?" she asked.

"Saying even half the things I'm thinking. Honest, I've been such ■ heel that I'd feel silly trying to make love to you."

Pat smiled.

"Go right ahead," she suggested. "I've been in love with a heel so long that I think I'm beginning to like it."

THE END

"I'm afraid Joe had better give up his paper route" BILL KIMBALL

Last winter — average picture takers made

12,000,000 SUCCESSFUL SNAPSHOTS AT NIGHT

You'll be a fine after-dark snapshooter yourself . . . with Kodak Super-XX Film in your camera

TAKE an average snapshooter with an ordinary camera (a $1 Baby Brownie will do). Add a few rolls of Kodak Super-XX Film—it's about four times as fast as ordinary film. And you have an after-dark snapshot team that scores bull's-eye after bull's-eye right through a long and fascinating evening of indoor picture taking.

Try it at your house tonight. There's no need for an expensive camera, remember; the one you're using now will do, just so long as it takes Kodak Super-XX Film.

When the shooting is over, you can look forward with confidence to a batch of splendid prints . . . snapshots every bit as good as those you're accustomed to getting outdoors in the summer sun.

Night Snapshots simple as A.B.C. with

KODAK SUPER-XX FILM

A . . . Load your present camera with Kodak Super-XX Film.

B . . . Use a couple of inexpensive Mazda Photoflood lamps in Kodak Handy Reflectors. (You keep your Reflectors, folded flat, in their attractive box. Kodak Handy Measure included.)

C . . . Follow the few simple directions in the FREE booklet. Like shooting with an expert at your elbow. Brief, easy-to-follow instructions and diagrams, exposure table, picture suggestions. At your dealer's. Eastman Kodak Co., Rochester, N. Y.

H.M.S. Kelly, torpedoed, lists badly, but reaches dock for repair. Others have been sunk, weakening Britain's sea control

Full Speed Ahead

WE TAKE it that most Americans now are agreed on the following items: That for better or for worse the United States is unofficially but inextricably in the war on Britain's side . . . that if Britain loses decisively and Hitler gets the British navy or any considerable part thereof, we shall be in a most serious spot . . . that if Britain loses, the least disagreeable thing we can expect thereafter will be to have hostile fleets heaving to off our richest coastal cities, one after another, and offering them the choice between paying heavy tribute and being bombarded. . . that you can draw your own picture of the most disagreeable thing we can expect if Britain loses.

We take it, too, that most Americans now are informed and believe: That Britain in all likelihood cannot hold out against Hitler unless our shipments of planes, munitions, guns, etc., to Britain speed up enormously in the next month or six months . . . that British ship construction no longer is outrunning, as for months it did outrun, British shipping losses by German submarines, dive bombers and commerce raiders . . . that Britain cannot go on forever paying cash for everything it buys from us.

These things being understood and agreed on in this country, will most Americans okay without hesitation practically any measures Congress and the Administration may take to equip Britain and ourselves to see this crisi

We believe the answer to that ques

Or if the answer is No, we'd bette think of how best to fight a heartbr fensive war against the Axis and J some further thought on how best t possible ignominious loser's peace aft

Collier's is not urging a military di or curtailment of civil liberties or wartime hysteria.

We do suggest that public opinion up the government in any steps c with our present state of semiwar and ened actual war, and that the word fo is full speed ahead and damn the tor

14,000,000 Pennies

WELL, the Children's Crusade for Children, which we had the pleasure of endorsing on this page a few months ago, wound up with almost $140,000 deposited in mite boxes posted in schools all over the country. The money was split roughly as follows for the relief of child war victims: $22,500 each for Chinese, French, Polish, British and Jewish children; $7,500 each for Dutch, Finnish and Belgian children; $2,000 for Norwegian children.

To the children of the United St gratulations on possibly the finest, m ous, most constructive single deed anywhere on the globe during the en ing year of 1940.

Soldiers' Tearooms—Well, Why Not?

MODERN, commodious regimental tearooms are being rigged up for the soldiers of the 27th Division at Fort McClellan, Ala., and the news has set jesters jesting, old Regular Army top kicks muttering in what would be their beards if they wore beards and retired generals striving to think of other things lest they have apoplexy.

What we say is, what of it? Why shouldn't men of the new draft forces have as pleasant surroundings as may be?

The new Army should be a democratic outfit to which it is worth a man's while to belong—though, of course, with all the essentials of first-class modern military training. Don't baby the boys; but don't make their year in the Army equivalent to a year in ja

We're for the tearooms, for goo hostesses around canteens and post e and for any other trimmings that w make life in the new Army enjoyabl the way you build a strong, enthusias loyal fighting organization—by makir thing a man likes to belong to.

Wings for the Border Patrol

WHAT is your own opinion of what those planes or that plane is carrying into the States?" we asked one of the patrol inspectors. We were starting back to El Paso, the Mexicans having just dragged three truckloads of corn meal across the Rio Grande.

"Personally," said he, "I'd say it ain't corn meal."

Thus ended Walter Davenport's recent Collier's article on the Border Patrol, and how it prevents overland smuggling and unlawful entries into the United States from Mexico but can't prevent aerial shenanigans because it has no airplanes of its own. In times like these, it is no joke to have our southern border open to any airplane whose pilot cares to fly over without reporting to the Border Patrol.

Mexico is crawling, currently, with radical refugees from the Spanish civil war. Ultra-radicalism has about ruined Mexico, which has accordingly swung to the Right. In the bosoms of many of these refugees, however, still burns the holy ambition to wreck as many countries as they can in the name of St. Marx and his prophet Stalin. Many of them want to come to the United States and get busy on the work here.

We'd better equip the Border Patr adequate flying force, and do it with These pilots had better be instructe down undocumented border-jumpir and shoot them down if need be. I again one of these patrol planes shou Mexico in performance of this d Avila Camacho, new Mexican preside repeatedly as how he wants to be a ours, with a capital F.

has a Winning Smile . . . a Smile that might
have come from his Lifelong Use of Ipana and Massage.

Don't take chances with your smile! Let Ipana and Massage help you to healthier gums and brighter, more sparkling teeth

Q. *What is there in the habit of Ipana and massage that can help you all your life?*

A. Just this. Ipana and massage helps you not only to have bright, sparkling teeth—but also helps you give your *gums* the daily care they must have.

Q. *Is gum massage so very necessary then?*

A. Indeed it is! For today's soft, creamy foods require little chewing . . . so naturally our gums don't get the exercise and stimulation they must have! That's why it is so important to massage a little extra Ipana onto your gums every time you brush your teeth.

Q. *When stimulation is lacking—what happens?*

A. Gums tend to lose their firmness and strength. They often become weak, tender . . . and flash that warning tinge of "pink" on your tooth brush.

Q. *Is "pink tooth brush" serious?*

A. It may be and it may not be. Your dentist can tell you very quickly. Probably, he'll tell you that your gums need stimulation and work. And, like so many dentists, he may suggest the healthful stimulation of Ipana and massage.

Q. *How can Ipana and massage help guard against "pink tooth brush"?*

A. In this important way. Ipana, you see, does more than clean teeth brilliantly. For Ipana, with massage, is specially designed to aid the gums to better health. That's why Ipana and massage is so important in helping to keep your gums healthier . . . in guarding against "pink tooth brush."

COVER T. D. SKIDMORE

ANY WEEK

AN old-time friend of ours, Mr. Tom Finnigan of Kansas City, Missouri, has just informed us that the world has gone to pot locally as well as generally. In the old days, when it was illegal in Kansas City to be law-abiding, Mr. Finnigan knew his way around. But of recent months he has been content to sit on the side lines observing the wonders of municipal reform. Just to check up, Mr. Finnigan strolled into a haunt of yesterday. When he knew the place and it knew him, it was a trifle tough. You kept your hat on, your coat collar turned up and your head bowed as a safeguard against flying glass. They needled the beer with nitric acid or something like that. Only one barkeep had two ears. Anyway, Mr. Finnigan dropped in. The place

was so clean that he felt a little nauseated. The barkeeps were young gentlemen with a drugstore look about them. There wasn't a bawdy picture nor a salty motto on the walls. The place had become a cocktail lounge and they served napkins with drinks. However, at the far end of the bar, Mr. Finnigan recognized a couple of his contemporaries but only after considerable scrutiny. Reform had hit them too. Their hats were off, their neckties on and instead of arguing they were clearly discoursing. Mr. Finnigan approached cautiously. But he left without disturbing them. He got just close enough to hear one of the erstwhile mugs say to the other: "Actually, Frank, the only thing I have against that gentleman is that he wears a derby when he hunts rabbits." Mr. Finnigan bids us, a little heartbrokenly we think, to avoid Kansas City.

AND Mr. Paul Rhodes of Fort Worth, Texas, reports that a slender young man entered a local draft board office with his questionnaire in his hand. Thereon he had answered every question with a meticulousness that aroused considerable curiosity. His living expenses for example. He apologized for that saying that it was incorrect by precisely two cents. From a pocket he drew about ten yards of adding machine paper which showed that his yearly income was exactly $1,373.21. Before the draft board could stop him he produced an even longer paper accounting for the disposition of his income. It came to $1,373.19. "I'm sorry," said he. "I've checked and rechecked. I'm afraid it's the best I can do unless you'll give me more time. I know that the government expects every one of us to be accurate." However, they refused to pin his statements of income and disbursements to his questionnaire and he departed saying: "Well, I hope I'm not blamed if your records are incomplete."

WE think we told you two or three weeks ago that we've been keeping in touch with the personnel of our new Army. One of the lads dropped in the other day and wanted to talk about these new defense bases we've acquired in the Atlantic from England. We're afraid we limped a little as we tried to explain. However, we did say that in the main we thought it was a pretty good transaction and that we thought it was pretty fine of England to let us have them for fifty second-hand destroyers. Our young friend wasn't so sure. "What I want to know," said he, "is how did England get these bases in the first place. What did she give us for them?"

PERHAPS we should have shown him a letter we'd just got from Mrs. Carrie F. Lannighan of Springfield, Massachusetts. Mrs. Lannighan had just read Kenneth Robert's Oliver Wiswell and was considerably churned up as a result. "As I see it now," writes she, "the least we could do to repair the fearful wrong we did England in the seventeen-seventies is to plunge forthwith into this war and give her our all —money, blood, steel and food. It may not yet be too late to make amends for the injury and insult we heaped upon George the Third and his Generals Howe, Cornwallis, Burgoyne and Clinton. Let us adopt the attitude of the erring child come home to rescue the parent to whom we did such wrong in our crude, cruel youth. And having done that perhaps she'll forgive, forget and take us back."

NOT that Mrs. Lannighan's views will have general acceptance. We've just learned that the twice-rejected Thirty Dollar Every Thursday movement is to be set up again and offered to the California public as More Money on Monday Morning. To make it timely and to commend it more strongly to an erstwhile skeptical electorate, the revival will carry a powerful antiwar rider. Mr. Jeff Tomassen of Santa Clara, California, is carrying the banner, promoting the publicity. It sounds grander and grander. "Who hasn't been busted on Monday morning?" asks Mr. Tomassen. "What a cure for the Monday blues to have a nice check waiting for you in the mailbox." Mr. Tomassen has but one apprehension. "Let us hope," says he, "that we won't get into the war before we can go to the polls. If we do we'll have to drop the antiwar rider and it may injure the movement as a whole."

THE situation in the Oui country is gradually being cording to our lower O Colonel Bob Berry of Men The colonel was driving in direction of Missouri wh Mr. Theo Brimbel. Mr. elderly gentleman, was dr of mules and pulled up tidings with the colonel. colonel that he'd been u where he had heard the al that Congress was fixing t many. To protect you from such losses, Liberty Mu...ects claims men with unusual care, trains them rigorously in the highly specialized technique of claims adjusting.

One of these experts will be immediately available wherever and whenever you may need his help. He will protect your interests skillfully, settle fair claims against you promptly, work tactfully to keep you out of court. You can count on him as "Your Friend on the Highway."

If you are a careful, responsible car owner, you can qualify for this preferred protection at surprisingly low cost. In most states, automobile insurance rates are generally lower and you may secure special discounts, depending on your driving record and the use made of your car. In addition, every year Liberty Mutual has paid cash dividends of 20% to policyholders, a further saving of one-fifth of initial premiums.

FREE BOOKLET. Don't buy or renew your car insurance until you read the free booklet offered below. It tells how careful drivers are securing full protection at lower cost, explains how you can qualify, describes our convenient deferred payment plan. In addition, without cost or obligation, we will send an estimate of the money you may save. Tear out and mail the coupon today!

Wing Talk

THE UNITED STATES, home of most of the "firsts" of peaceful aviation, has just chalked up two more. . . . You remember, in gentler days when you crossed oceans by steamer, how pleasant it was to look forward to each day's shipboard newspaper? Now Chicago & Southern Airlines present the first and only airlines newspaper.

It differs from shipboard papers in some respects. It is larger, and printed on regular newsprint. It is similar in gossip about passengers, crews and the geography and virtues of its routes and cities. The name and destination of each passenger to whom the paper is handed after take-off is printed on the front page.

Stewardess Josephine Larson becomes the first official flying reporter. She interviews passengers at airports and on ships. And ranges from the Great Lakes to the Gulf in search of items.

If C. & S. don't mind a suggestion from an old globe-trotter, their paper could be given more point, novelty and timeliness if they delayed handing it out until flight is well under way, left a blank space on the last page and had the stewardess type in on each copy latest radio advices received by the pilots. Or at least that much information which he now customarily dispenses undecipherably penciled on a card, to wit: "We are over McGehee, Arkansas; air speed 180, ground speed 200, outside temperature 10, inside temperature 72, landing Shreveport 10:18, on time". . . .

THE second of our latest "firsts" is the world's only "Union Station of the Air," now open for business on Forty-second Street and Park Avenue, New York. This is the area known as Pershing Square, which now becomes—with the airlines terminal, Grand Central Station across the street and the Baltimore & Ohio bourn down the block—a transportation center of formidable proportions. Appreciation of this great fact does not yet seem to have staggered everybody, for when the air people with their Hollywood tricks wanted searchlights for the opening they found the only suitable place to mount these was on the other side of the street. The railroads said no.

The undampened airlines, however, continued to perceive "more than the opening of a depot." They saw a monument to the faith of air-travel op

"I'm paying a fifth of a cent a mile— *to travel first class!*"

GENERAL MOTORS MASTERPIECE

De Luxe "Torpedo" Six Two-Door Sedan, $874 (white sidewall tires extra)*

"BEFORE I BOUGHT my new Pontiac, I made up a list of the most important things I wanted in a car.

The first of these was beauty—and, of all the cars I looked at, none could compare with Pontiac's smart 'Torpedo' styled Fisher Body and Silver Streak design.

I wanted comfort, too—and Pontiac's exclusive Triple-Cushioned Ride was the smoothest and most restful I have ever experienced.

I also wanted a car that was safe and easy to handle—here again Pontiac led them all. Truflex Steering, Safety Shift, triple-sealed brakes and the lightning-quick engine make child's play of driving even in congested traffic.

"Then, too, I wanted an inexpensive car—and that's where Pontiac gave me the biggest thrill of all. For Pontiac is priced so close to the lowest that, by spreading the slight difference over the time I drive the car—I have it figured out that I'm paying only a fifth of a cent a mile for the extra luxury, prestige and beauty of a Pontiac.

"Is it any wonder, then, that I'm telling *all* my friends to buy Pontiacs? Why don't *you* see your Pontiac dealer today?"

by Paul V. Barrett

International Correspondence Schools will observe their 50th Anniversary in October, 1941.

These Schools originated in a newspaper column which answered miners' inquiries regarding the prevention of fire damp and many hazards of coal mining. Later, special texts were developed to bring home-study courses to men unable to attend evening classes. Since then more than 4,000,000 ambitious men have enrolled for I. C. S. Courses in 400 business and technical subjects. I. C. S. training has helped thousands of men to achieve leadership in business and industry.

C. S. Ash, President of the Differential Wheel Corporation, Detroit, enrolled with the I. C. S. at the age of 18. Almost every wheel that rolls the ground today has been built under one or another of Mr. Ash's patents.

More than three-fourths of all citizens in the United States earn their living in 100 dominant occupations. I. C. S. has organized adult training for 52 of the 100 fields in which people are most actively engaged.

Four well-trained ground men are needed for every skilled flier. I. C. S., through its authoritative home-study courses, is in a splendid position to relieve the shortage of aviation engineers and mechanics in this country.

A course for draftsmen was most popular during 1940 at I. C. S., but the trend is toward mechanical and engineering subjects.

When I. C. S. student Marvin Pipkin was a private in the U. S. Army, World War No. 1, he developed a gas canister composition that proved to be one of the big achievements of the Defense Section of the Development Division.

Shortage of skilled workers during the past few years has brought about a rapid growth of apprentice training programs. I. C. S. now has agreements with more than 2300 companies covering more than 5000 plants

An I. C. S. student has at his disposal the biggest, best equipped laboratory in the world—*industry itself!* His course will enable him to do his job better. At his place of work he proves and applies what he learns. He prepares himself for success, as 100,000 other ambitious men, currently studying I. C. S. Courses, are doing.

A postage stamp will bring you complete information on the services offered by these world-famous Schools. Simply check the subject in which you are interested, fill in the information blanks, and mail the coupon below. This simple act has started thousands on the way to success.

What Duraglas* means in Packaging the Nation's Products

TRADE MARK REG. U. S. PAT. OFF.

With the perfection of the Duraglas method, hundreds of familiar products can now be packed in glass.

Hundreds of products formerly denied the advantages of a transparent container will now greet your eyes in stores. Hundreds of products previously packed in other containers because glass was considered expensive, will now go to market in sturdy, economical Duraglas containers.

Hundreds of products, in freight-saving lightweight Duraglas containers, now beckon you to *buy on sight!*

A new and better way for you to shop, a better *selling* way for industry to pack its products, *that's* what Duraglas means to all America!

Owens-Illinois Glass Company, Toledo.

COFFEE, FOR EXAMPLE

Duraglas:

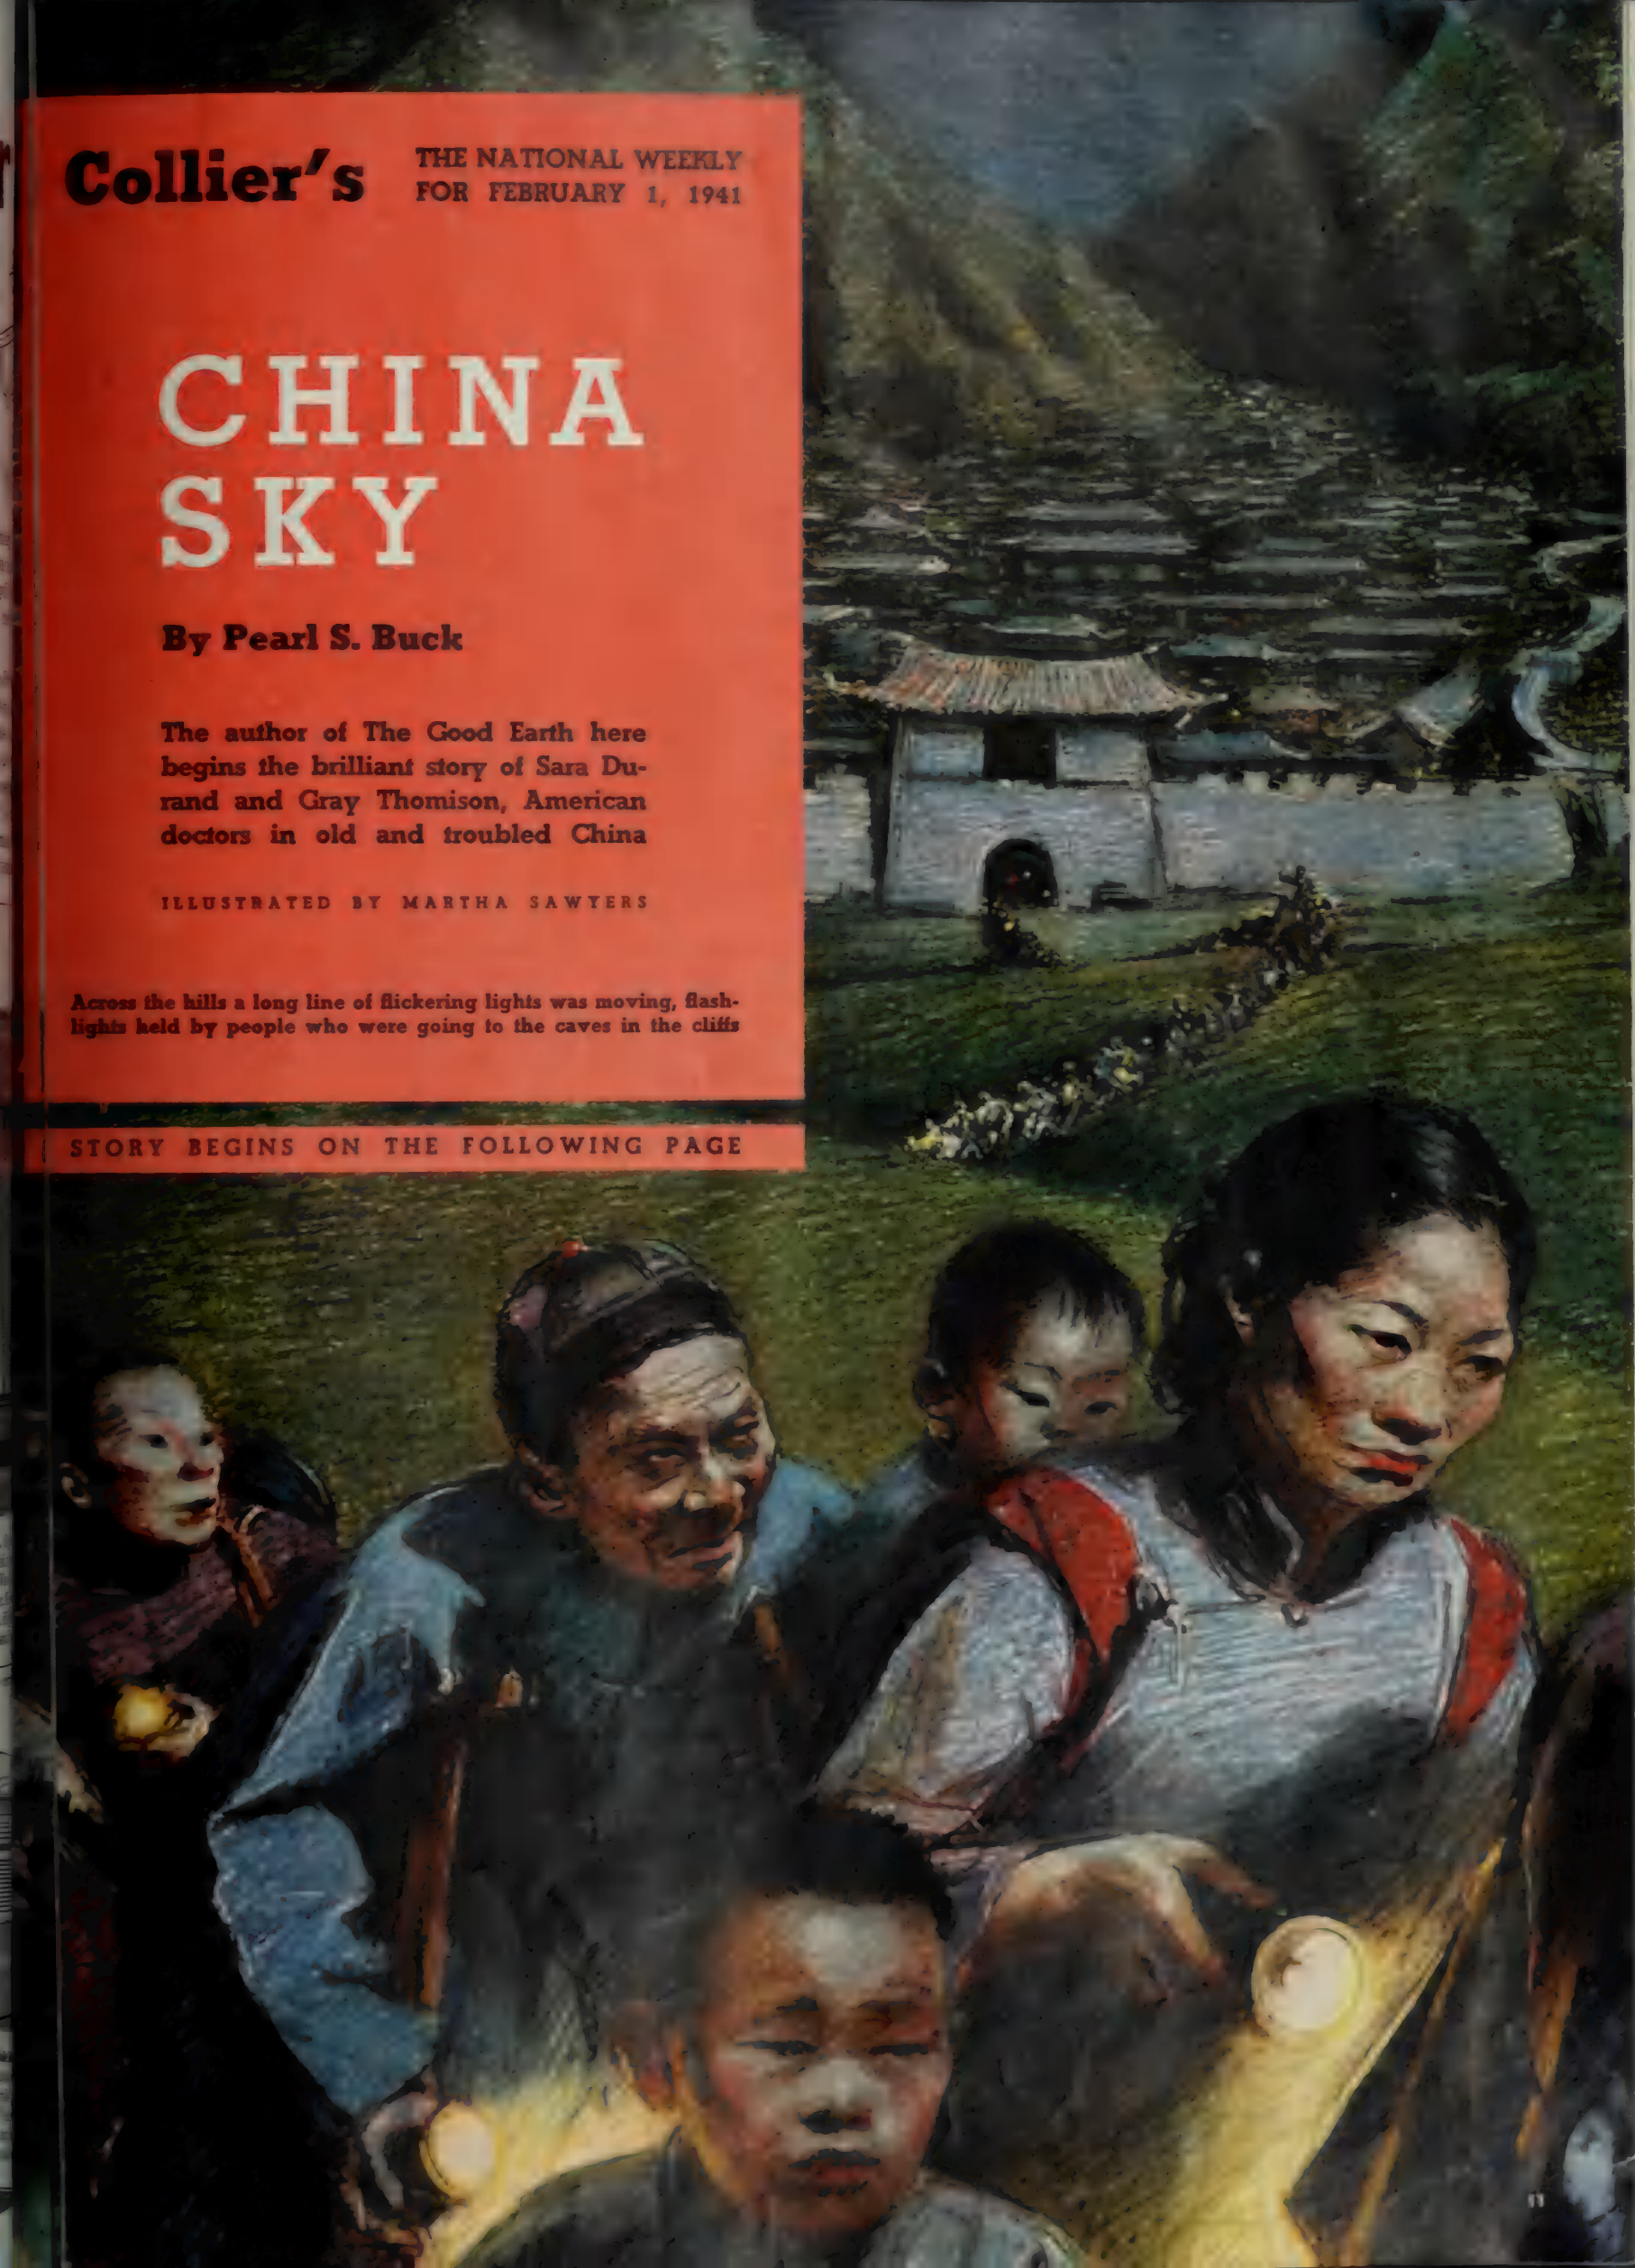
Collier's THE NATIONAL WEEKLY FOR FEBRUARY 1, 1941

CHINA SKY



By Pearl S. Buck

The author of The Good Earth here begins the brilliant story of Sara Durand and Gray Thomison, American doctors in old and troubled China

ILLUSTRATED BY MARTHA SAWYERS

Across the hills a long line of flickering lights was moving, flashlights held by people who were going to the caves in the cliffs

STORY BEGINS ON THE FOLLOWING PAGE

Sara Durand

THE long wail of the first air-raid warning of the night shrieked through the unlighted Chinese city and rebounded from the darkening hills outside its walls.

"Thank you," Sara said to the blue-coated coolie from the cable office. She had been in the women's ward to see a patient upon whom she had operated that day when she had heard her name called from the door and there was this cable. She thrust it into the pocket of her white surgical coat. There was no time to read even a cable—no time, either, to go to the hospital office and open the cash box and get a tip for the coolie.

"You had better go into our shelter until this is over," she said. "The Japanese come quickly these days." The length of the long city lay between the hospital and the cable office on the river.

The man hesitated and then shook his head. "I have a new American bicycle It will be too quick for those Japs. As for what you are thinking of, do not remember it. Take it for my thanks to you that you do not leave us as many white women do."

He darted off, and Sara hurried to the top floor smiling. She must remember to give him something, all the same. . . . Babies were on the top floor, and the new mothers. They were always first.

"Everybody to his place," she said quietly as she went, speaking to one after the other of the Chinese orderlies and nurses who, as they had been taught, appeared along the corridors. At the sound of her voice they disappeared. Within five minutes all the hospital seemed to be moving down the ramps out into the soft autumn night. Everything was dark except for the enormous hanging moon—"a beacon to the Japanese," Sara thought bitterly, upstairs in the baby room. By the light of a broad moonbeam falling through an open window she lifted one tiny form after another from its cradle and tucked it into a long wagonlike carriage she had designed especially for this purpose. The Japanese had been bombing Chen-li so long that she had had time to invent every means of this sort. Only the sure-to-dies were left behind in an air raid now, those who if they were moved at all would die the sooner.

The second warning sounded. She glanced out of the window. Across the dark and rocky hills a long, thin line of flickering lights was moving, lights as small as fireflies. But they were not fireflies. They were flashlights held by thousands of people from the city who were going to the caves in the cliffs. She had seen them hundreds of times by daylight, mothers with their babies on their backs and, in their hands, baskets of food and little three-legged stools. The floors of the caves were wet from the dripping roofs. But the rock was seventy feet thick over their heads.

"Off with you," Sara said in English to the tiny Chinese babies. Two blue-clad Chinese nurses wheeled them quickly away. But she always packed the babies herself, ever since that awful night now nearly a year ago, when one of them had been smothered. She and Gray had worked hours over that small, motionless mite while bombs crashed around them. It was certain even then that the Japanese wanted to hit the hospital. It had been hit again and again. But they always patched it up. . . . Ah, but she was tired! Five months she had been here alone while Gray was in America getting money to go on patching up the hospital. After the war he was going to tear down the whole patched-up pile, he said, and build an up-to-date, modern American hospital and let Chen-li see what a hospital really was.

If the war ever ended!

"Mothers all out?" Sara asked of a young Chinese woman who was waiting.

"Everybody is out except the eight sure-to-dies you said were not to be moved—and you," the young woman replied.

She stood immobile in her white interne's uniform.

Sara laughed. "Now, Siu-mei, you need not look at me like that, for it is you who go and I who stay. Hurry and catch up with the babies. You must be with them in the shelter."

"No, Elder Sister!" Siu-mei cried out. "If I die, there are others like me, but who will take your place? Thomison doctor is far away in America. We have only you."

"Nobody can kill me," Sara said gaily. The third siren sounded and immediately heavy planes drummed across the sky. "Quick—quick!" she screamed soundlessly. But the Chinese girl did not move. Sara took Siu-mei by the shoulders and pushed her toward the door. It was no use. The girl was strong and stubborn and she turned and clutched Sara.

"Here—in the door!" she shrieked. They stood, their heads bent, their mouths open to relieve the tension of the fearful roar around them. The planes dived downward until it seemed from the noise that they would crash through the roof. Automatically the two women crouched and hung their heads between their knees and pressed their fingers in their ears.

THE bomb fell. There was an explosion that shattered the air and dried it up so that they could scarcely breathe. Then there was the crash of falling walls. Sara lifted her head.

"That's the wing of the men's ward," she said, but her voice was still soundless. Siu-mei pushed down her head.

"It is not over!" she shrieked.

They crouched, waiting. Three times more the planes dived, three times the air seemed dried up around them. Sara put her hands upon her breast to ease it so that she could draw the breath that was sucked out of her lungs. Then she remembered the cable. There it was, still in her bosom where she had thrust it. No time yet for anything except this life-and-death business! But what if it were from Gray? Only why should Gray cable her when he had written his plans out so carefully in his cool, businesslike letters? And everything, he said, was going according to plan. There was no urgency in Gray to communicate with her.

The planes receded somewhat. She leaped to her feet.

"I must see to the sure-to-dies," she told Siu-mei; "now go, you, and see what is happening in the shelter."

She hurried ahead without waiting for answer, her small flashlight guiding her feet. Into the men's ward first—that young Chinese doctor fresh from American medical school was taking Gray's place there, but she could not be sure of him. He was never quite to be found either in his place or exactly out of it. "I don't trust Dr. Chung," she had written Gray recklessly in one of the letters that she tried to make nothing but reports, "and I can't say why."

"Don't go feminine on me," he had written back sternly. "He's come with a brilliant record and recommendations beyond anything *I* ever had."

But tonight Dr. Chung was in his place in the men's ward. A pencil of light crossed hers and his face came into her sight as hers came to his.

"What was hit?" she asked.

"The west corner, Doctor," he said calmly. "Too bad, when we've just finished repairing it."

"That makes you short of beds, doesn't it?" She held his smooth oval face in the light. His black eyes looked flat and opaque.

"Eight men with no beds to come back to, Doctor."

"Pallets in the dining hall."

"Yes, Doctor."

SHE wished he would not "doctor" her so much. He was still displeased that Gray had put her in charge of the hospital when he went to America. Gray had been so angry that he had told her what Chung had said.

"A woman!"

"No, my colleague, Dr. Sara Durand," Gray had replied haughtily.

"A woman," the Chinese had insisted sullenly.

"I wanted to hit the fellow," Gray had told her. "But I didn't dare—not when I've got to leave. Better watch your step, Sara!"

She had watched her every step, ignoring Chung's sullenness and the edges of rudeness in his manner. It was difficult to tell what was rudeness in these modern young Chinese who purposely put aside the traditions of Chinese courtesy as old-fashioned and yet did not know what Western courtesy was.

"Is there anything else?" she asked.

"I can manage, thank you, Doctor." Again the flicker of insolence in the smooth, bland voice and in the long, handsome black eyes.

"Very well—good night, Dr. Chung."

"Good night, Doctor."

She let his face go and turned and was aware of fear. As surely as she could see it she felt the needle point of his light upon her back. He was watching her. Instantly she turned and flung her light at him. He had not moved.

"What is it?" she demanded.

His narrow eyes widened. "I was merely casting my light on your path," he said gently.

She was ashamed of herself as she shut the door between them.

"I'm overwrought," she thought. "I'm beginning to imagine things. It is time Gray came back."

She put her hand to her breast and felt the crackle of paper. When she had one moment—but she had not, yet! Five of the sure-to-dies were in the women's ward and she must get around before the patients came back from the shelter. There would be plenty to do then—people exhausted and needing stimulants and children needing food.

She hurried into the ward where two women lay motionless, a few empty beds between. Were they—no, they were alive. Two heads turned weakly and one of the women put out a hand.

"I knew you would come, Foreigner. They don't hit foreigners, do they?"

"Everybody is safe," quietly, putting thermom mouths. Even as she spoke sounded again for safety. I again for the night—for a fe perhaps even for a day until night. She glanced out of t toward the hills. Out of the c tiny firefly lights were be waver down the slopes. Peop ing back to their beds. Her e denly burned with tears. Th brave, these Chinese people, plaining, so unyielding. Day i night after night—they en horrible life, shifting their hou patiently to meet necessity grumbling, not a word of gi the enemy.

"A people worth giving m she thought with that mingli derness and determination most herself. "I'm lucky," sh "So many have to work for b —my bread is incidental."

Favorite new topic of Trinidad's famed Calypso singers is Uncle Sam and the benefits natives are certain he is going to bring them

Symbol of Trinidad's importance as a naval base is this oil-storage tank. Annual crude production of Trinidad is 18,000,000 barrels

IN TRINIDAD the jungle troubadours raise their black faces to the flat, distant moon and sing. In the swing rhythm of the Calypso they invoke the protection and favor of America. They rhyme Roosevelt with liberty, Washington with Lincoln. They make the tropical night quiver with their ballad of thanksgiving to the millions of Americans who voted for Franklin-Dee instead of for Mr. Will-Kee.

"For thus," the minstrels sing, "was the world saved for Democracee."

When the black men of the West Indies say world, they mean, specifically, the one that encompasses the Caribbean. It includes the Bahamas, Jamaica and the Lesser Antilles. In it are located the islands where the United States obtained the right to build naval, military and air bases on leased land in exchange for fifty reconditioned destroyers.

This West Indian world, with a mixed population of nearly 2,500,000 people and a total area almost as large as that of Maryland and New Jersey combined, includes:

Mayaguana Island, in the Bahamas. There, at Abraham Bay, the United States intends to build a naval base and seaplane base as the easternmost outpost of our new sea frontier with a warring Europe and Africa.

Jamaica, lying just inside the Windward Passage between Cuba and Haiti, at the point that corresponds to the Straits of Gibraltar of this American Mediterranean, the Caribbean. On Jamaica's harbor at Kingston, Portland Bight, there is to be an important base.

Antigua, in the small Leeward Islands, where there is a sheltered bay, Parham Sound. Flying boats and warships are to be stationed here to keep the vigil of the Atlantic approaches to the Panama Canal, the Suez of the Western Mediterranean.

St. Lucia, a lumpy pincushion of an island with smooth water at Gros Islet Bay for our patrol planes.

And Trinidad, a lush, green island rich with oil, at the southernmost extremity of the chain of the Lesser Antilles. Lying within sighting distance of the continent of South America, it is separated from Venezuela by the channel of the Serpent's Mouth, a turbulent body of narrow water, whose currents, affected by the Orinoco and the Gulf Stream, gave Christopher Columbus unhappy moments as he sailed into it on his third voyage, sighted the trinity of the island's peaks, and called it La Trinidad.

Negroes and various Negroid mixtures make up the bulk of the population—these are natives awaiting the opening of a market

All Set for Prosperity

Of all the bases involved in the destroyer deal, with the possible exception of Bermuda and Newfoundland, Trinidad is the most important. The deep, quiet harbor of the Gulf of Paria has only two gateways — the Serpent's Mouth, the Dardanelles of the Caribbean, and the Dragon's Mouths. Here naval, seaplane and military air and land bases are to be built. In most cases the sites of the bases have not been chosen.

There are a thousand details to be worked out, including the question of extraterritoriality for the Americans in the base zones. Land is yet to be condemned. Final surveys are yet to be made. The sum of $25,000,000 has already been earmarked for preliminary work on the bases. When they are completed they will cost at least $60,000,000, but men engaged in the work indicated that the eventual cost—of the bases alone—will exceed that figure, perhaps double it.

When President Roosevelt announced the deal, the natives on the islands knew their world was changing. They didn't

Strange Things Happen in Brooklyn

By Daniel Fuchs

ILLUSTRATED BY CLARK AGNEW

What troubled Juley was that she didn't seem to eat like a beggar at all

How love came to Joe Juley via Scranton, Pa. A demonstration of the superiority of the heart over the head when it comes to sizing up a fellow citizen

NO ONE laughed. None of the hackies in the diner thought it was funny. Chuncery was big and clumsy. He had a round, homely face and a voice like Bob Burns' bazooka on the radio, but his wife had left him nearly a week now and they could understand how he felt. They were all married men, too—all except Joe Juley.

"That's what you get for looking for trouble," Juley said.

"I didn't go looking for trouble!" Chuncery said, almost bawling. "What did I do? I just got married."

"That's what I mean. Did you have to go and do it?"

"Well, holy smoke . . . what the hell . . . a guy can fall in love, can't he?"

Juley took a good look at him. He swallowed. "Very romantic. They ought to make a movie with Charles Boyer and Ginger Rogers."

The other hackies couldn't keep quiet any longer. They resented Juley. He was the only bachelor, he was some years younger than they were and altogether too hard-boiled and cocky for his age. As married men they couldn't help taking personally everything Juley said to Chuncery and finally one of them, a driver named Spencer, banged his coffee mug on the counter.

"Don't be so positive!" he said. "The man feels low. He feels rotten."

"It's no tragedy. He'll live through it."

"You don't realize! You wouldn't know!"

"Everybody ain't made out of rock like you," a hackie called out.

"Everybody can't live like a hermit," another man said.

"People are human!" Spencer went on. "They got feelings in them! Hearts! There'll come a day, Juley, there'll come a day . . ." He was too indignant to finish. He walked out to his cab in the street and soon the place became quiet.

"Naturally," Chuncery said, grieving to himself again, "being married to a sloppy guy like me, naturally it gets pretty monotonous after a while. So I don't really blame her for getting sick and tired."

"All right, stop crying," Juley said. "I sent Frenchy to her mother's house to talk to her again. I'm working on it, ain't I? Give me time. I'll fix it all up."

"No. You can fix a lot of things but not this. She'll never come back."

"Don't mope!" Juley said. "Put on a tie. Look neat. Take a shave and change your shirt sometimes. If you have to get married, then why don't you accept the responsibilities? . . ." There was a draft on his neck. He turned. "Hey, slide the door back! The cold is blowing in."

It was Spencer, the hackie, who had just walked out.

"Hey, Juley!"

"What's the matter now?"

"There's a girl in my cab! I sitting there—a girl!"

"All right. You found her, her. She's yours."

"No! Listen, Juley. She ain thing to eat. She's broke. Sh place to sleep tonight. Juley, help her!"

"She's a phony!" Juley sa old are you? Don't you kno handler when you see one?"

"With you everybody's go fake," Spencer shouted, gett nant again. "With you ev looking to gyp people."

A hackie came down the co mouth still full of food. "Yo cynic—all brains, no heart," and then Juley found everyo place piling on him.

"All right," he said. "Lay her in. I'll show you in five she's a phony or not."

Spencer hurried out.

She was a blonde. She weig a hundred pounds and she w kind of leather jacket with a

Morison's triumphs
been on the milder
at she has survived
location trip to Lone
you'll be seeing her

WE SHALL endeavor to report quite calmly on an afternoon spent at the home of Miss Patricia Morison in Beverly Hills, California. Miss Morison is a cinematic performer for Paramount Pictures who lives in a nice white house with her father and mother, her brother, a male cousin and a female cousin from London and a dog. This latter adjunct is of the friendly variety which needs a touch of kicking at intervals. The others are friendly and need no kicking.

The cordiality of the combined Morison welcome was genuine and warm beyond question. Your correspondent was slightly unmanned by such attention and sat tentatively on the edge of a divan and broodingly nursed his suspicions.

"You'll have a spot of tea with us, of course," said Mrs. Morison gaily, with the positive air of a lady who knows what bountiful tokens she is conferring. Mrs. Morison was looking at the tray of tea paraphernalia with the rapt gaze of a True Believer and Patricia was edging about with the expression of an early Christian martyr.

"Crumpets!" cried the female cousin from London, aged nineteen. She uttered this with the same voice Captain Sutter may have used at the discovery of gold.

At this Patricia really seemed to go through the Great Agony. Her bulk has been increasing, her employers have been sharp in warning and yet here were the crumpets.

"Oh, I guess one wouldn't hurt me," she said, and then added, "Have one, won't you?" with the obvious intention of including a victim in her crime. The interviewer took one. He also found himself taking a cup of tea and a twig of napkin which he balanced on his knee. It was plain to him now that he was cornered in a small, hallowed sector of the British empire. One bite of the crumpet convinced him that the English are a valorous race who will never be conquered. Jumping from the frying pan into the fire, he took a gulp of the tea, spluttered in a whalelike fashion and ended by nearly strangling to death.

"Maybe he'd rather have a highball," suggested Patricia nervously.

"Yes," said our hero faintly.

"Yes, what!" said Mrs. Morison in an unbelieving voice.

"Yes, I want a highball," said our man, who has been known as a boor for many years.

Mrs. Morison took one step backward and looked at him, without saying a word. Patricia, not wanting to be accused of destroying the Freedom of the Press, went tearing out of the room. From the direction of the kitchen her plaintive cries of "Whisky! whisky!" could be heard in the distance. The niece turned away in sympathy. Mr. Morison looked as if he wanted to come over and put a protecting hand on our hero's shoulder.

When Patricia came back with the drink, he took two quick gulps at it, looked about with a new air and began to ask questions. That is why the interviewer became indescribably tangled up with talk about British agents, counterespionage, Mexican bullfighters, English refugee children, Patricia as a comedienne, Patricia as a glamor girl, Patricia as a singer and a general discussion of the New York housing situation.

The Morison family came to this country from England in 1905. Patricia was born here and had reached the age of two months when the folks decided in 1914 to go over and help end the German menace. Papa was turned down by the navy because of age but Mamma worked with the British Intelligence.

"Not exactly a spy," explains Mrs. Morison. "More a counterspy. Opening letters. Keeping people from blowing up things."

It was pretty exciting business and it has tended to make Mamma suspicious of individuals in wartime.

The family came back to New York in 1920, where Patricia first attended public school and then spent a year in Westchester at what she calls Miss Sniffton's School for Snobs. She came back to Washington Irving High and majored in art. At home she was given to impersonations, which kept the family beside itself, so they sent her down to the Neighborhood Playhouse where

PHOTOGRAPH FOR COLLIER'S BY CHARLES KERLEE

Marta Oatman taught her acting, poise and deportment.

She got a walk-on in Growing Pains and then worked as a model in a department store. By selling twenty bucks' worth of tickets she got a part in a Greenwich [illegible], put on in an old stable known as the Provincetown Playhouse, and sang a naughty song called Naïveté. The thing lasted one night. She played with Lenore Ulric on the Subway Circuit and was then understudy for Helen Hayes in Victoria Regina, the easiest job in the world because if anybody but Hayes had dared to do that part there would have been lynchings in the orchestra seats. What brought her to Hollywood was the notice she got in The Two Bouquets, which is one of the least remembered of Marc Connelly's ventures. Warner's hired her to sing the lead in The Desert Song and then shelved the old chestnut and turned Morison's contract over to Paramount. She arrived in Hollywood, was given a brief going over by the publicity department and dubbed the "girl with the chameleon eyes," and then was ushered into the presence of Harold Hurley, who thrust a gun and a script into her hands and ordered her to get up on both of them. The picture was Persons in Hiding and J. Edgar Hoover had palmed it off on the boys and it set Morison as a brunet menace instead of the amusing dame she featured herself as being.

"I tell them I can sing, too," she says, "but what difference does that make?"

Her success has been steady and by now she is regarded as a property and to prove it the studio sent her on a personal-appearance tour last year. In Seattle they gave her a totem pole. In Brockton (Mass.) they gave her a pair of shoes. In Portland (Me.) they handed her a lobster. In Waltham they gave her a watch. In Taunton, famous for bronzes, they presented her with a statue. She stayed carefully away from Worcester, which is said to be famous for grinding machinery.

After this triumph, she went to Mexico. In Mexico City a handsome toreador became so enamored of her that he followed her around all the cafés. One day at the bullfights, he came right over in front of her box and saluted. The crowd cheered and clapped their hands, shouting, "EEE-hah! EEE-hah!" Miss Morison stood up and took a bow. At the same moment a rather paunchy gentleman stood up behind her and took a bow.

"It turned out to be Señor Almazan—to whom the matador was dedicating the bull," says Patricia, sourly.

The Señor Makes His Point

Her best fun the last year was centered at Lone Pine, the famous movie location. On this jaunt nothing happened except that Richard Dix got shot in the face with a blank cartridge; Preston Foster was thrown by a horse; the same horse ran away with Miss Morison, and she came down with a fever of 103. Some of her associates thought she was shamming and wanted her to keep on working. At this a young man from Montevideo (ah, me, these Latins!), who was playing a part in this sequence, got so mad he took his teeth out and threw them down a ravine. Work was suspended while the crew scrambled down the precipice after the valuable molars.

By the time they had been recovered and wired together with choice bits of the local ore, Miss Morison had regained her health. The Montevidean made his point, whatever it was.

Another Morison experience had to do with Orson Welles, who scared Patricia long before he became the Man from Mars and frightened the hell out of America. She had been told to come to his offices in the St. Regis Hotel in New York to audition for a part with the Mercury Theater. Welles met her at the door, garbed in a flowing dressing gown and with a hunk of beefsteak clutched to his brow. It seems there had been an unfortunate altercation with a taxi driver in which the driver had stabbed Welles with a short left while Orson was reaching for his sword.

"We talked about painting, science, writing, politics, handball, music, diplomacy, sculpture, the WPA, the TVA, the Abbey Players, books and taxicab drivers—but he never did mention anything about the audition for the Mercury Theater."

The lady's full name is Ursula Eileen Patricia Fraser Morison, which seemed to please the various relatives who had an interest in the matter. She probably has her interest in the theater from her mother, who, in the days before she became a sleuth, was considered the image of Maude Adams and had encouragement from her loyal friends on that platform. Mrs. Morison got her comeuppance as an artist when she answered an advertisement for an actress and found that what they wanted was a woman who could hang by the back of her knees from a trapeze and hold a strong man in her teeth. It discouraged her.

Candy vs. Career

As for Patricia, she is a strange one. She has the appearance of oomph but acts singularly unlike it. At the moment she is heart-free and nobody is climbing up the trellises in quest of her hand. Her worst trouble is an appetite for candy and ice cream and the Paramount people have waved a stern finger at her about it. Either sweets or a career, they say harshly; you can't have both. The press department declares she is as trim as a streamliner, which is slightly south of the truth. The only man she was ever in love with was Count de Gueroan Morny but that business is now washed up.

Her main concern is in keeping the family intact and that is harder than ever now that she is helping her relatives. The situation became grave when she met her English refugee cousins in New York and brought them back to Hollywood. She had just been on the aforementioned personal-appearance tour of New England and was out of folding money. She had enough for the train tickets and a few bucks for pemmican and gumdrops but that fund had evaporated by the time they reached Albuquerque.

When the steward, noting their reluctance to get started in quest of fodder, asked if they wanted their dinner brought to their drawing room, Patricia gave him the lifted brow and a bored pat of the mouth, expressing distaste. At this juncture she discovered that a bountiful gentleman, touched by the faint and mousy wails of the starving young male cousin from England, had invited him in to dinner. The ladies virtually dislocated their necks getting in the way of that invitation.

"Just sort of hooked on to the parade," says Patricia.

What this proves beyond the fact that Hollywood personalities eat like mules and go broke regularly is not clear, but for the purposes of history it may be added that Morison was getting her first real break on that location trip to Lone Pine. They were making a little shambles known as The Roundup and she was being starred and her name would be in big block letters and the front office had notified her that if she gained ten pounds more a little man would come around at an appointed hour and shoot her like an overstuffed quail.

This has given her pause. ★★★

OUR NEW ARMY

ILLUSTRATED BY GEO[illegible]

Skeet shooting is a lot like sho[illegible]

"My men come first, General. You're out o[illegible]

In past issues, Collier's has printed reports from its own correspondents in camps and forts and armories of the new American Army, depicting progress in varied sections of the country.

This week there are reports from the high country in Utah; the industrial Midwest; the far Pacific Northwest. In future issues other sections will be pictured so that, every few weeks, a complete idea of what is going on may be obtained by readers.

INTERMOUNTAIN: Utah National Guardsmen, last in the nation to be called up, found out one way to make up for lost time. Sergeant Leland A. Pickett and Private Conrad F. Hoff, Jr., both of Salt Lake City, stopwatched each other getting into old-style and new-style uniforms. Result: Slacks take thirty-nine seconds less to get into than breeches; khaki leggings save forty-five seconds over the old wraps; the new work suit goes on in half a minute less than the old. . . . Nearly two minutes more to sleep.

Salt Lake City clubwomen are quite interested in hearing about the Air Service—especially from good-looking officers. One program-committee chairwoman even added to her organization's request for a speaker: "Will the captain please wear his uniform?" He did.

Private Robert Pohl, lives his life amid bombs, bullets and other modern gadgets of death at the Fort Douglas air base. In his spare time he prowls the canyons of the Wasatch Range for wood from which he makes bows and arrows. Just in case.

Air Corps officers in the Rockies have their troubles. Once they had a bombing range of three million acres of wasteland. Now they have only 1,560,000 acres. Sheep and cattle ranchers, who used some of the former range for grazing; and objected to even dummy bombs dropping among the stock, howled to Washington. So that ironed out, bombing practice started on uninhabited islands in Great Salt Lake as targets. Bird lovers yelled that the homes of pelicans, blue herons and sea gulls were wrecked. So Lieut. Col. E. G. Harper, base commander, had to send out ground crews to shoo the birds away from some islands—and issue orders not to bomb Bird Island at all.

MIDWEST: "You know why I'm doing this?" queried a despondent rookie of the 138th Infantry, Missouri National Guard, peeling spuds at Jefferson Barracks. "Well, me and another guy are standing beside the parade ground and this soldier comes by on a bicycle. I call out to him, friendly like: 'Hi, Junior, where y'going?' He stops, so I asks him can I have a ride on the handle bars. Then he gets off and I see them little silver things on his shoulders. It turns out he's a captain and just rides around for exercise. He's still riding—and I'm still on K. P."

Because Camp Robinson, Arkansas, wasn't ready for them, most of the boys of the Missouri National Guard were quartered in the new St. Louis Armory. And, although a third of them could have gone home nights and most of them could have left after five in the evening, more than three quarters stayed for supper. That was because the food allowance was $1.26 a day a man and T-bone steaks were daily chow.

The 138th, incidentally, has a long, varied history. It dates back to the First Missouri Volunteers of 1846, who marched through Mexico with General Doniphan. In '61 the outfit was captured intact by Union General Lyon and Franz Sigel's German volunteers, and its members disarmed and paroled. Some of the men fought for the Union; others for the South. In the Spanish War the outfit was left in Georgia, but it distinguished itself in the Argonne in 1918.

Sergeant William Schneider of Company B of the 138th tried to discourage his son, William Jr., from enlisting. The boy joined the Air Service, won a commission at Randolph Field, Texas. Now, father has to salute son.

Officers of the 110th, Observation Squadron, Missouri National Guard, are training for shooting down enemy planes by means of skeet equipment. Cases of clay pigeons and shotguns are standard equipment. Skeet and plane-shooting are much alike—you have to keep ahead of your target in each case.

●

PACIFIC NORTHWEST: In muddy, rain-swept Fort Lewis, south of Tacoma, Washington, the man "who once refused to serve a general" was figuring out how many hot dogs the boys would need after a twenty-mile hike.

"Though they say it'll be twenty miles," reflected Staff Sergt. William Gubbins, 15th Infantry, a short little ex-British soldier, "it'll probably be only about ten. And when they get through tramping, there'll be frankfurters and steamin' coffee and chocolate cake waitin' for 'em. They used to be lucky if they got met at all."

He turned to one of his kitchen helpers, and told him, "Never mind the raspberry jam for the hike. It would just spread all over everything." Then he continued:

"Everything's different now. We take these big field stoves along with us in a truck, and we'll be cooking the food on the way. They're slick rigs, I tell you. Of course, all the young fellows grumble. That's nature. They all get more than soldiers ever did—and they want more. We waste more food than European soldiers eat. I can remember, when I was in the British army—we were lucky even to get beef on Sunday. And I can remember right in this Army, when I made ten heggs do for French toast for a hundred men. Now, humph. They use seven dozen heggs for it."

Sergeant Gubbins has been cooking all his life. For all his gruffness, he is the kind of old Army man who likes to break in young boys: the kind that is stern and fair. He was born within the shadow of London's Tower bridge. He joined the British army in 1904—to cook for the troops. But before the World War broke out, he already was an American, in the Army, and cooking over here.

He knows all the old Army tricks—such as adding a couple of pounds of cornstarch to a batch of omelets—to pad it out. But he said proudly, he doesn't have to practice them any more.

The young fellows in his mess speak with evident awe of Sergeant Gubbins' exploit at "refusing to serve a general." He himself half denies the story: "Well, that's not exactly so. I've been in this Army 25 years, and I know one thing: you don't go around giving your superiors the devil!"

The incident—believed solemnly throughout M Company of the 15th—occurred overseas. Sergeant Gubbins, at the front, was running out of food for his own men. In walked a general, and asked to be served.

"My men come first," the sergeant told him. "And I don't have enough even to feed them properly. You're out of luck."

It may not have happened, but M Company wouldn't "put it past" Gubbins. ★★★

The boys can get into the new uniforms faster

Comes the Revolution

By Harry Sylvester

"I'll go down and tell them myself," Markham said in English. There was no chance to stop him

Of Alice Calhoun, Bannon might have said her form was logic but her essence was confusion. He will never forget her

SANBORN'S—the new one in Monterrey, not the old one in Mexico City—is always crowded on a Saturday night. The usual tourists are there and with them the week-end crowd, down from San Antone or Dallas with their wives or girls.

I had got there early and I had a booth alone and the hostesses were looking at me and wondering when I was going to get out and let a party move in. But I felt like eating slowly and a lot. One of the hostesses came over and asked if I would mind if a couple sat with me. She said that the man said he knew me. I doubted this because no one but my office knew I was down here, but I said I wouldn't mind.

The hostess came back with a kid about twenty-four and he had with him one of the best-looking girls I'd ever seen. She was dressed in a dark, severely tailored suit.

"You're Joe Bannon, aren't you?" he said. "I saw you the minute I came in. Maybe you don't remember me?"

"Oh, I remember you," I said. "How are you?" His name was Keith Markham and his father owned the paper I used to work for before I went with the Times. He had worked on the paper a while himself and then we didn't hear much more about him. He hadn't been too bad and he hadn't been a nuisance.

"This is Miss Calhoun," he said. He was a little awkward and you could tell he hadn't had much experience traveling around the country with unchaperoned young ladies.

"Alice Calhoun," she said, giving me a thin but very firm hand. Her mouth tightened a little in a sort of professional or public-appearance smile and her full name was supposed to mean something to me but I couldn't place it at all.

"Sit down," I said. "How have you been? I sort of lost track of you after I went with the Times."

"Oh, I've been around," he said. "You've been down here on assignment, haven't you?"

"Kind of," I said. I wondered how he knew. We had hoped to get an exclusive on the beginning of a revolt.

"You were in San Luis?" he went on.

THERE was no use denying it, although I wondered how he knew. He saw it in my face and grinned boyishly.

"I suppose you're wondering how we knew?" he said. The girl looked at him with a sharp, sidewise glance and her mouth went almost grim. I began to remember some things.

"I was the only one of the boys down there," I said, "so naturally I didn't think anyone knew. I didn't send a single story to the paper. I was there six weeks, waiting for the damned thing to come off. I don't think it will now."

"It will within the week," Alice Calhoun said. The grimness had gone from her face but it was unsmilin
her now.

"Is that why you're down

"Close by the bottom of the ladder, sir. Also this bit of pipe."

"H'm, probably dropped by someone going up or down. Nothing to say who they belong to?"

"No, sir. Quite an ordinary pair of nail scissors. Pipe's ■ good quality briar —expensive."

Poirot murmured thoughtfully, "Captain Marshall told us, I think, that he had mislaid his pipe."

"Marshall's out of the picture," Weston said. "Anyway he's not the only person who smokes a pipe."

Hercule Poirot was watching Stephen Lane as the latter's hand went to his pocket and away again. He said pleasantly, "You also smoke ■ pipe, do you not, Mr. Lane?"

THE clergyman started. He looked at Poirot. He said, "Yes. Oh, yes. My pipe is an old friend and companion." Putting his hand into his pocket again he drew out a pipe, filled it with tobacco and lighted it.

Hercule Poirot moved away to where Redfern was standing, his eyes blank. He said in a low voice, "I'm glad—they've taken *her* away . . ."

Stephen Lane asked: "Where was she found?"

The sergeant said cheerfully, "Just about where you're standing, sir."

Lane moved swiftly aside. He stared at the spot he had just vacated.

The sergeant went on: "Place where the float was drawn up agrees with putting the time she arrived here at 10:45. That's going by the tide. It's turned now."

"Photography all done?" asked Weston.

"Yes, sir."

Weston turned to Redfern: "Now then, man, where's the entrance to this cave of yours?"

Patrick Redfern was still staring down at the beach where Lane had been standing. It was as though he were seeing that sprawling body that was no longer there. Weston's words recalled him to himself.

He said, "It's over here."

He led the way to where a great quantity of tumbled-down rocks was massed picturesquely against the cliff-side. He went straight to where two big rocks, side by side, showed a straight narrow cleft between them. He said, "The entrance is here."

"Here?" Colonel Weston said. "Doesn't look as though a man could squeeze through."

"It's deceptive, you'll find, sir. It can just be done."

Weston inserted himself gingerly into the cleft. It was not so narrow as it looked. Inside, the space widened and proved to be ■ fairly spacious recess with room to stand upright and to move about.

Hercule Poirot and Stephen Lane joined the chief constable. The others stayed outside. Light filtered in through the opening, but Weston had also got a powerful torch which he played freely over the interior.

(Continued on page 46)

He pulled himself up. "Hullo," he said, "there's a box up here"

Zivic Pride

By Lester J. Biederman

There's a split in the five
boys. Two of his brothers

who added a welterweight
the laurels of the battling

THE first thing Fritzie Zivic did after he won the welterweight title from Henry Armstrong was practically go off his nut. He waltzed over to the microphone and hurtled into it: "Hello, Mom! Hello, Joe. Hello, Pete, Jack and Eddie. Set 'em up for everybody."

If Fritzie ever had any doubts about his popularity in Pittsburgh, they were dissipated that night. His brother Pete's bar was crowded to the doors. His father-in-law's saloon was jammed with thirsty Zivic fans.

"If they didn't have that two-o'clock Pennsylvania closing law I'd 'a' been busted," says Fritzie, mistakenly.

This was all meat for Pete who keeps a sign posted over his bar which modestly proclaims: "Pete Zivic—the oldest, lightest and smartest of the Zivics." Not only is the sign there for everybody to see but Pete believes every word of it. Every Zivic thinks he could, in his prime, have licked every other Zivic. The entire family of brothers, Pete, now 39; Jack, 37; Joe, 33; Eddie, 29; and Fritzie, 26, have at one time made a living with their fists. Quite contrary to Pete's boast, there are competent observers who believe that the only smart Zivic was Joe, who had two fights, hung up the mittens and turned to business.

Papa Zivic came over from Russia in 1890 and settled in the "Strip" district of Pittsburgh, where a man either fought or left the neighborhood in a defunct condition. He worked in the steel mills and the five Zivic battlers were born into that atmosphere.

TED | WILLIAM MEADE PRINCE

kie didn't like to waste
ne t king of love. But
w low to if necessary.
e found that he had to

LDICIE was a medium-small
an, aceable by nature and long
ffering in adversity. Had he been
pla a life for himself, he would
ad de devoid of all conflict and
and. Even his marriage to
y Dawn was the kind of calm af-
s quiet soul liked. It had been
thin outgrowth of a situation
each other of them had any con-
thereon the result of any emo-
the art of either.

Dawn had grown into a mar-
ble young woman with no dis-
ting characteristics to cause the
men to flock around her, and so
was passing her by like an eve-
ness. Buldickie, as any other
eede a wife to chop his cotton
ok his meals, but no woman on
Bee end plantation had made
effort to marry him.

Dawn," said Buldickie one
evening, "Giles is fixin' to git
up a my own, next year, and I
de house back er de puck-
ove. done got me a stove and
and Widow Duck gonter gi'
. All I got credicks on de books
mmissary. Le's I and you git
up.

Dawn slowly rolled her eyes
med er mouth twice before she
peak. "Married up?" she re-

" Buldickie said.

took me consideration. Daw-
wn udied her mind. "Most
he tally suggested. "git dey-
se 'ves cou'ted a little befo' dey gits mar-
ried up. You ain't cou'ted me a lick,
Buldickie."

"Nor neither ain't nobody else cou'ted
you," Buldickie pointed out.

IT WAS a fact and Dawthy Dawn knew
it. She made one more bid for ro-
mance: "I hyars dat de mens most gen-
ally buys dey gal a pair er stockin's to
cou't wid befo' dey gits married up." She
giggled in an effort to be coy. "I hyars,"
she went on, "dat Newman Dykes puts
de stockin's on his gals, and den don't
marry up wid 'em, dat ole devil!"

"Newman Dykes is a sinner man for
dem' a gal like dat."

"Some er de gals," Dawthy Dawn said
archly, "is already married up when
Newman Dykes puts dem sockses on
'em—f'm what dey says."

"Det ain't no skin off'n my back,"
Buldickie told her. "He do like he do
and I do like I do. Den, when he die
off, he gonter punch chunks down in
hell. But me, I'm gonter fly about
Glory, chatterin' wid de angels and
blowin' my harp—"

"I didn't know you c'd blow a harp."

"I can't. But I kin learn how."

Conversation stopped. Presently
Buldickie stood up. "Well," he said, "I
reckon I'll be gittin' 'long."

"Wait," Dawthy Dawn said, "so I puts
on my Sunday dress."

"Better put on yo' shoes and socks,
too," Buldickie advised. "Hit's bad luck
to stand befo' de preacher on yo' bare
feets."

And so they were married; and nothing
ever caused less excitement or
comment. Even B'r Charlie put little
enthusiasm in the ceremony.

However a wedding is a stirring event
to a young couple, no matter how dull
it may seem to others. As they walked
down the tumrow toward the pecan
grove, Buldickie took his bride's hand.

"You hyared what de preacher say,
Dawthy Dawn? He say I and you was
a man and his wife. I like dat."

Dawthy Dawn nestled against him.
"Me, too."

As far as Buldickie was concerned,
the honeymoon ended with this ex-
change of pleasantries. To his bride,
however, it had only begun.

"S'posin'," she asked coquettishly,
"dat when you axed me to marry up
wid you, I'd 'a' tole you to git 'long."

"Hit's a gal over on Duke's Bend,"
Buldickie explained flatly, "dat is about
due to git married up and ain't had no
takers. I'd 'a' got her—name er Eula."

Still hungry for a crumb of romance,
Dawthy Dawn squeezed his hand. "But
you axed me first, hush?"

"You," Buldickie said practically,
"was closter to home."

They settled down to a life of sober
domesticity. Buldickie had winter
plowing to do in dry weather and on
such days Dawthy Dawn spent a dutiful
afternoon on the bayou bank fishing
for a small garfish for their supper.
When it was too wet for field work, Bul-
dickie roamed the swampy woodlands
hunting rabbit and squirrel.

Yet, Dawthy Dawn continued to feel
cheated of romance; and as the dull days
went by she decided to do something
about it. Her first step took her to the
cabin of Modom Aw-Bear, the hoodoo
woman.

"HIT'S about my husband," Dawthy
Dawn explained.

"You' husband, *hein?*" the old witch
woman repeated. "He wawkin' de bayou
already, *hein?* And you don't be mar-
ried a mont'? Dat ain't good."

"Naw'm, he ain't wawkin' de bayou
on me."

"Ah! Den he don't buy you grub and
no clothes, yes?"

"He buy me all er dat," Dawthy Dawn
admitted.

"But he don't love you?"

"Yas'm, he love me."

"*Aieee!*" Modom Aw-Bear exploded.
"What all you, *mere de Dieu!*"

"I 'ain't know'm," Dawthy Dawn said
plaintively. "He jest got married up—
like dat. Buldickie didn't cou't me a
lick. He jest say, come on, he's got mar-
ried up, and so we got. And den us acts
like us been married a hund'ed years."

"Aha!" Modom Aw-Bear chuckled.
"No what you call de romance, *hein?*
No sweet love he make wid you? No
tawk-tawk he make wid you 'bout how
purty you look, no?"

"Yas, dat's jes'."

Modom Aw-Bear sighed heavily.
"Sweet love for a young gal," she de-
clared, "is mo' gooder den de money.

(Continued on page 45)

To South America with the Birds

By
T. Gilbert Pearson

We speak of wild birds as "our birds" but many of them spend more time in tropical countries than here. And many of them never live to come home

"The Day of the Birds" is an annual event in Buenos Aires, when thousands of wild birds, many captured especially for the ceremony, are freed from cages

Rheas are nearly extinct in parts of South America. Here's one reason—a rhea-feather blanket, price $50, which accounts for over 300 birds

Yellowlegs are protected in Canada and the U. S., but not in the West Indies. Here's part of a day's bag of 268 shot in Barbados Island

IF SOME of our birds did not take such amazingly long migratory flights, it might be easier to protect them from human enemies. While the bluebird, the song sparrow and others merely drift to warmer regions of the United States, many fly to lands south of the Rio Grande and the Florida Keys. In fact, millions of individuals of 421 species leave Canada and the United States after rearing their young and do not come north again until the approach of the next breeding season. Some stop in Mexico or Central America, but many go on to the jungles, beaches, Andean regions and the pampas of South America.

For some time there has existed the uncomfortable feeling that our migrants have scant legal protection after they leave our boundaries. It was to learn firsthand something of this subject that in autumn of 1939, when the migratory birds began to leave, I went with them to South America, and spent ten months of continuous travel, observation and inquiry.

In the nine Latin-American republics visited, the situation affecting wild life is about as it was in the United States in those days many of us recall, when ducks hung by thousands along South Water Street, Chicago; and quail, snipe, doves, meadowlarks and robins were sold in Norfolk, Raleigh, Atlanta and New Orleans.

In the early years of this century, small groups in North America seriously began the work of arousing our people to the need for bird preservation. In South America a few earnest men today are organizing for the same purpose, but, as with the pioneer bird protectors in our country, they have undertaken a big job. It is no small task to educate ninety-four million people in any line and to keep them educated.

Forty-one kinds of shore birds, including yellowlegs, godwits, curlews, plovers and snipe, migrate southward along our Pacific and Atlantic beaches, some, in places, even taki... able flights over the sea.

Fraternity

By Mary C. McCall, Jr.

Don remembered a country, in one of his storybooks, where everything was upside down. This was upside down for Hugh

DON went slowly down the stairs. Angus, the Scotty, brushed by his dawdling legs and catapulted down to greet the new smell.

They came in the door, the three of them—Don's mother, Don's father and Hugh.

Dad said, "Well, son—here's Hugh!" and Mother said, "Here's Hugh, Donnie!"

The English boy said nothing. He looked anxiously at Don. His eyes were large and brown.

"Hello," Don said.

"How do you do," Hugh said, and put out his hand. Each of his words stood by itself, completely said.

Don took his hand. He could never remember shaking hands with another boy—only grownups. Hugh gave his hand a jerky kind of pump, hard and brief.

Angus was standing with his mouth open, eyes shining, tongue lolling, his head cocked to one side.

"Is that your dog?" Hugh said.

"Sure," Don said.

"What's his name?"

"Angus."

"Good boy, Angus," Hugh said. "Good chap." He knelt and scratched Angus behind the ears. That was where Angus liked to be scratched. He bent his head and stretched himself, responding to the touch, liking it. Don felt a hard lump in his chest. He looked up quickly and saw his father and mother smiling their overeager smiles, not looking at him, looking at Hugh petting his dog.

"Take Hugh upstairs, son."

"Okay."

The two boys went upstairs together. Angus pushed past them, jumping from step to step.

"Well," Don said in the room, "this is it."

"It's a jolly nice room," Hugh said.

Jolly nice! What kind of thing was that to say?

"What form are you in at school?" Hugh said.

"6B, but it's not a form. It's a grade."

"Oh. Grade. I shall have to remember that. I expect it'll be a bit awkward at first, the different names for things."

"Yeah, I guess it will, all right."

"I say—where's the lav? I'd like a wash."

"The *bathroom*'s next door," Don said.

Don sat down on his bed and began to pet Angus. Angus rolled over in complete surrender, presenting his stomach to be scratched. Don's father came in, carrying a small trunk. "Well, son, getting on all right?"

"Sure."

"Seems like a nice kid."

Don said nothing.

"Bring him downstairs. Your mother has some tea for him—for all of us."

Don's head jerked up, but his father was on his way through the door. Tea! Tea was for women—for Mom's bridge club.

Hugh came back, his face shining, his hair slicked down.

"We better go downstairs. We're having *tea*."

Angus jumped down. Don heard the plop of his landing, and turned on him, rough, angry. "You stay here."

"Oh,—mayn't he come along?" Hugh said.

"No," Don said. "He's not allowed out o' here, except when I say he can. He's a one-man dog. He's liable to bite strangers." He banged the bedroom door shut, almost on Angus' wet, black, indignant nose.

ALL through the unaccustomed tea, Don sat, sullen and withdrawn, watching his parents as they talked to the stranger, the way they talked to grownups they didn't know very well.

After tea, he and Hugh took a walk. His mother suggested it. It was cold now. Only the pale last of the light was left. The ruts in the road were stiffening.

"Your father said he'd take us to a football match on Saturday."

"Game," Don said. "Football *game!* . . . Say—if you ask me, the way you talk stinks."

Hugh stopped dead. "Look here," he said, and his voice was high and angry, "if you really want to know, it's you who has the wrong names for things, you and your tortoise-shell spectacles and hot dogs and talking through your nose. I didn't ask to come to your silly old States. I'd sooner have stayed home, a million, trillion times!"

"Well, why didn't you?"

"Because there's a war on, though you Yankees don't seem to know it."

"What do you mean we don't know it?"

"Well, you're jolly well letting us fight it!"

They stood facing each oth toe to toe on the gray road i the house. The door opene a rectangle of gold light in the

"Come on in, you kids, and for dinner," Don's father said

Dinner was a repetition of worse. Afterward, they playe checkers. Don's father beat only two moves. "Well, Dc father said, "you'll have to do practicing before you can give a game! You play chess, Hug

"Oh, yes, sir. Father's a top player. He taught me when I small."

"Good! I'll take you on night."

The two boys got ready f stony silence. Don's mother c say good night to them. She k first, and then went and sat bed. "We're very glad to have Hugh," she said. "Sleep well, bent and kissed him.

Son! He wasn't her son! she have to call him son for? him. All she could think of no English boy who could play c liked the way he talked, like s the movies. She liked Hugh b him. She'd forgotten the birc stand he'd made for her at the day last week when he'd dahlia bulbs down to the cell and she'd called him a ban gardener and hugged him and a dime.

HE LAY awake listening to t ger breathing in the next stranger in his room, in his h stranger his mother and fa better than they liked him, t ger who would be here for a years, maybe forever. Ang round ball of warmth against ach, but he got no comfort fr Angus had run to Hugh as s came into the house. In a his dog would be just as mu dog as his own.

He swung his legs out ont floor—he had to have this thin his father and mother. Angus jumped off the bed. Don wal bend of the stairs. There h Downstairs in the living room and father were listening to He was still determined to sa must say, but he knew he here on the stairs and get ready.

He could hear the radio clea don is enduring another night bombing. For the fourth week, Londoners were roused by the air-raid sirens and a ear-shattering explosions. Th has not yet sounded, at four don time."

Don sat on the stairs, liste mother and father were right ting together in front of the f beds were waiting for them up and warm and safe. That w Hugh lived—London. In o storybooks there was a coun everything was upside down upside down for Hugh. It mi other way. He, Don, might place where lav was the right match and jolly and form, sc where all his words were wron side-down names for things.

He got up and went back to Hugh was crying. His head w in the pillow to muffle the thick sound of his crying, but Don c him. Quickly he bent over an up the warm, furry lump w Angus and dropped him on H

"Here," he said. "You tak night. He likes you."

A SHORT SHORT STORY COMPLETE ON THIS PAGE • ILLUSTRATED BY C. C.

Ho[illegible] ownership is aided by life insurance dollars inv[illegible]ed in first mortgages on private dwellings

Life insurance dollars invested in utility bonds help bring light and power to factories, homes, streets, schools and public buildings

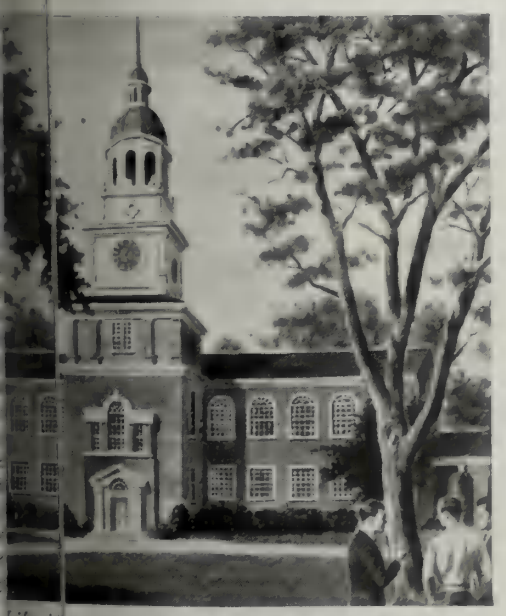
Farmers benefit from life insurance funds invested in first mortgages on farms

How your Life Insurance money works

HA[illegible] **YOU HAVE WONDERED** what a life in-
nce [illegible]mpany does with the money you pay as
niu[illegible] on your policy.

ayb[illegible] you have thought of this money as being
awa[illegible] under lock and key. But, actually, that
of [illegible] known as reserves, which is not needed
urr[illegible]t claims and expenses, is invested with
r fu[illegible]ds for the benefit of policyholders. If
wer[illegible] not the case, your life insurance pre-
ns [illegible]uld be higher because, when the Com-
[illegible] ca[illegible]ulates your premiums, it assumes that
rese[illegible]es will be invested to produce a stated
of i[illegible]erest. The reserves must be increased by
rate[illegible] interest each year the policy is in force.
here[illegible]re, the money representing such reserves
t to [illegible]ork in many forms of human endeavor
n al[illegible]parts of the United States and Canada.
nd if [illegible]ou could take a trip from coast to coast,
woul[illegible] see public schools, hydroelectric plants,
s, ho[illegible]es, office buildings, dams, sewer sys-
, hos[illegible]itals, and highways in which life insur-
ance funds have played an important part.

Life insurance dollars, invested in federal and municipal bonds, for instance, are busily at work all over the United States and Canada, helping to finance new bridges, better roads, modern school buildings, and a host of other public improvements.



►On your trip, you would see also private homes, apartments, stores, and office buildings that Metropolitan Life insurance dollars, invested in bonds and first mortgages, have helped to build.

Other life insurance dollars, invested in farm mortgages, are helping farmers to buy their farms, keep farm buildings in proper repair, purchase needed machinery, protect the fertility of the soil, and produce better crops.

Metropolitan has other dollars invested in the basic securities of railroads that serve the public. This money is at work helping to provide new equipment and to move the raw materials that keep factories humming, men in jobs.

►Other millions of dollars of policyholders' money are invested in plants that help provide light and power for homes, farms, and businesses. Still other millions are at work helping industrial concerns to build better mills, lighter, cleaner, safer manufacturing plants, make better products, and to establish new industries.

Of course, your primary interest in life insurance company investments is to know that they are in sound securities and that they earn the interest which, as previously explained, helps to keep your premiums lower than they otherwise would be. You are also interested in having the Company earn the highest rate of interest consistent with security of principal, for any interest earned in excess of the rate assumed as the basis for the premium may further reduce the cost of your life insurance through dividends. In the meantime, your life insurance dollars are also playing an important part in the social and economic structure of the nation.

Life in[illegible]rance dollars invested in federal, state [illegible]nd mu[illegible]cipal bonds help bring you better schools, roa[illegible] and public improvements of all sorts

Better living conditions are fostered by life insurance dollars invested in first mortgages on modern apartments

Frederick H. Ecker, CHAIRMAN OF THE BOARD

Leroy A. Lincoln, PRESIDENT

1 MADISON AVENUE, NEW YORK, N. Y.

How to knock your boss down . . . and keep your job!

1. I was riding my bicycle home, first day of my new job, when who should I run smack-dab into but my new boss! I knocked him flat, skidded across the sidewalk, and went through the biggest plate-glass window in the drug-store!

2. Nobody was hurt much, but my bike was ruined. The boss was so mad he fired me on the spot. The druggist wanted to call the police . . . until I promised to pay for the window. Then he gave me a cup of coffee.

3. "One for you, sir?" he asked the boss. "No!" the boss snapped. "Never touch it! The caffein keeps me awake." So I piped up, timidly: "Have you tried Sanka Coffee? It's 97% caffein-free, and can't keep you awake."

4. "That's right," said the druggist. "I serve Sanka Coffee myself." The boss said: "In that case, I'll try a cup." He drank it. His face brightened some. "Hum—good!" he grunted. "But are you sure it's 97% caffein-free?"

5. I showed him, on a can of Sanka Coffee, where it said: "The Council on Foods of the American Medical Association says: 'Sanka Coffee is free from caffein effect and can be used when other coffee has been forbidden.' "

6. Next day I got a note from the boss. "Thanks for telling me about Sanka Coffee. It's wonderful, and it lets me sleep. Come to work tomorrow . . . I can't lose a smart boy like you. P. S. I paid for the broken window."

SANKA COFFEE

REAL COFFEE . . . 97% CAFFEIN-FREE

Sanka Coffee is real coffee . . . all coffee . . . a blend of the finest Central and South American coffees! Drip or regular grind.

he moved into the servants' quarters behind the bungalow and began cleaning his kitchen.

It was too late to see to anything. The drone of the heavy enemy planes dived near to the earth and she crouched and hung her head. There was the high scream of the lighter Chinese planes soaring and then plunging upon the enemy from above. She lifted her head—had to lift it to see this.

"Brave—brave!" she cried aloud. Two Chinese planes against twenty! The Chinese had so few planes that they sent up one—two—against the vicious flock beneath them. But the Chinese pilots were nimble and quick. Their small planes buzzed and darted and whirled, firing, evading, firing again. She ran to the window and shouted at them.

"Oh, brave — brave — brave!" she shouted. The enemy formation was breaking up and whenever that happened the Japanese airmen became confused and soon they would withdraw. But before that came about she saw a bomb drift down, veering a little in the wind. It was headed straight for Gray's house. She watched it, her hand to her mouth. Would the wind be strong enough to push it beyond the compound wall? It came down, a long, silver slant, pointing a little to the south, a little more, enough. She put her hands to her ears and opened her mouth and felt the explosion all through her body. A great spray of earth and bricks flew up. But Gray's house was still safe. She saw it still whole, debris piled against it.

SHE went out after it was all over and the hospital ordered again and stepped into the house. The men were already back, plastering the walls, nailing down new boards where white ants had eaten away the floor, putting in new screens at the windows. Siao Fah was there to hasten them.

"You are all safe?" she inquired.

They laughed back at her for answer, and one of them spat on the board he was nailing down, and then remembering that the floor was for a foreigner wiped it off with the sole of his shoe.

"Thomison doctor's house will be ready, Lady Doctor," Siao Fah said. "Don't fret, don't excite yourself. You have said he comes in seven more days, and in seven more days all will be finished."

"Don't forget I must have furniture in and curtains up," she said. "Two days for that, if the Japanese allow it."

"The gods decide, not they," Siao Fah said calmly.

"I'm not so sure," she said.

"Ah, but we are," he replied.

She went away, full of that deep, aching pain that was with her now night and day. "I must get used to it," she thought. "I must just get used to it."

So she went out one rainy day between operations, a day when the good gray clouds protected the city, and bought for the price of American cheesecloth Chinese-figured silk to make curtains for Gray's house and clean, straw-colored matting for the floors and plain, heavy Chinese furniture. She piled everything on rickshas and took one herself and followed her caravan back to the hospital. And that evening she measured and cut and the hospital sewing women came and helped her and Siao Fah sweated and pushed the furniture into place, and so the house grew under her hands into Gray's home. And the next day before the air-raid hour she went with two hospital coolies and Siao Fah into Gray's rooms and watched them take Gray's things out of this place, where he had lived alone into the house where he would live with Louise.

It was the first time she had ever been in his rooms. She stood there looking at his belongings which she had never seen, his books, his few pictures. of his parents she had seen. brought them to her one day.

"These have just come," he "They are my mother and fat

She had studied the hand faces, very gentle faces, his delicate and too sensitive. "I wonderful when I told them I ing to China," he said tenderly. as well have said I was going t their only one, you know. But me to go ahead."

She had grown up in a houseful of children, a bustli her father. "Don't see why Ka good enough for any child of had grumbled, and grumbled letter to this day.

And Louise—would she be l the child of plenty and peace rooms were simple and plain b where there were the signs o ents' plenty—the sheets on hi were linen, and she had never tween linen sheets in her lif closet a blue dressing gown forgotten, a heavy American his initials monogrammed on t A folded silk handkerchief w pocket. She pulled it out and cheek upon it. Gray's smell, fragrant of piney soap, was "I'll keep it," she thought. He would not miss it.

Into the house went his t easy chair, his heavy Chinese books. She was glad she had carpenter to build the bookc opened the books, one after Marco Polo, crisscrossed with and queries—a Chinese *materi* written by a missionary doct and poetry again. She had n no, she would have no right wh came, but now Gray had aske

She came back the next nigh hospital was quiet and the rain ing, a curtain of safety all da down in Gray's chair, and book. Everything was ready house was not bombed in the or two days or at utmost three would come into it, into the had made for him. She had m him, for him alone, not for Lo into the bedroom she had pu bed like his, and from an old shop she had bought a sma table of blackwood and a car But everything else was for h

BUT when he came in, she mu She had in these few days love running in and out of this was sweet to open the door come in, to move a chair, a tab amine the way a picture hur range a cushion, to imagine hov look to Gray when he first saw agine—to imagine it was for for herself. She leaned back chair and let herself imagine, of Shelley open upon her kn could not read it, after all. Sh full of her own longings to other's.

"I almost wish," she thoug wish it—that a bomb would fall now—upon me, in this house."

There was a loud crack of n leaped and the book fell from with a crash. What was that bomb, of course—only a door, shut.

She heard a heavy step, ar she could rise a man stood in way, a tall young Chinese, i blue uniform. The light of th lamp fell upon his face and sha —an angular, harsh, resolu youthful and strong.

"Who are you?" she asked.

"Are you the American wor tor?" he demanded. She coul was a man of authority.

"I am."

"I n come to the hospital. I have e ere who must not die."
"If t is a man, the Chinese Chung ct will take care of him. I care for w men."
"A hinese cannot take care of this n, e said. "He is a Japanese."
"A apanese!" she repeated. "But w- hy do you, a Chinese, say a pa se must not die?"
"I ve my reasons," the young man d isquely. "Come, woman doctor. er s no time to talk. He is bleed- ."
She ose. "Nevertheless, he must go the nen's hospital," she said firmly. "I e nothing of where he goes," the n d. "But you must be responsi- fo im."

E EPT at her side as she walked th gh the dark rain. He had the all shlight that every Chinese had se ys and poured a moving pool of it on their path.
"I c not be responsible if the Japa- e l mb the hospital as they have ny mes and he is killed among ers she said.
He reed to that unwillingly: "No, tha alone I will not blame you. But he c s in another way—if he is poi- ned r made away with or if he eds death or if—"
"He ill not be murdered in my hos- al, can promise you," she said ight.
"The you must make yourself re- nsil ," he said sternly.
"Wh are you?" she retorted. "How e y come upon me in the middle of nig and command me as though ere ur servant!"
I an Chen-Ta, called The Eagle, and m ch f of the Long Mountain guer- as," e said.
Sara oked at the man again. So this s the agle! Who did not know him? wen on: "This Japanese is my cap- e. W engaged the enemy four days in t northern part of the province I him took with my own hands, after ad w nded him. He is my prisoner."
And ou want me to cure him so that I ma kill him more fully?" They e in e hospital now and now in her ce. Se put on her surgical coat and an t scrub her hands.
Do n waste time washing," he said atien y.
It is ot waste," she said, "you do und stand these things."

But she made haste, for at that moment Siu-mei came into the room.
"Chung doctor has examined the Japanese and says he will operate, Elder Sister."
"That he will not!" the young man shouted. He put his hand on the knife of untempered iron at his girdle. "No one but this American woman shall touch him. He is mine and I say this for a command."
"I will operate," Sara said evenly. "Do not excite yourself. Siu-mei, let the man be taken into my own operating room. Make him ready yourself. Ask Chung doctor to be ready to assist, but only if necessary." She turned to the young man. "Tell me quickly what is wrong."
"He is wounded in the belly," the chieftain said.
"With what?"
"With this." He pulled the thick-bladed knife out of his girdle.
"Did you stab him?"
"How else would he be mine? He was escaping, the fleetest foot I ever saw. I rushed at him sidewise. He tripped me and I fell, but I thrust him while I did it and ripped the side of his belly. Even so he was trying to escape, holding his belly together in his hands."
"A brave man and therefore strong to survive," she said.
"He is no common man," the chieftain agreed.
She hurried into the hall and he was close behind her. "You cannot come into the room while I operate," she flung over her shoulder.
"I will come in," he declared. "It is my right to see that the man lives."
"I will not allow you in," she called back.
"Nevertheless, I will come," he maintained.
She let him come and let him stay when she saw the Japanese. There was no time to waste in argument. The man's life was flowing away in minutes and seconds with the blood that flowed from his side. She plunged her hands into disinfectant and drew on her rubber gloves and her mask. Around the table Siu-mei and Dr. Chung were ready and two Chinese girl nurses held the instruments. She wavered for one instant about the anesthetic.
"Siu-mei, you," she said. Why did she not quite trust Chung? The chieftain, perhaps—he was standing there glowering at them from the corner. She

"This one's for beginners"

How's your "Pep Appeal"? —by Williamson

Professor: Look here, you two, why didn't you attend my lecture? A fascinating subject: "The function of vitamin B_1 in the optimum dietary."
Dolly: But professor! We *know* our vitamins and all about "pep appeal"! Come join us for lunch and see!

Professor: What do you mean, *pep appeal?* It sounds like utter nonsense to me.
Sue: Why professor, you've said yourself we couldn't have pep without vitamins. You know, *pep, oomph, zip-zip, whiz!*

Dolly: There, professor, you have vitamins de luxe. In crisp, toasted curly flakes of wheat—that scrumptious cereal called KELLOGG'S PEP. Rich in the two vitamins that are least abundant and thus most needed in ordinary diets—vitamins B_1 and D.
Professor: But what a taste! What a flavor! And to think that all the textbooks in the library hadn't told me about KELLOGG'S PEP.

Professor: (sometime later) Well, I'll see tonight how your *pep appeal* idea works.
Dolly: You know what the philosopher said, professor: "Where there's pep there's hope!"

Vitamins for pep! *Kellogg's* Pep for vitamins!

Pep contains per serving: 4/5 to 1/5 the minimum daily need of vitamin B_1, according to age; 1/2 the daily need of vitamin D. For sources of other vitamins, see the Pep package.

MADE BY KELLOGG'S IN BATTLE CREEK

COPYRIGHT, 1941, BY KELLOGG COMPANY

wondered for an instant, waiting for the anesthetic, what he was thinking, used to death and violence. The mercy a knife could be was new. She took one quick look at him. His eyes were upon Siu-mei's face, absorbed in her task. He was staring at her, his black eyes unblinking.

"Ready," Siu-mei said clearly.

She picked up the shining scalpel and forgot everything. . . .

"Will he live?" the Eagle asked.

"He will live," Sara replied.

She straightened herself and folded her stethoscope. It was morning. The Japanese was still unconscious but he was breathing normally since she had given him a transfusion at five o'clock. There had been a fuss about blood. No one had wanted to give a Japanese blood, though his type was ordinary enough. Suddenly to everybody's surprise Dr. Chung had come into the room.

"Take mine," he said.

"No!" It was Siu-mei's voice crying out. "No, I don't want—"

But Dr. Chung's face moved slightly in an ironical smile. "A little Chinese blood will do him good."

He was scarcely paler when Sara had drained off the blood, but he took the cup of broth Siu-mei had run to fetch for him, and together they had left the room. The Japanese man's heart had strengthened instantly.

"Then I will go back to the hills," the Eagle now said. "In seven days I will return to fetch him."

"It will be more than seven days before he can be moved," Sara said.

"How long?"

"Make it three times seven."

THE young chieftain looked at her sternly. "But by that time I shall be pursuing the enemy far from here."

She smiled at his certainty. The Japanese armies were advancing upon the city, not retreating from it. The regular Chinese army had fallen back. Everybody was looking to the guerrillas for help. If the guerrillas failed, the city was lost, people were saying. The rich were already sending out their women and girls. At the treaty port miles away by the river American and English businessmen were sending away their wives and children in chartered airplanes. And here in her presence was the chief of the guerrillas!

"Why do you linger?" she asked. The Japanese lay unconscious between them. "You know the people look to you."

"Will you promise he will not die?" The chieftain's strong black eyes were upon her—a handsome fellow, she thought irrelevantly, and wished Gray could see him. Gray so ardently admired these men of the hills.

"I cannot promise. I can only say he will not die," she replied.

"It is the best you can say?"

"The very best," she replied.

"You are honest," he said. For a moment something warm passed between them. He was a Chinese guerrilla, the son of Chinese peasant parents; she was the daughter of an American farmer—continents apart, oceans between, but they stood face to face and she liked him, and he liked her. She smiled.

"But if I keep him alive and return him to you, you must make me a promise," she said.

"Is it just to demand a promise from me when you will give none?" His voice was full of hearty humor.

"No, but this depends upon your own will," she replied, still smiling.

"I will give it to you," he said instantly. "What is it?"

"If I heal him, do not kill him."

"I had no thought to kill him, if he lives."

"Why, then, should you keep him?" she asked.

"I told you, I have my own use for him," he replied, and turned and went away. . . .

The Japanese was conscious that same night. Sara went in when the first air-raid warning sounded and he looked at her and saw her plainly—a white woman, English or American. He chose English out of the four foreign languages he knew. It was unusual for a Japanese to know so many foreign languages, but he had often wished in the last six months that he could exchange them all for Chinese. He understood not a word, not a sign, not a laugh of these Chinese, especially, never their laughter.

"What is that noise?" he asked faintly.

"We are about to have an air raid," she said, surprised at his English. This was indeed no ordinary Japanese. Was he, in spite of all she had said to the guerrilla, a sure-to-die?

"Have you—shelter?"

"Certainly," she said, "we have ample shelter."

God forgive her, she thought, it was not ample, but she would not tell a Japanese so!

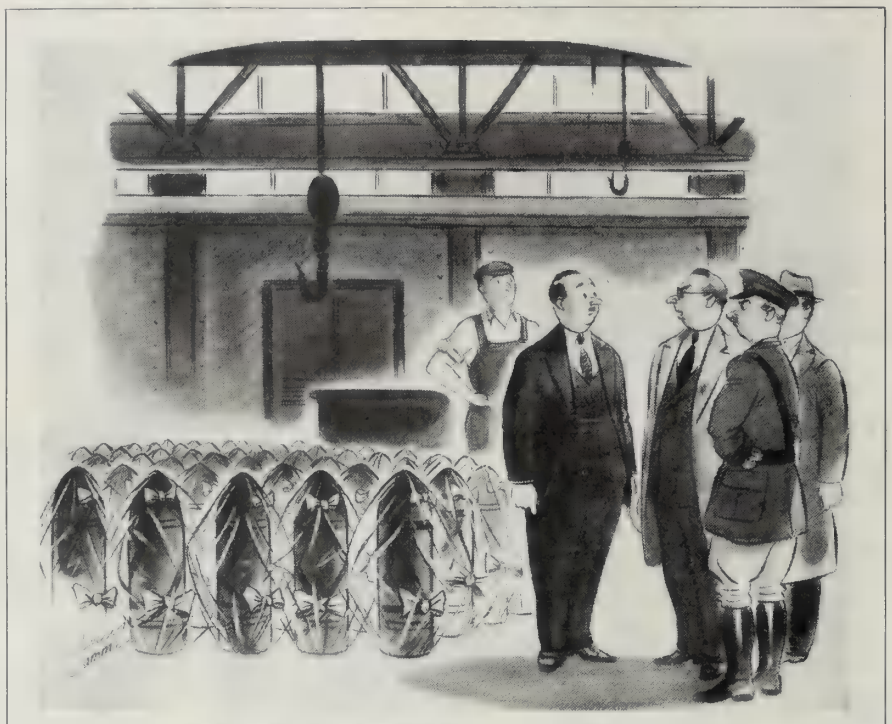
"Then—move me!" The voice, so faint, was imperious.

"You are afraid of your own planes?"

"Assuredly, they are excellent marksmen."

"Yes," she agreed. "They hit the hospital regularly."

"Ah," the Japanese said, "I am sorry."



She saw to his moving and watched him wheeled away. Dr. Chung went with him. It happened that all the sure-to-dies this day were women—one of them a mother whose baby she had delivered an hour ago. She sent the baby away and sat down in the ward beside the unconscious mother.

THE bombs were falling again. One crash and she might be in a heap of ruins. The girl moved and Sara took her hand and held it to quiet her. It was hot and dry and lifeless. She felt in her bag for a hypodermic and while the earth shook and the air cracked and split she thrust it into the girl's arm. She was getting used to the bombs, so that now all that really seemed unendurable was the oppression upon her chest of the air rent and driven by the concussion.

Then there was a crash that silenced everything else. She cowered upon the bed and held herself in a knot, waiting. Surely the walls must fall! But they stayed. And after a moment she straightened herself.

There was the familiar hiss and spit of the defending Chinese plane—only one this time, one solitary fighting plane darting and springing hither and thither. Was the girl dead? Yes—a moment's examination told her that this one life was over. The riven air had been death to her. What about the little baby, then? Perhaps the family would not want it in these times. Maybe she could keep it—why not? One must have something.

SHE was glad the raid was early today. She glanced out of the window. The little house was quite safe. She could go and put chrysanthemums in it. Then she saw the gatehouse had been struck. The brick pillars were in piles and the heavy wooden gates, bound in brass, were splintered. The hospital sign that the magistrate of the city had once given them when his son's appendix had been taken out safely was cracked in two. "House of Mercy" it had said in high black and gold letters. But now "Mercy" lay tossed aside.

"In this case, I think we can dispense with making the product look attractive" LOUIS JAMME

"I'll have to get that mess cleared up," she thought. "If Gray should come, they can't get in."

But she had no time for it. The patients were coming back in wheeled chairs and stretchers and leaning on nurses and orderlies, and the babies were screaming and hungry. It was the Japanese, though, who terrified her. He had gone unconscious again. Dr. Chung hurried at his side.

"I doubt—" he began.

"Take him in at once," she ordered. "Have you given him a stimulant?"

"All I dare—"

"I'll try that new X compound of mine," she said. She had been experimenting with special stimulants for shock. The ordinary ones were too often harmful to hearts fluttering into silence.

. . . Two hours later she and Dr. Chung looked at each other over the gray face on the pillow.

"What is your opinion?" she asked.

"He is better than he was half an hour ago."

"I think so—and if he is, it is you must have the credit."

Dr. Chung shook his head. "Your X compound."

"But you administered it so exactly, I timed your doses—each had just the right effect. Very delicately d tor."

"Thank you, Doctor."

She wanted to say that it w more admirable because this an enemy. The Chinese doct were admirable even if she di him. Modern medicine was n old country and modern medi newer. But the thing was d express and as she was thinkin heard the popping of firecra jumped. That could mean but —Gray had come! For days I and Siao Fah had had string crackers ready for the instant w would appear.

She ran to the window and s climbing over the debris of t gate, a laughing Gray, looking instantly, brown and happy a —not the tired, white-faced had left in the summer heat And he had his arm around girl, a girl whose face she coul under the brim of her hat. He while her dainty feet went slip the plaster and broken brick, Wang and Siao Fah stood sid holding the long string of pop crackers and, from all over pound, nurses and orderli running to welcome Thomiso and his bride.

She turned, to find Chung at "Will you go down—or I?" sh

"You, of course—I will stay."

She thought of her promis Eagle. No, it was not a promi responsibility. She must not l Japanese alone with this Chin yet, and yet, had he not saved t life? Twice he had saved the l enemy, once with his blood once more by his skill.

"I shall not be long," she sai

"Be as long as you like, Do replied.

Under the suavity of his voic the smooth gleam of his eyes cerned the laughter of his know her. She stiffened and refuse knowledge anything that he kn

"Thank you, Doctor," she s she went down to meet Gray.

AT THE wide-flung door of th tal she met him. She had how beautiful he was, his bro the sun on his brown head. He h suit—she saw everything at or even a new hat in his hand, a tie, the wine-red she loved. S out, "Oh, Gray!"

And then as though she ha into a mirror she saw herself i of cool, amber eyes, very pret black-lashed and wide. She stammer:

"I haven't—I'm filthy—we've an air raid—the mother of on babies died. I haven't had time my hair or wash my face."

Gray laughed aloud. "Sara you're just exactly the way I kne be. Louise, this is Sara."

"How do you do," Louise s soft voice, pretty and clear, face.

"How do you do," Sara sai she turned to Gray: "Your hou ready, except chrysanthemum sorry I can't go over with y there's a Japanese I ought to—b ably you'd rather go alone."

They were both staring at h Gray in laughing amazement at

"A Japanese?" he cried.

But she did not hear him. S not bear to see these two—ei them.

"Excuse me," she muttered.

She turned and left them s there and fled up the stairs an own room. There, there Gra never follow.

The Vitalis "60-Second Workout" helps the success of every fellow who still has hair!

The Vitalis "60-Second Workout"

50 seconds to Rub

Vitalis with massage wakes up your scalp circulation—needed oil is supplied—hair looks alive.

10 seconds to Brush

Vitalis keeps your hair in place—lustrous, trim, well-groomed—with no "patent-leather" look.

SUCCESSFUL men know the fellow who "looks well" gets attention fast. Appearance in this competitive age is your passport to opportunity. And—socially or in business—good-looking, well-groomed hair counts plenty in your favor.

If you're grooming yourself for success, pay attention to the grooming of your hair. It's so easy to acquire that trim, successful look with Vitalis and the "60-Second Workout".

Massage Vitalis into your scalp with authority. Feel that refreshing, tingling glow as sluggish circulation is stirred to activity. As the pure vegetable oils of Vitalis supplement the natural scalp oils, your hair begins to look alive! It takes on a natural lustre and when you comb it in place, it stays in place but without that "patent-leather" look. Try it and see the difference one vigorous, healthful Vitalis grooming can make in your appearance.

But that's not all. Vitalis and the "60-Second Workout" routs loose dandruff—helps prevent excessive falling hair—helps you keep your hair. So get a bottle of Vitalis today.

VITALIS

Helps keep your hair healthy and handsome

Down Payment on Empire

Continued from page 13

and don't comprehend the legal technicalities involved. They don't foresee the gradual reorientation of the economy of the islands toward New York and away from London that American presence in the islands will bring. Nor do they foresee the less tangible but nevertheless real changes in the life of the islands which will be wrought by modern plumbing, American movies, the hot dog and the ice-cream cone.

All they know is that the leases we obtained in exchange for the destroyers are for ninety-nine years and that's a long, long time. All that the natives know is that the "Americans are coming." They take it for granted that their new boss will be Uncle Sam because John Bull is busy somewhere else.

On November 9th, three days after Franklin D. Roosevelt was elected President for the third time, I sat on the terrace of the Queen's Park Hotel, in Port-of-Spain, and heard the gratitude of the trou'badours of "Iere," which means, in Carib Indian language, the Land of the Humming Bird.

Don't Mention Imperialism

The minstrels sing in polysyllables, but their thoughts are direct and monosyllabic. The re-election of Roosevelt confirmed the islanders' conviction that the "Americans are coming." How right or wrong they are, nobody knows. For the United States to admit that it wants those islands permanently, that it sees no reason why the flags of Britain and France should fly over Trinidad, Dominica, Antigua, Martinique or Guadaloupe, would cause many to shout "imperialism," and that word has unpleasant connotations of power and conquest and militarism. It would worry sensitive South Americans. The home-grown intelligentsia who still think the world is filled with sweetness and light would yelp too. So nobody's saying anything about imperialism.

But those black men know. At least they think they know. They are wise with the wisdom of centuries and they are aware of danger with primitive instinct. They are aware, on those islands, that forces of colossal proportions are at work beyond the rims of white surf that encircle their island worlds.

Once these natives were slaves, brought to the islands by white men from Africa by the tens of thousands. They killed off or otherwise absorbed the Carib and Arawak Indians who peopled the islands. They worked as cattle in the cane fields and made sugar, rum and molasses and millions for the white men.

So wealthy did their masters become that once King George III, annoyed by the display of wealth of a planter visitor from Barbados whose coach and liveried servants dimmed the splendor of George's own at the Court of St. James's, was moved to shout, ". . . sugar, all this, sugar . . ." and perhaps that is how what Damon Runyon calls potatoes came to be called sugar.

The planters' splendor never touched the slaves. When taxes were levied against the planters so that some of their wealth could be siphoned into the exchequers to help finance imperial wars in the New World, the slaves merely worked harder, ate less. Planters bred Negro slaves as you breed horses. They owned big buck Negroes, kept them at stud. Morality received a wallop from which it has never recovered. They didn't marry slaves then and their descendants don't bother marrying now, despite church, government and every moral pressure the white ma to bear.

Then the slaves were freed away to the hills and raised and drank rum and refuse There were riots and distur the cane had to be cut and Indian labor was imported dians were bonded for period years to planters at a wage ing a day.

As these were released f age at the expiration of tracts," they remained on A small proportion moved u the merchant class. Again a shortage. Chinese were impo are comparatively small gro nese in all the British island dies. In Jamaica there are n with 18,669 East Indians.

by the watchful Trinidad Guardian to bring it about.

Here are some daily wage rates listed in Major Orde Browne's report to the crown that will give you an inkling of the enormous economic and social problem the islands represent to England now, and to whatever nation assumes England's responsibilities eventually in the Caribbean.

The average work week in the oil industry fluctuates between 45 and 56 hours. The minimum wage for blacksmiths, carpenters, motor mechanics is 9 cents an hour. Maximum wage is 26 cents an hour. Bosuns, stewards and firemen get about $1.60 a day and their keep. Sailors on the tankers get as little as 66 cents a day and food.

In the sugar industry, wages are much lower still. A grown male will get from 45 cents to 85 cents a day; a woman, 25 cents to 45 cents a day; and children, from 14 cents to 40 cents. This work, of course, is seasonal, lasting generally from mid-January to mid-May or early June. The rest of the time these people have little or no work. They constitute the bulk of the population.

In the defunct cocoa industry, workers *used* to receive 45 to 50 cents a day. The weekly earnings of cocoa workers are between $2.50 and $4.00. For the whole island, including all categories of work, a dollar a day is considered pretty good wages. Whole families buy their rice, codfish and rum on six dollars a week. Rents in the "Barracks" are low —one dollar a week being considered steep.

The natives want economic freedom. The wages they receive now were won only after riots and bloodshed. The report of the Royal Commission investigating the labor riots that resulted in the killing of a white police chief and the killing and wounding of a score of natives in June, 1937, found the root of the trouble in low wages and "the indescribable lack of elementary needs of decency . . . for which . . . monthly rentals varying from 12 to 15 shillings are paid." There is no available record of the wage scales paid before June, 1937.

The natives see America as the Great Liberator. Their God is Lincoln. Even as merchants think in terms of trading with and making profits from America, the Calypsos improvise songs about Radio City and New York and the fortunes to be made on the radio. They don't sing of Piccadilly.

A Boon to Businessmen

The white men, the big landowners, sit on the verandas of their hilltop haciendas and brood over the wind-ruffled green fields of ripening cane. They wonder where, in this warring world, they are going to sell this year's crop of sugar, rum and molasses.

Most of them are mortgaged to the hilt to local banks. Unless the crop is sold, they will be bankrupt sooner or later. They might survive this year, but not the next or the year after that. They too are economic slaves. They too have heard that "America is coming." They hope for profits from land to be sold for American military and naval bases. They foresee thousands of American soldiers, sailors and airmen spending pay envelopes in the shops and bazaars of Port-of-Spain and Kingston and elsewhere.

Since war began, the island merchants have been hard hit. The island economy has always had as its slogan "Buy British." Tariffs on American goods insured that the islands bought British. The duties on cars, refrigerators, food and clothing from the United States increased the cost of articles from 100 to 600 per cent. British rice, for example, is imported into Trinidad under a tariff

Everybody knew it but Ellen

That's the humiliating thing about BAD BREATH . . . you don't suspect it in yourself. Yet the odds are more than 3 to 1 that you may have this all-too-common fault. For dentists say . . .

76% OF ALL PEOPLE OVER THE AGE OF 17 HAVE BAD BREATH. THAT'S WHY DENTISTS RECOMMEND COLGATE DENTAL CREAM

You see, Colgate's active penetrating foam gets into the hidden crevices between your teeth . . . helps clean out decaying food particles and stop the stagnant saliva odors that cause much bad breath.

See for yourself how Colgate's brightens teeth, gives you a more sparkling, a more attractive smile! Enjoy its flavor . . . its penetrating, refreshing foam! Such a pleasant way to combat bad breath!

Play Safe! TWICE A DAY— AND BEFORE EVERY DATE—USE COLGATE DENTAL CREAM

MAKES TEETH SPARKLE · QUICK AND FOAMY · DELICIOUS TASTE · POLISHES SAFELY · CHILDREN LOVE IT · COMBATS BAD BREATH

COLGATE RIBBON DENTAL CREAM

APPROVED BY GOOD HOUSEKEEPING BUREAU

of 24 cents per hundredweight. The tax on American rice is 48 cents per hundredweight. British beef pays a duty of 25 cents per hundred pounds; American beef, $1.00.

Shipping was drastically reduced. Port-of-Spain, at the crossroads between the North and South American continents and one of the two Caribbean gateways to the Panama Canal, was a busy, noisy, ship-filled port. Britain needs ships elsewhere now. Aside from the tankers that call to take away the islands' oil—total production figures are kept secret now, but the industry employs about 20,000 workers—there are few ships in the harbor. This has meant unemployment among stevedores, reduction of profits to commission agents, shippers, importers, exporters and the insurance agents who live by handling goods and vessels.

Since the islands raise little or no food, there has been much hardship, largely due to the fact that scarcity of commodities has brought about an increase of from 20 to 35 per cent in prices. This doesn't matter so much to the white middle and upper classes. It has affected largely the man in the hills.

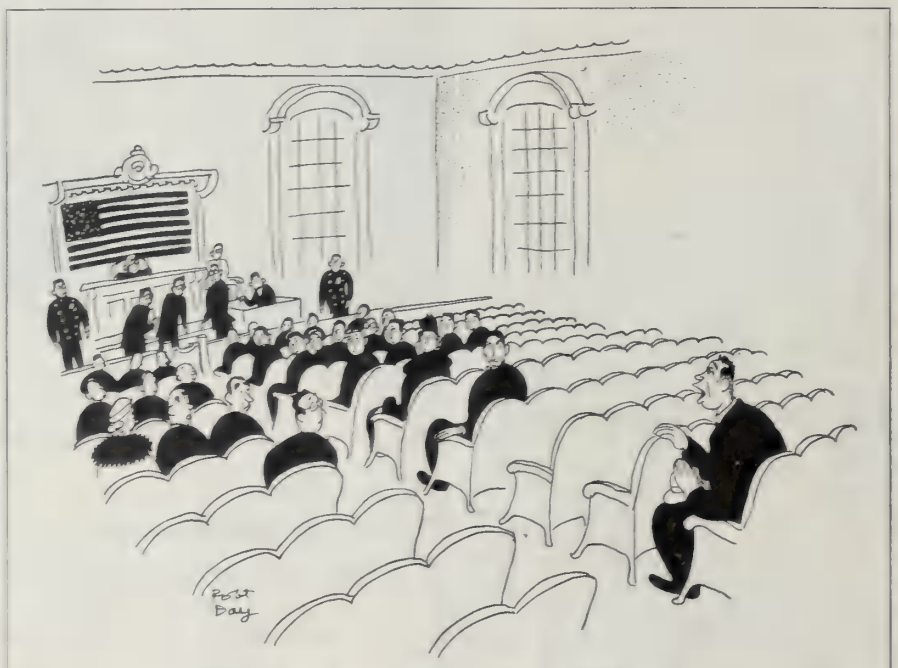
The merchants, landowners and sugar men want economic freedom as much as the workers do. They aren't allowed to trade with America, and the war and risks of the submarine-infested seas make it impossible to trade profitably and regularly with England. An automobile dealer in Port-of-Spain ordered a tractor from Britain in July. He hoped to get delivery by the end of January.

There are electric refrigerators to be sold in tropical Trinidad and near-by Tobago and the other large islands. Even when some of the more esthetic citizens buy them, they put the gleaming white mechanisms in their drawing rooms. A refrigerator is a symbol of affluence. I found one in the corner of a cultured doctor's living room with old silver, gleaming mahogany and an original Rubens on the wall and tiger-skin rugs on the floor. Every electrical gadget we have can find a market in Trinidad.

The Islands Go Pro-American

There is a need in all the islands for cars, clothing, machinery of all kinds, leather goods and coal to operate the sugar plantations. Deliveries from England have either stopped or are tardy. Aside from England's understandable desire to protect her trade in this market at America's doorstep is the wartime necessity of conserving dollar balances. Every dollar Trinidad or any island in the Indies spends in the United States is a dollar less in British funds in the banks in New York, a dollar less for airplanes and guns to whip Germany.

Recently, Canada has been receiving favored-nation treatment in the Indies trade. Canada will be selling machinery, bottle labels, textiles and a hundred other commodities to the islands this winter. American ships will carry most of this freight.



The entry of America into the islands, however, will mean the accumulation of dollar accounts in island banks and perhaps greater freedom of trade with the United States. At least, the merchants hope so. This section of the island population, mired economically, has become very pro-American.

What they would like to see, of course, is something of a compromise whereby the United States takes over the islands, the islands' products continue to be sold at favorable subsidy rates to the mother country, and free trade with America for importation of American goods at favorable prices and with favorable credit facilities. They want, if possible, to retain their identity as British subjects. They, the top crust of island society, have a good life. They dress for dinner.

But they realize this millennium might be a bit difficult to attain. Faced by the bald reality that the islands may be set adrift by an England which may win but be bankrupt as a result, island loyalties have received a terrific jolt. The people quake at the thought of a German victory. They know that in such an event America would assume stewardship of the islands anyway. So, they reason, why not reorient themselves toward America before the inevitable happens.

Economic Nuisances

Militarily, the value of the Indies to England diminished rapidly with the end of imperial competition between Spain, Britain and France in the Caribbean and the emergence of America after the Spanish War as a major naval power. The United States expelled Spain from the Caribbean after the Cuban affair and the liberation of Haiti and Santo Domingo and Puerto Rico. France became England's friend. Both England and France became America's friends. There was no longer need for naval and military sentinels in the Caribbean.

"How much raucous laughter would one contempt-of-court charge entitle me to?" ROBERT DAY

Long ago, at least thirty-eight years ago, when the Anglo-French Entente Cordiale took definite form, the "bases" of England and France in the Indies became mere coaling and fueling places for ships. I found Trinidad, except for British warships which hovered on the distant horizon, "defended" by two motorboats.

Economically, the islands took a nose-dive whose curve paralleled the one of diminishing military importance. The Indies raised cocoa in competition with the groves of British West Africa, where the product was superior, labor cheaper and the haul to London markets shorter than from the Indies. The islands' sugar competed with beet sugar grown at home. The price of rum, for which there is little appetite in whisky-drinking and ale-drinking England, depreciated. But the islands had to be fed, clothed and muscled with machinery anyway. They became, economically, a nuisance.

A crushing victory for England and her recapture of world markets would, of course, alter again the islanders' loyalties. The America that is now the white hope of the black world would become a despised money-grabber and opportunist. Right now they look forward to the "coming of the Americans" with the enthusiasm of an impecunious family about to marry a son into wealth and position.

The Negro taxi driver, for instance, was explicit. He had been offered a job by one of the local merchants driving a truck at one dollar a day. He turned the job down. He would wait for the Americans. He would earn that much in an hour. He would earn in one day what he earns now or would have earned working for his new island employer in a week.

The white islanders will assure you, however, that any wage over and above the subsistence minimum of seven dollars a week will be spent by the natives in rum, seegars and women, silk shirts and wide-brimmed hats and dollar watches. Their "standard of living" won't be improved. Their families won't get any more shoes, rice or codfish.

The Negroes, of course, as well as the East Indians, dispute the white men's charge that they are a shiftless, lazy lot. "We are not shiftless," the natives say, "just tired. We are not lazy," they maintain, "merely exploited."

On Trinidad, their spokesman is an able East Indian named Adrian Cola de Rienzi, which wasn't his name at birth. He was born, some thirty-four years ago, Krishna Deonarine, the son of bonded East Indians. His father died in poverty. In 1928 Krishna was a solicitor's clerk earning five dollars a week reading law for the firm of L.C.C. Hobson. He wanted to go to America and changed his name to that of the famous Italian consul, believing the lot of Italians is easier in America than that of East Indians. He was graduated from the University of Chicago School of Law, returned to Trinidad to become first a labor agitator, then a labor leader, now the first citizen among the workers. He's pro-American, too. He believes America would work out a planned economy for the islands, make Trinidad grow corn and rice and other food and complement the agrarian economy of one island with that of its neighbor. He hasn't heard, of course, about Puerto Rico. That island is as much an economic headache to the United States as the Indies have been to Britain.

He is bitter against the British government for what he calls such outrages as the fact that gasoline is produced by the workers in the unions he heads to be sold at a profit on the world market at six cents a gallon while the same gasoline is sold to islanders at 35 cents a gallon. An export tax of a few fractions of a cent per gallon, he ins

WHEN LOW PRICE BUYS ALL THIS LUXURY

S IT WISE TO PAY MORE?

Countless thousands of people, including many who formerly bought higher-priced cars, are asking themselves this question after *eyeing* and *trying* Chevrolet for '41—and are answering the question by *buying* Chevrolets!

Here's the answer to *every* motorist's desire for '41! . . . Because here are *"all of the necessities and most of the luxuries of modern motoring"* . . . all combined and concentrated in this *one* favored car, selling in the lowest price field:

Big, luxurious "3-couple roominess," which means you can seat three passengers in front and three in the rear with genuine comfort for all!

90-h.p. Valve-in-Head "Victory" Engine performance stemming from the same type of power plant which holds all world's records on highway, seaway, skyway!

A smart, fashionable Body by Fisher of the same *type* and the same *size* used on many higher priced cars!

The smooth, steady, sure-footed Knee-Action ride, which brings you and your family the highest degree of travel luxury!

The Original Vacuum-Power Shift, at no extra cost—the Fisher No Draft Ventilation—the Concealed Safety-Steps instead of old-fashioned running boards—which are today's hallmarks of driving ease, comfort, style!

You get all these features, *plus record Chevrolet economy*, in Chevrolet for '41. . . . You *don't* get all of them, with or without equal economy, in any other motor car. . . . So—*why pay more, why accept less!*

started, but life went on as Brolly.

did not purchase a radio, but Celestin would hover close to the servants' quarters to listen. On some pretext, he would go to the library, putter about until the count asked him casually: "Anything new, Celestin?"

After listening to the tidings of defeat, with his long, aristocratic face expressionless, he would pick up his book, pretend to resume reading. Neither of the old men ever yielded to a show of emotion.

When the population started to leave before the threatening advance of the enemy, Morlane immediately granted the servants permission to go. He opened a cash box, distributed money, and advice. But when one of the women made bold to beg him to come along, he grew very cold.

"Celestin and I shall remain."

He did not consult Celestin, there was no need. So some took the shopping car, others used the carriages and horses.

"The name of our organization has aroused suspicion. We're being investigated for subversive activities"

DAVE GERARD

Silverware, ornaments, most of the cellar stock, many of the paintings had been swathed in thick cloth and canvas, buried somewhere on the estate. That had been done almost automatically, for it takes more than a few generations to alter the cautious habits of a race, and this region had been invaded often in the past.

ONLY dribbles of the beaten French army passed near by, the refugees drained southwest. Suddenly, the roads were empty and a strange quiet settled over the countryside. Celestin reported that he had "overheard"—for even the mention of the word radio annoyed Morlane—that an armistice was being arranged, that the war was over. A spokesman, from Bordeaux, had asked that no further resistance be offered, to avoid reprisals.

"Thank you, Celestin. You may bring me a small glass of cognac in the library." He was careful to specify the brand and the year. "Also, do not forget to inform me when those gentlemen arrive."

This would be the second time he saw Germans in the castle. When he had been a small boy, the place had been occupied by brown-coated Brunswick Hussars of Friedrich-Charles' armies. This very room had been headquarters of a brigade, and Morlane's father had often told the story of how the general in command had asked him to take away a gilt clock from the mantel, as a souvenir "of such a charming house."

CELESTIN came to the door, his face bewildered. Morlane thought the invaders had come, and looked at his man sternly: One should not show perturbation to one's victors. But the old orderly came forward, laid a tray on the small table. There was a rather large visiting card on the tray, a name followed by a number of initials.

"It's the Englishman, *Monsieur le Comte*."

"The Englishman? Ah, yes. Show him in."

The lanky fellow appeared, strode forward, and Morlane rose to greet him. There was a pause, an exchange of smiles, and the count offered his hand. "I hope you will forgive my addressing you in French, Major. But my last study of English dates back sixty-odd years. Please sit down." He looked for Celestin, who had gone. "I trust you will accept a slight refreshment. My man should be back very soon. I believe we have whisky, somewhere."

"Cognac, if you please—"

Celestin reappeared, bringing in the cognac and a seltzer syphon, without being told. Morlane, despite his other concerns, gave him a glance of approval.

"You have decided to remain, Major?"

"Yes, Monsieur. As you have."

"Our situations are not alike, Major. I am no longer a belligerent." Morlane felt that something should be said to this ally of yesterday, of this morning. It was atrociously embarrassing, but in courtesy it must be said. "I must confess that this is a great grief to me, this —surrender, Major. You must understand that—"

"Oh, perfectly, perfectly." The major was very polite. "No nation is altogether free from such disappointment. We, in England, have had to endure embarrassment also, recently—" the Britisher caught the count's glance of wonderment, explained: "The abdication, you know."

And the rounded cheekbones above the mustaches were tinged with red. Morlane was amazed by this chap who placed the foolishness of an individual, even a king, on a level with a national shame. Major Bruce sipped his brandy, hesitated.

"I might as well come to the point at once, Monsieur," he resumed. "I have a favor to ask of you—I understand that you were in the colonial army, that you did a bit of exploration. Therefore, you must have hunted big game."

"Oh, yes. Any number of times. And you, Major?"

"The usual routine thing, Monsieur. A few cats, an elephant or two, you see—I served in India, South Africa, West Africa. In fact, we were within four or five miles of each other once, when I was stationed in Nigeria. We disarmed some of Ahmadu's *sofas* which your column pushed across our border. Odd thing—" Bruce chuckled, "recalled your name perfectly, because it is the same as that of the captain of *L'Indomptable*. Read about him in class, you know—"

"I know—" Morlane indicated the painting. "There he is."

EVEN in effigy, the sea wolf and courtier of Versailles could not hide from the enemy. Major Bruce smiled and lifted his glass. Morlane imitated him. Celestin refilled them promptly.

"But you were saying, Major, that I could be of service. Rest assured that anything I can do will be done."

"It's a very simple matter," Bruce resumed, with some awkwardness. "Have you by any chance kept a hunting rifle and a few rounds somewhere about? I shall need one. Found a rifle this morning, but a military issue piece, not made for precision shooting. You see, I have a theory."

"A rifle? There must be half a dozen, Major. Celestin—"

But Celestin, after filling the glasses a third time, had gone.

"He will be back in a moment. So you do not think much of our Lebel rifle?"

"Oh, it's very good for troops, almost as good as ours. But those mass-production weapons are seldom satisfactory to one who is used to his own piece. You have to become accustomed to their peculiarities, and I shall not have the time." Major Bruce looked at his watch. "They should be here shortly before noon. They were reported fifteen kilometers away this morning."

"But you are a civilian now, Major, and resistance will call for reprisals—"

"I have thought of that, Monsieur. However, I have a British flag—brought it to hang beside the flag of your country on July 14th. The proper thing to do, you see. I shall hang that flag over my home, and that will make it clear that no Frenchmen are involved."

"But you yourself, Major—"

"I?" Major Bruce grew somewhat shy, but contrived to express himself. "I feel their coming here a personal matter, you see. A few years ago, I resigned

CAN TIREDNESS from Tough Work be Reduced With Knox Gelatine?

Sure, we'll drink it, agreed 128 workers in hard-driving manual jobs. These men...painters, steel workers, postmen, etc....wanted to see if drinking Knox Gelatine for 28 days could reduce tiredness for them. Did it?

Not so tired, was the report of 8 out of 10 men who began this Knox 28-day test. While 9 out of 10 who *completed* the test declared Knox definitely increased their endurance.

Harder work . . . better reports! While 9 out of 10 workers in these hard jobs who completed the test reported benefits, *more* of them reported *decided* benefits than the average of all other groups.

What's the score? In addition to these tests of manual workers, 223 men and women doing tiring mental work, such as typing, modeling, teaching, nursing, selling, began drinking Knox for 28 days. 140 of them completed the test and 124 of these said Knox definitely made them less tired! In *all* tests, the majority of those reporting benefit said they noticed the effect of Knox at the end of the first two weeks!

What about you? Whether they were doing mental or manual work, 2 out of 3 men and women who started, and 9 out of 10 who completed the Knox 28-day test said that tiredness was reduced—endurance increased! Here are figures that suggest Knox Gelatine may give *you* extra endurance. Try Knox Gelatine for at least two weeks. Give it a chance to try fighting fatigue...today!

TRY THIS YOURSELF...for 2 weeks

1. Drink 4 envelopes of Knox Gelatine *every day* for 2 weeks. Then drop to 2 a day. After 28 days, drink as needed.

2. To prepare, pour 1 envelope (¼ pkg.) Knox Gelatine into ¾ glass water or fruit juice, not iced. Let liquid absorb gelatine. Stir. Drink immediately. If it thickens, stir again. The gelatine is tasteless.

BUT BE SURE it's plain, unflavored Knox. Knox is *all* body-building protein. Ready-flavored gelatine dessert powders are ⅞ sugar, ⅛ protein. Buy from your grocer in 4-envelope or economical 32-envelope package.

SEND FOR FREE KNOX BULLETIN

telling how *you* may try reducing tiredness. Write Knox Gelatine, Dept. 70, Johnstown, N. Y.

A PROTEIN FOOD THAT FIGHTS FATIGUE

from the British army. Did not get along, you know. I was right in my views, as proved now, but that is small satisfaction. Came here, because I had always wanted to see the region, never had the chance. You see, my people fought around here, under Talbot. Oddly, I felt good here, better than anywhere else. As if I belonged. Can't just up and leave, you know."

Morlane nodded. He heard Celestin enter the room. "You will look for my guns, Celestin, please."

"I've brought them, *Monsieur le Comte*."

He lined several long cases on the big table. Then shuffled away. Morlane snapped the boxes open, revealed the guns, laid out neatly, each piece occupying an upholstered nest.

"You'll probably prefer this one, Major. British make. Very good barrel. If I remember rightly, it shoots a shade high and to the right. For myself, I prefer this one. Specially made for me in St. Etienne, adjusted stock. Perhaps a bit long for you, as I have long arms."

CELESTIN had brought boxes of cartridges in a basket. Major Bruce took the British rifle, for which one hundred and fifty rounds were located, and a British revolver. He looked at his watch.

"I must be going. Need I say, Monsieur, how much I appreciate—"

"But you were saying you had a theory, Major. As I should like to know what it is, I shall accompany you as far as your home. Celestin will carry our guns."

The trio left. They walked along the tree-lined road, between trees every one of which was familiar to all three. Major Bruce had lighted his pipe, Morlane smoked one of his thin, long cigars. Celestin chewed, and spat from time to time, practicing as he went, aiming at a stone, or a twig. The day was clear, warmish, and the songbirds were in full voices. Spring was lingering through the immense catastrophe.

"You were saying, Major?" Morlane prompted.

"Quite right, my theory. Well, it is based on the fact that for many years now, everything concerning rifle firing in action has concentrated on obtaining results by volume of fire rather than by accuracy. On the principle that if one bullet misses, the others will strike home. How many men can shoot—I am speaking of soldiers—very quickly and very accurately at short ranges? Yet, we both know such shooting is possible. I am not extraordinarily gifted, yet I contrived to drop a charging rhino at seventy-five feet, stone dead. Because my reflexes were trained to meet an emergency in a split second. You yourself, Monsieur, must have had some such experience—"

"Naturally. On the Chinese border, in 1901, if I recall correctly, a tiger already wounded by a comrade circled and broke through the bush less than forty feet from me. He crouched for an instant, leaped. There was no time for conscious thought or planning. No time to aim, really. Nevertheless, he was dead when he landed, at arm's length from me."

"Where did your shot strike him?"

"At the root of the nose, almost through the left eye."

"Through the eye, practically. That is what I am driving at. A tank must see, and to see, holes must be left for the eyes to peer through. Also, one must remember that the field of vision of a man in a tank is narrowly circumscribed. From the flank, the attacker is relatively safe at close quarters. I firmly believe that a calm man, with a steady hand, can put a bullet through a tank's slit. Even if he but nicks the edge, there is a strong chance that the driver will duck, lose vision for a second, or even be hurt by flying fragments. . . . Well, are. My housemaid has left, from actual fear of the Ger from fear of a disappointme they arrived is not for me to

The little villa was surrou a stone fence four feet high. pretty structure, roofed with with only one floor divided i rooms. One was a kitchen, an the maid, while the master's consisted of parlor, dining ro bedchamber. Aside from fo shelves of books, the major ha duced little personal note.

"Charming place," Morlane s looked out of the parlor window in the direction of Brolly. The straight almost to the village. "V really remain here, Major."

"No. They'll undoubtedly the house. There is an angle of that is much better." He pick sheet of paper from a table. figured out ranges and heights Monsieur. And I have found not easily reached from a tan brings me quite near enough for pose." He opened an album, tu pages until he reached diagrams and armored cars. "This is exce formation—"

Celestin had gone into the worked efficiently. He served lunch, a farmer's omelette, with leeks, potatoes and diced fat ba flanked the plates with some bottles of Pomard. And the two tlemen ate standing, drank s tireless, animated, consulting th walking out from time to time the angles.

At last, Major Bruce opened a unwrapped a flag from protecti paper. A ladder was brought, helped the Britisher to hoist h in a conspicuous place.

"If they're logical," Bruce co "they'll take their reprisals at think it is plain enough that t British establishment. I hope not mind, Monsieur—but the flag might mean trouble for the

outh, bulky objects rolled
out of the village, hurtled ahead, leaving trails of dust: Tanks. Exactly what type, Morlane did not know. He had never been interested in tanks. He regretted that now, feeling that the Englishman probably knew precisely what they were up against. The larger tank opened fire as soon as the British flag was visible. It used a small cannon, probably a thirty-seven millimeter. And the gunnery was not bad, even on the move, for the shells tore into the villa, with great, crashing sounds.

Morlane turned, saw the flagpole knocked askew, the cloth hang down, a smear of colors against the plaster. He laughed inwardly—odd for him, Morlane, to end fighting under that flag.

The three crouched behind the wall.

The tanks had slackened speed, possibly through caution, probably to thread their way among the men and machines scattered on the road. The one in the lead drew very near, slowly, progressing at perhaps eight miles an hour. On the left side, beneath and ahead of the machine-gun turret, there was a heavy steel shutter, pierced by narrow, oblong slits. No, Major Bruce's scheme was not very practical, putting a bullet through one of them would be a hard shot.

Then, as he watched, there was a metallic creak above the purr of the idling motors, and that shutter started to lift. The driver evidently believed that the motorcyclists had been ambushed by a roving band, which had taken flight at the arrival of the rolling fortresses.

Major Bruce fired.

The tank continued to creep forward, the shutter clanged shut. Then the massive vehicle started to swing in a semicircle, chugging steadily. Morlane had seen a badly hurt animal stop thus in his tracks and turn about as if seeking the cause of the injury. Then, like many wounded animals, the tank spurted ahead quickly, fetched up in the ditch, nose down. A hatchway on top of the turret lifted, a head appeared, slowly.

Morlane fired. The man dropped out of sight, the metal cover remained up.

"Careful, Monsieur," Bruce called. "There are three men in those."

The second tank was near in its turn. Morlane aimed at the slot in the left shutter. His first shot rang on solid metal, the second one did not.

This tank stopped, for two or three seconds, then resumed its slow, constant

"Keep their lawn up nicely, don't they?" TONY BARLOW

Replace with a

DELCO

Battery

It can "take it"

How do you know a Delco battery can stand up under hard usage? You could find the answer in its sturdy, substantial case of genuine hard rubber . . . its specially constructed plates of highest quality . . . its ample electrolyte capacity, and the new Delco Electro-Level that prevents overfilling. But best proof of a Delco battery's ability to "take it" is the fact that Delco batteries are original equipment in more than 43 per cent of all new cars sold.

It can "give it out"

The Delco battery has long been recognized for its extra starting ability—the power to start a car surely and dependably on the coldest winter morning. Automotive engineers take this important characteristic into consideration when they select Delco batteries for original equipment. Take it into your consideration when you need a new battery: Replace with a Delco.

Delco batteries for every make and model of automotive vehicle are available through 30,000 Delco battery dealers in every section of the United States. Delco batteries are distributed nationally under the direction of United Motors Service.

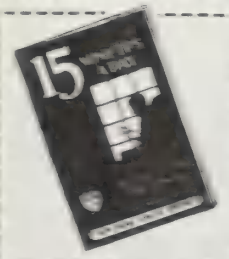
Which of these women has learned the secret of Fifteen Minutes a Day?

TWO WOMEN live in neighboring homes. They are the same age. Their husbands' incomes are about equal. They seem to have the same chance of social success and happiness. And yet one of these women is seldom invited to go out.

The other woman is always the center of a group. Her calendar is full of engagements. She is sought after as a guest.

MAKE HER SECRET YOUR OWN

Her secret is very simple. She has learned how to attract people. She has read many things. Her mind is keen and alert, and people feel instinctively that she is worth knowing.



Make her secret your own. It is possible to secure all at once and at very small expense, the few great books that enable anyone to think clearly and talk well.

You will understand how this is possible when you have read this wonderfully interesting free book which tells you about the beautiful new Home Library Edition of The Harvard Classics. Here is a glorious setting of luxurious volumes. New and imposing bindings, new beautiful paper, new larger type, and new illustrations are features which make the Home Library Edition a set of infinite charm and rare excellence. Though worthy of the finest private library, these books are easily available to the most modest home budget.

MAIL COUPON TODAY

You need not decide now. Simply mail the coupon for the free booklet "Fifteen Minutes a Day" which has brought new happiness, a turning point in life to thousands who have sent in for it. It comes without obligation when you fill out and mail this coupon.

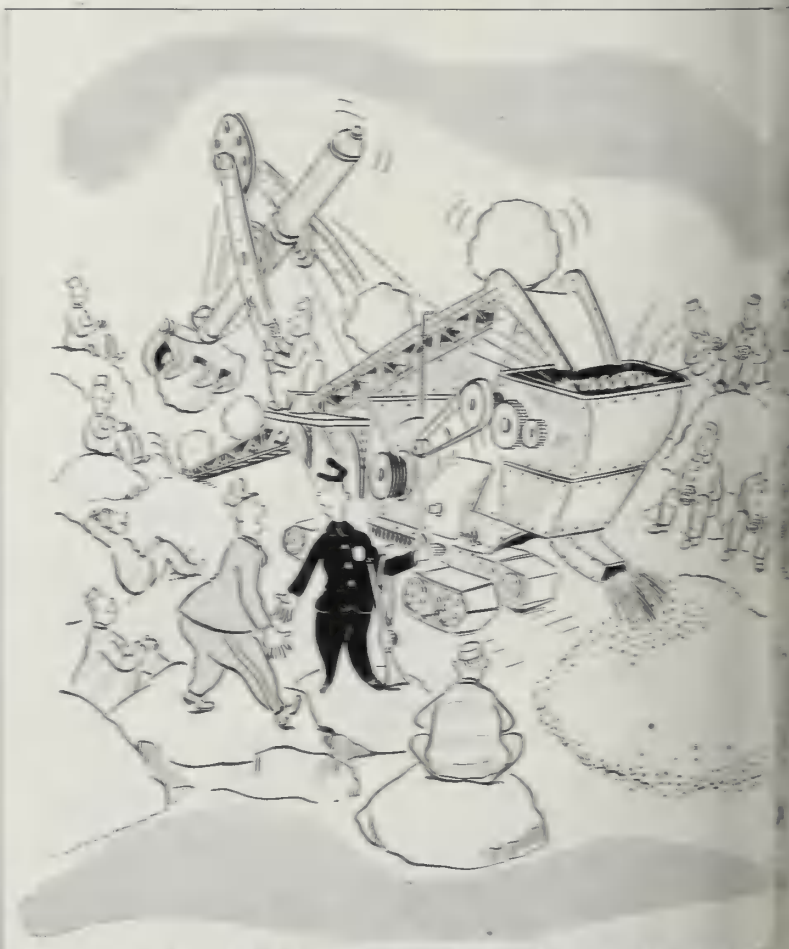
motion forward. The flat-topped turret, with its rounded belly, swung around deliberately; the muzzles of the guns wavered a bit, like feelers. It was true that these monsters were nearsighted, almost blind. The Englishman had studied their habits, their ways—and chosen the spot hardest for them to locate.

The machine gun and the cannon both opened fire, the uproar was deafening. The wall crumbled, but several yards to the left. The armored machine slid forward along the road, and the three old men fired at the slots. Ricocheting bullets whined overhead. Again, the lumbering monster came to a halt, swung about heavily, returned, and the heavy rifles thudded, while the metal beast seemed to sniff for them angrily with its guns.

MORLANE swore under his breath. An immense fatigue tormented his brain, pulled at his aged muscles. He felt consciousness leaving him.



Then pain awoke him. He was on the ground, looking up into a smooth, beardless face, shaded by the rigid brim of a bucket helmet. A German, a young German, certainly not over twenty-four. Morlane tried to rise, fell back with a muffled groan. His whole frame was melting into one immense twinge of fusing pain.

Strong hands beneath his arms lifted him erect. He managed to stand. He looked about.

There was Celestin, stretched full length, face to the dirt, in the lee of the demolished wall. The major was kneeling, his head resting on a stone, what was left of his head. Morlane de Brolly's old knees buckled, two of the soldiers started forward to hold him. He shook his head, stiffened, and they stepped back.

The young officer was speaking—in English. "I do not understand you, Lieutenant," Morlane said, in French.

"Ah, so!" The young man smiled and went on in French: "Who are you? Why did you do this? You did excellently, however." He turned to indicate the flag. "But I do not quite un

"No. Not me. I don't get myself involved. I'm no dope."

"You got to do it!" Spencer said. "You're working night shift. You're out of the house most of the night anyway. Juley, be a good guy for once!" The cab drivers all chipped in, pushing him around and hollering at him until he put his hand up to make them stop.

"Always me. You always come to me. What's the matter with Chuncery over there? Temporarily he's exactly the same as me, ain't he? He ain't got a wife either."

They had forgotten all about him. The big man was over in a corner of the diner, slumped and faraway in his troubles. The drivers swung toward him and started talking fast.

"Who? What? Listen, I don't know if I'm coming or going." He took the key out of his vest pocket. "Take it. Take my house. Take my cab. I don't care. I don't know if I'm dead or alive. . . ."

Spencer clutched the key in his hand. He put his other arm around the girl's shoulders and stopped a moment at the door. His face positively glowed.

"People can't be heels," he said to Juley. "I'll take her there myself right now." He led the girl out to the street.

THE other hackies didn't go back to work. Instead of cruising or playing it off the board outside, they hung around the diner, killing a quarter of an hour to tell one another what great guys they were and feeling warm and cozy. Then the door slid open with a blast of cold air and Frenchy came bouncing in. The hackie's honest eyes were shining.

"Congratulations! It's all fixed!"

Chuncery got up. "Who? What?"

"Your wife!" Frenchy told him. "Just like Juley told me. A reconciliation!"

"When?" Chuncery said, and his face began to fall apart.

"Starting right away! She left her mother's house when I did. She's probably back home right this very minute!"

Chuncery was choking. He fell back on the stool. He was a big man, two hundred and twenty pounds at least, but he caved in and started blubbering like a baby. Frenchy looked at him, completely mystified.

"Hey, what the hell? Did I do wrong? Did I do something bad?"

No one answered. There wasn't a sound in the diner, and when the hackies finally did begin talking they weren't worried over Chuncery. They had promised the little blonde a place to sleep in until Thursday and they knew Chuncery's wife would throw her out the minute she saw her.

"A promise is a promise," one of them began, and then they went to work on Juley all over again.

"No! No!" he kept on shouting, but it didn't help. He couldn't push them off him. He slammed the counter with his hand.

"Always me! Always me! If a guy's in a hole, if he can't make out or has wife trouble—any kind of headache—they always come to me. I'm the mayor of Flatbush. Do I get thanks for it? No. Am I a sucker? Sure. All right! I'll take her in. I'll let her stay in my place But only up to Thursday night. After Thursday I don't want to see her!"

"Hey, Juley. I don't get it," a driver said, beginning to wonder. "What's all the racket? What are you so afraid of anyway?"

"Dammit!" Juley said, and kept on slapping the counter. "Dammit!"

"One little thing, my dear Count Firenze, one little human miscalcula-

IT PAYS TO FIGURE THE FINANCING COST YOURSELF

SAVE EVERY CENT YOU CAN WHEN YOU BUY A CAR ON TIME

It's easy! All you have to do is fill out and mail the coupon below. You will receive a GMAC Figuring Chart with which you can figure your own time payment plan.

All the details in this Chart are clear and easy to understand. All costs are given in dollars and cents. And the chart fully explains the included essential insurance protection for your car.

In a few minutes you can figure just what the cost will be to you, based on the number of months you want to take and the amount of money you want to pay each month.

Compare the General Motors Instalment Plan and what it offers with other time payment plans you may have thought cost less or offered more.

You'll see why this plan is so popular . . . you'll see just where and how you can save!

So write for your Figuring Chart today! Send the coupon now! Then see your General Motors dealer.

Available only through dealers in Chevrolet, Pontiac, Oldsmobile, Buick and Cadillac cars.

tion. You who were so sure, so ruthless. . . You showed the world whether you were the slave of power or its master, and yet you forgot. You erred as men before you have erred. Ah, my dear Firenze, you failed to remember that I was—a woman!"

Juley closed the door. "What's going on?"

"Nothing," she said. "Out of my memories. I was just amusing myself with some idle recollections."

That was the remarkable thing about the girl. Nothing that happened tripped her or ever caught her off guard. Juley had to scratch his head and grin. It was the second day that she had spent there. The arrangement was that she could have the place to herself after six when he went to work, and she didn't have to be out until seven in the morning. It was about nine o'clock that evening but it was his own home and he told himself he didn't have to make excuses if he dropped in any time he felt like.

"That was when you were on the stage, wasn't it?"

"Oh, years ago, in stock. Not that I ever had a big part. I never was a star or anything."

"Sure, I know." He sat down in the only big chair he had in the place and put his feet up on a little table she had found somewhere around to go with it. "You told me. You were first starting out. You just got out of that fancy school in Switzerland but your father made you quit. He didn't like the idea of the stage for his only daughter. Your father—the guy with the timber land up in Canada."

"Yes, but he doesn't own it now. He isn't rich any longer. Not that we're exactly poor now. I suppose people would still say we're well-to-do."

"You're here in Brooklyn just for laughs. It amuses you. You got pride and you want to be independent. Isn't that the way it is?"

"Strange as it seems, yes."

SHE went into the small kitchen and came back with a cup of coffee. Juley looked at it in silence. That was just what he felt like having—a cup of hot coffee. She put it down on the little table before him.

"Mr. Juley," she said, suddenly but in great earnest, almost breathlessly, "I admire you."

"Don't admire me, please."

"No. I think it's wonderful the way the boys all call you their mayor and go to you when they need help."

"You know why they all come to me?" He lay back in the chair and spread himself out lazily. "Because I'm the only one without a load on him. Fact. I can move around. Take the average hackie. He meets a girl and every girl, one thing, they're always looking for some guy that he should marry them. So she flatters him. Subtle things. Feminine things. She gets him feeling good and then, boom—he's a goner."

"How much sugar?" the girl said.

"Put in two spoonfuls. And then what happens after? The guy lays around the house, say, and listens to the radio and now the wife always kicks and nags. 'Hey, get off the bed,' she says, 'some day you'll get stuck to it.' Like that. So why do I want that? Why does a guy need a wife to fight around with? I got eyes. I'm not blind. It pays to keep free and single."

She sat on the floor, near the table and she looked up at him as she watched him drink the coffee. "But don't you," she said, her voice low and faltering a bit, "don't you sometimes feel a little lonely?"

He took time to finish his cup. "Sister, that was one good cup of coffee. No. What I don't know I'll never miss, and I never let myself get mixed up too much with people. Never trust nobody and you'll never get your heart broken with disappointment."

"You just say that," the girl said. She smiled and shook her blond head at him. "Oh, I know. You don't really mean it."

"It's my motto." She had a box of cigarettes near by and there were matches with it. It was neat. You didn't have to get up and go hunting every time you wanted a smoke. Juley lit a cigarette and inhaled. He rose to his feet. "I won't end up like the rest of those hackies. Not me." He walked to the door, picked up his cap and slapped it on his head. "Sister," he said, "listen. You can cut out the big eyes and the flimflam flattering. And please don't admire me so much." He shut the door behind him.

HIS taxi hummed as he sent it cruising down Ocean Avenue, and when he reached the diner he jerked the car up to a stop. He hadn't been in the place more than once or twice since that night and now he felt he might as well go in and report while all the boys were there. As he stepped out to the curb, he saw Chuncery leaving his cab, finished with a call. It was a completely different Chuncery. Juley didn't know what to make of him. The big man was smoking away on a cigar and seemed perfectly contented.

"Hey, Chuncery, didn't you catch it when you got home that night?"

"Oh, boy, she give me hell." He shut his eyes. "These days my wife's a tiger—a tiger in the jungle. Suspicious. 'Sam, the truth! The truth!' She's burning up to find out all about the blonde and she won't rest a minute. I tell her and I tell her but she always says I'm lying."

"Then what have you got to be so happy about?"

"There's angles. In addition, see, she's attentive. She aims to please. Nothing like the old days."

"What do you mean? What happened?"

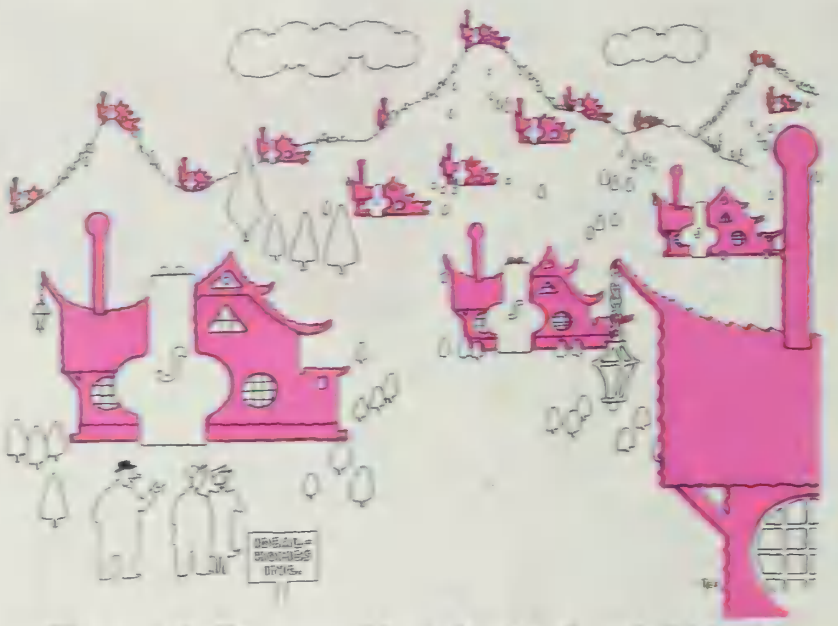
"After all, it's not so very peculiar." He held the cigar well out beyond him and carefully tapped the ash off. "See, I followed your advice. I started changing my shirt twice a week, regular. I began to shave every other day like clockwork. And then there is this thing with the blonde. So what the hell—my wife figures, if the blonde saw something in me, well, hell, maybe I got something. I don't know," he said, really at a loss. "Juley, what would you say? You think I got something?"

"That's right," Juley said, and poked him. "You're the Clark Gable of Flatbush, didn't you know it?"

Chuncery suddenly lost control and broke out wildly into a fit of hoarse giggles. Juley started laughing with him and they went up the steps into the diner.

"Hey, look, he's laughing!" The hackies were all staring at Juley. "He's laughing like a person!"

"He's getting downright human!"



"It must be the blonde," Spencer said. "She's making a regular transformation, no kidding."

"It's the girl, sure," a driver said. "That's why we never see him around here any more. He sticks around the house to be near her."

The smile on Juley's face froze and went sour. "Bunk. You know me better. I been busy working. I got a living to make."

"No! It always works out like that," Spencer insisted, speaking seriously. "It's just like that book we had to read in high school. There's this guy Silas Marner, a louse, a heel, and then he meets up with a little kid and she changes his whole life for him. After her he's okay and becomes a good guy. It's the same thing now with Juley."

"Go away, you're crazy!" Juley said, suddenly furious, shouting: "I'm practical. I got some brains in me. I'm not letting myself get involved for no good reason. . . ." He caught himself. He didn't have to give them a lecture. He didn't have to lose his temper. The whole thing was crazy. He waved his hand at them in disgust, turned his back without another word and walked out to his cab. But when he cruised up Ocean Avenue now, he felt somehow troubled and uncomfortable and those sure, high spirits he had had before were gone.

"Our motto is: 'Hit on something truly original—and stick to it'"

AFTER that he made a point of staying away from his flat while she was in it. When he wasn't in his cab, he kept close to the diner, letting the hackies razz him, listening as Chuncery gave him the latest news about his wife. But on that last night, on Thursday, he found himself going in a circle around the street he lived on. He drove around three full trips before he realized exactly what he was doing and then he stopped the cab and went up. He came in just in time to catch her at it again.

"Life is such a gamble, don't you think?" she was saying. "It has all been such good fun and the only pity of it is that it cannot go on forever. Shall we end it with a smile, with a glass of pink champagne? Dear Eric, I boy . . ." She stopped as sh

"Your memories," he said impulsively, crudely. "Yo actress. In stock. Some da in trouble telling lies like the

WHAT does it take to build the airplanes needed to defend America?

First of all, it takes factories — new buildings.

Next it takes machines.

And finally, it takes materials from every state in the union — everything from abrasives, acids, aluminum and antimony to tin, tungsten, turpentine, vanadium, wool and zinc.

How are all these machines and materials gathered from the far corners of the country to the factories where planes are built?

The answer is the same that you get for any other industry — the American railroads do the job.

According to one well-informed writer, "55 per cent of the average requirements for aircraft fabrication is shipped in excess of 1,500 miles for assembly."

At latest count, there were 79 aircraft manufacturers, scattered over 20 states — and beyond this, there were 23 aircraft engine manufacturers — scattered over 12 states.

Now, despite the size of America's aircraft program, it is not a big job to move the materials needed, measured in *tonnage*. There are industries which move a greater tonnage of freight in a week than aircraft construction requires in a year.

But in aircraft construction another factor is of particular importance, and that is reliability — accurate scheduling — on-time delivery.

And on this point also, the American railroads are today at the highest point of efficiency in history.

What they do for the airplane industry, they do for the farmer, the merchant, and all the industries of America — they haul the food you eat, the clothes you wear, the fuel that warms you, the things you use every day, handling America's traffic so smoothly that few people give it a second thought.

That's the best evidence that the railroads are America's No. 1 transportation system in their *competence* as well as in their size.

rare within her, something sweet and fresh and altogether out of this world, and nothing she might do could ever succeed in disguising it.

Joe Juley realized she was the most beautiful thing that had ever happened to him, and he had stupidly yelled at her, chased her away. And now she would be going to the broadcasting station. She wouldn't become an actress or a movie star. She wouldn't win the amateur contest or get anything out of it. She'd only be hurt, disappointed, laughed at again. Juley hated himself. He couldn't stand there moping and doing nothing. The hackies were right about him: He was a heel.

FOUR boys, authentic quadruplets from Dayton, Ohio, sang a swing version of Von Suppe's Poet and Peasant. A sixty-year-old grandmother did a tap dance and reproduced various animal cries on a musical saw. From Tampa, Florida, a shoemaker played all of Liszt's Hungarian Rhapsody, playing it on his teeth and head with the use of small hammers.

"Wow!" Chuncery said. He was squeezed in the trunk space in Juley's cab, listening to the broadcast. "That finishes it. The shoemaker gets all the votes, hands down. The little blonde ain't got a chance."

"Shut up," Juley said.

They had to hear a lady violinist and a one-man band before Emmy's turn came up, but as she was being introduced a couple in evening clothes appeared and asked to be taken to Times Square. They bundled in but the cab didn't move.

"You'll have to wait," Juley said.

"Wait?"

"And keep quiet."

The man in the top hat was too puzzled to answer. Emmy began. She did her imitations of Greta Garbo, of Ronald Colman and Bette Davis, quoting lines from movie roles they had played. The couple in the back grew restless.

"Hey, what's this, anyway?"

"Quiet!"

"Let's get going. Come on. We're not going to sit here and listen to that junk."

"Then get out of here. You don't have to stay and listen. Find another cab," Juley said.

"Well, I will!" The man glared and reached out for the door.

"Hey, Juley!" Chuncery said. "You can't do this. It's a three-buck fare to Times Square. It's a rip!"

"Let them go. Shut up."

THEY sat in silence, now undisturbed again. On the first call the quadruplets got four hundred and twenty votes, the grandmother about five hundred, but the shoemaker went all the way up to seven hundred and nine. Chuncery groaned. "He'll run away with it all by himself," he began but had to stop as Emmy's vote was given. A little more than five hundred and fifty had phoned in votes for her.

"Not so bad," Chuncery said. "She might still have a chance."

They listened to a two-toned whistler, a tenor, two sopranos and a bottle player from Staten Island, and then the second call was heard. The quadruplets and the grandmother were even at about seven hundred. The shoemaker had gone beyond the twelve hundred mark but then the count for Emmy came over —two thousand and twenty-one!

"Hot dog!" Chuncery said. "All she needed was a little time. She'll make it!"

"Take it easy," Juley said. "Don't get desperate."

On the third call Emmy had three thousand, eight hundred and twenty-eight votes. Chuncery howled with glee.

"She'll win it! She did it! She'll get a job with a stage unit now for sure. In Dallas, Texas, or in Milwaukee. She'll work her way up and become a regular movie star some day. It's very true to life. That's the way it happens with all the stars. Look at Dorothy Lamour!"

Juley didn't feel happy or excited and he didn't see what there was to crow about. He sat listlessly, bent over the steering wheel, and then suddenly he found he couldn't bear to listen to Chuncery any longer.

"Get out. I'm going cruising for a fare." He had put more force in his voice than he had intended. Chuncery looked at him, startled sober.

"Cruising? Cruising where?"

"Anywhere. I don't care. In Prospect Park."

"Hey, Juley, that's nuts. You don't pick up fares in Prospect Park and you know it."

"So what?"

"So what? Hey, Juley! You're a mad-

Charles Addams is twenty-eight, tattooed and nervous, but none of these facts is particularly noticeable. After attending Colgate, the University of Pennsylvania and Grand Central Art School he settled in Westfield, N. J., but works in a Manhattan studio. Swims, walks, reads, once collected armor as a hobby, likes to drive cars and really enjoys drawing cartoons like the one shown on Page 46. According to a fortune recently told by a weighing machine he is easily discouraged and just as easily encouraged, but he confesses only to being stubborn and liking crowds.

man tonight! Throwing dough away left and right—"

"Money! Money!" Juley shouted, finally blowing up. "A dollar is a dollar. Time is money. Get away from me! Money ain't everything in this life. It don't give you true happiness, happiness that lasts, does it? Get out of here! Leave me alone!"

HE SLAMMED into gear and shot out to the park. He drove around but the park didn't seem to help him and so he headed for the new belt highway and took a trip all around the city. He kept going steadily for two hours but whatever it was boiling inside of him kept on boiling. He was just as angry, just as unsatisfied and miserable as he had been ever since Emmy had left him that night, and finally he drove back to his home.

Billy as a shrimp), Milt Aron,
Herre Harry Dublinsky, Chuck
Woods and Al Davis. Any
time a promoter waved a fist of bank
notes, Fritzie was right there.

Eddie might have been the best of the Zivics but his own virtues ruined him. In a fight with Johnny Page of Texas several years ago in Pittsburgh, a blow from Eddie's right floored Page as if he had been cut down with an ax. His head struck the floor and when they picked him up he was dead. Eddie wasn't much good after that and then Henry Armstrong came along and knocked him out.

They made a lot of that in the build-up for Fritzie's fight against Armstrong but Zivic's anxiety to get in the ring with Henry came the first time Fritzie laid eyes on the champion. When the match was originally made for the Dapper Dan Club in Pittsburgh, Fritzie was so confident of success that he told Promotor Al Abrams to offer Armstrong a $25.000 guarantee and he (Fritzie) would fight for expenses.

When Mike Jacobs heard about the fabulous guarantee, he thought anything that good was also good for New York and the match was put on in Madison Square Garden. Zivic read the comic pages in his dressing room before the fight. He was that cool. At the end of the fourth round he came back and told Carney, "Luke. I'm going to win the title. I can lick this guy."

Lesson for Salesmen

The day before the fight, Fritzie announced that if he won he was going to "buy a big sixteen-cylinder car, first thing." The day after the fight ten salesmen waited for him in the lobby of his hotel. Zivic's gift of gab is phenomenal and this was a great opportunity for him.

"Where were you guys yesterday?" he demanded. "Didn't think I had a chance, did you? Well, I bought a station wagon from a guy at the radio station last night. What the hell I want with a station wagon I don't know but *he* thought I was going to win. Goodby."

Fritzie's inspiration is his wife and two sons: Fritzie, Junior, aged seven, and Charley, just past one. All three stayed up to listen to the fight the night he lifted Armstrong's title. As soon as he could get back to the hotel, he grabbed the phone and called his family. Young Fritzie, who is obviously going to get somewhere in this hard world, came on the wire and greeted his father.

"Hello, Champ," said little junior. "How much dough did you get?"

After his triumph over Armstrong Fritzie won his next fight on a foul when Al (Bummy) Davis ended by kicking Fritzie, the referee and anybody who climbed through the ropes. A Pier Four combat with Lew Jenkins, the lightweight king, ended in a good draw. And then came that return fight with Henry Armstrong. Wow!

The brothers are reconciled to Fritzie's success because Pete's business is better and Jack even has an explanation for it all. It seems that Fritzie came down with pneumonia in 1937 when he was training for a fight with Vince Dundee. The doctors shook their heads and put him under an oxygen tent. Only blood transfusions would help. Among the donors was Brother Jack. He has been taking advantage of that circumstance ever since.

"Fight!" he cries in astonishment. "Why shouldn't he fight? He's got some of my blood in him. He was never any good before that, was he?"

It's just the old family spirit.

WAKE UP YOUR LIVER BILE— WITHOUT CALOMEL

—And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pints of liquid bile into the food you swallow every day. If this bile is not flowing freely, your food may not digest. You get constipated. You feel sour, sunk and the world looks punk.

It takes those good, old Carter's Little Liver Pills to get these 2 pints of bile flowing freely to make you feel "up and up." Get a package today. Take as directed. Amazing in making bile flow freely. Ask for Carter's Little Liver Pills. 10¢ and 25¢

Evil Under the Sun

Continued from page 19

He observed: "Handy place. You'd never suspect it from the outside."

He played the torch carefully over the floor.

Hercule Poirot was delicately sniffing the air.

Noticing this Weston said. "Air quite fresh, not fishy or seaweedy, but, of course, this place is well above high watermark."

But to Poirot's sensitive nose, the air was more than fresh. It was delicately scented. He knew two people who used that elusive perfume. . . .

Weston's torch came to rest.

"Don't see anything out of the way in here," he said.

Poirot's eyes rose to a ledge a little way above his head. He murmured: "One might perhaps see that there is nothing up there?"

Weston said: "If there's anything up there it would have to be deliberately put there. Still, we'd better have a look."

Poirot said to Lane, "You are, I think, the tallest of us, Monsieur. Could we venture to ask you to make sure there is nothing resting on that ledge?"

Lane stretched up, but he could not quite reach to the back of the shelf. Then, seeing a crevice in the rock, he inserted a toe in it and pulled himself up by one hand.

"Hullo," he said, "there's a box up here."

In a minute or two they were out in the sunshine examining the clergyman's find.

Weston said, "Careful, don't handle it more than you can help. May be fingerprints."

It was a dark green tin box and bore the word "Sandwiches" on it.

Sergeant Phillips said, "Left from some picnic or other, I suppose."

He opened the lid with his handkerchief.

Inside were small tin containers marked salt, pepper, mustard, and two larger square tins evidently for sandwiches. Sergeant Phillips lifted the lid of the salt container. It was full to the brim. He raised the next one, commenting: "H'm, got salt in the pepper one, too."

The mustard compartment also contained salt.

His face suddenly alert, the police sergeant opened one of the bigger square tins. That, too, contained the same white crystalline powder.

Very gingerly, Sergeant Phillips dipped a finger in and applied it to his tongue.

His face changed. He said—and his voice was excited. "This isn't *salt*, sir. Not by a long way! Bitter taste! Seems to me it's some kind of *drug*."

"THE third angle," said Colonel Weston with a groan.

They were back at the hotel again. The chief constable went on:

"If by any chance there's a dope gang mixed up in this, it opens up several possibilities. First of all, the dead woman may have been in with the gang herself. Think that's likely?"

Hercule Poirot said cautiously, "It is possible."

"She may have been a drug addict?"

Poirot shook his head. He said, "I should doubt that. She had steady nerves, radiant health, there were no marks of hypodermic injections—not that that proves anything; some people sniff the stuff. No. I do not think she took drugs."

"In that case," said Weston, "she may have run into the business accidentally and she was deliberately silenced by the people running the show. We'll know presently just what the stuff is. I've sent it to Neasdon. If we're on to some dope ring, they're not the people to stick at trifles—"

He broke off as the door opened and Mr. Horace Blatt came briskly into the room.

Mr. Blatt was looking hot. He was wiping the perspiration from his forehead. His big, hearty voice billowed out and filled the small room:

"Just this minute got back and heard the news! You the chief constable? They told me you were in here. My name's Blatt—Horace Blatt. Any way I can help you? Don't suppose so. I've been out in my boat since early this morning. Missed the whole blinking show. The one day that something *does* happen in this out-of-the-way spot, I'm not there. Just like life, that, isn't it?"

Mr. Blatt came to anchor in a chair, pulled out a cigarette case and offered it to Colonel Weston, who shook his head. He said, with a slight smile, "I'm an inveterate pipe smoker."

"Same here. I smoke cigarettes as well—but nothing beats a pipe."

Colonel Weston said with sudden geniality, "Then light up, man." Blatt shook his head. "Not got my pipe on me at the moment. But put me wise about all this. All I've heard so far is that Mrs. Marshall was found murdered on one of the beaches here."

"On Pixy Cove," said Colonel Weston, watching him.

But Mr. Blatt merely asked excitedly, "And she was strangled?"

"Yes. Mr. Blatt."

"Nasty—very nasty. Mind you, she asked for it! Hot stuff—eh, M. Poirot? Any idea who did it, or mustn't I ask that?"

With a faint smile Colonel Weston said. "Well, you know, it's we who are supposed to ask the questions."

Mr. Blatt waved his cigarette. "Sorry—sorry—my mistake. Go ahead."

"You went out sailing this morning. At what time?"

"Left here at a quarter to ten."

"Was anyone with you?"

"Not a soul. All on my [own] some."

"And where did you go?"

"Along the coast in the [direction of] Plymouth. Took lunch wi[th me]. Much wind so I didn't actu[ally go] far."

After another question o[r two] Weston said: "There's nothing y[ou can] of that might help us?"

The other shook his head. "[Can't] think of a thing." He added[, "That'll] make a bit of a stir, I im[agine]. The press will be on to it like [a shot]. There won't be quite so m[uch] high-toned exclusiveness ab[out the] Roger in the future. Jolly R[ather]. Precious little jollity about[it]."

Hercule Poirot murmured "[I hope you've] not enjoyed your stay here."

Mr. Blatt's red face got s[till] der. He said:

"Well, no, I haven't. T[he] all right and the scenery a[nd the] ice and the food—but there [is no] *ness* in the place, you kn[ow]. mean! What I say is, my [money is] good as another man's. We [all have] to enjoy ourselves. Then w[hy not] together and *do* it? All th[ose] and people sitting by them[selves] giving you frosty good mo[rning]—good evenings—and Yes, ve[ry fine] weather. No joy de viver. I['m sick] up dummies!"

Mr. Blatt paused—by no [means] indeed. He wiped his for[ehead] more and said apologetica[lly]: "[Don't] pay any attention to me. [I get] worked up."

HERCULE POIROT murm[ured]: "[And] what do we think of Mr Blatt?"

Colonel Weston grinned.

"What do *you* think of hi[m]?" "You've seen more of him th[an I have]."

Poirot said softly, "There [are many] of your English idioms th[at describe] him: The rough diamond! [A self-]made man! The social clim[ber]—as you choose to look at [it]—ludicrous, blatant! It is a [matter of] opinion. But I think, too, [that he is] something else."

"And what is that?"

"Now, Mr. Smythe, exactly what did your wife say when she cast this spell over you?"

Poirot, his eyes raised to the

ame in with a trace of
his manner. He said:

"That's a nice little death lot you sent me along."

"What is it?"

"What is it? Diamorphine hydrochloride. Stuff that's usually called heroin."

Inspector Colgate whistled. He said, "Now we're getting places, all right! Depend upon it, this dope stunt is at the bottom of the whole business."

THE little crowd of people flocked out of the Red Bull. The brief inquest was over—adjourned for a fortnight.

Rosamund Darnley joined Captain Marshall. She said in a low voice, "That wasn't so bad, was it, Ken?"

He did not answer at once. Perhaps he was conscious of the staring eyes of the villagers, the fingers that nearly pointed to him and only just did not quite do so!

"*That's 'im, my dear.*" "*See, that's 'er 'usband.*" "*That be the 'usband.*" "*Look, there 'e goes . . .*"

The murmurs were not loud enough to reach his ears, but he was none the less sensitive to them. This was the modern-day pillory. The press he had already encountered—self-confident, persuasive young men, adepts at battering down his wall of silence, of "Nothing to say" that he had endeavored to erect. Even the curt monosyllables that he had uttered, thinking that they at least could not lead to misapprehension, had reappeared in this morning's papers in a totally different guise. "Asked whether he agreed that the mystery of his wife's death could only be explained on the assumption that a homicidal murderer had found his way on to the island, Captain Marshall declared that—" and so on and so forth.

Cameras had clicked ceaselessly. Now, at this minute, the well-known sound caught his ear. He half turned—a smiling young man was nodding cheerfully, his purpose accomplished.

Rosamund murmured, "*Captain Marshall and a friend leaving the Red Bull after the inquest.*"

Marshall winced.

Rosamund said, "It's no use, Ken! You've got to face it! I don't mean just the fact of Arlena's death—I mean all the attendant beastliness: The staring eyes and gossiping tongues, the fatuous interviews in the papers—and the best way to meet it is to find it funny! Come out with all the old inane clichés and curl a sardonic lip at them."

He said, "Is that your way?"

"Yes." She paused. "It isn't yours, I know. Protective coloring is your line. Remain rigidly nonactive and fade into the background! But you can't do that here—you've no background to fade into. You stand out clear for all to see—like a striped tiger against a white back cloth. *The husband of the murdered woman!*"

"For heaven's sake, Rosamund—"

She said gently, "My dear, I'm trying to be good for you!"

They walked for a few steps in silence. Then Marshall said in a different voice: "I know you are. I'm not really ungrateful, Rosamund."

THEY had progressed beyond the limits of the village. Eyes followed them but there was no one very near. Rosamund Darnley's voice dropped as she repeated a variant of her first remark: "It didn't really go so badly, did it?"

He was silent for a moment, then he said, "I don't know."

"What do the police think?"

"They're noncommittal."

After a minute Rosamund said, "That little man—Poirot—is he really taking an active interest?"

Kenneth Marshall said, "Seemed to be sitting in the chief constable's pocket all right the other day."

"I know—but is he *doing* anything?"

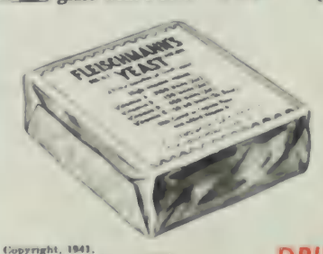
You'll like yeast  this new way

HERB: Yeast certainly did me a world of good, and I know it. But I couldn't learn to eat it. Didn't like the taste.

JEAN: Well, you can stay with it now and get *all* its benefits . . . and believe me there are plenty of them! . . . because it's delicious in tomato juice. Gives it the flavor of oven-fresh bread. Twice a day for me, and I feel better every week.

HERB: I believe you. You look better, too. Must be something in what the authorities say . . . yeast is one of the richest natural sources of the amazing vitamin B complex, that lots of us don't get enough of.

JEAN: Something? There's a world of good sense, and good feeling, and good results in it! Drink it first thing in the morning, last thing at night, and watch for that "riding high" feeling!



MASH . . . Take a cold cake of Fleischmann's Fresh Yeast and mash it in a dry glass with a fork.

STIR . . . Add a little cold tomato juice, milk or water. Stir till blended. Then fill glass. Stir again and . . .

DRINK your yeast this delicious, easy way. It's quick, too . . . whole business takes less than a minute!

Fleischmann's *Fresh* Yeast

DRINK IT . . . TO YOUR HEALTH!

"How should I know, Rosamund?"

She said thoughtfully:

"He's pretty old. Probably more or less gaga."

"Perhaps."

They came to the causeway. Opposite them, serene in the sun, lay the island.

Rosamund said suddenly, "Sometimes—things seem unreal. I can't believe, this minute, that it ever happened. . . ."

Marshall said slowly:

"I think I know what you mean. Nature is so—regardless! One ant the less—that's all it is in nature!"

Rosamund said, "Yes—and that's the proper way to look at it really."

He gave her one very quick glance. Then he said in a low voice, "Don't worry, my dear. It's all right. *It's all right.*"

LINDA came down to the causeway to meet them. She moved with the spasmodic jerkiness of a nervous colt. Her young face was marred by deep black shadows under her eyes. Her lips were dry and rough.

She said breathlessly, "What happened—what—what did they say?"

Her father said abruptly, "Inquest adjourned for a fortnight."

"That means they—they haven't decided?"

"Yes. More evidence is needed."

"But—but what do they think?"

Marshall smiled a little in spite of himself.

"Oh, my dear child—who knows? And whom do you mean by they? The coroner, the jury, the police, the newspaper reporters, the fishing folk of Leathercombe Bay?"

Linda said slowly, "I suppose I mean—the police."

Marshall said dryly, "Whatever the police think, they're not giving it away at present."

His lips closed tightly after the sentence. He went into the hotel.

As Rosamund Darnley was about to follow suit, Linda said, "Rosamund!"

Rosamund turned. The mute appeal in the girl's unhappy face touched her. She linked her arm through Linda's and together they walked away from the hotel, taking the path that led to the extreme end of the island.

Rosamund said gently, "Try not to mind so much, Linda. I know it's all very terrible and a shock and all that, but it's no use brooding over these things. And it can be only the—the horror of it, that is worrying you. You weren't in the least *fond* of Arlena, you know."

She felt the tremor that ran through the girl's body as Linda answered.

"No, I wasn't fond of her. . . ."

Rosamund went on:

"Sorrow for a person is different—one can't put *that* behind one. But one *can* get over shock and horror by just not letting your mind *dwell* on it all the time."

Linda said sharply, "You don't understand."

"I think I do, my dear."

Linda shook her head. "No, you don't. You don't understand in the least—and Christine doesn't understand either! Both of you have been nice to me, but you can't understand what I'm feeling. You just think it's morbid—that I'm dwelling on it all when I needn't." She paused.

"But it isn't that at all. If you knew what I know—"

Rosamund stopped dead. Her body did not tremble—on the contrary it stiffened. She stood for a minute or two, then she disengaged her arm from Linda's.

She said, "What is it that you know, Linda?"

The girl gazed at her. Then she shook her head. She muttered, "Nothing."

Rosamund caught her by the arm. The grip hurt and Linda winced slightly.

Rosamund said, "Be careful, Linda. Be very careful."

Linda had gone dead-white. She said, "I *am* very careful—all the time."

Rosamund said urgently, "Listen, Linda, what I said a minute or two ago applies just the same—only a hundred times more so. *Put the whole business out of your mind.* Never think about it. Forget—forget. . . . You can if you try! Arlena is dead and nothing can bring her back to life. . . . Forget everything and live in the future. And above all, *hold your tongue.*"

Linda shrank a little. She said, "You—you seem to know all about it!"

Rosamund said energetically, "I don't know *anything!* In my opinion a wandering maniac got onto the island and killed Arlena. That's much the most probable solution. I'm fairly sure that the police will have to accept that in the end. That's what *must* have happened! That's what *did* happen!"

Linda said, "If Father—"

Rosamund interrupted her: "Don't talk about it."

Linda said, "I've got to say one thing. My Mother—"

"Well, what about her?"

"She—she was tried for murder, wasn't she?"

"Yes."

Linda said slowly, "And then Father married her. That looks, doesn't it, as though Father didn't really think murder was very wrong—not always, that is."

"Don't say things like that—even to me!" Rosamund said sharply. "The police haven't got anything against your father. He's got an alibi—an alibi that they can't break. He's perfectly safe."

Linda whispered, "Did they think at first that Father—?"

Rosamund cried, "I don't know what they thought! But they know now *that he couldn't have done it.* Do you understand? *He couldn't have done it.*"

She spoke with authority; her eyes commanded Linda's acquiescence. The girl uttered a long, fluttering sigh.

"You'll be able to leave here soon," Rosamund said. "You'll forget everything—everything!"

Linda said with sudden unexpected violence, "*I shall never forget.*"

She turned abruptly and ran back to the hotel. Rosamund stared after her.

"THERE is something I want to know, Madame."

Christine Redfern glanced up at Poirot in a slightly abstracted manner.

"I ain't got no yuther man," Dawthy Dawn complained. "Buldickie is de onlies' man ever paid me any mind. And he ain't paid me much."

The Widow Duck laughed. "Mens," she declared, "ain't hard to git. Name any man on de place which might make Buldickie jealous."

Dawthy Dawn shut her eyes and bid as high as her imagination would stretch. "Newman Dykes," she said.

"Dat boy makes 'em all jealous," the Widow Duck chuckled. "Now, you go home, whilst I makes some tawk wid Newman. He owe me a favor, anyway."

Dawthy Dawn pondered. "But you knows I ain't no sinner, Mis' Duck," she protested. "And I 'on't want Newman to fall me f'm grace."

"Newman ain't gonter do you nothin'," the Widow Duck promised. "You jest mind yo' own and keep yo' mouf shet. Newman jest gonter start 'pearin' out de puck-korn grove ontwell de tawk git about, and when Buldickie hyar 'bout dat he gonter figger jest like any yuther husband figgers when he hyars dat Newman Dykes has been around de house."

"But s'posin'," Dawthy Dawn insisted, "dat big ole scound'el come to my house and change my mind?"

"I swear, child," the Widow Duck told her, "maybe you ain't as smart as I figgered you was, or maybe you don't know Newman Dykes as good as me. And den agin, maybe you ain't stood up and looked in de lookin' glass in a long time. Now you go 'long home. Newman ain't gonter do you nothin'."

Dawthy Dawn went home and once more took up her unexciting domestic routine. At least once during each day, Newman Dykes would pass by her house and the Widow Duck took it upon herself to see to it that these journeys of the plantation's big lover did not escape notice and comment. Buldickie, however, said never a word.

"Maybe," Dawthy Dawn told the Widow Duck, "he don't keer efn I'm snake-in-de-grassin' wid Newman."

THE Widow Duck would not even consider such an unorthodox possibility. "Buldickie ain't what you call no rale prime smart man," she said. "But he a man, and ain't no man gonter like hit when he figger his woman is snake-in-de-grassin' him. You go 'long—I'm fixin' to speak wid Buldickie right now!"

When Buldickie and his team reached the turnrow, the Widow Duck was waiting for him.

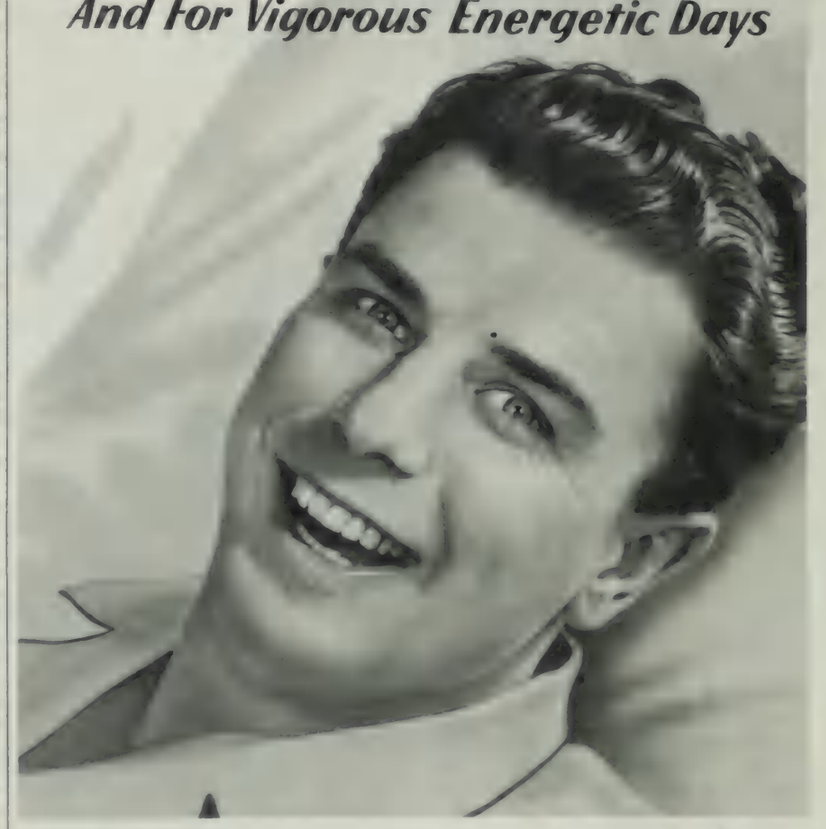
"You ain't comed to git dat weddin' pig I promised you, son," she said reproachfully.

"No'm," Buldickie admitted. "I been fixin' to, but jest gittin' strung out bein' married and all, I ain't had de time hardly to build me a pen."

"I didn't know," the Widow Duck said slyly. "I figgered maybe you and Dawthy Dawn wa'n't gittin' on so good. I figgered maybe you wouldn't want dat pig efn you was fixin' to divo'ce her off befo' spring sot in."

"Naw'm," Buldickie said. "I ain't fixin' to divo'ce her off. She do all right."

"But what about all dis tawk goin' on?" the Widow Duck said. "Hit ain't for me to pack a tale, but I reckon hit ain't no news to you dat Newman Dykes been gittin' 'round de puck-korn grove since he got well enough f'm dat load er buckshot he picked up on Red Chute."



"Yas'm, I hyared de tawk."

"And you ain't jealous? You know good as me, Newman Dykes is de biggest snake-in-the-grasser in Bossier Parish."

"Naw'm, I ain't jealous," Buldickie

Try this...for Clear-Eyed MORNINGS

And For Vigorous Energetic Days

. . . Do This One Simple Thing at Bedtime Tonight

ARE you one of those lucky ones who starts the day on a crest of a wave—fresh, clear-eyed, *alive!*

Or do you frequently awaken almost as tired as when you went to bed? Depressed . . . with nerves on edge . . . and a meager supply of energy that's drained by afternoon?

If you're one of the latter, don't fail to adopt the new "morning freshness" idea you hear so much about these days. Try taking a cup of *new, improved* Ovaltine just before bedtime each night. Not only to foster restful sleep—but as an aid to clear-eyed freshness and heightened energy next day.

How It Acts

First: When taken before going to bed, Ovaltine has the power to relieve that feeling of "nervous tension." Thus helping to condition the mind for sleep.

Second: It provides a specialized form of nourishment designed to prevent certain common types of digestive unrest. These conditions, according to medical authority, may be the cause of as much as 50% of night-time tossing.

Third: Ovaltine also furnishes certain food elements to help replenish vitality—rebuild worn-out muscle, nerve and body cells while you sleep. The new, improved Ovaltine has recently been enriched with greater amounts of protective minerals and greater amounts of Vitamins A, B and D.

The new, improved Ovaltine is a *scientific* food-concentrate designed to accomplish specific nutritional results for those who are rundown, nervous and under par or who sleep poorly.

These are not mere "statements" or "claims." In a 3-year scientific sleep investigation, the majority found that, when they took Ovaltine regularly at bedtime, they definitely felt *more refreshed* in the morning.

Over 1,700 hospitals in this country alone serve it. Doctors approve its use.

So try Ovaltine. See if you don't wake up feeling really *alive* and "on your toes."

The Protecting Food-Drink

told her. "Dawthy Dawn ain't no sinner gal."

"Big ole Newman Dykes is a dog!" the Widow Duck warned. "Now I ain't speakin' a word agin yo' wife, but Newman is jest de kind er man dat kin fall any gal f'm grace, efn he sot his mind to hit."

"Newman Dykes won't sot his mind to fall my woman f'm grace," Buldickie stated firmly. "I'm de onlies' man on de place ever give Dawthy Dawn any love. Dat's how come I married up wid her. I ain't always got to be watchin' my back do'."

The Widow Duck shrugged. "Son, yo' faith sho will move mustard seeds," she said, "but you mind out you don't 'find a mountain goin' out yo' back do' when you comes in de front. So say de Sperrit, son. Be not disencouraged. God will change conditions."

She walked away disgusted. "Dat boy," she reported to Dawthy Dawn, "ain't got sense 'nough to pour *nothin'* outn a boot! Efn I didn't hate ole Satan so bad, I'd make Newman come hyar and fall you f'm grace."

Dawthy Dawn was interested. "I c'd git redeemed agin," she suggested.

"Nawp," the Widow Duck decided. "De Senior Usher at Ole Ship er Zion ain't fixin' to git mixed up in no kind er sin. Nor neither I ain't gonter let no member like you do dat. But you know what I'm fixin' to do?"

"Naw'm," Dawthy Dawn was dejected.

"I'm fixin' to make Newman Dykes come hyar and set in de kitchen ontwell Buldickie come in f'm work," the Widow Duck planned. "And when Buldickie come in de front do', Newman got to jump up and knock over a table and den run outn de back do'."

"Will dat do any good?"

"Efn hit don't, den I quits tryin'," the Widow Duck said. "And I most gen'ally don't quits tryin' ontwell I gets what I sot out to git."

COACHED by the Widow Duck, Newman Dykes put on a good show. When he heard Buldickie's footstep on the porch, he shoved Dawthy Dawn through the kitchen door and overturned the table. Then he ran through the cabin, almost colliding with the returning husband, and went dodging behind trees in the pecan grove.

Buldickie understood, almost immediately. He watched until Newman was out of sight, and turned to Dawthy Dawn, who was waiting expectantly in the middle of the big room.

"Dat," Buldickie accused, "was Newman Dykes!"

Dawthy Dawn looked surprised. "Who was Newman Dykes?"

"Dat man which might' nigh runned over me gittin' outn my house."

"Aw, dat man."

"Yeah."

An awkward silence fell. Buldickie seemed to be trying to get the visual facts straight and Dawthy Dawn was waiting to see what would happen when he did.

When she could stand the suspense no longer, she suggested meekly, "Yo' supper's all ready."

The words pulled Buldickie awake. "Aw, I ain't hongry, now," he said, and walked out of the cabin.

Dawthy Dawn was puzzled. She had done exactly as the Widow Duck advised but Buldickie had not acted as he had been due to do. She was glad when, a few minutes later, the Widow Duck appeared.

"Buldickie be back soon," the Widow Duck promised. "He jest stepped out to cool off inside his mind. He been plowin' too hard to stay off long widout no supper."

The Widow Duck and Dawthy Dawn sat down to wait. An hour passed and full darkness came. Another hour and the moon came up. They both jumped when they heard a scratching sound on the batten blind.

"Who dat?" Dawthy Dawn demanded.

"Hit's me, Modom Aw-Bear," a hoarse whisper answered. "You put a buzzard feather in de toby and den you put de toby onder yo' hosband pillow—"

"Cissy Ringgold!" the Widow Duck called angrily. "You git away f'm dat window. Come on in de house like you was somebody or git on back to yo' shanty. Don't stand at de window and screech like a ha'nt!"

"Duckie Meeler!" the hoodoo woman yelled. "You break de gree-gree!"

"You come in dis house, or I'll break yo' haid!" the Widow Duck threatened.

Modom Aw-Bear came inside, sucked through her teeth at the Widow Duck and then hunched down in the chimney corner. The Widow Duck was about to speak, when Buldickie returned.

He was not alone. On his arm was a strange young woman, not too good to look at, and none too certain of herself.

"Dis whar I live at, Eula," Buldickie said. "Yonder my kitchen, in yonder. See kin you whup me up some supper."

W. B. Courtney reports on our most important Good Neighbor

In Next Week's Collier's

Eula glanced wall-eyed around the room but did not move.

"And de rest er y'all ladies," Buldickie continued, "kin step out er my house whilst my new wife gits lot-broke."

"Yo' new wife!" the Widow Duck demanded.

"You git dat 'oman outn my house!" Dawthy Dawn yelled.

"I tole you, Duckie Meeler, you break de gree-gree," Modom Aw-Bear put in.

EULA, evidently beginning to feel "lot-broke" and more at ease, spoke. "Y'all hyared what Buldickie say," she told them. "He say git out." She stepped aside as if to allow passage. "And I'm tellin' you de same! Dis my house, now, and I don't want no womens to hang about my house."

"You hold on, dar!" ordered the Widow Duck. "Buldickie, what de name er Satan you tawkin' 'bout? Who dis gal standin' up hyar?"

"Dat's Eula Mis' Duck," Buldickie explained. "I married her offn Duke's Bend, dis evenin'."

"Fool!" the Widow Duck snorted. "You can't marry up wid two womens at de same time. Did you stand up befo' de preacher?"

"Naw'm, I ain't stood up befo' nobody, yit. I was fixin' to, when I wa'n't so hongry and tired like I is, now."

"And have two wives?" the Widow Duck asked.

"Naw'm. Jest only one. Dawthy Dawn done divo'ced me off."

"I ain't divo'ced you off no sich," Dawthy Dawn protested. "I still loves you good."

"Hunh?" Buldickie asked hopefully. "You mean, you ain't divo'ced me off, sho 'nuff?"

"Naw, darlin', I wouldn't divo'ce you for nothin'."

IT REQUIRED a few moments for that fact to soak in, and when it did Buldickie got mad.

"Den dat makes Newman Dykes snake-in-de-grassin' me!" he yelled. "I'm gonter git my pistol and shoot his gizzard out!"

"You ain't got no pistol, darlin'," Dawthy Dawn reminded him gently. "And anyway us was jest—"

"You ain't got no call to shoot Newman," the Widow Duck began to explain. "He ain't snake-in-de-grassed you, Buldickie. I put him up to dat foolishness."

"I bet dat's a big ole rusty lie," Eula said. "I hyared 'bout Newman Dykes, over on Duke's Bend. And f'm what I hyars, he'll snake-in-de-grass ev'y husband on de place, and dey womens will lie about hit."

Buldickie, peaceable by nature, found his quiet world no longer comprehensible.

"I wish," he begged plaintively, "dat y'all wouldn't do like dat. I'm tired and hongry and y'all womens is jibberin' and jabberin', and don't no sense come outn nobody's mouf. I'm hongry in my stummick and all messed up in my mind and I don't like hit to be like dat."

"Y'all git outn my house," Eula ordered. "My man don't like hit like dat." She gestured threateningly toward Dawthy Dawn.

"Who git outn whose house?" Dawthy Dawn asked tartly. "Ain't no Duke's Bend lady comin' hyar and put me outn my house."

"I *wisht* y'all ladies wouldn't fuss," Buldickie whimpered. He appealed to the Widow Duck: "Can't you make 'em stop?"

"I ain't fussin'!" Dawthy Dawn said, making a sudden dive for the kitchen. She emerged, waving a large knife. "I'm *cuttin'!*"

The Widow Duck grabbed her. "Don't do like dat, daughter," she urged. "Cuttin' ain't right. Now, Eula, dis all been a mess but you ain't in hit. So you jest better drag hit on back to Duke's Bend."

"Nawp," Eula refused. "Buldickie is de onliest man ever axed me to marry him up and I ain't fixin' to git on back to no whars!"

"Aw, Eula, whyn't you go on back?" Buldickie pleaded. "When I axed you to marry wid me, I didn't know I still had Dawthy Dawn. And you know good as me, hit ain't no good for a man to have two womens at de same time."

"You kin run Dawthy Dawn off and keep me," Eula suggested.

"Ain't nobody runnin' me off," Dawthy Dawn put in. "Buldickie is my husband befo' de preacher."

"He kin div'oce you off," Eula retorted. "Efn I was a man and my 'oman snake-in-de-grassed me—"

"Ain't nobody snake-in-de-grassed nobody," the Widow Duck said with difficulty, as she held Dawthy Dawn tightly. "I put Newman Dykes in hyar, my ownse'f."

"I'm stayin'," Eula announced.

"Git dat gal outn hyar!" Dawthy Dawn yelled.

"Div'oce her, Buldickie," Eula urged, "befo' I gits mad and takes dat knife away f'm her and cuts her gizzard out!"

"I *wisht* y'all wouldn't like dat," Buldickie begg prayerfully toward the W

"Hit's too big a mess f 'bout whilst I'm holdin' the Widow Duck said. got to make up yo' ow like you kin git shut er off Dawthy Dawn."

Buldickie considered silence descended.

More and more often, *reports* Lynn Fontanne

...ur guests today choose Wine"

Lynn Fontanne has co-starred with her husband, Alfred Lunt, in such popular stage successes as "Idiot's Delight," "Taming of the Shrew," "The Guardsman," and, currently, "There Shall Be No Night." She entertains frequently, in New York and at the Lunt farm at Genesee Depot, Wis.

Notes ON SERVING WINE

- *Simplicity* is the keynote to wine-serving today. You are smartly correct when you serve wine very informally.
- *Try the "table wines" at dinner* — they are purposely made "dry" (not sweet) to complement main course foods. Red, hearty, *Burgundy* is grand with steak. And delicate, pale-gold *Chablis* or *Rhine* wine lends a special goodness when served with lighter meats like roast chicken. The usual serving is half water goblet size.
- *With refreshments, in the afternoon or evening*, try the rich, full-bodied "sweet" wines. Golden *Muscatel* with cookies or cakes. Or red *Port* with cheese, nuts or after-dinner coffee. Serve these wines in small glasses.
- *Before dinner* — alone or with appetizers — bring on cocktail-size glasses of amber Sherry. Nutlike in flavor, Sherry is considered by connoisseurs the perfect invitation to a good meal.

This advertisement is issued by the wine growers of California acting through the Wine Advisory Board, San Francisco.

"Times are such that people need to relax and enjoy themselves occasionally. Yet almost everyone wants to be moderate about it"

"EVEN AT INFORMAL DINNERS nowadays I usually serve a good wine with the main course," writes Lynn Fontanne. "Afternoons, too, I find more and more people are choosing wine — because they prefer to stay on the moderate side."

Not only in smart social circles. Not just in certain parts of the country. Everywhere today hosts and hostesses are doing as charming Lynn Fontanne does.

They're setting out a dry table wine with the main dinner course. At cocktail time, or when drinks are served in the evening, they give each guest an opportunity to say "make mine wine." It's an *extra touch* of hospitality!

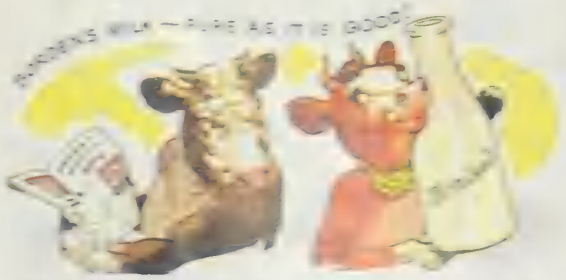
We have printed here some wine-serving suggestions. When next you have guests, try one of these simple ideas. You'll find wine makes easy the duties of host or hostess. You'll notice wine compliments your most particular guests.

THE WINES OF CALIFORNIA

In discriminating households the wines of our own country are usually served today. More than 9 in every 10 Americans who serve wine choose wines grown here. The wines of California, for example, are grown to strict standards of quality. True to type. Well developed. Inexpensive.

Be Considerate — Serve Wine

"Don't be silly, Elmer—I'm still a home girl at heart!"



ELMER TEED AGAIN was not in a pleasant mood. He closed a page of fan magazine gossip and his eyes blazed at his quarantined Elsie, the Borden Cow.

"Home girl," he growled. "Imagine you'd suddenly go stalking off to Hollywood at the drop of a manicure—and still be a home girl!"

"Goodness, it was only so I could make one movie," answered Elsie, going right on with her unpacking. "A very *short* picture, too."

"I doubt if it could *get* in," sniped Elmer sniffily. "I am more interested in finding out just what struck the golden idle in Hollywood has changed you."

"Not one bit," answered Elsie positively. "Do we, the honey darling in all you? I bet. There's nothing more important in my life than my wonderfully pure, whole-some Borden's Milk that Borden cows and Borden

experts help me to produce. And I'd much rather be back home here tending grass—it's so wonderfully pure, wholesome foods that we've helped us make them among my name up in lights."

"Well, your name is being mentioned in connection with many shiny milk or lights," translated Elmer, glancing angrily at his fan magazine.

"Naturally," agreed Elsie. "People are bound to talk—so no wonder it's all over town that your favorite Borden's Eagle Brand Sweetened Condensed Milk makes marvelous cake frostings, cookies, and candies. The magic is because it's made from my milk."

"And then, I presume," murmured Elmer, with heavy sarcasm, "is the total excuse to which rumor has reached your fair name?"

"Oh, I suppose word also has gotten around about the Borden's Evaporated Fortified Milk I help to make," admitted Elsie. "How it and only gets all approving nod from physicians for infants feeding because it's so digestible and rich in Vitamin D—but is grand,

too, for creating lovely cream soups and fluffy mashed potatoes. Boy, it's swell material I should be the toast of many a jolly dinner table . . ."

"Ahh, now we're getting somewhere," Elmer. "And you a mother!"

". . . Especially when you think," mused "how delightfully a good dinner can with one of the aces at Borden's Fine for instance: Military Board Cheese dessert cheese with the creamy mellow

"You talk," interrupted the suspici thought humor wouldn't melt so soon

"One of life's pleasantest experiences "is the way Borden's Ice Cream melts —it's so rich, creamy, smooth delightful pure milk and cream take a good deal

"Mercies, sakes, ice cream!" groaned pose there's anything you won't take on

"That's not true, Elsie," said you kn Elsie. "My milk doesn't happen to Nine Inch Mixer Meal. It's one thing gets the spicy flavor and wholesomeness kind to Borden cows that makes my gra What on earth is making you so quarre

"This!" bellowed Elmer, as fan maga fan magazine under Elsie's nose. "Hm this headline, 'Elsie Loves Little Men'

"Silly!" giggled Elsie. "Why, Little M of the movie I made. I'm surprised imagining I'd turn out to be a glamor thought of me while I was away, you remembered just one thing."

"What's that, Elsie?" puzzled Elmer

Elsie smiled and tweaked his ear: "I it's *GIT* to be good!"

Satur y nights."
Markh n looked at her; his face was bright and pleased, like a kid's, and you could see that he loved her very much, loved her as much as though it were the first time, which it may have been.

She shook her head once. "Let's not bother with that sort of thing." Later, you could be annoyed by her saying it, but at the moment she made me feel childish for having made the suggestion. "Why wait?" she went on. "There's no point in waiting for morning. Why can't we go now? How far is it?"

"It's about a day's drive," I told her. "If we leave now we'll all be dead tired tomorrow and there isn't even a half-decent hotel once you leave the main road."

"That won't bother me," she said. "I don't see why it should you."

So we left inside an hour. The road is good and pretty straight below Monterrey.

We didn't talk much. Markham, next to me, drowsed off now and then, and some sort of vague antagonism lay between the girl and myself. When we got

"Fourteen years ago I remarked in a joke, 'Darling, I'll dry' "

SIDNEY HOFF

gas in Ciudad Victoria he was awake again but she had gone into a deep sleep across the rear seat of the small sedan I had brought into Mexico with me.

"I'm glad she's asleep," he said. "She's so intense, she never gets any rest."

"She manages to look good," I said. The tiredness had made me sullen. "How did you get mixed up in this business? Your father is a working, practicing capitalist, and the last I heard you were, too."

"I'd been thinking about things," he said, "and then I met Alice and she's the one who really got me interested in this in more than an academic way. She's so selfless. Her family is like my own and naturally she's had to give up a lot."

"WHY don't you two marry?" I said. If I hadn't been so tired I mightn't have said it. But it didn't seem to bother him.

"For one thing, she's not sure she loves me. For another thing marriage might interfere with our work."

We stopped talking and after a while Alice Calhoun woke and asked where we were. "We're about an hour's ride outside Villa Juarez. We're going to stop there until daylight and get something to eat and a little sleep."

"Why can't we push on?" she said.

"Because the place we turn is only a little way on, a collection of huts called Antigua Morelos. From there on it's bad enough by daylight without driving it by night and in a time of unrest."

Her silence gave and was intended to give her opinion of my courage. But after a while she offered to drive. I told her I was all right.

THE Hotel Monte in Villa Juarez is a good hotel even if they do overcharge for the food. We woke the night clerk and he went to wake one of the kitchen boys. I fell asleep in a chair in the lobby and when I woke it was starting to get gray outside. Markham was asleep in a chair across the lobby and Alice Calhoun was sitting in a chair near mine, smoking.

"I thought you'd rather sleep than eat," she said, "so I didn't wake you. They can make more coffee."

It was more thoughtful of her than I would have expected. "Thanks," I said. She looked fresh and lovely again, even in that light. "Can we go now?" she said.

"Right away."

While I drank black coffee she sat near me, smoking and looking at Markham, still asleep. "He looks like a kid asleep, doesn't he?" she said.

"He is a kid."

This time, when she looked at me, she didn't seem to dislike me any more and there was even a little humor in her face. "You're not such a bad sort," she said. "We may be able to make a good revolutionary out of you yet."

"It'll take a lot of doing," I said.

Markham woke and we left him drinking coffee and walked outside. The gray light barely showed things, their outlines but not the details.

"The world seems to be weeping," she said, "although there's no rain." It was raw and cold and I offered her my topcoat. When I was helping her on with it, my hand touched the skin of her neck and, even in the cold, I knew it and my voice changed when I spoke, saying it was an old coat.

She turned and was facing me, her face misty and perhaps spiritual in that light. "You're rather nice, Bannon," she said. "Kiss me." I have never liked women who called men by their last names, but I kissed her. It came as a shock to discover how soft that firm-looking mouth could go. When I broke from her, I turned away, suddenly embarrassed. "What's the matter, Bannon?"

"That kid inside loves you and I don't."

Her voice implied a shrugged shoulder: "The kind of love you speak of is a convention—and fidelity to one person is one of the more outmoded of its adornments."

I turned to her: "Boy, you pick up some honeys in the social-science classes at the schools these days."

She smiled. "Don't be so grave, Bannon. Here, you're not more than five or six years older than us and you're talking like one of the older generation."

Markham came out of the hotel. "I feel swell," he said. "Want me to drive?"

At Antigua Morelos we turned to the west, and the road was two ruts in the ground except where the rocks cropped through. I took the shotgun case off the floor and put the gun together. "Why did they let you take that in?" Alice Calhoun said, "they wouldn't let us take pistols in?"

"Not even friends of the people?" I said. "It's illegal to take a pistol in, but one is permitted to take shotguns in, for the hunting of birds." I broke open two boxes of shells, one loaded with No. 6 bird shot, the other loaded with ball.

"But you can't shoot birds with ball cartridge," she said.

"That's right," I said.

IN FIRST gear, at five miles an hour, we went down a rocky burro path, just wide enough; it went down the mountain on a long diagonal. We crossed a flat valley on a red clay wagon trail and we hit a spot of road where they'd laid a base of crushed stone for a modern road. The sun was up and the air already warm. Jungle lay on either side of us and chachalacas, a kind of black wood chicken, had started to scream in the trees. Markham stopped the car and I shot one out of a treetop. The noise made others fly across the road and I shot at one on the wing and missed.

"Fiddling while Rome burns," she said. "You're some shot."

"You try it."

She took the clumsy, double-barreled, twelve-gauge and swung with the flight of a bird across the road. The chachalaca broke in its flight and dropped. I picked up the two birds and we went along. We had to go so slowly that we made no coolness for ourselves and the heat came into the windows in waves. An Indian in dirty white pants and shirt came loping down the road. He raised a hand and we stopped. He had an old rifle in his hand and a fine, handmade knife at his belt.

"Today, *señores*, there will be much trouble," he said. "It is not good for *turistas* to come this way."

"We are not *turistas*," Markham said. His inflection was perfect.

"Even so, the chief would not like it," the Indian said.

"Look at his forearm!" Markham said in English to us. There was a tattooed hammer and sickle on it. "Who is the chief?" Markham said in Spanish. "Jose Sanchez?"

"Sanchez is now our *Coronel*," the Indian said. "Peloaz is our chief. You admire Peloaz, *el Jefe*?"

"We think he is a great man," I said quickly in my broken Spanish. "We would like to see him."

"In *Ciudad del Maiz* you will see him," the Indian said.

"I don't understand this at all," Alice

Calhoun said when we were moving again. "Here the revolt was to be against Peloaz and the things he stood for and the Indian said Peloaz and Sanchez were together now and Peloaz was the chief."

"At some time or other in his life," I said, "Peloaz has been bandit, agrarian, capitalist, crooked politician, fascist and professional friend of the people." It looks as if he's decided the comrades are going to get in and so he's going to be one, too."

"I don't believe it," she said. She was almost angry. "Your attitude is cheaply cynical."

"All right," I said. "Let's see what we have in Ciudad del Maiz."

It was a town all faded pastel colors in the white sunlight. The streets were cobbled and not made for automobiles although there were plenty on it now. An awfully young kid at the head of a detail of five or six men stopped us and asked our business. We told him we were American friends of the people and that we would like to see Sanchez.

"Sanchez is in the field," the boy said, preparing to repel the enemy. The chief Peloaz will see you though. It is best that you see him. He is a great man."

"We know that," I said.

"We have taken the city," the boy said proudly, "and hardly anyone has been killed." He pointed to a flag flying from the town hall. The flag was bright red.

"Where is there a telephone?" I said.

"Why do you want a telephone?"

"I would like to tell the United States and tell a newspaper what a great man Peloaz is."

He was pleased again, but still a little suspicious. "You will wait here, in this restaurant," he said. "I will see if the chief Peloaz will see you. There is only one phone. One of my men will wait here with you."

"What of the friend of Peloaz," I said, "Ochoa, the governor?"

The boy shrugged elaborately. "He is no longer a friend of Peloaz's. Peloaz is now a friend of the people. It is against the tyranny of Ochoa that we are revolting. We have tried to kill Ochoa, but he is in the city of San Luis and we have not yet taken that city. Look, we have cannon, even." He pointed to a near-by rooftop. Two early-model antiaircraft guns pointed skyward.

IN THE restaurant we ate and tried to find out something from the Swiss woman who ran it. She talked less Spanish than we did and was frightened and wouldn't say much. Markham talked to her in German and she brightened up a little.

"Keith is a fine linguist," Alice Calhoun said to me. "He can talk any of the principal Continental languages."

"What does she say?" I asked Markham.

"Peloaz is a great man," Markham said. "That seems to be the burden of her song. She's afraid to say anything else."

I watched Alice Calhoun as we ate, waiting for her to look or speak her surprise. But she remained calm and ate with appetite. "What do you think of finding Peloaz on your side?" I finally said.

"He's probably seen the light," she said. "We've converted people just as reactionary as he is."

"You mean you accept his change as a sincere one?"

"And why not?" she said. Her eyes were clear and innocent.

"Up to an hour ago he represented everything you hated. Why do you accept him now?"

For the first time her eyes dropped. Keith Markham looked ill at ease. "I believe he may be a brave and sincere man who has undergone a change of heart," she said.

"And I'm telling you he's nothing but a cheap dissolver and bandit dressed up in store clothes. It couldn't be that your change of heart is due to the fact that he's the boy who's in the saddle now on your side?" I was angry but it was an anger of the mind; with the rest of me I felt differently toward her. So that with these two things in me I had to get up and turn away. I moved toward the door and the peon left to guard us said that it would be better if I did not go outside, yes?

In a little while the kid came back with his detail. The chief Peloaz would see us now. It might be, even, the boy said, that I would be permitted to use the telephone.

PELOAZ sat behind a big desk in what had been the alcalde's office. He was big for a Mexican, almost all Indian, with a broad face, black eyes and a large, cruel mouth, which smiled slowly when he saw the girl with us. He was dressed in some sort of khaki officer's uniform with a good deal of loops and gold braid around the shoulders. It was fortunate, he said, that American newspaper people should come here at the moment of his triumph. He was glad to see us. Alice Calhoun explained that she and Markham weren't with a newspaper.

"We're down here representing the American Intercollegiate League for Aid to the Working Class," she went on. "We want the peons of Mexico and their true leaders to know that the American workers are behind them. We're at your service."

"That is fine," Peloaz said. "Tomorrow we can talk over many things. Today, though, we will crush the last of those who oppose us in this area. Perhaps you would like to see it? My men are already in the field."

So we went with him. He seemed to be in a hurry and I couldn't take a chance on phoning then and perhaps missing the fight. We drove out of town and stopped when his big car stopped on a little ridge that bounded one side of a shallow valley. There were trees on the ridge across the valley but in between was almost a flat plain.

If a thing can be at once pathetic and sinister the scene before us was that. Two groups of Indians opposed each other in the valley, the rough white coats and pants they wore were very bright against the sunburned green and brown of the plain. Below us were Peloaz's fighters, a few men in rough officer's uniforms moving among them. They shouted and moved restlessly from time to time, brandishing their weapons, but no shots were fired. The officers kept trying to spread them out in some sort of military formation but they always managed to get back together in a bunch. The others, across the valley, stayed bunched and did not move. They apparently had no officers.

"I suppose the others are Fascist," Alice Calhoun said. We walked to Peloaz's open touring car. He was standing in it. The men below us were so close that we needed no field glasses. We were protected by thick mesquite and a little bump in the ground.

"They do not understand," Peloaz began to explain to us. "Those ignorant Huastaca Indians across the valley. You know, of course, as do my own men, that before we can equably divide the land or provide for its being run by a commune, as the case may be, all the land must be gathered together and there must be a dictatorship. Only for a while, of course. These ignorant Huastecas do not understand that. They do not want to give up their land for the common good. So we must take it from them. It is unfortunate but that is the way it is. Sanchez is

WAKE UP!

You Need This Effective MEDICIN[AL]
To Cope With DANDRUFF, FALLIN[G]

Any serious attempt to cure Dandruff, relieve Itching Scalp or check excessive Falling Hair calls for a serious-purpose MEDICINAL treatment—not something that's just dinned on the hair. Use Glover's Mange Medicone and massage and it will soon be apparent to you how really effective it is. Nobody knows it better than your Barber—ask him!

For the shampoo, use Glover's Medicated Soap—an important part of the treatment. FREE booklet on famous System—write GLOVER'S, 460 Fourth Ave., New York.

got two peons to carry him
toward the town on a stretcher. I went up the slope to the cars, but Peloaz's was gone and Alice Calhoun was not there. I drove back to town and went to the alcalde's office. They were both there, Alice sitting quite near Peloaz's desk, smoking a cigarette.

"In case you're interested," I said, "Markham is dead." I was tired again and feeling nasty.

She didn't look at me. "He was very brave. He'll become one of the great American martyrs to the Cause, like John Reed. He'll serve us in death as in life. We can raise a fund in his name in the States to spread the Cause down here."

"You must have loved him very much," I said.

"I never said I loved him," she said.

WE HAD been speaking in English but when I turned to Peloaz I saw that he had been watching me steadily and was, for some reason, jealous. I asked him if I could use the phone now.

He was overelaborate, so that I knew he was lying. It was so unfortunate, he said, but the enemies of the Cause had cut the wires. They would not be repaired before the next day and perhaps not then. If I wanted to return to the main road where there were phones he would send a guard with me, although that was really unnecessary since he had once more restored peace and order. When I did get to the main road, he would advise my not coming back for a while. There would be no new developments for some time, he said.

So that was it, but I went through the motions of what we call the conventions. "I'll have to go," I said to her. "You'll probably want to come with me. Markham will probably have to be buried here. You can't do much for him."

"I don't think I'll go back to the road with you, Bannon," she said, too casually. "I'll want to stay around here a while and see at firsthand how order emerges after a revolution. And I really think I can do something toward helping the general here get Marx straight in his head and apply it consistently."

"I imagine you'll be able to," I said, "for whole hours at a time."

She flushed a little. "You're just jealous, Bannon," she said. "I do like you, though. I like you a lot. I ought to be out of here in two or three weeks. What I'd like you to do is feature poor Keith in your story, telling how he was killed leading a charge against the Fascists. It's a little thing . . . and it'll be for the good of the Cause."

"I'm old-fashioned that way," I said. "I write them as I see them, not the way they'll fit into the party line."

"Oh, you're very righteous, Bannon," she said. "Listen, you do what I've asked you to and I'll meet you in Laredo or San Antone as soon as I get out of here."

"Don't bother."

"You're very moral, too, aren't you, Bannon?"

"No," I said, and I looked at Peloaz for a second. "It's purely a question of esthetics."

So I went away from that place. Before going I told Peloaz that since he had achieved order so admirably I was sure I would not need a guard. Driving back alone, trying to make the main road before dark, thinking of my story, thinking of all that had happened and that you couldn't put in a newspaper, I still wanted her. And finally I had the story written out pretty well in my head, the way I had seen it, which may have been the wrong way, but after all the truth is the way you see the thing. Only one thing I couldn't straighten out then and I never have since. Just what in hell could you write about Keith Markham?

JACK
Never wore anything on his back
But Arrow Shirts (which we happen to create
And which look great.)

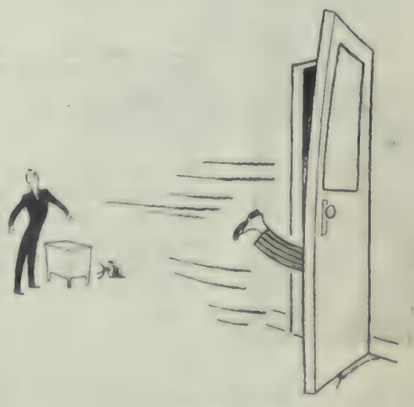
Yet when Jack asked his boss for an extra five or so,
The boss yawned and growled, "No."

"Come, come," you say. "People who use the product in ads always get raises from their bosses."

And we say, "Hold your hosses!"

For Jack's boss continued in this vein:

"I'd be insane
To raise a man who dresses as well as you do!
You must have an outside income from bonds, or a racing stable, or some under-cover voo-doo.
Why, your shirts are finer
Than mine're."



Jack then launched into a discussion
About the shirts he looked so flush in:

"For all their fine fabric and tailoring, for all their incomparable Arrow Collars,
These Arrow Shirts cost just $2.
What's more, they have the 'Mitoga' figure-fit, their bosoms never mess!
And they're Sanforized-Shrunk, fabric shrinkage 1% or less."

"Well," said the sleepy V. P.,
"You have a sense of value I like to see among my men;
And so I'm going to give you not an extra five, but an extra *ten*."

Before Jack could say "Golly!"
Jack's boss dashed out and got some Arrow Shirts at an Arrow dealer's that he noticed on his way to work in the trolley.

To South America with the Birds

Continued from page 22

the 4,500 miles of the length of South America there is not a national law prohibiting any man from killing them in as large numbers as he may wish. The only restriction on such shooting is a local one in the province of Buenos Aires, Argentina.

Of migratory waterfowl there are seven species of geese and twenty-one varieties of ducks that contribute to the feathered hosts which annually leave the United States in quest of food and security in lands below our borders. Waterfowl do not take such long journeys as do the yellowlegs and plovers. Many pass the winter in Mexico and Central America and a few species enter those South American countries washed by the waters of the Caribbean Sea. Only the blue-winged teal has been found as far as central Chile. The chief danger to the ducks that leave the United States lurks in Mexico, where game protection is young and game wardens are few, and in Central America, where the term "game warden," or its equivalent, is as yet unknown.

Many of our nongame birds are found in Central and South American countries during our northern winter. More than sixty North American warblers teem in the tropical jungles. The black-poll warbler even ranges to Chile. Scarlet and summer tanagers flash in thickets in the lands beneath the equator. Bobolinks go to Bolivia, Brazil and Paraguay; and barn swallows circle and dip over the plains of Venezuela. I have seen ospreys catching fish in the rivers of Brazil and Argentina and duck hawks chasing their prey about the lagoons and savannas of Paraguay.

The sight of North American birds at such vast distances from their haunts in which we are accustomed to see them brings strongly to mind the fact that bird preservation is an international problem. No nation without the co-operation of other countries can adequately care for its feathered inhabitants. We in the United States usually speak of the wild birds we see as "our birds," but this implied claim to exclusive ownership becomes weak when we face the fact that many of them spend more of the year in tropical countries than they do in our own fair land. Such birds belong to the Americas, and it is to the interest of Canada and all the twenty-one republics to preserve them for our common good.

Traffic in Bird Skins

Small birds from North America are not singled out for killing. As a matter of fact few native hunters have any special knowledge about bird migration. They are skilled in the use of slingshots, and where pebbles are not available small round pellets of sun-dried mud are used as missiles.

For long years there was extensive killing for the millinery-feather trade of England, France and the United States, but comparatively little demand now exists for such products. A steady traffic in bird skins for some years has been carried on in South America. At Posadas, in northern Argentina, a shipment of 4,000 was sent to central Europe a few weeks before my arrival. At Asuncion, Paraguay, a German sought me out and complained that the war had destroyed his business in bird skins. His market had been museums and natural-history dealers in Germany and Switzerland. He asked me to put him in touch with institutions in the United States where he could sell the product of his skill with gun and scalpel.

In Misiones, Argentina, a won me, with evident pleasure, the visits the schools of the region tures on birds. When I inquir the nature of his lectures, she when he reaches a school he number of birds and teaches t boys how to skin them. While a prominent gentleman, his so little green bird and brought It was a new species for me and to skin it for later identificat lad watched me a few minut seized his gun and shot a scis flycatcher. By signs, I let him did not want the birds killed shot twice at a hummingbird before I could stop him.

Deadly Hazards for Bir

In Brazil and parts of Arg found a widespread interest in t this interest, to a North A seemed to be of a peculiar form many people have native birds cages in their yards or attache outside walls of their homes. cages you may see robins, mock blackbirds, troupials, parrots, p and, in fact, any small bird o going that can be kept alive w that can easily be procured.

Birds in cages, or held in t were offered to me for small b country roads, at houses w stopped, and at river landing steamboats docked. Across th from my hotel in Buenos Ai was a bird store where, besides strawberry finches and Java shipped from Europe and Jap were many native birds, of counted 14 species one day a another. The last time I passed four young South American o one of a dozen cages hanging i the store. Some of these b caught in homemade traps. I s such traps hanging to trees in yards and gardens. Each con decoy bird and sticks of guava bait.

By far the most popular way birds is by means of gum. In where I visited, an English lad that men and boys from the nea came every Sunday to smear twigs and wire fences in the n hood. Birds alighting on these could not escape, and the bird usually returned to town with erable supply. And the gum continued to be deadly hazardo long after the raiders had depar

At Buenos Aires I heard gre erences to "The Day of the Bird is celebrated in the great Paler of the city. Each year a day is for liberating large numbers of Palermo Park, and the public i to take part in the ceremonies. In 1937, 1,500 birds were liber 1938, 1,500 were set free, and tember 8, 1939, 4,000 were gi dom.

ecent trips to Italy I found
to buy dead skylarks and
species, as I formerly had
rd-blinding had become
mmon. A great deal of this
improvement is due to that committee's work, under the leadership of Professor Alessandro Ghigi of Bologna University, and Prince Francesco Chigi of Castel Fusano.

Many years ago I began lecturing and writing in behalf of the birds in North Carolina. At that time almost any bird in the state could legally be killed or caged at any time. There was not a state game warden between the Potomac River and the Gulf of Mexico, and my efforts were regarded by many as the vaporings of a fanatic. But I lived to see my bill for bird protection and for the establishment of a game-warden system become a law on March 6, 1903.

Years later, when working at the New York legislature, endeavoring to secure a law to put an end to the legal traffic in "aigrettes" and the feathers of other native birds, I was told this could not be done. The idea was scathingly ridiculed in the New York Times on March 26, 1910; and the Outlook put in an oar for the feather milliners. But the Audubon bill was passed by the legislature and signed by Governor Charles Evans Hughes on May 6, 1910.

There is an innate love for birds in the hearts of men and women in all lands. It is only necessary to stimulate that feeling and provide practical suggestions of procedure in order to draw them into organized effort.

No republic in South America has a handbook on birds in the Spanish language. No lecturers on bird life go from city to city; and there are no classes in bird study in the schools. There is but one magazine on birds south of the United States, and it is largely a technical publication and reaches only a few hundred people. We could be very helpful to our friends in Central and South America by making available to them, in their own language, some of the rich stores of knowledge our army of bird students have accumulated on the feeding habits of birds and on their economic, educational and inspirational values.

The National Committees for Bird Preservation in South America could use such material to great advantage in educating political leaders to the need for bird laws, the preserving of an adequate breeding stock of game birds and game mammals and in teaching the general public the names and value of the birds of their neighborhoods. They could show the benefits to be gained by providing food and drinking places, and by the erection of nesting boxes for certain species that are natural guardians of the gardens, parks and groves.

The efforts of the Pan-American Committee for Bird Preservation are made possible by individual contributions, and so far as its means will permit the committee will extend every aid to our South American colaborers in their pioneer undertakings in behalf of the birds.

Adequate protection for the birds that annually migrate from North America will come only when a better understanding of the subject is developed in all the countries of the Americas.

Begging Dog CROCKETT JOHNSON

What shall I do with all the days and hours
That must be counted ere I see thy face?
How shall I charm the interval that lowers
Between this time and that sweet time of grace?

— FRANCES ANNE KEMBLE

Oft in the tranquil hour of night,
When stars illume the sky,
I gaze upon each orb of light,
And wish that thou wert by.

—GEORGE LINLEY

Days of absence, sad and dreary,
Clothed in sorrow's dark array,
Days of absence, I am weary;
She I love is far away.

Dykstra and the Draft

WE HAVE yet to detect any fleas on the job Clarence A. Dykstra is turning in as general manager of the draft. Or, if there have been any fleas on Mr. Dykstra's performance, his latest ruling as we go to press kills them.

We refer to the Dykstra decree that there are going to be no special flags, emblems or other insignia to be sported by families of drafted men, like the "service flags" of the World War.

Right-ho. These men are only doing what their age, fitness, brains, and so on qualify them to do for their country at this time. Give their families flags to hang in their windows, aces to stick in their hats or medals to pin on their togas and we may as well pass out decorations all around. Every worker who stays on the job would rate honors: so would every farmer who keeps on producing, every businessman who refrains or is restrained from profiteering, every taxpayer who goes on paying his taxes and, for that matter, every editorial writer who writes patriotic editorials like this one.

Marksmanship and other decorations for the draftees, certainly—as and when they earn them. Ribbons and gewgaws simply because they obey the law, certainly not: and we're delighted to see Mr. Dykstra step on this proposal so promptly and so hard.

Which leads us around to the thought that the draft law ought to be made permanent, instead of dying off in five years as now planned.

We can't hold with optimists who think we'll be able to go back to sleep militarily, navally and aerially five years or so from now. It looks to us as if the world moved in 1914 into a wild and woolly era which won't tame down appreciably within the lifetime of any of us.

In such a Napoleonic, Frederick the Great-ish, Attila-esque epoch, this nation will need four things above everything else. Those things will be a two-ocean navy, a large and efficient air force or forces, a powerful standing army and a big reservoir of trained young men.

Even if things do quiet down sooner than seems likely, a permanent system of compulsory selective military training will be of great benefit to the country. Benefits are showing up already, with the draft law only about three months old and the first levies j shaken down in raw and windy cam

For one thing, the notion that t ment owes the citizen everything wh zen owes the government nothing rapid fade-out—none too soon for th the country, if you ask us.

For another, new hope has come in of numerous young men, especiall cently out of college or nearing grad many a young man of this huge gro fense drive means that instead of sit waiting for some job to turn up, mea ing off the old man and hating it, h for the armed services. The servi year to three years of sure employ pay, a chance to get around and l and meet a lot of people.

What more does a young man of and what can anybody do for a without spirit?

The draft looks healthier to us e every way. Let's have some fact-fa sion of the proposals to make it a part of our social and economic syst

What's Wrong with Peace?

LORD HALIFAX succeeds the lamented Lord Lothian as British ambassador to the United States; and we're already fed up with the talk about how Halifax is a bad choice because he took part in the Munich backdown of September, 1938. He tried once to avoid war. Now it is argued that he cannot represent his country well in time of war.

The argument strikes us as dangerous nonsense. The most vigorous Secretary of War we have yet had was Newton D. Baker—who was a pacifist of frightful mien until Woodrow Wilson told him we had to lick Germany and Baker had to boss the job.

Nor was there anything unique about this. It's axiomatic that nobody makes a fiercer fighter than the man slow to anger.

As a matter of fact, Halifax has been known as one of the bitter-end war-party Churchill cabinet. It worked out th Lothian, himself, who also hoped f Munich.

By the same token, we believe th into this war officially it is a safe be of our present-day "appeasers" themselves to be much fiercer fi some of our current interventionist

Nova's Novel Notion

IT WAS a pleasure a while ago for Collier's to print Lou Nova's detailed brag, allowing as how he is going to take the heavyweight tiara off Joe Louis' forehead when and if he manages to get into a ring with Joe.

As to that, we're not laying any bets. But we were and are much interested by Nova's suggestion that the thumb be taken off the boxing glove. He advocates, you remember, a rounded fingerless and thumbless glove, and says such a glove would clean up the fight game no end.

We think there may be something in that. After all, the glove now in use, with that free-wheeling thumb attached, must present quite a temptation to some of the less high-minded of the prize-ring gentlemen to try some eye-gouging and lip-, throat- or ear-cla the clinches and the infighting.

Whether Nova makes good on his massacre Joe Louis or is scuttled hope Nova's thumbless boxing glove may be thoroughly and fairly consid gentlemen who run boxing and by t go to the fights. Nova may have

COVER JAY IRVING

ANY WEEK

HAVING decided to be more active socially, we dropped in at a friend's house the other day and were greeted by his twelve-year-old son. It was about six o'clock and, except for the cook who was busy about dinner, the kid was alone. He told us somewhat coldly that his parents were at a neighbor's house. We made several of the inane remarks that adults rally children with and then departed, asking him to tell his parents that we'd called. Sorry to have missed them—that sort of thing. Whereupon the kid let go: "When I marry," said he, "I'm going to have either children or cocktails but not both."

WE HAD thought of stopping in at another place, but didn't. Instead we went home where we read a long letter from a young man who is learning the warrior's trade at Fort Dix, New Jersey. He tells us that he has just been visited by his father who in 1917 was doing what he's doing now. His old man was pretty deeply impressed by the fresh orange juice, soft-boiled eggs, toast and jam for breakfast. Furthermore, it took him some time to recover from the shock of being told that the new Army is thinking of awakening the lads in the morning with buzzers instead of bugles. But that his son's sergeant was a Ph.D. and a student of the Greek school of ecclesiastical music seemed to be a little too much. Father left camp a bit depressed. But we don't see why. Our sergeant could read and write. Also he was musical. He played the harmonica. He'd call in a couple of squads of us rookies and, propped up on his cot, play How Ya Gointa Keep 'Em Down on the Farm After They've Seen Paree. Every few bars he'd stop long enough to say: "'Sgood, ain't it?" And we'd all agree that it was good. We remembered what happened to the dullard who said it wasn't. The more we heard about this new Army the sorrier we are that we aren't in it.

WE PAUSE to give belated credit to the Briegleb Aircraft Company, Inc., of Van Nuys, California. Not so long ago Commander E. F. McDonald, Jr., wrote an article for us—Silent Wings. It was about gliders. Therein he stated that there were only three recognized glider makers in the country—the Frankfort Sailplane Company, the Bowlus Sailplane Company and the Schweizer Aircraft Company. That statement was short of accuracy. We are informed by Mr. William G. Briegleb, president of the Briegleb Aircraft Company, that his outfit has been building gliders and sailplanes since 1927 and during the past year business increased to where it was necessary to incorporate the Briegleb company. Furthermore, the Stone Aircraft Company, too, of Detroit, Michigan, is building a nice glider. Commander McDonald's article omitted these names by oversight. This paragraph aims to set the record straight.

SO WE proceed to applaud the patient foresight of a merchant in Edmonton, Alberta, to whom, two years ago, a young fellow applied for the price of a marriage license. As you may very well guess, the young man was about to take a wife. The merchant, a believer in such things, lent him the money. Overcome, doubtless, by felicity, the young man forgot to repay the merchant. But the other day, the merchant went to the borrower's home and demanded his money. He got it—out of the baby's bank. "I had a feeling it would be like that," said he.

AS FAR as we can find out, two biographies of Charlotte Cushman have been written. Nevertheless, Mr. Lyman Beecher Stowe of No. 1 Beekman Place, New York City, is undertaking to write another. We've told Mr. Stowe that we'd tell you. If you have any of her letters or any other helpful material, Mr. Stowe says, he'll appreciate receiving them. In case you don't know, Miss Cushman was a talented American actress. She died in 1776 after creating a number of riots with her interpretations of Meg Merrilies and of Shakespearean heroines. Let's see, there was something we were going to say about this enterprise. We've forgotten what it was. The din of war is bad for concentration. But this is still a free country and Mr. Stowe has a perfect right to write about Miss Cushman.

PERSONALLY we think that Mr. Elias Berriscat of Washington, D. C., is a trifle bitter. But in a wayward moment we promised him we'd publish his next letter and this happens to be it. Mr. Berriscat has been listening to congressional debate. "You can add," says he, "that Mr. Berriscat is sick and tired of it, too. All I heard was that this country was in danger of running out of raw materials. Anybody looking at the floor of either the House or the Senate can see that the statement isn't true."

SOMETHING we've said in these pages about Italy, her Duce and her arms has annoyed Mr. Dominick Bassopiazza of New York City, who informs us that we are a "Greek skunk." Mr. Bassopiazza says ... Fascist but that Italy ... this war the master o... nean, of Africa and ... permitting Germany t... tunes of North Amer... part of Europe north... Pass. "After we have ... says Mr. Bassopiazza, ... to rats like you." It ... however, "Germany ... Italian army, navy a... continue to aid her de... including lice like yo...

Yes sir—when **FRED ALLEN** goes to work on gags for his Texaco Star Theatre Program, he buckles down over his Corona. Words and ideas pop while he types. "Fred Allen Jr.," he calls his Speedline Corona.

"Men on the Keys," Mrs. Harold D. LeMar of Omaha, Nebraska, sends us this cute picture of her kitten, Topsy, tiptoeing down the keyboard of her older model Corona. Mrs. LeMar prizes her Corona . . . says her family couldn't get along without it!

Corona Zephyr... The 9 lb. wonder typewriter. Has standard keyboard—back spacer—high speed escapement. Two models—Regular and De Luxe. Ideal for students, travelers (plane travel especially) and occasional typists.

3 Speedline Coronas... Standard, Sterling and Silent. The finest portables money can buy. Each is equipped with famous Floating Shift. Touch typing chart and carrying case included. See your own dealer for free home trial.

Norman Saksvig, World's Professional Typing Champion, uses the *Super-Speed* L C Smith exclusively in nation-wide demonstrations before secretaries and executives. He won his title on an L C Smith, says it's the finest machine he's ever used.

New Freedom for Secretaries. New speed, less fatigue, through the hardest day's work with the easy-action *Super-Speed* L C Smith. New typing aids too, that increase your efficiency... save time and energy. Free demonstration. Phone any branch or dealer.

Typing is easy on an L C Smith or Corona Typewriter

EVEN AN 8 YEAR OLD can learn to operate a Corona portable. Secretaries find the L C Smith office typewriter easier to use. They say it's faster and more efficient.

And typing helps people in so many ways. It enables one to think faster, clearer... encourages neatness and precision. Typing develops talent and rewards the ambitious in school and business.

Maybe you, your children or some other person in your family can benefit through typing. Then, see the new Corona portables demonstrated at your dealer's . . . see for yourself how easy it is to type on one of them. Each may be purchased on our "pay-as-you-use-it" plan.

Business executives and their secretaries should see the new *Super-Speed* L C Smith . . . the most advanced office machine of the day.

L C SMITH & CORONA Typewriters

FREE BOOKLETS! For the beginner, a helpful folder, *"Typing is Easy,"* by World's Champion Typist Norman Saksvig. For the secretary *"Tips to Typists,"* time saving ideas for the expert.

Wing Talk

CHICAGO has lived up to predictions of air-line pioneers that its geographic and strategic location would make it the hub of domestic air commerce. More air lines converge upon it—eight—than upon any other United States city. It has 150 scheduled arrivals and departures each day.

Yet Chicago has the poorest field among important air centers, with respect to modernity and convenience. It is in a poor neighborhood, an hour's unprepossessing ride from the Loop. It has been kicked around by politicos for a decade. It is bisected by railroad trackage that for years now has been "going to be taken out soon"—but that, meanwhile, remains a mental hazard which under certain factors might tend to make a pilot cut his landing fine, and is blamed in "hangar flying" for more than one accident on or near the airport.

LaGuardia Field, New York—the world's costliest airport, $43,000,000—is used by seven lines. It is first in number of scheduled arrivals and departures each 24 hours, with 238 ordinarily, and increases to 250 or more on certain week ends and holidays. Its timetable lead is due to what is practically a "commuting" service maintained between New York and Washington.

The largest state in the Union, Texas, has the greatest number of cities served by regular air transportation—count them: Amarillo, Abilene, Austin, Big Spring, Brownsville, Corpus Christi, Dallas, Houston, El Paso, Galveston, San Antonio, Tyler, Waco, Wichita Falls and Fort Worth. Florida has thirteen air-served cities; California eleven. New Jersey and Delaware are the only states with no scheduled air-transport service. New Jersey was getting along well enough with Newark, masquerading as the New York or Eastern transcontinental terminal.

But it was inevitable that the country's greatest city would build the country's greatest airport.

The Back Seat

OCCUPIED today by William Augustus Winston, who usually sits up front—until the passengers begin to shout, "Captain! Help!" Be reassured, this cry is not for relief from danger but from boredom. STALWART AGAINST THE STORM!

WHEN the sea shimmers peacefully in the sunlight, the strong wall which protects the house above the shore seems useless and unnecessary. But the wise householder knows to what furies that still surface can be stirred; he rests content because the wall is there.

Storms break on the shore of every family's life — and nobody knows when they will come. That is why life insurance stands guard over homes where all is now serene. Seemingly unnecessary to-day — it becomes a strong wall against the world when financial storms arise.

The storm of adversity is at its height during the period immediately following the death of husband and father. The John Hancock Readjustment Income Plan provides protection during this critical period at a cost that is within the most rigid family budget. Our booklet, "A Talking Picture," describes the plan in full. Write for your copy to Department C-1, John Hancock Mutual Life Insurance Company, 197 Clarendon Street, Boston, Mass.

Stop DOUSING...and keep hair good-looking...

Don't rob your hair of its natural good looks by dousing it with water or anything else. Instead, use a few drops of 'Vaseline' Hair Tonic on your comb each morning. Your hair will look well-groomed . . . never plastered!

FOR HANDSOME HAIR ...CHECK DRY SCALP!

'VASELINE' Hair Tonic does more than improve the appearance of your hair. It checks Dry Scalp . . . enables you to keep both scalp and hair healthier.

Before each shampoo give your scalp a thorough massage with 'Vaseline' Hair Tonic. This helps to prevent excessive drying out. 'Vaseline' Hair Tonic contains no drying ingredient. It actually supplements the natural scalp oils.

Then when you comb your hair each morning you don't need to douse it. Just put a few drops of 'Vaseline' Hair Tonic on your comb. Your hair stays in place, yet looks natural, not "plastered down." Begin using 'Vaseline' Hair Tonic today.

'Vaseline' Hair Tonic is different, containing no ingredient that has a *drying* effect.

By actually *supplementing* the natural scalp oils, 'Vaseline' Hair Tonic aids in keeping the scalp soft and supple . . . as it keeps the hair lustrous, well-groomed and good-looking.

Vaseline HAIR TONIC

KEEP UP WITH THE WO

By Freling Foster

As bridge-table arguments have caused an average of five murders and about five hundred divorces annually in this country for many years, there is one woman, called the Carrie Nation of Bridge, who is making it her life business to fight the game. In the hundreds of lectures she has given, each has been dramatically ended with a sketch in which is enacted a murder and a suicide that resulted from a bridge fight.

Not until 1938, or 63 years after he had written Carry Me Back to Old Virginny, was it generally known that James A. Bland was a Negro. In the disclosure, which followed the suggestion that this song be made the state anthem of Virginia, it was also learned that he was the composer of seven hundred other songs, had died in 1911 and was buried in Bala-Cynwyd, Pennsylvania. Today he is known as "The Negro Stephen Foster."

Two flags on one building may fly in opposite directions when the structure has a large dome and they are flown from opposite sides of it. On the Capitol in Washington, a flag on the west side of the dome sometimes blows eastward and another on the east side blows westward in a west wind.

When a person brings a suit for plagiarism without obvious basis in fact, the federal judge has the right to make the offender pay the legal fees of the innocent party. One such case occurred in 1931, when a woman sued Eugene O'Neill and the Theatre Guild for $2,000,000, claiming that Strange Interlude had been stolen from her book. She was ordered to pay the defendants $17,500.

Most desert reptiles, although living in high temperatures, cannot withstand the heat of the sun and sometimes lose their lives when it takes them too long to run from one shelter to another. In such dashes, some species of rattlers have been known to die in nine minutes, while some species of lizards have succumbed in two minutes.

Now-a Dollar Goes 50 Miles Farther!

In Every Way You Judge a Car
Nash is the Best Buy in the Lowest-Price Field

★ **BETTER ECONOMY**—25 to 30 Miles on a Gallon of Gasoline.

★ **SMOOTHER RIDE**—Only low-price car with Coil Springs on *All Four Wheels*.

★ **ROOMIER**—Greater Seating Width.

★ **EASIER STEERING**—First car with Two-way Roller Steering.

★ **SAFER**—Welded Body-and-Frame Construction . . . made rattle-proof, twist-proof.

no e it the first time you get a Nash
ion ration—a *little glass jar* of gasoline
win shield.

efo you ask about it—you're looking
n a azement.

r ha e you seen a car this roomy, selling
owe -price field. The front seat's nearly
t wi !

—yur foot finds the throttle, and in
it se ond you realize this is the liveliest,
est r you've ever driven. (It's
kind f engine with moving parts
ance by radio control.)

er . . faster . . . the road unreels.
bu ps bob up . . . rousing, rattl-
rring bumps . . . but they fade
ke p ntoms, beneath your four-
oil s ings. And this big Nash (body and
ne w ded unit) never quivers or wavers.

A lew "Feel" to Driving

curv ahead! But this amazing Nash
nto em like a pursuit plane . . . with
e wei t of your hand on the wheel. It's
ing ew—Two-way Roller Steering—
u've ver felt anything like it.

Outside it's bitter February—but here's more magic. The air you're breathing is *May*, so perfectly warmed and conditioned by the Weather Eye System that you need no wraps at all!

Save $1.50 to $2.00 on each Tankful

You're glad to know there's a Nash Convertible Bed in back, for you feel like driving on forever.

But suddenly you remember the little glass jar by the windshield. You look. It's *empty . . . the 10th of a gallon of gasoline is gone* . . . and you've averaged more than 25 miles to the gallon.

This gas-meter test* is the proof of Nash's amazing economy.

Making a dollar go about 50 miles farther is part of the $70 to $100 a year a Nash saves you . . . but the thrill you'll remember, the reason why you'll soon own a Nash—is that it puts more fun into driving than any car ever did before!

See your dealer and see for yourself the amazing differences that are swinging thousands to Nash!

*Gasoline Mileage Meters are furnished all Nash dealers to prove the superior economy of the new Nash Ambassador "600".

Nash "6"s and "8"s are Today's Top Values in All Three Major Price Fields

The beautiful Nash Ambassador "600" is typical of Nash extra value in *every* price-class except the highest. Thanks to a $7,000,000 expansion program, Nash dealers can show you provable better Sixes and Eights . . . bigger, more luxurious, higher-powered but more economical cars . . . at prices probably less than you intended to pay. Before you buy any 1941 car at any price, see your Nash dealer first.

ED BY LMORE BROWN

THE telephone rang in the darkness and he jerked up in his cot. Even before his eyes had opened, his waking brain was shouting, "Now! At last! At last! Now!" He switched on the light, glanced at his watch and unhooked the instrument—all in one motion, exactly as in his mind he had rehearsed it a thousand times. He cleared his throat and with his knuckle touched the edge of his mustache. Then he laughed, nervously. It was all so exactly as he'd known for months that it would be! "Seventy-eight," he said into the transmitter.

A pale voice said, "The Prime Minister will speak to Air Vice-Marshal Saloman."

"Saloman speaking."

There was a click; then another voice, a ruddy voice, said, "Saloman? Hello, there, Saloman! Good morning!—Well, it looks like today, Saloman! Now get this; ready? At C." The ruddy voice, now, spoke slowly and precisely: "At C. At twelve-zero-zero hours, G.M.T."

"At C. At twelve-zero-zero hours, G.M.T. Right, sir?"

"Right, Saloman!" A second of silence was broken by the sound of a slowly indrawn breath. "I have just been in touch with His Majesty. He has commanded me to express his affection and gratitude. He will be notified of your take-off. Goodby, old man! God bless you all!" There was another click and that was that. No dramatics. No tosh about "England expecting every man" and so on. A real soldier, the P.M.!

Air Vice-Marshal Sir Asher Saloman reached up and pressed a button on the damp concrete wall behind the cot. A gong clanged in the distance, the clang dying away in soft, buzzing echoes. As he fastened his tunic and shrugged into his flying suit, he heard from overhead and all around him a muffled stirring that swelled into a sound of orderly, purposeful movement. Then there were four successive shocks that shook the room like earthquakes and through the open hatchway in the ceiling came the fluttering, bubbling roar of throttled motors.

He climbed the vertical iron ladder into the operations room. An officer was seated at a desk upon which stood a gooseneck lamp with a green shade; beyond him was a telephone switchboard with two enlisted operators and a teletype machine whose clump-clump-clumping was drowned in the torrents of mightier sound rushing in through the walls.

The officer rose, saluted and handed Sir Asher a teletype sheet. "Latest weather, sir," he said. "It's favorable. Besides, I have to report that all searchlight and antiaircraft units on the course between here and the coast have been ordered to cease operation. However, three bombing squadrons with fighter escort are now in Area Eight. They are, of course, unnotified, but no

more units will take off until Intelligence signals you clear."

"Ah, splendid! Thanks, Mr. Arnheim!" Sir Asher laid the weather report on the desk under the lamp and stooped over to read it, meanwhile smoothing his helmet down over his iron-gray hair. "Good! Good enough!" he murmured. "Ceiling's just where it should be and the fog areas are made to order. I say, Arnheim, this stunt's getting off to a capital start!"

Arnheim's lips moved but no sound emerged. Sir Asher looked up at him sharply, then smiled and shook him by the forearm. "Oh, come, now!" he said. "That's no way to speed the merry picnickers!"

"Picnickers?" The other stared at him, swayed slightly and leaned across the desk. "Picnickers? Oh, God, sir!"

"Tosh, Arnheim, tosh! So long, old man!" He jerked up the zipper of his flying suit, walked briskly across the room and swung open the narrow steel door. Pausing, he looked out into the dome-shaped hangar which housed the great black Junkers 97. On wings and fuselage were the crosses of Germany; its twin rudders bore the Nazi swastikas; its engines, slowly revving up, filled the hangar with their thunder and its broad wings trembled in the swirling gales from the four propellers. Buffetted by these blasts, leaning and struggling against them, he passed under the wing and joined a group of half a dozen men beside the fuselage. He acknowledged their salutes with a nod and a wave of the hand. "Good morning, gentlemen!" he shouted. "Is she all set, Calman?"

"All set, sir!" reported the engineer officer.

"Right! Get the mechanics off her, black-out and have the hangar opened." He turned to the five men who remained.

THESE five, like Sir Asher, wore flying suits. He motioned them to gather around him. "Well, gentlemen," he said, "we've waited a long time, a damnably long time, for this moment. Now that it's here, I want to shake hands with you. With you, Mr. Simons! With you, Mr. Baruch! With you, Mr. Browne, and you, Mr. Wolff-Curzon and you, Mr. Levin!" He hoped it hadn't sounded like tosh, but if it had he couldn't help it. "Well—" he pulled on his right glove—"we will now take our stations, gentlemen!"

ere are three very good eas ns why that perennial fav rite Charley's Aunt is a h arious hit on Broadway

gan's Luscious Luggage

Luther Davis and John Cleveland

THREE young actresses—none of them older than twenty—are making their Broadway debuts in the current revival of Charley's Aunt now at the Cort Theater.

They owe it all to Joshua Logan, who delivered a little speech to the producers when he agreed to direct the play. "Gentlemen," he said, "what this show needs is fresh, untrammeled sex."

The producers concurred and immediately telephoned a few of the better-known actors' agents. Then they made a grave error—they released to a theatrical column the news that they were in the market for ingénues with little or no experience.

Both Day Tuttle and Richard Skinner, the producers, should have known that the American Theater Council estimates there are over 3,000 young women in New York who call themselves actresses—although less than two hundred of these have had a chance to prove it. However, there was no way for either producer to guess that all 3,000 and a few of their friends would present themselves at the offices of Tuttle and Skinner; or that many of them would bring their lunches and refuse to leave. Mr. Skinner shudders involuntarily when he remembers it. "For six days," he says, "we had so much fresh untrammeled sex in our office there was no place to hang our coats."

When the play opened on October 17th, all the critics went quite wild about the three girls who'd been chosen. One magazine summed up the general attitude: "They are the prettiest pieces of baggage to come this way in a long time." Giggling, the girls promptly tacked that notice on their dressing-room wall and dubbed themselves "Logan's Luscious Luggage."

All are undoubtedly luscious—and all very blond. With their hair upswept in the manner of the nineties, the period of the play, they look somewhat alike—slight and feathery and as though they'd catch cold easily. However, any sober spectator can see great differences when he gets used to their general youth. Katherine Wiman, who plays the part of Ela, is taller than the others—five feet five—and her arched, swanlike neck gives her an aristocratic fragility that suits her delicate and distinctive profile. It is she whom artists among the audience immediately want to sketch or paint. "They keep talking about my bone structure and the way my ears are set," Katherine—otherwise known as Tottie—sighs. "I'm not at all sure it's quite nice."

Phyllis Avery, nicknamed Rabbit, is eighteen, a year younger than Tottie, and tends to purr. The coquette of the group, each morning she decides whether she will be "slinky and intense" that day, or "fluffy and coy." In her siren moods she has a tendency to order a great many Daiquiri cocktails, none of which she has ever been seen to drink. The most milk-fed-looking and serious of the lot is Mary Frances Heflin, who is twenty, and passes for a little

"Fresh, untrammeled sex—" Mary Frances Heflin, Katherine Wiman and Phyllis Avery

over seventeen. She knows more about practical theater than the others, for her brother is Van Heflin, one of New York's most successful young actors. Fra, as the others call her, is inclined to speak in prosy aphorisms such as "work breeds work" and "the theater is no place for fools." Her part in the play is a "bit" of less than a minute's duration, but the producers regard her as sufficiently untrammeled to understudy all the women in the production.

The publicity about their beauty has given the three quite a problem—stage-door Johnnies. This menace reached its peak one night four days after the opening when a lot of young men from Harvard pushed their way to the foot of the stairs leading to the dressing rooms. There they settled down quite comfortably and began to bay for the girls.

Phyllis was the first. She marched through them bestowing smiles graciously, like a movie queen much accustomed to refusing autographs. The boys wanted but didn't get her phone number—and were left slightly dazed by such aplomb in one so young.

Then Tottie appeared at the stairhead, and some of the boys fell on their knees and began to salaam. She made a frightened, though graceful, retreat. "It's not that I don't like boys," she told the company manager, "it's just that I prefer them one by one."

Fra pulled the *coup* of the occasion. Forewarned by Tottie, but unwilling to be intimidated by a pack of collegians, she applied make-up hurriedly. When she appeared on the stairs the boys paid no attention to her—for her face was black, and she murmured as she passed, "Pahd'n me, gen'mun, the young ladies gwine be with you-all presently."

Phyllis was discovered among the 3,000 in the producers' office. It happened on the second day of the stampede, when Messrs. Tuttle, Skinner and Logan had already mumbled "Sorry, you're not the type" and "Leave your address and we'll never let you know" well over a thousand times. There was something wrong with all the applicants; either they were too old-looking or spoke with funny accents or showed no signs of being able to act.

Salary No Consideration

Then Phyllis wandered in with a batch of fifty other hopefuls sent by a casting agent. Newly graduated from a two-year course at the American Academy of Dramatic Art, she was wide-eyed and had just the wispy quality for which the part of Amy called. Logan blinked and handed her a script. "Read," he said.

A frightened rabbit who had never auditioned before started to read in a voice an octave higher than normal. Startled by the sound, she lost control of her vocal cords and her words came out in an alarming, quavering treble. To her listeners it sounded like a delightful satire on Victorian maidenhood, and they began to laugh loudly—while the embarrassed Phyllis' voice shot farther up the scale.

Finally Mr. Tuttle interrupted her. "I'm afraid I can't offer you a very large salary," he said, still chuckling.

Phyllis hit high "C." "Thank you! I mean, I accept!" she shrilled. "No matter what it is—it's more than I've been getting."

The money meant little more to her than a symbol that she'd made the grade and was at last "in." The daughter of Stephen Morehouse Avery—a very successful screen writer who has authored such movies as The Gay Deception, The Gorgeous Hussy, Four Mothers—Phyllis' desire to act proceeded from love, not hunger. With a background of schools in Europe and private tutors in this country, she's had some difficulty convincing her rivals that she got her job without pull. "They make me so *mad*," she says.

Katherine Wiman has the same trouble. Inasmuch as her father is Dwight Deere Wiman, producer of such hits as Babes in Arms, I Married an Angel, Higher and Higher, there are still some who refuse to give her credit for any talent of her own. And there was a time when, as she readily admits now, she showed little talent with which to be credited.

Like her co-luggage, Katherine has wanted to act ever since she was a child, but there wasn't much she could do about it until last season when she was graduated from Fermata School and pronounced properly finished. The still-current play, Life with Father, was casting then, and Katherine discovered that auditions were being held in author-actor-director Howard Lindsay's house, downtown on Tenth Street.

It Takes More than a Name

The room was full of famous people of the theater, and Katherine felt very small and incompetent. For a moment she found herself wishing she hadn't vetoed her mother's plans for a large coming-out party. "I was so sickly nervous," she says today, "that I'd almost rather have served on those vague society committees than been standing there with that script in my hand."

She read miserably, and turned on her heel and exited just in time to keep from crying publicly. It was sixty-odd blocks back uptown to her home, but she walked all the way to punish herself "for being so smug." On the same day she marched over to the studio of Frances Robinson-Duff, the most famous dramatic coach in New York. Every day for a year she reported to Miss Robinson-Duff; every night she read plays, did voice and diaphragm exercises. Katherine had discovered something she'll never forget. "Dad's name can get you into an office," she says, "but when you get there, he can't read for you."

Dad's name got her an appointment to audition for Tuttle and Skinner's Mt. Kisco, New York, summer stock company. Dressed to the teeth, she set out to do or die, her mind swirling with Robinson-Duff epigrams on breathing. Mr. Skinner, too, faced the interview with misgivings. He didn't want to turn down Dwight Deere Wiman's daughter—still he did have a box office to consider. "When that girl breezed into my office looking like the queen of all the months of the year," Mr. Skinner says, "I uttered a prayer of thanksgiving. She could just as easily have been a bespectacled little mouse. Then what would I have done?"

The Queen of the Months was promptly engaged for a week, overcoming the aura of the Wiman name. Even the great Ethel Barrymore was a bit impressed when she shared an entrance with Tottie in the first play of that season's repertory. "The girl's shy of speaking to me," Miss Barrymore told Mr. Skinner, "and personally I'm terrified to approach her."

Other members of the company felt the same awe, but as Katherine was engaged for week after week they had a chance to learn she was very much all right. One elderly and asthmatic character actor was delighted to find a chair placed conveniently near the wings every night when he made his exit. He kept thanking the stage manager—until he discovered that Miss Wiman was the thoughtful furniture mover.

By dint of similar kindnesses, Tottie endeared herself to the troupe, and by dint of really exceptional playing won the part of Ela in the summer production of Charley's Aunt. Though she did

OGS IS FOR COLLIER'S BY CHARLES KERLEE

The Seventh Division puts on a Sunday afternoon radio show at Fort Ord. Above, the Glee Club enjoying one of its rehearsals. Below, Private Hamilton Ponder performs for the band

on a radio show, including a one-hundred-voice chorus and band music. Radio announcers plug the outfit, and listeners to 42 Western stations are rapidly getting the idea the Army didn't amount to much before the Seventh Division was organized. Nobody knows yet just what the organization's traditions will turn out to be—but they won't be secret, anyway.

If some outfits are so new they lack traditions, the 250th Coast Artillery doesn't. It got its start in July, 1849, as the First California Guard of Light Artillery; helped hold California to the Northern side in '61; was in on the capture of Manila in '98 and won honors in the St. Mihiel and Argonne sectors in '18. . . . Now it's out for the Army basketball championship.

●

GREAT LAKES: Fort Custer, Michigan, claims the youngest and oldest soldiers in the country. Harry Wohlfeil of Milwaukee is only fifteen, and had quite a time getting in—special War Department dispensation, overcoming of parental objections and what not. A strapping six-footer, he's a private in the Fiftieth Field Artillery Battalion. . . . Oldest soldier is Private John W. Westervelt, who is seventy-two and has been at Fort Custer since 1925. Says he's going to retire in 1946, unless the war's still on. Been in the Army only 24 years and needs six more to get a pension.

Army intelligence tests turn up some curious facts. A high-school graduate at Fort Custer came out of the forty-minute test with a rating of 146 out of 150—tops for the post. Turned out the Army had made him a dishwasher—but he has a desk job now. Few minutes later the intelligence testers marked a soldier "mentally inferior" . . . and him with a Ph.D. degree, too!

A good many of the 1,800 soldiers assigned to Fort Custer hotfooted it for the nearest town—Battle Creek—payday, for a drink. Just beer, though; no hard stuff. Battle Creek has local option. Army officers think it's not a bad idea, either.

●

THE SOUTHWEST: No flying cadet at Randolph Field, Texas, really feels he's making good until he gets a call from an automobile salesman in San Antonio. The salesmen keep close tabs on every novice—those who have passed their forty-hour check with a good record becoming fair credit risks. More than three out of four cadets become car owners before they complete their ten weeks of basic flying training. Almost all of them want the same model—sporty, low-hung convertibles. Secondhand cars of this type are sent to Texas towns near flying fields from all over the country. The cadets buy them on special terms out of their $75 a month pay. It looks like a banner spring for car agencies, with thousands of boys learning to fly at Randolph, Brooks, Kelly and other Lone Star fields.

At the Fort Sam Houston Reception Center a recruit kept on mopping the messroom floor when a colonel came in, the spread-eagle insignia of his rank glinting. "You should come to attention and salute an officer," said the colonel patiently. "Don't kid me," said the recruit. "You're just a mess sergeant. I can tell that by the chicken on your collar."

A Private Argument

By Meyer Levin

ILLUSTRATED BY HARRY BECKHOFF

A SHORT SHORT STORY COMPLETE ON THIS PAGE

THIS fellow was the long-drink-of-water type, only at the moment it was firewater, and the bartender said it had been firewater these four evenings past. The customer sat on the last bar stool, leaning at a fixed angle toward the juke box, which seemed to have become his private instrument.

It was one of those new telephonic juke boxes, with the records played over the wire from a central station, and two or three wisecracks from the operator thrown in as a man bespoke his five-cent selection. A man could send a tune, too, wherever the company had a juke box—to some other bar, if he knew his girl was there with a rival, and wanted to send her a song.

At the moment, this customer was giving ear, with an air at once appreciative and bitter, to a ditty entitled It Makes No Difference Now. Suddenly he smacked his glass down on the bar, and snapped his fingers. "I've got one for her! I've got one!" Hopping from the stool, he hurried a nickel into the music slot. He brushed his arms about, as if to speed the insulting song to its finish.

"What she sends me!" he complained to the bartender. "I'll send her one back that'll kill her! Watch this, Danny!"

"Got a mad on with his wife," Danny explained to all in general, as he slid a couple of beers along the bar. "Been here nearly a week, down from Frisco. Wife's working at Remo's Eats. She won't even talk to him on the phone. But Remo's got one of these boxes and I guess she's got to listen, when he sends those songs over."

The customer nodded, proud of his ruse. Meanwhile the ditty clicked to a close, and the central operator's voice, more than professionally pleasant, spoke from the box: "Hello, Ned, is that you again?"

"Yah, listen, Daisy, I got one! I got one that'll get her. Play I'll Never Smile Again. Tell her it's from Ned."

"But you sent her that only a few minutes ago. Listen, I'll tell you a good one: Number 426. At Least You Could Say Hello."

"No—give her that Never Smile Again. And say, tell her I was in a fight last night, account of her." Like a man tossing in his last chip, he added: "Tell her I got drunk."

"But Ned," the operator broadcast a last objection; "I'm afraid I can't play your selection over there. Not again. The cook hates that song. He says it makes him blue."

"The cook!" Ned stormed. "She's got to worry about the cook! Say—you play that song! I'm the only cook is gonna tell my wife what she can listen to!"

"Do you want a woman's advice, Ned?" the operator persisted, soothingly. "Send her something sweet, like Baby Won't You Please Come Home."

"I AM a sucker," Ned said. "Women can make me do anything they want." He okayed the selection and returned to the stool. "That's my trouble," he announced, after a moment of morose introspection. "I always let her have her way. But not this time. She's coming back to Frisco. Ever been to Frisco?" he asked the bartender. "That's a town!"

"Yep, quite a town," Danny agreed.

"What's the matter with this burg?" a customer demanded of Ned. "Don't you like it?"

"Nothing, except my in-laws live here. That's what's the matter with it. And I got my job in Frisco. Eight bucks a day, that's scale. Know what a cook gets here? Six bucks."

"Well, living is cheaper here," the townsman pointed out.

"Sure. But I ain't even got a job. In-laws," he reaffirmed. "The cause of ninety per cent of broken marriages. In-law trouble. Why should I have to support her folks? Thirty bucks a month, rent alone, I sent down here. That's a lot of dough."

A measure of confirmation was voiced along the bar.

"So I says nuts to that. I ain't sending any more. They can go on relief. So she says not her folks, not while she can take care of them! And she beats it down here! I says okay. If you like your family better than me, okay! I—"

"Ned, here's a song for you from Connie," the operator broadcast from the box. There was just a hint of commiseration in her voice. The music began: I Get Along Without You Very Well.

Ned slapped the bar, for all to witness. "I send her a sweet one! I ask her to come home! And look what I get!" He slid from the stool, and studied the list on the machine for a scorching rejoinder. "I got it! This'll fix her. Number 257: I'm Through!"

The answer came back in due time: Get Out of Town.

Four blocks away, in Remo's Eats, the juke box spoke: "Connie, here's one from Ned." The song began. It was My Last Goodby.

Along the counter, a solid row of men sat eating blueplates. Connie was the only waitress in the place. She scudded about her work, neat, swift. Just now there was no merriment in her face, though the features suggested easy laughter. Scowling, as she hurried back toward the service window, she paused long enough to punch open the cash register, borrowing another nickel. She plunged this into the machine. "Daisy, tell that drunken bum I haven't time to play games any more."

At this moment, the cook opened the kitchen door to announce, petulantly, that orders were waiting. "He's just sitting there day after day throwing away his money!" Connie complained to the machine. "I don't want him to take care of my folks. I can do it myself! If he'd only—" She broke off, suppressing her exasperation.

A group of the men were getting up from the counter. They spoke among themselves for a moment, glancing at Connie, obviously a little embarrassed. Then, clumsily, one of them deposited a big tip, and another lumbered to the song machine. "Say, Dais for that guy over at Da Frisco guy. Give him Nu Wonder Who's Kissing Her

At the bar, Ned receiv message in utter fury. "I huh! So she ain't got time ain't—!" But then the ger the males came out of the nearly went wild.

"Aw, take it easy," Dan "Why don't you go over with her?"

"No, sir! Not till she b fix her! I'll get her ca crammed a coin into the m I'll Never Smile Again, ove

"But Ned," Daisy began,

"Play it!" he commande nickel in, didn't I! You t for the cook, from me!"

THE dirge began, at th Connie pursed her lips, pay no attention. But sudde came from the kitchen. The out, white-faced, struggli coat. "I quit! I told you that song! I'm leaving!"

Remo hurried from the c "But you've got stuff on th can't leave in the middle—

"I don't like it here a going to Frisco!"

The manager watched, fl "Where can I get a cook, i of dinner?"

"I know," Connie said. " work with, too. Give me a punched the cash register. mischief, obviously natural was back where it belonged "Daisy, I want an old fav you got Lover Come Back

"What she sends me plained to the barte send her one ba kill her! Watch th

There he waited—tense, all on edge—while the three others reconnoitered

n Line of Duty

Thomas Walsh

Garvey had one ambition in life; that was e a good cop. He made it the hard way

UST ATED BY RONALD McLEOD

WAS a few minutes past eleven, a cut and cold November night, en McGarvey first saw the squad Then was rolling slowly down the treet in service, but obviously not y ca so that McGarvey glanced eyed s two uniformed riders and t it as oon as it had passed. Mar- who oticed it too, made the only rk at ut it. Wasn't it nice, she that was in plain clothes now, orkin days instead of nights, with motio and a raise, and everything d bee wanting so much these past nonth?

ice?" McGarvey demanded, look- own her with his homely grin. ep on maybe—I'll say that. But

ut no the end of the line," she d for him, dark eyes demurely t. "I ustn't forget that. It's to be the Commissioner, isn't it? The Commissioner and Mrs. McGarvey. Or would it be Mr. and Mrs. Commissioner McGarvey?"

"You and me anyway," McGarvey told her, his fingers tightening a moment on her arm. They were in the vestibule of her apartment house then, and McGarvey kissed her once or twice, and maybe three times, before she got out her key. No, he told her there, he wouldn't go upstairs; her old man would be sitting around now, waiting to talk war again, and once they started they'd be good for hours.

So, at the foot of the stairs, he kissed her once more—good night, that was—and rubbed his jaw lightly against her soft cheek, rose-flushed by the cold night air. "Good night, Mr. Commissioner," she called, softly and happily, from the first landing, while he raised his fist and shook it at her threateningly from below. When she was gone, when he had heard her apartment door open and close, he grinned a moment, happily too, to himself, and after that, with his hatbrim pulled down low against the sharp November wind, he went out to the vestibule and down the short stoop to the street.

The squad car had rounded the avenue corner long since; he did not look for it particularly. In fact, two blocks down along the avenue, he almost failed to notice it. It was parked in close to the curb, hidden halfway up by a line of ash cans, with the motor cut off, the lights out and nobody at all inside.

McGarvey was no stickler for rules, and he knew how long that last hour on duty could be. You wanted a smoke, or a quick coffee, or perhaps just a chance to stretch your legs. But McGarvey and the men he worked with had always split those things up one at a time. The sensible way, not risking anything, never going so far from the car that a honk on the horn wouldn't bring them racing back. Something like this, no one at all around—

McGARVEY didn't like it. He went over to the car, peered in, and then looked around with his gray eyes puzzled and more than a little bit angry. Some doors off, breast high in the dim yellow darkness of a doorway, he made out the brassy glitter of what might have been a shield. Briskly then, on his long legs, he bounced across the pavement and up the stoop.

"McGarvey," he grunted, and named his precinct. "What's wrong here?"

There was enough light to make out the uniformed man's face—a young face, strained and savage about the eyes. He moved fast as he heard McGarvey's steps, swinging around, his mouth twisting, his club arm starting up jerkily from his side, then stopping, rigid, at McGarvey's unexcited words.

Six years on the force then, not too long a time to forget a lot of things that didn't wash out easily, McGarvey saw that movement but pretended that he hadn't. He knew what this rookie would be doing now—not taking care of a drunk or a holdup or a prowler, but trying to keep clear in his head all the things they'd taught him at training school, and fighting inside himself something he'd never suspected was there. And because he knew, McGarvey might not have noticed that spasmodic and panicky movement; he just peered ahead into the hall, and gave this rookie a couple of seconds to pull himself together before he spoke again.

What was wrong?

It wasn't too clear the way the young cop's hurried whisper told it. The kid stopping them, two minutes ago, on the avenue—the kid, Tully's kid, telling them about the third-floor apartment here, and the two guys that had rented it this morning.

VENEZUELA
Holds the Safety Key

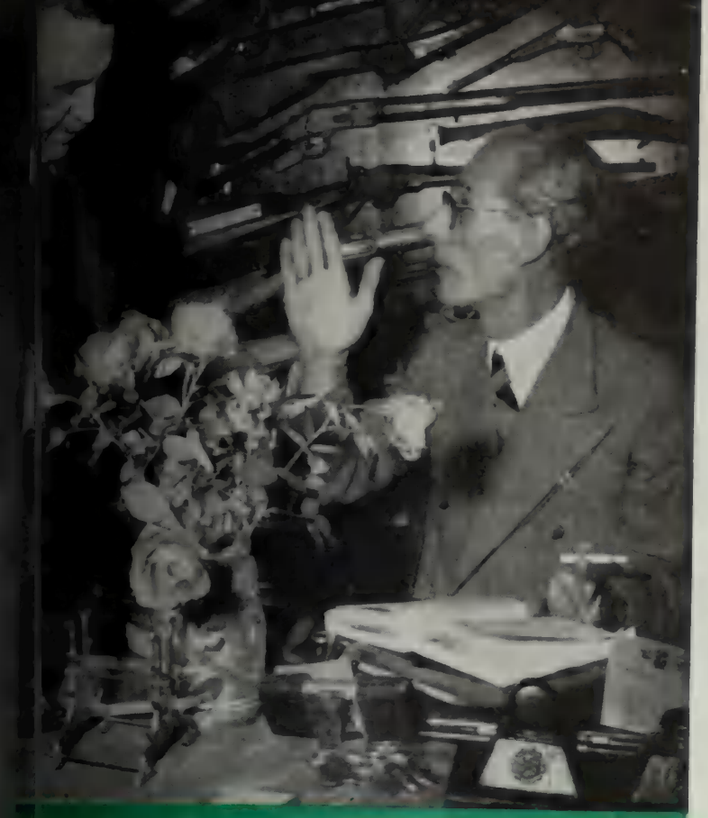
By W. B. Courtney

Add Venezuela's oil, rubber and metals to our own and you have got a world corner on the sinews of war. Here's how Hemisphere Defense hinges on our key good neighbor even now struggling back from dictatorship to democracy

THE *revoltosos* were up to their old tricks in Venezuela a few weeks ago.

You never heard of it. Nobody did, in fact, save the most attentive members of the diplomatic corps in Caracas, and the cliques involved.

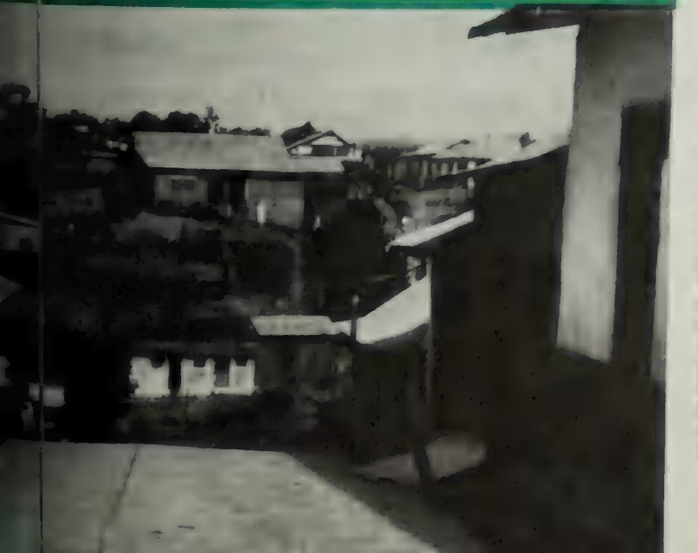
The little *revuelta* fizzled. Perhaps the fatal mistake of the disgruntled group was to forget that President Eleazar Lopez Contreras, for all his idealism and his soft democratic ways and plans, for all his scholarliness and his reedy, tubercular body, for all his spectacles and his gentle air of worldly detachment, had been the strong Number One boy of the Gomez reign. He was the minister of war to whom the dying "El Bagre," the sadistic ogre who devised modern absolutism and has never been exceeded in its practice, bequeathed his iron mantle. You couldn't hold the war portfolio under Gomez and be a nancy.



The revolution flopped—that is, with respect to the hopes and the ambitions of its bully boys. Yet in a hundred ways, never foreseen by them, it was a notable success. A hundred ways that it would be futile to attempt to summarize here, because they will leap out at you from every aspect when you consider Venezuela. But there is one highly important factor: It provided a final deathbed for the fifth-column witch-hunt that after a gay and reckless summer began to expire all over South America last autumn despite bellows and hypodermic corps from North America. In this single authentic revolution of the year in South America, the only armed organized attempt to overthrow by force an existing government, there was not found the faintest trace of European influence. It was pure local politics.

Suddenly it appeared expedient to Washington to discourage the Quixotes, amateur or professional, newspaper or navy, in their windmill fighting. A firm, useful and realistic view was coming into focus. Hemisphere politics and events, both north and south, traditionally and intrinsically held more danger than European interference. Friendly relations with all South and Central American republics are sought, but in cold fact some are important to our defense and some are not. Much depends upon size, distance and resources.

For example, Argentina and Uruguay actually have small military value to United States security. Far east around the hump of Brazil, deep in the South Atlantic, those nations with their chief seaports on the River Plate are closer in mileage, communications, economy, culture and other elements of military alliance to the Old World than to North America—closer, indeed, than to many of their "neighbor" countries of South America. You can go by ship from the United States to Japan faster than to



Oil is mainstay of Venezuelan economy. Here at Lagunellas, destroyed last year in a disastrous fire, oil is pumped from below the ocean bed

...senting the U. S. is Ambassador Frank Corrigan (left) ...ent Lopez Contreras. Contreras, a genuine democrat, ...he power of Venezuela's hated tyrant-dictator, Gomez

...er leaves Caripito (below) with 18,000 tons of oil. ...h defeat, best customers for Venezuelan oil (crude ... 1940: 190,000,000 bbls.) are U. S. and Great Britain

Buenos Aires or Montevideo. Those cities are nearer in passage time by sea to Liverpool than to Lima in Peru. In actual distance, they are closer to ports of north Europe than to the Canal Zone, New Orleans or any eastern United States harbor.

A new watchword is on everybody's lips. It is "Hemisphere Defense." It means different things to different men, apparently. Sometimes evidence dribbles through of academic military squabbles in Washington about the whole theory. One irreducible fact, however, lies at the core: The safety of the Panama Canal is paramount to security of the United States.

At Cali and Barranquilla in Colombia, at La Guaira and Barcelona in Venezuela, at half a dozen other strategic points in each country you will see huge newly built or extended airfields. You don't have to be a flier to realize these fields are in excess of the requirements of Pan American Airways, K.L.M. and other commercial users, or the small air forces of the republics that own them. The most amateurish military "grandstand quarterback" will perceive they are spacious enough for unlimited operations by United States bomber and pursuit squadrons. Moreover, it is unlikely you could fly across here nowadays without encountering planes of the United States military attachés or air missions: always they are on the job, two days here, a week there, flying the daylight through, mapping, prospecting, speculating, noting. For bases in Colombia and Venezuela are the real stuff, deadly earnest military needs and not political or propaganda moonshine.

Long ago Colombia forgave us for brass-faced disregard of her sovereignty when it came time to build the Panama Canal. Colombians quite as much as United States citizens today recognize the inevitability as well as the inclusive values of the canal. The story of 1904 is probably not familiar to one in a thousand in the United States now, but down here it is still fresh, bitter and widely known. Colombians remember that we have as little reason to be proud of the political background of the Canal as we have right to boast of its engineering. Nevertheless, they like us. They have been fortunate in their own peaceful governments, in United States ministers and our government and business representatives generally; also in having a more diversified national economy than their one-crop-cursed sister republics. More than once I was told by important Colombians of all walks: "You ought to let us be the 49th state."

Where There's Oil There's Profit

Venezuela presents a more complex picture.

In the pre-Hull days her recent ruckus would have fetched the United States Navy and the Marines with quick, old-fashioned North American arrogance. Because Venezuela, for what she is and for what she has, is "hot." With respect to our immediate purposes of building the outposts of United States home defenses, she is perhaps the most important and most interesting country in South America.

Venezuela is hot chiefly because she is oil. Modern war is oil—the means by which new economies and ideas and leaders seek to dethrone old ones. Expansion, thus profit, has always impelled the instigators of war, by whatever fancy name they elected to call it. Oil is the most profitable natural resource of this age. In 1935 the League of Nations imposed upon Italy for her aggressions in Ethiopia sanctions including peanut butter and every commodity you can think of except the vital one that might have stopped the campaign at its beginning—oil. In the Red Sea, tankers steamed toward Massaua as close as circus elephants. At Marshal Badoglio's headquarters in Asmara I saw that the most pampered and privileged civilians there were three salesmen for a British petrol concern. Germany, despite almost incredible production of oil by liquefaction from her great coal beds, could not fight without Rumanian and Soviet oil. Lloyd George publicly acclaimed oil's major share in England's 1918 victory. President Roosevelt has called oil "the pulse of war." It is, of course, also the pulse of modern industry. It is, further, the reason you can buy a car so cheaply and drive so much for so little.

The United States is the world's greatest producer of oil. But vying for second place with the Soviet Union is Venezuela. In the veins of her mysterious and gloomy earth, from the snowed rocks of the Andes, under her lakes, to the malarial dankness of the Orinoco jungles, throbs fabulously, and as yet scarcely tapped, the life force of mechanized war—gasoline for the war in the air, crude for the war underseas and for the racing iron mastodons of field and highway.

America's Backlog

With Venezuela's great reservoirs, plus the considerable ones of Mexico and Colombia and the mites of Peru, Ecuador, Argentina, Trinidad and Canada, added to our own vast fields—you'd have practically the entire earth's supply.

That is what military strategists know to be the true measure of Western Hemisphere strength against the rest of the world.

Statistics in gallons of petrol thus become more important, certainly, than isolation behind the Atlantic and the Pacific oceans. It is this basic knowledge, in the midst of preparedness confusion and recriminations, that keeps American officers from graying prematurely.

Shut completely away from New World oil supplies, no league of European and Oriental powers could with Russian, East Indies, Iranian and Rumanian production alone sustain operations vast enough to break our industrial and moral potentialities for war. Nor could any possible combination of enemies maintain a fuel supply for air and sea fleets on the scale possible for the United States singlehanded. Texas alone, on present development figures, can produce in fifteen days as much as the famous Iran fields produce in one year; in a month, as much as the whole Netherlands East Indies, bone of so many possible international dogfights, turn out annually.

Venezuela is the first reserve of our "gasoline bank" for modern war. Moreover, in her boundless eastern savannas, Venezuela possesses in climate and soil a natural area probably second only to that of Brazil for the cultivation of another critical United States war need—rubber. Scientists from Washington are prying the ground right now. Venezuela truly holds incalculable significance for all the Americas. And for them, the suit of her by reason and heart offers a real test of sincerity, because her own problems have puzzling and contradictory sides. Consider:

1. Her presidente, until lately political heir and chief of the hand-picked, ruthlessly drilled army of the cruelest despot of modern times, is a genuine democrat. He believes, preaches and practices that the humblest peasants who tread above the country's land are quite as important to national welfare as the most precious minerals and fluids that lie below it.

2. Against a world-wide political and

short riveway through somber pine ds le s to a severely plain brick ding, o chaste in design that it ns as orbidding as the cold ocean f. It only decoration is a granite el ove he front door, engraved with name of the laboratory. And the e sm ls, smells with the musty ch of 0,000 mice. The Roscoe B. kson L boratory is one of the great ise m ropolises of the world. This dern Mousetown is devoted strictly usine and it is beginning to play a l role human welfare.

The int ior, painted in businesslike b colo is divided into large rooms, l the oms into racks lined with usand of wire-topped wooden boxes ut the ize of shoe boxes. In each box is a family of mice, a pile of shavings for a nest, a water bottle and a rack for food.

No human city has a tenth as much sanitation, policing, social security and accurate vital statistics as Mousetown. Each box is labeled with the history and pedigree of every inhabitant. The mice themselves are labeled with notches and punches in the ears, and the most personal details of their private lives are spied upon and painstakingly recorded from birth until the elaborate autopsy. Once, when a litter of infants appeared with the right ears missing, the laboratory was in an uproar of investigation. Ultimately it was discovered that one family of mice seemed to have a faint hereditary urge to bite off the right ears —and only the right ears—of their young, a quaint custom which would have been strictly the mice's own business almost anywhere else in the world.

Mousetown is Exclusive

These are no ordinary cupboard mice. They are the result of years of careful scientific labor. Some are brown, some black, some white and some piebald, but in whole sections of the laboratory the mice are precisely alike. Thousands are exactly the same shade of brown, thousands more are pure albinos. Every mouse of one strain, the "shakers," is afflicted with hereditary palsy; in another, all waltz frantically in circles if disturbed. Some are completely bald throughout life. But, though the groups are very different, any mouse of one of these groups of thousands could be exchanged for any other, and not by the most exhaustive tests could science discover the substitution. The browns have been inbred more than a hundred generations, the albinos more than seventy generations and in all this time only full brother and sister have been mated, until all hereditary variations have been dropped by the wayside.

The mice of each strain have become so much alike that they react identically to their environment; they live alike and even die alike. Some are highly susceptible to specific diseases like mouse typhoid, while other strains are relatively immune. In one strain, 85 per cent of the females die of cancer of the breast. Other strains almost never have breast cancer, but fixed percentages will die of cancer of the liver, or of the skin, or of the lymph glands.

Mousetown is exclusive. Strange mice from the world outside might bring in parasites and disease which could wipe out in a few hours years of research. Or even worse, they might bring in heredity, which would ruin the purity of the carefully standardized population.

This standardization was one of the original objectives of the laboratory when it was created ten years ago. Lack of uniform material had been a weak point of previous cancer research. Scientific conclusions are always questionable unless based on rigidly controlled experiments, and one of the fundamentals of control is uniformity of material.

Mice were selected for experimentation partly because they live fast. One month of mouse life equals two years of human life. A three-year-old mouse has lived more than his threescore years and ten, and is ripe to join a mousey Townsend club as he dodders down the last few weeks of existence. But otherwise mice differ little, physiologically, from men, which is another reason the laboratory chose them from all the animal world. There is mouse typhoid, mouse pneumonia and, most important of all, mouse cancer, which even under the microscope can barely be told from human cancer.

Scattered experiments in mouse inbreeding had been conducted previously, so the Jackson Laboratory at the start got the most uniform groups it could find. They included two strains differing widely in breast cancer incidence. In one strain, 85 per cent of the females died of the disease, in the other, virtually none. As a beginning, the two strains were crossed, females of the cancerous strain with the males of the noncancerous strain, and vice versa.

If the breast cancer were purely hereditary, according to the simplest Mendelian pattern, the susceptibility or resistance should have been passed on to the children irrespective of which way the cross was made. But when the mice grew old enough to have cancer, a matter of from 10 to 16 months, it became obvious that something was cockeyed. Female mice from cancerous mothers were doomed in the same proportion as their mothers; but female mice fathered by males from the cancerous strain were safe. The mother, then, transmitted the disease; father was unimportant. Heredity was obviously not the whole story.

Breast Cancer Not Purely Hereditary

Did the mother infect her young while they were still in the womb? Dr. Clarence Cook Little, director of the laboratory, and Miss Elizabeth Fekete finally hit upon an ingenious new technique to find out. They learned by experiment how long fertilized eggs stay in the fallopian tubes before they go into the uterus, where they become implanted and grow. Then they operated on mated females of one strain shortly after fertilization, and, working with extraordinary delicacy, washed the tiny eggs out of the fallopian tubes with a saline solution. Under a microscope the eggs showed up as silvery disks. They were drawn into a tiny glass pipette—and transplanted to the uterus of prospective mothers of the other strain used in making the crosses. The high cancers and the low cancers were different colors, so the transplanted mouse babies could be distinguished from their foster brothers and sisters when the mixed litters came to birth.

After a year and a half of painstakingly transplanting microscopic eggs from mouse to mouse, Little and Fekete found the mice followed the cancer incidence not of the natural mothers, but of foster mothers. Susceptibility to breast cancer was not pure heredity, as had been firmly believed for so long. The secret lay somewhere in the very early environment of the animal

ILLUSTRATED BY MARIO COOPER

The Story Thus Far:

TO ENJOY a little vacation, Hercule Poirot, brilliant Belgian criminal investigator, goes to the Jolly Roger, an unpretentious old hotel on an island off the southern coast of England. A short time after he arrives, one of the guests—Arlena Marshall, wife of Captain Kenneth Marshall—is found dead, strangled, on the beach at near-by Pixy Cove.

Knowing that the woman had been having an "affair" with another guest—Christine Redfern's handsome husband, Patrick—Poirot, Inspector Colgate and Chief Constable Weston suspect Marshall. But the captain has an alibi—at the time of the murder, he had been in his room, writing letters.

Among the Jolly Roger's guests, in addition to those already mentioned, are: Linda Marshall, Kenneth's daughter by his first wife; Miss Emily Brewster, an old maid; the Reverend Stephen Lane, a religious fanatic; an American couple—Mr. and Mrs. Odell Gardener; Major Barry, a veteran of the Indian service; Rosamund Darnley, who had once been in love with Marshall—and probably still is; and Horace Blatt, a seemingly harmless man of considerable means.

That a man is guilty seems fairly obvious. But what man? Interrogated by the three investigators, all of the men at the Jolly Roger insist that they know nothing of the crime; and their alibis are fairly plausible. Then a woman—Christine Redfern—contributes an important item. Christine asserts that one dark night, on the beach, she had overheard someone (a man) trying to blackmail Arlena Marshall. . . .

A short distance from the scene of the crime, there is a cavern: Pixy's Cave. Accompanied by Lane, Weston and Poirot search it. They find a box, containing what appears to be salt but what is, in reality, *heroin!*

Wondering if the killing has a dope-smuggling angle of some sort, the investigators give much thought to a fragment of a pipe—a smoker's pipe—found not far from Arlena's body. And they learn that Captain Marshall has "mislaid" his pipe!

On the morning of the crime, Christine Redfern had been with Linda for a short time; and Linda had accidentally broken open a package she had been carrying. The package—so Christine asserts—*had contained candles.* Thinking that over, Poirot gives evidence of being much excited.

IX

POIROT asked, "Did Linda say why she had bought candles?"

Christine reflected. "No, I don't think she did. I suppose it was to read by at night—perhaps the electric light wasn't good."

"On the contrary, Madame, there was a bedside electric lamp in perfect order."

"Then," Christine said, "I don't know what she wanted them for."

"What was her manner—when the string broke and the candles fell out?"

"She was—upset—embarrassed."

Poirot nodded his head. "Did you notice a calendar in her room?"

"A calendar? What kind of a calendar?"

Poirot said, "Possibly a green calendar—with tear-off leaves."

Christine screwed up her eyes in an effort of memory. "A green calendar—rather a bright green. Yes, I have seen a calendar like that—but I can't remember where. It may have been in Linda's room, but I can't be sure."

"But you have seen such a thing?"

"Yes."

Again Poirot nodded.

Rosamund turned her head and stared at him. She said in a quiet, level voice, "Are you asking me if I killed Arlena?"

Christine said rather sha

OTOGRAPHED FOR COLLIER'S
VALENTINO SARRA

Guard and comedian, Babe Pressley practically palms a basketball in his huge hands

Any town that can produce five alleged basketball players and a modest guarantee is eligible for a personal appearance by the Harlem Globe Trotters, the world's most entertaining champions. And they probably will throw in a few circus acts just for fun

HER was no crap game or trying o m h the hole card in stud poker n th basketball court this night. is n as screwy as it reads; the em obe Trotters of Chicago al- sho craps and play cards during sket ll game.

ernie Price did not drop-kick the the gth of the floor through the et ju for a gag. Babe Pressley no tie to amuse the customers by ning e ball on his finger for a full ute, d Ted Strong wasn't catch- ified asses nonchalantly with one like nd. It was neither the time the ace for Inman Jackson's hi- us ad which usually winds up with son c ering his opponent with con- n an mortification by placing the on t of the fellow's dizzy head, walk g away casually.

is n t the Harlem Globe Trot- were aying for the world's profes- al bas tball championship and the ation as darker than the expres- s on e faces of the big, black s. T y were trailing the Chicago ns, 29 1, with only five minutes to The uins were loaded with big, h, fas nen fresh out of college, fine etes s h as Bob MacLeod of Dart- th; E lie Oram of Southern Cali- ia; W s Kautz and Mike Novak, 5-foot 0-inch skyscraper from Loy- Elme Johnson of Northwestern; ie De illips of DePaul. It looked as though the Globe Trotters surely were cooked.

Two minutes later 6,500 fans were tearing down Chicago's Madison Street Armory, this night of March 20, 1940. The Globe Trotters tore off five successive field goals to lead, 31-29, and that's how the ball game ended, with the Globe Trotters trucking off the court, the champions of the world.

Mr. Abe Saperstein, who merely owns the team, begs to dissent.

"World champions, my eye," Mr. Saperstein says, thereby establishing a new free-style record for a promoter punching holes in his meal ticket. "The world isn't one tournament held in Chicago. We're crossroads champions, that's what. We won that title by playing in every whistle-stop in the country and showing the people how this basketball game should really be played."

The Globe Trotters are the most widely traveled team in America and they are known more intimately in the deep bush than any sports organization in circulation. Sure, they've heard about the Yankees and the Cubs and the Green Bay Packers in the provinces and on the prairies, but the fans off the beaten track have seen the Globe Trotters. It makes a big difference.

Last winter Saperstein's outfit traveled 35,000 miles by bus from western Pennsylvania to Vancouver and drew 350,000 spectators. The Globe Trotters play in high-school gymnasiums and WPA auditoriums with seating capacities only one fiftieth as large as outdoor arenas. A few years ago the Globe Trotters played at Esko, Minnesota, a pin point on the map with a grand total of sixty inhabitants—and 1,000 people paid to see their black magic. Several weeks later they appeared at Inverness, Montana, population 137, and had 1,000 customers in the house.

If winning games is the big idea, the Globe Trotters are the most successful basketball team of all time. In thirteen seasons the Globe Trotters have won 1,868 games and lost 131 for the amazing batting average of .934. Still more astonishing, the team has no home court; all games are played on the road.

Even the hallowed Original Celtics, the greatest team basketball has ever known, never began to approach the remarkable record of the barnstorming Globe Trotters. The Celtics averaged 130 games a season and won about 120. Last year the Globe Trotters, playing the leading teams in the country, engaged in 161 contests and lost only three.

The Trotters even lose in the grand manner. On November 29 in Chicago 22,000 customers, the largest crowd ever to see a basketball game, were screaming hysterically five minutes after the Trotters had lost, 44-42, in an overtime period, to a team of college all stars.

Any town that can produce five alleged basketball players and a modest guarantee can get the Globe Trotters for a personal appearance. The lack of a regulation basketball court is no deterrent. They've played in a drained swimming pool at Harlem, Montana; and at

China Sky

By Pearl S. Buck

ILLUSTRATED BY MARTHA SAWYERS

The Story Thus Far:

IDOLIZING her chief—Dr. Gray Thomison, who is at the head of a hospital in the Chinese city of Chen-li—young Dr. Sara Durand is lonely and unhappy when he goes to America, in the hope of raising funds for the hospital.

The war is raging. Again and again, Japanese bombers attack the hospital. But Sara—left in charge of the hospital by Gray, and buoyed up by the knowledge that he will soon be back by her side—carries on courageously.

Then, one dreadful day when the bombers have been unusually active, she receives a cablegram. She opens it, reads it. It is from Dr. Gray Thomison. It informs her that Dr. Thomison is on his way to China with "Louise" —*his bride!*

Stunned, Sara turns from the cablegram to greet a caller—Chen-ta, who, leading a band of mountain guerrillas, is known as "the Eagle." Chen-ta orders her to hurry to the hospital. He tells her he wants her to attend to a prisoner—a Japanese whom he had knifed in the stomach and captured.

Accompanied by the Eagle, Sara goes to the hospital. As she prepares for the operation, the Eagle tells her that the Japanese *must live* —he insists that she make every possible effort to save the man's life. . . . Sara operates; and, thanks to Dr. Chung, a Chinese assistant, who donates some of his own blood, the victim does not die. . . . Why, Sara wonders, is this mountain fighter—this wild guerrilla—so interested in the recovery of his enemy? Suspicious, she questions the Eagle. And she finally decides that he has no intention of killing the Japanese —at any rate, he promises not to murder the fellow. . . .

Dr. Thomison and his wife arrive. He introduces the two women—Louise and Sara. Sara strives hard to conceal her emotions. She says something about the operation.

Gray is astonished. "*A Japanese?*" he exclaims, incredulously. But Sara is in no mood for discussing the matter further. Turning abruptly, she flees up the stairs to her room. There she is safe. There no one can follow her. There she can be alone—with her bitter, painful thoughts.

II

GRAY, lifting his American bride over the threshold of his Chinese house, felt a secret, tender alarm. Louise was so slight, so exquisite. Could she endure his life? He kissed her gently before he let her down. "Be happy in my home, my dear."

He did not notice her silence. On the veranda Siao Fah gaped at him. Gray laughed at his shocked gaze.

"It is our custom," he told him, "for a man to lift his new wife over his doorstep: brings luck to the house." The kiss he forebore to explain. Siao Fah could never comprehend that.

Then he shut the door and turned to Louise. She was sitting in his easy chair, smoking a cigarette, her hat still on her head.

"What were they saying at the gate—all those people?" she asked.

He threw himself on his knees beside her and took her hands.

"They were wishing us good luck."

"What sort of luck?"

"Oh—all that Chinese consider luck —boy babies, peace, harmony—Siao Fah said he hoped my wife would be industrious and saving." Gray laughed and Louise smiled the smallest of her pretty smiles. He leaped to his feet and pulled her up with him. "I can't believe I'm here, where I'd rather be than anywhere else in the world!"

"Gray—why?"

He took off her hat so that he could see her face against his breast.

"Why, darling? I can't tell you. Maybe because it is that everything a doctor does here counts. At home if somebody's sick he can go from one doctor to another. Here there's only me—and Sara, of course, for the women. Everything we do counts for hundreds of miles around. Every nurse we train and every Chinese doctor we teach is another oasis in a desert of suffering." His arms dropped. "God, how they can take suffering, these Chinese! I tell you, Louise, it just makes nothing of any little personal problems to see how these people have taken this bombing for two years. Think of it—two years of not knowing whether the next day you'd be alive or not, never knowing when you go to bed at night whether you can sleep an hour, two hours—die in your bed, maybe, and never wake at all—and they haven't any more idea of surrender today than they ever had—"

She stood pulling her gloves through her hands and watching him with her big amber eyes. They were beautiful eyes, clear under her black brows and lashes, and she knew it.

"Gray!" His name spoken in that soft, sharp fashion cut across his thoughts like a door slammed.

"What, sweetheart?"

WHENEVER she lifted her eyes like that to look at him because he was so much taller than she, his heart crumpled and quivered. He knew in his core that he was sentimental as he would have loathed sentimentality in anyone else. She made him want to cuddle her and talk baby talk and behave in a way that made even himself aghast. But she was so small, so dainty, such a little butterfly of a thing! He tried often to put into words what she was, and could never catch the right likeness to bird or flower that he felt in her. Now he put his arms around her gently, lest he hurt her. So he was not prepared for what she said.

"Why didn't you tell me Sara was beautiful?"

For a moment he did not know how to answer her. His thoughts had been so remote from Sara, so joyously full of himself and Louise, that instinctively he was first shocked and then he became angry.

"Louise, damn it—"

"Don't swear, please, Gray. I only asked a question."

"But, Louise, such a fool question!"

"I don't think so. This Sara of yours is quite—good-looking."

"Don't call her *my* Sara!"

"Well?"

She had pulled away and stood there, waiting. He felt as helpless as a bull with a ring in its nose and as enraged.

"Louise, I won't be asked such questions. Good God, I thought it was only in plays that women said such things!"

"Well, Gray?"

The ring jerked a little in his nose.

"Well, nothing! Why didn't I tell you Sara was pretty? Because I didn't think of it. I'm in love with you, my wife. I don't see that anybody else is pretty. I don't know it. I don't see them—don't care to see them."

"You must have seen Sara a good deal when you were alone here together."

"We never were alone! Louise, can't you understand that when two doctors are working in a hospital—" He saw her underlip begin to tremble and cursed himself. "Sweetheart, you're tired." He put his arm about her. "Come on and look at the house a minute and then I'm going to put you to bed. Siao Fah will get some dinner. You haven't even spoken to Siao Fah yet."

He guided her gently from room to room. "Good old Sara—she's done the best she could for us. But there will be things you'll see to do. This is going to be your home, honey—e be the way you want it."

She let herself be led and hard against all she hid it. In the kitchen Si very clean in a new blue a made up his mind instant new mistress and then de nothing would separate hi Gray whom he loved, wh wore and whose handkerc and upon whose food he squeeze, whom he defen others who would have pre and for whom he woul cheerfully and willingly, if done Gray any good to h pock-marked Chinese coo him. He made up his m Gray's wife. So far as he w he and Gray were keeping together in this nice new

A Little Sweetheart

By Benjamin Appel

ILLUSTRATED BY EARL OLIVER HURST

The private life of a young man who to the world about it when he fell in lo

THE elevated screeched to a stop like a monster toy, the doors sliding open, the home-from-work crowds rushing out on the platform like an army of dolls set into motion.

He lingered behind, one of those neat young men in dark suits of whom every office building seems to have a quota. He yawned, leaning against the platform railing. Rush, rush, rush, he thought: soon the El would be junked and everybody'd be rushing home from the subway in the same old screwy panic. They all acted as if they had a little sweetheart at home.

He glanced at the smiling girl in one of the ads on the billboard. Boy, what a girl! He took his pencil from his pocket and inscribed his initials, R. V., on the toothpaste ad.

"What'd I do that for?" he exclaimed in wonder, shoving the pencil back out of sight. He wheeled around to see if anybody had spotted him, but there was nobody, the great big nobody that fills the platforms just after a train has left.

Again, he stared at the toothpaste girl. Somebody else had penciled a beard on her chin. Golly, he thought despondently, people'll think I go around putting whiskers on signs!

He trudged down the flight of stairs to the street as the roar of an incoming train, overhead, crashed louder and louder—a huge crashing shout, a huge lonely shout without meaning. And why was he moping on the corner and why was he coming home to eat at Nick's and why and why and why . . . ?

Nick's was full of customers who averaged one large suitcaseful of clothes between them: blondies from the mining towns now working as bus girls in cafeterias; Southerners soda-jerking on the Big Stem; young kids from Brooklyn who wanted to live their own lives; and old guys from everywhere, the people of the furnished rooms.

He sat down at the counter, glancing from a girl biting hunks out of a hamburger to the itemized supper specials on the wall.

Nick, himself, came up the counter to wait on him. "Roast beef special very good."

"Ever write your initials around on things, Nick?" R. V. asked.

Nick shrugged his shoulders as if to say, "Just the same, food comes first."

THE next morning after the breakfast special, R. V. sprinted up the flight of stairs to the downtown elevated. As he reached the turnstile, the train pulled out. He shoved his hands into his pockets and walked down the platform, eying the beauties on the billboards as if they were a row of chorus girls. He paused in front of the smiling girl on the last billboard—a hosiery What legs! She was a right, prettier than the

Casually, he wrote hi her shoulder: R. V.

Not so casually, he pu back into his pocket, sta reading newspapers, the gum. He wiped his flus long as he stepped on h body cared what he did.

mounds of French-fried potatoes were being transferred to the blue plates, and there was a big rush on the meatball special.

R. V. strolled back to the stoop of his house. Another roomer, a pale, elderly man with a cramped look as if from years of living in closet-sized rooms, was sitting on the top brownstone step.

"Ever think how nothing lasts in this town?" he said.

R. V. sat down. "No, I haven't."

"Take them Els down the corner. They been here a long time but already they tore down the Slut' Avenue El and the Nunt's slated for the wreckers soon."

"They've been saying it's coming down a long time."

"It's a landmark like the horsecars. But they're gone, ain't they?" the elderly roomer demanded.

R. V.'s eyes fastened on a girl walking past the steps. Supposing . . . Suppose she was X! That'd be a coincidence. But why shouldn't lucky breaks happen sometimes, just like that, by accident?

"Landmarks," mumbled the elderly roomer.

"Yeah," he said, his tone flat. "Ever notice the scribbling on the ads up the El?"

"I seen 'em. Sometimes I read 'em to kill the time."

"Who do you think does it mostly? Fellows or girls?"

"Who do I think does it?" the elderly roomer cried out in fury. "Dopes does it!"

"HELLO Miss X. You Got Me Wrong. Mr. R. V."

As she read R. V.'s latest, her neck stiffened as it did down the restaurant when some customer got a little too fresh. So it's Mister. Mr. R. V.; R for Robert, R for Richard, she thought; and is that all he does with his spare time!

She laughed. Who'd he think she was with his Miss X crack? An old lady or a guy in pants? But he was awful polite. Should she answer him? Maybe he was a real goof. She looked around to see if any smarty was ready with the big horselaugh. Slowly, she inserted several words in his sentence.

In came the El under the blue sky, shot out of the city like a bullet out of a gun. Bullets roaring downtown, loaded with lives. Roaring uptown.

Six hours later, he stood loafing under the marquee of the local movie, the flare of the neons on his face. Near him, other men in no hurry to go up to their rooms were also killing time on the curb. In the gutter, two young fellows were sitting astride their parked motorcycles.

"What a date I had last night!" the first gasoline cowboy confided to his pal.

"Who was she?"

"Never mind!"

He listened to the talk, wondering whether she had bothered answering him? And how did he know it was a girl? Why not go and see? Suppose he wasted a nickel? At least he'd be doing something and that was what counted. Doing something. That was more sense than moping around.

He walked up the El stairs, tomorrow's nickel between his thumb and forefinger. He dropped the nickel into the turnstile, striding up the empty platform.

He stood before the hosiery girl and the first thing he noticed was a huge handwriting three inches high: "Aw Nuts This Ain't The Park."

Oh, what a sap he was! he thought, sighing. And then he blinked. Why, look! Somebody had changed his answer to: "Hello Miss X (20 y.) You Got Me Wrong Mr. R. V. (?)" And the somebody was a girl!

Oh, he might have known that "Aw Nuts This Ain't The Park" was the work of some crackpot wise guy. The smile on his face broadened. She must be lonely to have written to him. Only lonely people wrote on billboards. "She's twenty!" he said aloud in his joy as if she had climbed up from the neon-bright avenue of cafeterias and taverns and was standing at his elbow. In his excitement he wasn't a clerk in a downtown office building. He was somebody else, somebody like the hero of a movie, who, just like that, by accident, runs into a broken-down roadster on some lonely road, a roadster and a beautiful girl in the roadster.

Oh, he'd stay on the platform all night until she came, tomorrow!

But?

Suppose he was arrested for sleeping in the station or something?

"She's twenty," he murmured to himself as if repeating a line of poetry.

He took out his pencil, filled in his age in the space she had left for him, crossing out the question mark, and adding the phone number of the pay station behind the stairs in his house.

Scowling, he began to blacken out the wisecrack.

SHE read swiftly. It gave her a funny feeling to see his handwriting and her handwriting all mixed up together like initials carved inside a heart on a tree. "Hello Miss X (20 y.) Mr. R. V. (22 y.) Please Phone—" But phone what? She tried to decipher the number under the heavy penciling, but it was all gone. Who had spoiled the phone number?

Who? The same spite work—the goof who stuck whiskers on signs. Angrily, she read the goof's warning scrawled across the top of the billboard in big letters: "Aw Nuts You Leave What I Write I Leave What You Write. It's a Free Country."

She frowned. That awful goof, messing up signs with his elephant handwriting. She glanced up the platform to a man in a brown hat who was reading a paper. Maybe he was a detective sent by the hosiery company. No, he didn't look like a detective.

She took out her pencil stub.

"AW NUTS You Leave What I Write I Leave What You Write. It's a Free Country."

"Please Phone—"

"Try Again. Miss X."

It was all part of the same crazy letter, he thought brokenheartedly.

He had just come uptown from work. He had crossed the avenue and rushed up the downtown flight of El stairs. And look what he had found!

He gaped stupidly at the smiling hosiery girl with her penciled whiskers, his eyes blind in his head, his shoulders slumping as if some tremendous force had slugged him, as if the city had hurled out of the horizon like a walloping tornado weighted with all its Els and subways, with a hundred thousand houses, the city of a million doors whose keys belonged to strangers, the city of seven million voices, but none of the talk spoken to him.

He stirred himself, sighing, and put down his phone number for the second time. He thought for a minute and then wrote: "Please, everybody, don't mark this out. Important."

He shuffled downstairs to Nick's. "Coffee," he said when Nick came to wait on him.

"Nothing else?"

"No."

Nick placed a cup of coffee before him. "What kinda supper's coffee? You sick?"

"No. I got a headache."

"Whyncha go for a bus ride? Or an El ride. Last chance t'night for the El. Lotta guys're going so they can tell their kids some time."

"Tell what to their kids?"

"El's shutting down t'night. Midnight. It's in all the papers," Nick said, turning to a new customer.

He pushed his coffee away and stared at the white-tiled walls. White tiles like

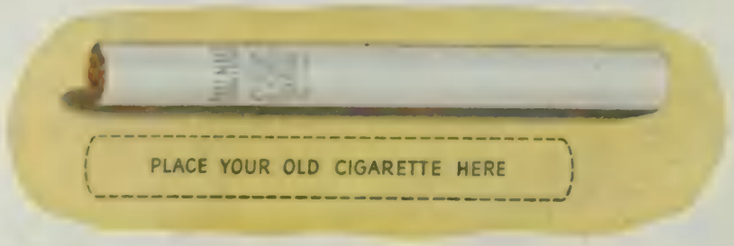
"It's more than a change—it's an important forward step!"

• ALL OVER AMERICA smokers are realizing that Pall Mall is an important forward step.

It is a cigarette deliberately designed for better smoking.

It is longer than the conventional cigarette.

And this additional length is important. For it travels the smoke further—so the smoke reaches you cooler. It filters the smoke through more tobacco — so the smoke is definitely milder.



Important, too, is BULKING.

For this careful, time-taking process mellows tobaccos as nothing else can.

In BULKING, the traditionally fine Pall Mall tobaccos acquire a new character. The delicate flavors blend together. All harshness is gradually softened. Pall Mall becomes a noticeably smoother cigarette.

The smoke of these fine tobaccos — enriched by BULKING, traveled and filtered through Pall Mall's greater length — gives you a combination of advantages no other cigarette can offer.

Prove it! Yourself, try Pall Mall critically.

going to see a real hospital, my girl, a hospital that New York wouldn't despise."

"Gray, China and Japan are very different, aren't they?"

He stared at her. "I'll say—about as different as—as why, they're the most different two peoples in the world. They think differently and live differently, they believe in different ways of life. The Chinese are all for the individual and the Japanese for the state—it's essential democracy and Fascism—in a way."

"Sometimes I wonder if people ought to be so free. I mean, when they're ignorant and dirty."

SHE thought distastefully of the streets she had seen in the disorder of Shanghai and of the medievalism of Chen-li. It took only a few minutes to see what Chen-li was, though Gray had told her that it was medieval. "You'll have to have your bath carried in wooden buckets and poured into a big porcelain jar, but you can get just as clean as in any other tub," he had said. But need people live in medievalism in a modern world? Maybe it was silly to live in Chen-li. Gray laughed.

"Don't you go giving up the idea of liberty and equality, my girl," he said. "That's poor business for a newly married woman."

She let him laugh, puzzled at her own mood. Why did she feel peevish and crisscross and like contradicting everything?

Suddenly she knew. Sara's clear voice cried out from the living room:

"I've brought your chrysanthemums, everybody!"

"Come here!" Gray shouted, leaping to his feet. A second, and Sara stood in the door. She had taken off her uniform and put on a wine-red silk. She had brushed her hair and her cheeks were flushed but her blue eyes were steady. In her arms she held an enormous bouquet of Chinese chrysanthemums, huge, nodding balls of red and yellow and brown and orange.

And Louise, looking at her, felt her mood clarified and hardened and made as cold and changeless as a crystal shape.

"I'm going to hate everything," she thought, and made up her mind to it.

"THIS is simply nonsense," Louise thought, in the shelter.

In the middle of the night she and Gray had been waked by hoarse, screeching sirens. There had been no time to ask anything. Gray hustled her into her clothes, into her fur coat.

"The shelter's dripping damp," he said. "You may be there for hours."

She did not at that moment notice his "you." It did not occur to her that he would leave her. They hurried across the dying autumn grass into the hospital, and by then the siren was screaming again.

"God, they're in a hurry," Gray muttered. "Get along, dear. I ought to help at the hospital."

"I thought you said you weren't going to feel—responsible—until tomorrow—" she panted. She had on her warm bedroom slippers and she was not used to walking without heels.

"I know, but I haven't the gall to let Sara do it without me. She's had months of it, while I've been sleeping every night."

She said no more. Was she going to have to keep hearing about Sara?

Down the ramps improvised over the old wooden stairs the stretchers were coming, and men and women hobbling and little children carried in nurses' arms.

"No use your going up with me," Gray said hastily. "Just keep with the crowd."

"Gray!" she cried, "you aren't going to leave me?" She had not dreamed that he would leave her. And he, he had not dreamed that she would think him free to go with her. The sight of her face swept away his impatience. Of course she would be afraid in her first air raid. But there was no time.

"Gray—I won't go alone."

"Honey, you'll be with everybody—all these people."

"Gray, you must come with me!"

"Louise, I can't—I'm a *doctor!*"

The Chinese were looking at her strangely as they passed, the white woman clinging to the man. Gray was desperate.

"Listen, Louise, the last warning will sound at any instant. Then the planes will be here. You've got to be in shelter, do you hear? I'd never forgive myself if—Louise, listen to me!"

She dropped his arm. "Very well, Gray." Her voice went dead. She turned in cold obedience and joined the crowd of sick Chinese. She loathed them, she told herself. If she had known they were going to be like this she would never have let Gray come back. There were wonderful opportunities for him at home—that invitation to come to Johns Hopkins for Oriental diseases. Baltimore was an aristocratic old Southern town. Besides, sick people were the same anywhere, weren't they?

The third siren sounded and everybody ran—tried to run. She herself made haste and was among the first few to enter the winding opening in the hillside behind the hospital. She drew back against the wall, to be away from the people crowding in.

Now so unexpectedly that she jumped, she heard her name called in English:

"Mrs. Thomison?"

She looked into the han[d] a young Chinese.

"Yes?"

The man bowed. "I beg[ ] I would like to introduc[e] Chung. I am assisting Dr. [ ] surgeon. I must apologiz[e] not able to meet you. I co[uld] my patient at the time." [ ] to a stretcher where a ma[n] eyes closed.

"I am glad to hear so [ ] English," Louise said. "Th[is] air raid and I'm a little ne[r]ally, especially as my hus[band] must stay in the hospital."

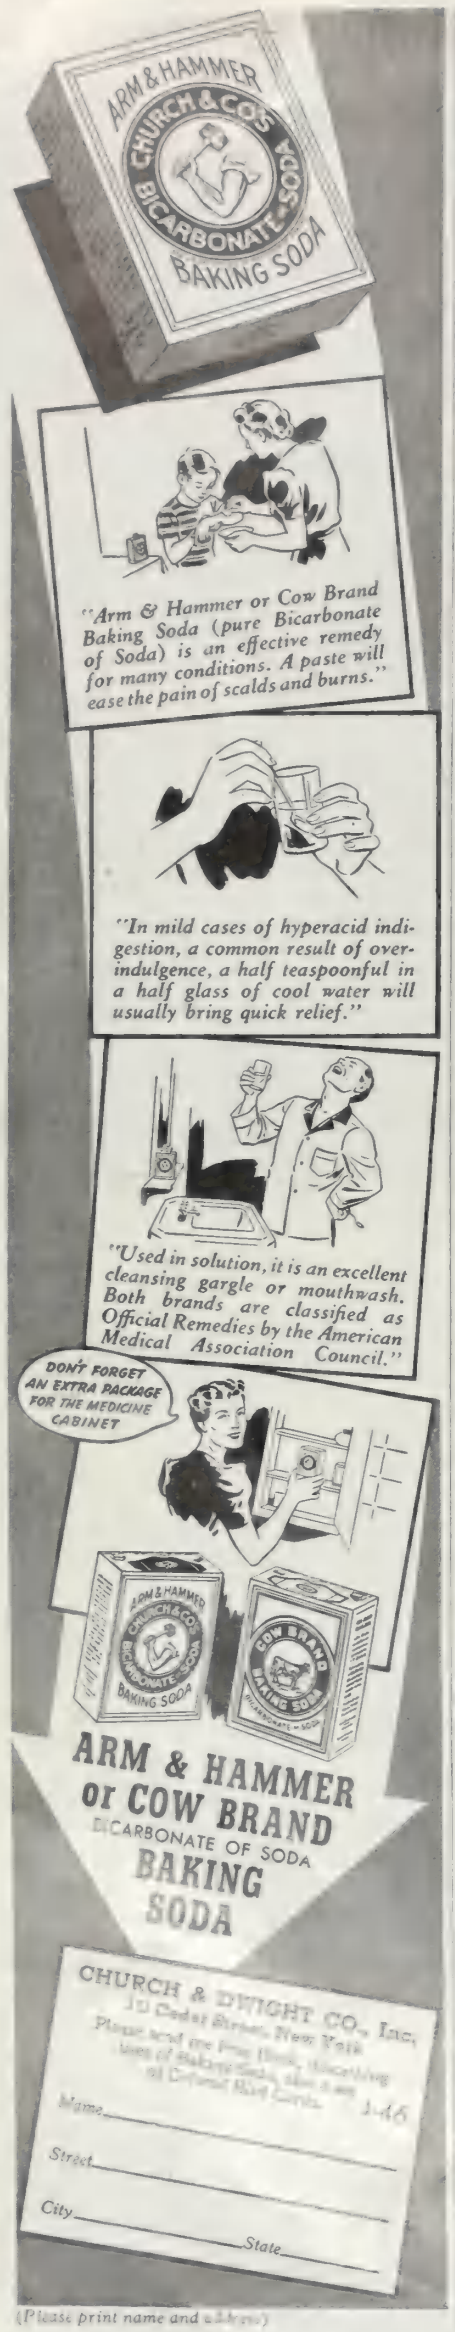
Dr. Chung's smooth f[ace] change. "I am sorry he felt [ ] I met him, as a matter of [ ] fered to stay for him on [my] But both Dr. Thomison an[d] have a strong sense of du[ty] mirable."

Then Sara, she though[t] too!

THE man on the stretche[r] eyes. "Give me some w[ater]" distinctly and in English.

Dr. Chung opened a [ ] poured it out. The man [ ] closed his eyes again.

"He speaks English, too," marked.



"He is a Japanese," Dr. [ ] plied. "A very interesting c[ase] tive of a guerrilla chieftai[n] this region. The chieftain [ ] in. This Japanese speaks [ ] naturally—but his English [ ] for a Japanese."

The siren shrieked once [ ] Dr. Chung's face changed. [He] cried, "Hang your head, [ ] mouth, cover your ears!" [I] self what he commanded h[im] everybody cowered. Only [ ] nese did nothing. He lay w[ith] closed.

They waited while the [ ] planes grew huge, filling t[he] close

She felt the light on her own face a moment, and saw the gray, delicate lines of the Japanese's face like a mask in the night. The eyes, which she now saw fully from the front, were bright and alive—not, she thought, astonished, the eyes of a sick man at all!

"Thank you," she faltered.

. . . Long after she was in bed again, shivering and solitary, Gray came in. It was so long she had had time for everything—time to weep, until her tears dried up in anger, time to be angry, time to grow cold in strong determination. When Gray came in she turned on her back and faced him as he stood at the foot of her bed. She had lain for an hour, hardening herself against tenderness from him, against his possible anger, against argument. She could be

"The doctor ordered a complete change of scenery" AL KAELIN

determined beyond any of that. Long ago her father and mother had come to dread that power in her to have her own way.

"Don't let Louise start her stubbornness," her mother would cry in a panic. She had let them beguile her out of it sometimes if they gave her enough in exchange. But there was nothing large enough that Gray could give in exchange for what she had been through.

"Gray," she said, "I've made up my mind. You've got to take me home."

But Gray offered no exchange, and she had not prepared herself enough for his calmness. He was neither tender nor angry.

"LOUISE," he said, "I won't do it." His own words shocked him as they left his lips. He had come back from the hours with Sara lifted into exaltation. He had forgotten in the first happy weeks of his marriage, in the peace and ease of his own country, what it was to live through such hours as he and Sara had just shared. The faces of the sick as they came down the ramp in the hospital—when he saw them he wanted Louise safe so he could forget her, forget even love, in this larger thing which was his duty. He had turned once when he was on the stairs and he saw her going out of the door with the crowd. It was right. He and she were at this moment only two in a host.

He went swiftly upstairs, speaking to all he knew and to those he did not. But they still needed no comfort, these people, he thought. They had accepted resistance to an enemy as their life. An old man with an amputated leg stumped past him on crutches. He was chattering to a man whose skin was sulphur-yellow with malaria.

"What I say is, every time a bomb drops, it's hundreds of Japanese dollars gone. What I say is, it doesn't cost us anything if we hide in the earth. It can't go on forever, this dropping of bombs!"

GRAY smiled and went on to find Sara tucking babies into the baby wagon. She was working quickly, humming under her breath as she always did when she was working against time.

"This is all pretty swell," Gray said. He wanted to tell her how wonderful it was to him to see the way these people —everybody—took the beastliness that threatened them. But he could not. The sight of her brave blue eyes and her flushed cheeks as she put one little creature after another into its place simply choked him. Besides, Siu-mei stood waiting. Sara did not answer.

"There," she said to Siu-mei, "now you can take them." She bent over one very small baby girl and kissed the tiny brown cheek. "That's mine," she said.

"Yours?" he repeated stupidly.

She waved Siu-mei on and watched the wagon being trundled down the corridor.

"Her mother died yesterday, and the family don't want her. They say they can't take care of her. So I will keep her."

"Sara, how can you with all else?"

"Siu-mei will help me. I wouldn't trust anybody else with all those babies except Siu-mei."

She thought of telling Gray that she was sure Siu-mei and Dr. Chung were falling in love with each other and then decided she would not. It would be too hard to speak to Gray of any love. The second siren sounded.

"We had better look once more at the sure-to-dies," she said. "Amazing how often they don't die! I try to keep them together so that they won't realize that they are not being moved."

"Why does Chung leave this to you?" he asked.

"I sent him to the shelter today," she replied, and made up her mind after all that she would tell him about the young Chinese pair. "The truth is that he and Siu-mei—" she stopped in the middle of the corridor between the two hospitals. "Gray!" she cried. Her face was bright with horror.

"Why, what? Sara, what on earth?" he stared into her widening eyes.

"Gray, you oughtn't to be here! I've only just remembered—Louise!"

"Louise is all right," he said.

"No, but you, Gray—you can't stay here! What if—Gray, hurry, hurry! There's still time. Look, it'll be five or six minutes maybe before the planes come. Go on, Gray—go on, go on—"

"I won't go on!"

"You must think of Louise. You haven't the right—"

"This is my job."

"But I don't want you here, Gray. I can manage. I've managed very well alone. And I haven't anybody to—to care as Louise does. Now look, Gray—"

HE SEIZED her arms. "Shut up, Sara. Shut up, shut up! You don't know Louise. She'd hate me if I were a shirker. She'd be the first to kick me out if I ran for cover."

"No, but, Gray, it's not necessary for you to be here. If it were necessary—"

He broke in: "What about you going into the shelter for a change? You've been going through this day after day, alone—"

"I'm used to it."

"Used to getting nearly killed every day, eh? Well, you're just about used enough."

"Let me go, Gray." She was acutely conscious of his hands on her arms. But he did not release her.

"Will you obey me?" he demanded.

"No," she said quietly.

"Why?"

"Because I know what I must do."

He dropped his hands. "So do I, Sara."

"Very well, Gray."

They went on after that in silence, visiting the sure-to-dies. There were over thirty of them. The third warning sounded and instantly the planes were swarming over the city. Gray felt the sweat start from his skin. His heart flew to Louise but each time he put the thought of her away. She was safe. He would despise himself if he were not here. The planes were not too near yet for him to hear Sara's clear voice at his ear giving him details of one patient after the other:

"This is a case of infected shrapnel wound. The abdominal wall was pierced and we have been fighting peritonitis—unsuccessfully, I fear—feel her pulse."

He felt the rapid, irregular pulse.

Sara sighed. "Such a nice woman! She is the wife of a farmer. Sometimes the Japs just dump their bombs on any village they see and we have scores of these cases."

Then the planes diving down shut off her voice. She drew him to a doorway by a touch of her hand upon his elbow and they stood there side by side. He felt the sweat pouring down his body. Nothing was clear in his mind. Even Louise's face was dim. There was just this noise to endure, this hideous, useless, crazy noise to be got through with, which he had forgotten about for months.

But she was thinking, "This I share with him. I cannot share love, but I can share danger and perhaps death. It may be that these are greater than love."

As if the deep passion of her thinking had reached out to him he turned his

When nothing must spoil your loveliness are you sure it's Safe to Smile?

the Answer's on the tip of your tongue

1 **Make the Tongue-Test...**
Run the tip of your tongue over your teeth...inside and out. Feel that filmy coating? That's Materia Alba . . . and it doesn't belong on teeth! It collects stains, makes teeth dull, dingy-looking.

2 **Your Tongue Tells You**
Your tongue tells you what others see... the filmy coating that dims the natural brilliance of your teeth, your smile. And it's this filmy coating that makes teeth look dull...bars your way to romance.

3 *Switch to* **Pepsodent** *with* **Irium**

You'll hold the secret of a winning smile when teeth feel bright to you . . . look bright to others

Pepsodent will remove the filmy coating that clings to teeth . . . the coating your tongue can feel, your friends can see. Only Pepsodent contains IRIUM . . . super-cleansing agent that loosens and flushes away sticky particles that cling to teeth.

Use Pepsodent regularly. Because Pepsodent also contains an exclusive, new high-polishing agent that safely buffs teeth to such a shiny smoothness, this filmy coating slides off before it can collect and stain.

Only Pepsodent gives you this wonder-working combination that makes your teeth feel so smooth, look so bright. Make sure of the loveliness of your smile. Get a tube of Pepsodent with IRIUM today.

IRIUM

Pepsodent TOOTH PASTE

head as she turned hers and their eyes met. He saw her faithful face clear in the instant, her beautiful, faithful face. Louise was right. Sara was beautiful. He had looked at her hundreds of times and not seen how beautiful. He had only been annoyed at first that he had been sent a young woman whose good looks were a responsibility, troublesome among a people too shrewd to believe that a man and woman, both young and handsome, could work together without attraction. He had been determined to prove that it could be done. And he had fallen in love with Louise, not with Sara. If Sara had been a man he would have put his arm about her shoulder in good comradeship—we who are perhaps about to die! A bomb fell and burst. He put out his hand and grasped hers, but after the instant she drew it away again.

. . . When it was over he was suddenly hungering for Louise. He wanted to pour out on her the bravery of the hours, the people coming quietly back to their homes from the hills, to take up their work where they left it if they found their houses still standing, the sick returning to their beds, the nurses hastening silently from one to another, hot food being brought from the kitchens by the servants. Downstairs Sara and he were receiving the newly wounded, examining, treating, sending those who needed operations to be made ready. He operated on four men one after the other. Once he thought, "I should have sent word to Louise." Then he thought, "No, she's a doctor's wife."

WHEN he was finished, he went through the downstairs halls to Sara's office and found her putting down notes.

"Aren't you going to sleep?"

Dawn was breaking through the sky in long lines of silvery light.

"I am just going," she said. "Good night, Gray."

"Good night, Sara." He hesitated. She had been operating, too. "Did you lose any?"

"No—mine will pull through, unless we have to move them too soon."

"I have one shaky enough to scare me—an old fellow. But game as anything. He said when I asked him if he'd let me take out an iron splinter from his thigh, 'You are too courteous—the Japanese didn't ask me if they could put it in!' He went under the gas chuckling at himself."

She smiled. "That's the way they are."

He felt choked again. "Pretty swell, eh, Sara?"

"Pretty swell."

"Well, good night."

"Good night, Gray."

He walked across the dim lawn full of the energy of his admiration for courage and laughter and faithfulness, a grand folk, grand to live with, grand to die for—and went into his house. He wanted to share it all with Louise. He wanted to draw her into the glory with him.

"Louise!" he cried.

Siao Fah came out of the kitchen with a tray of tea and toast. He had been in the hospital shelter but not near his mistress. He had watched her steadily, aware that she did not know his face among the others. Why did she talk with the Japanese? Why did the Chung doctor, whom nobody liked, bring her home when her husband was not there?

"That one is in her bed," he said to Gray. His face was empty. He put the tray down. "Eat something," he commanded. Then he turned and went back into the kitchen. If she had been a proper wife she would have been up and waiting for her husband, and she would have seen that he had food. As it was, there was only he himself to look after the white doctor.

But Gray had gone straight to the bedroom and flung open th door. She lay, lovely upon the was awake, waiting for h

as been Fra's dramatic coach e she came to New York to tend him and go to Barnard Col- reover, he brought his friends that Fra would be acquainted eater when she finished school. friend was Mr. Skinner, whom ted to the apartment one night umn. There he met Mary at her best and most little- —her hands to her elbows in er house dress protected by a rched apron.

ouldn't have the role of a maid around loose?" Van asked, as sked every possible employer been an audience to the care- cted domestic scene.

inner was extremely dubious. just such a part in Charley's course, but it also entailed the understudy assignment. "I'm need someone with more ex- —someone I can depend on in

Fra had her instructions from Van, and this was her cue. "Which part would you like to hear first, Mr. Skinner?" she asked demurely. Before he could answer she proceeded to overwhelm him with a neat rendition of each of the parts in the play—cued by big brother from an ominously convenient script. Barnard lost a student.

Every minute when she's off stage, Fra sits in the wings knitting merrily. The contentment with which she has turned out sweater after sweater after knitted mitten so fascinated the other two members of Logan's Luscious Luggage that they tried to learn the craft. Tottie can do simple stitches in a straight line, but has never learned how to turn corners and is about ready to give up. "The British are in enough trouble without getting a bundle of footless stockings from me," she says. Phyllis is on stage more than either of the others, but still struggles doggedly with a ski cap which has been perversely snagging and unwinding since the first days of the run.

Phyllis has a wonderful time in her corner of their dressing room, with a gay feminine litter of silk stockings, open powder boxes and hairpins. She feels slightly above the neatness of Fra's austere table, but is a little envious of Katherine's part of the room. Katherine keeps her make-up equipment not neatly, but with a certain sense of drama that makes her section of the cubicle look like a display booth in a swank cosmetic store. "Making up," she announces, "is half the fun of acting. You feel so—professional!"

It's possible that all three won't go to the top—that Katherine won't become the famous beauty and matinee darling that people predict, or Phyllis or Fra the much-in-demand ingénues they seem on their way to being, but, as Fra puts it, "Although we may not all get to be Lynn Fontannes—there ought to be at least a Hepburn or two somewhere among us."

"Oh! For a moment I thought it was my drink!"

GEORGE SHELLHASE

Score Two for All-Bran's Better Way!

"CALL THE FIRE DEPARTMENT!" is, figuratively speaking, the way my family and I used to treat constipation. We'd rush to the medicine cabinet for *emergency relief*. It never occurred to us to look for the *cause*, or to try ALL-BRAN's better way.

STRAIGHT TO THE MARK! Then I discovered that KELLOGG'S ALL-BRAN goes straight to the *cause* of common constipation, the kind that's due to lack of proper "bulk" in the diet—and wholesomely, naturally prevents it.

EXCUSE MY BACK, but I'd rather not illustrate the way those laxative doses used to taste. And to think I never knew what crisp, delicious, toasted ALL-BRAN could do.

HAPPY DAYS! And, if your trouble is this common kind of constipation, may you discover the same enjoyable way to "Join the Regulars"! Crunchy, toasted KELLOGG'S ALL-BRAN is not only very effective, it's a lot more pleasant than the "hurry-up" remedies we used to take. Eat it with cream and sugar every morning, drink plenty of water, and get yourself in tune again.

Join the "Regulars" with Kellogg's ALL-BRAN

In Line of Duty

Continued from page 17

"Two guys?" McGarvey asked, pushing out one cheek thoughtfully with the tip of his tongue. "What guys?"

The young cop looked into McGarvey's face—then past him, up the stairs.

"Maybe," he said, "maybe Red Donlin and a pal. Tully don't have a phone, so he sent down his kid to call in; that's how he saw us." He turned to McGarvey again, his voice a little shaky with its weight of desperate earnestness. "I'd have gone up to get him," he said. "I wanted to, McGarvey. Only Johnson—my driver—didn't want to take any chances. He said we'd better wait till we got some help from the precinct. He's out covering the back now; he set me here. That's why—"

"That's right," McGarvey said. "Johnson used his head."

HIS eyes, his whole face, were uglier now than Margaret had ever seen them; two harsh lines deepened about the corners of his mouth. He'd heard about men like Red Donlin—cop killers, the papers called them. Twisted, insane maybe—but with a maniac's singleness of purpose, a madman's undying hate. Lately the papers had printed a lot about Red Donlin—stories that a cop had killed his father, that a cop had smashed his withered arm years ago, when he'd been no more than a boy—stories, even, that his father had been a cop who mistreated him.

McGarvey didn't know which of those stories was true. Just now he didn't care much. Red Donlin was somewhere upstairs, and since summer Red Donlin had killed three cops. So all he said was, "Okay. Stay put now," edging the rookie away from him, and stepping through into the hall.

There was something more the rookie should have told him—something that an older or a calmer man would never have forgotten. That Tully, who'd sent his kid down to get them, was somewhere up there now—Charlie Tully of a headquarters detail, who lived in the house next door, and who'd heard from a talkative janitor of the new tenant he had—a red-haired man with blazing blue eyes, and a queer left arm glimpsed briefly under his coat.

But the young cop didn't tell him that, and McGarvey had no reason to ask. Tully was a name to him, nothing more—a guy the young cop knew, who lived in the neighborhood. McGarvey forgot it entirely as he moved up the stairs, quietly and carefully, around the first landing, up to the second, stopping for a moment there before he moved on to the third.

The bulb on the third landing was switched on; it showed McGarvey that the door three steps away from him was half ajar, and that there was no light at all behind it. No sound, either; only a radio humming faintly below, thin and fantastic, a wailing curl of sound tightening like a spring in his ears.

He moved toward the door; he came to it and listened again; he pushed quietly in. He saw two windows against the back wall of the kitchen; he saw the white shadow of a sink, and the formless dark bulk of a gas range. Nothing else. No movement. No—

"Red!" somebody yelled, in the shadows of a room off the kitchen. "Cops, Red! Look out! Watch—"

McGarvey took it for a warning. He was right. But how could he know then that it wasn't meant for anybody there? A scuffle of movement came fast after it—then the impression, rather than the sight, of a quick rush through the shadows. A white shirt front moved at him; a gun glittered before it.

"Get 'em up," a voice said. "Get 'em up, you—"

McGarvey didn't get them up; his own gun was shadowed by his body against the windows. He thought one thing: Red Donlin didn't know he had it out. He did one thing, the only thing he could do: he fired with his gun almost against that rushing body.

He'd heard somewhere that a bullet didn't stop a running man. This one did. McGarvey heard him crash down flat—heard him cough, and move a little, and start to draw a breath that stopped before he had it in. Then McGarvey was against the side wall, waiting for the one who was still inside, listening to the short, flat crackle of sound that rolled and echoed between the walls, to feet that were pounding upward to him on the stairs.

The feet belonged to the white-faced rookie; McGarvey had known that they did the moment he heard them. "Careful," he said, "there's another one inside," before he moved around the man on the floor. He expected a shot when he went through that inner doorway. None came. He understood why when he tripped forward over an outthrust leg that received the momentum of his body as dully as a chunk of wood. Out, McGarvey thought—out cold. Who had conked him from the time he yelled?

THE rookie had the lights on then, like a fool, before he knew what was going on inside. McGarvey grabbed the limp man's ankle and dragged him out to the kitchen. The rookie was on his knees there; McGarvey looked over his shoulder.

"That ain't Red Donlin," he said. Sweat was shining in his brows; he wiped it off with an impatient hand.

"No," the rookie said. His voice was as soft as a girl's. He must have been thinking then about what he should have told McGarvey, down there, three minutes ago, in the hall. "It's Charlie Tully," he said, his face turned from McGarvey, his hand opening and clenching, aimlessly, on the dirty oilcloth floor. "He was—he was a headquarters man, McGarvey. He lived next door here. I thought you knew him. I thought you'd meet him on the stairs. I thought—"

"Charlie Tully?" McGarvey said. What was— He dropped the ankle he was holding, and came out a step more. This rookie was off his head. Talking like—

"He's dead," the rookie said, looking at McGarvey now, his eyes sick and desperate. "And I killed him, McGarvey. If I'd told you—"

The radio was quiet now. It made the stillness deep and profound, weight of cotton wrapped t McGarvey's heart and ove He said something to the ro in hell was he talking abou hell was he—

The rookie's partner came of minutes afterward there precinct men around that knew. There were some peo in the doorway, and present and a boy came past then would be Tully's boy; the wo be Tully's wife.

Some of the men formed Garvey and tried to get him pulled away from their h words buzzed uncompreher ears. The boy was crying. knelt by the dead man, ar head in her lap. There was a her face—something remot touched there.

McGarvey wanted to go to explain how it was; it see then that if he could only about it, go over it all slowly in his mind, it would all be s out. A mistake; that was happened so fast. Donlin, Ch the guy yelling out, the rookie—

How Chrysler's Fluid Drive is Different!

Some drivers have to shift gears constantly!

Nobody ever really liked to shift gears! For years motorists have preferred cars that would operate in "high" as much as possible. Yet in ordinary cars, there are dozens of occasions in starting and stopping where it is necessary to shift gears because the car cannot negotiate the situation in high. Only *Fluid Drive* as Chrysler has it, solves that problem. It lets you stay in high!

Some drivers have their gears shifted mechanically!

It isn't only the work of shifting gears that bothers people! It's the racing engine, the thumps, the grinding, the whole atmosphere of fuss and effort. And that holds true with gears that are shifted for you as well as the gears you shift yourself! But Chrysler says "Why shift gears?... just stay in high for all normal driving!" You can do that in a Chrysler... thanks to *Fluid Drive* and Chrysler's high proportion of power to weight!

But only Chrysler drivers can do all their normal driving in high gear!

With the high reserve horsepower of the Spitfire engine, Chrysler's *Fluid Drive* enables the car to negotiate situations in high that ordinarily necessitate shifting gears. Chrysler's Vacamatic transmission will shift gears for you if you wish it to, but it doesn't shift unless you desire it, and with Chrysler's *Fluid Drive,* it is possible to drive most of the time in high. The difference is important... thrilling... delightful. Try it!

WHY SHIFT GEARS?

..Try Fluid Driving in a Chrysler!

Chrysler's *Fluid Driving* is the most talked about advancement in motoring. But your own sensations will tell you more than any description you may hear. Take a ride in a *Fluid Drive* Chrysler. Your Chrysler dealer cordially invites you!

BE MODERN WITH FLUID DRIVE — Buy Chrysler!

1. Ed needs a laxative; but he's taking the 10 o'clock plane. Doesn't like to risk embarrassment. So he doesn't risk getting relief. Instead, Ed decides he'll wait till tonight.

2. Bob needs a laxative; he's taking the 10 o'clock plane, too. But Bob thinks: "Never put off till tonight the laxative you should take this morning!" So he takes Sal Hepatica because it's speedy.

3. Ed is all in from constipation and that not-sick-not-well feeling. He needn't have taken a plane. He won't be able to do a lick of work today, anyhow.

4. Bob felt more like his old self within an hour. Sal Hepatica acted fast, was gentle and easy. Sour stomach was sweeter . . . so was the whole world!

Whenever you need a laxative take *speedy* Sal Hepatica

Don't put off taking a laxative just because you're all dated-up. Take speedy Sal Hepatica.

Within an hour usually you're relieved . . . gently and thoroughly. Sal Hepatica acts by attracting helpful water bulk to the intestinal tract, acts without discomfort, irritation, or griping.

No wonder 8 out of 9 doctors recently interviewed recommend Sal Hepatica.

More than a laxative, this sparkling saline gives decided help in counteracting excess gastric acidity, helps turn a sour stomach sweet again. Next time you need a laxative, try speedy, gentle Sal Hepatica.

SAL HEPATICA

"TIME TO SMILE" Tune in on EDDIE CANTOR—Wednesdays at 9 P.M., E.S.T.

pictures of Charlie Tully's wife and kids, and a flash of McGarvey coming unshaven and gaunt down the precinct steps the morning after it happened. But not even the tabloids blamed McGarvey directly.

It was a sad thing, but no one was to blame. Not Charlie Tully, who had gone in first to the apartment, who had subdued Red Donlin's friend, and waited then for Red Donlin to come back. Not McGarvey, who came in after, so that the man with Tully cried out to warn him, thinking he was Donlin back at last with the beer or the cigarettes he'd gone out to get. Not the rookie—the papers found out nothing about him. Not even, in any physical way, Red Donlin, for he'd never been there at all. The squad cars had warned him off in time when he was coming back, a minute or ten after it happened. In the darkness, just a shirt front, McGarvey had seen the man rush at him; McGarvey had seen the gun too. So McGarvey, a good cop and a brave one, had done the thing that anybody else on the force would have done with a man like Red Donlin. McGarvey had . . .

It was strange the way his own thoughts always stopped there—automatically, as if they were on a track blocked off by endless empty space. He would listen to the men who tried, awkwardly perhaps, to comfort him—he would listen and say sure, sure. The only thing. Anybody would have—Sure, sure. He wouldn't let this get him down. But inside him, even while he spoke, the thoughts kept on. Not anybody; McGarvey. No gun-shy civilian; no raw-nerved rookie. McGarvey. A good cop. A brave one. But McGarvey, all the same. . . .

It was Margaret, and Margaret alone, who never tried to comfort him—who never, in fact, mentioned Charlie Tully to him at all. They went to the movies that night where McGarvey laughed when she did, and got up when she did, and said he'd enjoyed that picture all right. For three hours he did not have to grin and nod, and say sure, sure. Tough luck all right. But anybody—

The three hours didn't help much. He found that out as soon as he started to walk home with her. He walked very slowly; long before they came to her corner his legs began to feel heavy and numb. In that house down the street—that house he could see if he'd only raise his eyes—Charlie Tully's wife would be sitting in her silent kitchen, with her hands folded in her lap, and nothing much in her eyes. Thinking there—of what? Of a man named McGarvey, and of what he had done to her. And hating him no matter how deep she had it hidden, no matter how mute she kept the words within her.

WHEN they had reached the El station he must have made some sound or movement. Margaret gave him a swift glance.

"There's a train coming now," she said. "Why don't you catch it, Bernie? I'll get home all right without you. It's only a step from here. And you'll be home a half-hour earlier."

McGarvey looked at her dully, seeing that she knew then, although she'd never spoken.

"All right," he said. "Maybe I will. I'll call you tomorrow."

Halfway up the stairs, he stopped to watch her cross the street. Why hadn't she spoken Charlie Tully's name? Because she was closer to him than the others—because something of what he felt she'd have, too, in her heart? Because she heard the voices, the scornful and contemptuous voices that whispered so softly, so secretly, in McGarvey's head?

Yella, those voices said; as soon as he listened they came clear. The cop that killed a cop. Jumpy, see? guy facing him. Letting thing he saw. Drunk, knows? Don't cops get av der? Don't they—

The next day he didn' even changed his boarding she couldn't get in touch w tried. The voices made it could have her pick of g who could start her clean, his eyes, no darkness in Not anybody, then, like M wrote her a long and ra that night—he didn't lc never loved her. And he'd girl now—someone he wa So—would she call it quit just forget him and try bad? Affectionately, he s not how much, not how would be locked forever i heart.

Nights after that he to around the precinct—no nothing he could think of t tle room off the one where their lockers he would sit a hours, thumbing a paper, s times, at the wall.

HE WAS there one ever day shift went off dut trolmen, most of them, b full of horseplay. He cou out by their voices: Ki Fireball Kelly with his sha Muldoon. Ed Ward. Mac

He heard a flat thud, Kelly's yell of rage.

"Who in hell let that s deep voice roared. "Mac weasel—"

"Me?" said MacNamar Fireball. Honest!"

McGarvey smiled faintly Guys he liked. Guys that—

picked up his hat. He went without trying to speak en he was gone McGarvey f the lights again, and sat he bed, with that savage, ry burning and throbbing in s. He sat there for a long g suddenly now and again, word that choked in his throat; he got up at last, an hour after Ed Furey had gone, with the naked, pushing energy of it uncontrollable in him.

Downstairs he looked at the clock in the hall. Ten after eleven. Twenty minutes before— He shut his mind to that, taking his hat and coat from the rack, yanking the front door back against the wall. He could feel the cold air—he thought he'd never feel anything again. Thin and dry; a smell of coming snow in it. A cab before the stoop. He could ride in that—anywhere, everywhere. He could—

"Wait," he said. "I—"

He was out on the stoop before he recognized the first of the women who got out of the cab: Margaret. She stopped below, her eyes searching his face, whispering, "Hello, Bernie," from lips that might have been as colorless as his own. He seemed to know at once, even before he looked, the name of the woman who was with her; and he stepped back quickly, his head safe in the shadows of the hall, so that, even if she saw him there, even if she spoke his name, Charlie Tully's wife would never see his eyes.

"Ed Furey called me up just now," Margaret said, her eyes never leaving him. "He said you were like a crazy man. That you—Bernie! Do you think I believed that letter? Do you think I was such a fool—"

He stood above her in the hall, trying to pretend that her words had nothing to do with him, that he was some place far off, and not here in body at all.

"Bernie, Bernie," she whispered; her lips trembled—"you're not going to be a fool. I won't let you. You won't speak; you can't. There's no way to defend yourself. I knew you'd do this; I knew it. That's why Mrs. Tully came with me to see you."

McGARVEY tried to keep his body rigid there, but he couldn't. A shiver rippled over it and distorted the white lines of his mouth. Mrs. Tully looked up at him, her face shadowed too.

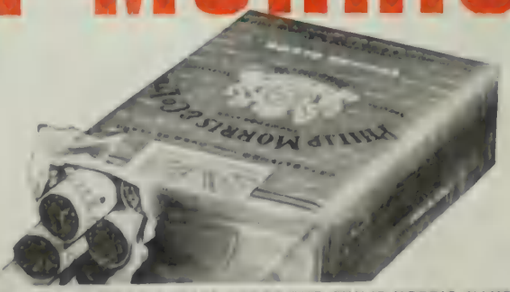
"Go on," McGarvey said. He could stare back at her now; it was as if this was the thing he had wanted, all that week, behind his maddened thoughts.

"Go on and speak, Mrs. Tully. Tell her"—his voice shook; he was past caring now—"tell her what you got in your heart for me. What I know you got there. The way you hate me, see? The way maybe you pray to God I'll get what I gave him. At night when you're thinkin' of him, when you're thinkin' of me—

"That's what you're gonna tell us

PICTURE OF PERFECT SMOKING PLEASURE

without smoking penalties



They know Philip Morris taste better— and are better for nose and throat!

DO YOU INHALE?

ALL smokers do—sometimes. And *when* you inhale, there's added chance of irritation. So—choose *your* cigarette with care! Eminent doctors long ago reported that, compared with the strikingly contrasted Philip Morris: ***four other leading cigarettes were found to average 235% more irritant — with irritant effects lasting more than five times as long!**** So whether or not you knowingly inhale—

CALL FOR PHILIP MORRIS

America's Finest Cigarette

* *As reported in leading medical journals.*

CREATORS OF FAMOUS CIGARETTES FOR 93 YEARS. ALWAYS UNDER THE PHILIP MORRIS NAME

Makes herself over —startles her friends!

"My friends were startled by the change in me," writes Elizabeth Prasse. "I'm healthy, happy, an altogether different girl — thanks to the Success Course."

Below, Elizabeth when she enrolled for the DuBarry Success Course, overweight, posture bad, with a beauty she didn't know how to express.

Above, the streamlined sparkling beauty that Elizabeth became in six weeks.

ELIZABETH PRASSE is just one of more than twelve thousand women and girls who have found the DuBarry Success Course a new way to beauty at home. It's a practical, sensible plan—and it works! It brings you a personal analysis and a six weeks' beauty routine for your needs—skin, hair, figure, posture, weight—shows you how to use the same methods taught by Ann Delafield at the famous Richard Hudnut Success School, New York.

Get the Full Story—Send at once for 32-page book telling all about the DuBarry Home Success Course and what it can do for you.

THIS CASE INCLUDED

With your Course you receive this handsome Travel-Case containing 22 different DuBarry Beauty and Make-up Preparations selected for you.

now," he whispered. "Not lies, Mrs. Tully. They don't help. Because I got the truth in me, see? I got it speakin' to me all the time in my head—tonight and tomorrow and all the days of my life. It goes on happenin' there over and over—seein' him come at me, watchin' him fall, hearin' the noise he made when he died. And thinkin', thinkin', thinkin', if I'd only said a word—"

He took her arm; his fingers must have hurt it.

"Tell me that," he said, softly, painfully, wanting to hear it now, to have it finally, and irrevocably, before him in words. In her plain words, he breathed forth, in that confused and vehement whisper. Words that he would remember—words like letters of fire in his mind. The thoughts she had, the hate she had, when she remembered a cop named McGarvey, and the thing he had done to her—that was what he had to have now. That was what she had to tell him.

She looked up at him quietly, and she said:

"What would I tell you? That it's hurt you more than Tully—more than me? I see that in you now. It's a thing I've pity for. Not hate."

"No," McGarvey said thickly. "Listen—"

Her mouth shook a little, tenderly.

"Don't I remember Tully like you?" she said. "Long ago, the year I met him. A cop, he said he was, but I'd not believe that on his oath. We all used to smile at him—the lord mayor, my brother Joe would call him. Because that's the way he looked at you, young and strong, and as proud as Punch. Tully the cop—that's how I came to think of him. Is Tully the cop here yet? I'd ask them, running in from my work. The fella with a laugh that'd shake the house. And my brother Joe—"

Her voice caught there. Her smile, which quivered and broke, was something McGarvey couldn't watch.

"And when we married I didn't like his work. I tried and I tried to get him away from it, because of the fear that was always in me. He'd never listen. 'Will you not be foolish now?' he'd say to me. And I cried to myself, but I talked to him no more about it. For I saw what it was. Tully the cop—that was the thing he was proud of. He'd not hate you. He'd say: go on, man. Will you not be foolish now? Will you not—"

McGARVEY saw what shone in her eyes; he pushed by her dumbly, across the pavement to the cab. Margaret hurried after him and jumped into the cab with him. He mumbled something to the driver—the precinct house, because it was the first thing that came into his head. And when they started off he sat back with his eyes closed, her face fixed in his mind, knowing he was lost forever, no way out, no path back for McGarvey. Her voice still rang, high and faint, intolerable, in his ears. Tully the cop—what did it mean? Lies! Lies! Like the things they all said to McGarvey. Nothing true. Trying to make him think—

And yet, obscurely, with a life of their own, they moved inside him, they would not let him be. McGarvey the cop—he used to think of himself that way, too. Funny. A cop was nothing great at all. Only for him and for Tully, it had been the one thing in their heads. He could remember a very young McGarvey, a kid in school, hanging around the precinct house, looking at the plain-clothes man and the desk sergeant inside, knowing that there was the thing he wanted to do, and nothing was going to change him ever. And he could remember an older McGarvey, McGarvey the rookie, walking his first beat with bubbles in his blood, and something in his heart he was never going to lose.

He'd lost that now. Why? He'd have died as Tully had, if Tully had shot first. But McGarvey the cop would have had no squawk. You paid for what you wanted. Tully the cop had paid all he had; would McGarvey the cop have paid that too?

Something happened to him; he got all calm and quiet inside. Sure, he thought; why, sure. Me and Tully—we knew what it was. Nothing great; nothing noble. But all we wanted. So—so he and Tully shared it now. Not a uniform; not a way to make a living. Just—

The cab slowed suddenly. He looked through the window and saw people lined across the gutter, a row of cops holding them back. Here, McGarvey thought—of course. Hadn't Ed Furey told him that the drugstore where Donlin had placed the call was only a few blocks away? They had him holed up here now. Donlin, the cop killer. He was sure of that at once; it was a thing that had to happen. Because whose job was it now? Whose but his and Charlie Tully's?

He and Margaret got out of the cab, and pushed through the crowd to where a group of men were gathered around Inspector Riley's bulky form. Ed Furey, looking angry and worried, was talking.

"—must have spotted us from upstairs," McGarvey heard him say. "Or maybe the girl saw our car keeping after her. Just as soon as we started across the street he blasted down at us from the window. Then he tried to duck out the back, but Kennedy and Tom Hansen headed him off. He's in there now with a couple of guys and a closet full of guns. And it's gonna be one nice, sweet job digging him out."

By moving a little McGarvey could see the house—three doors in from the corner, on the other side of the street, an old-fashioned brownstone tenement, with all the windows on the smashed and shattered to strips of glass. No one n street itself; save for a pa and there it spread out sl narrow, utterly still. Look Garvey had an absurd tho he walked out there, him, M bullets could stop him: the pass through his body as i Whose job was this? His Tully's. So—

He had actually started Ed Furey grabbed his arm waiting now for tear gas, h were other tenants in there and the inspector would ha safe and easy. But there m way in which Red Donlin l cover. Would McGarvey t with them?

McGARVEY didn't pay tion to what Furey s followed docilely enough. avenue, keeping to the shel posts, and into a house on t of the street, on the corner, Red Donlin's. He heard shots; he didn't know wh them. After Ed Furey and uniformed men he went in way. There he waited—t edge—while the three othe tered. Then they all went stairs to a cellar.

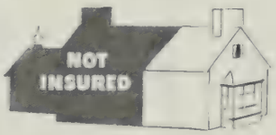
They looked around ther that could pass them throug tenement. They didn't fin Garvey stood behind them the shelter of a coalbin, ever in his mind. He'd lived in a like this as a boy; he rer subcellar that ran on benea ones to keep them from There might be one here, t were—

He found it soon after Ed

That's how you find a Hartford agent in a hurry

Wherever you drive

wh ever you are—in the ite States or Canada u ca quickly get in touch h a agent of the Hart- d re Insurance Company or the artf d Accident and Indemnity Com- ny. ust call Western Union (in Canada l Ca adian National Telegraphs) and ask the name and location of the nearest artf d representative.



elcome help—when needed

ou en oy the service of experienced agents brok rs when you insure in the Hartford. here e over 17,000 agents of the "Two artfo ls." They are in a position to render valua le service when you are in trouble and they can provide you with a sound insurance program.

An agent recently said to an acquaintance:

"Many home owners would find themselves only about 40 per cent insured

—if they had a serious fire. How would *you* be fixed?" The reply was: "I suppose I'm fully covered."

But the conversation brought out two facts to the contrary: first, that the householder had recently built an addition without increasing his insurance; second, that his fire insurance policy hadn't been revised to include some new furniture.

An analysis may surprise you

Do you know what risks of financial loss you are running? Why not let a Hartford agent study them? For remember:

It's just as much a loss whether your house burns down or blows down, whether you are sued by a car owner or a golfer, whether your signature is forged on a check or your purse is stolen.

Ever since 1810, "Hartford" on a policy has meant a sure promise to pay losses.

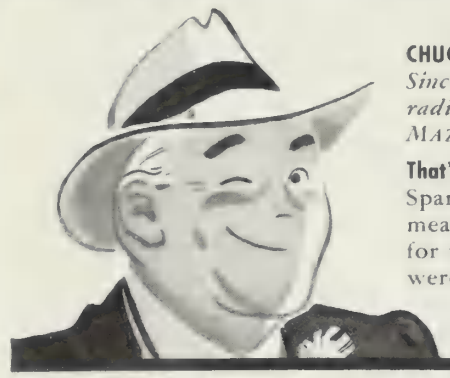
SIDEWALK INTERVIEWER ASKS A BURNING QUESTION



SAYS WILBUR MEEK: *"Bulbsnatcher? What's that? Something new? I haven't read . . . you see, when I start to read, my eyes get so tired . . . I go to sleep."*

It sounds to us, Wilbur, as if bulbsnatchers were busy in your home. When a bulb is taken from one socket to fill another, eyestrain and fatigue usually result. Better get some right-size G-E MAZDA lamps and check-up today.

SAYS LOUELLA GRAB: *"Why, nobody minds if I just borrow the bulb from his lamp for a teeny little while!"*

We hate to doubt you, Louella, but bulbsnatching annoys most people. Besides you risk eyestrain and wrinkles, if you pick the wrong-size bulbs. It's much simpler to keep spare G-E MAZDA lamps handy. They cost as little as 10c.

CHUCKLES ROGER BRIGHT: *"Not any more. Since I heard about bulbsnatching on the radio, I keep a stock of right-size G-E MAZDA lamps on the shelf!"*

That's the answer we like to hear, Roger. Spare G-E MAZDA lamps in right sizes mean eyesight protection and comfort for the whole family. And we bet you were surprised at how little it cost!

PRICES ON BRIGHTER G-E MAZDA LAMPS BEGIN AT

the others went out to the yard—a square of wood set in the stone floor behind the furnace, smeared over with a rubble of dirt and ashes. The door came up easily enough; then, with his hands on the sides, he dropped through into the thick darkness below. He had to crouch down in that stinking darkness, four feet deep; he had to crawl forward on his hands and knees through cold slime that closed over his fingers, and dragged at the outspread tails of his coat.

It was nothing he minded. Twice he struck matches, seeing by the first he was past the next house down, by the second he was under Red Donlin's. He got under the wooden scuttle there, set his shoulders against it and pushed up; he was in the cellar of the third house then, lit vaguely by the red belly of the furnace before him.

Stairs slanted up dimly against the far wall; he was moving for them when the firing began again, in a heavy blast directly over him. McGarvey reached the stairs and started up, feeling all right, solid and sure with his gun in his hand, hearing no whispers, knowing where Charlie Tully was if he was anyplace at all—around here now, so close in the shadows McGarvey might have touched him by reaching out his hand.

A door let him into the street hall. More stairs took him up, over the first flight, across the landing, to the foot of the second. A woman sobbed hysterically, somewhere behind walls; on the second landing a man with a revolver in his hand crouched under the hall window. At first he did not see McGarvey; he raised one hand and rubbed his mouth shakily. Then, as McGarvey came on, a stair creaked and his head turned, and he looked down at McGarvey with his hand still frozen at his mouth. He did not move for a count of three; McGarvey could see whiteness all around the pupils of his eyes. After that he was a lot too slow, a lot too clumsy, swinging his gun down. McGarvey was the only one to fire.

In a room off to the right an automatic spat four times, drowning his single report in its splattering lashes of sound. McGarvey went up fast, across the landing and into the room, under an echoing cover of shots from the street. He saw a man lying on the f r there twitching a little, a dark sp ch like shadow on his forehead, his es fixed unwinkingly on the wall ac s from him. Just before McGarvey red the twitching stopped, and he sa hat the dark splotch wasn't shadow, bright stare wasn't life.

He went on—out to the h again forward along up. When he wa alfway to the street side a door b re him opened, and a narrow streak f dirt gray light shot out and wider acros the banisters. A man came ou after it cursing thickly, with a machin un ba anced across his withered left m. His back was to McGarvey; he d 't hear his steps.

"Donlin," McGarvey said. onlin'

The other man turned fas turne and saw him standing there, n fee away, a step out from the wa his le arm stretched out along it. d Mc Garvey looked back at him qui y, com plete then, the way Charlie T y mus have been complete the night died— everything in place, every ng he needed solid inside him. Not a id you understand, not wanting to di but no squawk, no kick, no hate in h .

And no excitement at all; hurry His job—his and Charlie Tu s. He seemed to have all the time t re was to place his shots—one, two, in at last split second. The other gun sw down to him across that withere arm— stopped there, wobbled once a fell to the floor.

HE TOOK Margaret home t night much later. He took her st the house where Tully the cop die nce in line of duty, and then they stop d for a time, as they always did, ou le her door.

"That letter now," McGarvey d soleemnly there; "I don't know wh wrote it. It wasn't true. I just had a t of— crazy ideas. Did you ever bel e it?

"No," she said. She straight d his tie; she gave his chin a pat, h voice low and not too steady. "Be se—i guess I believed in somethi else Bernie. You and me, perhaps. that's what you want—"

McGarvey didn't answer t ; he didn't have to. She could see it there in his eyes.

"I'm awfully sorry, but we just don't happen to have targets that swing back and forth"

"So do I, Levin, but flying German
mbers ver England is an unfashion-
able sport, these days. You'll recall what happened to the hopeful Huns who flew over in the four ships that this one's built out of!"

"I recall it with the keenest pleasure, sir!"

"Tail turret!" Baruch's voice came from the loud-speaker. "I can still see it, sir! Just barely! There's a hole in the mist and . . ."

"You can still see what, Baruch?"

"Why, England, sir! I—I rather thought you'd like to know!"

"Oh! Yes, yes, of course! Thank you, Baruch."

"Yes, sir. But now it's—no, wait—yes, it's gone!" The loud-speaker crackled and lapsed into silence.

Squadron Leader Levin jerked his head toward it and grinned. "Good little chap, that Baruch, sir!"

"If he weren't, he wouldn't be back there in the tail!"

"Well, I s'pose not, sir. But I mean, he's such a topping good kid that I, I—well, I'd hate to think that intelligence might be mistaken and . . ."

"And that Baruch and you and I and all of us—all this, this stunt—might be wasted? Is that it?"

"Yes, sir! I mean, intelligence did make some rather ghastly blunders in Norway and Flanders, as we all saw, sir. And if they are wrong today, why, I mean, just think of the laugh that that filthy swine will have at our expense!"

Sir Asher chuckled. "Well, he'll have to build himself a new chancellery, in any case!"

"Yes, sir! But—" Again the pilot pounded his fist on the rim of the wheel. "But that wouldn't be getting—him! Him—Him!"

"Don't worry, Levin," Sir Asher said, evenly. "Intelligence isn't wrong this time. Mistakes did happen at the start, of course. But—they won't happen today!"

They were approaching Amsterdam, now, flying in full sun, although the ground beneath still lay in misty twilight. From time to time they could see muzzle flashes as the guns let go.

"Appears to be quite a tussle, yonder," said Sir Asher. "Better boost her upstairs a bit more. If we . . ."

"Top turret," came Browne's voice. "Five Messerschmitts—no six—above, right and rear, sir. No, by God, there're a dozen of 'em—twenty of 'em! They're . . ."

"Tail!" Baruch broke in upon him. "Ten Messerchmitts coming up from behind, sir!"

"Okay, top and tail," said Sir Asher. "Yes—yes, and now there're eight or ten more of them closing in from the left. Well, they're going to escort us through! Jolly decent of them, gentlemen!"

THE Germans throttled their engines and maneuvered into close formation above and on both sides of the Junkers, seesawing slowly up and down as though floating on the crests of a gently undulating sea swell. Their leader, whose plane had Wagnerian dragons painted in silver and blue on its nose, drew in so close alongside that they could see his white teeth as he smiled and read his lips as he said, "*Guten morgen!*" Sir Asher waved to him gaily; then, "All turrets!" he snapped into his phone. "Take your hands off your guns! Wave at him! Be polite! No thumbing of noses, mind!"

After a moment or so of swooping about ahead of them, the Messerschmitt executed a snap roll and pulled up into a nearly vertical zoom.

"Look! Look at him, sir!" Levin

WATCH OUT !!

for slightest sign of bleeding gums—it's often

GINGIVITIS

4 OUT OF 5

May be victims—often leads to dreaded PYORRHEA—

EVERYONE — even young folks — should beware of the very first signs of sore, tender, bleeding gums.

This may be Gingivitis—a mild inflammation where gums join the teeth —so common today—many people never even suspect they have it. IF NEGLECTED—Gingivitis often leads to Pyorrhea with its soft, shrinking gums and loosened teeth, which *only your dentist can help.* BUT at home you can—

Help Guard Against Gingivitis This Easy FORHAN Way!

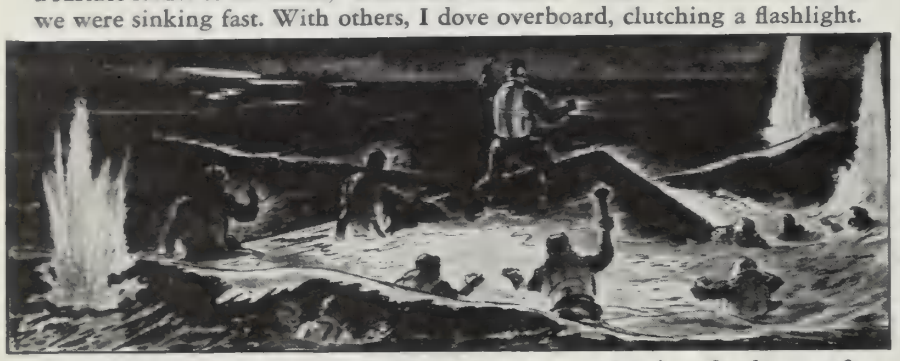
Every morning and night massage your gums and brush your teeth with Forhan's Toothpaste—the ORIGINAL toothpaste for massaging gums and cleaning teeth.

This Forhan method is so effective *because it not only helps gums to be firmer—thus more able to ward off infection but also cleans dingy teeth to their "natural" brightness. Forhan's actually helps remove acid film that often starts tooth decay.*

Remember that sound, sparkling teeth require firm gums. Help by starting Forhan's and massage *at once!* At drug and department stores. Week-end size at 10¢ stores.

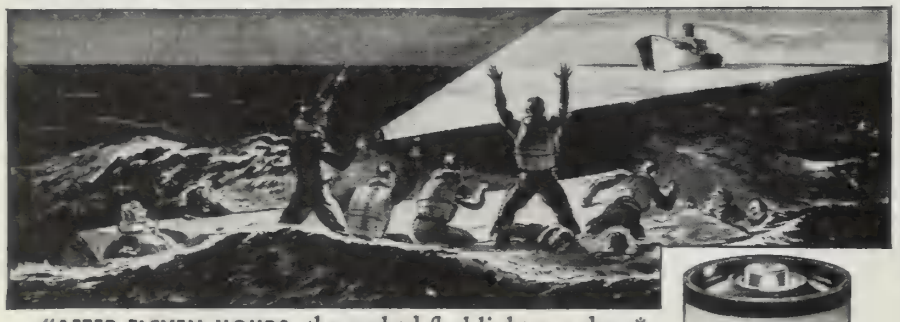
SEE DENTIST EVERY 3 MONTHS

Don't wait until teeth ache. Visit your dentist every 3 months so he can correct malocclusion, keep a close watch for signs of Gingivitis, detect and fill small cavities, and thus save you pain and dental bills.



FOR FIRMER GUMS—"NATURALLY" SPARKLING TEETH

HERO OF "JERVIS BAY" SEA BATTLE TELLS HIS STORY!



A true experience of THOMAS F. DAVISON, *Dover, England, of the hero-ship,* Jervis Bay.

"PROTECTING A BRITISH CONVOY, the merchant cruiser *Jervis Bay* battled a surface raider to the death," writes Mr. Davison. "Ablaze from stem to stern, we were sinking fast. With others, I dove overboard, clutching a flashlight.

"UNDER DEADLY SHRAPNEL fire, fourteen of us managed to board a flimsy raft. For hours, we sat in icy water up to our chests. Huge waves battered us . . . swept us into the sea. Half dead, we crawled back. Three men died of cold or wounds.

"AFTER ELEVEN HOURS, the soaked flashlight saved us.* The Swedish freighter *Stureholm* saw its beam and picked us up. Without those dependable 'Eveready' *fresh* DATED batteries, we would have died miserably.

(*Signed*) *Thomas F. Davison*"

*An "Eveready" Flashlight with "Eveready" batteries, will normally continue to burn under water.

The word "Eveready" is a registered trade-mark of National Carbon Company, Inc.

GRIN

You needn't grin and bear a cough due to a cold. Get Smith Bros. Cough Drops! Just 5¢!

Smith Bros. Cough Drops are the only drops containing VITAMIN A

Vitamin A (Carotene) raises the resistance of mucous membranes of nose and throat to cold infections, when lack of resistance is due to Vitamin A deficiency.

snarled as the German rocketed aloft to lead his numerous flock. "Oh, the nasty, swanking Hun exhibitionist!"

Sir Asher laughed. "Perhaps he won't feel quite so hip-hip-hurrah when he hears the two-o'clock communiqué!"

"Then you don't think they'll try to hush it up, sir? At least, till they've had a chance to liquidate some of the thousands of people who'll start kicking over the applecart as soon as the news comes out?"

"I doubt it. More probably, they'll beat their breasts, raise a great outcry about 'Britain's Jewish assassins' and rend the very ether with their howls."

"Forgetting, of course, what they tried to do to King Haakon. And what they almost did to Their Majesties in Buckingham Palace!"

"Of course! Such is the nature of the beasts!"

LEVIN was silent for a moment. "And then how long," he asked, "how long do you think it will be before it's—it's all ended?"

Sir Asher shrugged. "The Prime Minister looks for complete disintegration within a month. Six weeks at longest."

"And then there'll be peace!" said Levin. "Peace—in six weeks! Oh, sir—wouldn't it be jolly fine if—if we could only be there to see it? I mean, just the first minute of it; that'd be enough! Just so that we'd know we'd really done it! Just the first minute of it, and all six of us sitting around the radio hearing the news come in and—and having a drink together and . . ."

A fringe of dazzling streaks crisscrossed in the air ahead, with a ripping, cracking whiplash sound as though tearing the air apart. Then, from all around, came the chatter of machine guns and the sledge-hammer thud of 37-millimeter cannons. Six B & P Defiants hurtled down into the Messerschmitt formation, their wing guns spitting tracer bullets in silvery sheets, like raindrops in a driving summer sun shower. Just before they vanished, the left wing of one of them seemed to explode and then the whole plane fell to pieces in the air. For perhaps ten seconds more there was firing behind and below. The sound of it died away and the fight was over.

The plane with the painted dragons dived into view, its pilot waving and grinning. Stuck in the corner of his grin was a fat cigar with the band on it. "Hell!" screamed Levin, in fury. "Look—look at the rotten swanker!" The dragon plane wobbled its wings in triumphant farewell and headed toward the coast, taking the formation with it.

"Tail turret, sir!" Baruch's voice was excited. "There're quite a few bullet holes, back here, sir. Are the controls okay?"

"Try your controls, Levin."

The ship responded normally.

"Doesn't seem to be any damage, Baruch. How many of those chaps strafed you?"

"Only one, but he bore down jolly hard! I didn't get him—thank God!"

"Well, damn it, you should have!"

"Yes, sir." There was a peculiar note in the gunner's voice. "I had him squarely in my sights for three or four seconds, but I couldn't shoot. I—I rather think he shot me, though."

"What's that? You mean you're hit?"

"Well, I don't exactly feel anything, that's the funny part of it. But from my waist down, nothing seems to—to be working, sir."

"Belly turret!" Simons' voice broke in. "Baruch's been hit, sir! I can see blood coming out of bullet holes in the floor of the tail turret!"

"Yes, Simons. Baruch! Baruch! Listen to me, Baruch! Feel around inside your clothes and try to find the wound. Plug it with your glove or your handkerchief or your gun rag or- Try to stop the bleeding, 1 hear me, Baruch?"

The answer was cheery ligible.

"Baruch! Tail turret! E Asher shouted. The loud- silent.

"Damn!" Levin groane there was only some way there to him!"

Sir Asher shook his hea the compartments built ir there was no passage; the plosives filled every avail fuselage space.

"Blood's still coming out, reported. "More and more

Levin closed his eyes and and forth, cursing throatily

Marked on the map in red ink were fourteen letters of the alphabet, each indicating a railway depot, a hotel or a government building. He placed the tip of his forefinger on the letter C. He had to bear down rather hard to keep it there. "Well, Levin," he said, "would you care to have a look to refresh your memory, or—?"

"Don't need to, sir. I could find my way to it blindfolded."

More and more frequently they droned over villages and broad estates; then the estates became smaller and fewer and the villages larger, until they turned into towns. Soon the towns ran in together, became one, and below was an endless expanse of houses—the outskirts of Berlin.

"Take her down to a thousand feet." Sir Asher ordered, glancing at the clock.

Save in the parks, the great city was clear of snow; its streets and boulevards were black ribbons along which crawled droves of bicycles and ■ few busses and motorcars.

OVER Charlottenburg they went down to eight hundred. Ahead and to the right lay the Hippodrome and the Zoo and beyond them the Tiergarten. Far down the broad Charlottenburger Chaussee, beyond the lines of trees, they could see the Brandenburger Thor and Unter den Linden. Sir Asher looked at the clock again. His heart was pounding so violently that it hurt. His forearms were icy cold and so was the pit of his stomach. It required ■ conscious effort to breathe. Only once before in his life had he felt as he felt now. That time, he had won the Victoria Cross.

"Take her down to five hundred." Somehow he managed to keep his voice steady.

They flashed over the Brandenburger Platz and down Unter den Linden. "There!" he said suddenly, pointing. "It's that white building! See it?"

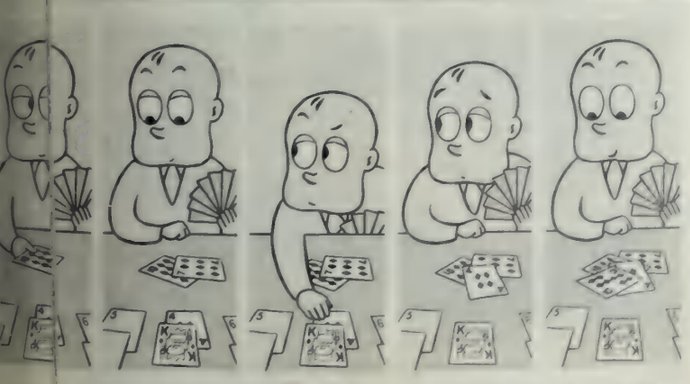
"Yes, sir!"

"See the red carpet on the steps? And the flags? And the guard turned out? And all the cars with motorcycle escorts?"

"Yes, sir!"

"They're driving into the courtyard!"

"Yes, sir!"



"Yes! Well!" He slapped the pilot's shoulder. "Intelligence was right! Right for once! Eh, Levin?"

"Yes, sir! For once!" Levin was savage. "And this once is—enough!"

"Take her up to a thousand feet and then swing back over it." The big plane roared above the housetops in ■ wide, climbing turn. On one of the roofs an old woman stopped beating carpets long enough to wave up at them; from another, a flock of pigeons rose in the noon sunshine like fluttering scraps of paper. And now the plane was heading back.

Levin, gripping his wheel, said, "Now! Now, sir! It's right in line!"

"Good! Head her down! Shove her down, lad! Crash her in the center of the courtyard! Dive her, boy! Steeper! Steeper! Steeper!"

. . . AND HALF DONE ENGINE OVERHAULS WON'T STOP OIL PUMPING!

ALWAYS CHECK ENGINE BEARINGS

It pays to correct oil pumping—to get rid of engine sluggishness, motor-fouling, power-stealing oil waste, and to restore snappy pick-up, clean, money-saving performance.

But be sure you correct oil pumping *where it starts!* Worn connecting rod bearings are often the principal cause of oil pumping because they allow excess oil to foul new piston rings and spark plugs.

Give new rings and plugs a chance to operate efficiently. Tell your service man to check the connecting rod bearings, and if they are worn, to replace with a set of Federal-Mogul Oil-Control Bearings to restore power, pep and economy!

FEDERAL-MOGUL CORP., DETROIT, MICH.

Front Line Against Cancer

Continued from page 21

Meanwhile, Dr. J. J. Bittner was switching baby mice from one mother to another right after birth, and here came a discovery that gives promise of some day eliminating cancer of the breast. If a mouse from a noncancerous mother suckled but 24 hours at the breast of a mouse from the high-cancer strain, it was almost surely doomed. But the babies of high-cancer mothers rarely developed the disease if switched within one day to a low-cancer mother.

One of the most widespread types of cancer has thus been traced back directly and irrefutably to some mysterious, malign element in the mouse mother's milk. What is the element, and is it rendered impotent by freezing, by pasteurization or by other treatment? Does cow's milk have a similar substance? Does human milk? Is the suckling child of a woman whose mother died of breast cancer swallowing some evil chemical that will kill it? No one yet knows.

If human milk is similarly poisoned, breast cancer might be wiped out in a few generations by bottle-feeding babies from families in which breast cancer is prevalent. The problem has baffling ramifications, but the experiments seem at present the most hopeful approach yet discovered to the prevention of one type of cancer—first dividend on an investment in mice.

Major-domo of Mousetown, Dr. Little is also managing director of the American Society for the Control of Cancer, and consultant in genetics of the National Cancer Council.

Dr. Little has been interested in genetics since he raised pet mice, rabbits and guinea pigs as a child. The interest has developed through the years into complete absorption. A big, dynamic individual with tremendous enthusiasms and a magnificent Harvard accent, Little never let dreary academic affairs keep him from his animals. As president of the University of Maine, he set up a mouse genetics laboratory next to his office, and when he moved to the University of Michigan his mice went along. When he resigned as Michigan president in 1929, he renounced the scholastic world in favor of mice, whose behavior seemed to him more rational, and in the present state of affairs perhaps even more important, since through mice he hoped to get a better understanding of men.

Twelve Years of Progress

While he was still at Michigan, Little had interested Roscoe B. Jackson, then president of the Hudson Motor Company, in the idea of a laboratory for cancer research.

Shortly after Little left Michigan, construction began—and Jackson died. His family and several of his friends completed the building as a memorial, and other contributors chipped in enough to equip it, so in the fall of 1929 the laboratory opened its doors.

Before the first mice were grandmothers, the depression blew across the land. With no endowment, and subscriptions reduced to a minimum, the laboratory repeatedly seemed ready to fold. For nearly two years the staff worked only half-time—the other half it spent fishing, hunting, gardening, canning and otherwise scraping together sufficient food for existence.

After the dark days of the early 1930's things looked up considerably. In 1937 the Rockefeller Foundation was so much impressed with the progress made that it granted $40,000 to enlarge the laboratory. Now the laboratory gets some $50,000 a year. Half of it has to come from solicited miscellaneous donations, the other half from selling its altogether unique standardized mice. Ten thousand mice are shipped out every month from Mousetown to go to other laboratories.

In such an improved, though still precarious financial state, the laboratory is approaching the cancer secret from all sides. And one of its big accomplishments is confirmation of the theory, long suspected but never heretofore proved, that cancer is not one disease, but many. It is not a unity, and many factors must be considered in attempting to blot it out—heredity, sex hormones, diet, sunlight, vitamins and others.

When Cells Go Wild

The only apparent bond between the different types of cancer is that they all result from a breakdown in the adult body of the powerful forces that limit growth.

The stimuli which make cells go wild vary in different strains of inbred mice, and the ability of such cells to grow without limit depends upon the hereditary background of the mice in which they arise and grow. The laboratory has transplanted flourishing tumors from mice of one strain to mice of another, and the tumors have died; but transplanted to a third strain, they have continued to flourish.

r pen ated, all the most ven-
omous snakes and insects you ever heard of, incredibly fertile lowlands and grazing upland pastures and, besides gold and petroleum, nearly all the known precious and rare minerals, but in what extent geologists can only guess.

Quite a land! Yet only as many people live in the whole of it as in Osaka, Chicago or Shanghai. Lopez Contreras wants settlers, and the founding of colonies of Nordic as well as of European Latin immigrants is among his plans.

People are wealth, in the Contreras vision. People who can farm, or who have trained and skilled hands for the development of industries that can redeem Venezuela from sole dependence upon the one crop of oil. The presidente can easily imagine that fearful day which alarmists warn of when a slump in the world's petroleum market might shunt his country back overnight into the malaria and peonage and hopelessness of the preoil times.

For Venezuela is an "oil civilization." Petroleum comprises virtually one hundred per cent of her export trade with the outside world. Before the exploitation of her oil she was a roadless, scarcely known land, from which the usual news was of revolutions and killings and incredible graft, with every man's hand in the national till to a depth governed not at all by morals but entirely by opportunity.

The "Blessings" of Civilization

Without oil Venezuela would amount to nothing—unless one of her other now untouched resources was exploited. In a sense, Venezuela is cursed by her natural riches; she is one of those countries whose equatorial climate imposes lethargy on its people and whose fetid jungles present health risks. Follow the equator the world around and you find such lands. Perhaps they would be happier if left to their primitive society and economy. But they have what the hardy, energetic, aggressive men of moderate climes need for their industries and for their pursuit of wealth and power.

So, only a quarter of a century ago, the lean, tanned men of Oklahoma and Texas—men who have pitch instead of blood in their veins, divining rods for brains, magnetometers for eyes—reached Venezuela to verify the plenitude of her oil, which had been suspected from colonial times. At their backs rode the flood of American capital, together with some Dutch and British, that was to rehabilitate the oft-looted treasury of the country and give to some of her people, at least, a new standard of living.

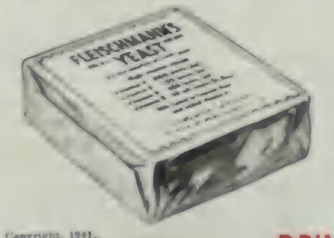
The chief vice is that pastoral simplicity has been destroyed. The oil companies pay a comparatively high wage—a minimum of eight bolivars, about two dollars per day at current exchange, to unskilled field workers—to men who heretofore barely scratched a few pennies from the soil, but who raised enough to feed themselves, had no fuel problem and got along with one pair of pants for a lifetime. There was a grievously dangerous shift of population from agriculture to the oil camps. Men of employable age got jobs and hordes of relatives quit all else to live on them. Venezuelan economists insist the rate is sometimes as high as twenty—minors, incapacitated, aged and just lazy—workless people living on one working man. Divide the two dollars a day by twenty or ten or even five and it isn't so much. Again, the oil companies provide housing for their employees that is in such contrast to the hovels of those who

You'll like yeast  this new way

HENRY: How come so much pep? Been eating yeast again?
SUE: No . . . drinking Fleischmann's Yeast in tomato juice, the quick, delicious way.

HENRY: I was a faithful yeast-eater once, like millions of other people, and I never felt better in my life! But I didn't like the taste.
SUE: It's easy to stay with it now. Yeast in tomato juice is wonderful. Gives it that oven-fresh bread flavor. Twice a day is my motto! And I *know* that's the best way to get all the benefits of yeast. That's how I get that on-top-of-the-world feeling!

HENRY: I guess they've proved that yeast is one of the richest natural sources of the amazing vitamin B complex. Maybe I ought to take it up again.
SUE: Best idea you ever had. Drink it first thing in the morning, last thing at night . . . and keep it up. And don't be surprised if you begin to feel like a million!



MASH . . . Take a cold cake of Fleischmann's Fresh Yeast and mash it in a dry glass with a fork.

STIR . . . Add a little cold tomato juice, milk or water. Stir till blended. Then fill glass. Stir again and . . .

DRINK your yeast this delicious, easy way. It's quick, too . . . whole business takes less than a minute!

Fleischmann's Fresh Yeast

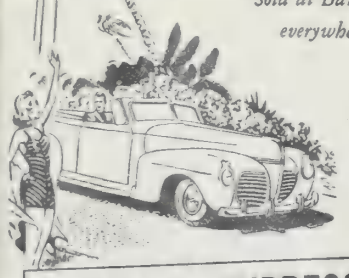
DRINK IT . . . TO YOUR HEALTH!

PERHAPS IT'S YOUR TOBACCO— NOT YOUR PIPE

ARE YOU ONE of those pipe smokers who envy the pleasure other men get from their pet briars?

IF YOU COULD attend the tobacco auctions and see some grades of leaf tobacco often selling for *10 times as much* as other grades—you would realize the tremendous differences in tobacco *quality*.

SINCE 1903 Edgeworth has bought only the finest and most expensive tobacco grown. Our "books" over the past 10 years show that we have paid 43.69% higher for Edgeworth leaf than the market average.



SO WHY BE SATISFIED with ordinary tobacco—when a 15-cent pocket tin or pouch of Edgeworth gives you more real smoking enjoyment?

Try Generous Sample—At Our Expense

If you haven't yet found "the perfect pipe tobacco," write to Larus & Brother Company, 202 South 22nd St., Richmond, Virginia—and we'll send you, AT OUR EXPENSE, a generous sample of Edgeworth Ready Rubbed—America's Finest Pipe Tobacco.

SAFETY FIRST... FOR VACATION FUNDS!

If you lose your travel money... you spoil your winter trip. Take the precaution of changing cash into American Express Travelers Cheques. They safeguard against theft or loss, are spendable wherever travelers go. In denominations of $10, $20, $50 and $100 at a cost of 75¢ per $100. *Sold at Banks everywhere.*

AMERICAN EXPRESS TRAVELERS CHEQUES

1891—Fifty Years of Unbroken Service—1941

do not work for them, or do not possess relatives who work for them, that jealousy and discontent spread over the surrounding countryside.

All this, furthermore, makes it difficult for small local industries either to be established or developed, because they are unable to compete with oil wages and housing.

There is the other side. It is true the oil companies have taken profits from Venezuela. It is equally true they have given back generously, sometimes beyond requirements of the Venezuelan laws. It is finally true, and perhaps this is most important, that the oil companies realize the disturbance they have caused to the social and economic structure of the country, and within the last decade have inaugurated measures that have them striving hand in fist with the welfare and diversification aims of Lopez Contreras.

The exploitation of oil resources in a jungle country like Venezuela is a gamble beset with difficulties. It takes means and experience beyond those of the owners of the land. Single oil companies have spent as much as $30,000,000 here before bringing a field to a profitable basis. Some have spent as much and got no more than a collection of dry holes for their pains.

Health and sanitation formed an expensive initial problem for oil companies in Venezuela, as they did for Gorgas at the Canal. Find a nest of derricks in the green wilderness, and you'll find a modern hospital. You'll find schools, too. Primary schools, trade schools — because the oil companies know the children of their workers are the workers of tomorrow. The big American oil companies select bright youngsters for training as teachers in the University of Caracas, or as engineers or doctors of medicine at colleges in the United States. Moreover, they maintain vocational schools in which agricultural pursuits are taught to counteract the rush from the furrows to the drillings.

The Man Venezuela Can't Forget

All this makes you wonder at the austerity of the Venezuelan man in the street, which most visitors find so pronounced in contrast with the affability, good cheer and friendliness of other South Americans. Wonder, that is, until you remember Gomez!

Juan Vicente Garcia Chacon—or Gomez, as he called himself, after the good-natured Andean farmer who was not his real father, but his mother's paramour—you remember, was the ignorant bandit *mestizo* who rode down out of the mountains and fought his way to Castro's right hand, then, when Castro was absent from the country, declared himself boss and for nearly thirty years ruled like an ancient Oriental potentate, treated the whole of Venezuela as his private property, called himself "El Benemerito," the well-deserving, and shut the country away from the world in tyranny, death and horror. He died in 1935 at eighty, unmarried, but leaving more than a hundred children—and a populace who didn't believe it was possible he was gone.

From bloody despotism to freedom overnight can't be taken in stride. There are many humble Venezuelans who still believe there is a catch in it. They have had little to be happy about in their lifetimes; much reason to be suspicious, morbid, furtive. The very walls of their homes had ears until only yesterday. Always there were the threats of ankle irons, of dungeons into which men were flung never to be seen again. You wouldn't be so darn' cheerful or friendly, either, if you had lived thus for most of your days.

One problem Lopez Contreras' government hasn't yet solved is the high cost of living. A bulging treasury, a national one-crop economy and a failure to raise any of its living necessities make a bad combination. Forced to buy virtually every bite it eats, every stitch it wears and most other daily needs abroad, with no native handiwork or folk culture, Venezuela has to exalt and rigidly control its foreign exchange.

Lopez Contreras evidently sees a way toward salvation in continued good relations with the foreign oil companies, recognition of hemisphere and world value of Venezuela's greatest resource—but with a concurrent, determined, earnest campaign to get the droves who are now little better than parasites on the oil-company workers back to useful knowledge and production of the land. Expropriation is never in prospect down here; although give and take with respect to the labor and lease laws, minor bickerings with occasional heartburn on both sides, continues.

Lopez Contreras believes that if his country reaches a balanced economy, gets full values from its fertile topsoil as well as from its rich subsoil, it can eventually support a population ten times as large as its present one—and many times happier. So he turns the huge royalty profits, which the oil companies now annually pay his government, back into public works—into schools, irrigation and highways in the farming districts where the oil-camp benefits do not reach directly.

Most notable, he has cleansed all traces of Gomez, his former boss, from Venezuela; and thrown out all the Gomecistas. He has ended the petty graft for which Venezuelan officials, both at home and in the consular system abroad, were notorious. His term of office—sternly fixed by himself at five years for any presidente—is up in April. The cynical die-hards are waiting to see whether he will actually step down and permit a free selection of his successor. If he goes so completely against the grain, history and tradition of Venezuelan politicos—it will be his greatest contribution to safety, order, decency and good faith in our hemisphere. And the lowliest and the highest among Venezuelans will believe at last in miracles—and be persuaded that perhaps democracy is here to stay.

From all this, you perceive that whatever happens in Venezuela—today, this spring, or in the years to come—will always be of vital impo[rtance to t]he defense and the prep[aredness] United States and ou[r sister la]w the Americas. At least [or as long] age of mechanized wa[r lasts in] history. Chiefly becau[se the "tw]o navy" and "the 50,000 [planes" a]nd which have been set f[orth as ou]r mum program, can be [more sound]y effectively realized wi[th the co]n tion and friendship of [Venezuela].

It's More Than Courtesy

It is true that in the [United Sta]tes have three fifths of t[he world's] eries, and that we n[eed to have] these at only three-qua[rters capa]city maintain present dom[estic air] trade. But the servici[ng, trans]oceanic routine operations in[to or ov]er the air armada we h[ave under] necessary to our place [in world] to make our hemisph[ere secure] the wild-mushroom gr[owth of] tional air commerce—[essential] express and freight—[which] leaders hold inevitable[after the] will burn up incalculab[le quan]tities high-octane gasoline. [Already] jor oil companies are [constructing] plants for its refining.

The United States [navy has] modernized from batt[leship] sweeper. You'd as lik[ely find a] burner in a navy yar[d today] would find at La Guard[ia Airport] falo robe of the sort [our grandmother] tucked around your gra[ndfather] went sparkin' in a bugg[y. Across the] dreds of new vessels of [the type] "two-ocean navy"; th[e first of the two] oil that will pass thro[ugh naval] ers and Diesels becom[e obsolescent] astronomers to figure. [Constantly ex]pansion, contemplated o[r actually under] way, of the military e[stablishment] air, naval and land—[almost] South American republ[ics will add] the burden and responsi[bility upon] hemisphere's oil resour[ces, tackage] of numerals onto its tot[al equipment] of the life stream of war.

Sympathy, friendlines[s and a reach] hand toward Venezuela [in her struggle] along the hard road back [from the dark]ness of Gomez to the lig[ht of Courtesy] thus becomes more tha[n a matter of] common courtesy.

For Venezuela plainly [is one of the] major aces in the sleeve [of the Western] curity and power.

"Tell that native boy he shouldn't feel indebted to us just because we threw him a silver dollar!"

Here is one of the Globe Trotters' acts: After a furious burst of passing the colored boys will set the ball down on the floor and simply walk away. The opposition is too stupefied by the wonders they have witnessed to pick up the ball. The other side does not come out of the ether until the Globe Trotters put the ball in play again.

Inman Jackson's favorite gag is bewildering an individual opponent so outrageously with pantomime passes that he can place the ball atop the man's head and make him believe it has vanished into thin air. Shooting craps and playing cards during a game is a simple stunt. Only two Globe Trotters are involved; the other three can hypnotize five opponents with the greatest of ease. Babe Pressley puts so much backspin on the ball that he can throw a bounce pass across the court to an enemy player—and make the ball return to him as if it were an educated boomerang.

The Globe Trotters are good at all games. If they are in a town owning a minor-league pennant, it is no trouble at all to whip up a baseball act in pantomime. A few years ago they made a barnstorming tour playing against a basketball team composed of Minnesota football stars of recent vintage. In the party were such glamor boys of the gridiron as Ed Widseth, Tuffy Thompson, Bud Swenson, George Roscoe, Jules Alfonse and Dick Seebach, the basketball captain. Emphasizing the football motif, the Globe Trotters pulled authentic lateral- and forward-pass plays all over the place. At Mankato, Minnesota, Bernie Price achieved the incredible stunt of standing at one end of the court and drop-kicking the big ball through the small basket seventy feet distant.

The Globe Trotters range in size from 6-foot, 1½-inch Sonny Boswell, the team midget, to Ted Strong, who is 214 pounds and 6 feet, 4 inches on the hoof. All the players have huge hands which enable them to manipulate a basketball as artfully as a prestidigitator palms coins. This, too, attracts the clients, especially in rural districts where farmers develop and are proud of their oversized mitts. Someone usually goes to the dressing room after a game played in farm country and demands that Strong measure hands with him, palm up against the wall. Strong never has been topped in a show of hands. A country cousin occasionally has a broader pair of hooks, but he never has encountered anyone with a longer hand.

Strictly No Rough Stuff

They play college rules almost exclusively, another—and the most important—Saperstein innovation. Under professional rules, basketball is a crashing (*sic*) bore, especially since the college game has been hopped up. A pro who attempts to score a goal under the basket lays his life on the line, for fouls are not awarded unless the victim is bleeding profusely. Many pros have been pounding the hardwood floor for a decade or more, and after all these years their dogs bark indignant protest when the ancient athletes try to match the furious, racehorse pace the college boys offer the public. The result, of course, is a dreary routine of mauling, wrestling and shoving, relieved occasionally by long shots from mid-court which, although spectacular, become pretty monotonous with repetition.

The Globe Trotters are not much older than the average college team. They can put on the squirrel-cage business the public wants and, above all, they

YOU CAN'T CLEAN FALSE TEETH

with inefficient, makeshift methods

Dentists say PLAY SAFE—USE POLIDENT
Cleans Without Brushing, Ends "Denture Breath"

In the tiny crevices of plates and bridges, food debris collects and decays. A tough, dingy, almost invisible film absorbs germs and impurities . . . gives teeth a discolored, more noticeably *artificial* look . . . causes that vile mouth odor, "Denture Breath."

Mouth washes, ordinary pastes or powders are *not designed* to clean and purify false teeth! Household cleansers can ruin your plate! No brush can reach the danger-spots!

That's why leading dentists everywhere recommend POLIDENT . . . the revolutionary cleanser that *dissolves* away all film, stain, tarnish, odor *without brushing, acid or danger*. POLIDENT purifies every tiny crevice, makes plates and bridges *look* better, *feel* better. Leaves breath sweeter, purer.

Tens of thousands call POLIDENT a blessing. Long-lasting can 30¢ all drug stores—*money back if not delighted.*

Hudson Products, Inc., 220 W. 19th St., New York

POLIDENT

Cleans and Purifies **Without Brushing**

Do this daily: Add a little Polident powder to half a glass of water. Stir. Then put in plate or bridge for 10 to 15 minutes. Rinse—and it's ready to use.

UNION MADE

play clean basketball. They had twenty-seven games with white college teams last year and they've been invited to play return engagements with every one this winter. Our caste system being what it is, authorities would be quick to resent the slightest suggestion of rough-house stuff pulled by the Negroes, and the customers probably would stage a lovely riot. The Globe Trotters never have been involved in an ugly incident and they've never lost to a college team.

A few years ago they played a double-header for the Minneapolis Milk Fund, meeting Augsburg College in the first game and, after a five-minute intermission, Hamline University in the second affair. The Globe Trotters used the same five men in winning both games and did not have a player put out for exceeding his quota of four personal fouls.

Since there are few Negroes in college basketball, the acquisition of fresh talent is a peculiar problem confronting Saperstein. One of his scouts, Fritz Pollard, the old Brown University All-America halfback, prowls through the East looking for likely colored candidates; DeHart Hubbard, former Olympic broad-jump champion, recommends players from Ohio and the vicinity, and Leon Wheeler protects Saperstein's interests in the Detroit district. A rookie Globe Trotter gets a minimum of $150 a month, plus expenses, and the salaries are scaled to the $300 a month received by Inman Jackson, the star stunt man. Saperstein says his basketball players make more money than any other Negro athletes with the exception of the better boxers.

He should know. A small, volatile party out of Whitechapel, London, Saperstein migrated to Chicago in 1906 when he was four years old and presently became celebrated as the Mike Jacobs of Negro sport. He is the Judge Landis without portfolio of the Negro American Baseball League, a thriving organization in the Middle West which drew 40,000 admissions at Comiskey Park two years ago for an East-West game.

Anything for a Buck

Saperstein has imported ball teams from Puerto Rico, Cuba and the British West Indies. Among other things, he owns the Hong Wah-Kues, an all-Chinese basketball team from San Francisco, and the Brown Bombers, the best Negro professional football team. He also handles Joe Law, a promising featherweight, and Sir Oliver Bibbs, who gives out with the music which makes swing addicts tear down buildings.

Saperstein can smell a good attraction and an honest dollar halfway across the continent. On July 4, 1938, he put a colored charity over the top by matching Joe Louis against Jesse Owens, winner of three Olympic championships at Berlin, in a fifty-yard dash. Louis won the race—running backward while Owens hopped along on his hands and knees. Saperstein even made money with such a dreadfully dreary event as foul-shooting. He promoted Bunny Leavitt, the world free-throw champion who stood on the foul line for seven and a half hours and made 871 free throws at a national Y.M.C.A. sports carnival in Chicago on April 9, 1936. Leavitt caged 372 throws in succession, missed one, then put 499 consecutive shots through the hoop for the official record.

But Saperstein always has been a basketball bug and the Globe Trotters are his particular pride and joy.

"Not because they've made me money, you understand," he adds hastily. "The team is my baby because it's helping to disprove a lie everybody believes about a persecuted race. I come from a persecuted pe... know what it means.

Schoolboy Walker

Continued from page 20

feet ten and had his dad's hair and eyes. His shoulders were sloped and he didn't have any waistline at all. I imagine Barney looked a lot like that when he was a kid.

When I got in the ring with Tommy and Nylen, Nylen was sore. "I'm payin' this kid by the round," he said. "Get out of here until I'm finished with him."

"This is Barney Walker's kid and nobody's payin' him." I was getting sore too. "I want him to change his stance. Listen." I turned to Tommy. "Stand up straight. You aren't built right to fight in a crouch. Stand up straight and leave your left foot flat. That's it. Now bend your right knee and lift your right heel off the mat. Now put out your left hand in a natural position and cock your right mitt over your heart," I says. I guess I've given that speech to at least five hundred kids.

They worked one more round and Nylen didn't knock Tommy down any more. Tommy didn't do much better, but he looked more like a pug. Wednesday night Barney called up from the city. He wanted to talk to the kid so I left the room.

I went for a walk down the dirt road that ran from our cabin over to the lodge. I was gone about an hour. When I came back into the cabin the kid was reading a storybook. When I sat down in front of the fire, he put down the book.

"How long have you been in the fight business?" he asks.

"Oh, about all my life," I says.

"What's the most fun you experienced during your days as a boxer?" Tommy asked. He was sitting crossways in a big overstuffed chair with his feet up in the air. He wore sporty-looking shoes like you see in the movies.

"The most fun I got out of the ring was traveling. I fought in Australia, London, South Africa, down in Rio and all over the world. I never got to Ireland."

"That must be great fun." Tommy was looking at the ceiling. He smiled. "Maybe you'll get to travel again, Pop, if I get going good."

I coughed and sat up. "It's about bedtime, isn't it?" I stood up and walked across to the radio. Just before I turned it on I said, "What do you want to be a fighter for, anyway?"

"Why do you ask?"

"Well, your old man has plenty of dough. He can buy you anything you want."

Tommy put his feet down on the floor and looked at me inquisitively. "Father didn't hire you to say that, did he?"

Right away I seen the kid was smarter than the old man and me too, both put together. "No, he wants you to be a fighter, doesn't he?"

The kid didn't answer, but picked up his book, like he was sore, and started to read again.

NYLEN wanted the kid to box with him the next day, but I wouldn't let him. "He's not ready for you, Nylen, but some day he'll take you," I said, smiling. I didn't want Jack to get mad. I didn't want him to mess the kid up either.

I made Tommy work on the big bag all afternoon. I taught him how to jab with his left. You can punch hard that way by shoving off your right toe with every poke. It gives your jab a snap and the kid caught on right away. I put the gloves on with him for a couple rounds just before he took his shower and he was beginning to get real graceful-like in his movements.

That night the kid was real talkative. He got me started again and before I knew it we were both sitting on the floor, in front of the fire, shooting the bull.

"Did you ever know Dempsey?" he asked.

"I've watched him work lots," I said. "He did everything perfect. He could jab with his left and had a right cross that could poke a hole in a battleship. There was only one thing wrong with the Manassa Mauler. He was a killer. When he was working out he'd slug you or me or anybody just to see 'em fall."

"Like Nylen?" he asked.

"Yah, just like Nylen."

IN THE morning we ran four miles. Tommy could have run four more, I believe. He sure had the wind. That afternoon he worked with one of Nylen's sparring partners and jabbed pretty good.

He ought to have a right hand, too, I thought, before he climbs in there with the Sailor. Of course, he didn't know he was going to fight Sailor Adams. He thought he was fighting a guy named Joe Broze. I put him on the big bag again.

"After you get in your jab," I said, "you may have Broze off balance. If you do, swing your right like this." The first right-hand punch I teach is throwing the right fist on an arc with the elbow locked. I taught him how to drop his right shoulder and swing his arm through. Before we were through, Tommy was almost tearing the bag off the wall.

That night we walked down to the picture show. After the show we went over to the drugstore and got a soda. We were sitting at the counter when the kid saw a placard on the cigar counter. It was one of Mike's signs from the stadium. First fight listed was the curtain raiser. "Professional Debut," it said over Tommy's name, and underneath it was "Former intercollegiate champion versus Joe Broze, another newcomer." *Another newcomer!* That was a big laugh to me.

We walked over to the lodge. Tommy was in good spirits and wanted to talk. "When I'm champion we'll go on a tour of the world," he says. "We'll fight in England, Australia and even Ireland, maybe, if they got anybody good enough."

There was a piano in the lounge room. Three old ladies were in the lounge, but nobody else. Tommy sat down at the piano and played it real soft so as not to disturb anybody. Gosh almighty, he was good on that thing! He played real pretty music, stuff I hadn't heard before, but it sure was pretty. I began to think his dad was right. The kid had too much education to waste it being a beakbuster.

On the way home I said, "What does your mom think about your being a fighter?"

"She doesn't say much. I don't think she'd mind. She never interfered with Dad's affairs. He's done a lot worse than—" He stopped. It was the first time either of us had referred to his old man's business.

"You sure can play the piano," I said. "Why don't you do that instead of fighting? You'll get your fingers so jammed up you won't be able to tickle those keys."

He never answered. He just kept quiet and didn't say another word to me that night.

The next day I let him work two short

TRY FOR AN *Art* SCHOLARSHIP

Copy this girl and send us your drawing — perhaps you'll win a COMPLETE FEDERAL COURSE FREE! This contest is for amateurs, so if you like to draw do not hesitate to enter.

Prizes for Five Best Drawings — FIVE COMPLETE ART COURSES FREE, including drawing outfits. (Value of each course, $185.00.)

FREE! Each contestant whose drawing shows sufficient merit will receive a grading and advice as to whether he or she has, in our estimation, artistic talent worth developing.

Nowadays design and color play an important part in the sale of almost everything. Therefore the artist, who designs merchandise or illustrates advertising has become a real factor in modern industry. Machines can never displace him. Many Federal students, both men and girls who are now commercial designers or illustrators capable of earning up to $5000 yearly have been trained by the Federal Course. Here's a splendid opportunity to test your talent. Read the rules and send your drawing to the address below.

RULES: This contest open only to amateurs, 16 years old or more. Professional commercial artists and Federal students are not eligible. 1. Make drawing of girl 4½ inches high, on paper 6½ inches high. Draw only the girl, not the lettering. 2. Use only pencil or pen. 3. No drawings will be returned. 4. Print your name, address town, county, state, age and occupation on back of drawing. 5. All drawings must be received by Feb. 28th, 1941. Prizes will be awarded for drawings best in proportion and neatness by Federal Schools Faculty.

rounds with Nylen and it made him talkative again. He got over being sore and gave Nylen a nice workout. He didn't hit Jack once, but he pushed him and made him step away.

We were listening to a radio program the next night and he spoke right in the middle of it as if he hadn't been paying any attention to a thing that was going on. "What's the difference between a right hook and a right cross?"

The most interesting thing in the world to me for bull sessions is to talk about the fine points of the prize ring, what sports writers call technicalities. I forgot all about my promises to Barney and started right in talking:

"A right hook is delivered inside the opponent's left arm. A cross comes over it or under it, either way." I stood up. Tommy jumped up in front of me and turned off the radio. He was a good-looking kid standing there in his pajamas and a pair of sheepskin slippers. As he stood there listening to me and providing a target with his chin and arms for my slow-motion examples of hooks and crosses, I thought a thousand times, "I wish he was my kid."

A FEW days later, when he was boxing with a fighter in Nylen's camp, I knew I'd better quit teaching. He was beginning to savvy and knocked the guy down once.

That night I got a long-distance call from Barney. "What's the matter, Pop, ain't I paying you enough?"

"Sure," I said, "why?"

"Well then, why are you betting?"

"I'm not," I said.

"Well, somebody is playing smart guy." Barney was excited again. I hate to talk to him when he's excited like that. "There's a ten-thousand-dollar bet posted at the Tavern for ten-to-one odds that Broze beats Tommy."

"Well, it ain't me, Barney," I said.

He hung up and was plenty sore, I could tell. The telephone was in the front room. Tommy was sitting there and wanted to know what it was all about. "Nothing," I said, "your dad was talking to me about some other business we've got."

Tommy didn't answer, but got up and walked outside. I went to the door and he was going down the road toward the lodge. In a few minutes I called the desk at the lodge and asked them if Tommy was there. They said he was playing the piano.

The next day he was listless. We ran about two miles and stopped in the shade to shadowbox. He danced in the road and punched at the air for four rounds. He didn't say much at dinner. In the late afternoon we went over to Nylen's. A rainstorm blew up and the boys had to work inside.

Nylen asked Tommy to work with him and Tommy asked me if it would be okay. They stepped two rounds at a fast clip and both broke a good sweat. They were working with head guards on and Nylen was wearing heavy wraps. Tommy was down to a hundred and forty-five already so I let him go in a pair of trunks. After two rounds Nylen asked Tommy to go two more. Tommy came over and asked me. I was glad he was listening to me now and not trying to run his own training program.

"Okay for two more," I said, "but take it easy with him, Jack."

Jack didn't pay any attention to me. He already had his mind made up to slug Tommy, and did, in the next round. He caught the kid off balance and let him have it with a Sunday. Tommy dropped like a sack of wheat. He lay there all crumpled up and I started to climb in the ring. "You dirty bum!" I hollered. "I said take it easy, didn't I? What do you think this is?"

Jack walked up like he was going to put the slug on me too. Tommy got up and was standing bes[t] me [b]
knew it.

"It's okay, Pop," To[m]my [s]
guy couldn't hurt a fly [H]e [j]

hy id at your dad?"

"For sending me out there with Sailor Adams."

"Who said Sailor Adams?"

"I know Sailor Adams when I see him. Don't I read every fight magazine that's printed?"

The call boy stuck his head in the door. "Ready for the curtain raiser, Schoolboy Walker."

Walker looked at him and grinned. He got up and danced toward the door. As he reached to open the door, I held it closed with my foot.

"Listen," I said, "before you go out there, I want you to know I ain't had no part in this. I think you're a good kid and I don't see why your old man won't let you do what you want."

"He was a fighter himself once," Tommy says. "He broke his hands and had to quit."

"Yah," I says, "he broke his hands." He didn't say anything.

"Don't get sore at me no more," I says, "but why the heck do you want to fight?"

"Just something about it," he says. "I like the smell of leather when it's wet. I like the feel of canvas under my feet. I like the roar of the crowd. I like to hit a man and watch him fall to the floor."

"Well, you sure picked a tough guy to start with. You're liable to find out what it looks like from the floor up."

I OPENED the door and we started for the aisle. A few bystanders in the aisle entrance looked around at the kid. I knew he was going to get that handsome face busted in a few minutes, and I wished there was some way to get him out of it. But there wasn't anything I could do.

The crowd was still coming in the stadium when we walked down the aisle. As we reached the ring, the band started to play. It sent little goose pimples all over me. I saw Barney in the third row. Pete was sitting beside him, with his hand in his coat pocket. I jumped into the ring and parted the ropes with my foot and hands. Nobody cheered when Tommy crawled through the ropes.

"It won't be like this forever," Tommy said. "We'll be fighting mains pretty quick."

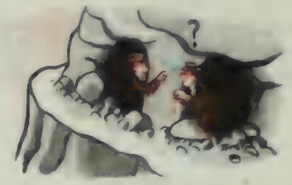
Sailor came over and looked at Tommy's wraps. He leaned over the ropes and waved to Tommy's dad. Sailor had on a big sweater that made him look tough. When he waved to Barney, Tommy said, "Know the old man, eh, Sailor?"

Sailor looked over his shoulder at

"When it gets burning well, I just shovel it into the furnace"

I am now stuck with a cave!

I USED TO LIVE in a house like everybody else.



It was a nice house with rugs on the floor and chairs to sit in—and my friends liked it so well they used to come around for a drink every night.

They told all their friends, too. Pretty soon I was entertaining like a Maharajah. And since I didn't know about M&M, I'd just sit there, and then be haunted by dollar signs all night.

I finally decided to go into hiding, and a rental agent found me this cave. He said it was the best cave in the county, so I boarded up my house and paid a year's rent in advance.

Now I am sorry. A couple months after I moved in, the man in the cave next door told me about M & M whiskey. He said it was far less expensive than the whiskey I had been using, but that he'd bet his shirt it tasted better.

I tried it. It tasted better all right. A lot better. In fact, it's a wonderful whiskey. And it costs so little that I can afford to serve it to all my friends.

I would like to, very much. But my friends will not come to visit me in my cave. They say it gives them rheumatism.

So I am planning to move back to my house in April and serve M & M to my friends. I am trying hard to rent my cave. Any bidders?

Mattingly & Moore

BLENDED WHISKEY—86 proof—72½% grain neutral spirits.
Frankfort Distilleries, Inc., Louisville & Baltimore.

Plagued by Aching COLD WEATHER JOINTS?

Here's *Speedy* Relief!

Don't let bitter winter weather make you suffer the agony of stiff, grinding "cold-weather joints"! Absorbine Jr. soothes and eases that soreness away—helps nature relieve that excruciating pain promptly!

Under normal conditions, lubricating fluid is fed into the joints by tiny blood vessels. But these vessels constrict in extreme cold and the supply of fluid slacks off. Your joints swell, stiffen and hurt!

Rub those joints with Absorbine Jr. It speeds the flow of blood—increases the supply of lubricating fluids. Soon your joints are glowing with relief! Don't dread winter! Keep Absorbine Jr. handy. At all druggists. $1.25 a bottle. Write W. F. Young, Inc., 201B Lyman St., Springfield, Mass., for free sample.

FAMOUS also for relieving Athlete's Foot, Strains, Bruises

ABSORBINE JR.

WM. F. VICTOR MANAGER

Tired Kidneys Often Bring Sleepless Nights

Doctors say your kidneys contain 15 miles of tiny tubes or filters which help to purify the blood and keep you healthy. When they get tired and don't work right in the daytime, many people have to get up nights. Don't neglect this condition and lose valuable, restful sleep.

When disorder of kidney function permits poisonous matter to remain in your blood, it may also cause nagging backache, rheumatic pains, leg pains, loss of pep and energy, swelling, puffiness under the eyes, headaches and dizziness.

Don't wait! Ask your druggist for Doan's Pills, used successfully by millions for over 40 years. They give happy relief and will help the 15 miles of kidney tubes flush out poisonous waste from your blood. Get Doan's Pills.

Tommy. "You're pretty smart for a schoolboy."

"My teacher thinks so."

In the center of the ring they took short instructions from the referee. Then they were back in their corners. I was as nervous as a cat. Tommy crossed himself when I pulled off his robe. Somebody cut the house lights. I kicked Tommy's stool out of his corner. The bell rang.

Tommy came out slowly and Sailor met him with a rush. He hit Tommy on the side of the head and knocked him flatter than a pancake, right off the bat. Tommy got up at three and I was hollering at him to take nine. Tommy's old man was smiling.

Tommy made Sailor miss his next few heavy shots. Then Tommy sneaked over a smoking right that landed on Adams' cheek. Sailor cussed and charged in. Tommy met him with a jab and drew blood from Adams' nose. Sailor roared and charged again. Tommy jabbed him away. Tommy was beginning to box smoothly. He moved in and out with Sailor's rushes and made him miss. The bell rang with them in mid-ring, Sailor on the offensive and Tommy jabbing.

I knew if he could keep jabbing Sailor off he might last the limit. What I was afraid of was that Tommy would lose his head and slug with Sailor. His dad ran up to the ring. "Get in there and slug with him, Tommy," he said.

"Go to hell," Tommy said. He wouldn't look at his dad.

WHEN the second round started I went back to where Barney was sitting. "He knows it's Sailor Adams," I said. "He recognized his puss by his pictures."

His dad shook his head, but didn't answer.

Tommy kept up the jabbing in the second round. He was pecking away with his left and moving in and out with the Sailor's rushes. He had the Sailor bleeding in the eyes and nose with that cat's-paw left. If I could just have him for a year, I thought. Just one year with that kid and I'd make him champion. He didn't know how to roll and spar. He didn't know how to work a man off balance and let him have it. He didn't have a chance tonight with the Sailor. But what if he didn't? The Sailor was a main-eventer from Madison Square Garden.

Tommy got careless about midway in the second round and Adams caught him right on the kisser. Down he went, but he bounced up without taking a count. He clinched with Adams and laughed in his face. "Getting old, aren't you, Sailor?" I heard him say in the clinch. Boy, how that kid could take it!

Between rounds I told him to start using the right. "You lost both rounds by those knockdowns," I said. "Are you pooped?"

"I'm not pooped. I don't even need the towel."

"Try out that right, Tommy. You can't win with it in your pocket."

Tommy moved out slowly for the start of the third. He was rolling his shoulders and watching Sailor's chin. Then Sailor foolishly led with his right and missed. His glove slid clear on by Tommy's back and Tommy caught him coming in. He sunk his right glove clear to the elbow in Sailor's ribs. Adams' knees buckled and he fell face forward. Tommy was jumping up and down and pulling on the ropes. "Settle down, you little fool?" I hollered. "Settle down and wait for him to get up."

Sailor was up at nine and Tommy rushed him like a crazy man. He butted Sailor with his head and kneed him twice before he got his right hand in again. He was so excited he half shoved the Sailor down. I saw Adams was working for a rest to clear his head. Tommy was jumping up and down again. He'd lost his head completely. He'd have to learn how to finish a man if he was going to be a fighter. "Calm down! Calm down!" I kept hollering.

Sailor took nine and got up. Then Tommy was all over him again, rights and lefts on top Sailor's head, and his shoulders, on the arms, hips. Tommy was punching with the fury of an ocean gale and not putting a thing on any one punch. Around and around the ring they went, Sailor covering up and Tommy throwing punches. The crowd was standing up in the aisles and on the chairs. I was afraid to look at Barney. By the time the bell rang, Sailor got the bugs out of his head and was okay again.

"That's your round all right," I hollered—the crowd was making so much noise I had to. "Take your time. Don't waste so many punches. When you get a man groggy, all you have to do is get set and throw that right."

Tommy walked out flat-footed for the fourth round. Sailor charged. Tommy backed up. Sailor charged again. Tommy backed up. What he was trying to do, I didn't know. Then Sailor charged and threw a looping overhand right. Tommy started his right from the shoulder, inside Sailor's blow. Tommy's glove landed first, flush on the chin, and Sailor's arms dropped to his side. His eyes were glassy. He was standing with his back to the referee. I knew Sailor was out on his feet. Then Tommy let him have it. It was like hitting a man who is already knocked out. His head hit the floor with a thud. He lay on his side with his eyes closed. I was afraid for a minute he might be dead. They took the Sailor from the ring on a stretcher.

Tommy was so fagged out he needed one too. I had quite a time getting him through the crowd to the dressing room. His dad was waiting for us. He was sitting on the table with Pete beside him. Pete had his hand in his pocket. Barney was scowling at me and I could see he was sore.

"Please get off there and let Tommy rest," I said.

"Who are you to be telling me what to do? You're fired."

"The heck I am," I said. "I contracted to take care of your boy, that's all. I didn't contract to throw a fight. I said I'd take care of him, that's all."

Barney and Pete got up. Tommy stretched out on the table. He was still dazed and not thinking very fast. I washed the blood off his face with a wet towel. I cut the strings and pulled off his soggy gloves. His wraps were soaked with water. His hands were still solid as iron. I told him to get up and warm shower.

When he went in the shower r old man said, "I'll take him ov You're through. Understand, don't want a trainer around that trust."

"I don't want to fight for a n that I can't trust, either, and we haven't any contract between was the kid's voice. He was s in the door of the shower room. that was Sailor Adams when I there. I recognized him this n You hired him to take me, didn Well, what do you think of you now, after I licked him?"

"Son, if you still want to be a I'm through with you." Barney being fatherly. He was sore a going to have his own way. "If y to quit school and follow th racket, you can go to hell. Y there on your own money, too. never get another dime from me

"I don't want your tainted Tommy was just as sore as his c He reached for his shirt and tor ting it on. He jerked the shirt tore it into rags. Then he thre the floor. When he finished c he put his coat on over a swe His dad and Pete stood arou old man's lip was hanging out could hang your hat on it. After he walked out and Pete follow

"Well, we're on our own," said, looking at me.

"You better go tell your da sorry, Tommy."

"Oh, he'll get over it. We' fighting and fussing at each ot since I wore diapers. I would li it alone for a while, just to sh you and I could do it."

HE WALKED over to his closed it. I sat down on the didn't say anything. Tommy over to the window and fina "Well, what's the matter wi tongue? Do you want to be part me or not?" He was smiling said it. Then all of a sudden he "Say, Pop, we're broke. Have any money coming for tonight'

"Well," I said, "there's forty that Mike pays for curtain raise there's some more waiting for Tavern."

"How much?"

"Well, I didn't know what yo a while ago when you called th dough your dad makes 'tainte money used to belong to Sailor It doesn't smell exactly like lili valley, but it's ten thousand

"Wait a minute everybody! I just got a swell idea for a gag!"

Evil Under the Sun

Continued from page 22

'It a little like your puzzle, Ma- me, Poirot said. "One assembles e pi es. It is like a mosaic—many ors d patterns—and every strange- ape ittle piece must be fitted into owr lace."

'No isn't that interesting? Why, n su you explain it just too beauti- ly."

Poir went on: "And sometimes it like hat piece of your puzzle just w. ie arranges very methodically e pi s of the puzzle—one sorts the ors- nd then perhaps a piece of one or t it should fit in with—say, the r ru -fits in instead in a black cat's l."

'Wh if that doesn't sound too fasci- ting And are there a great many ces. I. Poirot?"

'Ye Madame. Almost everyone re i his hotel has given me a piece my uzzle. You among them."

'Me Mrs. Gardener's tone was rill.

'Ye a remark of yours, Madame, s ex edingly helpful. I might say it s ill ninating."

'We if that isn't too lovely! Can't u te me some more, M. Poirot?"

'Ah Madame, I reserve the expla- tion or the last chapter."

Mrs Gardener murmured, "If that n't j too bad!"

TER ULE POIROT tapped gently on the oor of Captain Marshall's room. side ere was the sound of a type- iter. A curt "Come in!" came from e ro and Poirot entered.

Cap n Marshall's back was turned him He was sitting typing at the ble t ween the windows. He did not rn h head but his eyes met Poirot's the irror that hung on the wall rectl n front of him.

'We M. Poirot," he said irritably, hat it?"

"A t usand apologies for intruding," irot id quickly. "You are busy?"

Mar all said shortly, "I am rather."

Poir said, "It is one little question at I v ld like to ask you."

"I'm ick of answering questions," arsh said. "I've answered the po- e qu tions. I don't feel called upon ansv r yours."

Poir said, "Mine is a very simple ne. C y this: On the morning of your ife's ath, did you have a bath after u fi ed typing and before you went t to ay tennis?"

"A t h? No, of course I didn't! I'd d a l th only an hour earlier!"

"Thk you," Poirot said. "That is l."

"Bu look here—Oh—" the other ause resolutely.

Poir withdrew, gently closing the oor.

Mar all said, "The fellow's crazy!"

SO 'S my turn, is it?" Rosamund Da ley said.

"Pa on?"

She ughed. "The other day the chief onsta e held his inquisition. You sat y. T ay, I think, you are conducting our o unofficial inquiry."

Herc e Poirot sat down beside her. hey v re on Sunny Ledge. Below them he se showed a deep, glowing green. arthe out it was a pale, dazzling blue.

"Yo are very intelligent, Mademoi- elle," oirot said. "I have thought so ver sn e I arrived here. It would be plea re to discuss this business with ou."

Ros und Darnley said softly, "You want t know what I think about the whole ing?"

"It would be most interesting."

"I think it's really very simple. The clue is in the woman's past."

"The past? Not the present?"

"Oh! not necessarily the very remote past. I look at it like this: Arlena Marshall was attractive, fatally attractive, to men. It's possible, I think, that she also tired of them rather quickly. Among her—followers, shall we say—was one who resented that. Oh, don't misunderstand me, it won't be someone who sticks out a mile. Probably some tepid little man, vain and sensitive—the kind of man who broods. I think he followed her down here, waited his opportunity and killed her."

"You mean that he was an outsider, that he came from the mainland?"

"Yes. He probably hid in that cave until he got his chance."

Poirot shook his head. He said, "Would she go there to meet such a man as you described? No, she would laugh and not go."

Rosamund said, "She mayn't have known she was going to meet him. He may have sent her a message in some other person's name."

"That is possible," Poirot murmured. Then he said, "But you forget one thing, Mademoiselle: A man bent on murder could not risk coming in broad daylight across the causeway and past the hotel. Someone might have seen him."

"They might have—but I don't think that it's certain. I think it's quite possible that he could have come without anyone noticing him at all."

"It would be *possible*, yes, that I grant you. But the point is that he could not *count* on that possibility."

"Aren't you forgetting something?" Rosamund said. "The weather."

"The weather?"

"Yes. The day of the murder was a glorious day but the day before, remember, there was rain and thick mist. Anyone could come onto the island then without being seen. He had only to go down to the beach and spend the night in the cave. That mist, M. Poirot, is important."

POIROT looked at her thoughtfully for a minute or two. He said, "You know, there is a good deal in what you have just said."

Rosamund flushed. "That's my theory, for what it is worth," she said. "Now tell me yours."

"Ah," said Hercule Poirot. He stared down at the sea.

"*Eh bien,* Mademoiselle. I am a very simple person. I always incline to the belief that the most likely person committed the crime. At the very beginning it seemed to me that one person was very clearly indicated."

Rosamund's voice hardened a little. "Go on," she said.

Hercule Poirot went on: "But you see, there is what you call a snag in the way! It seems that it was *impossible* for that person to have committed the crime."

He heard the quick expulsion of her breath. She said rather breathlessly, "Well?"

Hercule Poirot shrugged his shoulders. "Well, what do we do about it? That is my problem." He paused, then went on: "May I ask you a question?"

"Certainly."

She faced him, alert and vigilant. But the question that came was an unexpected one: "When you came in to change for tennis that morning, did you have a bath?"

Rosamund stared at him. "A bath? What do you mean?"

"That is what I mean. A bath! The

Find out about this

FIREPLACE

that Circulates Heat

Before you build your new home or camp, learn all the facts about this new-type fireplace. Find out how it works on an entirely different principle . . . how it warms the air in the entire room and *circulates warmed* air to far corners—even to adjoining rooms.

The Heatilator Fireplace puts MORE of the heat to work warming the house. Thousands of owners in all parts of the country say that it actually cuts heating costs spring and fall.

Don't build, or remodel, any fireplace—in home, camp or basement rumpus room—until you know how little it costs to own this modern fireplace. Mail the coupon today.

WILL NOT SMOKE

Concealed inside the masonry the Heatilator is a double-walled steel form around which any style of fireplace is correctly built. It eliminates faults of design that commonly cause smoking. Saves labor and materials.

Heatilator Co.
991 E. Brighton Ave., Syracuse, N. Y.

Please send me complete facts about the Heatilator Fireplace.

Folks, here's THE NEW VICKS INHALER!

Quick with its Relief. Easy to Carry. You Can Use it as Often as Needed

NOW TO ENJOY GREATER BREATHING COMFORT when a cold stuffs up your nose—carry this new Vicks Inhaler in your pocket or purse. Take a few "whiffs" whenever needed.

Developed by the makers of world-famous Vicks VapoRub—this new Vicks Inhaler is about the size of your little finger. And it is packed with effective medication that makes the nose FEEL CLEARER IN SECONDS!

By Makers of Vicks VapoRub

reeptacle of porcelain, one turns the taps and fills it, one gets in, one gets out and ghoosh—ghoosh—ghoosh, the water goes down the waste-pipe!"

"M. Poirot, are you quite mad?"

"No. I am extremely sane."

"Well, anyway, I didn't take a bath."

"Ha!" said Poirot. "So nobody took a bath. That is extremely interesting."

"But why should anyone take a bath?"

Hercule Poirot said, "Why, indeed?"

Rosamund said with some exasperation, "I suppose this is the Sherlock Holmes touch!"

HERCULE POIROT smiled. Then he sniffed the air delicately. "Will you permit me to be impertinent, Mademoiselle?"

"I'm sure you couldn't be impertinent, M. Poirot."

"That is very kind of you. Then may I venture to say that the scent you use is delicious—it has a *nuance*—a delicate, elusive charm." He waved his hands, and then added in a practical voice: "Gabrielle No. 8, I think?"

"How clever! Yes, I always use it."

"So did the late Mrs. Marshall. It is chic, eh? And very expensive?"

Rosamund shrugged her shoulders with a faint smile.

Poirot said, "You sat here where we are now, Mademoiselle, on the morning of the crime. You were seen here, or at least your sunshade was seen by Miss Brewster and Mr. Redfern as they passed on the sea. During the morning, Mademoiselle, are you sure you did not happen to go down to Pixy Cove and enter the cave there—the famous Pixy's Cave?"

Rosamund turned her head and stared at him. She said in a quiet, level voice, "Are you asking me if I killed Arlena Marshall?"

"No, I am asking you if you went into the Pixy's Cave."

"I don't even know where it is. Why should I go into it? For what reason?"

"On the day of the crime, Mademoiselle, somebody had been in that cave who used Gabrielle No. 8."

Rosamund said sharply, "You've just said yourself, M. Poirot, that Arlena Marshall used Gabrielle No. 8. She was on the beach there that day. Presumably she went into the cave."

"Why should she go into the cave? It is dark there and narrow and very uncomfortable."

Poirot was no longer looking out to sea. He was looking at Rosamund Darnley's hands as they lay folded in her lap. They were well-shaped hands, beautifully molded with very long fingers.

Rosamund, shooting a quick look at him, followed the direction of his eyes. She said sharply, "What are you looking at my hands for? Do you think—do you think—?"

Poirot said, "Do I think—what, Mademoiselle?"

Rosamund Darnley said, "Nothing."

IT WAS perhaps an hour later that Hercule Poirot came to the top of the path leading to Gull Cove. There was someone sitting on the beach. A slight figure in a red shirt and dark blue shorts.

Poirot descended the path, stepping carefully in his tight, smart shoes.

Linda Marshall turned her head sharply. He thought that she shrank a little. Her eyes, as he came and lowered himself gingerly to the shingle beside her, rested on him with the suspicion and alertness of a trapped animal. He realized, with a pang, how young and vulnerable she was.

"What is it?" she said. "What do you want?"

Hercule Poirot did not answer for a minute or two. Then he said, "The other day you told the chief constable that you were fond of your stepmother and that she was kind to you."

"Well?"

"That was not true, was it, Mademoiselle?"

"Yes, it was."

Poirot said:

"She may not have been actively unkind—that I will grant. But you were not fond of her—oh, no—I think you disliked her very much. That was very plain to see."

"Perhaps I didn't like her very much," Linda said. "But one can't say that when a person is dead. It wouldn't be decent."

Poirot sighed. "They taught you that at your school?"

"More or less, I suppose."

"When a person has been murdered," Poirot said, "it is more important to be truthful than to be decent."

Linda said, "I suppose you *would* say a thing like that."

"I would say it and I do say it. It is my business, you see, to find out who killed Arlena Marshall."

Linda muttered, "I want to forget it all. It's so horrible."

"*But you can't forget, can you?*" Poirot said gently.

Linda said, "I suppose some beastly madman killed her."

"No, I do not think it was quite like that."

Linda caught her breath. She said, "You sound—as though you *knew*?"

"Perhaps I do know," Poirot said. He paused and went on: "Will you trust me, my child, to do the best I can for you in your bitter trouble?"

Linda sprang up. "I haven't any trouble," she said. "There is nothing you can do for me. I don't know what you are talking about."

Poirot said, watching her, "I am talking about *candles* . . ."

He saw the terror leap into her eyes. "I won't listen to you," she cried. "I won't listen!"

She ran across the beach, swift as a young gazelle and went flying up the zigzag path.

Poirot shook his head. He looked grave and troubled.

INSPECTOR COLGATE was reporting to the chief constable:

"I've got on to one thing, sir, and something pretty sensational. It's about Mrs. Marshall's money. I've been into it with her lawyers. I'd say it's a shock to them. I've got pro... blackmail story. You remem... was left fifty thousand pound... Erskine? Well, all that's left ... about fifteen thousand."

The chief constable whistled.

"Whew, what's become of th...

"That's the interesting point, ... sold out stuff from time to ti... each time she's handled it in ... negotiable securities—that's to ... handed out money to someone ... didn't want traced. Blackmail, ...

The chief constable nodded.

"Certainly looks like it. ... blackmailer is here in this hou... means it must be one of two ... men. Got anything fresh on ... them?"

"Can't say I've got anything ... sir. Major Barry's a retired ar... as he says. Lives in a small h... pension and a small income fro... But he's paid in pretty cons... sums into his account in the last ...

"That sounds promising. W... explanation?"

He added: "…nd if … was one of the dope gang who …t her… t we'll have been instrumental …helpi… Scotland Yard to solve the …pe… oblem. In fact, take it all …ound, … e way or another, we've done …etty w… l."

An u…illing smile showed on Col…tes fa… e. He said, "Well, that's the …, sir. … By the way, I checked up on the writer of that letter we found in her room. The one signed J. N. Nothing doing. He's in China safe enough. Same chap as Miss Brewster was telling us about. Bit of a young scalawag. I've checked up on the rest of Mrs. Marshall's friends. No leads there. Everything there is to get, we've got, sir."

"So now it's up to us," Weston said. He paused and then added: "Seen anything of our Belgian colleague? Does he know all you've told me?"

Colgate said with a grin: "He's … queer little cuss, isn't he? D'you know what he asked me day before yesterday? He wanted particulars of any cases of strangulation in the last three years."

Colonel Weston sat up. "He did, did he? Now I wonder—" he paused a minute. "When did you say the Reverend Stephen Lane went into that mental home?"

"A year ago last Easter, sir."

Colonel Weston was thinking deeply. He said, "There was a case—body of a young woman found somewhere near Bagshot. Going to meet her husband somewhere and never turned up. And there was what the papers called the Lonely Copse Mystery. Both in Surrey if I remember rightly."

His eyes met those of his inspector. Colgate said, "Surrey? My word, sir, it fits, doesn't it? I wonder . . ."

HERCULE POIROT sat on the turf on the summit of the island.

A little to his left was the beginning of the steel ladder that led down to Pixy Cove. There were several rough boulders near the head of the ladder, he noted, forming easy concealment for anyone who proposed to descend to the beach below. Of the beach itself little could be seen from the top, owing to the overhang of the cliff.

Hercule Poirot nodded his head gravely. The pieces of his mosaic were fitting into position. Mentally he went over those pieces considering each as a detached item:

A morning on the bathing beach some few days before Arlena Marshall's death.

One, two, three, four, five separate remarks uttered on that morning.

The evening of a bridge game. He, Patrick Redfern and Rosamund Darnley had been at the table. Christine had wandered out while dummy and had overheard a certain conversation. Who else had been in the lounge at that time? Who had been absent?

The evening before the crime. The conversation he had had with Christine on the cliff and the scene he had witnessed on his way back to the hotel.

Gabrielle No. 8.

A pair of scissors.

A broken pipestem.

A bottle thrown from a window.

A green calendar.

A packet of candles.

A mirror and a typewriter.

A skein of magenta wool.

A girl's wrist watch.

Bath water rushing down the waste-pipe.

Each of these unrelated facts must fit into its appointed place. There must be no loose ends.

And then, with each concrete fact fitted into position, on to the next step: his own belief in the presence of evil on the island . . .

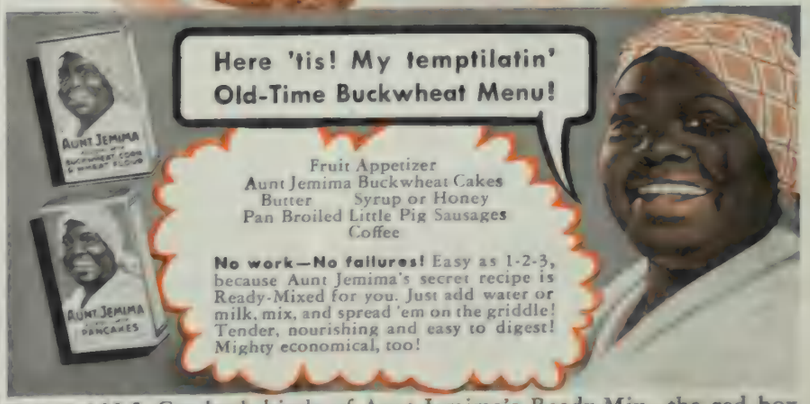
Evil . . .

He looked down at a typewritten list in his hands.

Nellie Parsons—found strangled in a lonely copse near Cobham: No clue to her murderer ever discovered.

Nellie Parsons?

Alice Corrigan.



He read very carefully the details of Alice Corrigan's death.

By Bits and Pieces

TECHNICAL experts in Detroit and Washington have "regretfully" turned down Walter P. Reuther's plan for mass production of 500 fighting planes a day.

Reuther's theory was—and still is—that enough machine capacity now exists in Detroit and various near-by automobile plants to turn out, if these machines were integrated regardless of who owns them, the aforesaid 500 planes a day, and this without cutting into civilian car production.

We wouldn't know about these intra-industry disputes. What we do admire and heartily approve about the whole episode is that Reuther made the suggestion at all—Reuther, who is head of the C. I. O.'s auto worker's union. The fact that a labor leader advanced this suggestion of his own free will should put a quietus on the talk about how labor can be expected to co-operate grumpily and grouchily at best in the defense program, if at all. As we remarked recently in this space, no group in this country has a monopoly on patriotism, and this incident serves to prove that remark.

Certainly the general idea of production by "bits and pieces," as the British call it, has proved practicable in wartime Britain. All it means is that production of various war-machine parts is farmed out to big or little factories or even to individuals equipped to produce them, the completed parts then being put together at regular assembly plants.

There are a lot of such factories and individuals around this country, and the bit-and-piece production idea, we should think, ought to be applicable to plenty of things in addition to airplanes.

In which connection we've been wondering whether bit-and-piece production of Army officers wouldn't be feasible. West Point, of course, does a fine job. But how about various other military colleges and prep schools around the country—V.M.I., Norwich, Culver, Shattuck, New Mexico M. I., New York Military Academy, The Citadel, Staunton, Augusta, etc.?

Wouldn't it be possible to integrate these schools and their plenteous equipment in some scheme for rapid production of reasonably good second lieutenants, or perhaps top sergeants eligible for commissions after quick round-out training? V.M.I. and Norwich top-flight graduates, of course, are eligible for commissions: but couldn't such eligibility be extended to various other military schools, with appropriate relaxation of the rules on age limits and college degrees?

It's possible that we've been overlooking a good bet there. We put out the suggestion for what it may be worth to the War Department.

Types of "secondary invaders" found on mouth and throat surfaces.

These germs may make a cold serious—get after them with

Listerine quick!

DOCTORS call such threatening bacteria the "secondary invaders." They are among the many, say numerous authorities, that so often complicate a cold . . . make it troublesome . . . are responsible for most of the symptoms that you are all too familiar with. Millions live even in normal mouths and throats, apparently causing no harm. Then, suddenly, when body resistance is weakened by fatigue, chill, wet feet, drafts, they frequently strike with quick ferocity. Invading the tissue, they set up infection and what started out as a simple cold may become a trying one.

Kills Millions of Germs on Tissue Surfaces

You can see how important it is to guard against these invaders . . . to systematically reduce their numbers before they strike. So we say: As a regular precaution against colds and as an aid in the treatment when a cold is already started, gargle full strength Listerine Antiseptic.

Listerine Antiseptic reaches way back in the throat to kill millions of these "secondary invaders" on surface tissues. Actual tests showed bacterial reductions ranging to 96.7%, even 15 minutes after Listerine Antiseptic gargle. Up to 80% an hour afterward.

Listerine's Great Record

Clinical tests made during nine years of painstaking research actually showed that regular twice-a-day users of Listerine had fewer colds, milder colds, and colds of shorter duration than those who did not gargle with it.

With this evidence before you, isn't it a good idea to use Listerine Antiseptic systematically, especially during the winter months?

COVER KARL MILROY

ANY WEEK

OF COURSE, it's our own fault. Competent legal authority has informed us that there is no law compelling anybody to attend a discussion of The Problems of Our Confused Youth. Nevertheless, we were invited and we went. The whole subject, with many rocky detours, was discussed by five elderly ladies and gentlemen, all of whom sympathetically became as confused as possible. We managed to grope our way out just before the talk became dangerously acrimonious. But not before we had begun to suspect that confusion knows no bottleneck. So we began to make inquiries. Our chief reward was a talk with a bright young man, recently graduated from school and now engaged in trying to make something coherent of his first job. He's working in a large airplane plant. He said he liked it. We urged him to be more explicit. He tried. "All I know," said he, "is that I am a helper to a man who makes something that goes on the top of something that's made somewhere else to be attached to a gadget that the pilot of an airplane does something to to make it go off. They're going to be sent to England if they work." Whereat, we quit our inquiry, feeling a trifle more tolerant of the five elderly ladies and gentlemen who had launched us on our vague little survey. We learned, too, that after we had gone, the conference discussed the possibility of becoming a permanent body to be known as The Clear Thinkers of America.

AND a great service they might render, too. Unless there's an unlooked-for change—in Washington, for example—a certain amount of confusion is likely to creep into our rearmament, aid to Britain, fiscal affairs and other objectives and enterprises. It happens in the best organizations in extraordinary circumstances. For example, there was the unidentified crisis in Hollywood that brought together some of the nation's best minds, including our associate Kyle Crichton. It had something to do with a movie. After the argument had seethed for about an hour, an associate producer got completely derailed and launched upon a tirade against union labor, thereby creating confusion that lasted until the chairman screamed: "Think, think, you damned fool, think!" The associate producer came back: "Think of what?" The chairman was stopped but only momentarily. Riffling through the papers on his desk, he demanded: "What were we talking about, anyway?"

OF COURSE we could enlist in a pilgrimage now being organized by another member of this staff. Jim Marshall. Mr. Marshall, having just completed a ten-thousand-mile look around our Army training camps, is thinking of settling down in the Uncompahgre Valley. The Uncompahgre Valley is in southwestern Colorado. That's as definite as we can be, Mr. Marshall telling us that even the few people living in the Uncompahgre Valley have no idea just where it is. He has selected it because "there are fewer people there to be wrong about what's going on—not that they know what's going on."

WHEN Mr. J. H. McCluer of Cody, Wyoming, heard that Major General E. B. Gregory, our Army's Quartermaster General, expected the automobile industry to equip our troops with 250,000 motor vehicles by next August, he sat down and wrote Adolf Hitler a letter of warning and invitation. He invited Mr. Hitler to come over this spring and spend a nice, balmy week end motoring over a few of America's more popular highways. Mr. McCluer hopes it will be one of those week ends when all of America's 25,000,000 motorcars will be out, all of them making their conventional unsuccessful effort

to arrive at the same destination at the same time and on the same piece of road. He would then tell Mr. Hitler that by late summer 250,000 more cars will be added to the carnage and that there is a plan afoot to send them all to Europe for a race from Paris to Berlin. It is Mr. McCluer's belief that Mr. Hitler will at once call up Berlin ordering the German government to negotiate for peace at any price immediately. If the 25,000,000 originals have previous engagements, Mr. McCluer is convinced that it will be necessary to send only the additional 250,000. At the wheels he would put 250,000 Sunday drivers, "give each of them a few drinks and turn them loose on the highways of Europe. If one American motorist, either sex, can't wreck at least four German tanks and pile up ten or twelve corpses, then this country is slipping." Anyway, Mr. McCluer expects Mr. Hitler to call the whole thing off.

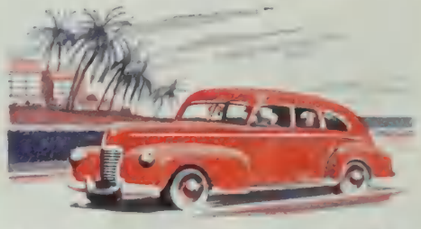
Price, 5 cents a copy; in the United States: $2.00 a year; in the United States and Possessions, also in Argentina, Bolivia, Canary Islands, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, El Salvador, Guatemala, Haiti, Honduras, Labrador, Mexico, Nicaragua, Panama, Paraguay, Peru, Spain and Colonies, Uruguay, Venezuela; in Canada, 7 cents a copy; $3.00 a year; two years, $5.00. Rates for foreign subscriptions including postage: $5.50 a year. Remittances should be by money order or check in United States funds to The Crowell-Collier Publishing Company, Springfield, Ohio. Changes of address should reach us in advance. Give both old and new addresses.



To be sure you're getting the best performance be sure your spark plugs are CHAMPIONS!

Eastern Massachusetts Street Railway Company, using Champion Spark Plugs exclusively in 658 buses, has twice won national competitive awards for efficient low cost operation.

No other spark plugs have the Sillment seal which makes Champions permanently free from troublesome leakage common to ordinary spark plugs. Tiny pinches of this Sillment powder compressed around the center electrode and the insulator shoulder form a seal preventing overheating, rough, uneven and wasteful engine operation.

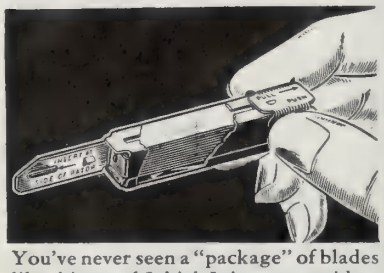
Cars run smoother, have more power and use less gas when equipped with Champion Spark Plugs with the sensational Sillment seal.

Spark plugs were never more important than today—never more determinative of the degree and quality of the performance you get from your car. Champion Spark Plugs—the spark plugs champions use—offer definite performance advantages not obtainable with any other spark plugs.

Champion's exclusive Sillment seal alone, described above, is a feature which will make it worth your while to insist on Champions when you buy spark plugs. Remember, too, that Champion manufactures spark plugs exclusively, and naturally is more alert to the importance of spark plugs in high-compression engines using modern high-power fuels. For better performance and dependability demand Champion Spark Plugs.

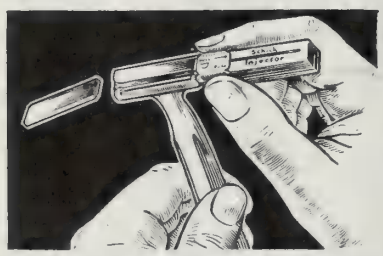
You're always ahead with Champion!

SPARK PLUGS

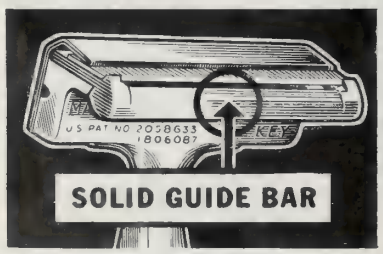


Meet the Latest Edition of the only Razor with automatic Blade Change!

You're looking at the new, improved model of the only razor that changes blades automatically! The razor that has the greatest improvements in safety razor design in more than 35 years! It gives such a cleaner, smoother, more comfortable shave that more than 5,000,000 men have switched to it!



It's streamlined—every inch of it! But not just for "looks." Basic simplicity of construction that does away with ordinary "come-apart" razor design makes it simple and modern in appearance.



SCHICK
INJECTOR RAZOR
MAGAZINE REPEATING RAZOR CO., Bridgeport, Conn.

You've never seen a "package" of blades like this metal Schick Injector cartridge. It actually holds the blade edges suspended in space. Nothing can rub or dull them. Comes packed with 12 or 20 blades.

Blade changed quick as a wink! A pull and push on the Injector shoots out the old blade, slides in a fresh one instantly. Nothing to take apart. Nothing to put together. Hands never touch blade.

Perfected solid "toothfree" guide bar with roughened grip surface stretches and flattens the skin directly in front of the blade edge. "Times" each whisker to pop up out of natural hair pit directly in front of blade edge for cleaner, more comfortable shaves. No nicks, cuts or irritation.

NEW KIT, complete with the 1941 streamlined one-piece Schick Injector Razor, cartridge of 12 Schick Blades, in new rich-looking lustrous black plastic case with built-in used blade receptacle.

ONLY $1.00

Wing Talk

OUR air strategists hope your understanding of their problem won't be entirely conditioned by the catch-phrase "mass production." They point out that total air defense cannot be achieved with planes and factories alone. Consider, for example, highways and landing fields.

Germany's successful exploitation of air force on the Continent last year was in measure due to her organization of highways and landing fields. These were integral parts of her thorough preparations.

In all peaceful elements United States highways are peerless on this earth. But airmen say they lack auxiliary values today demanded of national roads for complete application of air power, while militarists say they are not adequate for the beatings imposed by tractors, heavy guns, tanks. As, for instance, the vast and unparalleled sweep of Germans from Poland to the Westwall that I witnessed in the first autumn of this war.

The Reich's "autobahnen" network was designed for just such an armed tide. Moreover, its secondary importance for practical tie-in with the flight arm was always calculated. More than 4 years ago you read in Collier's of those new German highways swerved in many places into the direction of prevailing winds, bald of trees and poles or obstructions that would hamper use as landing strips. You read, too, of squadrons observed practicing landings and take-offs on those roads, attended on the ground by petrol trucks and by compact motor units that were virtually portable repair shops.

Our national highways were conceived in happier mood.

Our Army and Navy between them now have 90 land airports. In 1935 they had 89. Also in 1935, there were 2,264 nonmilitary fields of all kinds—private, commercial, municipal, intermediate, and miscellaneous. Today there are only 2,246. Springfield, Missouri, furnishes an ominous example. Springfield is a fine city of about 60,000, importantly located with respect to lumbering, agriculture, mining and husbandry. It is an authorized stop on American Airlines, but has not been served for six years because its airport is not in condition for large-plane operations. Albany, capital of New York, was suspended from airline service most of th years for a similar reason.

Of civil airports, no mo per cent are suitable for ful tary use. Yet civil fields sh backbone of wartime air d ery one of Germany's hund airports was deliberately fr as useful to the Luftwaffe as handel. Improvements have in many of our fields, yet t offset their decline in num than ever we need abundar not alone for defense, but for the big increase in priva pilots. This spring, thanks la Civil Air Training Program be more than 100,000 fliers in States exclusive of profes military ones. Your news concerned with Hurricane Messerschmitts. But those names young folks are banc talk is of Piper Cubs, Sti combes, Aeroncas, Taylors, I and others—just as when boy you discussed Appersons White Steamers, Locomol wells, Stutz Bearcats and su and ear-filling cars. The n we have achieved to "mass' lies in the light planes. Cur than 80 per cent of civil p facture is of single-engine or seaters. The chief handi growth of this market is the fields. Barred from militar from certain airports, our bo with private and other nor licenses have too few places

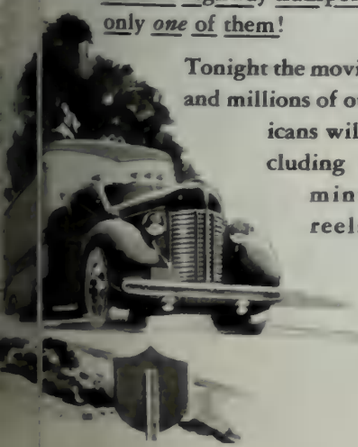
SNAPPY LOOKING OUTFIT, MISS —

I ROLLED IT N LAST NIGHT



***Today You Get Better-Looking Clothes—Better Food—More of Everything—for Less Money! Want to Know How—and Why—Motor Trucks Make* Your Budget go so Much Further?**

* * *

WHEN you flashed by that truck last evening—you passed your new Spring suit on its way into town!

Just a few hours ago it was only an *idea* in the mind of a fashion designer. And today you're wearing it to tea!

Bringing you the latest styles — days, even weeks ahead of time — is one of the miracles of modern highway transportation. But only *one* of them!

Tonight the movies that you and millions of other Americans will see — including up-to-the-minute news reels — were delivered all over the nation simultaneously by truck.

Trucks bring you strawberries in February . . . fresh seafood in June. And at prices practically anyone can afford!

TRUCKS CUT COSTS

Due to their overall speed, flexibility, and economy — trucks save you money on everything you buy. They travel the shortest routes . . . are subject to fewer delays.

Motor freight requires less packing and crating, too. A truck can load at the door of the shipper—and unload at the door of the store. So, there's less handling — less chance of loss. And all those economies are reflected directly in the price tags!

* * *

Today you can be thankful that America has had the foresight to develop this modern form of transportation.

Tomorrow you can look to still greater benefits . . . as Motor Freight continues to grow!

* * *

FREE MOVIE! — *"Singing Wheels" — Thrilling 22-minute feature, for club meetings. Inquire — your State Motor Truck Assn., affiliated with ATA.*

A FEW POINTS TO REMEMBER—

In the last 10 years, special highway taxes collected from trucks were enough to build 137,000 miles of modern roads.

* * *

Good roads — and modern truck equipment — are vital to National Defense.

* * *

More than half the trucks in the world are serving the American Public.

* * *

1 in every 10 pay checks in America comes from Trucking.

Your Voice Is You . . .

Do you realize the value of a smile when telephoning? It helps a lot. Of course, the other person can't see you but the smile is there just the same. It's in your voice. And it reflects a friendly, cordial personality.

In times like these, "The Voice with a Smile" is especially important and worth while. It is a characteristic of the American people. And one of the fine traditions of the Bell telephone business.

[illegible]ugh[illegible]e making about itself.
[illegible]eel his boat gritted against
[illegible]. H[illegible]limbed clumsily into the
[illegible]wat[illegible]nd tossed ashore his fish-
[illegible]and[illegible]atch. He pulled his boat
[illegible]ove [illegible] normal tide line. In an
[illegible]y wo[illegible]he wouldn't have both-
[illegible]e kn[illegible] this weather. Fog would
[illegible]ste[illegible]hily during the night, and
[illegible]ung[illegible]e whole coast line would
[illegible]ed [illegible]l still as a corpse.

The village street ran down a cutting in the cliff's face. He walked stiffly, like an old man. But he wasn't old. He tried to remember how Kathy had described him in that book of hers. "A golden fruit withered overnight by a black frost." A lot of people must have recognized him in her wilted hero. They would remember that she'd married Peter Desmond and subsequently tossed him overboard like one of his empty bottles.

The street was quiet as a graveyard. Like ancient yet honored tombstones the whitewashed fishermen's cottages straggled up the hill on either side of him. The "Sailor's Anchor" stood halfway up. Its black blinds were already drawn so that its face had a blank, livid look. But Desmond smelled warmth and drink and life. He pushed open the swing door and stood still for a moment getting his eyes used to the sharp juxta-

[illegible]one among a thousand craft,
[illegible] the way home under a hail of death

position of light and shadow. The low-ceilinged barroom was hot and thick with men. Though he rarely spoke to them he knew most of them by name.

Desmond lurched over to the bar. Fred Fletcher, a lusty hulk of a fellow with the squally temper of a south-eastern wind, leaned over his counter, his square-jowled face between his fists. There was violence in his immobility. When he saw Desmond he stood up glowering. The men around him came back to life. They clenched and unclenched their great hands that had been held rigid too long. Their eyes, turned on the newcomer, were level and dangerous.

Desmond's money, tossed on the counter, made a shrill sound, like a woman's voice breaking in on a heavy masculine quiet.

"Two quarts," he said. "This feels like a wet night."

Fletcher set down the bottles. "You can keep your money," he said. "I'll take the loan of your boat instead—"

"For how long?"

"Maybe a night—maybe longer."

"For what?"

"That's my business."

DESMOND uncorked a bottle. After a first gulp he felt better. He could return that hostile stare with amusement.

"Well, boys," he said. "What tune do you dance to this time? Are you to lay mines? Are you to take your nets out so that the nice people of this fair island shan't miss their morning kipper? All right. Dance, my hearties. But take a look at me first. Twenty-odd years ago I was a beauty. A glamor boy—till they made a blasted hero of me. Blasted's the word. Who wants to look at a face that's been patched by the smartest surgeons in England with a bit of this and a bit of that? Who'll want to look at you tomorrow morning—except the fish—"

He took another mouthful. He lurched to the door and over his shoulder gave them his distorted grin. "I'll tell you something, my hearties. Life's all there is to living. The rest's just hot air and balderdash. Die for it, my lads, and you'll never know what you fought for. If you live, like me, you'll find out, and you'll wish you were dead. And if anyone touches my boat," he said as a parting shot, "I'll smash his face."

He went out with the uncorked bottle upright in his pocket and began to climb the hill again. Then the last of the little white houses released their hold on him. He took to the sheep track that led up onto the downs. Bleak loneliness closed in about him. He was used to loneliness. He wrapped it about him as a cloak against the bitter winter of his discontent. But he was glad to see the huddled shadow of his cottage, waiting faithfully, like a shaggy, uncouth watch-dog, in a fold of the headland.

The door that Desmond had left closed stood open. That in itself was nothing strange. The latch was rotten. A ghost could have shifted it. But to the one room that housed the squalid confusion of his life something profound had happened. The familiar things were in their places—the unwashed pots and pans in the greasy sink, the unmade bed by the window.

"And who the hell," he asked, "are you?"

But it was a stupid question. He knew at once. This boy was himself risen from the dead. This gangling, rawboned youngster, all wrists and knuckles and brown tousled hair was Peter Desmond before maturity had shaped him into a thing of beauty, if not a joy forever. But the eyes were not his. They were Kathy's—a clear hazel, bright with a cruel candor, looking out from behind their horn-rimmed glasses like innocent, gallant pioneers onto an unchartered country.

"My God—Kathy's son—and so, doubtless, mine."

"I'm Peter," the boy told him. "Young Peter."

"Of course. You were Peterkins when I saw you last, just about the time when your mother decided rightly that I was not fit company for a nice child. May I ask what made her change her mind?"

"She hasn't changed. I mean—I didn't ask her. I came on my own—to find you."

"Just filial curiosity, eh?"

"Listen—please, sir. We haven't much time—I know you're angry with her. But you mustn't be. It was because she still cared that she wanted to understand what had happened—to you and her. She wanted me to understand—"

"That's interesting. Sit down, my dear fellow." With an ironic gesture of hospitality the older man swept a chair clear of his soiled clothes. The boy obeyed him. But in his attitude was tensity and haste.

"P'raps because I'm young, too," he said, "I know how smashed one could be. It wasn't just dying. Dying might be easy. It was living—with everything gone—not even sure it was worth while. I mean—that was the real sacrifice—the losing one's faith in sacrifice."

"What profundity!" said Desmond.

"YOU'RE laughing at me, sir. But you mustn't. It's awfully serious. That was why I had to let you know how we feel—youngsters like myself. We think what you did was great. If you hadn't chucked up everything you had—even what you believed in—I—we couldn't believe now—"

"What do you believe, Peterkins?"

"That it *was* worth while—that it *is* worth while."

"Thank you. But I should still like to know what you want of me—"

"I want you, sir."

"For what?"

"Listen, sir. You can hear the guns. They're much closer than they were yesterday. And they won't let me fight. I'm too young. It's my damned eyes. The glasses, you know. They say—if there isn't a miracle—we're lost—you and I and all those others. That's why I thought if you and I stoo might be able to do some

"I see. Our dear coun usual in a damn' mess a son should stand shoulde But as it happens I don't for the country or for think it means to you." H the sink, and fishing out it and took a long, cons "Not a single damn," he s

"Listen, sir." The boy s you who don't understan you who aren't grown up. just where you were w knocked out. You were a thought because you ga you'd a right to everyth cause you'd put up a g show had to be good. I stuff. We know better learned something—that w rights—that no one owes All we've got is a great hands. It may last a Sometimes we'll win ar we'll be licked. If we can bit of ground we've won w our job—"

Desmond set down his ranting, Peterkins," he sa damn' nonsense set to words."

"You say that because job. But other men lost

"The lucky ones."

"We all die," the boy p lucky ones die for som while—splendidly."

"Then I shall die disg nothing at all—and drun He stopped short. "By a derful, Peterkins, I belie here to die with me."

"Yes, I did. But it was sense." The young voice a sort of furious grief: "E dead already."

"Get out, Peterkins," softly, "or I may kick yo

ashful Brenda

yle Crichton

Marshall may not be a wizard in the oarlee, but she can dream up a swell ance with a movie script in her hand

PHOTOGRAPH FOR COLLIER'S BY CHARLES KERLEE

ETHER Brenda Marshall has sense of humor is beside the int. She may have it; she may it ha it. The most that can be re- irted that she is a serious lady who is lit facility at chitchat. This is defic acy in Hollywood, where fast lk is reasured. Through years of actic at the art, the colony has de- lope language that is quite special. consists of a rapid-fire and endless ries allusions and abstruse gags, and rend does not operate too briskly in is in change.

The ct that this hasn't injured her im c er may be set down to the cir- umst e that an actress is confined trictly o the words of the script. In his fi she is all right. At least War- ers k p giving her such parts as The ea Hel k and East of the River, and she eeps ting them competently. We aentic the matter only to show that it akes kinds to make up an industry.

Alth gh her experience on Broad- way w confined to one Federal Thea- er Pro ct show, she is just beginning o rid r mind of the impression that he st is dominated by a group of white- ed figures bearing aloft torches f pur hite flame. Just when she took he vo to uplift the drama is not clear ut sh recalls that slight twinges were eginn g to affect her even in those days w n she was still living on a sugar planta n in the Philippines. She was Ardis kerson at that period and her father was overseer of a large establishment on the island of Negros. Ardis (the future Brenda) lived on the island until 1930, when her father decided she needed the benefit of American training and sent her to San Antonio, Texas, where she lived with her stepmother.

"They looked at me pretty strangely down there at Alamo High and kept insisting that I do the hula-hula, and I never could get them straightened out about Hawaii and the Philippines and I never could convince them that I was an American of Danish extraction who just happened to be born over there."

Strictly No Improvisations

The acting thing was so firmly embedded in her mind that when she went up to Texas Teachers College for Women, at Denton, she specialized in voice, speech and dramatics. By the end of the two years the stage mania had her completely. There was nothing to do then but hie herself off to New York and enroll in Madame Ouspenskaya's dramatic school. Ouspenskaya's success as a teacher is so well established that it will do no harm to know that the school almost ruined our Brenda. Again it was her own fault. She was good at speaking lines but when Ouspenskaya asked for improvisation, that business of making up actions as the player went along, Brenda was stuck.

"I always selected the part of a deaf mute," says Brenda, "and then just acted dumb. I'm not joking about it—I really did that."

Brenda was always hoping that they would put on a complete play some day and Ouspenskaya was always promising it and never getting around to it. Instead the improvisations went on endlessly and Brenda developed an inferiority complex. She could act when she knew what was to be acted but her imagination was on the down side.

"Now, we'll take this situation," the teacher would say. "The father is a drunkard and the daughter comes home from Vassar and brings with her a man from Williams who wants to marry her. Now, we'll improvise on that."

Without an instant's hesitation the other students would wade right into a soft one like that, making up lines and situations on the spot and weaving a great drama from it. In panic Brenda would assume the role of a maiden aunt, also a dipsomaniac, who slept fitfully in a chair and occasionally lifted her besotted face to mumble, "Whash thish all about?"

As if this weren't bad enough she lived in one of the many maidens' retreats in New York, those faintly virginal institutions where man can get no farther than the reception room and rules are strict for the girls. It didn't make life in New York very exciting for our heroine.

So the first summer after she came to New York, she was pleased beyond measure to get a job with the Peterboro Players in New Hampshire. The company was directed by Richard Gaines and drama was taken seriously. Having a script before her and imbued anew with ambition, Brenda swung right into the spirit of the joint. She not only acted in everything the company presented but she also married Mr. Gaines. They lived on their two salaries and a cloud of dreams.

Movies? Phooey!

"Nobody in the world was ever as solemn as we were," she says. "The sanctity of the stage, the great mission of the drama and all that. We scoffed at Hollywood and the movies."

When the usual movie talent scouts came around on the usual routine visits, she refused to see them. They weren't particularly anxious to see her but she felt insulted when they went through the motions of doing their jobs. Then one night after doing She Stoops to Conquer, they met a young Oxford graduate named Hugh MacMullin.

"We liked him. He seemed to feel toward the stage as we felt. When we learned he was a screen talent scout with Warners', we froze up and practically asked him out of the house."

Next year he was back again insisting that she make a test and finally she

One-Trip Darling

By Richard Connell

ILLUSTRATED BY EARL BLOSSOM

Mrs. Darling didn't care for plumbing. Mr. Darling did. An American dream that was like a nightmare for the happiest couple in Ashtabula

YES, I'm Darling. I'm *the* Darling. You've seen my face and name. I'm the Fellow with the Fish, to wit: A. B. Darling, retired, of Ashtabula, Ohio.

At times it's tough to be a man. If a woman doesn't like the name she was born with, she can change it. Same with her face. But a man's got to make the best of his.

I've made out pretty well, as a matter of fact, for a freckled-neck with a pushed-up bugle and a mushy tag. You can readily see how it would not help a plumber to have to advertise: "For your new house, get a Darling bathtub."

When I was a bashful young punky-dunk, learning my trade, I used to blush like a tomato when the boss said in front of strangers, "Hand me that wrench, Darling." So, when I set up my own shop, I called myself, "One-Trip Darling, The Plumber with a Conscience." Now everybody calls me One-Trip, even my wife.

On the ninth of last May I finally got to be fifty. I put in a day of work, and I was back in my shop, getting the putty out of my ears, when in marched a large, serious man and said, "I'm Higby from headquarters."

Now, offhand, I'd say I'm the most respectable fellow in Ohio, but I gulped, "I didn't do it." I don't doubt I looked as guilty as sin.

"I'm from the home office of the Frugality Insurance Company," he said, and grabbed my hand and pumped it as if he were jacking up a car. "Congratulations, Darling!"

I said, "What for?" "On your retirement," he said. "When did I retire?" I asked. "Today," he said. "I'll bet you're mighty glad you took out one of our retirement annuity policies twenty-five years ago."

"I am now," I admitted, "but there were times when I wasn't." "When was that?" he asked, and I said, "The first of every month." He laughed like a man who had taken lessons, and said, "Well, from now on, Darling, *we* pay *you*. Yes, sir, fifty dollars each and every week. All you have to do is loaf and fish. Pretty soft for you, hey Darling?" "It would be softer," I said, "if I liked to loaf or fish." He said, "Well, then, what is your hobby?" and I said, "Plumbing." And he laughed again on the company's time. Then he said, "Of course, you won't mind if we hold you up as an example?" I said, "Of what?" He said, "Of a man who looked ahead."
